proposes changing after 2 years the rules that govern the way an institution does business and suggests that this should be a model for other Federal agencies facing rapid change in the industries they regulate. While flexibility is indeed a commendable goal, regulations which are constantly changing create a great degree of uncertainty in the market place and make it extremely difficult for thrifts to conduct business in an orderly fashion.

In conclusion, I again commend the committee on their work and thorough presentation of a very serious and complex problem. Thank you, Mr. Speaker, for allowing me the opportunity to express my views on this subject.

MEMORIAL TRIBUTE TO LINDA M. BILLINGS

HON. SALA BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mrs. BURTON of California. Mr. Speaker, by now, many of you have heard of the tragic slaying of Ms. Linda M. Billings who was an employee of the Environmental Protection Agency. She was brutally attacked and killed by a young man in a robbery attempt as she worked late in her office on the day after Thanksgiving.

It was typical of Linda's dedication to public service that she was in her office at this time. Her memory, for me, will be one of energy, intelligence and compassion—attributes she shared wherever she went.

My strongest memories of Linda are from the period when she worked with the Sierra Club, as one of their staff members, in the 1970's. For many years, Linda worked in the Washington office of the Sierra Club, serving part of that time as their chief lobbyist on efforts to expand Redwood National Park in northern California. She spent many hours on this project with my husband, Phillip, who was then chairman of the Subcommittee on National Parks.

Redwood National Park was eventually protected by an expansion of 58,000 acres and this accomplishment was due, in no small measure, to the efforts of Linda and of others who wanted to preserve these ancient giants for future generations to enjoy.

Following her Sierra Club tenure, Linda joined the Environmental Protection Agency in 1978 in the office of Pesticide Programs. She was selected to be the first Farm Safety Coordinator in 1980, where she was responsible for coordinating all EPA activities to protect farmworkers from pesticide hazards.

At the time of her death, she was preparing a revision of the EPA's Farm/Farmworker Protection Regulations, this was a major rulemaking effort to upgrade current EPA standards to protect farmworkers.

Linda's commitment to the present, her concern for the future and her care for others are what made her special. Her determination and ability to get things done make her loss especially hard for all of us.

One of her colleagues at the EPA said this about her, "She was compassionate, yet tough and aggressive when working to protect farmworkers. Her energy, knowledge and commitment will be sorely missed at the EPA." Indeed, even though Linda's life was short, she left a marvelous legacy for us all in the way she lived.

GOUVERNEUR HOSPITAL, A CENTURY OF CARING: 1885-1985

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. GREEN. Mr. Speaker, Gouverneur Hospital, located in the Lower East Side of Manhattan, celebrated its 100th anniversary on October 10, 1985.

The hospital opened in 1885, when Grover Cleveland was serving his first term as President, David B. Hall was Governor of New York, and William R. Grace was serving his second term as mayor of New York City. Named after one of the streets that it was first built on, Gouverneur Slip, the hospital has grown from a 50-bed unit to its current 196-bed facility, exclusively for geriatric care.

Gouverneur is also known as the "Hospital of Firsts." Emily Barringer, a physician at Gouverneur, was the first woman to ride on an ambulance while serving the Bowery. Gouverneur was the first municipal hospital to open a TB clinic. Charles W. Stokes, Gouverneur's first house surgeon, later became the first Surgeon General of the U.S. Navy. The hospital established the first day camp on a ferry, the Westfield, for undernourished adults and children. Gouverneur Hospital is also first in the minds and hearts of people in the community.

Mr. Speaker, I ask that my colleagues join me in commending Gouverneur Hospital for 100 years of dedicated, community service.

CONGRESSIONAL SALUTE TO THE HONORABLE STATE SENATOR JOSEPH HIRKALA OF NEW JERSEY, ESTEEMED CITY CLERK, COMMUNITY LEADER AND GREAT AMERICAN

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. ROE. Mr. Speaker, on Friday, January 17, 1986, the residents of the city of Passaic, my congressional district, and State of New Jersey will join together in testimony to a distinguished State senator, outstanding community leader, and good friend, the Honorable Joseph Hirkala of Passaic, NJ, who has announced his retirement from his high office of public trust with the city of Passaic where he has served the citizens of Passaic since 1948 as assistant tax assessor, registrar of vital statistics, supervisor of local public records, and assistant city clerk prior to his appointment as city clerk on January 1, 1977.

Mr. Speaker, we applaud Senator Hirkala's standards of excellence throughout his lifetime and over these past three decades plus 7 years in outstanding public service to the people of the city of Passaic. I know that you and our colleagues here in the Congress will want to join with me in deep appreciation of all of his good works and share great pride in the success of his achievements with his good wife Josephine, son Robert, and daughter Karen as they celebrate this milestone of achievement in their family endeavors.

Mr. Speaker, there is much that can be said of Senator Hirkala and his lifetime of accomplishments in service to people. We are proud to boast that he was born and raised in the city of Passaic, NJ. He attended Passaic High School and Drake Business School. At the young age of 17 he enlisted in the U.S. Navy and served with distinction until his honorable discharge on December 1, 1945. He finished first in his class and was designated as "honor man" in signalman school. He saw duty on the gunboat *Action*, the destroyer *Dortch* and the cruiser *Philadelphia*. Our Nation's military service awards of merit that he received included: Good Conduct, American Defense, Asiatic-Pacific Theatre Campaign, European-African-Middle Eastern Theatre Campaign, Philippine Liberation Medal from the Philippine Government and the World War II Victory Medal.

Mr. Speaker, the quality of leadership and sincerity of purpose that Joe Hirkala has imparted to our people are mirrored in his many accomplishments and the warmth of his friendship that have won him the confidence and strong support of all of us who have the good fortune to know him. He has been a member of our New Jersey State Legislature for over 16 years. After serving in the general assembly from 1968 to 1972, Mr. Hirkala took his seat in the senate in 1972. The term to which he was sworn January 10, 1984, is his fifth. He was assistant minority leader in the 1972-73 session, and majority whip in 1975. He served as assistant majority leader from 1976 to 1982, when he became majority leader. For the 201st legislature, sitting in 1984 and 1985, his colleagues elected him president pro tempore.

Mr. Speaker, Joe Hirkala had made an outstanding contribution in promoting and encouraging community improvement and has actively participated in many charitable and civic endeavors to help improve the social, cultural, and educational endeavors of our community, State and Nation. He is a member of the Disabled American Veterans, Veterans of Foreign Wars, American Legion, Elks, and Loyal Order of Moose; and is a director of the March of Dimes and the Passaic County Mental Health Association, He is a communicant of St. Joseph's R.C. Church of Passaic.

Mr. Speaker, yes, our community, State, and Nation has indeed been enriched by

the quality of Joe Hirkala's leadership and the wealth of his wisdom and caring as the city clerk of the city of Passaic of our great sovereign State of New Jersey. He has truly inspired and enriched the lives of many of our people in his lifetime endeavors. I am pleased to join with the people of the city of Passaic in this tribute to their esteemed city clerk and seek this national recognition of his contribution to the American way of life and the American dream through his compassion and benevolence for his fellow man and an exemplary record of good works in public service on their behalf.

We do indeed salute an esteemed city clerk and great American—Hon. Joseph Hirkala of Passaic, NJ.

LET'S ENCOURAGE OUR TOURISM RELATED BUSINESSES TO ADVERTISE IN CANADA

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. SKELTON. Mr. Speaker, at recent tourism hearings my Small Business Subcommittee on Exports has held, small business owners in the tourism related industry have expressed concern regarding the 10 percent excise tax the Canadian Government has levied on U.S. travel literature. The tax which has been in effect since 1983 is levied on travel literature that is distributed free of charge in Canada. One witness testified that brochures he took to the Toronto Ski Show cost him over $500 in duties yet the brochures cost less than that to print. Mr. Speaker this tax is impeding our small business owners' ability to advertise in Canada.

Last March, during the summit meeting between President Reagan and Canadian Prime Minister Brian Mulroney an agreement regarding this excise tax was reached. Prime Minister Mulroney gave his word that he would take steps to exempt travel literature that is government-sponsored or printed by chamber of commerce, automobile associations, and "similar organizations" from the 10-percent tax. However, 2 months after the summit the Canadians amended their law to exempt government sponsored literature only. And this repeal is still pending parliamentary action. And, that the second stage of implementation, which will repeal the tax on nongovernment entities may go into effect in a year or so.

Mr. Speaker when our businessmen are willing to take the initiative and advertise without government financial support they shouldn't have the doors slammed in their face. Not only does the Canadian Government financially support their businesses in the tourism industry, we have an open door policy for those businesses to advertise here.

Mr. Speaker, I believe we must continue to encourage our businesses to take such initiatives as to advertise in other countries. At this time, I am not in favor of retaliatory actions however, I am cosponsoring House Concurrent Resolution 241 which expresses the sense of this body that the Canadian Government should discontinue its federal excise tax on tourism literature imported from the United States. I believe this is important to our business owners in the tourism related industry and to our balance of trade.

CONGRATULATIONS TO JOHN S. STAUM ON HIS ELECTION AS COMMANDER IN CHIEF OF THE VETERANS OF FOREIGN WARS OF THE UNITED STATES

HON. BILL SCHUETTE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. SCHUETTE. Mr. Speaker, it is my distinct privilege to congratulate John S. Staum on his election to the position of commander in chief of the Veterans of Foreign Wars of the United States during the 86th annual convention in Dallas, TX.

Staum, a veteran of the Korean war, has served the VFW for over 25 years. He has held many important elected positions within the VFW, including the position of chairman of the VFW National Convention Corp.

Our Nation owes a tremendous debt to our veterans. We must never forget the men and women to whom we owe our very existence as a free people. This veteran has served our country, not only in war, but also in peace. He has provided able leadership for his fellow veterans all over this Nation, and now he will assume the highest rank in the VFW organization, commander in chief.

Thank you, Commander Staum, for reminding us what leadership is all about. Each position you have held in the VFW organization has been an elected one. You have proven yourself to be a strong leader, and we in Congress wish you well in your new position.

REGARDING THE BUDGET ACT PROCEDURES INCLUDED IN THE CONFERENCE REPORT ON HOUSE JOINT RESOLUTION 372

HON. ANTHONY C. BEILENSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. BEILENSON. Mr. Speaker, I would like to take this opportunity to describe the provisions in the Gramm-Rudman conference report (S.J. Res. 372) which govern the congressional budget process prior to the beginning of the sequestration process, since these amendments to the Congressional Budget Act of 1974 may not be as familar to Members as some of the other features of the conference report.

Most of the revised budget procedures included in the conference report originated in the House Rules Committee in the 98th Congress. They were the product of the Committee's Task Force on the Budget Process, a panel of 24 House Members from various committees which spent 2 years, 1982–84, reviewing the Budget Act. The resulting legislation developed by the task force, H.R. 5247, was reported by the Rules Committee last year (House Report No. 98–1152).

The conference committee on House Joint Resolution 372 agreed to substitute most of our Rules Committee bill for the comparable provisions in Gramm-Rudman as originally passed by the Senate. The conference report includes a few provisions which were not in the Rules bill; and, it treats some procedures differently in the House than in the Senate.

While I have serious misgivings about the Gramm-Rudman process as a whole, most of the Budget Act revisions included in the conference report are an improvement over current law. However, there is one change, apparently adopted at the last moment, that I strongly oppose: budget control at the subcommittee level. Up until today, it was understood that the House would apply budget controls at the section 302(a), or full committee, level—as the Rules Committee bill provided—while the Senate would apply controls at the section 302(b), or subcommittee level. The section 302(b) point of order, in my opinion, is unnecessarily stringent; it does not give committees the flexibility that they need to make tradeoffs among programs; and it diffuses responsibility for staying within budgetary limits. Who is to blame if the section 302(b) amount is exceeded: the subcommittee or the full committee? The Rules Committee considered section 302(b) controls and rejected them for the reasons just mentioned.

In brief, the general intent of the Budget Act revisions included in the conference report is to strengthen and streamline the budget process. These new requirements do so by: Accelerating the budget timetable, to make it easier for Congress to get its budget work completed by the start of the fiscal year; strengthening controls, mainly by enforcing the budget resolution at the subcommittee or programmatic level; and expanding the scope of the process to ensure that all forms of Federal financial activity—credit programs and off-budget activities in particular—are included in budgetary review. The conference report includes a number of requirements to ensure that budget-related information is provided to Members on a timely basis and to facilitate the operation of the Budget Act in the House of Representatives.

Unlike the rest of Gramm-Rudman, which expires in 1991, these Budget Act changes will remain in law unless they are revised.

The following explanation covers House rather than Senate procedures, some of which are different, and includes all but the most minor additions to or changes in current requirements of the Congressional Budget Act of 1974.

ONE ANNUAL CONCURRENT BUDGET RESOLUTION

Congress will be required to adopt only one budget resolution each year, as has become current practice. However, the budget will be binding immediately upon its adoption rather than on October 1. The budget resolution will be substantially the same as under current practice; its required content has been updated to include credit levels and 2 planning years.

Congress may adopt a subsequent budget resolution any time after adoption of the first if it so desires, but it is no longer required.

It will not be in order to consider a budget resolution if the resolution exceeds the maximum deficit amount for the coming fiscal year. The same prohibition applies to amendments to the budget resolution and to the conference report on the resolution. This is a new point of order which originated with the Senate as a way of enforcing the maximum deficit amount early in the process.

In the House, the point of order on a conference report exceeding the maximum deficit amount can only be waived by three-fifths of the Members voting. However, all other points of order either already existing in the Budget Act or created by this Act, may be waived by majority vote.

ACCELERATED TIMETABLE

The schedule for adoption of the budget resolution and passage of budget legislation will be accelerated and compressed in order to allow Congress to finish work on the budget earlier in the year than it does at present. Accelerating the timetable is desirable under any circumstances, but it is particularly important under the new deficit-reduction budget process because CBO will be looking at the budget legislation Congress has actually passed as of August 15 when it issues its August 20 report on the projected deficit level for the coming fiscal year. If Congress has not passed the necessary budget legislation by that date, we probably won't have a chance of avoiding the sequestration process.

After 1986, the new deadline for submission of the President's budget will be the first Monday after January 3. Beginning in 1986, Congress will adopt a budget resolution by April 15. Dates for submission of CBO's report and committees' views and estimates are moved ahead to February 15 and 25, respectively, to conform to the new budget resolution deadline. The House Budget Committee's reporting deadline is repealed; the Budget Committee is expected to report its budget resolution early enough to allow Congress to complete action on it by April 15.

To help the House get an early start on its budget work, the conference report requires House elections of committees to be held within a week after Congress convenes.

The May 15 deadline for reporting authorizations is repealed. If authorizing committees want their bills considered before Congress acts on appropriation bills, then they will have to report them early enough in the year to ensure that there is adequate time to consider them prior to June. The conference committee agreed with the House Rules Committee that the current authorization deadline has been counterproductive since authorization committees tend to bunch the reporting of their bill around May 15. If committees report earlier in the year, the House and Senate will be better able to assure floor consideration of those bills prior to consideration of the relevant appropriation bills.

In the House, the Appropriations Committee must report the last of its 13 regular appropriation bills by June 10. It is anticipated that Appropriations will begin reporting its bills as soon a possible after adoption of the budget resolution. If Congress has not adopted a budget resolution by May 15, appropriation bills will not be subject to the section 303(a) prohibition against consideration of budget legislation prior to adoption of a budget resolution. House passage of those bills is required by June 30. Congress must pass reconciliation legislation by June 15.

Deadlines for appropriations and reconciliation are enforced in the House by providing that it will not be in order to adjourn for more than 3 days in July unless the House has passed its 13 appropriation bills and reconciliation legislation. Thus the House will be prohibited from adjourning for the traditional Independence Day district work period unless its budget work is done.

STRENGTHENED CONTROLS

There are several new provisions to ensure that Congress' actions on budget legislation conform to its budget resolution.

After adoption of the budget resolution, each House committee with jurisdiction over a portion of the budget will receive a section 302(a) allocation for budget outlays, budget authority, entitlement authority, and credit authority; those allocations will be divided into mandatory and discretionary amounts, as in current practice.

Each committee that receives a section 302(a) allocation will be required to subdivide that allocation by program or subcommittee—the section 302(b) level. Committees will be prohibited by a point of order from having a reported bill considered on the floor until they file their 302(b) reports.

Any bill which exceeds its section 302(b) level of discretionary budget authority will be subject to a point of order against its consideration. This is a far more stringent control on budget legislation than anything that exists under current law.

The conference report maintains the section 311 point of order against legislation which exceeds totals of new budget authority or new entitlement authority, or reduces total revenues but, as in current practice, measures reported by a committee that would not cause the committee's own allocation of discretionary budget authority to be breached will not be subject to a point of order. An exemption to the section 311 point of order, often referred to as the Fazio exemption, will allow a bill which exceeds budget totals to be considered if the bill is within a committee's 302(a) allocation. With this exemption, committees will be held responsible for what they can control—keeping budget legislation within their allocated level—but not for what they cannot control—for example, changes in the economy which cause changes in budget totals, or action by other committees which exceed their allocations.

Reconciliation will be strengthened in two ways: One, in the House, if a committee fails to report reconciliation legislation as directed, the Rules Committee may make in order amendments fulfilling those directives. Committees given a directive to change both spending and revenues may substitute up to 20 percent of one for the other at their discretion.

Two, a point of order will lie against any amendment to a reconciliation bill if it would add to the deficit; that is, any amendment that would reduce revenues would have to reduce the equivalent amount of spending; any amendment that would increase spending would have to be offset by an equivalent increase in revenues. This is a requirement which originated in the Senate bill.

As in current practice, reconciliation directives may cover 1, 2, or 3 years. A new requirement was added in conference to exclude Social Security [OASDI] from the reconciliation process.

EXPANDED SCOPE OF THE BUDGET PROCESS

The conference report expands the scope of the budget process in two ways: by bringing off-budget items on budget, and by subjecting credit programs to nearly the same controls as direct spending.

All Government entities which are currently off-budget will be placed on budget. Social Security [OASDI] is taken off budget, but included in budget totals for purposes of determining the deficit amount. For purposes of the President's budget and the congressional budget process, Federal Financing Bank receipts and disbursements will be attributable to the agency for which those transactions were made.

The House of Government Operations Committee will have jurisdiction over any legislation proposing to take an agency off budget.

Direct loan obligations and primary loan guarantees will be included in the budget resolution, allocated to committees, subdivided within committees, may be included in reconciliation directives, and will be subject to the section 302(b) point of order ensuring that Congress does not consider legislation that would cause the relevant subcommittee amount to be exceeded.

Furthermore, measures providing new credit authority shall be subject to a point of order unless the credit authority is limited to amounts provided in appropriations acts.

FACILITATION OF THE BUDGET PROCESS

Also included in the conference report are a number of provisions which will help facilitate the budget process either by providing opportunities for review of budget procedures or by requiring certain budget information at critical points in the process.

To ensure that any new procedural provisions included in a budget resolution receive adequate review, a House Budget Committee-reported budget resolution which changes House procedures will be referred to the House Rules Committee for 5 days—concurrent with a shortened 5-day layover period.

The Speaker, in consultation with the minority leader, may appoint a Member User Group to review budget scorekeeping rules and practices of the House and report to the Speaker from time to time on their effect and impact. This group is intended to promote support for and compliance with the often complicated scorekeeping rules, and to advise the Speaker on the need for necessary changes. This provision is not intended to interfere with the authority of the Chair to rule on points of order or with the responsibility of thie Parliamentarian to advise the chair on such rulings.

The conference report does not include the Rules Committee's provision requiring the Budget Committees' reports to display, for each function, the amount of Federal financial commitment in spending, credit activity, and tax expenditures. This provision was intended to facilitate the evaluation of the mix of different forms of financing used to achieve similar objectives. However, the joint statement of the managers strongly urges the Budget Committees to include this information in their reports.

Along the same line, the conference report requires CBO to conduct continuing studies to enhance comparisons of budget outlays, credit, and expenditures. As with the budget report provision, the intent is to provide Congress with a better understanding of the full Federal financial commitment in each programmatic area and to aid consideration of whether certain activities might be more appropriate financed in a different way.

The joint explanatory statement accompanying a conference report on a budget resolution will be required to include a statement of the common economic assumptions on which it is based. This provision is intended to encourage the Senate and House to work out any differences over economic assumptions before the conference stage.

The Budget Committees will be required to consult with other standing committees during the preparation, consideration, and implementation of the budget resolution.

The requirements for budget information from CBO are increased in several areas so that Members will have better and more timely information about the costs of legislation being considered and about that legislation's relationship to the overall budget.

Section 308(a) reports, prepared by CBO, will be required not only for legislation providing budget authority and tax expenditures, but also for legislation providing new spending authority, new credit activity, or changes in levels of revenue. This information will also be required for committee amendments, and it will be required to be made available to Members prior to a vote on a conference report. Furthermore, for the first time, it will be required that these reports include information about outlays as well as budget authority and comparisons with budget levels provided in the previous years. These new requirements are intended to ensure that Congress is fully aware of the budgetary implications of its actions.

CBO will be required to issue scorekeeping reports to committees at least once a month, rather than just periodically. In the House, the Budget Committee summary scorekeeping reports will be submitted to the Speaker.

Several new definitions are added to the Budget Act: Entitlement authority is defined, credit authority is defined, and the definition of budget authority is expanded to include the collection of offsetting receipts. The definition of spending authority will be expanded to include two new items: monetary credits—the authority to forgo collection by the United States of proprietary and offsetting receipts not provided for in advance by appropriation acts—and residual spending authority—all forms of spending authority for the U.S. Government to make payments other than those already described by the act not provided for in advance by appropriation acts.

CBO will be required to include in its cost estimates a description of each method for establishing a Federal financial commitment contained in a bill or resolution. This provision is intended to help identify the way a legislative proposal would result in a Federal outlay or a loss of revenue and to help ensure that Member are aware of any backdoor financing mechanisms contained in a proposal under consideration.

In order to help Congress identify spending which is part of existing law and which escapes annual review, GAO will be required to catalog all of the provisions in existing law which provide permanent appropriations and to report, within 18 months, its recommendations for the appropriate form of financing for such programs or activities. That report is to be revised from time to time.

In order to help the leadership and committees of Congress identify what authorizations need to be renewed prior to the start of the fiscal year, CBO will issue a report on January 15 of each year list listing all expiring authorizations, as well as programs which have been funded but not authorized.

Finally, House rules will be amended to permit consideration of rescissions of appropriations and transfers of unexpended balances within the department or agency for which they were originally appropriated if those provisions are included in a general appropriation bill. The conference committee agreed with the Rules Committee that is appropriate to allow such rescissions and transfers to be included in an appropriation bill.

Mr. Speaker, I appreciate the opportunity to describe these new Budget Act provisions, and I hope that this explanation is of assistance to my colleagues.

EDWARD M. O'CONNOR

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. NOWAK. Mr. Speaker, Edward M. O'Connor, a distinguished citizen of my hometown of Buffalo, NY, who had a lengthy and varied career in Federal service, died recently at the age of 77.

The scope of Mr. O'Connor's career of public service was detailed in the following obituary which appeared in the Buffalo News on November 26, 1985.

EDWARD M. O'CONNOR DIES; DIRECTED REFUGEE AGENCY

A Requiem Mass will be offered Wednesday for Edward M. O'Connor, the country's first and only commissioner of displaced persons and the man who brought nearly a half-million World War II refugees to the United States. O'Connor died Sunday (Nov. 24, 1985) in his Buffalo home. He was 77.

For almost 20 years, O'Connor, a Buffalo native, sat in the inner councils of government, helping to shape postwar foreign policy. His rise to influence began after graduating from St. Joseph's Collegiate Institute, receiving two degrees from the University of Notre Dame—where he played halfback on Knute Rockne's last "Fighting Irish" football team—and serving in several probation and parole jobs throughout New York State.

"I'm an ordinary man," O'Connor said in a 1978 interview as he reflected on his success. "I was well prepared for life, but I had some unusual opportunities."

And some unusual luck. On July 28, 1945, because of a spirited discussion he was having on the subway with a New York Times correspondent, he was a few minutes late arriving at his New York City office with the National Catholic Welfare Conference. Being late saved his life.

A B-25 bomber lost in the fog had crashed into the 79th floor of the Empire State Building moments before his arrival, killing 12 members on his War Relief Services staff. His own desk was burned, except for a picture of his wife and children.

"What a sad, sad thing that was," O'Connor recalled many years later. "Members of my staff killed, all my records gone."

A few months earlier, O'Connor had gone behind German lines, with a pass from Gen. Dwight D. Eisenhower, to assess the emergency relief needs of Western Europe. Eventually he served on the board of or as an adivser to American Relief to France, Italy, the Netherlands, Belgium, Luxembourg, the Philippines and China.

O'Connor subsequently persuaded Presidents Harry Truman to take interest in the estimated 6.5 million persons facing forced deportation to Russia and other Eastern bloc nations after the war. The president named him commissioner of displaced persons, and O'Connor shepherded 430,000 refugees here, with another 1.4 million going to Allied countries. He served on the National Security Council under Presidents Harry Truman and Eisenhower, directed a select congressional committee investigating postwar communist advances, was a senior consultant to the U.S. Information Agency from 1955 to 1958 and, as staff director for the Joint Committee on Immigration and Nationality Policy from 1962 to 1966, draft-

ed immigration laws in effect through the 1970s.

He also served as director of Special Projects at Canisius College from 1958 to 1962. O'Connor retired from federal service in 1966, explaining later, "I was sick of government. I was becoming a career man."

He returned to Buffalo and helped direct the Community Welfare Council here. O'Connor also served as a consultant to some African nations, advising them on the exchange of American know-how for natural resources.

In 1950, O'Connor received an honorary doctor of law in political science degree from the University of Munich. Among the decorations from European governments are Officer, Order of Orange Nassau, the Netherlands; Officer, Order of Oak Leaf Crown, Belgium; Medal of Gratitude, France; Medal of the Blessed Hand of St. Stephen, conferred by the imprisoned Hungarian Cardinal Josef Mindszenty; Knight of St. Agatha, Republic of San Marino, and Knight, Order of Merit, Republic of Italy.

A founder of the National Captive Nations Committee, chartered by Congress in 1959, he was still on the national board and chairman of the Western New York chapter at the time of his death.

He is survived by his wife, Geraldine; a daughter, Maureen Bailey of Silver Spring, Md.; a son, Mark J.; eight grandchildren, and three great grandchildren.

The Mass will be offered at 11 a.m. Wednesday in St. Mark's Catholic Church, with burial in Mount Calvary Cemetery.

Mr. O'Connor's contributions to the Government during and after World War II included service as the Nation's first and only Commissioner of Displaced Persons and other executive and legislative branch assignments. Mr. Speaker, I bring Mr. O'Connor's career to my colleagues' attention as a well-deserved tribute to this gentleman, whose accomplishments I hope will serve as a standard of excellence and inspiration to those engaged in government service or contemplating such a career. In offering sincere condolences to his family, I also trust they will find consolation in the high regard Mr. O'Connor was held in our community in Buffalo and also in the Nation.

SIGGI B. WILZIG TO BE HONORED BY HOFSTRA UNIVERSITY SCHOOL OF LAW

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. GUARINI. Mr. Speaker, I am not a religious historian. Nor am I a spiritual leader or preacher. But the story, the "true" story you are about to hear is nothing less than a modern-day miracle.

The "miracle" revolves around Siggi B. Wilzig, chairman and president of the Trust Co. of New Jersey and former chairman and president of Wilshire Oil Co. of Texas. He is the "only" Nazi concentration camp survivor "in the world" to have headed both a major New Jersey Bank and a New York Stock Exchange listed oil company at the same time. Mr. Wilzig is a firm believer that this could only have happened in America.

To even begin to appreciate the magnitude of this man and his accomplishments, one has to first look at his tragic past. For it is surely this "tragic" past that inspired Siggi B. Wilzig to reach the highest heights in both the business world and the more noble world of charitable endeavors. Yesterday he was—"a victim of history." Today he is—"a creator of history."

In fact, on this very day the Siggi B. Wilzig Center for Banking Law is being established within the Hofstra University School of Law and a professorship is being named in his honor in perpetuity. It is the only center of its kind in the country.

Siggi B. Wilzig was born in Germany in 1926. By the age of 14, his formal education had ended; a year later he was doing forced labor in Nazi Germany.

He was shipped to Auschwitz at the age of 16. In May 1945, Wilzig was liberated from Mauthausen, coming to the United States 2 years later. Those sparkling "teen" years Americans take so for granted were a nightmare for Siggi Wilzig.

The son of a middle class textile dealer whose family had lived centuries in Germany, his family moved to Berlin in 1936, hoping that conditions would be more tolerable there than in the small town of his birth, Krojanke, West Prussia, which had a thriving Orthodox Jewish community.

But Berlin turned out to be a deathtrap for its Jews; and in 1942, at the age of 16, Siggi Wilzig was taken to Auschwitz. He told his captors he was 18, only to discover later that all those under 18 and over 45 were killed immediately—thus he passed the first of nearly 20 "life or death" selections.

His mother arrived in Auschwitz 2 days later and was immediately sent to the gas chambers. His father died in Wilzig's presence after being beaten by the Gestapo. In all, 59 relatives were killed, including three brothers, a sister, a 2-year-old niece, and a 7-year-old nephew.

In the camp, Wilzig was younger than most. He kept alone, away from the calamity criers. His intellect argued that he couldn't survive, but his heart and faith in God overpowered the thought of doom.

His "quick, fox-like mind" was his main asset in his struggle to survive, "knowing when to volunteer, and when not to—when one meant life and the other death." His parents and other members of his family were not so fortunate.

Wilzig, who still carries a tattoo number on his arm, was one of a group of prisoners and guards who, in January 1945, was forced to leave the Auschwitz death camp before the Russians liberated the camp—going on a 3-week "death march" and open "cattle car" train ordeal and being forced to march through Czechoslovakia at below-zero temperatures into Austria. Finally, he was rescued by the American Army in Mauthausen, Austria, on May 7, 1945—ironically, the last day of the war. At his liberation, Wilzig weighed 88 pounds.

After recovering in an American Army hospital, Wilzig went to work for the Americans, serving the Army Counter-Intelligence Corps in Austria and Bavaria without compensation, as his thanks to his liberators. Among the most prominent of the Nazis apprehended by Wilzig during this period was the brother of the notorious propaganda minister, Dr. Joseph Goebbels.

Wilzig entered the United States in 1947, and became a citizen 5 years later. His arrival in America coincided with the famous blizzard of December 1947. Wilzig's first job in America was shoveling snow in the Bronx, NY.

Once the snow melted, he was off to other things, such as becoming an assembly worker for the manufacturer of leather briefcases. He earned $28.50 a week at that job, and worked as a janitor 1 night a week for an extra $1.50 to bring his salary up to a total of $30!

But other horizons beckoned, and Wilzig next became a bow tie presser at a "real Brooklyn sweatshop—27 people in a small store." Next came an even briefer career as a necktie salesman.

Wilzig's major entry into the business world came with Nieswand & Son, a Hillside and Newark manufacturer of fine furniture. It was also Wilzig's entry into New Jersey; and he's been there ever since.

At Nieswand, be became sales and general manager after 1 year, tripling the business in 2 years. Then he went to work for a monument company, which went from a one-man operation to the largest firm of its type in New Jersey in just 3 years. Wilzig ultimately became executive vice president of the company in 1960.

While all this was happening, Wilzig started to study and successfully invest in Canadian oil and gas stocks. He saw Canada was the most important source of future energy for North America, equally as important as Texas and Louisiana.

Because Canada is located at America's doorstep, he envisioned that country serving as a backup for supplying energy and minerals to Americans in the future. His success at that time attracted some important people in New Jersey, New York, and Pennsylvania, and about 20 families, including Wilzig, formed a combine to invest in Wilshire Oil Co. of Texas.

In 1965, the president of the company died and Wilzig was elected chairman and president. At that time Wilshire Oil had sales of less than $1 million. At this time, after expanding its domestic oil and gas exploration program, Wilshire now has interests in over 1,400 wells in North America.

Wilshire subsequently acquired The Trust Co. of New Jersey, whose assets have grown under Wilzig's direction from $180 million to over $1 billion. It is now one of the largest banks in New Jersey with 25 branches. The Trust Co. of New Jersey is known as the Bank With Heart and it has certainly lived up to this reputation by being a community-minded bank, by supporting both the black and Hispanic communities and by making substantial funds available to the car and housing industries when they fell on bad times. It is the only bank in the history of New Jersey to reach

$1 billion in assets without mergers or acquisitions. Wilzig didn't buy deposits, he earned them.

His lectures on "The State of the Economy" and "The Holocaust" are given without honorarium before large civic, religious, and school audiences. Wilzig is dedicated to informing Americans that this type of horror is not to be forgotten, since it may then be repeated.

He was the first Holocaust survivor to appear before an audience of 500 cadets and officers at the U.S. Military Academy at West Point, speaking on the Holocaust. He has also lectured on the Holocaust at Brown University, The University of Pennsylvania and Boston University. He was invited to address a joint session of the New Jersey Legislature and he was appointed by President Carter and confirmed by the Congress to the U.S. Holocaust Memorial Council.

Despite his hectic business schedule, Wilzig finds time for philanthropic and community activities. Currently listed in "Who's Who in America," he is a member of the National Israel Bond Cabinet of the United States and has been the recipient of the Prime Minister's Medal of the State of Israel for aiding in that Nation's economic development. He is also chairman of banks and financial institutions, Israel Bonds for the States of New Jersey, Delaware, and eastern Pennsylvania.

He also serves on the boards of Congregation Adas Israel in Passaic, the Hillel Academy, the Daughters of Miriam Center for the Aged in Clifton, the Jewish Hospital and Rehabilitation Center of New Jersey, and the Fiscal Advisory Board of Jersey City.

Wilzig was appointed by Governor Brendan Byrne to the New Jersey State Banking Advisory Board, and is a director and fellow at the Benjamin N. Cardozo Law School of Yeshiva University. In addition, Wilzig recently received an honorary doctorate of law at Hofstra University.

Forty years ago, Siggi B. Wilzig was liberated from the Nazi death camps in Europe. Millions of his people had been murdered—including those most dear to him—his immediate family, relatives, and friends. At the age of 16, the living hell of Auschwitz had stripped him of everything a normal human being needs to live—food, clothing, love, and respect. After this kind of torture, one would expect a man to emerge as a lost soul. The deep and ugly wounds the Nazis inflicted upon his heart and mind should have become permanent scars of hatred. Yet this was not the case.

Siggi B. Wilzig possesses the rare combination of a compassionate heart and a brilliant mind, which has enabled him to find meaning of life, and has made the United States most proud to have him as a citizen. His contributions to the State of Israel reflect his desire for world peace, whereas his generous gifts to the sick and poor reflect his infinite love for all mankind. Humanity needs men like Siggi B. Wilzig in order to stay human.

Wilzig lives in Clifton, N.J. with is wife, Naomi, and their three children, Ivan, Sherry, and Alan, whose teen years, thanks to the United States, have not been, and will never be, anything like their father's.

I know that all my colleagues here in the House of Representatives will want to join me today in a salute to this outstanding man. Throughout his life he has demonstrated a unique capacity to build success from adversity. His accomplishments are an example to us, and his many contributions have enriched us all.

HELSINKI: TEN YEARS LATER

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. GARCIA. Mr. Speaker, my friend and colleague on the North Atlantic Assembly's Civilian Affairs Committee, Mr. Frans Vangronsveld, recently retired from public life. Before retiring, he submitted a report on the Helsinki accords as the rapporteur of the Committee's Subcommittee on the Free Flow of Information and People.

I am inserting in the RECORD excerpts from his excellent report so that my colleagues can take a look at his evaluation of the accords, and so they can also have a better idea of the excellent work done by the Civilian Affairs Committee and the Assembly. In addition, I can make available a copy of the complete report for anyone who is interested.

One more word about Mr. Vangronsveld. As a member of the Belgian Senate and the North Atlantic Assembly, he served his country well. It is also important to note that he was a hero of the resistance during the Second World War. We who have come to know him through the Assembly will miss him.

NORTH ATLANTIC ASSEMBLY SUBCOMMITTEE ON THE FREE FLOW OF INFORMATION AND PEOPLE, INTERIM REPORT—HELSINKI: TEN YEARS ON

(Mr. Frans Vangronsveld (Belgium) Rapporteur)

SUMMARY

The report aims to take stock of the situation with regard to certain aspects to implementation of the Helsinki Final Act, on the occasion of its tenth anniversary.

Chapter I—Poland: Five years after Gdansk—looks at the conflict-ridden relationship between the Polish state and the civilian community, giving examples of a trend towards totalitarianism, after the assassination of Father Popieluszko and the trial of his murderers. The community rejects its leaders and the leaders cannot change the community. The current situation is fragile, with the leaders alternating between hard-line methods and more sophisticated means to break down the resistance of the community.

Chapter II—The Trials in Yugoslavia—describes the trials of the six Yugoslav intellectuals accused of "counter-revolutionary" activity and wonders how they should be interpreted, since the sentences handed down were too moderate to intimidate intellectuals as a whole, while this seems to represent the sole aim of the proceedings. The public protests at the Writers' Conference were also noteworthy.

Chapter III—The Persecution of the Turkish Minority in Bulgaria—surveys what is known about this massive infringement of the rights of a minority, and the attempts to rob this minority of their very names. The Rapporteur calls for a wider publicity for these outrages. There have been numerous murders, and a public and diplomatic campaign is the only way pressure can be brought on the Bulgarian government and party.

Chapter IV—The Violations of Human Rights in the Soviet Union—denounces the anti-semitic campaigns, the considerable decline in Jewish and German emigration, and ponders the prospects opened up by the change of leadership. The fact that the retention of power by the ruling class, the Nomenklatura, depends on the advantages enjoyed by this class vis-à-vis the general public, leaves the Rapporteur less than optimistic.

Chapter V—Towards Democracy: The Case of Turkey—takes note of the progress made in Turkey over the last year: a reduction in the period of provisional detention, the possibility of partial amnesty, the law on "repentance", wider freedom of the press. It welcomes the role of the Turkish parliament and hopes that it will hasten developments. It voices certain reservations about recent presidential statements, on the new law relating to the police and on the regulations governing the universities.

Chapter VI—A Plea for the Helsinki Process—sets outs the reason why it has been positive, within its own limits: the Final Act did not impose the status quo of boundaries, and the Principles and Basket dealing with human rights encouraged a differentiation between the communist countries, which is encouraging. The right to raise human rights questions—a right not constantly being exploited by the West, is a beneficial consequence of Helsinki, and provides the Western countries with a valuable diplomatic weapon. The Rapporteur considers that the Final Act, by encouraging public participation in international relations, has become a key element in Western diplomacy in Europe.

INTRODUCTION

1. The year 1985 marks both the fortieth anniversary of the Yalta Agreements and the tenth anniversary of the Helsinki Final Act. There is a common misapprehension regarding Yalta that needs clearing up. The two great Western powers never subscribed to any "share-out of Europe". On the contrary the Big Three defined their respective zones of liberation of the countries occupied by Nazi Germany and undertook free elections in these countries as soon as the war was over. Germany's fate was in turn defined under the same conditions in Potsdam some months later. Thus, there was never any Yalta "share-out", but rather, the repudiation of a promise by Stalin. The Western powers are in no way responsible for the postwar fate of the countries occupied by the Soviet Union in contravention of the Yalta commitments, except inasmuch as they trusted Stalin to keep his word. Whatever the responsibilities, however, the fact remains that the geographical division of Europe in 1985 is very much what it was in 1945. The last 40 years have failed to lift the Iron Curtain.

2. A modest attempt to restore European communication was made at the end of the period of détente with the creation of the

CSCE process, whose tenth anniversary is celebrated this year. The 1975 gamble was based on the idea that an agreement covering strategic, economic, human rights and cultural questions, between almost all the European countries and the North American countries which kept troops in Europe would to some extent make it possible to limit the differences between the two political systems dividing Europe, by encouraging the "Socialist" countries to evolve towards a greater pluralism. Our Sub-Committee's 1984 Report showed that this gamble did in fact bring about a greater differentiation between the countries of the Eastern bloc.

* * * * *

VI. A PLEA FOR THE HELSINKI PROCESS

43. Human rights are no more respected by the Soviet Union in 1985 than they were in 1975. Does this mean that the Helsinki process should be dropped, as some argue? The Rapporteur would reply with a categorical "no". In his opinion the balance of Helsinki is anything but negative. It only becomes so when compared with the now recognized unrealistic nature of the expectations that the signing of the Final Act raised in many people of all natios.

44. As regards the recognition of the territorial status quo in Europe, far too much has been made of the implications of the Final Act, which only forbids the modification of frontiers by "threat or use of force". The text of the Act is clear: "They (the States Party) consider that their frontiers may be amended". Thus, the myth that by signing the Final Act the Western states accepted the inviolability of post-war frontiers is an invention of Soviet propaganda. In banning their amendment by force, the Western States merely remained consistent with their purely defensive doctrine, adopted as from the end of the war. "The inviolability of frontiers" is no more than the consequence of this choice, which was quite natural for the democracies.

45. On the other hand, by forcing through the adoption of Principle VII on respect for human rights and fundamental freedoms, of Principle VIII on the equal rights of peoples and the right of peoples to self-determination, and of the Third Basket on co-operation in human rights and other fields, and by ensuring a follow-up to the conference, thus bringing into being a process, the Western states saw to it that human rights questions became a legitimate object of discussion in relations between signatory states. These states can no longer invoke the argument of non intervention in connection with the human rights undertakings listed in the Final Act. Each state therefore no longer has legitimate competence in these fields.

46. The Ottawa Expert Meeting on Human Rights, despite its failure to adopt a concluding document, had the positive aspect that the Soviet Union never invoked the argument of non intervention in its internal affairs at the meeting. The right to raise these questions was thereby strengthened. It also should be acknowledged that the failure to adopt a concluding document resulted from the unwillingness of signatories meaningless document as favoured by the Eastern bloc. The excessive reactions against the Helsinki process itself that have appeared recently in both spoken and written form, particularly in the United States, are a further consequence of that. The Ford Administration had to insist that all European states signed the Final Act. Now it is the European states, who set out with fewer illusions, who see the benefits of the process more clearly than their American partner. If Ottawa sounded the death-knell of illusion regarding the CSCE process, this setback has a positive aspect.

47. The most important conclusion to be drawn from this setback, however, is that the greater the publicity given to the CSCE follow-up meetings in the press and the media, the greater their chance of success, since such publicity puts the Warsaw Pact states "in the hot seat". The Soviets' ability to resist Western and neutral pressure was considerably strengthened by the fact that the press and the media gave very little coverage to the Ottawa meeting, possibly because of its technical nature and because they were not permitted to cover the meeting. The lesson to be learned from this for the future is that the participants should preferably be senior government officials and parliamentarians, as this would focus attention on the meeting. The free movement of information, so necessary from West to East, is no less so from East to West: public pressure constitutes a diplomatic instrument of prime importance in the field of human rights.

48. This is in fact one more reason to welcome the existence of the CSCE process. Without it, the now constant reference to human rights questions, affecting both individual cases and collective persecution, at meetings between political and administrative officials of West and East would not be possible. As it is, at all levels, from ordinary foreign secretary to heads of state, Westerners are now exploiting their contacts with the East to raise these problems tirelessly. The mention of Professor Sakharov's name by President Mitterrand at an official dinner at the Kremlin is echoed by the pilgrimage made by Sir Geoffrey Howe, Foreign Secretary, to the grave of Father Jerzy Popieluszko, on the occasion of Sir Geoffrey's official visit to Poland. Moreover, these startling initiatives represent only the tip of the iceberg. The Ottawa Human Rights Experts Meeting should be assessed in historical perspective. The cause of human rights as an expression of freedom and democracy and a concern of international diplomacy is a relatively new phenomenon which emerged after the defeat of Nazi Germany at the establishment of the United Nations Organization on the basis of the United Nations Declaration of Human Rights, followed by UN covenants. The Helsinki Final Act, whose tenth anniversary is celebrated this year, is the latest international declaration of human rights. As a signatory of the Helsinki Accords, the Soviet Union is not yet prepared to recognize human rights as a legitimate concern of international diplomacy but has not repudiated the matter completely. The CSCE process is gradually becoming institutionalized internationally. It will take time and a continuing struggle to realize the full implementation of the Helsinki commitments. For the sake of peace in the world, we must continue to be optimistic.

49. The attitude of the Alliance countries on these questions echoes concerns shared by all and has thus led to the creation of a consultative process within the NATO framework which, while leaving each state free to make its own decisions, has ensured co-operation and follow-up in these fields, as was in fact demonstrated at Ottawa, and also in the United Nations.

50. Helsinki, within its own limitations, thus plays a positive part in the implementation of a model for international relations that reconciles realism with the moral strictness invoked by the democracies. The differentiation between the internal systems of the Communist countries is also a sign of this. Is there really any likemindedness between Hungary and the Soviet Union?

51. In this connection, we can only reaffirm the unwavering position of our Sub-Committee and the North Atlantic Assembly: anything that promotes fluidity through publicity favours the amelioration of human rights, which itself helps to humanize régimes and hence international relations. This is why the Western radios broadcasting to Eastern Europe and the USSR, the press releases on human rights, the transmission of Western press to the East and its readership there, the activities of non-governmental organizations, the scholarships given to students to analyze these questions and the participation of the elected delegates of the population in follow-up conferences form, with the Act itself and its follow-up, a single whole. It is by reinforcing the role of the public in this new type of diplomacy, which concerns men just as much as states, that results can be obtained. The men and women who represent the electorate owe it to themselves to play a leading role in this process.

STANDARDS FOR ASBESTOS REMOVAL INDUSTRY MUST BE PROMULGATED

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. FLORIO. Mr. Speaker, school districts around the country are currently spending millions of dollars on contractors to abate hazardous asbestos in school buildings. Unfortunately, this money is often spent on incompetent abatement work. Environmental Protection Agency [EPA] surveys show that perhaps as much as 75 percent of all local asbestos abatement work has been done improperly. The result of this shoddy work is that almost 1,200 additional schoolchildren will contract cancer, according to EPA estimates.

One reason for the improper abatement work is that EPA has never established a model contractor certification plan. Without contractor certification, reputable asbestos abatement firms are having difficulty competing in the marketplace.

According to one such contractor, C.B. Miller of the Petrin Corp., located in Baton Rouge, LA:

The only problem we have with competing against asbestos abatement contractors who perform shoddy work is that we are usually not as competitive on our pricing as they are because of our philosophy on doing the work the right way. Subsequently, they are awarded the work for the low price on the majority of federal, state and local projects.

Mr. Miller describes an alarming situation. Government projects are being awarded to contractors that Mr. Miller terms "pirates—here today and gone tomorrow." The reputable firms are unable to compete with these so-called pirates because proper asbestos abatement is an expensive proce-

dure. As a result, we are left with shoddy work that could be causing 1,200 additional schoolchildren to contact cancer because of their exposure to deadly friable asbestos.

To make matters worse, internal EPA audits prepared by the Agency's inspector general revealed that EPA has improperly implemented its asbestos-in-schools program. A recent article by Associated Press reporter David Goeller details EPA's inability to protect our Nation's children from the hazards of asbestos in the schools they attend.

The audits contain a devastating indictment of EPA's asbestos program by documenting a pattern of lax inspection and enforcement procedures and failures to distribute EPA guidance material, the only information the Federal Government currently uses to assist schools in dealing with the asbestos hazard.

Standards defining just what an asbestos hazard is as well as the establishment of a model contractor certification program and regulations prescribing recommended abatement procedures are urgently needed. The asbestos problem is not going away by itself. In fact, the longer we wait, the worse it gets.

Mr. Miller and the AP article both provide important information about the disaster that is EPA's asbestos program. I commend to my colleagues Mr. Miller's insightful letter and Mr. Goeller's excellent article.

PETRIN CORP.,
Baton Rouge, LA, November 22, 1985.

Re Improper Asbestos Removal From Schools By David Goeller, A.P.

U.S. Representative JAMES J. FLORIO,
Rayburn House Office Building, Washington, DC.

DEAR REPRESENTATIVE FLORIO: I read with interest the above referenced article (see copy enclosed) on "shoddy abatement work" in the asbestos removal industry. I hope you will take the time to let me introduce you to our company and to read my following comments:

The Petrin Corporation is an industrial insulation and asbestos removal contractor, incorporated in the State of Louisiana and performing work throughout the continental United States. Petrin employs 200-plus American Citizens on an annual basis and we are very proud, not only of our reputation in the industry, but also of our excellent "safety record" as our insurance modification factor of .72 is 28% better than the average for companies of our size.

The newspaper article touched on "shoddy abatement work" and in Louisiana we call contractors who perform this type of work *pirates*—here today and gone tomorrow. We, at Petrin, feel that there is only one way to remove asbestos—"The Right Way". The right way costs money not only in equipment but also in *education*. How many asbestos abatement contractors around the country have sent their first and second line supervisory personnel to the Asbestos Abatement Seminars in Dallas, Texas, the University of Kansas Abatement Workshop for supervisors, and The Georgia Institute of Technology Asbestos Abatement Workshop? We have, and, even though it is very expensive, we feel that it is worth every penny if one plans on performing the work the right way.

The only problem we have with competing against asbestos abatement contractors who perform "shoddy work" is that we are usually not as *competitive* on our pricing as they are because of our philosophy on doing the work "The Right Way". Subsequently, they are awarded the work for the "Low Price" on the majority of the Federal, State and local projects.

For this reason, I applaud you and your efforts in seeing that Asbestos Abatement work is executed properly and hope that you can appreciate the fact that reputable Asbestos Abatement contractors are as concerned as you are.

Thank you for your efforts in this regard and I only wish more elected officials were as concerned as you are for the American people.

Sincerely yours,

C.B. MILLER,
Vice President.

ASBESTOS REMOVAL FROM SCHOOLS CARRIED OUT IMPROPERLY, EPA REPORTS SAY

(By David Goeller)

WASHINGTON.—The federal program to remove cancer-causing asbestos from schools has been carried out improperly in three of the most populous areas of the nation, according to Environmental Protection Agency documents released Saturday.

The reports, prepared by EPA inspectors general for the New England, mid-Atlantic and Midwest regions, said the agency had failed to give local school officials technical information needed to comply with its asbestos-removal rule.

The reports also said the EPA was not adequately conducting follow-up inspections at schools to ensure that local officials were finding asbestos and removing it safely.

The documents were released by a frequent critic of the EPA's asbestos removal program, Rep. James Florio, D-N.J., chairman of the Energy and Commerce subcommittee on commerce and transportation.

"These audits contain a devastating indictment of EPA's asbestos program by documenting a pattern of lax inspection and enforcement procedures and failures to distribute EPA guidance materials, the only information the federal government currently uses to assist schools in dealing with the asbestos hazard," Florio said in a letter to EPA Administrator Lee Thomas.

One audit report said that as of last month, the six-year-old program had not been fully implemented in EPA Region III, consisting of Delaware, Maryland, Pennylvania, Virginia, West Virginia and the District of Columbia.

The auditors said that local school officials responsible for asbestos removal "did not implement a proper asbestos program because the agency did not distribute a key 1980 guidance document."

A similar complaint about distribution of the so-called "Black Book" was made by inspectors general in Region I, New England, and Region V, Illinois, Michigan, Indiana, Ohio, Minnesota and Wisconsin.

Among other things, the document tells local officials how to properly sample their schools to find asbestos and how to remove it without endangering schoolchildren or removal workers.

Jack Moore, head of the program at EPA, said the "Black Book" had received only limited distribution because it was too technical and complex to be of much practical use to local school officials.

He said that draft copies of a more readable version were mailed last month to 45,000 school districts.

Moore said that "we probably should have been more aggressive in getting technical information out. . . . As you get into tens of thousands of schools, you're going to find something that isn't correct. Nobody is infallible. No program is perfect."

The audits questioned not only the adequacy of asbestos inspections by school districts but also the use of random follow-up inspections by EPA personnel. Two of the reports said EPA should target districts with known problems.

The Region III report said EPA inspectors found violations of the removal rule in only seven of 85 districts checked. The inspector general said a survey of 50 districts found 13 that "were not aware of the requirements of the rule or . . . did not maintain required records."

"Based on past performance, it will take the (EPA) inspectors approximately 36 years to inspect the remaining" districts in the region, according to the report, which said that EPA took as long as 226 days to notify districts of rule violations.

"These delays mean that districts in violation of the inspection rule are not notified in a timely manner, thus delaying corrective actions," Florio said.

The Region I report cites a failure of local inspectors to follow inspection procedures recommended by EPA, resulting "in students and employees becoming exposed to asbestos hazards or (schools) spending thousands of dollars removing material that may not contain asbestos."

In Region V, the inspector said that EPA inspectors checked 2,674 private schools in Illinois, Wisconsin and Minnesota in 1982-83. "We found that Region V's inspections . . . were not properly performed."

Dave Ryan, an EPA spokesman, said that "many of the substantive issues in the reports have been addressed in large measure already." He said that charges such as Florio's "tend to divert attention from the real progress made" in getting asbestos out of schools.

Florio said the three reports "do not even begin to address the serious problems caused by shoddy abatement work. . . . A recent EPA survey of its own regional officials indicated that as many as 75 percent of the abatement actions conducted to date may have been performed in an inadequate and hazardous manner."

BLUE RIDGE PARKWAY MARKS 50TH ANNIVERSARY

HON. STEPHEN L. NEAL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. NEAL. Mr. Speaker, this year marks the 50th anniversary of the Blue Ridge Parkway, that beautiful ribbon of highway that courses down the crest of the Blue Ridge Mountains from northern Virginia to Cherokee in western North Carolina.

It is a most appropriate time, I think, to reflect on the history of the parkway and those visionary Members of Congress who forged the legislation that made it possible. All this is contained in an excellent paper by Philip A. Grant, Jr., associate professor

of history at Pace University in New York State.

The Blue Ridge Parkway was spawned during the depths of the Great Depression as part of President Franklin D. Roosevelt's New Deal Program to combat unemployment and improve highway transportation. Construction of the parkway meant employment and income for many embattled residents in the mountains of North Carolina and Virginia. It also opened up an almost unimaginably beautiful vista of some 400 miles, which has been enjoyed by tens of millions in the succeeding 50 years.

I am pleased that the entire North Carolina congressional delegation of that day was at the forefront in pushing this and other similar legislation through the Congress. None played a more important role than North Carolina's Representative Robert L. (Muley Bob) Doughton, longtime chairman of the Ways and Means Committee, who was author of the bill which authorized the parkway and other similar projects. Congressman Doughton, a favorite son of the area I am now honored to represent, a true servant of all the people, and a great inspiration to me, served in this body for 42 years. His record and reputation have been matched by very few who have been privileged to serve here.

At this time, Mr. Speaker, I would like to insert into the RECORD the paper by Professor Grant:

STATEMENT OF PROF. PHILIP A. GRANT, JR.

On March 4, 1933 Franklin D. Roosevelt was sworn in as the Thirty-Second President of the United States. Five days later the newly inaugurated Chief Executive summoned the Seventy-Third Congress into emergency session. Between the opening ceremonies on March 9, 1933 and the formal adjournment of the Seventy-Fourth Congress on June 20, 1936 the House of Representatives and United States Senate were to enact a substantial number and wide variety of significant laws. Many of these measures were designed to alleviate the acute sufferings caused by the Great Depression.

The foremost priorities of the First Roosevelt Administration included combatting unemployment and improving highway transportation. Congress eagerly cooperated with the President in these areas and approved an impressive array of landmark bills to effect relief and recovery. One of the most noteworthy developments of the years between 1933 and 1936 was the establishment of the Blue Ridge Parkway.

Among the individuals vested with the responsibility of approving or rejecting Roosevelt's historic initiatives were the two United States Senators and eleven members of the House of Representatives from North Carolina. These gentlemen, like their colleagues from other parts of the nation, would cast votes on an exceptionally large number of bills and resolutions. Five of these congressional measures involved the Blue Ridge Parkway.

The origins of the Blue Ridge Parkway could be traced to the National Industrial Recovery Act. Signed into law by President Roosevelt at the White House on June 16, 1936, the National Industrial Recovery Act provided for a $3,300,000,000 federal public works program. One of the key provisions of the statute was Section 205(a), the text of which read as follows:

"Not less than $50,000,000 of the amount made available by this act shall be allotted for (a) national forest highways, (b) national forest roads, trails, bridges, and related projects, (c) national park roads and trails in national parks approved or authorized."

The author of the National Industrial Recovery Act was Democratic Representative Robert L. Doughton of Laurel Springs, North Carolina. Doughton in March 1933 was beginning his twelfth of twenty-one terms on Capitol Hill and his first of eighteen years as Chairman of the prestigious Committee on Ways and Means. Doughton not only served as floor manager of the National Industrial Recovery Bill in the House chamber, but also as a leader of the conference committee reconciling the differences between the House and Senate versions of the bill. The North Carolina congressional delegation supported the bill by a 10-0 majority.

On December 5, 1933 the Public Works Administration (PWA), which had been established under the National Industrial Recovery Act, decided that $4,000,000 would be set aside for the construction of a scenic highway between the Shenandoah and Great Smoky Mountains National Parks. Two weeks later the decision of the Public Works Administration was transmitted to the Director of the National Park Service, thereby according official sanction to the planning of the future Blue Ridge Parkway.

One of the principal questions to be resolved was whether North Carolina or Tennessee would be the location of the southern portion of the Blue Ridge Parkway. On February 6, 1934 a delegation of distinguished North Carolinians testified before a federal hearing, presided over by representatives of the Public Works Administration, the National Park Service, and the Bureau of Public Roads. Strongly urging the North Carolina route for the parkway were United States Senators Josiah W. Bailey of Raleigh and Robert R. Reynolds of Asheville and Representatives Doughton, Zebulon Weaver of Asheville, Albert L. Bulwinkle of Gastonia, Franklin W. Hancock, Jr. of Oxford, and William B. Umstead of Durham.

On September 17, 1934 a second hearing was conducted in an auditorium of the Department of the Interior Building in Washington. Directing this hearing, at which spokesmen from North Carolina and Tennessee advanced their respective arguments on the route of the Blue Ridge Parkway, was Secretary of the Interior Harold Ickes. The North Carolina contingent at this hearing included Senators Bailey and Reynolds and Representative Doughton.

Ickes finalized his decision on the Blue Ridge Parkway on November 10, 1934. Dispatching identical letters to the Governors of North Carolina and Tennessee, the Secretary concluded that the "decided weight of evidence is in favor of the so-called North Carolina route." The members of the North Carolina congressional delegation were obviously pleased with Ickes' decision.

The second piece of legislation affecting the destiny of the Blue Ridge Parkway was the Federal Highway Act of 1934. This law went into operation on June 18, 1934, immediately after the President affixed his signature. Section 2 of the act was worded:

"To further increase employment by providing for emergency construction of public highways and other related projects, there is hereby also authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $24,000,000 . . . to be expended for the survey, construction, reconstruction, and maintenance of highways, roads, trails, bridges, and related projects in national parks and monuments, national forests. . . ."

A highly respected North Carolina congressman who was conspicuously involved in the deliberations over the Federal Highway Act of 1934 was Representative Lindsay C. Warren of Washington. Warren, a future Comptroller General of the United States, in 1934 was completing his fifth of eight terms in Congress. In his capacity as the ranking Democratic member of the House Committee on Roads, he helped produce the committee report advocating passage of the bill. Thereafter Warren would be appointed to the House-Senate conference committee having the task of refining the contents of the bill.

Although a few Republicans voiced objections to certain features of the Highway Bill, it was virtually certain that the measure would pass the heavily Democratic House. A Republican motion to recommit the bill was rejected on a 257-85 roll call and minutes later the bill was approved 255-26. Consistent with their stand on the National Industrial Recovery Bill of the previous year, North Carolinians in the House were aligned 6-0 against recommittal and 5-0 in favor of passage.

When the Seventy-Fourth Congress assembled in January 1935, there was a consensus within the ranks of House and Senate leaders that additional funds were desperately needed to mitigate the excesses of the Depression. The most important law approved by Congress during the ensuing months was the Emergency Relief Appropriation Act of April 9, 1935. Especially relevant to the Blue Ridge Parkway was Section 12 of the act. It provided:

"The Federal Emergency Administration in Public Works established under . . . the National Industrial Recovery Act is hereby continued until June 30, 1937, and is authorized to perform each of its functions under said Act and such functions under this joint resolution as may be authorized by the President. All sums appropriated to carry out the purposes of said Act shall be available until June 30, 1937. . . ."

Serving on the Committee on Appropriations in 1935 was Representative Umstead. Umstead, later to be Governor and United States Senator from North Carolina, was one of the committee members endorsing the report on the Emergency Relief Appropriation Bill. Because of the extraordinary severity of the lingering economic crisis, few observers were surprised when the bill passed the House and Senate by the overwhelming majorities of 317-70 and 66-13 respectively. North Carolinians on Capitol Hill voted 12-0 in favor of the bill's enactment.

Augmenting the National Industrial Recovery Act, the Federal Highway Act of 1934, and the Emergency Relief Appropriation Act of 1935, the Federal Highway Act of 1936 authorized additional money for the Blue Ridge Parkway. Section 5 of the act stipulated:

"For the construction and maintenance of parkways, to give access to national parks and national monuments, or to become connecting sections of a national parkway plan, over lands to which title has been transferred to the United States by the States or by private individuals, there is hereby authorized to be appropriated the sum of $10,000,000 for the fiscal year ending June 30, 1938, and $10,000,000 for the fiscal year

ending June 30, 1939: *Provided:* That the location of such parkways upon public lands, national forests, or other federal reservations shall be determined by agreement between the department having jurisdiction over such lands and the National Park Service."

As in 1934, Representative Warren was prominent among the congressmen who shaped both the committee report and the conference report on the Federal Highway Bill. The bill itself was not subjected to a serious challenge until the conference report was submitted to the entire House. Notwithstanding the criticisms levelled by several Republicans, the conference report was adopted on a 238-87 tabulation. Six North Carolinians cast affirmative votes, while not a single congressman from the Tarheel State was recorded in the negative.

On April 24, 1936 Congressman Doughton introduced a bill providing for the administration and maintenance of the Blue Ridge Parkway by the Secretary of the Interior. On the following day the Doughton Bill was favorably reported by the Committee on Public Lands. Only one paragraph in length, the Doughton Bill proposed that ". . . all lands and easements conveyed or to be conveyed to the United States by the States of Virginia and North Carolina for the right-of-way for the projected parkway between the Shenandoah and Great Smoky Mountain National Parks, together with sites acquired or to be acquired for recreation areas in connection therewith, and a right-of-way of said parkway of a width sufficient to include the highway and all bridges, ditches, cuts, and falls appurtenant thereto, but not exceeding a maximum of two hundred feet through Government-owned lands and designated on, maps, heretofore or hereafter approved by the Secretary of the Interior, shall be known as the Blue Ridge Parkway and shall be administered and maintained by the Secretary of the Interior through the National Park Service. . . ."

Securing recognition in the House chamber on June 20, 1936, Doughton offered a motion to suspend the rules and pass his bill to place the Blue Ridge Parkway under the jurisdiction of the Department of the Interior. Because of firm opposition both from Republicans and many Democrats from the populous states of the industrial Northeast, it seemed doubtful whether the Doughton Bill could attract the support of the two-thirds majority required by the House rules, After the prescribed forty minutes of general debate, the House voted 175-125 to suspend the rules. Unfortunately, this majority was twenty-five votes short of the necessary two-thirds ratio of the three hundred House members recorded in the tally.

After experiencing the frustration of having his bill rejected, Doughton succeeded in persuading the Committee on Rules to recommend that his measure be approved by the House. According to House procedures, a resolution emanating from the Rules Committee needed only a simple majority for acceptance. The Rules Committee recommendation was adopted on a 146-139 tabulation, and minutes later the House passed the Doughton Bill by a margin of 145-131. The Senate thereupon approved the bill by voice vote, subsequent to which it was signed by the President.

During the Second Administration of Franklin D. Roosevelt the progress of the Blue Ridge Parkway was expedited by the annual bills funding the multitude of operations of the Department of the Interior. Indeed the "National Park Service" sections of the Department of the Interior Appropriation Acts of 1937, 1938, 1939, and 1940 provided for an aggregate figure of $17,500,000, reserved exclusively for the Blue Ridge and Natchez Trace Parkways.

Determining appropriations for the Blue Ridge Parkway provoked controversy only in 1937. Congressman Doughton, convinced that additional federal money was needed for the parkway, on May 19, 1937 offered an amendment to the Department of the Interior Appropriation Bill. The Doughton Amendment proposed an increase from $3,000,000 to $5,000,000 for the 1937 appropriation for the Blue Ridge and Natchez Trace Parkways. Strongly supported by Representative Bulwinkle and Weaver, the Doughton Amendment was adopted on a 221-160 roll call. The North Carolina House delegation, which has been consistently sympathetic to the Blue Ridge Parkway, favored Doughton Amendment 11-0.

Throughout the New Deal era all thirteen North Carolina congressmen were Democrats. Only New York, Pennsylvania, California, Illinois, Ohio, Missouri, and Texas elected more Democrats to the House and Senate. New York, Pennsylvania, California, Illinois, and Ohio were, of course substantially more populous than North Carolina and each of these states also elected a high proportion of Republicans to represent them on Capitol Hill. The sustained presence of thirteen North Carolina Democrats in the halls of Congress at least partially explained why the Blue Ridge Parkway was a key project in a Democratic Administration.

At the beginning of the New Deal North Carolinians had an aggregate total of one hundred and twelve years of longevity in Congress. Four of these gentlemen, Senator Bailey and Representatives Doughton, Warren, and Edward W. Pou of Smithfield chaired major standing committees between 1933 and 1940. North Carolina not only benefited from the solidly partisan composition of its delegation, but also from the exceptional seniority accumulated by several of its congressmen.

Three North Carolina congressmen, Doughton, Bulwinkle, and Weaver, were the spokesmen for districts whose territory included the Blue Ridge Parkway, while Senator Reynolds was a resident of Asheville near the Parkway's eventual southern terminus. Two others, Representatives Umstead and Hancock, were to seek election to statewide office and obviously wished to appeal to voters in the Blue Ridge Parkway counties and the nearby areas of western North Carolina.

Although the Blue Ridge Parkway was admittedly only one of many historic New Deal projects, it was destined to have a noteworthy impact on the future history of North Carolina. By their diligent efforts the North Carolina congressional representatives helped transform the Blue Ridge Parkway from a dream of a comparatively few number of individuals to a permanent reality for millions of Americans.

HYPOTHERMIA—IT CAN BE PREVENTED

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. BIAGGI. Mr. Speaker, as chairman of the House Select Committee on Aging's Subcommittee on Human Services, I am pleased to once again place into the CONGRESSIONAL RECORD, a special publication developed by the Subcommittee on Health and Long Term Care entitled "Hypothermia—a Preventable Tragedy—a Cold Weather Guide for the Elderly."

The start of winter is less than 2 weeks away. For many in our Nation especially in the upper Midwest and Northwest, winter's grip has already taken a full hold. Consider that just yesterday Phoenix, AZ, had its first measureable snow in a quarter century.

Winter and its cold and snow has an especially strong impact on the health and well-being of our Nation's elderly population. The incidences of hypothermia increases dramatically in the winter months. Today more than 2.5 million older Americans suffer from hypothermia which means a low body temperature, typically 95° F or under.

This publication is designed to try and give our senior citizens helpful tips to avert hypothermia. They are simple and practical steps which can be incorporated into the daily lives of our seniors with little difficulty.

At this point in the RECORD, and on behalf of the senior citizens of my 19th Congressional District, including a special group from the Co-op City community whom I will be meeting with on Monday, December 16, I now wish to insert this publication.

WHAT IS HYPOTHERMIA?

Hypothermia means low body temperature, typically 95° Fahrenheit (35° Centigrade) or under. When body heat is lost to a cool or cold environment faster than it is replaced, body temperature falls and hypothermia results. A simple drop in skin temperature is not hypothermia. While hypothermia can sometimes develop slowly, it usually occurs fairly quickly, over a period of a few days.

Hypothermia may be brought on deliberately when used as a therapeutic measure. For example, in some types of surgery, the patient is purposely chilled to slow breathing, heartbeat, and other body processes. Accidental hypothermia may occur in anyone who is exposed to severe cold without adequate protection, and some older persons can develop accidental hypothermia after exposure to relatively mild temperatures. In this document, reference to hypothermia should be understood to mean accidental hypothermia.

Body temperature normally is maintained through a number of special mechanisms set in motion when signals from the spinal cord and skin are transmitted to the brain. A small area deep in the brain acts as the body's thermostat while another part of the brain regulates the adjustments necessary to maintain a given temperature.

WHO IS AT RISK?

An estimated 2.5 million older Americans are especially vulnerable to hypothermia and a significant number become victims after exposure to relatively mild cold. Based on recent research, one of the leading experts in the country has conservatively estimated that 25,000 older adults die from hypothermia each year in the United States. This estimate ranks hypothermia as

the sixth leading cause of death among older adults in the United States.

Among the elderly, those most likely to develop hypothermia are the chronically ill, the frail, the very old, the poor who are unable to afford enough heat, and those medically vulnerable individuals who do not know how to keep warm when exposed to low indoor temperatures. It is also important to recognize that many prescription drugs commonly taken by older adults make them much more vulnerable to the threat of hypothermia.

For millions of older Americans, economic hardship has necessitated difficult choices between expenditures for food, transportation, clothing, home heating, and medicine. For thousands, it is not just a question of heat or eat. The real dilemma of hypothermia is heat or die.

Although the condition almost always occurs in a cold environment, temperatures do not have to be below freezing for death to result. It is now well established that lower room temperatures are potentially lethal to millions of vulnerable older Americans who are now being forced to reduce indoor temperatures out of economic necessity. Most hypothermia victims succumb in temperatures between 30° and 50° F and typically suffer a progressive physical and mental deterioration, which, if uncorrected, results in death.

What factors increase the risk?

Older adults often develop low body temperature because they have difficulty conserving body heat. Many things can interfere with their ability to produce body heat or cause an increase in the loss of heat from an older person's body.

Drugs

It has long been known that many drugs affect thermoregulation and that they can precipitate both hypothermia and hyperthermia, or abnormally high temperature. Drugs which disrupt or impair the ability to regulate temperature will effect an increase or decrease in normal body temperature, dependent on external temperatures. The normal physiological mechanisms that compensate for variations in temperature in our environment are generally less efficient in the elderly. For these susceptible individuals, the combined effects of cold weather and drugs can rapidly induce hypothermia, often with devastating results.

The systems by which the body conserves heat and increase body heat production are important to consider when prescribing drugs for elderly persons, especially during the cold winter months. Drugs which interfere with the body's natural temperature-regulating processes can be a precipitation factor in bringing on hypothermia.

Some common drugs often prescribed for the elderly which can seriously impair the body's ability to adjust are: barbiturates, sedatives, tranquilizers, antihypertensives, vasodilators, and antidepressants.

Illness

Certain diseases or disorders can markedly increase the body's vulnerability to temperature change.

Stroke and Nervous System Disorders. Persons with strokes or nervous system disorders have a reduced temperature sense as well as a decreased ability to respond with shivering and other heat conservation measures.

Skin Diseases and Circulation. Problems with skin blood flow can compromise temperature control because the body's first line of defense against a cold environment is the skin. To conserve body heat in a cold environment, blood vessels in the skin need to be able to constrict and reduce the flow of warm blood near the surface.

Mental Illness. Persons suffering from mental illness may not be as aware of environmental changes or risks and they frequently are receiving therapies which utilize drugs whose characteristics impair thermal regulation.

Immobilizing Diseases. A lack of activity accompanying immobilizing diseases such as arthritis and Parkinson's can result in reduced heat production.

Hypothyroidism. Reduced thyroid function lowers metabolic rate and consequently brings about a decrease in body heat production.

Alcohol

In the United States hypothermia frequently occurs in the alcoholic population. Alcohol predisposes a person to develop hypothermia by dilating blood vessels, depressing the nervous system, decreasing blood sugar, decreasing sensation, and increasing the risk of injury and exposure to cold environment.

Nutrition

Good nutrition is very important in maintaining a normal body temperature. Food provides the energy that the body needs to produce heat. Deficiencies in diet may increase the likelihood of developing hypothermia. An inadequate nutritional balance can lead to a decrease in heat production.

Sensitivity to a Cold Environment

It has been reported that some older persons may be less aware of a cold environment and thus less able to adjust adequately.

Previous History of Hypothermia

Persons who have experienced hypothermia often are unable to maintain a normal temperature if they are later subjected to even mildly cold temperatures.

WHAT ARE THE SIGNS?

It is not easy to recognize that an older adult has hypothermia or low body temperature. Most older adults develop hypothermia over a period of three days to one week. Family members often report that the only "unusual" thing they noticed was a growing confusion.

These signs do not necessarily mean that a person is suffering from hypothermia, but they are warning signals which should be heeded, especially in cool or cold environments.

Common signs and symptoms

Confusion and reduced alertness.
Trembling on one side of the body or in one arm or leg.
Shivering, in the early stages.
Absence of shivering, as condition worsens.
Cold and stiff muscles.
Cold abdomen and back.
Difficulty in speaking.
Slow breathing.
Bloated face, pale and waxy skin.
Forgetfulness.
Drowsiness.
Unconsciousness.
Low body temperature.

NOTE: The only sure way to determine hypothermia exists is to take a rectal temperature with a special low-reading thermometer.

HOW CAN HYPOTHERMIA BE TREATED?

The hypothermia victim must be rewarmed, preferably by a physican who is familiar with hypothermia. A hospital or clinic setting is desirable.

A person suspected of having hypothermia should have his or her rectal temperature taken with a special thermometer, if possible. If the person's temperature is below 95° F (35° C) a doctor or ambulance should be summoned or the victim taken directly to a hospital. If emergency medical help is slow to arrive, further heat loss can be prevented by wrapping the victim in a warm blanket. Food and drink can pose dangers for a hypothermic person and should be avoided.

If blankets are not available the body heat of another person lying close to the victim will aid in rewarming. Care should be taken in handling a victim of hypothermia. Rubbing of limbs can worsen the condition and cause injury. Sudden movement or rough handling can easily cause a fatal heart attack (ventricular fibrillation).

It is best that the victim not try to walk or move around because he or she might fall and suffer further injury. Care should be taken in moving and handling the victim since the heart muscle is very weak when the body is cold. The victim should not be placed in a hot bath or shower because it could cause fatal rewarming shock or afterdrop in body temperature.

WHAT ARE THE CHANCES OF RECOVERY?

Mortality from accidental hypothermia is very high in elderly victims, and recent studies have shown a mortality range between 30% and 75%. In other words, roughly ⅓-¾ of the elderly victims of accidental hypothermia fail to recover. Chances for recovery depend upon a number of factors, and early detection is of particular importance. The victim's age and general health, the degree of internal chilling, the duration of hypothermia, and the method of treatment have all been cited as having a possible bearing upon the victim's ability to survive.

The degree of internal chilling appears to be of greater significance than the relative age of the elderly victims. A number of studies have shown that the lower body temperatures dramatically decrease survival chances. For example, one study showed a 75% mortality for elderly victims admitted to the hospital with temperatures below 86° F as compared with 39% whose temperatures were between 86° F and 95° F. Early detection greatly improves the chances for eventual recovery.

Both body temperature and age appear to be less significant in determining recovery than the presence of an underlying disease. In those cases where hospital admission takes place, the most important condition for survival appears to be the general health of the victim. Consequently the frail, the debilitated, and the sick are at far greater risk.

It is, however, particularly important to remember that many otherwise healthy elderly victims die in their own homes without ever reaching the hospital. Hypothermia dulls the mental faculties to such a degree that the victim is never aware of the condition and is entirely dependent upon the awareness, knowledge and action of others. Unfortunately, accidental hypothermia is often overlooked and dismissed as simple disorientation, lack of coordination or confusion. Without recognition, the elderly victims lack even a chance of recovery, and death is inevitable.

Complications

Accidental hypothermia can worsen pre-existing conditions such as heart disease and diabetes. Fall of the body's temperature below 90° F (32.2° C) is dangerous because cold slows the normal body processes and important body functions are often disrupted. Complications increase as the temperature falls to lower levels, and heart, blood, liver, kidney, pancreas and gastric problems may develop.

Many of these problems automatically resolve themselves during proper hospital rewarming, but some require special attention, especially in older adults with pre-existing conditions.

Hypothermia has been reported to cause permanent damage in some individuals, but further research is needed to determine the risk of permanent damage in otherwise healthy older adults. The most serious complication of a low body temperature is a vulnerable heart. Cold slows and weakens the heart, and it is very important that the victim be handled gently.

HOW CAN HYPOTHERMIA BE PREVENTED?

When it is cold, the body loses heat in many ways. Older persons need to take certain precautions to conserve body heat.

HEAT CONSERVATION CHECKLIST

Food

Have you eaten enough food today? Your body needs fuel to run efficiently, and only food will do the job.

Alcohol

Have you been drinking? Alcohol speeds up body heat loss and makes it very hard to keep warm.

Exhaustion

Have you been working too hard and not getting enough rest? Your body needs energy to fight the cold. Rest is important.

Water

Have you been drinking enough liquids? This is very important for energy and adequate blood volume for circulation.

Insulation

Are you using your clothes in a good layer system to trap air around your body? Are you wearing a hat and scarf? Are your clothes too tight? Are you wearing wool or synthetics, rather than cotton?

Wetness

Is your hair damp or wet? How about your clothes? Change into something dry and stay warm.

Exercise

Exercise produces more body heat, and you will be warmer if you are more active during the day. You need more insulation if you are just sitting still.

High risk persons

Have you had hypothermia before? Do you have a chronic physical condition, such as diabetes, circulatory problems, nervous system disorders, etc? You should take special precaution to stay warm and avoid exposure to cold.

COMMON COLD WEATHER MYTHS

Myth: Alcohol helps to keep you warm in cold weather.

Fact: Alcohol greatly increases body heat loss by relaxing skin blood vessels and allowing a greater supply of warm blood to flow near the cold surface. You feel warmer, but cool faster. Hypothermia is far more likely to develop during periods of cold exposure if you have been drinking.

Myth: The best solution for cold hands is thicker gloves.

Fact: Gloves are important, but cold hands usually result from excess body heat loss from the head, neck and chest. If you are wasting heat, the body will try to conserve heat on its own by reducing the flow of warm blood to the skin, hands and feet.

Myth: The air temperature has to be below freezing in order for you to "freeze to death".

Fact: No one freezes to death. Very few people can survive if their deep body temperature falls below 75° F. These people die of hypothermia or complications brought on by this condition. Most deaths occur in air temperatures well above freezing.

Myth: Snow at 15° F air temperature is more dangerous than rain at 40° F.

Fact: Staying dry is the big secret to keeping warm in cold outdoor situations. Snow at 15° F is dry and easy to work in if you are properly dressed. Rain at 40° F is very, very cold. Unless your rain gear is good, you run the risk of becoming soaked and developing hypothermia.

Remember: Most people develop hypothermia in air temperatures between 30° and 50° F. Almost all of these people have allowed themselves to get wet.

Myth: Muscular individuals are not as affected by the cold and can "tough it out" in freezing weather or a short term survival situation.

Fact: Muscular strength is no defense against cold stress or hypothermia. In fact, fat, "out-of-shape" people may do better under cold stress because the fat acts as insulation. Of course, it is best to be in good physical condition and properly dressed.

Myth: After a few weeks of cold weather the body gets used to the cold or acclimatizes, and less clothing is needed.

Fact: Acclimatization does take place in hot weather within about four to seven days, but the body does not really acclimatize to cold weather. Some changes do take place but we still need the artificial insulation of clothing to survive.

Myth: Rubbing snow on a frostbitten area helps to rewarm it by improving the circulation.

Fact: Frostbite is a localized injury caused by extreme cold, and rubbing it with snow makes about as much sense as applying heat to a burn. Snow will simply cause greater damage to the tissue.

Myth: Three pairs of socks are better than two because the thickness will help to insulate your feet. Even if you have a bit of trouble putting on your shoes it's definitely worth the extra effort.

Fact: Tight shoes cut down the warm blood supply to the feet and are therefore a major cause of frostbite. It would be much better to have the shoes a little loose. Loosen your laces a little bit if the weather is really cold, and do not wear too many socks.

THANK YOU, OFFICERS BONAVENTURA AND CIFFO

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. GREEN. Mr. Speaker, on December 19, 1985 the 19th Precinct Community Council will be honoring its two community affairs officers, Officers Bonaventura and Ciffo.

The Community Council would like both officers to know how much they appreciate the good work that both of them perform every day in dealing with various problems that arise in the community.

As an elected official from the precinct's congressional district, I would like to take this time to offer my thanks to both Officers Bonaventura and Ciffo in working with my district office on various problems that have arisen throughout the year. Their help has allowed my staff and me to be more responsive to the needs of New York's 15th Congressional District, and I know that any Member of Congress would be happy to have either Officer Bonaventura or Officer Ciffo performing such work in his or her district.

A LOOK INSIDE THE CENTRALLY PLANNED, OVER-REGULATED DEFENSE PROCUREMENT ESTABLISHMENT

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. COURTER. Mr. Speaker, I want to commend to my colleagues the following article by Tim Carrington of the Wall Street Journal, because it should be an eye opener to those who like nothing better than to add on another regulation or order up another report from the Pentagon. As the article points out the Pentagon is the last true bastion of pure bureaucracy in Ronald Reagan's Washington, but there is still surprisingly little sentiment in the Congress or elsewhere for reforming this enitity in a meaningful way. Only those who consider regulation a true art form could sit down and, with a straight face, write out 15 pages of specifications for sugar cookies or 19 pages of directions for a police whistle. If we are ever to produce large numbers of state-of-the-art weapons in an efficient manner, we simply must start deregulating and dismantling the defense bureaucracy so it can operate in conjunction with an innovative, free-enterprise defense industry.

[From the Wall Street Journal, Nov. 27, 1985]

ALTERNATIVE TO AN ARMS UTILITY

(By Tim Carrington)

Ronald Reagan came to Washington five years ago to wage war on the local bureaucracy, but the campaign is only now reaching government's most formidable labyrinth, the Pentagon.

A decade of deregulation in various sectors of the U.S. economy has barely touched the defense establishment, which is still chugging away like some regulated public utility. Indeed, to some, the Pentagon has less in common with America's free-enterprise economy than with the lumbering bureaucratic state it is in place to deter. "This building has a socialist culture," Navy Secretary John Lehman recently complained.

That Ronald Reagan should preside over such an organization finally became too incongruous for the White House to abide,

and last August—over the objections of Defense Secretary Caspar Weinberger—the president established a commission on defense management. Hewlett-Packard Co. Chairman David Packard, who heads the commission, promises that "we're not going to do a whitewash job for anybody," despite Mr. Weinberger's concern that the study may provide new fodder for his critics. Mr. Packard says that "things are a lot worse than they were 15 years ago when I was there" as deputy secretary.

The much-encrusted procurement machinery threatens to do more than embarrass the Pentagon or waste more money. The more isolated and arcane the defense industry becomes, relative to the rest of U.S. commerce, the more difficult it would be for the Defense Department to involve the broader economy during a war.

BIZARRE SPHERE OF DAR AND FAR

The vast expenditures of time and money on routine, peacetime acquisitions don't translate well into any reliable wartime surge capacity for U.S. industry. Nor should the U.S. assume that enterprises currently operating outside the Pentagon's contracting milieu could quickly adjust to the increasingly bizarre sphere of the FAR and the DAR (acronyms familiar to contractors, standing for Federal Acquisition Regulations and Defense Acquisition Regulations).

William Perry, a commission member and the managing partner of H&Q Technology Partners, notes with horror that there are 44,000 military specifications, a large number of which are applied to even the simplest procurements. For example, the Army has 15 pages of detailed specifications governing the sugar cookies it purchases for soldiers' desserts. A whistle for the military police was bought only after 19 pages of specifications and description were issued. Without this guidance, an Army official explains to an incredulous questioner, the contractors might err.

Mr. Perry, who directed the Pentagon's weapons research and development programs during the Carter administration, says that an examination of production lines devoted to military and commercial manufacturing reveal a wide difference between defense industry and the rest of U.S. manufacturing. Similar products, such as semiconductors, are made under radically different processes, depending on whether they're going to be sold to the Defense Department or to, say, General Motors Corp. Often, the DoD version costs many times more than the commercial version, Mr. Perry says.

It seems doubtful that mild medicine will cure the red-tape disease choking the Pentagon. "The defense procurement system that we have today really suffers from a hardening of the arteries," says Mr. Perry. "With such a sick patient, there are really two choices: You can try to improve the health of the arteries, or you might prescribe a coronary bypass." The latter, he adds, seems preferable.

Dedicated public servants inside the Pentagon currently labor against daunting odds. Army Undersecretary James Ambrose recently ordered subordinates to cut in half a 10-inch tome of specifications proposed for a new helicopter engine. A week later, the bureaucrats returned with a sheaf of paper half as thick as the first. However, Secretary Ambrose says he discovered that this was accomplished by using two sides of the pages rather than one. "Good try," he told them.

Mr. Ambrose likens fighting the proliferation of military specifications to ridding a garden of Johnson grass, a common weed: Every fragment left in the soil takes root and springs up anew. Behind it all is the bureaucrat's distrust of private initiative—the belief, in Mr. Ambrose's words, that "Mother knows best." The Army recently broke out of the usual mold when it acquired existing radio-communications technology for the Army's Mobile Subscriber Equipment communications system for the battlefield. By forgoing the usual research-and-development work on not-yet-invented technologies, the Army saved a half-billion dollars.

Applying that approach to other systems probably will entail purchasing more equipment already deployed by foreign countries. The Army currently is considering foreign guns and missiles to fulfill the mission previously envisioned for the hapless Divad air-defense gun, which the Pentagon killed after $1.8 billion had been spent inventing it. Rather than writing pages of specification, Army officials are reviewing the performances of gun and missile systems built by the French, British, West German and Swedish armies.

The mother-knows-best syndrome, and its umbilical cord of redtape, won't be helped by new layers of requirements drafted on Capitol Hill. Congressional reforms often add requirements to those already in place. For instance, a new procurement law seeks to impose competition on all major weapons programs by requiring program managers to file reports to Congress explaining what steps they took or didn't take to encourage competition. Meanwhile, many of the regulations drawn up to apply to monopolistic procurement remain in place.

New procurement approaches should be substituted for old, not added. Where it would produce savings, competition should replace regulation, not be added on through a quota system or a blanket requirement. In other places, performance standards should replace rigid engineering specification. Different solutions will lend themselves to different parts of the immense defense program.

"It's a strange amalgam, the defense business," says R. James Woolsey, a commission member."There are parts of it that can be subjected to competition, but there are parts of it that should be tightly regulated." Competition isn't always possible. The Navy is trying to stimulate it in the construction of the hugely complex and expensive Trident submarine, which is currently made only by the General Dynamics Corp., but critics contend that establishing a second source's production line would cost hundreds of millions of dollars, outweighing any savings that might result from the competition.

SOME SPECIFICATIONS ARE SILLY

Military items not only carry dozens of specifications that don't apply elsewhere, but undergo testing procedures that differ from those exercised in nonmilitary commerce. Some of this is necessary—a semiconductor used in a combat vehicle would have to withstand higher temperatures than semiconductors for a home computer. But some specifications are silly. The $7,000 aircraft coffee brewer order up by the Air Force was made to survive conditions that would have killed the crew.

There's reason to think that military and nonmilitary standards will come to resemble one another more. Auto makers are requiring that electronic circuitry be made to survive the heat and grime beneath the hood of a car. This creates the prospect that some commercially suitable circuits might also fulfull military uses.

The Pentagon's aversion to equipment not invented in its own corridors is clear in the nomenclature it uses in the procurement process. Thousands of characteristics specified in purchases are called "requirement," implying that it's impossible to dispense with them. Mr. Perry says a huge obstacle to simplifying the procurement process is the "unwillingness to compromise" on the myriad stipulations.

At root, the Packard commission needs to decide whether the defense industry indeed should be nationalized into a vast public utility, minutely regulated from Washington, or whether it will someday more closely resemble other sectors of American commerce and industry. Since the current White House professes a staunch belief in businesslike practices, it should cast a skeptical glance toward the Pentagon.

THE LATE ROY WILKINS

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. CLAY. Mr. Speaker, I wish to enter into the CONGRESSIONAL RECORD the remarks of Mr. Roger Wilkins, nephew of the late Roy Wilkins, who was the long-time executive director of the NAACP. Mr. Roger Wilkins' remarks are addressed to the Assistant Attorney General for Civil Rights, Mr. William Bradford Reynolds. As Roger Wilkins points out, the Attorney General's comments on the late Roy Wilkins are not consistent with our memories of the life and works of Roy Wilkins.

INSTITUTE FOR POLICY STUDIES,
November 8, 1985.

Hon. WILLIAM BRADFORD REYNOLDS,
Assistant Attorney General for Civil Rights, Department of Justice, Washington, DC.

DEAR MR. REYNOLDS: The report in the Washington Post on Tuesday, November 5, of your interview with Howard Kurtz was astonishing. Subtracting the years of my early childhood, I knew my uncle, Roy Wilkins, very well for forty-five years before his death four years ago.

For you to raise the implication that your conduct of your office over the last four and a half years conforms in any way with his work and thought is indecent. My uncle was a fair, honorable and idealistic man who fought for a large and decent vision of America. Your attempt to link your tawdry, mean-spirited and fundamentally racist policies to his memory is dishonest in general and obscene and insulting to those of us who loved him.

Yours truly,

ROGER WILKINS.

LEADERSHIP AT LEBANON VALLEY COLLEGE

HON. ROBERT S. WALKER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. WALKER. Mr. Speaker, for obvious reasons, all of us have a constant, vigilant interest in the state of education in our country. Each of us is aware of the many reports issued over the last few years decrying the quality of education provided to our Nation's students. There are many bright spots, however. We should use the success stories as models for suggestions, recommendations and new ideas for improving our system of education. In that context, I recommend to my colleagues this report on the educational system and accomplishments at Lebanon Valley College, which is located in my congressional district, and commend the officials at the college for preparing this statement on the leadership they are providing in this vital area.

LEADERSHIP AT LEBANON VALLEY COLLEGE

We at Lebanon Valley College feel that out of all the studies of elementary, secondary and higher education that have been produced recently by public and private commissions and committees, one truth has emerged. Our nation's educational institutions are simply not producing the number or the quality of leaders this nation requires in the challenging decades ahead.

One hundred and eighteen years ago, in the aftermath of the Civil War, citizens of Annville, Pennsylvania, purchased a small academy in their city and presented the academy properties to the founders of a new educational institution, Lebanon Valley College.

The founders of the College accepted the gift, and entered into a covenant to "produce and maintain a high grade college forever." That covenant has been kept through all generations.

Were they to return today, the founding fathers would find pleasure in continued serenity and wholesomeness of the site they chose so well. And, returning 19th century founders would be pleased with the quality of their beloved school.

Lebanon Valley College has indeed earned a national reputation of being a private school distinguished by quality. It is highly accredited; its affairs marked by financial stability; its faculty of impeccable scholarly attainment; and its roll call of distinguished alumni is a star-studded roster of those who have earned prestigious national and international fellowships and scholarships, and those who command leadership roles in the arts, business and professions.

To keep its commitment to "maintain forever" an institution of highest quality, Lebanon Valley College has, while preserving the best of its tradition as a sanctuary for student growth and intellectual inquiry, kept pace with the revolutionary times. Its facilities are modern, and academic programs combine the best of the traditionally sound with the boldly innovative. Its science center is state-of-the-art; its music center has been called the 'finest in the East.'

As a mark of growth, Lebanon Valley College this year is offering new programs in psychobiology, computer information systems, and a series of associate degrees in the rapidly growing hospitality industry of travel and hotel administration and food service. The programs are rich and diverse, suiting the needs of students and changing the world of work.

Lebanon Valley College is very proud to have avoided the pitfall of ever becoming a college which is little more than a "shopping center for degrees." A student of Lebanon Valley College is treated as a whole person. His or her college years are viewed as a time of building foundations, a lasting value systems, and of opening the mind to a lifetime of learning and intellectual inquiry.

Lebanon Valley College attracts and maintains a culturally diverse student body and faculty and welcomes students from all religious faiths and racial and ethnic backgrounds.

LVC AND LEADERSHIP

It is in this setting that students of all ages are introduced to the new central thrust of leadership development.

The days are gone when a leader could depend solely on personal charisma or one inspiring speech for effectiveness. Today's leaders need to combine skills, reinforcing allure with action, reasoning with resolution. Charisma is not enough; in a complex society, a leader must have substantial training in models of management and be totally aware of his own strengths and weaknesses as well as his work colleagues.

Lebanon Valley College has met the challenge of providing leadership training for all segments of a community through it four-tiered leadership development program; an ongoing program for selected high school students; a college-level program consisting of seminars, courses and internships; five-day and three-day development seminars for middle management executives; and a quarterly program for top executives.

Each of these four programs focuses on helping future and current leaders increase their creativity and productivity through self knowledge, sensitivity and management skills.

The program for high school students, developed in cooperation with secondary school teachers and administrators, prepares students for the leadership challenges ahead of them. It is actually a year-long program integrated with their schoolwork which introduces them to leadership principles, skills an behavior. Lebanon Valley College provides materials, speakers, and a site for in-depth seminar sessions.

The introduction to the college-level program consists of seven weekly sessions held at the beginning of each student's college career, followed by several other leadership studies and leadership learning opportunities throughout their four years at the college. Responding to community needs and involvement in extracurricular opportunities, academic course work, and additional lectures and workshops are all components of program being constantly reviewed and reshaped by the dedicated faculty and staff. In addition, members of the Lebanon Valley College faculty, aware of the importance of a new leadership imperative, have incorporated leadership development materials in a large number of already existing courses.

Leadership development seminars for middle mangers at Lebanon Valley College are currently being offered on a monthly basis and have been enthusiastically endorsed by a number of businesses, corporations and non-profit organizations in South Central Pennsylvania. A group of high-level executives have formed an advisory committee to help assure that the intensive three-day and five-day workshops cover the topics appropriate for contemprary leaders. These topics include decision making, situational leadership, innovative problem-solving ethics, creative feedback and goal setting.

Lebanon Valley College's top executive leadership program involves a limited number of chief executive officers who are interested in sharing their knowledge and wisdom on a number of critical problems. The program consists of quarterly meetings which include a presentation by a current authority on leadership or management and a carefully moderate reaction session.

The four-tiered leadership program at Lebanon Valley College is under the overall suspervision of the school's president, Dr. Arthur Peterson. Peterson and his staff are continuously refining the new leadership program to ensure that it will meet the needs of all segments of the community. Lebanon Valley College is the only college in the nation offering this total community approach to leadership development and it is an approach that bodes well for the future for not only the college itself, but the community it serves as well.

We at Lebanon Valley College feel confident that the covenant passed to us by the founding fathers—to produce and maintain a high grade college forever—is being carried on in the tradition and style in which it was intended. A sense of history combined with a sense of community provides a much needed backdrop to our everyday activities at the college. We value our heritage and are proud to be able to be forebears to that responsibility.

HAUNTED BY YALTA

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. GARCIA. Mr. Speaker, the December 23 edition of the New Republic contained an article on Poland by Tamar Jacoby. I am submitting it for the RECORD.

As chairman of the North Atlantic Assembly's [NAA] Civilian Affairs Committee, I have a special interest in human rights in Eastern Europe. One of the committee's subcommittees, the Subcommittee on the Free Flow of Information and People, monitors the Helsinki accords. The subcommittee, whose members visited Washington and New York last week, met with a number of individuals and organizations concerned about Eastern bloc violations of the accords. Poland is near the top of that list.

What is poignant about Ms. Jacoby's article is her description not of Polish malaise, but of hope—the hope that moved Lech Walesa to fight so tenaciously, the hope of a nation of dissidents.

Ms. Jacoby describes the human side of this struggle. That, after all, is what is important. The people of Poland dare to dream; perhaps they will succeed in making Poland more livable.

I urge my colleagues to read Ms. Jacoby's essay.

[From the New Republic, Dec. 23, 1985]

HAUNTED BY YALTA

(By Tamar Jacoby)

I'd been warned in advance to leave any "subversive" literature behind, and to encode the names and addresses of any dissident contacts. I hadn't done either but the Polish customs officer on the overnight train from Berlin to Warsaw couldn't have been less interested. He didn't even pause over the sheaves of papers clearly visible in my shoulder bag. All he wanted to see was my foreign currency, which he counted to the dollar.

During the week I spent in Warsaw, there was no official surveillance. I traveled about the city as I pleased, visiting well-known Solidarity leaders and other activists. I did try to avoid using the telephone, and several people thanked me for it, but apart from that I acted virtually as I would in a Western country. I'd been warned that people might hesitate to talk openly, and others would suggest that we talk outside. Nothing of the sort happened.

It is common enough in the Eastern bloc to hear people talking about bits of news they had picked up on Radio Free Europe. But in Poland, things don't stop there. At lunch one day at the American Embassy coffee shop, I met a group of foreign reporters who had just come from the weekly press comference held by government spokesman Jerzy Urban. They'd been questioning Urban about Poland's increasingly serous pollution problem. None seemed to find it extraordinary that a Communist government spokesman holds weekly news conferences to reply to the Western press.

Poles also seem to take the underground press for granted. Like Solidarity's broadcasts from clandestine radio transmitters, the opposition media is now less a form of defiance than a way of life. Underground activities say there are hundreds of underground publications in circulation and new ones spring up regularly. One of the few times I felt that either Polish or foreign journalists shared my exhilaration was the day that Solidarity managed to intercept the nightly TV news, running a line of print calling for an election boycott right over the talking head of the official newscaster.

Every conservation I had eventually turned to the subject of what Poles still call "the Yalta system"—to the possibility of revising the assumptions that have underpinned the division of Europe for the past 40 years. How do Poles manage to maintain such extravagant hopes? Bronislaw Geremek, a medieval historian and former Solidarity adviser, explained: "You have to forget your European Cartesian way of thinking when you think about Poland. Everything that seems impossible in another country, we have to try it." For five years, they have been trying against all odds.

Within the last year, the authorities have gotten significantly tougher, amending the penal code to make "social parasitism" a crime. The harsh sentences given this summer to Adam Michnik and two other Solidarity leaders for advocating a 15-minute work stoppage have apparently been followed by a wave of arrests of lesser-known activists. Time is also working against the opposition and its efforts to maintain morale in the long stalemated conflict. Even the most optimistic activists have moments of discouragement. Jacek Kuron, an intense and tireless man who still puts his freedom on the line every day by speaking to journalists and signing protest letters, says bitterly that "nothing has changed" since the declaration of martial law on December 13, 1981. One woman described a recent evening with other former Solidarity people. "Four years ago there would have been lots of discussion. Some people would have been very hopeful, others would have disagreed with them. Today there's nothing to say."

In these circumstances, merely maintaining the status quo is a victory of a kind, and people derive a tremendous sense of accomplishment from the simple fact that Solidarity is still alive. "In the Solidarity period, we said that black is black—and we weren't afraid to say it," another activist explained. "And even now, no matter what the government says, the people still know it. We still have that feeling that we are a free people."

Kuron says that the underground is now, of necessity, "future oriented—educating youth, shaping national cultural, consciousness-raising." Another tactic talks about small, independent groups "collecting information and books and distributing them, setting up cooperatives and local committees to take care of shops and child care and kindergartens." The Cartesian Western visitor can't help wondering why the opposition bothers. As Kuron says about other kinds of similar tactics, "We all know that the only benefit of a strike is a simple declaration of our presence." In today's Poland, even that is a great deal.

Kuron insists that what he wants is "not revising but renewing Yalta"—reviving at least some of the demands that the West put to Moscow in 1945. He admits that it might not be possible today to insist on free elections in Poland. But he believes that other demands, for economic reform and genuinely free trade unions, could not be made to stick because "there are political forces here within the country now that can fight for these conditions and defend them." What he envions is nothing short of democratization, induced by the West, in the heart of Eastern Europe—and he apparently doesn't see much contradition in either this or the original Yalta formulation, calling for free elections within the Soviet sphere of influence.

No one is waiting for active American intervention, and no one expects the formal dismantling of the Soviet system in Europe. Incredibly, it doesn't seem to occur to Solidarity members that the essence of the Soviet system might be precisely its seamless and intractable resistance to the kind of political changes they want. There really is something dreamlike about Poland. These indignant Eastern Europeans still seem to feel that they are entitled to rule of law, to human rights and national sovereignty and a representative government that would respond to "peaceful pressure upon it." Madness? Courage? The Polish national character? Why try to put a label on it? They see, as even I did in my short visit, that Poland is different—and they ask themselves simply: Why not more different? An extravagant question certainly, and probably a dangerous one, but today, five years after the Gdansk agreements, four years after material law, it is what makes life in Poland livable.

A "STAR WARS" COVER UP

HON. LANE EVANS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. EVANS of Illinois. Mr. Speaker, last night this House voted to pass Gramm-Rudman, a measure endorsed by President Reagan who also stated his intention to fight for his military buildup. With cuts coming now from overall defense expenditures, the President's defense spokesman stated that the President would give priority to strategic modernization, readiness, personnel, and naval shipbuilding. Cited to be especially shielded from the impact of Gramm-Rudman is the strategic defense initiative.

With this in mind, I recommend to my colleagues the following article by Flora Lewis which appeared in the December 3 edition of the New York Times. We've already started down the wrong path with bad policy. This article shows that SDI is not only bad policy, it is also bad science.

[From the New York Times, Dec. 3, 1985]

A "STAR WARS" COVER-UP

(By Flora Lewis)

PARIS.—The hyper-selling of "Star Wars" has gone far beyond the childish crayola spot aimed at the general public on TV, beyond the vague claim made to businessmen and allies by the program director, Lieut. Gen. James A. Abrahamson, of progress at an "incredible pace." It has gone to the point of covering up scientific failure in a way that endangers the honesty of research.

Some of the scientists involved are bursting with frustration. They don't know how to cope with this government disinformation campaign. A top official at Livermore and another at Los Alamos, the two national labs where the key research takes place, have resigned, though they are too discreet to explain their decisions.

Ray Kidder, a physicist at Livermore, was quoted in The Los Angeles Times as saying: "The public is getting swindled by one side that has access to classified information and can say whatever it wants and not go to jail, whereas we [the skeptics] can't say whatever we want. We would go to jail, that's the difference."

Energy Secretary John S. Herrington, however, has both denounced the doubters for hurting the national interest in speaking up and called it just a "little squabble" among scientists.

Mr. Herrington said that the next test, scheduled in Nevada this month and named "Goldstone," was going "full speed ahead" despite clear evidence that it cannot be properly measured with existing instruments. The X-ray laser, pet project of the physicist Edward Teller and the centerpiece on which he sold Star Wars to President Reagan, is the current focus of many of the scientists' distress.

It was Mr. Teller, himself, who leaked last April that a test took place on March 23, and his cronies put out word that it was highly successful, it wasn't. It turned out that the monitoring instruments themselves were excited by the X-rays to emit light. Therefore the brightness they measured was much greater than what the device ac-

tually produced and the result was completely unreliable. One scientist in the program concluded that "instead of a weapon we

Undaunted, Mr. Teller went to Mr. Reagan and wangled another $100 million for the project, including this month's test, which will probably cost $30 million. Participants urged a delay until the measuring problem could be solved, which would take six months to a year. That was rejected on the grounds that loss of momentum would be politically unfavorable, even though the test is almost sure to be futile in the circumstances.

Furthermore, although the administration keeps saying its antimissile program is nonnuclear, the X-ray laser relies on a nuclear explosion for its energy. Insistence on continuing these tests is a major reason Washington won't even listen to the Soviet proposal for a comprehensive test ban.

There are other well-grounded scientific doubts about the X-ray laser. The assumption that it can kill Soviet missiles while they are being boosted rests on their current technology; they take three to five minutes to burn out and carry warheads some 200 miles above the earth. But American experts know that it wouldn't be hard, nor inordinately expensive, for the Russians to accelerate burning time, bringing it down to some 50 seconds and completing the boost at 50 or 60 miles high.

X-rays can't penetrate the atmosphere, and at that altitude they wouldn't get through even if the loss of shoot time could be overcome. But nothing else has been developed as far, so X-ray lasers remain the chief hope for boost-phase missile defense.

The willfull distortion of research is a scandal, reminiscent of Stalin's support of Trofim Lysenko's phony theories of genetics because they were politically pleasing. The result set Soviet biology back a generation.

The American physicists working on the Strategic Defense Initiative aren't threatened with the gulag, but they are being put in a demeaning position that undermines their integrity. It isn't a violation of their high security clearance to say that, but it could be if they gave out details to support their stand.

They have been arguing inside the program for some time, to no avail. Apparently they haven't been able to get thrcugh to President Reagan to let him know what is happening. That is why their concerns are seeping into public print, despite the gag rule.

Apart from the other arguments for and against Star Wars, if it isn't based on good science it can never be anything more than what President Reagan calls it, his "dream." But it could be a devastating nightmare, sapping the authenticity of American science.

THE ITALIAN-AMERICAN BAR ASSOCIATION

HON. SALA BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mrs. BURTON of California. Mr. Speaker, tomorrow, in San Francisco, a distinguished organization will honor an equally distinguished group of jurists known for their incomparable contributions to the law and public service.

The Italian-American Bar Association of Northern California has provided vibrant and effective leadership in the legal community. It is a sign of their commitment to performance and quality in both the bench and bar that they have chosen to honor a group of distinguished judges at a luncheon in which these jurists will receive tribute from their peers in the legal profession.

As a member of the legislative branch of government dealing with wide panoply of issues that affect the daily life of every American, I can readily appreciate the interplay between the legislative and judicial branches of government. The activity of enacting laws and their subsequent interpretation demands the highest standards of performance and commitment to public services.

The following judges honored by the Italian-American Bar Association of Northern California meet these high standards:

Gordon Baranco, Alameda County Superior Court.

Walter P. Capaccioli, San Mateo Superior Court.

Alfred Chiantelli, S.F. Municipal Court.

Alfred A. Delucchi, Alameda County Superior Court.

William F. Ferroggiaro, Jr., Humboldt Superior Court.

Joanne C. Parrilli, Alameda County Municipal Court.

Richard Bartalini, Alameda County Superior Court.

Ina Levin Gycmant, S.F. Municipal Court.

Claude Perasso, S.F. Superior Court.

Philip Moscone, S.F. Municipal Court.

John Ertola, S.F. Superior Court.

Raymond Arata, S.F. Superior Court.

Richard Figone, S.F. Superior Court.

Victor M. Campilongo, S.F. Superior Court.

Frank Piombo, San Mateo Superior Court.

Joseph Desmond, S.F. Municipal Court.

Robert G. McGrath, Contra Costa Superior Court.

Wayne A. Westover, Contra Costa Superior Court.

Coleman Fannin, Contra Costa Superior Court.

Joseph A. Matera, State of California.

Timothy A. Reardon, S.F. Superior Court.

I congratulate the Italian-American Bar Association of northern California for honoring these distinguished Californians.

FEDERAL ASBESTOS STANDARDS ARE URGENTLY NEEDED

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. FLORIO. Mr. Speaker, the public health threat posed by asbestos in our school buildings is a problem that calls for prompt Federal action. The Environmental Protection Agency [EPA] has a limited Asbestos-in-Schools Program which simply requires school districts to inspect for asbestos and then post the findings. EPA has essentially left to the States the responsibility for setting inspection, abatement, and contractor standards.

New Jersey is one of the few States that has an Asbestos Program in place. Heralded a year ago as the strictest program in the Nation, the program is now in disarray. In a highly critical self-appraisal, the New Jersey Department of Health admitted that the State's Asbestos Program failed in its central purpose of assuring the health and safety of schoolchildren, according to a recent article in the Record of Bergen County. This excellent article details the painful failures of the State's Asbestos Program.

If New Jersey, which has the most stringent standard in the Nation, failed to protect schoolchildren and school employees, where does that leave asbestos abatement programs in the other 49 States? I fear for the health and safety of our Nation's most important resource—our children.

Clearly, the New Jersey situation is another example of why Federal asbestos standards are urgently needed to protect our Nation's schoolchildren and school employees from potentially deadly exposure to friable asbestos.

I commend to my colleagues this most informative article as well as an editorial that followed from the Record regarding New Jersey's failed Asbestos-in-Schools Program.

[From the Record (Bergen County, NJ), Nov. 26, 1985]

ASBESTOS CLEANUPS FAIL

(By Rod Leith)

New Jersey's asbestos program failed in its central purpose to assure the health and safety of schoolchildren, hundreds of whom returned to classrooms this fall before the state had written confirmation that the schools were safe, state officials have acknowledged.

In a highly critical self-appraisal, the New Jersey Dapartment of Health this month acknowledged that the state's asbestos rules need strengthening in several key areas, particularly in regulation of the private firms hired by school districts to monitor asbestos removal and test buildings for safe reoccupation.

The appraisal, dated Nov. 6, says rules are needed to police asbestos-consulting firms, or air-monitoring companies, and their laboratories, echoing recommendations made a year ago by aides to the New Jersey Asbestos Policy Committee, chaired by Dr. J. Richard Goldstein, the state health commissioner.

Along with the appraisal, a panel of state officials reporting to Governor Kean is studying proposals to shift much of the state's asbestos enforcement to county and municipal health agencies, says a separate report obtained by The Record. If the plans are accepted, the state could ask county health departments next year to take over inspection of daycare centers, schools, and municpal buildings.

Administration of last summer's school asbestos program, the internal Health Department report states, broke down on the crucial monitoring function.

The centerpiece of the state's program is a $600,000 electron microscope that was to be used, among other things, to check on the laboratory work of the private monitors. However, the device was useless when it was needed last summer while asbestos was being removed from 40 public schools. When it was used, it malfunctioned.

"Two problems with the electron microscope only served to complicate and confuse the cleanup process at the very time the schools were opening for the year," the internal report states. Not only did the microscope malfunction, but "the Health Department has yet to receive one major component it ordered for asbestos testing," states the report, authored by Assistant Health Commissioner Peter D. Stratton.

A year ago, Goldstein and Kean jointly announced that New Jersey would enforce the nation's strictest standard for asbestos in the air. In March, Goldstein said the electron microscope would be installed by the summer to be used for research and double-checking private firms. Goldstein and Stratton were unavailable for comment yesterday.

"This is an effort to tear the whole program apart and have a good, rigorous view of it," Kenneth D. Merin, Kean's policy and planning director, said yesterday of the appraisal. "There were clear problems, but it was better than the summer before."

Without the tools and stiff rules to regulate the private monitors, the state relied on industry self-policing. Two federally sponsored programs meant to check the competence of private firms are voluntary. The same deficiency was cited by the state public advocate in a scathing 1984 indictment of the state Health Department's asbestos-enforcement activities.

One finding of the Health Department report disclosed that as many as 28 school buildings were reopened with only oral assurances from the private monitoring firms that the work was performed correctly. The private firms' laboratories are not inspected or required to meet any state certification for quality or competence.

Some of the 28 include schools in Englewood, Glen Rock, and Wallington in Bergen County; Clifton and West Milford in Passaic County; Kinnelon, Rockaway, and Boonton in Morris County, and West Caldwell and West Orange in Essex County, Health Department records show.

The tardy monitoring firms were identified by the Health Department as Ace Associates of Hainesport, Environmental Monitoring and Consulting Associates of Somerville, Princeton Testing Laboratories of Princeton, Testwell-Craig Testing Laboratory of Mays Landing, and Alternative Ways Inc. of Haddon Heights.

"As last summer's experience showed, regardless of qualifications, all too frequently the monitors failed to perform their jobs adequately," states the internal report. Although these private monitors are required to oversee removal work at all stages of the project, the report acknowledged the state's regulations lack the teeth to penalize firms if they fail to perform these functions.

The Health Department report also suggests that some private firms may not have performed properly because of potential conflicts.

"Although the monitors are supposed to be independent of the contractors they are monitoring," the internal report states, "in actuality many of the monitoring firms hired by the school districts last summer frequently work with the same contractors they monitor for the school districts in other, unrelated jobs."

State officials are reviewing written test results submitted this month by four private monitors, responsible for assuring the safety of 25 classroom buildings. The state has yet to receive written reports from the Ace Associates on the safety of three school buildings in the Camden school district, a Health Department spokeswoman said yesterday.

The 28 school buildings have not been declared unsafe, but state health authorities cannot state with certainty that the work of both the removal contractors and the independent air monitors was performed correctly in each school.

"By and large, the removal went pretty well," Merin said. "Even in those schools, like Paterson's, that had to be shut down, exposure was relatively limited." Two schools in Paterson had delayed openings this year because of asbestos-related problems.

THE ASBESTOS FIASCO

Health Commissioner J. Richard Goldstein says that New Jersey has "the toughest asbestos-abatement program in the nation." Maybe it does, but its record in carrying out that program doesn't inspire much confidence.

Two summers ago the state set out to remove every trace of airborne asbestos—a substance that can cause cancer and other serious respiratory problems—from its public schools. What ensued was a fiasco: Dozens of schools couldn't open on time because private asbestos removal contractors had either botched the job or simply not finished.

Last summer private contractors were assigned to clear the asbestos out of 40 schools. Things went a good deal better than the summer before—but, it turns out, not well enough. Four schools—three in Paterson, one in Newark—were opened in September after being certified as safe by private consultants. Subsequent monitoring found low levels of asbestos in each. As many as 28 other schools—including three in Bergen County, two in Passaic, and three in Morris—were reopened with no more than oral assurance from private consultants that they were safe.

As the experience in Paterson and Newark makes clear, the assurance of some of these consultants is suspect at best. The state Health Department should have verified their findings independently. But the department lacked the proper equipment.

The Health Department has acknowledged these failings. In a self-critical report, disclosed on Nov. 26 by the Record's Rod Leith, it calls for tighter regulation not only of asbestos-removal contractors but of the firms that are supposed to monitor their work. The following day, Commissioner Goldstein gave a curious press conference in which he appeared to disavow some of the findings of the report. Happily, however, he didn't back off from its sensible recommendations.

Meanwhile, a cabinet level task force assembled by Governor Kean is unwisely recommending that much of the state's asbestos enforcement duties be shifted to county or local health agencies. Perhaps this should be done at some later time; local inspection and enforcement have their merits. But first the Health Department must be prepared to make sure that the local agencies are doing their job. Its performance over the past two summers leaves too many doubts on that score. Let the Health Department get its own house in order, then consider devolving its responsibilities to the towns and counties. When it comes to the health of children, even one loophole is too many.

EQUAL ACCESS IN SCHOOLS

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. EDWARDS of California. Mr. Speaker, the following is a challenging editorial from the December 9 Christian Science Monitor describing the equal access law and how it conflicts with the Constitution's requirement that government and religion remain separate.

[From the Christian Science Monitor, Dec. 9, 1985]

ON EQUAL ACCESS IN SCHOOLS

At first glance it would seem a matter of fairness: If any single group is permitted to hold meetings in a school's facilities, every other responsible group should be allowed to—whether cheerleaders, French club, or student religious organization. The concept is central to the Equal Access Act that Congress passed slightly more than a year ago.

Yet when the orientation of a club is religious, other important issues intrude. This term the United States Supreme Court is expected to decide the case of a religious student group that wanted to meet in the Williamsport, Pa., high school before the start of the school day. The out-come of the case, on which the court heard legal arguments last month, may well decide the future of the Equal Access Act.

The fundamental question is whether meetings of religious groups would breach the essential constitution separation of church and state. Such meetings could put school officials in a position they should not have to occupy: deciding the boundary between a mere meeting, and religious proselytizing. To determine exactly what was occurring, school officials would have to monitor the group and its meetings. It is difficult enough for the Supreme Court to determine whether religious activities are permissible on public property, let alone shifting the burden to individual school districts.

The monitoring and the potential for having to decide about proselytizing appear to entangle state officials, in this case school employees, in religious issues, thus eroding church-state separation.

Any actual proselytizing, of course, would be a totally impermissible breach of that wall of separation.

When Congress passed the Equal Access Act last year, some opponents warned it could lead to less access, not more. In several school districts this has begun to happen. School officials have resolved the potential problem of watch-dogging meetings of religious student groups by canceling all extra-curricular activities: For students in these schools, "equal access" has become "no access."

No federal law stops students from privately praying, in school or elsewhere. But the state should mandate neither a specific place for religious meetings nor a time for praying: Private, individual prayer is always appropriate.

THE SUMMIT: A FAILURE ON SOVIET JEWRY

HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. WOLPE. Mr. Speaker, President Reagan has been an eloquent spokesman on behalf of Soviet Jewry. He has promised that, in every discussion with the Soviets, on every level, we would bring to the table our concerns, as a Nation, for the right of Soviet Jews to enjoy the guarantees of the Helsinki accords, including freedom of emigration and their right to practice their religion without intimidation or coercion by the state.

Although the President's intentions are laudable and his words noble, his record leaves so very much to be desired. The sad fact remains, after 5 years of administration efforts, fewer Jews are leaving the Soviet Union today than at any time in recent memory. Less than 900 are expected to emigrate this year, a sad trickle compared to the torrent of 50,000 permitted to leave in 1979, during the Carter administration. The recent Soviet gesture on behalf of Yelena Bonner must not obscure the fact that hundreds of thousands of Soviet Jews are languishing under the yoke of repression, fear, and terror. The continuing brutal imprisonment of Anatoly Shcharansky, Ida Nudel, and countless others in the Soviet gulag is a shameful indictment of Soviet policy that compels our attention and ceaseless efforts.

President Reagan pledged that he would forcefully raise the issue of Soviet Jewry with General Secretary Gorbachev at the Geneva summit. Perhaps he did, in his 5 hours of fireside conversations with the Soviet leader. But it remains that only cursory attention to freedom for Soviet Jewry was given in the final joint communique. The Soviet propagandists in Geneva took every opportunity to shamelessly distort the grim facts of life that afflict Soviet Jews. The President apparently came away emptyhanded from Geneva, dashing the hopes and prayers of so many. With such pitifully meager results, the summit must be judged a failure on this critical issue.

This week, Commerce Secretary Baldrige led a delegation of corporate leaders to Moscow to discuss the prospects for improved trade relations. The potential for easing trade barriers between our countries presents the opportunity to assess progress on an easing of the Soviets' repressive internal policies. It is in our benefit—and theirs—to increase our exports to the Soviet Union. But we must not pursue commercial ambition without regard to this most fundamental issue of the continuing plight of Soviet Jewry. We must seek meaningful progress in both areas.

Particularly in these days of the Festival of Lights, Hanukkah, when the candles of menorahs throughout the world symbolize the victory of freedom over tyranny, and illuminate our fondest aspirations, we must rededicate ourselves to freedom for Soviet Jewry.

EDUCATIONAL ACHIEVEMENT OF ASIAN-AMERICANS

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. DORNAN of California. Mr. Speaker, our Secretary of Education, William J. Bennett, is to be greatly admired for his courageous and principled work on behalf of President Reagan and quality education in this country. Specifically, I applaud his efforts to make good on another of President Reagan's campaign pledges—education vouchers to benefit disadvantaged students.

Secretary Bennett has traveled across the country to speak to groups about education in America. He recently addressed the Vietnamese League of Orange County, CA, and acknowledged the impressive educational achievements of Asian-American immigrants to the United States.

The Secretary couldn't have been more right when he said,

What I believe the success of Asian-Americans demonstrates is the importance of values—values which people carry with them in their heads and in their hearts, values which remain with them when their possessions are gone, and their homeland just a memory. One such value of particular significance in educational performance, is the existence of close ties between parents and children, and the willingness of parents to sacrifice for the sake of their childrens' education.

I commend Secretary Bennett's remarks to my colleagues' attention. I insert them here as they were included in the December 1985 issue of Catholicism in Crisis.

[From Catholicism in Crisis, December 1985]

REPAYING A DEBT: THE EDUCATIONAL ACHIEVEMENT OF ASIAN-AMERICANS

(By William J. Bennett)

EDITOR'S NOTE: The address which follows was given by Secretary of Education William J. Bennett on October 22 to the Vietnamese League of Orange County, California. Acknowledging the impressive educational acheivements of a new generation of Asian-American immigrants to the United States—and in particular the refugees from Vietnam—Dr. Bennett emphasized the crucial importance of the family in academic performance. The address is published here with the kind permission of Secretary Bennett.

Tonight, in this brief talk, I want to focus on the educational achievements of Asian-Americans; I wish to discuss some of the lessons which their achievements can teach the rest of us, and to talk a little about some of the obstacles which still stand in their way. Last but not least, I hope that you and I can get to know each other a little better this evening, and begin what I hope will become an ongoing conversation about the future of American education.

Let me start with a personal recollection: Shortly after becoming Secretary of Education, I participated in a White House ceremony honoring the 1985 National Teacher of the Year, a thirty-two year old high school history teacher named Therese Knecht Dozier. The National Teacher of the Year awards program is the most prestigious of its kind in the United States, and Mrs. Dozier, who had been chosen from among the nation's more than two and one-half million elementary and secondary school classroom teachers, was obviously a very remarkable young woman. Not the least remarkable thing about Mrs. Dozier is her background: Born in Saigon of a Vietnamese mother and German father, and orphaned as an infant, she had been sent to a French orphanage, and was eventually adopted by a U.S. Army officer. In fact, Mrs. Dozier and her brother are believed to be the first Vietnamese children adopted by Americans and brought to this country.

Upon receiving her Teacher of the Year Award, Mrs. Dozier explained that her Vietnamese background had a lot to do with her choice of a career in teaching. "I have always been very conscious of having been given a chance to make something of myself," she said. "I want to give that chance to others and to share the excitement of learning that I have always felt. Teaching is my way of repaying a debt."

Now, I know that it is very dangerous to generalize about any cultural group. And in the case of "Asian-Americans"—an umbrella term which actually covers over twenty nationalities, and countless ethnic identities, each with its own language and culture—generalizations are particularly hazardous. Nevertheless, it seems to me that Mrs. Dozier's remarks touched on a number of themes that reverberate throughout the Asian-American community: a love of learning, a love of the United States, a feeling of genuine gratitude for the freedom and opportunities that this country offers, and above all, a deep determination "to make something out of oneself."

And, indeed, Asian-Americans have made something of themselves. According to the 1980 census. Asians have the highest median family income of any group in the country: $23,600, compared to $20,800 for other American families. This in turn reflects the educational achievement of Asian-Americans: three quarters of Asian-Americans are high school graduates, and fully 35 percent of the Asian-Americans age 25 and older have graduated from college—more than twice the proportion of other Americans.

Indeed, it is in the area of education that Asian-Americans have made their most spectacular gains and have taught us the most profound lessons. At selective universities, for example, the proportion of Asian-Americans is extraordinarily high. Asian-Americans comprise 8 percent of the student body at Harvard, and 10 percent of its freshman, class, up from 3 percent a decade ago. Here in California, Asian-Americans constitute 22 percent of all students at Berkeley, and 21 percent at UCLA.

Equally telling are the results of a three year study of some 1,400 Indochinese households conducted for the U.S. Office of Refuge Resettlement. Now this study, directed by Professor Nathan Caplan of the University of Michigan, concentrated on the most recent Indochinese refugees who risked their lives to escape the persecutions afflicting their homelands. Collectively, these refugees are often referred to in the press as the "Boat People." Their escape—as I need hardly emphasize to members of this audience—was a truly fearsome and heroic

ordeal. Literally adrift at sea, exposed to brutal pirate attacks and other cruel hardships, tens and perhaps hundreds of thouands of "Boat People" never made it to safety and today lie beneath the South China Sea—the victims of Communist oppression and tyranny. Still, more than 730,000 Indochinese refugees made it to this nation. The United States was proud to welcome them. The United States is proud to have them, as our newest immigrants—our newest citizens.

Unlike the more educated Vietnamese refugees who came to the United States in the immediate aftermath of Saigon's fall, the Boat People who arrived in this country had been farmers, fishermen, craftsmen, laborers and students in Southeast Asia. Arriving with little or no knowledge of English, with no savings or other resources, and with few marketable skills, the obstacles seemed insurmountable. "And yet," says Professor Caplan, "considering their hardships and all the odds against them, this group of immigrants has in fact demonstrated remarkable progress."

Nowhere has this progress been more remarkable than in the area of education. On national standardized tests of academic achievement, 27 percent of the refugee children scored in the 90th percentile on math achievement—almost three times better than the national average. And although they scored somewhat lower than the national average in English language proficiency, they outperformed their school-aged peers on general grade-point average, with 27 percent—more than a quarter—earning A or A-minus. Overall, their scholastic average was 3.05 on a 4.0 scale, or slightly above a B. As Professor Caplan observed, this is a truly remarkable achievement by any group—let alone by a group facing all the odds against them that this group faced.

How can the success of these immigrants, and of Asian-Americans in general, be explained? Clearly, many fashionable theories about educational and social achievement, theories which emphasize the deterministic role of class, of the environment, of material factors, of "society"—do not apply here. On the contrary, what I believe the success of Asian-Americans deomonstrates is the importance of values—values which people carry with them in their heads and in their hearts, values which remain with them when their possessions are gone, and their homeland just a memory.

One such value, of particular significance in educational performance, is the existence of close ties between parents and children, and the willingness of parents to sacrifice for the sake of their children's education. At the Department of Education, we have been saying for some time now that in education, the parent is the child's most important teacher, even the indispensable teacher. There is by now a good deal of evidence, both statistical and anecdotal, which emphasizes the concern of Asian-American parents for their children's schooling. For example, a teacher at the Bronx High School of Science, a very selective school with a large proportion of Asian-American students told of a conversation she once had with an Asian-American parent: "He said that when he was younger, he couldn't decide whether he should work in a restaurant or in laundry. He decided that when you work in a restaurant, you're away too many hours. 'If I work in a laundry,' he said, 'I can see my children and ask them: What did you learn in school today? Show me what you learned today.' He told me he'd gone to work in a laundry, and he said: 'I got a doctor, I got a lawyer.' " No one can be more deserving of tribute—of honor—than parents like this one.

Another story which makes much the same point concerns an Asian-American community residing in Riverdale, New York. School teachers and principles in Riverdale were surprised to discover that each Asian-American family was buying two sets of textbooks. After doing a little investigating, they found that one set was for the child and the second set was for the mother, who could better coach her child if she worked during the day to keep up with his lessons. These teachers said that children entering school in the fall with no English ability finished in the spring at the top of their classes in every subject.

Asian-American parents do not make these sacrifices simply so their children will do well materially. They do so out of a deep respect for learning. I am told that in Vietnam—when Vietnam was a free nation—it was the case that teachers were revered by both parents and children. They rank, I believe, just below kings, and above fathers, in the Confucian ethical system. When Vietnamese are asked to describe their culture, "love of learning" is a characteristic frequently mentioned.

For most Vietnamese, this emphasis on learning has been maintained in the United States. A 1983 study by the Centern for Applied Linguistics in Washington, D.C., noted that:

"The Vietnamese students' respect for teachers is a very noticeable characteristic in a typical American school, as it promotes behavior which is in contrast to that of some American students. The Vietnamese students, in general, are well-behaved, quiet and polite in the classroom, and some of our interviewees reported being horrified at some of the behaviors of their fellow classmates, such as talking back to teachers, telling a teacher to "shut up," talking in class, and putting their feet on a desk."

Yet another Asian-American value which has a great deal to do with educational success is self-discipline, a willingness to do things the hard way, if that's what's required. A recent study prepared by Dr. Samuel Peng, of the Department of Education, demonstrated that Asian American high school students spent considerably more time on homework than any other students. Dr. Peng's study also demonstrated that Asian-American students were less likely than other students to be absent from school and had higher educational aspirations than other students.

Of course, the virtues which characterize the Asian-American community, and account for its success—hard work, self-discipline, perseverance, industry, respect for family, for learning and for country—are not confined to Asian-Americans alone. They are in fact traditional American virtues. These are values familiar to readers of Benjamin Franklin's Autobiography, or to generations of American school children who learned from McGuffey's Reader. They are the virtues preached down through the ages by the greatest Americans. Listen to the distinguished black American, Frederick Douglass, one hundred and thirty years ago: "What we want is character. . . . It is a thing we must get for ourselves. We must labor for it. It is gained by toil—hard toil. . . . It is attainable; but we must attain it, and attain it each for himself. I cannot for you, and you cannot for me." Today, Asian-Americans are reminding all of us of these fundamental truths.

So far, I have focused on the strengths of the Asian American community. They are considerable, and remarkable. Let me now turn to some of the obstacles facing Asian-Americans in their attempt to succeed in American society.

Many of the problems Asian-Americans—and especially Southeast Asian refugees—face in the country have to do with the strain of social and psychological adjustment to a foreign culture, a foreign language and a foreign way of life. According to a 1980 study, for example, even after 5 years, 81 percent of Southeast Asian refugees still had serious concerns about being separated from missing family members; 67 percent had painful memories of the war and their departure from home; 59 percent were homesick; and 58 percent were worried about difficulties in communicating with those in the home country. That such concerns for loved ones left behind can affect a child's school performance is obvious. Thus, a teacher recently recounted a conversation she had with a Vietnamese girl in the third grade. The teacher wanted the girl to look at her while speaking, so she gently touched the girl's chin and raised her face. At that point, the child suddenly burst into tears. When the teacher asked the girl what she had done wrong, the child responded, "Nothing, your hand just felt like my mother's hand used to feel, and she's still in Vietnam:"

There is little the government—or anyone—can do to relieve this sort of anguish. We can express our deepest sympathy, and our faith in the strong character of our newest immigrants. We recognize this loss, this pain. We grieve with their suffering. But there is another obstacle facing Asian-Americans, and other Americans too, that we can do something about. That is the need to attain English language skills.

We believe that the proposals recently advanced by this Administration to reform bilingual education will help in this regard. Under the current system, local school districts in dealing with the federal government often have little flexibility in responding to the particular needs of students whose home language is not English. If local school districts want to receive Federal assistance, they are virtually compelled to follow a particular method of instruction. The reforms which we are currently exploring with Congress will allow local school districts to choose the sort of program, or to design the combination of programs, best suited to the task of teaching their non-English speaking children English. For school districts serving recent Asian immigrants who speak a wide variety of languages, giving local school districts greater flexibililty in designing their programs should enable Asian-American students to get more and better English language instruction. We are not retreating in our commitment to non-English speaking students. Rather we are acting to fulfill that commitment by giving local school authorities and parents the opportunity to do what works best for their children.

A final educational issue of concern to Asian-Americans is the issue of discrimination. For several years now, Asian student associations at Ivy League universities have cited admissions figures showing that a smaller percentage of Asian-American students than other applicants are being accepted. These figures might indicate that unofficial quotas are in effect in some universities limiting the number of Asian-American students. But the evidence is less

than conclusive, and it is possible that factors other than anti-Asian discrimination are at work here. If, however, concrete evidence of quotas and anti-Asian discrimination does come to light, we will take the appropriate action to remedy the situation. Discrimination against Asian-Americans is as unacceptable as all other forms of racial or religious discrimination.

Let me conclude by referring once again to the Caplan study on the scholastic achievement of Southeast Asian refugee children. "The main reason for the success of these children," Professor Caplan writes, "appears to be due to the compatibility of what they bring with them—traditional cultural values, cohesive family structure, achievement orientation . . .—with the requirements for success in the United States. This may account for the rather rapid achievement of economic self-sufficiency by the parents, as well as the scholastic success of their children." These qualities—traditional values, strong families, an orientation toward achievement—are by no means exclusively Southeast Asian. They are in fact traditional American qualities. More important, they are universal qualities—universal prerequisites to the success of individuals and the well-being of a free society.

Our newest immigrants remind us of one additional point, as well the tremendous burst of creative energy that is released when former victims of tyranny and oppression are presented with the very special opportunity which American society offers. For our free country offers the opportunity, as Lincoln put it, of "an open field and a fair chance" for every American's "industry, enterprise and intelligence." Our country promises that we "may all have equal privileges in the race of life, with all its desirable human aspirations." Many Americans take this promise for granted. But perhaps because so many Asian-Americans have personal experience of the massive apparatus of repression, they may have a greater appreciation of the gift of freedom. And perhaps because of what they endured to become citizens of this nation, they bring with them a determination to make the best use of the opportunities America offers. Thus they struggle and sacrifice and work hard in order, as Mrs. Dozier put it, "to make something of themselves" and "repay a debt."

In doing this, Asian-Americans in fact put the rest of us in their debt. For they remind us of both the opportunities and the responsibilities of American citizenship. And they remind us—as Lincoln said—that a nation like ours "is worth fighting for, to secure such an inestimable jewel."

A TRIBUTE TO EVANGELINE GOULETAS-CAREY

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. RANGEL. Mr. Speaker, I rise to pay tribute to Evangeline Gouletas-Carey, a truly giving and compassionate woman.

Mrs. Gouletas-Carey, a former first lady of the State of New York, has devoted her life to community improvement and philanthropic generosity. Her causes have included school lunch programs, elderly meal programs, nutrition education, and the effects of inadequate nutrition on children and pregnant women. She has been a successful businesswoman, a teacher, a lecturer, and a supporter of cultural and religious organizations.

Mr. Speaker, I would like to submit the following speech made by Mrs. Gouletas-Carey when she was presented the Eleanor Roosevelt Humanitarian Award of the Year by the Career and Professional Women's Division of the State of Israel Bonds.

ACCEPTANCE SPEECH BY EVANGELINE GOULETAS-CAREY OF THE ELEANOR ROOSEVELT HUMANITARIAN AWARD OF THE YEAR PRESENTED BY THE CAREER & PROFESSIONAL WOMEN'S DIVISION OF THE STATE OF ISRAEL BONDS—FEBRUARY 6, 1983

Thank you, Ms. Winikow, district chairwomen, committee members, guests and friends. I am very honored by your presence here this morning and to have been asked to join you.

The high award given to me on this occasion symbolizes service to a cause which awakens the memory of our national development. In Israel's progress we see mirrored our own. In Israel's struggle to make her land productive, to defend the freedoms of her people, and to lead toward frontiers of knowledge, we identify our pioneer hardships, the judicious safeguards in our constitutions, and our sojourns to the forefront of science and technology. We can appreciate this in an age where but one in five human beings lives in freedom, and 45% of the world's population lives under tyranny.

I have always been particularly impressed with the intensity and dedication of the Israeli people— their determination to make their country a success. This is one reason my brother Nick and I have endowed a park near Nazareth that will be open to all people, regardless of their ethnic origin, to be known as the Evangeline Gouletas-Carey and Nicholas S. Gouletas Recreational Park.

Evidence of the technological achievements and their practical application in business and industry is everywhere apparent in Israel, and this includes the latest achievement—a miracle in itself—the mediterranean—to—dead sea—canal. This blend of resolve and pragmatism has overcome countless obstacles. Thus, for example, agricultural production has risen more than 15 fold, lifting the country which faced severe austerity in its early statehood to a nation now producing more than four-fifths of its own food requirements.

To make the desert bloom, more than 800 square miles were brought under irrigation. Record milk production has been achieved through the scientific feeding of livestock, and the application of science to farm output has made Israel's orchards among the most productive on Earth. Overall agricultural yields continue to increase at least 5% per year.

Israel bonds have helped finance every key aspect of this economic development. Bonds have enabled large-scale expansion of the country's communication and transportation networks. Bonds have financed ambitious projects to augment the production of phosphates, copper and oil, as well as to create and expand seaports and other facilities. Since Israel imports goods and services worth $2 billion from the United States—more than it imports from any other country, many of these bond dollars return to the United States.

It is significant that, even under adversity, Israel had found unswerving financial support through Israel bonds. But, just as with the economic development in the United States, financial support did not come without effort. We also recall that we, as a new nation, had our indispensable friends (the dutch and the french) who helped our cause, and enabled us to become a strong and mature nation, to stand as a world symbol of democrary with the vast human potential such freedom unshackles. Now, this effort on behalf of another free nation is our continual commitment.

We know that staunch faith and optimism that have characterized our common histories have often made possible that which was considered impossible. Indeed, sholom Aleichem, who was the source and inspiration for the musical, "fiddler on the Roof", captured this philosophy of greatness when he wrote, "the word possible has the following comparative forms: possible, more possible, and 'what do you mean, impossible?"

And so, it is with this profound respect for the courage and conviction of a people in its steadfast struggle to maintain freedom that I am honored this morning to accept the Eleanor Roosevelt Humanitarian Award.

Thank you—and shalom.

MONSIGNOR BYRNE MARKS 40TH ANNIVERSARY

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. GREEN. Mr. Speaker, I rise to pay tribute to Msgr. Harry J. Byrne, a loyal friend and constituent of mine, who marked the 40th anniversary of his priestly ordination on Sunday, December 1. The ceremony was held at Epiphany Church, located at 22d Street and Second Avenue, of which he is the pastor.

Formerly chancellor of the New York Archdiocese, he served as pastor for 12 years at St. Joseph's Church of Yorkville on the Upper East Side. His many community positions include that of vice president of the Ronald McDonald House, a hostel for children cancer patients and their parents, and board memberships for Doctor's Hospital, the Asphalt Green, and the Burden Center for the Aging. By appointment of Mayor Koch he served from 1978–81 on the New York Rent Guideline Board. Presently he is chairman of the Interfaith Community Religious Leaders organization for East Midtown Manhattan.

Mr. Speaker, I ask that my colleagues join me in congratulating Monsignor Byrne of the 40th anniversary of his priestly ordination and in thanking him for his many years of dedicated and unselfish service to his community.

MOTE MARINE LABORATORY CELEBRATES 30 YEARS OF SERVICE

HON. CONNIE MACK

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. MACK. Mr. Speaker, this past week the Mote Marine Laboratory of Sarasota, FL, in my congressional district, celebrated its 30th anniversary. From its founding as the Cape Haze Marine Laboratory in 1955, this independent, not-for-profit facility has grown to become the preeminent marine science laboratory in Florida and a respected world leader in the fascinating field of marine science. The goals of Mote Marine Laboratory are centered on providing opportunities for basic research, environmental assessment services, and public education.

Its research projects span a wide range of scientific endeavor—from traditional studies in marine biology to technologically complex studies contributing to the development of understanding in fields such as neurobiology and biomedical and behavioral studies. Mote scientists are investigating questions that have direct human implications, such as why sharks resist cancer, and how toxic substances affect marine environments.

The laboratory's work in environmental assessment has contributed to man's understanding of our natural environment and our ability to live in concert with it. Studies in coastal and estuarian ecology, water quality, and fishery management provide vital information for decisionmakers on the local, State, National, and international levels. The work of Mote Marine is dedicated to the preservation, conservation, and enhancement of our natural resources.

Hand in hand with research and assessment work is Mote Marine's commitment to education. The marine science center is the centerpiece of this public education effort, with its living and artifact exhibits, and lecture series. The laboratory supports the educational efforts of students at all levels with programs that include collegiate internships, high school learning camps, and liaison with the public grade schools.

All of this is made possible through the efforts of many distinguished scientists that have worked with Mote Marine through the years. One of the most notable is Dr. Eugenie Clark, under whose direction the lab was established in 1955. Dr. Perry Gilbert became director in 1967, the same year in which the institution was renamed in honor of its principal benefactors, William R. Mote and his sister, Elizabeth Mote Rose.

Mr. Mote continues a high level of day-to-day involvement as chairman of the board of the Mote Marine Foundation, which oversees fund raising activity and operation of the lab.

Mote Marine Laboratory, under the current direction of Dr. Robert F. Dunn, with the assistance of Dr. Richard H. Pierce, director of the marine sciences division, and Dr. Kumar Mahadevan, director of the environmental assessment division, is poised to enter its next 30-year phase with a continuing commitment to scientific excellence and integrity, an enthusiasm for contributing to the body of knowledge, and the hope of enhancing the quality of life for ourselves and future generations. Mr. Speaker, I take this opportunity to commend Mote Marine Laboratory for its contributions of the past and to extend my best wishes for the future.

POLITICAL SOLICITATION BAN

HON. TRENT LOTT

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. LOTT. Mr. Speaker, today, I am introducing a new House rule to prohibit the solicitation of campaign contributions in the House of Representatives.

Ninety-three years ago President Chester A. Arthur called on Congress to outlaw the solicitation of Federal workers by Members of Congress and other Federal officials. In his message of December 4, 1882, the President wrote:

It goes without saying that such contributions are not voluntary, and in my judgment they should be prohibited by law.

The following year, Congress responded with the Pendleton Act which barred such solicitations of Federal employees and in Federal buildings.

Mr. Speaker, that Federal ban is still in the law today. However, our Ethics Committee recently ruled that it only applies to "coercive" solicitations—a standard used by the Justice Department as a threshold for prosecution.

Mr. Speaker, I think this House should have a higher standard of conduct and a lower threshold of tolerance for such activities between Members and employees. If we don't bar the House door now to political solicitors, we'll soon find ourselves back in that murky era of a century past when one man's voluntary solicitation was another man's political shakedown. Congress was the ultimate loser then and could be again unless we adopt the rule I am proposing. I urge my colleagues on both sides of the aisle to support this worthwhile endeavor.

TRIBUTE TO TOM WINEBRENNER

HON. JAMES H. (JIMMY) QUILLEN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. QUILLEN. Mr. Speaker, my friend Tom Winebrenner is leaving his position on the House Republican floor staff for a new career. I want to wish Tom great success in his new endeavors, but I did not want his leaving us here to occur without saying a few words about this fine man who has done such an outstanding job for all of us over so many years of dedicated service.

Tom Winebrenner was here serving on the floor staff before I was sworn in as a freshman Member of Congress in 1963. From the beginning and over all the years since I first came to know Tom he has always and without exception proved himself my friend and an excellent staff assistant.

I don't know how he managed it over the years, but Tom was always there with accurate answers to difficult questions regarding the ebb and flow of legislative activity on the House floor. Somehow, he always seemed to know what was going on, what was coming next, and its content. So I just want to say, Tom, that our loss is your new employer's gain, because your new firm has got itself a first-class employee and fine fellow in the bargain.

JAPANESE-AMERICANS INTERNED DURING WORLD WAR II

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. PANETTA. Mr. Speaker, I am pleased to rise today to bring to the attention of this distinguished body a report prepared by the Redress Committee of the Salinas Valley Chapter of the Japanese-American Citizens League. This report provides justification for providing financial redress to those Americans of Japanese descent who were interned during World War II.

My colleagues know that this is a controversial issue that has sought solution for over 40 years. Although all Americans of Japanese ancestry on the west coast were interned during World War II, fully 75 percent of these internees were American-born. They were held in violation of seven articles of the U.S. Constitution without charge, trial, or evidence of disloyalty or espionage. Some were held until October 1946. Not only were the internees subject to emotional trauma, they suffered enormous financial and material damages, as well as the disruption of many years of professional and educational experience. It has been estimated by the Congressional Commission on Wartime Relocation and Internment of Civilians [CWRIC] that these financial losses would be the equivalent of as much as $2 billion in 1983 dollars.

Mr. Speaker, Congress is presently considering H.R. 442, the Civil Rights Act of 1985, which would formally accept the findings of the CWRIC and recognize that a grave injustice was done to both citizens and resident aliens of Japanese ancestry by the evacuation, relocation, and internment of civilians during World War II. This legislation would involve legal pardons and financial restitution to those who suffered during the intern period.

Recently, I was contacted by the Redress Committee of the Salinas Valley Chapter of the Japanese American Citizens League.

The group had prepared an information sheet analyzing this issue and I would like to take this opportunity to summarize this report for the CONGRESSIONAL RECORD.

On February 10, 1942, 10 weeks after America's entrance in the war, President Franklin D. Roosvelt signed Executive Order 9066 giving the Secretary of War and regional military commanders the power to exclude any and all persons from designated areas for security reasons. In the end, more than 120,000 persons of Japanese ancestry—two-thirds of whom were American citizens—were uprooted from along the coasts of California, Oregon, and Washington and interned in remote relocation centers.

The internment violated seven articles of the U.S. Constitution including article I which guarantees freedom of assembly, article IV which guarantees freedom from unreasonable search and seizure, and article VI which provides for the right to a speedy, public trial.

Families that are interned could take only what they could carry. Internees were housed in tar-paper barracks, with one family or more per barrack. Privacy was practically impossible and doctors were in short supply. Schools were conducted with inadequate facilites and with books only when they were available.

Those who experienced the camps carried the stigma with them as a result of the defamation of character, emotional and pschyological trauma, and loss of livelihood and income. The Japanese America internees suffered enormous damages and losses, both material and intangible. To the diastrous loss of farms, businesses and homes, must surely be added the disruption of many years of career and professional lives, as well as long-term loss of income, earnings and opportunty, and their lifetime savings and assets.

An analysis by the Congressional Commission on Wartime Relocation and Internment of Civilians [CWRIC] of the economic losses suffered as a consequence of the exclusion and detention estimated that in 1945 dollars, the internees lost between $106 and $164 million in income and between $41 and $208 million in property for which no compensation was made after the war. After adjusting for inflation, these figures amount to up to $2 billion.

In 1981, the CWRIC called 750 witnesses to appear before hearings on this issue. As a result of these hearings, the CWRIC recommended that Congress pass a joint resolution recognizing the injustices done to internees and offering a formal apology. In addition, the Commission recommended that financial redress be provided to internees or the survivors and that a fund be established for educational and humanitarian purposes.

The Redress Committee of the Salinas Valley Chapter of the Japanese American Citizens League supports H.R. 442, which would adopt the recommendations of the CWRIC. The redress committee believes that it is important for the United States to recognize that an injustice was done and provide compensation for this injustice so that a similar policy will never again be allowed. When the rights of the few are in jeopardy, after all, the rights of the many are also in danger.

DISTRESSED COMMUNITIES WILL NEED HELP

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. GAYDOS. Mr. Speaker, I represent an area of western Pennsylvania once known as part of the "Steel Center" of the United States.

Today, it is part of what now is known as the "Rust Bowl" of America.

There are 72 communities in the 20th Congressional District and a number of them face, or will face, municipal bankruptcy. The serious erosion of general tax revenue, brought about by the economic recession and worsened by the decline of the region's steelmaking facilties, has reached the point where communities can no longer meet ordinary operating expenses.

In communities such as Clairton, McKeesport, Duquesne, Braddock, Homestead, West Homestead, and others, the recession is not only alive and well, it is prospering.

Unemployment, true unemployment, is running two and three times above the national norm in these areas. Thousands of people have no jobs, no prospect of finding one, and no income. They long since have given up the niceties of life for the necessities of living.

Their despair spreads like cancer. When unemployed steelworkers quit buying, it isn't long before local merchants feel the pinch. Auto dealers, shoe stores, barbers, tavern owners, and so forth, start seeing their own incomes shrink. They begin cutting expenses, including laying off extra personnel.

That's the way it is in areas bypassed by the economic recovery. And now, the cancer has reached the vitals of the community itself. The closing of mills, followed by the closing of shops, has sustained a high rate of unemployment. In turn, that has eroded local tax revenues, leaving municipal officials with two alternatives: Raise taxes, a futile gesture in stricken municipalities, or cut public services.

They were literally forced to take the latter option. Municipal employees, including police and firemen, have been laid off because the community ran out of money. They could not pay salaries. In many instances, employees work voluntarily, performing their jobs until the Treasury is replenished by whatever tax funds can be collected.

Officials find their priorities have changed. No longer do they strive to improve their community. Today, they strive merely to survive as a community.

It is tragically ironic then, that at the very time when such communities need help, it is being denied them by the Federal Government because it, too, is being forced to put its own financial house in order.

Because of the country's soaring national deficit, marching orders have gone out to cut Federal spending. Virtually every agency, every program, every project has been given the word. Among the programs slated for deep cuts and even elimination are some that have provided direct assistance to distressed communities—general revenue sharing [GRS], community development block grants [CDBG's] and urban development action grants [UDAG's].

Last month, Mr. Speaker, I wrote the Office of Management and Budget, requesting information on any current or future plans that address this problem of municipal bankruptcy. I asked OMB if there were any existing contingency or discretionary funds that could be used to assist financially drained communities. The response was disappointing to me and, I fear, disastrous for many cities and towns across the country.

I am inserting my letter to OMB and its reponse into the RECORD for the attention of my colleagues. I urge them to consider the situation for I believe they will be hearing more about it. What is happening in western Pennsylvania today could occur elsewhere tomorrow.

The letters follow:

HOUSE OF REPRESENTATIVES,
Washington, DC, October 28, 1985.

Hon. JAMES C. MILLER III,
Executive Office of the President, Office of Management and Budget, Washington, DC.

DEAR MR. MILLER: A situation has developed in Western Pennsylvania whereby several communities stand on the verge of municipal bankruptcy because of the severe decline of the steel industry in their area.

Huge losses of local tax revenue have pushed these municipalities to the point where they are unable to meet general operating expenses, despite deep retrenchment in local expenditures and services.

A case in point is the City of Clairton. Once a thriving community of 25,000, its population has shrunk to 12,000 and its tax base has shriveled as a result of the curtailment of steel production there.

Unable to pay its bills from general revenue, the City of Clairton has taken drastic measures. Its 14-member police force and 10-member fire department have been laid off. Police protection now is furnished by the Pennsylvania State Police; fire protection is being handled by city firemen on a voluntary basis while counting on assistance from neighboring communities in the event of an emergency. Other city employees also are working voluntarily while their next paycheck remains in limbo.

The city is unable to secure loans from private sources and its legal taxing powers are at the maximum. Were it in a position to raise taxes, the only source would be property owners and such a step would create a tidal wave of personal bankruptcies in view of the continued rate of high unemployment in Clairton.

Inquiries for emergency aid to alleviate Clairton's immediate fiscal needs have been made to the federal Department of Housing and Urban Development, as well as the Economic Development Administration. The likelihood of such assistance, however, ap-

pears bleak at best under current regulations.

A similar situation exists in the Borough of Braddock, Pennsylvania, where officials have been unable to pay most of the community's bills since July and where 66 employees face payless paydays for the rest of this year.

Comparable problems are encountered by the City of McKeesport and the Boroughs of West Homestead and Homestead.

The dilemma confronting these municipalities assumes a "Catch 22" appearance when it is realized that existing programs which might have helped them stay afloat—Revenue Sharing, Community Development Block Grants, Urban Development Action Grants, etc.—have been severely curtailed with deeper cuts contemplated in the future.

In view of this worsening financial crisis, I ask your assistance in informing me of any other current or future plans for addressing this problem and whether there is any latitude which might be granted in the use of existing contingency or discretionary funds.

Sincerely yours,

JOSEPH M. GAYDOS,
Member of Congress.

EXECUTIVE OFFICE OF THE PRESIDENT,
OFFICE OF MANAGEMENT AND BUDGET,
Washington, DC, November 19, 1985.

Hon. JOSEPH M. GAYDOS,
U.S. House of Representatives,
Washington, DC.

DEAR CONGRESSMAN GAYDOS: Thank you for your letter describing the fiscal condition of Clairton and other communities in western Pennsylvania.

I share your concern for communities that are suffering from the negative effects of economic change. In part, areas such as western Pennsylvania suffer from America's current trade imbalance. Recent administration actions taken in coordination with our trading partners are designed to ease that imbalance.

The administration believes that the best way to assist communities is to ensure continued economic growth nationwide. One of the keys to continued growth is bringing down the overly large Federal deficit. To do this, we must curtail Government expenditures, including spending on programs to which you referred in your letter—General Revenue Sharing, Community Development Block Grants and Urban Development Action Grants—programs which simply shift resources from one set of taxpayers to another set of taxpayers.

Despite these deficits, our country is enjoying a robust expansion. It is unfortunate that the present recovery has not significantly improved the condition of some of the communities in your district. While it might be desirable for the Federal Government to assist troubled communities during difficult periods, the current budget deficit is so large that it simply precludes any additional Federal Government activity.

Although the Federal Government cannot pursue more programs than it is now undertaking, current programs are providing significant assistance. In 1985, the Community Development Block Grants (CDBG) program allocated almost $45 million to Pennsylvania to distribute to small cities and rural areas such as the ones you describe. HUD also allocated about $1.5 million of CDBG funds to McKeesport to support community development activities. Furthermore, since 1982, the Urban Development Action Grants program has accepted more than 100 applications for funding for projects throughout Pennsylvania, including a project in McKeesport and many in and around Pittsburgh. The CDBG and UDAG programs, of course, are only two Federal programs among many that provide funds which might be used to ameliorate the current situation.

Additionally, the Commonwealth of Pennsylvania may be able to supply some State funds to your area. In general, States are now more fiscally sound than the Federal Government. Since Pennsylvania has run a general fund budget surplus in fiscal years 1984 and 1985, it may be able to assist troubled areas in the Commonwealth. This approach has the advantage of retaining State responsibility and control, which is consistent with the Federalism principles that President Reagan strongly supports.

Thank you again for bringing your concerns to my attention. I hope this response is helpful.

Sincerely yours,

JAMES C. MILLER III,
Director.

DUMPED PENSIONS SPUR CRISIS

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Ms. KAPTUR. Mr. Speaker, I would like to bring to the attention of my colleagues an article that appeared in the New York Times last month. It provides a very clear and disturbing picture of the deficit facing the Pension Benefit Guaranty Corporation. The PBGC was established in 1974 to protect pensions of retirees whose former employers are experiencing financial difficulties. Unfortunately, over 1,000 companies with underfunded pension plans have "dumped" their liabilities on the PBGC creating the potential for bankruptcy of the Corporation. Although a provision to increase employer premiums paid to the PBGC was included in the House Budget Reconciliation Act, it is unclear if a conference agreement can be reached. I recommend this article to my colleagues.

The article follows:

[From the New York Times, Nov. 8, 1985]

DUMPED PENSIONS SPUR CRISIS

(By Steven Greenhouse)

WASHINGTON.—When Congress set up the Pension Benefit Guaranty Corporation in 1974, the aim was to protect the retirement income of workers at companies in trouble. But recently, after the Wheeling-Pittsburgh Steel Corporation terminated its pension plan, it seemed to some people that it was the companies that are being protected.

"The Pension Benefit Guaranty Corporation is now being prostituted to help companies avoid going out of business," said William H. Knoell, chief executive officer of the Cyclops Corporation, a Pittsburgh-based steelmaker.

He believes that the agency was "put together to be a provider of last resort to pensioners whose companies have gone out of business." And he complained that "in the particular case of our competitors at Wheeling-Pitt, it will give them a competitive advantage."

Mr. Knoell is one of the most outspoken corporate officials calling on Congress to make it harder for companies to dump their underfunded pension plans on the Pension Benefit Guaranty Corporation. And legislators are finally responding to such appeals to toughen up the law.

More than 1,000 companies have dumped their unfunded pension liabilities on the agency since it was founded. Pension agency officials worry that the assumption of all these obligations could cause the agency, within the next few years, to run out of money to pay for all the pensions.

DEFICIT CRISIS

Wheeling-Pittsburgh's move, in particular, has greatly heightened the pension agency's deficit crisis. The troubled steelmaker's pension plan was underfunded by $475 million. (Such underfunding occurs when the contributions that a company has made into a plan are insufficient to cover the pension obligations made to the plan's participants.)

Speaking about Wheeling-Pittsburgh's plan termination, Kathleen P. Utgoff, the pension corporation's executive director since July, said, "It's enormous; it nearly doubled our deficit." Her agency insures the pensions of 38 million Americans, and in the past has stepped in to protect workers at Braniff, Rath Packing, Allis-Chalmers and White Motor.

The agency's deficit now stands at an estimated $1.2 billion for single-employer pension plans. Agency officials say that the deficit means that investment income and insurance premiums paid by employers will not be enough in coming years to pay the agency's steadily growing obligations. A single-employer plan is one where a company sets up a plan for its own workers only, unlike a multi-employer plan, where serveral companies make contributions into a joint plan.

To help end the agency's deficit crisis, committees in the House and Senate have passed bills that would more than triple the annual pension insurance premium that companies in single-employer pension plans must pay per worker. These premiums, which help finance the pension agency, would jump to $8 or more per worker, from the current level of $2.60. In addition, the bills would, as Mr. Knoell wishes, make it harder for companies to unload their pension plans upon the agency.

ALMOST ANY REASON

Under current law, companies can terminate pension plans for almost any reason, and the Pension Benefit Corporation is required to assume responsibility for them. But under the House Labor Committee bill, for instance, a company could unload its pension plan on the agency only if the company were in financial distress, such as bankruptcy.

According to Mrs. Utgoff, the agency has handled more than 50,000 terminations, most of which were adequately funded, or even overfunded. The agency does not serve as trustee of these plans, but instead distributes the assets of these plans by providing annuities to the plan participants. If a terminated plan is overfunded—that is, if the plan's coffers have more than is needed to pay the pension obligations—the excess goes back to the company.

For the 1,000 underfunded plans that were terminated, which cover 150,000 workers the agency has become trustee. When an underfunded plan is turned over to the agency, it uses its trust fund, plus the pre-

miums it receives, to pay out the pension obligations that it has assumed.

I.R.S. WAIVERS

Nowadays, troubled companies often fail to fully fund their pension plans. Such companies sometimes ask the Internal Revenue Service for a waiver that frees them from the obligation of making their annual minimum contributions to their pension plans. Seeking to help these troubled companies, the I.R.S. often grants the waiver requests. In the past, pension agency officials have criticized the I.R.S. for being too willing to grant such waivers.

Wheeling-Pittsburgh received such a waiver, and that was one of the reasons that its plan was so underfunded. Pension agency officials hope that the new legislation allows the agency to become a secured creditor to companies that receive waivers, to insure that they ultimately pay any contributions that are waived.

Mrs. Utgoff, a 37-year-old former economist with the Council of Economic Advisers, said many companies terminate their plans after underfunding soars. The reason is that the Employee Retirement Income Security Act of 1974, which set up the agency, allows it to claim 30 percent of the net worth of the terminating company. But for troubled companies, that 30 percent often represents far less money than the amount of the underfunding. Besides, the company often does not have the money to pay the agency 30 percent of its net worth.

"A TREMENDOUS LOOPHOLE"

"It wasn't clear," Mrs. Utgoff said, "that Congress recognized what a tremendous loophole this would be."

Under bills passed by committees in the House and Senate, the pension agency would gain the right to take 10 percent of the terminating company's pretax profits for up to 10 years, should the company survive. This would help repay the agency for the underfunding it has to cover and, at the same time, would make companies more reluctant to dump their pension plans on the agency.

The House Labor Committee's bill also aims to stop strong companies from transferring underfunded pension liabilities to weak companies that fail, thus forcing the agency to cover the underfunding. Agency officials say this was what happened when the International Harvester Company sold its Wisconsin Steel subsidiary to a small company with meager capitalization, a company that subsequently failed. The result was that the Pension Benefit Guaranty Corporation absorbed $63.3 million in liabilities in 1980 from Wisconsin Steel's underfunded plan.

Many corporate officials support the idea of increasing premiums that businesses with single-employer plans would have to pay to the Pension Benefit Guaranty Corporation.

"We don't take issue with the need for a premium increase," said Stuart J. Brahs, executive director of the Association of Private Pension and Welfare Plans, a Washington-based group that represents plan sponsors and providers. "We're just not convinced that the dollar figure arrived at by the P.B.G.C. or by the Congressional committees is appropriate."

The House Education and Labor Committee has voted for an increase to $8.50 per worker, and the Senate Labor Committee has approved an increase to $8.10. In addition, the House Ways and Means Committee has voted an increase to $8, with the rise ending after three years.

Phyllis Borzi, a pension counsel for the House Labor Committee, said, "An $8 premium, with a three-year sunset provision is clearly inadequate to deal with the financial difficulties of the P.B.G.C."

RECONCILIATION BILLS

The different bills are part of budget reconciliation bills in the House and Senate. When the conference committee arrives at a compromise bill, pension experts say, it will likely keep provisions that raise premiums and make it harder to unload underfunded pension plans.

Pension agency officials say that if premiums are increased to $8.50, the agency will be able to eliminate its deficit within 30 to 40 years, so long as there are not many more extraordinarily large underfunded terminations such as Wheeling-Pittsburgh's.

Victoria Caldeira, associate director of employee benefits for the National Association of Manufacturers, said her association supports a temporary increase, but wants it linked to a study of a risk-related premium.

PRIME MINISTER GANDHI'S PLANS FOR INDIA

HON. BOB McEWEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. McEWEN. Mr. Speaker, recently the publisher of the Cleveland Plain Dealer, Thomas Vail, had the opportunity to meet with Prime Minister Rajiv Gandhi of India and discuss with him at length the future of the "world's largest democracy."

I found the interview insightful and revealing. Mr. Vail paints a portrait of our friend that few Americans have had the chance to see. Mr. Vail's personal remarks regarding the Indian Prime Minister are honest. He says, "The prime minister * * * is straightforward, candid, practical, and nonideological—neither liberal nor conservative—with no apparent hidden agenda nor any hangups about colonialism. He seems neither an intellectual nor a philosopher. I liked Rajiv Gandhi. When you stop to think of it, so do most of the people who have met him."

The interview not only speaks well of Rajiv Gandhi, but also of Thomas Vail. Mr. Vail has distinguished himself as a successful publisher, as well as a concerned and active citizen. This is a noble feat in the fast-paced, competitive, and sometimes merciless world of the media. America needs more citizens like Thomas Vail.

I commend the interview and Mr. Vail's accompanying remarks to the attention of my colleagues in the House.

[From the Plain Dealer, Nov. 10, 1985]

RAJIV GANDHI TELLS PD'S VAIL OF PLANS FOR INDIA

(Thomas Vail, publisher and editor of The Plain Dealer, interviewed Prime Minister Rajiv Gandhi of India last Tuesday in Delhi. The interview took place almost one year to the day after Gandhi became prime minister, succeeding his mother, Indira Gandhi, who was assassinated by Sikh extremists.

(Since taking office as leader of the world's largest democracy, the 41-year-old Gandhi has met with many world leaders, including President Reagan and Mikhail S. Gorbachev, the Soviet leader. He represents a new era of youthful leadership for India, and is emerging as one of the most important figures in the Third World.

(Vail asked the prime minister about his plans for India, his observations about other world figures and many other issues. Among the significant points: Gandhi, from his talks with Reagan and Gorbachev, feels they can come together on some important agreements. Gandhi also lists his domestic priorities as electric power generation, transportation and communications. This is an edited transcript of the Vail-Gandhi interview.)

VAIL: Prime Minister, when your time as leader is over, what would you like to have accomplished for your country?

GANDHI: Well, I would like to feel I have alleviated the frictions in the country, that perhaps most of all I would like to bring human development or spiritual development on par with technological development. I find the gap between the two is increasing very rapidly. Perhaps the educational system, perhaps the technology itself is holding people, sucking them into this direction. But I feel that this difference between the development of the human being as a human being and the development of technology as a sort of hard product—the gap is becoming too much.

VAIL: You have mentioned in almost all your speeches as problems to solve: poverty, population, industrial development and . . .

GANDHI: Education.

VAIL: Yes. So I take it you expect to achieve the aim of human development and unity through education.

GANDHI: With more than—yes—through education but in a wider perspective, not just school and college. That is why we have made a new Ministry in Human Resources Development, which for the first time puts a lot of things together with education, not under education. We have not put them under education, but we have put them with education under one head.

VAIL: Very good. Now, you have carved out a unique place for yourself in your nonalignment. You are not with one side or the other. You have had unique access to all sides. Do you find as you go around—take Russia and the United States as an example—as you seem to be trusted by both sides, does it seem to you that Russia and the United States are going to come together in some way, to make an accommodation of sorts?

GANDHI: In Geneva?

VAIL: All right, in Geneva. That's a good start.

GANDHI: Well, in Geneva it could only be a start. I hope that there will be a start. I did get the feeling in the U.S. and in Moscow that both countries do want peace.

VAIL: That's very significant.

GANDHI: But both have got their own, what should I say, from our point of view perhaps "hang-ups" would be the best word. But I don't think either of them has a different ultimate end. I am not talking of the competition between the two different societies, which will be there. I am talking on the disarmament and the nuclear weapon angle.

VAIL: Did you find President Reagan easy to deal with? How did he strike you as a person?

GANDHI: I found President Reagan easy to talk with. Straightforward, and I like to talk straight also.

VAIL: I was saying to somebody earlier that having talked to you earlier and read what you have said, that you and President Reagan are similar, that you are both candid and that there is nothing else to it. You mean what you say. Is that right?

GANDHI: Yes. I try not to hide what I mean.

VAIL: What about Mr. Gorbachev?

GANDHI: I find him very similar.

VAIL: So you have a rapport among these personalities. When you deal with the poverty of India, which you mentioned in many of your speeches, how do you expect to approach that? That is a big question, and you mentioned population growth, which is about 2% annually. You don't feel these are insurmountable problems?

GANDHI: It's a tough situation. It's not insurmountable. We've already done a lot about it. If you look at India 40 years ago and you look at India today, there's a tremendous difference. Some people believe that the rich have gotten richer and the poor have gotten poorer. I don't think so. A handful of people have gotten very rich. But what we have developed is a very large number of people who are not very rich, middle class or upper middle class. It's all brand new after independence. As an indicator of their economic power and strength we loosened up on certain rules and regulations on certain taxes, and certain incentives in holding private investment in shares, specific industries, and we have had a tremendous response. By reducing our taxes, we have collected on average 22% more.

VAIL: You sound like President Reagan.

GANDHI: Well it works, it works. And the share market, I forget the exact number. I think we have collected something about $5 billion. But we have not collected, we have pulled it out of what we call the second economy, or the black economy, into the main economy. So this is the sort of money which is floating around, and 40 years ago it was in the hands of maybe half a dozen families. It is in the hands of hundreds of million of people today.

VAIL. In regard to foreign investment—some people feel that India has been up to now a difficult place for foreign investment. Do you plan some liberalization or change in foreign investment?

GANDHI: Well, we've done something. Now here we look at things in two or three boxes. One is what we really need and cannot get ourselves, develop ourselves. Certain technologies—when I talk of high technology, I don't necessarily mean sophisticated computers or space technology or electronics necessarily. We are also talking about biogenetics, agriculture seeds, and on a more mundane level the best technology for any particular task. It might be in just producing a screw or a nut and bolt in a factory. It is not necessary that you have to have a super computer. Shop floor ethos, or work ethos, which we have not been able to develop, that also I would have to categorize as a type of technology.

VAIL: Like Japan?

GANDHI: Like Japan. Like some of the southeast Asian countries. That type of thing. That's what is missing. In areas where we feel that we cannot achieve this, we allow foreign investment.

VAIL: So Japan and the United States would be your main sources?

GANDHI: Well, they would, yes. Some West European countries. Then there's another area where have made it absolutely open, and that is our free trade zones, where you can do what you like, 100% investment, we don't want to know what you are doing as long as it goes out. Even there, we have loosened up certain rules because earlier we would not allow—people in India were not allowed to import from a free trade zone. It was ridiculous. What was in fact happening—a particular case in point—we had a U.S. company which had a branch in one of the trade zones manufacturing a product. Our rules said that they (Indians) cannot buy from a factory on Indian soil (in the zone) so they bought from the same company but from the factory in the U.S. So that modification we have done so we can buy as an import from our own free trade zones.

VAIL: Are you going to get the government out of any special industry in the near future?

GANDHI: Well, we have got them out to a very large extent from communications.

VAIL: The communications system of India, the transportation system, these things that are part of the commerce of the nation, I know you have in high priority. Do you feel that you can come on with a major communications program, not just in the media, but the telephone system? Is there any way to get a good one going?

GANDHI: We are. We are trying to do that.

Now, before I get to communications I would just like to put the priorities in line on the plan. The seventh plan which we have just produced.

The first priority we have given is to power generation. Almost all our factories are running at about 40%. Agriculture is not running properly because we have not been able to give power. So the first thing is going to be to get 100% output, or whatever is the best they can do, from the investment that's already been made in factories, in agriculture and other areas.

VAIL: And that would be nuclear and hydro?

GANDHI: There's very little nuclear. It's mostly thermal and hydro. Some gas and none of the new is oil, but some of the older generation is oil. Next is going to be transport because we are already in a crunch. And the minute all these factories and agriculture start functioning at double efficiency we'll have to carry double the amount of goods, so that's the next . . .

VAIL: The road system?

GANDHI: The road, the rail, air much less. Railways are our primary hauling system, more than the roads. We are also looking at roads and we doing an experiment on a motorway where we are trying to get somebody from the private sector to make it and charge a toll on it, and watch to see how it works. If it works well then we can adopt it in other areas.

VAIL: So those would be your top priorities at the moment?

GANDHI: Yes, Well, communications of course. What we are doing for communications immediately is to offload the data communications which is going through telephones. We hope in the next few months to be in a position to start offloading certainly the heaviest circuits. All business communications could go through data links, telexes, computer to computer, like that. So that would offload the telephones and hopefully the telephones would then in those areas be available to be used as telephones instead of transmitting really what should go over a data link. We have also discovered that we've got very good switching technology which we have developed for our defense forces and it's been in use for the defense forces, which is as good as anything you've got and we are going to put that into the civilian field as well.

VAIL: One thing I keep hearing is that we in the media are overestimating differences between India and Pakistan, and we keep hearing from sophisticated people here that your differences with Pakistan are not that great. We keep hearing that America is giving big hardware to Pakistan and that makes you mad. Is it true that we are overestimating this and that things can be worked out?

GANDHI: Well, things not only can be worked, they must be worked out. We are very clear about that. We want true friendship with Pakistan. And it's not just because they are a neighbor. Yes, they are a neighbor and we want friendship with all our neighbors. Pakistan is not a geographical division, it's not a division on any ethnic or any other line, it's just a line that the British drew like that. In fact, I believe at one particular point, I believe there was an argument, and they said, well, all right, we will just change it like that, so you know, it just fell there. So you know, this division is not a division of differences between the people. When we meet Pakistanis and I am sure when Pakistanis meet Indians, there is no difference. We are absolutely on the same wavelength. I have just been back to my old school on Sunday, and we have a large contingent from Pakistan, old boys with their families. There's no difference between us.

VAIL: The fact that Americans are supplying a lot of things to Pakistan, that's something you think you can work around in some way.

GANDHI: Well, it worries us. It worries us because we have had three wars with Pakistan. It's a fact of history and we cannot avoid that. They attacked us on each occasion. What worries us is not the arms per se, because you know whether they have less or more, we will have the same. We have to equate them. If we go shooting ahead, they will have to equate with us. What bothers us is that we have to spend that much more money. We would have preferred, both of us, to stay at a very low level and we were both very happy. They had Mirage Threes and this Chinese jet, and we had MIG 21s. MIG 21s, as you know, are Korean war vintage, that's when they came out, and we were both very happy. Then, what made us unhappy, was the last injection of arms, when lot of sophisticated weapons came in and we immediately had to go to new aircraft, and new everything. It stimulates a race. We don't want that.

VAIL: You want to use your resources for internal development?

GANDHI: Absolutely.

VAIL: Tell me, what do you find most satisfying about this job of yours that you didn't expect?

GANDHI: Satisfying, when you actually manage to get things done, especially things that people felt were not easy to do. It does give you tremendous satisfaction.

VAIL: Like the Sikh problem in Punjab.

GANDHI: Yes. Well, it's not worked out yet. But we have made a start, yes.

VAIL: Are there any particular people around the world that you have met that you particularly take to? Do these leaders impress you that you meet?

GANDHI: A lot, yes. I have met quite a lot. As a group, I would say what really impressed me was the attitude of the younger generation of leadership, and the—I won't say common view because in the group there are people with very Western ideas, there are people with very left ideas, there are people with nonaligned ideas. Almost

every single one of them has an open mind and is willing to talk and to discuss and you know, debate points, which I have found the older are less open to do.

VAIL: They're the generation that wants to talk a new language about getting together?

GANDHI: That's right. They don't have the barriers that maybe the fifties or late forties build. I am not just talking of, you know, the more advanced countries or the backward. I am talking of the little island countries and the big massive countries. It's across the board. It's the age which is doing it.

VAIL: Have you ever thought of going over to see Deng Xiaoping of China?

GANDHI: I've got to go to China, yet. I've got an invitation. I met the Prime Minister Zhao Ziyang, we spent an hour together in New York, and we had a very good talk. We've got a group from China in India now talking about the border issues.

VAIL: Have you got a specific date to meet Deng Xiaoping?

GANDHI: No, we haven't. What we decided on is that a proper base must be made so that something conclusive comes out of the visit. Otherwise there would be tremendous disappointment in both countries.

VAIL: Tell me, what do you do for relaxation? What do you do for fun?

GANDHI: I like music. So little time to listen to good music. Photography. I am a radio amateur, but again no time.

VAIL: No more flying?

GANDHI: No more flying, but I am going to renew my license one of these days.

VAIL: Do you have any great disappointments in your experience after a year?

GANDHI: No great disappointment, no. Nothing that is really upset me or worried me, you know, of something not going right. That feeling hasn't come.

VAIL: Nothing that seems impossible, that can't be worked out?

GANDHI: I am a great believer in talking, sitting across the table and talking things out. I find, even if you are not going to remove all the problems, you can increase an understanding of each other's situations.

VAIL: Person-to-person arrangements to reduce barriers wherever they are.

GANDHI: Yes, yes.

VAIL: Are there any particular historical characters you admire?

GANDHI: I don't think I do.

VAIL: But growing up there were no particular people in the past?

GANDHI: No, I thought you meant the past. In the present of course, we look at our own leadership, at Gandhi, my own grandfather (Nehru).

VAIL: Certainly. It's clan and a tradition.

VAIL: Do you have any particular message for the people of the United States that I could transmit?

GANDHI: Well, it's peace and friendship for both our countries. Really striving for very similar goals. And using not very different methods.

VAIL: On education, which comes through in your thinking so much, do you have a specific program that you have in place or plan to put in place to change or reform the education system in India?

GANDHI: Yes. What we have done is, we have produced what we call a working paper, which is not fully satisfactory, not good enough. I think maybe we did not give ourselves enough time. But, on the other hand, we don't know whether we will be given enough time. So we set ourselves about six months to produce a paper, but it's a beginning. It's a paper that we want debated in the country. And it has provoked debate. We've got a lot of input. Somewhere around the end of the year we are going to start putting our heads together on the input that's come in. We did not want to do such a major change unilaterally by the government. We wanted the whole country involved in that.

VAIL: Do you feel that the lack of a very good opposition is in the end going to be a difficulty for you? You've got this massive mandate. I get the impression that the opposition in India is weak and is not well led to put it mildly.

GANDHI: I won't comment on that (laughter).

On the other question, yes, I think it can be a problem, although it looks very cushy, the fact is that the real opposition in India ever since independence has not come from any other party, it has always come from the Congress (Gandhi's own political party).

VAIL: That's interesting.

GANDHI: When the Congress is in power, the biggest opposition is from the Congress, and the one time the Congress was out of power, the only time there was an opposition to the government it was also the Congress.

VAIL: Then, of course, your mother found out that the hero today can be the opposite tomorrow. It can swing that much?

GANDHI: Yes, and that really shows the strength of our democracy. It shows that the people know what they want and they know they can achieve what they want.

VAIL: Do you feel that you have made great progress on the corruption issue in India?

GANDHI: That's very difficult, because there's corruption at various levels, various types. We have made headway at the top end, and we are being very tough across the line. No compromise no matter what connections there are, how high up he or she is. The real problem which is going to be much harder to face is the type of corruption which takes place at the lower levels, where it is difficult for government to get down and check each case. That's why what we've done is tackle corruption and the black money economy together, because without the black money there would be no corruption. That is the corruption part of it. It comes from that. If we can pull the money out of the black into the white, it will reduce the money available for corruption. If we reduce the rules, regulations, controls, again it will reduce the corruption.

VAIL: Crime and drugs, which America is wrestling with, are they big problems in India?

GANDHI: No, not like it is in America.

VAIL: Organized crime?

GANDHI: Yes, there is organized crime, very definitely, but we are not in the same league.

Drugs are not a problem yet, but it is beginning to be a problem. Certain routes got closed off some years ago, and they have just started transporting it through India. We want to put a stop to it immediately.

VAIL: One final question. I take it that you feel there is a new era beginning for India, that it's going to be a whole new world for India, more united. A feeling that the violent history of India is a thing of the past, that education, lessening of controls, whatever, is going to bring a new era for India. Is that your feeling?

GANDHI: Much of it is going to be by development of the human being and by economic uplift. Because many of these tensions which become communal or racist are really driven from an economic starting point.

VAIL: I like your point about human development. You don't feel that religion—India is a deeply religious place—that religion is not a detriment to India.

GANDHI: No. It has to be one of the pillars. That is what will strengthen the person, the individual.

VAIL: Well sir, you have carved out for yourself a unique place, and I take it nonalignment will be the policy of India for some time to come. Is that right?

GANDHI: Very much so, yes.

VAIL: You are at ease with the media, I must say.

GANDHI: I talk openly to the media.

VAIL: You tell the truth. That's the most disarming thing.

GANDHI: Thank you very much. It's been a pleasure meeting you again.

GANDHI: CANDID, PRACTICAL AND STRAIGHTFORWARD

(By Thomas Vail)

Rajiv Gandhi met me for our interview in his offices in the main government buildings in Delhi, which were erected by the British during the imperial period. His office is quite simple, with a few knicknacks, nor any major art works.

The prime minister is 6-foot-2, slim and good looking, with a friendly manner and a good sense of humor. He is straightforward, candid, practical and non-ideological—neither liberal nor conservative—with no apparent hidden agenda nor any hangups about colonialism. He seems neither an intellectual nor a philosopher.

I asked him in our interview published here about people he admired, either historical characters or current leaders. He said he has not modeled himself on any historical character. On current world leaders—and he has met a lot of them—he said he mainly impressed by the younger ones in their 30s and 40s because of their willingness to talk, to reach new accommodations to create a new world.

Although he now has little time for pleasures, he still enjoys driving his own cars (fast), photography, music and ham radio, and he intends to renew his pilot's license.

Gandhi, in surprising ways, is similar to President Reagan; what you see is what you get. There are no subtleties, or deep intellectual or philosophical broodings, no trickery. He believes he can deal with and be friendly with anyone: the Americans, the Russians or whomever.

He believes both the Americans and Russians would like to reach an accommodation, but are prevented from doing so because of their hangups. But he believes these are not insurmountable.

Gandhi has a practical personality. Whatever differences he may have with other nations—whether the United States and the Soviet Union or his country's historic enemy, Pakistan—he wants to attempt to solve the differences on a person-to-person basis. He believes in personal politics and personal diplomacy.

He faces monumental problems in India, a country with virtually no infrastructure, bad roads, terrible communications, grinding poverty, terrible air and water pollution, and 60% to 70% illiteracy. If you can name a problem, India, probably has it.

But Gandhi is young enough and new enough in his job to think that something can always be done. He is formulating plans to get started on these problems and he has priorities.

The most interesting thing is that he thinks more about humanity and people than about technology. He didn't say it quite this way, but I got the impression that he believes science and technology have

sometimes moved ahead and left the development of human beings behind.

So Gandhi wants to advance his country socially as well as technologically. He realizes that many of the deep divisions in India have stemmed from differences in the economic well-being of the people. The young prime minister is trying to foster a strong middle class, to eliminate the extremes of wealth and poverty that have marked India's past.

Gandhi is part of a new wave of young leaders all over the world. He represents a new generation and a new era for his country. The final measure of this 41-year-old new star of the Third World will be how much of his program to modernize his very backward country can be put into effect.

I liked Rajiv Gandhi. When you stop to think of it, so do most of the people who have met him.

H.R. 3773

HON. PAUL B. HENRY

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. HENRY. Mr. Speaker, it is with great pleasure that I rise to support H.R. 3773, the Federal Science and Technology Transfer Act of 1985. This legislation seeks to build upon the foundation of the 1980 Stevenson-Wydler Act to encourage closer public/private cooperation in industrially related technological research and development. As an original cosponsor of this legislation and member of the subcommittee which held hearings on and reported the final bill, I strongly endorse its provisions.

Federal Government laboratories with their scientific and engineering expertise, their technology base, and their facilities and equipment are valuable national resources. But these resources need to be more readily shared with businesses wishing to develop new products, with universities wanting to enhance research efforts, and with local governments in need of technical solutions to their problems. This legislation goes a long way toward meeting those needs.

H.R. 3773 has three major provisions. It authorizes Government-operated laboratories to enter into cooperative research agreements with other levels of Government, nonprofit institutions, and the private sector. It provides incentives for these laboratories to pursue projects with economic potential. And it establishes by statutory law the Federal Laboratory Consortium for Technology Transfer within the National Science Foundation. These provisions are geared toward encouraging economically productive research and development projects to enable industry to take advantage of the latest scientific developments in their fields, and thereby increase productivity, employment, and international competitiveness.

Currently, there is a wide variability in how Government laboratories relate their research and development work with other parties. Some agencies, such as NASA, have a long history of supporting cooperative research because such authority is clearly spelled out in statutory law. Other agencies, such as USDA, as yet have not realized their full potential because of limited statutory authority or cumbersome procedures to obtain approvals for joint projects. H.R. 3773 must become law before agencies like USDA can go forward with joint efforts.

Agencies and their laboratory systems are provided with new, strong, and flexible incentives to enter into cooperative research and development agreements. Currently, Federal agencies have statutory authority tp pay cash incentive awards up to $25,000 to their employees for meritorious work. NASA, from provisions in the Space Act, has additional authority to provide awards up to $100,000. But, by and large, these reward systems are unused, and especially in the Research and Development area.

Although various proposals have been made to mandate specific new incentive programs, what is helpful to one agency may be harmful to another. Therefore, the legislation encourages and directs agency heads to use their current authority to develop and implement a strong awards program specifically for their scientific, engineering, and technical personnel. Agencies are also permitted to retain revenues from royalties for limited and appropriate purposes, including rewarding specific researchers and updating research equipment.

The Federal Laboratory Consortium for Technology Transfer (FLC) is also upgraded. Currently a voluntary organization, it is composed of nearly 300 Federal laboratories from 11 agencies. Its goal is to improve the transfer of Federal Government technological discoveries into other sectors, particularly the private sector. So far, it has shown promise, but its success has been uneven. H.R. 3773 establishes the FLC in law and allows it to use the administrative services of the National Science Foundation to help achieve its goal. To aid the consortium further in identifying appropriate arrangements and projects, the legislation establishes advisory committees in each Federal laboratory consortium region to be composed of representatives from other levels of government, private enterprise, universities, industrial development organizations, and other appropriate persons.

Passage of this legislation will require no increase in Federal outlays. Initial funding of the FLC is through a very small setaside totaling less than $1 million per year from the budgets of agencies with Government-owned laboratories. Voluntary contributions will provide full funding after 1991. The private sector will contribute greatly to specific R&D projects. Federal revenues are also expected to be generated from royalties on new inventions.

H.R. 3773 is an important legislative initiative. It addresses a critical economic need in a fiscally responsible manner. I am pleased that this body has recognized the importance of this need, and command my colleagues for adopting this legislation.

INSURANCE CRISIS THREATENS COLLEGES

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. FLORIO. Mr. Speaker, as my subcommittee pursues its long-range inquiry into the crisis in the availability of insurance, I wish to bring to the attention of the House the far-reaching consequences of the crisis. The Associated Press article I am inserting here in the RECORD from the Burlington County Times describes the serious disruption of our institutions of higher education created by the insurance crisis. This graphically illustrates an important point about insurance coverage: it is often a public necessity, not a discretionary service that one can forgo until another day. Accordingly, public officials do not have the luxury of ignoring the liability crisis in the hope that it will go away.

[From the Burlington County Times]

COLLEGES GET EXPENSIVE INSURANCE, OR NONE AT ALL

BOSTON.—Faced with a surge in lawsuits, American colleges and universities are finding they must pay up to 10 times more than last year for liability insurance—if they can get it at all.

The University of Southern California, 30 miles from the San Andreas fault, cannot afford earthquake coverage. In January, the premium more than tripled to $400,000.

"We're rolling the dice," said Alex Ratka, director of risk management and insurance for USC.

At Southeastern Massachusetts University, students are hoisting double dips instead of beers. In March, the school converted the campus pub into an ice cream parlor after an insurer refused to renew liquor liability coverage.

"There are just horror stories all over the place," said William Jacka, president of Moulton, Allen and Williams Corp. insurance brokerage in Birmingham, Ala. "Most underwriters are just scared of colleges and universities because they don't understand the risk."

Michigan State University, which now has general liability insurance to cover claims of up to $50 million, wil be lucky to get a limit a fifth that high next year, said Jerre Ward, risk manager for the 44,000-student school.

"When companies are renewing, they are doing three things: reducing the coverage, reducing the limits and raising the price," she said.

The crisis comes a year after the insurance industry lost $3.8 billion. Barry Walker, associate vice president of the Chicago-based Alliance of American Insurers, said insurers were trying to recoup by shying away from areas where their risk is most speculative.

The problem is not limited to institutions of higher learning, but huge insurance bills are particularly chilling to college administrators trying to keep spiraling tuition costs under control.

"Premiums have gone up anywhere from four to 10 times," said Jacka. "The other side of this coin is that these costs are going to have to be passed on to the student body."

Insurers blame the higher premiums in part on an explosion in lawsuits against colleges and universities in the last few years and on the unpredictability of court awards.

Suits alleging sex and race discrimination in hiring and tenure decisions are among the fastest-growing areas of litigation, administrators say.

Since 1980, the number of claims filed against the University of Alabama at Birmingham has risen 1,200 percent, said John Walker, director of risk management and insurance. A large proportion of the claims allege medical malpractice at the university's teaching hospital, he said.

Because damages a jury can award are not limited, claims can vary from nothing to millions of dollars.

"There's no consistency. You can't say with certainty when you write a policy that this is what you're going to have to pay out," said Barry Walker of the insurers' alliance.

Since last year, some types of liability insurance have become almost impossible to find at any price, administrators said.

Directors' and officers' insurance, which protects school employees named individually in damage cases, has all but dried up. Universities report they can no longer get coverage against chemical spills or other pollution accidents. Some schools say newer policies won't pay for injuries to students involved in intercollegiate athletics.

"New general liability policies now exclude the very things we buy them for," said the University of Alabama's Walker. "The industry, I would think, should be in the business of visualizing our risk and then writing policies to cover it."

EUROPE AND STAR WARS

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. GARCIA. Mr. Speaker, the implications of star wars spreads far beyond our immediate concerns in the United States. It also has profound implications for our European allies.

The New York Times ran an excellent editorial on precisely that subject in today's edition. I submit it to the RECORD for my colleagues' perusal.

SPREADING STARDUST IN EUROPE

For Americans, the Strategic Defense Initiative sprang unannounced from their President's head. For Europeans, this concept of building some kind of an electronic shield against Soviet missiles poses excruciating choices. After months of argument, Britain has agreed to participate in the research, and other European countries will probably do so shortly.

Like most Americans, Europeans believe that no perfect missile defense is technically feasible, while a leaky one would be a dubious bargain. It would be an even worse one for them, because even a leaky Soviet shield could rob the French and British nuclear deterrents of credibility.

So the allies, having met one test of loyalty by accepting American cruise and Pershing missiles on their soil, resented a recent letter from Caspar Weinberger in which the Secretary of Defense invited them to sign up for "Star Wars" research—and to reply within 60 days.

Still, even if the Europeans are not sold on Star Wars as a weapon, they find it compelling as a technological venture. They fear being condemned to a technological backwater if they opt out of Star Wars research and the expected technical spinoffs it may bring. Yet even this fear contains a painful paradox. The European allies also fear that participating in the project may stimulate a new brain drain to the United States.

Britain has responded to these complexities by demanding a $1.5 billion share of the projected $26 billion research budget for Star Wars, along with guarantees that it may use its scientists' inventions in commercial projects. Mr. Weinberger signed a secret accord in London last week that apparently meets British concerns without giving any specific guarantees.

European help with Star Wars is likely to be useful, though not essential, and will add to the risk that pieces of the technology may leak to the Soviet Union. The need for Europe's participation is political more than technical. For America to build itself an astrodome shield in which Europe had no involvement would sorely strain the Atlantic alliance.

The United States wants Europeans to share in Star Wars for political reasons, and Europe wants to share for commercial reasons. Marriages have had worse foundations.

ON THE RETIREMENT OF HAL M. CHRISTENSEN

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. WAXMAN. Mr. Speaker, I would like to take this opportunity to note with congratulations and regret the upcoming retirement of a private-sector employee who has dedicated much of his life to work on the public's behalf. At the end of this year, Hal M. Christensen will retire from the American Dental Association, for whom he has directed legislative work for 22 years. While he has built the Washington office of the ADA into a sizable group of professionals, he will be missed.

During Hal Christensen's tenure the ADA has been instrumental in a number of areas of public health and health policy. The Medicaid Program has been expanded to include dental care for poor children. The Medicare Program provides oral surgical services for elderly and disabled beneficiaries. And the National Institute of Dental Research has become a vital part of improving the Nation's health and raising its hope and expectations for even greater improvements. A lawyer by training, he has done remarkable work to make improved dental services widely available.

During these upcoming years of budget danger for many of these health programs, we will be in our greatest need of his skills. Fortunately, he will remain as a consultant to the ADA throughout next year and will, I'm sure, continue as one of the professionals who might help steer the legislative process back to the needs of the public.

For now, however, I do not mean to draft him back into duty before he has managed to retire. Today I would like to thank him for the service he has performed and to congratulate him on a successful career.

TRIBUTE TO GILBERT GUDE

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. GREEN. Mr. Speaker, I rise to pay tribute to the Honorable Gil Gude, who recently announced his retirement as Director of the Congressional Research Service.

Gil served as a U.S. Representative from the 8th District of Maryland from 1967–76. While serving in the House, Gil worked hard on legislation associated with open space and parks, metro rapid transit system funding, and environment and metropolitan issues. He was cofounder and cochairman of the Environmental and Energy Study Conference.

Since 1977, Mr. Gude has been Director of the Congressional Research Service, whose staff of 850 represents the largest legislative body research organization in the world. We Members and our staffs are greatly indebted to Gil for his excellent work at CRS.

Mr. Speaker, I ask that my colleagues join me in thanking Gil Gude for his many years of dedicated public service and wishing him the best in all his future endeavors. He will be missed!

A TRIBUTE TO JENNIFER DENISE WATERS

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. CLAY. Mr. Speaker, I am happy to take this opportunity to congratulate an outstanding member of the St. Louis community, Ms. Jennifer Denise Waters. Ms. Waters is a resident of Missouri's First Congressional District and a recipient of the 1985 Congressional Award Gold Medal for Community Service.

Ms. Waters is a coleader of St. Louis Girl Scout Troop 32467. She is recognized and commended for contributing more than 900 hours of voluntary public service during the past 3 years.

I am pleased to share with my colleagues the following article from the October 3, 1985, St. Louis Post-Dispatch, "North Side Woman Receives Congressional Medal for Community Service."

NORTH SIDE WOMAN RECEIVES CONGRESSIONAL MEDAL FOR COMMUNITY SERVICE

(By Gloria Ross)

"Individual Americans are responsible for the future of America." These are the words and philosophy of Congressional Award gold medal recipient Jennifer Denise Waters.

The 21-year-old Waters was among eight Missourians—including six St. Louis area residents—to receive the Congressional Award during a ceremony in Washington, D.C. on September 26.

The award has been given annually since 1979 to young people between the ages of 20 and 23 in recognition of more than 800 hours of voluntary community service and personal achievement. This was Missouri's first year of participation in the six-year-old Congressional Awards program.

Waters lives in the First Congressional District represented in the Congress by William L. Clay. She was honored for her 988 hours of voluntary public service and personal development during the past three years.

Speaking with a quiet confidence and maturity that belies her 21 years, Waters said of her activities, "I think you gain a lot from volunteer work. You gain experience as well as skills, you gain knowledge about other people's personalities."

"Doing volunteer work gave me an opportunity to work with young people and to give to others, especially teens and children." Waters said. "The help, love and concern that people gave me throughout my life led me to want to give of my time to others."

Waters began as a Girl Scout volunteer because she saw something she didn't like. "When I see something I don't like, I want to change it," Waters said.

Waters was a Girl Scout until about age 11. She left Scouting after reaching the Cadette level because she felt her Scouting experience lacked substance.

She has picked up where she left off. Waters is now trying to provide Cadette Senior Girl Scout Troop No. 32467 in north St. Louis with some of the substance she felt was lacking in her own Scout experience.

As co-leader of Troop No. 32467, along with her sister Maureen Young, 33, she is sharing her love of the performing arts. Waters and Young both enjoy, dancing and their troop specializes in dance.

"Maureen's style is more modern dance, while mine is jazz/ballet." Waters notes. The Troop will benefit from both styles.

"This year they're going to not only go to cultural events, but will perform," she said. The Troop is planning a Christmas production.

But Waters says she's teaching more than an appreciation of the performing arts, she's also trying to teach practical skills and responsibility.

Toward that end, Troop members are active in their own administration. "They need to learn how to keep accounts," Waters said.

Jennifer Waters lives with her mother, Romelda Waters, a registered nurse, at 3947 Palm. Romelda Waters says she's "very proud" of her daughter's award. She expressed some surprise, but wholeheartedly agreed that her daughter deserved the award, noting, "Jennifer has always been the kind of child who's willing to do something for others."

Romelda Waters' influence on her daughter is quickly evident. Waters quotes her mother frequently. She says her mother advised her to, "Go to sleep on it," or "learn something from each experience," when Waters became discouraged by a project which later became instrumental in her receipt of the Congressional Award.

The award-winning project was the Sumner High School Hall of Fame Awards. Waters established the Awards while serving as president of the Sumner Honor Society.

The Awards pay tribute to famous Sumner graduates as a means of presenting positive role models to current students.

Waters says her mother's encouragement helped her maintain the drive needed to complete the Awards project. Romelda Waters admits telling her daughter, "If you start it, you have to finish it."

The Hall of Fame was established and, thus far, honorees have included such notables as tennis star Arthur Ashe, comedian-activist Dick Gregory and KMOX-TV anchor Julius Hunter.

Waters counts among her personal achievements a degree in civil engineering, which she received from the University of Kansas at Lawrence last may.

Waters says she chose civil engineering because, "I wanted to use the skills I already had: my knowledge of math and science." She is now employed as a traffic engineer with the St. Louis Street Department, where her long-range plans include work in traffic analysis.

Waters says she plans to continue her civic activities. When she is congratulated on her Congressional Award, she offers a modest, "Thank You," and quickly steers the conversation to work to be done, to her plans for her Troop.

Waters and other area Congressional Award recipients will be honored again in a local ceremony at the Marriott Pavilion Hotel on October 7.

HIGHER EDUCATION REAUTHORIZATION

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. AuCOIN. Mr. Speaker, earlier this year, the administration asked Congress to slash Federal student aid. Today, by approving H.R. 3700, the Higher Education Amendments, we're saying "no."

We're saying no because the administration proposals would have cut college assistance so deeply that 800,000 students across this country would not have been able to complete their education. If the House of Representatives had agreed to these changes, we would have robbed this Nation of a new generation of highly educated individuals ready to lead our corporations, our universities, our Government.

The effects would have been especially severe in my State of Oregon. Despite efforts at cost containment, college tuition in Oregon has increased by more than 200 percent over the last 10 years. During that time, the Federal Government has helped more than half the full-time public college and university students in Oregon finance their education. For private schools, the numbers are evern higher. Eighty percent of students attending private schools in Oregon wouldn't be there without Federal loans or grants.

H.R. 3700 insures that Guaranteed Student Loans, Pell Grants, College Work Study, and other programs will be available to those who need them. At the same time, the bill reduces spending for higher education programs by $1.3 billion from last year's level. How have we reconciled these seemingly incompatible goals? By tightening eligibility standards, distributing loan payments in increments instead of one lump sum, instituting a tougher system for collecting delinquent loans.

The bill also takes into account a dramatic change taking place at colleges and universities across the United States. Nontraditional students such as displaced homemakers, part-time and returning students already account for most of the enrollment at some schools and are quickly becoming the majority on all college campuses. H.R. 3700, recognizing the different needs of these students, allows students to receive loans even if they attend school less than half the time, and authorizes payment for important services such as day care.

The bill also provides new programs for teacher training and recruitment, strengthens foreign language, library, and other institutional aid programs.

The improvements contained in H.R. 3700 go hand in hand with improvements that have already been made in Oregon. We've adopted tighter standards for Oregon graduates, instituted economic development programs that pool the resources of Government and higher education, and established new programs to train workers for our expanding electronics industry and retrain those who have been displaced due to the economic downturn of the past several years. Oregon has also instituted tight collection procedures for delinquent loans, giving us a 98-percent repayment rate—one of the highest in the country.

What's the payoff of these investments? Access to quality education institutions for students. A better chance for Oregon and the United States to compete in the international marketplace. And increased tax revenues because of the higher paying jobs college-educated individuals qualify for.

Mr. Speaker, I strongly support this legislation. Cutting the Federal budget by forcing students out of college is a "cost-savings" this Nation cannot afford.

CONFERENCE REPORT ON HOUSE JOINT RESOLUTION 372, PUBLIC DEBT LIMIT INCREASE

HON. DEAN A. GALLO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. GALLO. Mr. Speaker, passage of the Gramm-Rudman Balanced Budget and Emergency Deficit Control Act is a historic event in our Nation.

Passage of Gramm-Rudman is the most important action to be taken by Congress in many years. We have created a program to deal with the most important issue in the Nation—the need to require accountability in Federal spending to bring down the disastrous Federal deficit.

This legislation mandates deficit targets of $144 billion in fiscal year 1987; $108 billion in fiscal year 1988; $72 billion in fiscal

year 1989; $36 billion in fiscal year 1990; and, by fiscal year 1991 the budget must be balanced.

Congress may reach these deficit targets by enacting its own program of budget cuts, tax increases or a combination of both. Only if the Congress fails to adopt its own budget within the deficit targets would the President administer an across-the-board reduction in Federal spending. This sequester reduces discretionary accounts by an equal percentage with 50 percent of any automatic cuts coming from domestic spending and 50 percent from defense spending. While the President is responsible for exercising this sequester, he is compelled to maintain congressionally established spending priorities.

Because this budget balancing mechanism only goes into motion if Congress fails to act in a timely way to bring down the deficit, it provides a strong incentive to meet our commitments to end deficit spending by 1991.

Programs protected from automatic cuts include Social Security, Medicaid, aid to families with dependent children, nutrition programs, supplemental security income, food stamps, veterans' compensation and pensions. Other programs that are provided special protection include Medicare and veterans' health-care programs.

Many people have called upon me to reduce this deficit, and I have responded by cosponsoring legislation to require a balanced budget through a constitutional amendment and by cosponsoring and voting in favor of Gramm-Rudman. Although I would have preferred passage of the balanced budget amendment, I am satisfied that the Congress has finally acted to relieve this country of this $200 billion Federal deficit.

Indeed, we should follow this vote with an approval of a constitutional amendment to ensure that efforts to balance the Federal budget will be continued as Federal law and policy.

REAUTHORIZATION OF THE SUPERFUND PROGRAM

HON. TIM VALENTINE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. VALENTINE. Mr. Speaker, I am pleased that the House of Representatives had approved a 5-year renewal of the Superfund Toxic Waste Cleanup Program. The proper and safe disposal of toxic wastes must be among our highest priorities, and I applaud the efforts of my House colleagues in passing this vital legislation.

We must ensure that our legacy to future generations includes an environment that has not been permanently despoiled by toxic waste dumping. This reauthorization of Superfund is a large step toward that goal.

Although I recognize the need for this legislation and the costs involved in regaining lands and waters which have become unfit for human habitation and consumption, I am concerned about the authorization level for this program. The $10 billion authorized by our bill is $2.5 billion more than the amount in the Senate version and almost twice the amount requested by the administration.

During this period of record budget deficits which have put intense pressure on every Federal spending program, we must be sure that every tax dollar expended is truly needed. I am concerned that $10 billion is more than the Environmental Protection Agency can spend effectively. I am hopeful that when the House and Senate conferees meet to iron out the differences in the two bills, adjustments will be made in the final authorization level for the Superfund Program.

It is essential that we authorize what is needed, but it is equally essential that we not authorize more than we can use effectively.

THE NATIONAL MULTIPLE SCLEROSIS SOCIETY

HON. GERRY SIKORSKI

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. SIKORSKI. Mr. Speaker, the National Multiple Sclerosis Society, which today is one of the largest nonprofit health agencies in the United States, originated nearly 40 years ago with an idea—and a small three-line classified advertisement that appeared in the May 1, 1945 edition of the New York Times. The printed appeal for help was placed by Sylvia Lawry, our founder, whose late brother suffered from multiple sclerosis. In her ad, Miss Lawry asked anyone who might know of a cure for MS to contact her.

Thus was born the organization which today serves a membership of 400,000 through 113 chapters and branches. It is the only organization supporting both national and international research into the cause and cure of multiple sclerosis.

The Nation is very proud of the work of the National Multiple Sclerosis Society and the contribution it has made to biomedical research. Since its founding, the society has invested more than $80 million in scientific grants.

As a result, we are much closer today than ever before to understanding what causes multiple sclerosis and how to treat it. Someday soon we may possibly learn to prevent and cure it. Enormous strides have been taking place in the neurosciences recently, giving rise to a real hope that this may happen soon.

Sylvia Lawry is still very much active in the affairs of both the national and international multiple sclerosis societies. She is a tremendously energetic, dedicated woman whose strong will and perseverance are literally a worldwide legend and an inspiration.

PERSONAL EXPLANATION

HON. HAROLD ROGERS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. ROGERS. Mr. Speaker, on December 11 I was unable to be present for rollcall No. 449, the rule providing for consideration of H.R. 3838, and rollcall No. 550, the rule providing for consideration of Senate Joint Resolution 238. Had I been present, I would have, in both instances, voted "no."

THE 25TH ANNIVERSARY OF THE DALTON LIONS CLUB

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. CONTE. Mr. Speaker, it is my pleasure to announce the 25th anniversary of one of the chapters of Lions International, the Dalton Lions Club, of Dalton, MA. They have been one of the chapters of this fine organization which has contributed most of its time, resources and money to helping those people who need basic health care for hearing and eye problems.

The Dalton Lions Club was chartered in 1961, sponsored by its parent chapter, the Cheshire Lions Club. Since this chapter was established, it has been the parent of two other clubs, sponsoring the establishment of both the Cummington and Windsor chapters. Its greatest satisfactions have been in being the top club in the district for the past 4 years, reaching its 25th year since being chartered and knowing that many have benefited from their generosity.

The Lions International, established in Chicago in 1917 by Melvin Jones, was challenged by a famous American, Helen Keller, to help the deaf and the blind. Since then, Lions clubs have been disposed to helping those with hearing and sight problems. The Dalton Lions Club is a longstanding and outstanding example of the power and generosity for which these clubs are best known.

Of the funds which the club raises, there are four areas where the funds are contributed. The club gives out scholarships, helps pay for its locals to have hearing aids and eyeglasses, and it contributes to a local and State organization for the interest of hearing and sight problems. The scholarships provided are for senior high school students who are in need. A few scholarships of this sort are given out each year with all the remaining funds which the club raises.

The primary concern of the club is to its local population, protecting children and the aged who are least able to pay for services they may need. Sixty percent of the club's budget is paid out for such necessities as hearing aids and eyeglasses; this also includes funding to needy families for operations which they could not otherwise afford. It is those who are most in need

who get the greatest consideration and assistance, as it should be.

Other funds go to the emergency sight and hearing fund, a local fund, and a large State organization, Massachusetts Eye Research. The emergency fund is local to western Massachusetts, and assists those who are unable to pay for operations and aids which they may need. This is important there are no other programs for these people to help them receive the aid which is required. The State organization is a major research center which has researched the "fake eye" and has done extensive research on eye problems.

On January 18, 1986 they will be celebrating their 25th anniversary. They have shared camaraderie in the club which has kept it together for these many years, and they have worked together to benefit their community and expansive research. The research of human health care problems is something which I have ardently advocated throughout my many years in the U.S. House of Representatives. It is highly admirable work, helping those people in need, and it is the genuine interest which is shown through this longstanding club which is an inspiration and a challenge to other groups to do their part for human services.

TARIFF REDUCTION FOR GLASS LINERS

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. GEJDENSON. Mr. Speaker, today I am introducing legislation that will restore some necessary tariff equity to a company in my district that is making a serious effort to continue manufacturing at least some of its product in the United States.

The Thermos Co., of Norwich, CT, manufacturers the vacuum bottles for its well-known product in the United States, and imports its glass liners from Great Britain. Other distributors of similar products import the entire product.

Until the late 1950's, both vacuum bottles and liners were grouped under one duty classification, but thereafter, separate classifications were established, apparently for statistical purposes. The rates of duty for the two items, however, remained identical.

In the mid-1960's, however, the rate of duty for vacuum bottles began to decline, while the rate of duty for glass liners remained the same. The complete product, when imported, was taxed at the rate for a vacuum bottle. Today, the rate of duty for glass liners is considerably higher than that for identically designed, and totally foreign produced, complete products.

The bill I am introducing today would reduce the tariff rates for glass liners to bring them into parity with the rates for completed products. This legislation will enable the Thermos Co. to save approximately $200,000 annually, and will provide tariff equity to a company that has made a concerted effort to keep some of its operation in the United States. I urge my colleagues to support this important bill.

TRIBUTE TO ROMAN L. MIELCAREK

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Ms. KAPTUR. Mr. Speaker, last week my district lost one of its most respected leaders. Roman L. Mielcarek, 81, of Elm Street, Toledo, was a civic, political, business educational, and spiritual pillar of our community. He left lasting impact on every organization in which he participated.

Roman Mielcarek was a lifelong resident of Toledo. He and his wife Jeane founded and published the Shoppers Herald, a community weekly for 50 years. Mr. Mielcarek served as a deputy clerk for 40 years at the Lucas County Board of Elections. He held a host of other city, county, and State positions and did so with great enthusiasm, dignity, and integrity.

Active in every aspect of community life, Roman Mielcarek was a member of the board of directors of the International Institute of Greater Toledo, Inc. [NIFTI], and the Toledo fire commissioner's board. He led important efforts to improve community life such as the razing of the abandoned Parkland School at Lagrange and Central and turning the site into the Lagrange-Central Senior Citizens Center.

Mr. Mielcarek was president of the Central Committee of Associated Societies of north Toledo and held membership in the Old Newsboys Goodfellow Association, Jewish Community Center of Toledo, Fourth Ward Democratic Club, Msgr. O'Connell Council, and the Knights of Columbus. He also served as president and founder of the former Lagrange Commerce Club and trustee of the Lagrange Business and Professional Men's Association.

Roman Mielcarek was a special man. He shaped the life of a great ethnic community and his beloved city of Toledo. I know my colleagues in the House of Representatives join me in offering our deepest condolences to the family and friends of Roman Mielcarek. It is our hope that the fond and living memories will carry you through these difficult times.

CHILD CARE INSURANCE CRISIS REQUIRES ACTION

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. FLORIO. Mr. Speaker, the unavailability and unaffordability of liability insurance is affecting child care centers across the country. I have commenced a series of hearings to examine the insurance crisis.

I am inserting in the RECORD a letter to the commissioner of insurance in my own State. The letter describes very troubling developments regarding the insurance situation for child care centers and calls for corrective regulatory action. We in Congress must monitor this situation closely to determine whether the States have the ability to deal with this very serious problem.

The letter follows:

U.S. HOUSE OF REPRESENTATIVES,
COMMITTEE ON ENERGY AND COMMERCE, SUBCOMMITTEE ON COMMERCE, TRANSPORTATION, AND TOURISM,
Washington, DC, December 9, 1985.

Hon. HAZEL FRANK GLUCK,
Commissioner of Insurance, New Jersey Insurance Department, Trenton, NJ.

DEAR COMMISSIONER GLUCK: I am writing to express my support for action to address the insurance crisis and its impact on child care centers. This situation is discussed in the enclosed letter from Daisy Ward-Roman, Vice President of All My Children. Child care facilities are of crucial importance to our communities in New Jersey and must receive protection from arbitrary action which could efectively cripple child care services throughout our State.

As you know, the current crisis in the unavailability and unaffordability of liability insurance extends to many lines of insurance coverage. In my capacity as Chairman of the House Subcommittee with jurisdiction over insurance, I have commenced a series of hearings to examine this problem. Historically, however, it is the States that have had responsibility for the regulation of insurance. It may be that support will develop in Congress to change this, at least in some respects. Until and unless there is such change, however, we must rely on State insurance departments as the first line of defense for the public.

Please advise me of the steps you are taking to address the problems described by Ms. Ward-Roman. I very much appreciate your cooperation.

Sincerely,

JAMES J. FLORIO,
Chairman,
Commerce, Transportation and Touirism.

ALL MY CHILDREN INC.,
Atco, NJ, November 16, 1985.

Re: Child care liability insurance situation.

Commissioner HAZEL GLUCK,
Department of Insurance,
Trenton, NJ.

DEAR COMMISSIONER GLUCK: We, the voting, tax paying, small business women and families of New Jersey need your HELP in dealing with the UNJUST liability insurance problem affecting child care centers throughout New Jersey; thus affecting many New Jersey families.

Itemized below is a recap of events to date:

1. In August of 1984 I signed with the Continental Insurance Company (through Gallagher Associates) for a three year policy (inclusive to August 1987).

2. For the first year August 1984 through August 1985 there were no problems.

3. On August 26, 1985 I received an insurance premium finance agreement stating I would pay $396.00 down and finance the remainder over the next five months at 22% interest. As this was acceptable I wrote a check for the $396.00 down payment and signed and returned both the check and the agreement on August 26, 1985.

After the policy was already in force, on September 13 I received a telephone call from Gallagher Associates that our insurance premiums had been raised $473.00. In comparison to other child care centers who have had their premiums increased by thousands of dollars I am told $473.00 is not so bad. In reality $473.00 to a small privately owned child care center does make a difference!

I understand that on September 17th Governor Kean approved an emergency regulation prohibiting insurance companies from imposing premium increases during the term the policy is in effect. However because I was notified on September 13th, I am not receiving any relief under this emergency regulation. It is appalling to realize that there were no provisions in our old insurance laws to prevent this type of occurrence.

I have personally corresponded and spoken with both Assistant Insurance Commissioner Joseph Kenney and Mr. Dick Crane of the Division of Youth and Family Services and been told by both of these gentlemen to pay the increase! Their solution is completely unacceptable!

We are providing an absolutely essential service to the community. If child care centers are not protected from these outrageous premium increases, many will have no choice but to raise their prices or close their doors. Either solution will cause economic disruption in many families throughout the state.

In retrospect, there must be some control over the insurance companies to prevent them from doing as they wish. We must demand fixed rates on a permanent basis. We need security which will prevent this sort of atrocity from occurring again.

If we allow insurance companies to raise their rates: After quoting a "firm" price; after accepting a down payment; after signing a finance agreement; after accepting monthly premiums; and then impose nonretroactive emergency regulations—aren't we really locking the chicken coop after the fox finished dinner? Shouldn't there be a reversionary clause to help both the child care centers and the families they serve from sure economic disruption?

Cordially,

DAISY WARD-ROMAN,
Vice President.

GRAMM-RUDMAN

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. AUCOIN. Mr. Speaker, today we approved a balance-the-budget plan called Gramm-Rudman. The measure forces Congress—by law—to cut the dangerous federal spending deficit by 20 percent for five years to balance the budget by 1991.

The bill gives the President the power to make across-the-board cuts if Congress fails to reach the 20 percent goal each year. It also represents the best hope I see for action by the President and Congress to avert a new recession by promoting growth.

Mr. Speaker, I support this legislation. In cards and letters, in phone calls, and at meetings, my Oregon constituents have told me to make deep deficit cuts—now. As we all know, what Washington has tried so far has been either too little or too weak to make a difference.

The Gramm-Rudman plan is not perfect. It doesn't do anything Congress and the President can't do right now. The trouble is, Mr. Speaker, that they can't agree. Emergency measures are needed for an emergency situation.

At least this plan has teeth. It provides a binding system, in law, to stop the budget from spinning out of control.

Mr. Speaker, this is the third deficit-reduction plan we've voted on in 5 years that is disciplined enough to work.

The first was the "Pay-As-You-Go Budget" of 1982. I supported it, but it didn't pass. Too many people back then thought the deficit didn't really matter.

The second was the "Across-the-Board Freeze." I supported it, too, but it didn't pass. Too many Congressmen in both parties wanted to protect their sacred cows.

The plan we approved today starts cutting the deficit immediately. That's important. We can't continue to allow jobs—in Oregon and across the Nation—to be sacrificed to finance a $200 billion a year Federal deficit.

Some people I admire don't like this plan. They say it's too rigid, and may give too much power to the President. They don't like the idea of setting mandatory targets.

But, Mr. Speaker, as I see it, time has run out. These high deficits are inflicting tremendous harm on our economy. And economic recovery just won't happen unless the deficit is slashed. In Oregon, we're still trying to recover 40,000 jobs lost during the last recession.

Passage of this bill is the best economic news for Oregon in years. We can't focus on rebuilding our economy with a Federal deficit that continues to spin out of control.

THE CARDEROCK SPRINGS ELEMENTARY SCHOOL CHORUS BRINGS JOY TO THE U.S. CAPITOL TREE LIGHTING CEREMONY 1985

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. OBERSTAR. Mr. Speaker, yesterday evening, some of the Members of this House paused from consideration of the weighty issues of tax legislation, the budget deficit, the farm bill, and similar matters to join in a truly delightful event which, each year, brightens our spirits and brings joy to our lives: the annual U.S. Capitol Christmas tree lighting ceremony.

The magnificent 55-foot white spruce was provided by the State of Michigan and the U.S. Forest Service; the music was offered by the U.S. Coast Guard Band and the Carderock Springs Elementary School Chorus; and the lighting of the tree was performed by the Speaker of the House, the Honorable THOMAS P. O'NEILL, JR., who, in a gracious gesture so typical of the Speaker's personal warmth and love of people, invited his grandchildren, my daughter Monica, and Congressman LANTOS' granddaughter to join him in pressing the button which illuminated the 4,000 lights on that magnificent tree—the people's tree.

It was my great privilege to introduce the chorus yesterday evening, and I include my remarks at this point in the RECORD:

U.S. CAPITOL TREE LIGHTING CEREMONY 1985

The U.S. Capitol Christmas tree lighting ceremony is always a special event. This year we enjoy an added touch of holiday spirit with a unique musical flair provided by the Carderock Springs Elementary School Chorus. The Chorus includes some one hundred students of the fourth, fifth and sixth grades from the Carderock Springs Elementary School in Bethesda, Maryland. The Chorus has perfomed at: the National Cathedral, the Hebrew Home of Greater Washington, and the Pageant of Peace on the Elipse south of the White House. Several of the Chorus members attended the Boys Choir Festival in Saltillo, Mexico, in 1984. This year the Chorus will also perform at: the National Shrine of the Immaculate Conception, the Hebrew Home of Greater Washington, the Pageant of peace, and, on December 21, at the Kennedy Center for the Performing Arts.

All of the children in the Carderock Springs Chorus are special people. They have worked very hard with a great of enthusiasm, dedication, and intensity in preparing for their Christmas season performances.

I am sure they and you in the audience won't mind if I single out just one special performer: our daughter, Monica Oberstar, who each day brings home with her the joy, the wonder, the excitement of music and has infused our family with the enthusiasm of the entire Carderock Springs Chorus.

A musical group is probably only as good as its director. This group is superb and so it their Director, Mrs. Nancy Nuttle. As you will see, Mrs. Nuttle puts her entire being into each practice, as well as every performance. She is an inspirational and dedicated leader whose own example draws the very best out of her performers. She has opened their minds and their hearts to the joy of music and now she and they will enrich our appreciation of the holiday season with a truly enjoyable and memorable performance.

It is a great personal honor to present to you the Carderock Springs Elementary School Chorus.

PERSONAL EXPLANATION

HON. CHARLES PASHAYAN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. PASHAYAN. Mr. Speaker, owing to not being well, I was not able to vote on Gramm-Rudman.

Had I been present, I would have voted for the bill.

PRESIDENT REAGAN'S REMARKS ON INTERNATIONAL HUMAN RIGHTS DAY

HON. BENJAMIN A. GILMAN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. GILMAN. Mr. Speaker, each day this week I have been proud to contribute some remarks in commemoration of the 37th anniversary of the signing of the Universal Declaration of Human Rights. On Monday, our cochairmen of the Human Rights Caucus, Congressman LANTOS of California, and Congressman PORTER of Illinois, led a special order in preparation for Tuesday's commemorative events. On the anniversary itself, I felt it proper to share with my colleagues a recent Wall Street Journal article submitted by Avital Shcharansky. And yesterday, I inserted into the CONGRESSIONAL RECORD a Washington Post summary of how International Human Rights Day was celebrated in the Soviet Union. Though a small group of individuals met at Pushkin's statue to pay their respects, several were arrested by the KGB. Unfortunately, this is standard operating procedure in the Soviet Union.

It was, however, refreshing to hear President Reagan's remarks upon his commemoration of International Human Rights Day. His words reiterate what many of us feel, and I would like to take this opportunity to share his remarks with my colleagues. Mr. Speaker, I ask that the President's speech be printed in full at this point in the CONGRESSIONAL RECORD, so that his strong commentary will be duly noted by us all.

REMARKS OF THE PRESIDENT AT SIGNING CEREMONY FOR INTERNATIONAL HUMAN RIGHTS DAY

The PRESIDENT. Thank you very much. [Applause.] Thank you. Please, sit down. And I wish I knew where the light on this thing turned on. I can't find it, so I'll do it in the dark. [Laughter.] Well, good afternoon and welcome to the White House.

Today we mark the 37th anniversary of the signing of the Universal Declaration of Human Rights, a document to which virtually every nation on Earth subscribes. It's a day for us to take stock, to survey the globe with an eye not so much in—to words, as to actual deeds; to measure the world against the noble assertions of the Universal Declaration and to reaffirm our commitment to the cause of human dignity.

America has, since its founding, been a refuge for those suffering under the yoke of oppression. A belief in the dignity of man and government by the consent of the people lies at the heart of our national character and the soul of our foreign policy. I had the pleasure of explaining that to a gentleman in Geneva not too long ago. [Laughter.] But, here, the difference is our documents, such as the Constitution, say we, the people, will allow government to do the following things.

Today more than ever we're proud to be champions of freedom and human rights the world over. So in observing Human Rights Day, we celebrate our commitment to the beliefs and moral teachings on which our own nation is founded; a belief in liberty, in the dignity of man, and in the inalienable rights of free men and women to choose their destinies. We have not hesitated when these rights and freedoms have been threatened.

Last month on Veterans Day, I visited the graves of our soldiers who gave their lives so that the rest of us might know the blessings of peace and freedom. Our sons, brothers, and fathers also lie in cemeteries and fields from Flanders to Manila under undying testimony to our determination that these rights shall not perish.

We've learned from history that the cause of peace and human freedom is indivisible. Respect for human rights is essential to true peace on Earth. Governments that must answer to their peoples do not launch wars of aggression. That's why the American people cannot close their eyes to abuses of human rights and injustice, whether they occur among friend or adversary or even on our own shores. And we must be particularly appalled that, on the threshold of the 21st Century, when man has made gigantic strides in opening the universe of space and finding cures for dread diseases, millions of our fellow men still suffer the grossest abuses. There are regimes, some friendly, some adversarial, that engage in frequent violations of human rights. There are other regimes which by their very nature are built upon the denial of human rights and the subordination of the individual to the state.

In Afghanistan and Cambodia, for example, alien dictatorships with the support of foreign occupation troops, subject their peoples to unceasing warfare. Today, six years after the Soviet invasion of Afghanistan, up to 120,000 Soviet troops remain. They have slaughtered innocent women and children. They have employed poison gas. And they have loaded toys with small explosives, an attempt to demoralize the people by crippling Afghan children. Some 3.5 million Afghans, fully one-fourth of the pre-war population, have been forced to flee to Pakistan and Iran.

The communist rulers of Vietnam have launched vicious attacks upon Cambodian refugees, refugees who were fleeing a communist regime in Cambodia itself, which led to the deaths of up to one-quarter of the entire Cambodian population.

In Ethiopia, a Marxist government has used famine to punish large segments of its own population. Vice President Bush visited a camp for Ethiopian refugees in the Sudan last March. Men and women of all ages were dying. But the Vice President told me, there's something unbearably painful about seeing the eyes of the children, the huge, sad eyes of starving children. And the peoples and governments of the democracies have responded generously to those pleas with tangible evidence of our concern.

In the Western Hemisphere, where so much progress toward democracy has been made, Cuba stands out as the country where institutionalized totalitarianism has consistently violated the rights of the citizens.

Unfortunately the Sandinista regime in Nicaragua seems determined to embark on the same course.

On three continents we see brave men and women risking their lives in anti-communist battles for freedom. We cannot and will not turn our backs on them. This year the House of Representatives has heeded their call and voted aid to the freedom fighters in Cambodia, Afghanistan, and Nicaragua, and repealed a ban on aid to freedom fighters in Angola.

Elsewhere we have seen considerable progress toward observance of human rights. In El Salvador, Grenada and Honduras freely selected—or elected governments, I should say—represent the best hope of their peoples for the future.

And just over the last weekend, a new civilian president was elected in Guatemala—that's the first time in 15 years. We laud those achievements. But our concern remains for those who are still captive and oppressed. This is where our voices just speak for justice, for the force of world opinion can and does make a differnce.

One of the more tragic cases today is that of the Baha'i, whose leaders are with us today. The government of Iran is engaged in rampant religious persecution, especially against the Baha'is. Since 1979, 198 Baha'is have been put to death, 767 are imprisoned, some 10,000 made homeless, and over 25,000 forced to flee their country. Only the continued world outcry can help bring an end to their suffering.

In South Africa the inhuman policy of apartheid continues. The declaration of a state of emergency has given the police in that country essentially unlimited powers to silence critics of the government. Thousands of South African citizens have been detained without cause—or charge, I should say, and denied even elementary judicial protection. I have said that apartheid is abhorrent, it's time that the government of South Africa took steps to end it, and to reach for compromise and reconciliation to end the turmoil in that strife-torn land.

In Chile and the Philippines too, we've shown our strong concern when our friends deviate from established democratic traditions. In Eastern Europe, the hopes and aspirations of millions of people for religious freedoms, civic rights, remain alive despite years of repression. The Solidarity Labor Union is still outlawed in Poland and the Polish regime has once again moved to restrict the few freedoms that its people still enjoy. In Romania, religious persecution includes the destruction of Bibles, while in Bulgaria, the repression of the Turkish minority and the Islamic faith are witness to the unyielding denial of the basic freedom of speech, assembly, religion in this region.

I addressed human rights in my meeting with General Secretary Gorbachev, and I made it very clear to him that human rights are an abiding concern of the American people. We had a long and confidential discussion and at the conclusion of our meetings, we declared in a joint statement that humanitarian issues would be resolved in a humanitarian spirit. Americans will be watching hopefully to see whether that pledge is observed.

Make no mistake about it, human rights will continue to have a profound effect on the United States-Soviet relationship as a whole, because they are fundamental to our vision of an enduring peace. President Lincoln once called America the last, best hope of man on earth. Mr. Lincoln's remark has special poignancy today when American determination and strength are central to the peace and freedom of the entire democratic world. It is therefore incumbent upon us to work for the expansion of freedom throughout the world.

In this great effort, my friends, I deeply believe we have a good cause for hope. Evidence of the triumph of the ideal of freedom and respect for human rights can be seen in every corner of the globe, and this is because freedom is not only morally right, but practical and beneficial.

Indeed, governments that rest upon the consent of the governed and the rule of law

are more successful in fulfilling their people's aspirations for a better life.

Democratic government and economic freedom have turned a number of small nations into economic giants. It even appears to have roused a giant nation from its economic slumber.

Permit me in closing to return to Mr. Lincoln:

"What defined America, what gave our nation its purpose and mission," he once said, "was something in that Declaration of Independence giving liberty not alone to the people of this country, but hope to the world. It was that which gave promise that in due time, the weights should be lifted from the shoulders of all men."

Well, let us always be true to that distinctly American cause. Let us never cease to work and pray that the weights should be lifted from the shoulders of all men.

Thank you and God bless you, and I will now sign the proclamation designating December 10th as Human Rights Day and December 15th, 1985 as Bill of Rights Day, and the week beginning today is now recognized officially as Human Rights Week. [Applause.]

[The bill is signed.]

Judge NELSON. Mr. President, you have mentioned in your remarks the relentless persecution of the Baha'is in Iran, and though the Mullahs of that country may choose to perpetuate these atrocities, they must know that because of you and the voices that you will encourage to speak out against it, these cannot now be perpetrated, except in the full light of public opinion. For this, we are deeply and eternally grateful.

We are aware also, Mr. President, that this is not a one-dimensional commitment; that in addition, you are normally and spiritually committed to the establishment of the peace we all want among the nations of the world—peace, the most pressing of all issues facing humanity today and for which the Baha'is ardently pray and that this country will help lead the world out of its current predicament.

Therefore, Mr. President, in recognition of your devotion to human rights, the National Spiritual Assembly presents to you on behalf of the 100,000 American Baha'is, a commemorative plate, and in recognition of your continuous commitment to world peace, we have the honor, Mr. President, to transmit to you from the Universal House of Justice, the international governing body of the Baha'is of the world, a statement on world peace.

Thank you, Mr. President. [Applause.]

The PRESIDENT. Thank you very much. Well, thank you very much and thank all of you for what you're doing in this.

I had the pleasure of quoting a statement of Thomas Jefferson to my colleague there in Geneva and he called it after he had heard it, "Very profound," when Thomas Jefferson said, "If the people know all the facts, the people will never make a mistake." So you, the people, and all of us together I think can continue to be a tide that will prove irresistible. Thank you all very much. [Applause.]

ARGUMENT FOR THE WAYS AND MEANS TAX REFORM BILL

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. LAFALCE. Mr. Speaker, I call to the attention of my colleagues an editorial which appeared in the New York Times on December 12 which I believe gives perhaps the most compelling argument for the Ways and Means tax reform bill—the relief from poverty for millions of Americans. The article gets to the heart of the key issue in this debate, that is the fairness question. Few would agree that it is fair to impose Federal income tax on millions of citizens whose incomes fall below the poverty line. The Rostenkowski bill eliminates this perversity and does even more. It focuses on the needs of the middle and low income taxpayers in this country and creates an equitable tax system that we could all be proud of. I urge my colleagues to closely consider the points made in this illuminating editorial. If you care about fairness, if you care about the well-being of millions of individuals living in poverty, and if you care about the average taxpayer in your district, you will come to the same conclusion as have I: the Ways and Means tax bill deserves the support of Congress.

The article follows:

A STUNNING WIN, OR LOSS, FOR THE POOR

Silently, while hundreds of lobbyists have clamored for this loophole or that special interest, an immense victory for millions of poor people has been germinating in the House Ways and Means Committee. Any minute now—assuming the President corrals enough Republican votes to undo yesterday's parliamentary setback—the House will vote on the committee's tax bill. While there are many reasons to vote yes, here is the best one:

This bill would do more to relieve poverty than any social welfare measure in 15 years.

Repubicans should favor it. Not only does their President want it; the bill squares with their approach to social welfare. Democrats—especially those who represent impacted urban districts—should favor it because in the next five years it would funnel $30 billion in tax relief to American families who earn less, many much less, than $20,000.

Instead of continuing to tax people into poverty, this bill would, shrewdly, untax poor people out of it.

When Lyndon Johnson declared war on poverty in 1965, and when Richard Nixon declared war on hunger in 1969, both pursued a strategy of providing services to meet needs. Then the Nixon Administration, with Daniel Patrick Moynihan teaching it that what poor people lack most is money, pressed instead for an income strategy, some form of guaranteed annual income.

But the proposed Family Assistance Plan failed, and, looking back, that was probably a good thing because America found it easy to let financial assistance to the poor be vastly eroded by the soaring inflation of the Ford and Carter years.

The Reagan Administration brought more woe. It purposely slashed social programs. Every bit as bad, it passively accepted the inflation erosion, which has especially hurt people who earn only poverty wages in full-time jobs. Instead of a services strategy or an income strategy, the Government has gradually twisted into a perverse position. Instead of shifting tax dollars to the poor, it has been taking more tax dollars from the poor.

Consider these findings, from the Center on Budget and Policy Priorities, a private research group in Washington:

Between 1979 and 1983, the number of households below the official poverty line (now about $11,000) who had to pay Federal tax tripled.

The taxes of middle- and upper-income Americans have declined since 1981. Meanwhile, however, poor people's taxes as a percentage of income have increased fivefold.

Under current law, a single parent with three children who earns the poverty-level wage must pay $1,424 in Federal taxes. A couple with two children must pay Federal tax even though their income only brings them to a level 20 percent below the poverty line.

Hard as it may be for middle-class citizens to believe, America is now taxing people into poverty, by the millions.

All the recent tax reform proposals would address this perversity. But by far the best remedy is offered by the bill that Representative Dan Rostenkowski of Illinois has coasted through the House Ways and Means Committee. In a stroke it would regain all the ground lost to inflation in recent years. The bill would eliminate Federal taxes for 6.5 million poor households and reduce taxes for millions more, including the blue-collar working poor.

No magic is required to accomplish this miracle; only a sense of fairness. The Rostenkowski bill would restore what inflation has stolen away from three ribs of the tax structure.

One, carefully focused on working poor families with children, is the Earned Income Tax Credit, which has hardly been adjusted for the cost of living since it was instituted in 1975.

The second is the standard deduction, taken by people who don't itemize—which is to say, virtually all low-income Americans. The Rostenkowski bill would increase it by about $1,000 (to $3,840 for a married couple filing jointly) to compensate for past inflation, and would index it to protect against future inflation.

Third, the personal exemption would be increased from $1,130 to $2,000 (but only $1,500 for people who itemize deductions, to avoid a costly windfall for the affluent).

Taken together, these changes would dramatically reduce the tax burden on people struggling to survive: poor, working poor and near-poor. That is, people like that hypothetical woman who is trying to raise three kids by herself on wages that just meet the official poverty level.

Recall that, under current law, she'd owe Federal taxes of $1,424 in 1987. Under the Rostenkowski bill, she'd have to pay only $399. That's family assistance for a working mother, in the form of a tax reduction worth $1,025.

All by itself, such a prospect makes the Rostenkowski bill worth embracing. Any member who claims to represent or care about poverty in America and votes against this tax bill will have a lot of explaining to do to millions like that woman. Her tax saving would be about $85 a month. To her, and her children, that's a fortune.

MIDEAST: HOT AND COLD

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. RAHALL. Mr. Speaker, I would like to bring the attention of my colleagues a column which appeared in the Wednesday, December 11, 1985, edition of The Washington Post. I feel that it merits the scrutiny of every Member of this body as well as anyone who desires peace in the Middle East. Philip Geyelin very accurately sums up the role the United States could play in the peace process—if we desired.

I urge all of my colleagues to support a U.S. role in the peacemaking efforts in the Middle East. A stable, secure Middle East is to the advantage of all of us, and it is a peace which can be achieved through cooperation and support of all concerned parties.

MIDEAST: HOT AND COLD

King Hussein's once brightening hopes for movement in the Arab-Israeli "peace process" are collapsing almost as fast as they were building up, with active U.S. encouragement.

As recently as October, the king was at the White House and Ronald Reagan was praising him for "moving steadily and courageously forward" in search of ways to get the Arab negotiations under way. Even congressional skeptics were modestly upbeat about the king's performance on Capitol Hill. Israeli Prime Minister Shimon Peres was publicly praising Hussein for the "vision" he showed in his United Nations speech.

There was a widespread belief that the prickly issues of international "cover" and appropriate Palestinian representation could be worked out in time for Israeli and some joint Jordanian-Palestinian negotiating team to get to the bargaining table by year's end. Now the year is up and it is nearly impossible to find a valid reason why the outlook is so bleak.

The king has not abandoned his efforts, and Jordanian officials are remarkably generous in the credit they give Peres for his good faith. Not so with the United States; the king is putting it about that the Americans have lost interest—for reasons he cannot fathom.

That's the nub of it: there is no rational or respectable explanation for a diminished U.S. interest. The spoiler in the "peace process" now appears to be nothing more than the vagaries of Ronald Reagan's attention span.

It's true some significant events have occurred since the king's October visit. Even as he was making his case to members of Congress, the Israelis launched an air attack on PLO headquarters in Tunis. But the immediate fear that this would torpedo the "peace process" proved unfounded. Then came the hijacking of the Achille Lauro, with all the diplomated uproar that followed.

There were also the heavy demands of the Geneva summit. Finally, there was a direct U.S.-Jordanian issue involving congressional efforts to shut of U.S. arms sales to King Hussein—a tug of war that was resolved by putting the question off until March.

But the "peace process" appeared to be weathering all these storms and distractions. According to reliable reports, at the end of October Reagan telephoned Hussein and got the impression that the King was prepared to "swallow" the delay in the arms deal. For his part, Hussein thought he had a commitment from Reagan to take up with Mikhail Gorbachev the question of some sort of international "cover" for Israeli-Jordanian negotiations. Hussein thought he had an agreement, as well, that the Reagan administration would be ready after the summit to give the whole Mideast peace effort a strong nudge forward.

According to some accounts, Richard Murphy, assistant secretary of state for the region, drew up a post-summit plan of action for Secretary of State Shultz. The President was to consider it over his Thanksgiving retreat to the California ranch. But somewhere in the bureaucratic machinery the plan got chewed up.

In any case, Murphy's recent call on the King as something of a bust—as the Jordanians see it. Murphy arrived more or less empty-handed. He could report nothing much from the summit because, as it turned out, the Mideast "peace process" was scarcely mentioned.

You could argue there were more than enough hard cases to discuss at Geneva. Besides, Shultz's enthusiasm for bringing the Soviets into the Middle East act is said to be minimal. If that's the case, somebody at least ought to tell Hussein roughly where the "peace process" resides on the administration's list of priorities. You can make a case (a bad one, in my view) for a low priority. Or you can make the right case for a consistent follow-through on one of the few foreign policy issues that bear the stamp of a distinctive Reagan initiative.

But there is no case for blowing hot and cold for no good reason—other than the administration's inability to establish an agenda of serious concerns and to hold to it under the pressure of the inevitable distractions. That is a certain invitation for Hussein to give up on what is, for him, at best a chancy "peace process." It is an incentive as well for him to tend to his kingdom's shaky security by looking for a more dependable source of arms and other support.

RESTRICTIONS ON BELL OPERATING COMPANIES

HON. ED ZSCHAU

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. ZSCHAU. Mr. Speaker, I would like to bring to the attention of my colleagues the broad bipartisan concern which has been expressed recently regarding the provision of telecommunications services in this country. That concern involves the effects on the Bell Operating Companies [BOC's], their customers, and the Nation, which many believe are being caused by the restrictions contained in the Modified Final Judgment [MFJ] which divested the BOC's from American Telephone and Telegraph Company. Of particular concern have been the restrictions which prevent BOC's from providing information services and from manufacturing telecommunications equipment.

These concerns have been surfacing for some time, but they coalesced upon the release, in July of this year, of the National Telecommunications and Information Administration's [NTIA's] report, "Issues in Domestic Telecommunications: Directions for National Policy". Regarding information services, NTIA said:

. . . prompt attention to eliminating the prohibition on "information services" is required. The clearest effect of this prohibition, in too many instances, is to deny the public choices which otherwise would be available. The prohibition is also unfair since it places the Bell Operating Companies at a distinct disadvantage in relationship to AT&T, IBM and its planned affiliate, MCI, and other companies that are increasingly entering the local exchange services market on a selective basis. If AT&T and others are to be allowed to offer customers the convenience of "one-stop shopping" for a diversity of services—and we strongly believe that should be permitted—to unfairly hinder the local telephone company in offering similar service clusters will cause marketplace distortions. Success in the marketplace will be dictated not by superior efficiency, diligence, and foresight, but rather by the happenstance of judicial regulations.

Since NTIA's statement, a series of bipartisan letters and speeches regarding this matter have come to my attention, and I would like to quote from a few of them.

On September 25, 1985, Senator PAUL LAXALT said in a letter to Attorney General Edwin Meese:

I am writing to express my concern about the effects of the restrictions contained in the AT&T consent decree on local service in rural areas of states such as Nevada. I fear that unless some of these restrictions are modified, local rates will continue to rise and universal service will be threatened.

In particular he said:

Nevada Bell could generate additional revenues with which to offset this [lost] subsidy [from long distance service] and to retard the necessary increases in local rates if it were not impeded by federal restrictions on intraLATA information services. In addition, this freedom would help provide multiple service choices for all residential and business customers, particularly smaller and rural ones, which other providers may not find attractive to serve. On the other hand, if Nevada Bell continues to be unable to provide intraLATA services that other companies can provide, it will lose large customers to those other providers. Not only will this prevent customers from receiving the benefits of true competition in those services, but it will result in stranded investment and higher local telephone rates for all subscribers.

The next day, September 26, 1985, my colleague JOHN D. DINGELL in a speech before the Consumer Federation of America lamented the way in which the Justice Department continues "to tie up half the telecommunications resources of this country". Referring to the FCC's Computer Inquiry III Proceeding, he asked:

What good does it do for the FCC to authorize the Bell companies to provide new advanced communications services inside the public networks if the Justice Department insists on prohibiting them from providing these services at all?

Finally, with regard to this Nation's trade deficit he stated:

In effect, the current policy of encouraging companies and customers to place technological enhancements outside the local public network has provided an unnecessary market advantage to foreign suppliers.

Correcting the balance by allowing the Bell companies more freedom to upgrade their networks would help to reduce this advantage.

A few days later, on October 1, 1985, William P. Clark sent a letter to Attorney General Meese saying that:

The restrictions prevent the BOCs from offering new services that more fully utilize their equipment and business expertise to provide an expanded array of services to consumers. Moreover, as pointed out by NTIA, the restrictions unfairly limit the ability of the BOC's to compete with AT&T, IBM/MCI and GTE at a time when the customer base which must support local service is being eroded by those competitors.

On October 29, 1985, my colleague Senator DONALD RIEGLE, Jr. said in a letter to Secretary Baldridge that ". . . since information services in many instances are closely related to local exchange service, relaxation of this restriction should be carefully considered." He explained his concern by stating:

In an era of rapid technological innovation as well as worldwide competition throughout all sectors of the telecommunications industry I think every effort should be made by this Administration to take steps to best serve the needs and demands of the consumer, maintain United States technological superiority, and preserve competition in the telecommunications sector.

I believe that these various goals can best be achieved by allowing our operating telephone companies to enter into businesses that are either closely or functionally related to their basic local telephone business on a timely basis so long as adequate safeguards against anticompetitive practices are provided.

In addition to these letters and speeches, bipartisan legislative activity has begun. On October 8, 1985, House Republican leader, ROBERT MICHEL, introduced H.R. 3522, the "Trade Partnership Act of 1985", which would establish a decisionmaking process involving the FCC and Commerce Department in order to determine whether to allow the BOCs to manufacture telecommunications equipment in the United States. On November 5, 1985, my colleague RON WYDEN introduced a bill, H.R. 3627, which would give State utility commissions the authority to allow BOC's to provide information services and to manufacture telecommunications equipment, so long as revenues from regulated services were prevented from supporting the costs of these new services. And on November 20, 1985, my colleague THOMAS TAUKE introduced a bill, H.R. 3800, which would permit the BOC's to provide information services and to manufacture telecommunications equipment, subject to regulation by the Federal Communications Commission.

Mr. Speaker and fellow members, I believe that the broad bipartisan support for removal of these restrictions, the importance of the issues involved, and the speed with which they are moving forward suggests that each of us should become better educated on these issues.

ROBERT J. BRAUN ON COMPETITION AND EDUCATION VOUCHERS

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. COURTER. Mr. Speaker, in "Special Interests Use Fear To Fight Voucher Plan", Newark Star-Ledger, December 6, 1985, Robert J. Braun focuses on the most important element missing in all Federal programs aimed at improving education opportunities for disadvantaged children: the ability to choose.

The way education is structured in this country it is really only the affluent family who can select a public school through choice of neighborhood or a private school. Under the legislation introduced by Congressman PATRICK SWINDALL, low-income families who qualify for chapter I assistance would be provided with a degree of choice in the form of education vouchers worth the amount of chapter I money they now receive. These vouchers would be put toward the cost of tuition at any education institution they might select, whether it be the current school, a public school in another district or a private school. What is important here is that these families would be given the opportunity to choose the institution which best serves the needs of their children.

As Mr. Braun points out, beyond the benefits to disadvantaged children, this proposal promises to benefit all public and private schools, and the students they educate, by forcing public schools to compete with alternatives. Competition frightens these schools which are fat and happy under the monopoly system currently in place. So, it is up to Congress to force public education into self-improvement by supporting this important program.

SPECIAL INTERESTS USE FEAR TO FIGHT VOUCHER PLAN

The U.S. Department of Education has announced its intention to introduce a voucher bill sometime soon and already the screams of outrage can be heard in the land. All the large educational lobbies have issued press releases denouncing the idea. There's certainly more to come.

Under a voucher plan, parents are subsidized so they can choose schools for their children. The way things are in this country now only the rich are really free to choose, opting either for expensive private schools or expensive homes in communities that lavish resources on their public schools. The poor get to choose what they've always been allowed to choose, the public schools.

The idea of vouchers comes up, cicada-like, every few years. It provokes a lot of noise and then disappears for awhile. Since the taxpayer-fed weight of the entire public school establishment is against vouchers, the idea is never likely to get very far.

A few years ago, Assemblyman Michael Adubato (D-Essex) introduced a voucher bill in the Legislature. It seemed like such a good idea that the bill quickly gained more than enough co-sponsors for passage. In a matter of weeks, however, after all the various educational groups in the state reminded the lawmakers what they were supposed to believe about such matters, the cosponsors gradually removed their names from the bill. Adubato found himself alone with his good idea and gave up the fight.

Why do public school educators oppose vouchers? The question has a one-word answer and the word is competition. If parents could choose where to send their children to school, then all schools would actually have to work to be attractive to parents. The public schools would have to compete with private alternatives.

The chances are pretty good that the public schools would win such competition, but they are too nervous even to try. The people in the schools know that with the existence of viable alternatives open to everyone, and not just the wealthy, the schools would have to continue to work to be successful with kids, pleasant to parents, safe, orderly and so on.

Imagine the parents in Newark and other large cities endowed with the freedom to choose the schools they want their kids to attend. Would the school board in the state's largest city so easily spend hundreds of thousands of dollars on contract buyouts then? Of course not. The board might even be tempted to pay attention to what's going on in the schools for fear parents would vote with their feet.

From time to time, the public school ideologues cite various polls in support of their contention that parents are just overjoyed with the public schools. This is proof, it's said, that the schools are really doing such a bang-up job that criticisms are unwarranted inventions of contentious minds. What these statements overlook is that parents really don't have very much with which to compare. Would the polls look the same if there were viable alternatives to the virtual public school monopoly?

In higher education, colleges and universities are in a state of constant self-review as they compete for a dwindling number of students. Functionaries are reminded to exercise politeness with inquiring students. Weak areas are overhauled or eliminated in order to strengthen the most promising offerings. Competition has brought renewal and thoughtfulness about questions of purpose. It's a matter of survival for higher education which has been operating on a de facto voucher system for years through state and federal grant and loan programs. Vouchers work in higher education and there's little reason to believe they would not work for elementary and secondary schools.

Parents and children would be the big winners under a voucher plan, but they would not, by far, be the only winners. Good, ambitious, achieving educators would be provided with the opportunity to establish and operate their own schools. In limited voucher experiments in California, the biggest supporters were classroom teachers who were finally given the resources and autonomy professionals need to flourish.

Educational lobby groups, however, not only tell legislators what to believe, they also tell their members. Although vouchers could revolutionize the teaching profession, the teacher unions won't tolerate them, so they create all manner of nonsensical fears in the minds of their members. But it

wouldn't be the teachers hurt by vouchers, it would be their unions.

The same is true of other groups, those representing school boards and administrators, for example. The best private schools in New Jersey and the nation have very few administrators, unlike the almost incredibly overadministered public schools. If, under a voucher plan, all schools became quasi-private (or quasi-public), then all those deputy assistant associate superintendents for curriculum facilitation and others of their ilk would have to find something else to do. Like teach, if they remember how.

By the time the self-serving fear mongers are through with the idea, only the most thoughtful and independent members of Congress, or those already planning to retire, will vote for the plan.

It matters little whether the idea might actually improve education. Improving education too often ranks second behind protecting the status quo among those with the power in school politics.

VOYAGER AT URANUS: JANUARY 1986

HON. WYCHE FOWLER, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. FOWLER. Mr. Speaker, in a little more than 1 month, the world will once again look to the U.S. space program for mankind's first close-up glimpse of another world. At 10 a.m. Pacific standard time on January 24 America's Voyager 2 spacecraft will pass within 66,000 miles of the planet Uranus.

The Voyager mission to the seventh planet from the Sun, its rings, and its moons will produce a quantum leap in our knowledge of the Uranus system. It is but another example of the many benefits our space science program has provided us in terms of scientific knowledge, spinoff applications, and national prestige. And we have received these rewards at relatively little cost to the taxpayer: We now expend less than one-fifth of 1 percent of our gross national product for all civilian space activities.

In October I introduced three resolutions aimed at insuring the same kind of strong and affordable space science program as is represented by the Voyager mission. House Concurrent Resolution 204 is concerned with solar and space physics, House Concurrent Resolution 205 covers solar system exploration programs—like Voyager—and House Concurrent Resolution 206 addresses astronomy and astrophysics. The texts of these three proposals appear starting on page 26126 of the October 3 CONGRESSIONAL RECORD. I would welcome additional cosponsorships.

At this time, I would like to submit for the record excerpts from the fine publication, Voyager at Uranus: 1986, prepared by NASA's Jet Propulsion Laboratory.

VOYAGER AT URANUS: 1986

Uranus, the seventh planet from the Sun, is so far from Earth, at a distance of nearly two billion miles, that its discovery in 1781 doubled the size of the known solar system.

The third largest of the planets, Uranus is circled by at least nine charcoal-black rings. Unlike any of the other planets except Pluto, Uranus lies on its side. It may have been at an early stage of formation when it was tipped off its original axis in a violent collision with another body.

As Uranus travels the solar system in this unusual position, one pole remains in sunlight for 42 years while the other is dark. Then, for the next 42 years, the situation is reversed. Currently, its sunlit southern pole is framed at the center of the nine rings, like a giant bull's-eye.

The Voyager 2 spacecraft is now headed toward that distant target, after having completed highly successful investigations of Jupiter in 1979 and Saturn in 1981. Voyager will fly past Uranus at 10 a.m. (PST) on January 24, 1986, passing within 107,000 kilometers (64,500 miles) of the planet's cloudtops. The spacecraft trajectory, which will eventually take it out of the solar system, offers the only opportunity in the foreseeable future to conduct closeup studies of Uranus, and later, Neptune.

Thus, Uranus will be the third planet encountered by the spacecraft in the first nine years of its three-billion-mile path looping through and then out of the solar system.

Because of its remoteness, Uranus is difficult to study, but a surprising amount has been learned through painstaking studies from observatories on Earth. Even so, information about the planet is sparse when compared to what is known of planets nearer to Earth.

The Voyager encounter will be the most intensive study of Uranus ever undertaken, with intitial observations beginning November 4, 1985. The spacecraft's last look at the planet will occur on February 25, 1986. Many of the highest-priority measurements will be obtained on January 24, 1986, during the six hours it takes Voyager to sweep through the Uranian system. In half a day, scientists will gain more knowledge of the planet and its moons, strange ring system, and unique magnetic field than has been learned about Uranus in more than 200 years of astronomical study.

At Uranus, Voyager 2 will:

Determine the rotation rate of the planet.

Profile the structure (pressure and temperature) of the atmosphere and determine the atmospheric composition at depth.

Measure how much sunlight is absorbed by the atmosphere, and how much energy, if any, is emitted from the deep interior.

Map the location of clouds and hazes.

Measure wind speeds at various latitudes in the sunlit, southern hemisphere.

Search for and map auroral activity at both poles.

Listen for planetary radio emissions.

Determine the size, composition and distribution, and reflective properties of ring particles.

Profile the location and eccentricities of the rings.

Search for new rings.

Look for shepherd satellites.

Measure the masses of some or all of the moons.

Obtain the sizes, surface features, and densities of the moons.

Identify geologic processes that have altered the surfaces of the moons and map surface features.

Measure the strength, orientation, and rate of rotation of the magnetic field.

Determine the charged-particle population trapped in the magnetic field.

Locate the position and character of the bowshock—the environment where the solar wind meets the planet's magnetic field.

Determine the structure of the magnetotail.

PRIORITY OBSERVATIONS DURING VOYAGER'S CLOSEST APPROACH

Instrument abbreviations:

IRIS—Infrared Interferometer Spectrometer

PPS—Photopolarimeter

PWS—Plasma Wave

UVS—Ultraviolet Spectrometer

PLS—Plasma Detector

All times are Pacific Standard Time.

Jan. 15 (minus 9 days from closest approach)

Observation: Uranus
Instrument: IRIS
Objective: Measure thermal energy emitted by planet from illuminated hemisphere.

Jan. 23 (approximately −1 day)

Observation: Magnetopause and bowshock crossing
Instrument: Fields and particles instruments
Objective: Search for and characterize edge of magnetic field.

2 p.m. (−20 hours)

Observation: Rings
Instrument: Cameras
Objective: Series of photos for mosaicking.

4 p.m. (−18 hours)

Observation: Umbriel
Instrument: Cameras
Objective: Color photography.

9 p.m. (−13 hours)

Observation: Rings
Instrument: PPS
Objective: Four-hour study of ring characteristics while occulting star (Nunki Sigma Sagittarii).

Jan. 24 12:48 a.m. (−9.2 hours)

Observation: Oberon
Instrument: Cameras
Objective: Highest resolution photos.

1:08 a.m. (−8.9 hours)

Observation: Titania
Instrument: Cameras
Objective: Color photos.

1:40 a.m. (−8.3 hours)

Observation: Sunlit auroral zone
Instrument: UVS
Objective: Highest resolution mosaic of sunside auroral zone.

3:04 a.m. (−6.9 hours)

Observation: Uranus
Instrument: PPS
Objective: Measure solar energy absorbed by Uranus.

3:45 a.m. (−6.3 hours)

Observation: Umbriel
Instrument: Cameras
Objective: Photos at closest approach—365,000 kilometers (226,000 miles).

4:26 a.m. (−5.6 hours)

Observation: Uranus
Instrument: IRIS
Objective: Atmospheric chemical composition at location of radio science occultation point of Earth.

6:16 a.m. (−3.7 hours)

Observation: Titania
Instrument: Cameras
Objective: Highest resolution images.

6:36 a.m. (−3.4 hours)

Observation: Ariel

Instrument: Cameras
Objective: Color photos.

7:01 a.m. (−3 hours)

Observation: Miranda
Instrument: Cameras
Objective: Color photos.

7:14 a.m. (−2.8 hours)

Observation: Uranus
Instrument: PPS
Objective: Measure solar energy absorbed by Uranus.

8:09 a.m. (−1.9 hours)

Observation: Ariel
Instrument: Cameras
Objective: Highest resolution photos.

8:37 a.m. (−1.4 hours)

Observation: Miranda
Instrument: Cameras
Objective: Highest resolution photos.

8:54 a.m. (−1.1 hours)

Observation: Miranda
Instrument: Radio
Objective: Determine Miranda's mass.

9:08 a.m. (−0.9 hours)

Observation: Rings
Instrument: Cameras
Objective: Search for moons embedded in rings at ring-plane crossing.9

9:15 a.m. (−0.7 hours)

Observations: Rings
Instrument: PWS
Objective: Ring crossing: search for ring particles near Miranda's orbit.

also:
Observation: Magnetic equatorial plane crossing
Instrument: Fields and particles instruments
Objective: Observe expected maximum in magnetic field, plasma torus, and trapped radiation.

9:18 a.m. (−0.7 hours)

Observation: Uranus
Instrument: UVS
Objective: Study composition of sunlit polar atomsphere while focusing on star Algenib (Gamma Pegasi).

9:38 a.m. (−0.4 hours)

Observation: Uranus
Instrument: PPS
Objective: Measure solar energy absorbed by Uranus.

10 a.m. pst, January 24, 1986: Uranus Closest Approach—107,000 kilometers (66,000 miles)

10:14 a.m. (+0.2 hours after closed approach)

Observation: Uranus
Instrument: UVS
Objective: study composition of dark polar atmosphere while occulting star Algenib (Gamma Pegasi).

10:26 a.m. (+0.4 hours)

Observation: Rings
Instrument: PPS
Objective: Study of ring characteristics while occulting Algol (Beta Persel).

11:22 a.m. (+1.4 hours)

Observation: Rings
Instrument: PPS
Objective: Ring occultation of Beta Persei.

11:44 a.m. (+1.7 hours)

Observation: Rings
Instrument: Radio
Objective: Occultation of radio signal by rings.

12:06 p.m. (+2.1 hours)

Observation: Uranus
Instrument: UVS
Objective: Atmospheric studies while occulting Sun.

12:36 p.m. (+2.6 hours)

Observation: Uranus
Instrument: Radio
Objective: Atmospheric studies; occultation of radio signal by planet.

2:35 p.m. (+4.6 hours)

Observation: Rings
Instrument: Radio
Objective: Occultation of radio signal by rings.

7:42 p.m. (+9.7 hours)

Observation: Auroal zone on dark side of planet.
Instrument: UVS
Objective: Highest resolution mosaic of darkside auroral zone.

9:27 p.m. (+11.5 hours)

Observation: Uranus
Instrument: PPS
Objective: Measure solar energy absorbed by Uranus.

Jan. 25 3:55 a.m. (+17.9 hours)

Observation: Uranus
Instrument: PPS
Objective: Measure solar energy absorbed by Uranus.

6:00 a.m. (+20 hours)

Observation: Rings
Instrument: Cameras
Objective: Series of photos for mosaicking.

Jan. 28 (approximately +4 days)

Observation: Magnetopause
Instrument: fields and particles experiments
Objective: Measure environment as spacecraft leaves magnetoltail.

Feb. 2 (+9 days)

Observation: Uranus
Instrument: IRIS
Objective: Measure thermal energy emitted by planet from dark hemisphere.

RURAL CHARM BLOWN AWAY BY FARM CRISIS

HON. GERRY SIKORSKI

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. SIKORSKI. Mr. Speaker, this moving story by John Camp, which recently appeared in the St. Paul Pioneer Press-Dispatch, eloquently illustrates the tragic consequences of the crisis in rural America. Farmers, who have a long and proud history of self-sufficiency and independence, are particularly vulnerable to the stress that comes from being helpless. They are working harder than they've ever worked, and still having to give up farms that have been in their families for generations. When this happens, they don't just lost their job—they lose their way of life and their sense of self-worth.

Farmers have had to deal with natural disasters all their lives. They have handled floods, tornadoes, droughts, and fires. What they can't handle—shouldn't have to handle—is Government policy that prevents them from getting the prices they deserve for their crops. They are a hard-working people, the backbone of this great Nation, and they feel like they're failing. Most of them haven't yet realized the truth—that their Government has failed them.

RURAL CHARM BLOWN AWAY BY FARM CRISIS

The things I remember about Hills, Iowa, are the apple trees, the grapes and the wine, the pigs, the city dump and a snowfall so light and beautiful that my wife and I put a snowsuit on our year-old son, and we all went out and watched the flakes come down through the street lights.

We lived in a little white clapboard house, rented with money from the GI Bill while I finished a master's degree at the University of Iowa. The university was nine miles away down a tar road that ran over an iron bridge out the backside of town past the city dump where country boys hunted rats with 22s—and into Iowa City.

The Hills house came with a garden plot, two or three apple trees and a grape arbor. Susan put up apple sauce and made pies and planted a big garden in the spring. During the year, some pigs escaped from a nearby farm and ran through our yard, producing the kind of scene not encountered in your everyday suburb.

The farmer who owned the house had said we could have half the grapes from the arbor, he'd use his half to make wine. That sounded fine to me. I got a friend with a pickup truck, drove down to the Amana Colonies and bought an oak barrel (used only once, to make Jim Beam bourbon), and ran up 55 gallons of wine.

My friend and I were a little naive about winemaking. We actually took more care than most amateurs do. He and his girlfriend, and Susan and I picked boxes full of grapes and carefully crushed and strained them before we poured the juice in the barrel. Most farmers, we found, simply squashed the grapes and threw the whole carcass into the barrel.

What they got was a strong but rough red wine. What we got was a smooth, somewhat nutty white wine. The farmer couldn't believe it—it may have been the only thing a college kid ever did that impressed him. I was more than happy to unload a few gallons on the farmer, and he was more than happy to get it; he was more than happy to come back for more, actually.

The school year itself was tumultuous. With an uncommon piece of luck, I thought, I'd gotten an appointment as a full-time adviser and employee of the student newspaper. Shortly after my appointment, the paper went through the annual year-end change of staff.

The new staff was made up of political radicals and radical feminists (not necessarily the same thing.) I got along fine with the staff and even received a thorough and continuing grounding in feminist theory, free of charge.

While I was getting along fine, the paper's relationship with outsiders was not so good. It was, in fact, one long war. It got so hot that television stations would come to our board of directors meetings and film the fireworks.

With the war in Iowa City, Hills was a good place to hide out. It was quiet. Peaceful. Bucolic. Fireflies and apple trees.

On Monday last, a Hills farmer shot and killed his wife, drove into Hills and shot the bank president to death, then went to a neighbor's farm, where he killed a neighbor with whom he'd had a disagreement over land rentals.

Perhaps you'd have had to live in Hills to understand exactly how outrageous these murders are. You would have expected the pyramids to fall down before this could happen. There was simply no violence in that countryside—everything was too contained. The psychological and social fabric was so dense with family, friends, and neighbors with shared schools and political groups, that pathological impulses simply did not occur.

Or if they did—and I suppose they do everywhere—they were somehow controlled, or channeled. It's hard to explain, exactly, but there was no safer place in the world than Hills, Iowa. It was the eye of the universe.

But things have changed, haven't they?

And not just in Hills, Iowa. Minnesota bankers have been murdered. Minnesota farmers commit suicide. Minnesota farm kids confront problems they can't deal with. The stress out in the countryside is enormous and growing.

The nation has the resources to deal with the problem, but, frankly, the national leadership doesn't seem interested. The Reagan administration and the old line Senate conservatives take care of their farm friends—millions for tobacco, but foot-dragging on farm credit—and let the small guys go.

I'm not optimistic. Given the characteristic insensitivity of the administration, I think we'll see more Hills. The countryside will get bloodier long before things get better.

APPRECIATION OF MS. PATRICIA A. CARRAGHER

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. DYMALLY. Mr. Speaker, for the past 4 months my staff and I have had the priviledge of working with Ms. Patricia A. Carragher during her internship. I wish to take this opportunity to express our appreciation of her contributions to my office and constituents of the 31st Congressional District of California.

Ms. Carragher is a third-year student at American University, Washington, DC. She was selected as one of six honored students from that institution to participate in the American University-Leeds University Congressional/Parliamentary Program. This special year-long program involves six American students and six British students from Leeds University. They are required to serve internships during the fall semester with Members of the United States Congress, and spring semester with Members of the British Parliament. Ms. Carragher selected my office for the first half of her program, and I am very proud to have provided her this opportunity.

In her internship, Ms. Carragher covered my membership on the House Foreign Affairs Subcommittee on Western Hemisphere Affairs. Her interest in this region and understanding of our foreign policy in those countries contributed significantly to meeting my responsibilities on that subcommittee. In addition, Ms. Carragher assisted me and my staff greatly in responding to my constituents' questions and problems. She answered questions about both domestic and international matters. She displayed competence and ability, both essential qualities of a good leader.

Mr. Speaker, from September to December, I have witnessed the work of a product of our educational system, and am pleased the British will have a chance to appreciate her. I say this with a satisfied smile, a smile of vindication for education was the sole reason for my leaving Trinidad—a former British colony—and migrating to the United States. The British system failed me in its college entrance examination. I came to the United States so I could continue my education. Well, here I am in Congress and here goes Ms. Carragher to the Parliament. As they say on the streets of Compton, "Take That."

Mr. Speaker, I invite my colleagues to join me and my staff in thanking Ms. Carragher for her service in Congress, and wishing her the best in London. Thank you Patricia and best wishes.

EAGLE AWARD TO CHRISTOPHER AND KURT EVANS

HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. GEKAS. Mr. Speaker, I would like to take this time to express my congratulations to two young men from Lewisburg, PA, who will receive the Boy Scout Eagle Award this Sunday in Winfield, PA. This event is always a special time for the family and friends of a man who receives such an award because it is a recognition of his dedication to his community and country. This presentation ceremony on December 15 will have an added significance because it is being awarded to twin brothers, Christopher Joseph and Kurt Joseph Evans.

Both of these men have been involved in the Scouting Program since 1976 when they joined the Bobcat Cub Scout Pack 3509 in Lewisburg. Since their start in Cub Scouts and through Webelos and Boy Scouts they have participated in hiking and camping expeditions including the 1977 National Scout Jamboree at Moraine State Park and the 1981 National Scout Jamboree at Camp A.P. Hill. In 1984 they were part of the Susquehanna Council contingent to the Boy Scouts of America High Adventure Sea Base in the Florida Keys.

Christopher and Kurt are both active members of Explorer Post 2583, specializing in archery and have competed and have won awards in archery. Kurt is currently president of the Explorer Post while his brother Christopher is second vice president.

In working toward their Eagle Scout Award both worked on wilderness trails. Kurt rebuilt the "Old Boundary Trail" in the Raymond Winter State Park including the clearance of the trail from Coppermill Road to Bake Oven Trail, a distance of three-quarters of a mile, and building two foot bridges and a corduroy road. Christopher blazed a 2-mile trail from Old Shingle Road north over the north branch of Buffalo Creek and Panther Run in Bald Eagle Forest and Hook Natural Area. This also included building two foot bridges as well as erosion control and blazing the trail.

These two men have shown excellent service and leadership capabilities in their work with the Scouts and should be congratulated for earning this very distinguished achievement. I wish them good luck and great success in the future.

A TRIBUTE TO BELLE MORRISON ON HER 100TH BIRTHDAY

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. LEVINE of California. Mr. Speaker, it is my pleasure to rise today in honor of Belle Morrison, a constitutent of mine who will celebrate the joyous occasion of her 100th birthday on December 24, 1985.

Belle was born in Russia and lived there for 5 years before her family immigrated to the United States. Her family originally settled in Philadelphia, but she lived most of her life in Chicago where she was quite active in community affairs. Belle and her late husband, William, were blessed with three children, four grandchildren, and eight great-grandchildren.

Belle has lived in California for more than 35 years and currently resides in Santa Monica. One of her grandchildren said that one of her secrets to long life has been her favorite motto: "Please don't ask me not to worry, because you know the things I worry about never come true." Whatever Belle's secret is she's obviously doing something right. Belle still enjoys good health and will soon join her family in celebrating this wonderful milestone at a big party planned in her honor.

Mr. Speaker, I ask the my colleagues in the House of Representatives join me in sending birthday greetings to this extraordinary American and that they wish her many more years of continued health and happiness.

FLAWED VERSION OF TAX REFORM

HON. THOMAS F. HARTNETT

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. HARTNETT. Mr. Speaker, approximately 1 year ago, President Reagan suggested that Congress reform the Federal Tax Code in the name of simplicity, fairness, and economic growth. Our current Tax Code is so immense and complicated that the only people who fully approve of it are tax consultants. Therefore, from the very beginning, I have been a strong advo-

cate of achieving the President's tax reform goals. The House Committee on Ways and Means has produced a bill that in the opinion of a majority of the members of that committee fulfills these goals. It does not.

The Ways and Means proposal is 1,379 pages of legalese aimed at explaining the 1,602 separate sections of the bill. That is not simplification. The next goal that the authors of this bill claim to have satisfied is fairness. Of course, fairness is a very subjective term; but, it seems most inappropriate for legislation which imposes double taxation on the pensions of 19 million Americans, makes unemployment compensation fully taxable, and discourages business modernization. In fact, legislation that impairs the ability of corporate America to modernize will force companies to lay off employees in an effort to keep prices down and remain competitive. As such, this bill certainly fails to generate economic growth. I find it hard to believe that the taxpayers of this country will care if their marginal tax rates have been lowered slightly once they have lost their jobs.

Obviously, Congress has failed to develop a Tax Code that achieves the goals of simplicity, fairness, and economic growth. However, some people have suggested that Members of the House should vote for this flawed version of tax reform and rely on the Senate to correct the existing inequities. Contrary to the logic of those advocating this political philosophy, I have always followed the thinking of a wise man who said, "When you first see a rattlesnake, kill it."

DISTINGUISHED PUBLIC SERVANT: SYLVESTER L. ACKLEY

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mrs. HOLT. Mr. Speaker, one of the Department of the Air Force's most distinguished officials plans to retire on December 31, 1985. Sylvester L. Ackley, a Government employee for over 38 years, leaves the Office of the Secretary of the Air Force, Legislative Liaison, as the Deputy Chief of Air Operations.

"Ack" Ackley joined the Army Air Corps in 1943 as a B-24 radio operator and gunner. Serving on 28 combat missions over southern Germany, Czechoslovakia, Hungary, Romania, and Italy, he was shot down and crash landed twice without injury. Reentering the newly formed Air Force in 1950, he continued as a radio operator and then as an air operations supervisor serving in several locations including West Germany as an inspector general team member. The Air Force assigned "Ack" to the Secretary of the Air Force, Legislative Liaison, as an air operations superintendent in 1959. After serving in that position for 10 years, he retired from active duty as a chief master sergeant. The Air Force, recognizing the truly outstanding contributions of Chief Ackley, hired him as a civilian employee to continue to manage the operations office.

During these past 16 years as the Deputy Chief of Air Operations, "Ack" has set standards that, I believe, will never be surpassed. The true dedication to "doing it right," the absolute insistence on honesty and integrity, and the patience under extreme daily pressure are the standards that Mr. Ackley leaves for all those who follow.

I join with many of my colleagues who have benefited from the direct professional support of Mr. Ackley and wish him and his wife, Marilyn, the very best in their retirement.

Mr. Speaker, I rise today to pay tribute to Mr. Ackley for his unselfish dedication to duty and his outstanding performance as a Government employee.

He is truly a great American.

BUDGET CROSSROADS: IT'S TIME FOR ACTION

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. BEDELL. Mr. Speaker, yesterday, I joined a bipartisan majority in the House and Senate in voting for the compromise version of House Joint Resolution 372, legislation to reform the budget process and force hard decisions aimed at balancing the budget by 1991. The President has signed this historic legislation into law. This was one of the most difficult votes I have cast since coming to Congress, and I would like to explain why I support this law.

We have come to a crossroads on the Federal budget. Yesterday, we had two choices—to continue under the old budget process, or to adopt this reform law. I do not like this law, but I am frustrated in the extreme with the failures of the old process.

We must act decisively to force a change, if Congress is to make good to the American people on our promise to bring Federal spending back under control. I believe that the bipartisan compromise we enacted yesterday is the best alternative to current law that is likely to win agreement from a majority in Congress. By no means will this law end our budget crisis. My hope is that it will begin a national debate, and force a resolution of our deficit problem. For this reason, I supported its enactment, and will do my best to see that its promise is realized.

The old road is familiar and leads only to dangerously higher deficits and frustrating political deadlock between Congress and the President. We have continued on it this long only because the House of Representatives, the Senate and the President have not been able to agree on an alternative. Meanwhile, in the last 15 years, the national debt has doubled. About 15 percent of our budget—$142 billion this year—now goes just to pay interest on the national debt, and continued deficits will mean ever-spiraling interest costs. By continuing to borrow, we make ourselves poorer today and we leave an economic time bomb for our children.

The farm economy has been devastated by two consequences of the budget deficit: high interest rates and the overvalued dollar. The former has added heavily to the cost of credit and debt; the latter has made our grain uncompetitive in world markets. The repercussions have been felt by everyone in my district. Farmers are forced to leave their land, workers are losing their jobs as factories slow down their operations and rural communities are suffering as businesses close and people move out.

This law will help us put our fiscal affairs back in order. It will put new teeth in the budget process. It will force action where none has been forthcoming because Congress and the President have been locked in disagreement. Essentially, the law says that, if Congress and the President do not enact through the normal process a responsible budget, spending is automatically cut according to a predetermined formula. The hope is that the mere threat of the automatic cuts will be so terrible that Congress and the President will instead agree through the normal process on a responsible budget. The law's real teeth are its mandatory deficit ceilings, which begin at $172 billion this year and decline by about $30 billion each year to zero in 1991. If total spending proposed in the budget for any year exceeds the ceiling, spending will be automatically cut enough to bring it under the ceiling. Generally, an equal percentage must be cut from each program, project or activity.

If it sounds simple, it is not. Rather, it is one of the most sweeping and complicated pieces of legislation Congress has produced since I came here 11 years ago. Because it changes how—or if—the Government spends the taxpayer's money, this bill will affect every Government program, from our national defense to our children's education.

The original version of this bill that was proposed and passed in the Senate was the worst kind of legislative rush job. As the majority leader of the Senate said in pushing for a quick vote, "The longer something sits around here, the staler it gets. People start reading it." Many Senators voted on the bill without reading or understanding the bill's fine print, so the bill was deeply flawed and unfair. First, it would have delayed significant deficit reductions until after the next election. Second, it would have devastated many domestic programs, but left much of the military untouched. Finally, it would have given the President too much discretion over cuts that are supposed to be equal and automatic.

The House then passed an alternative version that was better but still contained many problems. For the last month, negotiators for the House and Senate have worked very hard to resolve these problems and differences and to agree on a responsible and fair alternative to current law. While still not perfect, the compromise version is a vast improvement over the origi-

nal proposal, and the best alternative to current law that could win broad support.

First, the compromise version begins serious deficit reduction this year, before the next election. The original Senate version would have allowed a $193 billion deficit this year, but the compromise would begin spending cuts if the deficit exceeds $171 billion. The House version would have set the ceiling even lower, at $161 billion.

Second, the compromise version ensures that defense spending will bear 50 percent of any automatic budget cuts while domestic spending bears the other half. Each type of spending will then take a share of the cuts equal to its share of total spending. Within the defense spending category, the compromise applies a formula that will cut each part of the defense budget equally. The Defense Department does not like this compromise, which must mean that this law is tough stuff. The original Senate version would have preserved defense's "sacred cow" status by making half the cuts in Government programs with COLA's and half the cuts in all other spending—including defense.

Finally, the compromise version greatly reduces the opportunity for political manipulation of the automatic cut process, and ensures that such cuts would be fairly made. Under the law, the U.S. General Accounting Office has final authority to estimate the deficit, calculate the necessary cuts under the formulas, and list the specific cuts to be made in each program. The General Accounting Office is a nonpartisan office whose director is appointed for a 15-year term, and is responsible to both the President and Congress.

The compromise exempts interest on the national debt, Social Security, railroad retirement, veterans' pensions and compensation, State-funded unemployment compensation, civilian and military pay rates, and six other low-income programs from the automatic cuts. Retirement and disability programs with COLA's could not be cut by more than the amount of the COLA, and cuts in veterans' health care and Medicare are limited to 2 percent. Medicare cuts would be made only in payments to health care providers.

I am pleased that, under the compromise, automatic cuts in agricultural price support payments could only be made in contracts entered into after the cuts are effective, and uniform reductions would have to be made in all payments for a particular crop—even if this means delaying the cuts until the next crop year.

Working within the current budget system, I have supported several deficit reduction initiatives. I have supported an across-the-board budget freeze with no increases for inflation. I have voted for cuts in many programs I believe in to bring their spending down to a freeze level. Earlier this year, I voted against the final House-Senate compromise budget resolution for this year because it allowed a $10 billion increase for defense and did not reduce deficits enough. When the House considered this year's military spending bill, I voted twice this year against increasing military spending when other programs were being frozen or cut. I am a cosponsor of stiff minimum tax legislation that would ensure that every individual and corporation pays a fair share of taxes.

I have stood up against waste and abuse. Last year, I took on the Defense Department and defense contractors over the $435 hammer, and succeeded in passing two important laws that could save $8 billion in military spare parts costs. Since coming to Congress 11 years ago, I have bucked congressional traditions and successfully fought to stop wasteful water project boondoggles like the $1.6 billion Garrison diversion in Nebraska, and the $200 million Oahe project in South Dakota. Three years ago, I took on some big oil companies and succeeded in closing two of their tax loopholes worth hundreds of millions of dollars. But more must be done, and I believe this law deserves a try.

I have concerns about how the law's automatic cuts might affect agriculture, education, local government programs and many other very important programs that I have fought hard for in the past. Unfortunately, these worthy programs have been losers under the old system. They have already taken more than their share of budget cuts in the last few years, while defense contractors win huge increases for wasteful contracts, and sometimes for weapons that do not work or make us safer. This law may bring some fairness to the budget process, because defense and nondefense programs would each be asked to take half of any automatic cuts.

In every one of the two dozen open door meetings I have held in Iowa this year, my people have told me that they are willing to accept an across-the-board freeze, and even take their fair share of cuts, if everyone else will too. Now a bipartisan majority in Congress has agreed on this law and committed itself to achieving a balanced budget in a strict but fair manner.

We need President Reagan's help, but his real intentions are still not clear. Even after he had endorsed this legislation, the President publicly said that Defense spending will continue to grow by 3 percent more than inflation in the next few years. If this law is taken at all seriously, then that level of increases for Defense is a fantasy. It is essential to accept that we will have only a limited number of bucks, and concentrate on getting more bang for our buck. There are still enormous amounts of money in the Defense that could be saved by increasing competition in military purchasing and canceling weapons that we do not need.

By signing the bill, President Reagan has signed an agreement to abide by this law and work with us toward the goal of a balanced budget. I look forward to working with him.

TO INCREASE BANKRUPTCY JUDGES IN SOUTH TEXAS

HON. SOLOMON P. ORTIZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. ORTIZ. Mr. Speaker, I rise today in support of legislation to increase the number of bankruptcy judges in the Southern Judicial District of Texas from three to six. This legislation is needed to rectify the serious shortage of bankruptcy judges in south Texas, and thus ease the burden on the economically distressed.

South Texas is being decimated by a wave of bankruptcies which has not been seen since the Great Depression half a century ago. Business bankruptcies in this judicial district are up 41.8 percent over the already high levels of a year ago. The total number of bankruptcies in the district are up 15.8 percent over 1984. Worst of all, the pace of bankruptcies is on the increase.

Mr. Speaker, the epidemic of bankruptcies currently overwhelming the south Texas region has many causes: The depressed energy industry, a crisis on farms, job losses, flat real estate sales and slow development of land and housing. Bankruptcy courts are backlogged as 3 Federal judges, out of 232 nationally, try to address the needs of one of the more economically struggling areas of the country. Currently there is just one bankruptcy judge for every 6,000 cases to be heard.

Furthermore, the Administrative Office of the U.S. Courts has studied the situation and recommended that the south Texas Judicial District receive three additional bankruptcy judges. I have been in close contact with Federal judges and State officials in the area who understand the situation and support this remedy to a serious situation.

INTERNATIONAL HUMAN RIGHTS WEEK

HON. DOUGLAS H. BOSCO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. BOSCO. Mr. Speaker, the week beginning December 10 is traditionally recognized by many United Nations countries as International Human Rights Week. This week has been set aside to observe the unanimous adoption of the Universal Declaration of Human Rights by the U.N. General Assembly on December 10, 1948. The document guarantees to all people fundamental human rights, including the right to the freedoms of religious expression, conscience, and emigration. Mr. Speaker, as we commemorate the 37th anniversary of this landmark agreement and recommit ourselves to the principle of human rights, we must not forget the victims of human rights abuses around the world. Rather, we must intensify our efforts to ensure that all

people are accorded these basic human rights.

Of particular concern to me is the plight of Soviet Jews whose mistreatment and persecution by Soviet authorities has been well documented. In the U.S.S.R., Jews are denied the right to worship free from the threat of reprisal. Yet, at the same time they are denied the right to emigrate to Israel or other countries where they might live a full Jewish life. In the Soviet Union, Jews that have applied for exit visas but have been turned down are referred to as refusniks. As a participant in the Congressional Call to Conscience, I am proud to have adopted two brave young refusniks, Pavel Astrakhan and Alexander Kushnir. I recently received a brief update on Alexander Kushnir which I would like to share with my colleagues.

Since 1976, Alexander, a leading activist in the Jewish refusnik community of Odessa, has been trying to emigrate to Israel to join his family. He has been turned down for an exit visa six times. By profession, Kushnir is a construction engineer but since his first application he has been unable to find work in his field. According to this latest report, Alexander has been working as a night watchman and is plagued by severe back problems. In addition, this report indicates that Alexander is under constant surveillance and has been told by Soviet authorities to stop giving out information and meeting with tourists. Moreover, the KGB is pressuring him to denounce Israel on Soviet TV and radio.

Unfortunately, Alexander Kushnir's predicament is not uncommon in the Soviet Union. Thousands of Jewish men and women there struggle against religious repression while awaiting permission to leave. As we observe International Human Rights Week, it is important that we remember individuals around the world like Alexander Kushnir who are not granted such liberties, and we must continue to push for actions to alleviate human rights abuses.

BALANCING THE BUDGET—THE HARD CHOICES ARE YET TO COME

HON. JIM ROSS LIGHTFOOT

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. LIGHTFOOT. Mr. Speaker, this week Congress took an historic leap when it passed the conference report to House Joint Resolution 372, otherwise known as the Gramm-Rudman-Hollings Emergency Deficit Reduction Act. It is serious medicine for a serious disease. Although I do not take this action lightly, I am proud, nonetheless, to have played a part in restoring fiscal sanity to our country.

Why is it an emergency bill? With interest compounding on our $2 trillion public debt, and with annual deficits of nearly $200 billion, this country cannot survive. Government deficits hurt every American—those in farming are keenly aware of the deficit-induced high interest rates and trade deficit. We have been spending our children into financial slavery by borrowing to fund programs which we cannot afford, and never in history have tax increases prevented Government expenditures from rising. Our only answer is to cut spending—quickly and radically.

Of course, Gramm-Rudman calls for harsh steps. Many Government programs will be affected. Most Americans realize how serious our Nation's financial problems are, however. I took on as a top priority the task of working to reduce Government deficits when I first came to Congress, and I will not avoid this task because it is difficult. The measure requires 50 percent of all cuts to come first from the Defense Department with the other 50 percent coming from all other agencies, excluding several poverty programs.

Some protections have been built into the budget-cutting measure. For example, agricultural commodity contracts already signed cannot be broken. Also, the Secretary of Agriculture must abide by the provisions of the farm bill as passed by Congress. As for public assistance and poverty programs, no program can be entirely eliminated and certain programs are protected from more than a 1–2 percent cut below baseline spending. Nonetheless, Gramm-Rudman will help us to begin making the difficult fiscal decisions required, and I see no higher priority as a U.S. Representative.

In fact, one of the first pieces of legislation I cosponsored upon taking office was a measure to enact a balanced budget amendment to the U.S. Constitution. Unfortunately, this measure has been around Congress for a number of years with little chance of success. When Gramm-Rudman was proposed, it was the first real opportunity to achieve a balanced budget, therefore I became a cosponsor of the proposal.

Furthermore, I have voted against most spending bills considered in the House of Representatives and will continue doing so until spending is under control.

While the next few years will be difficult ones, the choices we will be forced to make are necessary. I look forward to the opportunity to continue in this effort to restore our Nation's economic health, and I am pleased my colleagues have helped to get the process started.

POLYGRAPH TESTING AS 20TH CENTURY WITCHCRAFT

HON. STEPHEN L. NEAL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. NEAL. Mr. Speaker, in conjunction with today's debate on H.R. 1524, the Employees Polygraph Protection Act, I am inserting into the CONGRESSIONAL RECORD an article about this issue that appeared in a recent edition of the Washington Post.

Mr. Speaker, the polygraph is not a lie detector. The polygraph machine detects stress but it cannot detect whether the stress was caused by anxiety, fear, anger, nervousness or some other emotion. It is totally up to the examiner, therefore, to interpret the results of the test. In a recent investigation into the validity of the polygraph by the House Government Operations Committee, it was determined that polygraph tests cannot be trusted to reveal an individual's guilt or innocence. The committee's findings were supported by a 1983 study conducted by the Congressional Office of Technology Assessment, which concluded that, "The available research evidence does not establish the scientific validity of the polygraph test for personnel security screening," and further that, the polygraph can be fooled by the use of drugs, physical movement, and other techniques.

It is dangerous, Mr. Speaker, to rely on so-called lie detectors for important decisions, particularly for safeguarding information and materials important to our national security. The upshot of the administration's hasty policy of relying more heavily on polygraph machines may be that some innocent people will be denied sensitive jobs, and forever branded untrustworthy, and sophisticated spies and crooks may gain access to government secrets. We know that the professional criminal or the enemy agent familiar with polygraphs, for example, can beat these machines.

The use of polygraph testing by private companies to screen employees, Mr. Speaker, has increased dramatically in recent years. The evidence would indicate, however, that private firms that use polygraph testing may be doing their business more harm than good by placing faith in unreliable machines.

Mr. Speaker, the indiscriminate use of polygraph testing on employees must also be viewed in the context of constitutional protection of individual rights of privacy and presumption of innocence.

The fundamental principal of law in this country, that everyone is considered innocent until proven guilty, is violated by "lie detector tests, which are required to prove one's innocence. And the widespread use of "lie detectors" for employee screening is a massive invasion of privacy that may eventually extend to every level of society. Employee screening could eventually lead to screening of consumers before being allowed to use a credit card or write a check. One can even envision being screened before being permitted to enter a store.

Congress has been investigating the use of polygraph testing for over 20 years. The late Senator Sam Ervin, who as chairman of the Senate Judiciary Committee conducted his own hearings on the subject, concluded the polygraph is nothing more than "20th Century witchcraft."

Mr. Speaker, the growing use of the polygraph by government and business is unwarranted and a mistake. I urge passage of this legislation.

PROPOSED LIE-DETECTOR BAN SPLITS BUSINESS COMMUNITY

(By Morton Mintz)

Sweeping legislation that would prohibit most private employers from using polygraphs or any other kind of so-called lie detectors appears headed for congressional passage, carried along by strong bipartisan support.

Although the bill has encountered some opposition from employers who favor using the tests, the business community is sharply divided about the highly controversial devices—a rift that increases the bill's chances of passage.

On the House side, a bill sponsored by Rep. Pat Williams (D-Mont.), chairman of the House Education and Labor subcommittee on employment opportunities, has been approved by the subcommittee and the full committee without dissent.

On the Senate side, two powerful sponsors who often are adversaries, Senate Labor and Human Resources Committee Chairman Orrin G. Hatch (R-Utah) and ranking Democrat Sen. Edward M. Kennedy (D-Mass.), are backing the bill.

Some business interests, including the Jewelers of America, the Association of General Merchandise Chains, the U.S. Chamber of Commerce and some drugstore chains, fiercely oppose the legislation.

No major corporation has taken a leadership role in support of the legislation. But many of them, including International Business Machines Corps., never use polygraphs, even where state laws permit the machines and union contracts do not bar them. Other companies, including such major employers as the top national fast-food chains and Safeway Stores Inc., seldom or rarely use polygraphs—and then only for investigations of thefts or other offenses.

Still others who oppose the proposed legislation use the devices for investigations and for pre-employment screening—by far the most hotly disputed use of the machines. Corporations that favor using the machines say the devices are critical to efforts to protect against employe dishonesty.

Zale Corp., a leading owner of jewelry stores, supported their use in a statement presented at a hearing on the proposed legislation. "It is the policy of Zale Corp. to polygraph all of its employees who occupy sensitive positions, [including the] chairman of the board . . ." the statement said. "We feel that, as a result of the availability and use of the polygraph, the Zale Corp. was able to recover money and merchandise during the past four years valued at just under $2 million."

Polygraph use has been an issue on Capitol Hill for more than 20 years. During that time, a strongly bipartisan base of support for restrictions has been growing, nurtured by a 1983 Office of Technology Assessment research review and evaluation and by the AFL-CIO, mainly through its Food & Allied Services Trades Department, which has lobbied against the devices.

At the heart of the debate is the question of how accurate and reliable the devices are, particularly when used in pre-employment screening. The OTA report concluded that, "While there is some evidence for the validity of polygraph testing as an adjunct to criminal investigations, there is very little research or scientific evidence to establish polygraph-test validity in screening situations,* * *."

* * * An OTA estimate of a 5 percent rate of error in analysis of test results, Senate sponsor Hatch said that, "Even under the best of circumstances, some 50,000 workers may have their employment opportunities terminated, curtailed or blocked each year, due not to their own work record, but due to employer reliance on the results of invalid polygraph tests."

Not everyone shares that assessment of the tests' accuracy. Lawrence W. Talley, vice president for risk management for Days Inn, a motel chain that uses the devices, said recently "there are absolutely hundreds of tests to show that the polygraph is a reliable instrument . . ."

The proposed Employe Polygraph Protection Act of 1985 would make it unlawful for an employer "to require, request, suggest or cause any employe or prospective employe to take or submit to any lie detector test." Forbidden tests are defined to include those done with a voice-stress analyzer or any other device—mechanical, electrical or chemical—"for the purpose of detecting deception or verifying the truth of statements."

The bill, as passed by the House subcommittee and introduced in the Senate, has exemptions for only three categories: all governmental employers, CIA and National Security Agency counterintelligence activities, and FBI counterintelligence contractors.

When the full committee passed the bill on Oct. 23, it added a narrow exemption for investigations of thefts or illicit diversions of federally regulated drugs with a potential for abuse. Employers making such investigations—mostly drug manufacturers and wholesalers and retail pharmacies—could give polygraph tests to employes, but only to those who had "direct access" to the so-called controlled substances.

According to Williams, "Polygraphs have become vehicles for employe intimidation, and for screening out employes of political or union beliefs different from those of a particular manager." He added that, in most work places, "Employers can polygraph workers for any reason: to verify employment applications, for periodic surveys of employe honesty, to find out why merchanise is missing or, perhaps just for intimidation."

Williams said in an interview that he expects the House to pass the bill this month "with a considerable majority."

Williams has 164 co-sponsors, including 20 Republicans. One is Rep. Jack Kemp (N.Y.), a presidential candidate who said he is "proud" to be an original backer. "The time has come to proscribe these inaccurate devices from the work place," he said in a June "Dear Colleague" letter urging fellow Republicans to back the bill.

In the key Senate Labor and Human Resources Committee, meanwhile, Chairman Hatch and top ranking Democrat Kennedy quietly reached a surprise agreement to cosponsor the Williams bill in the Senate.

Hatch introduced this bill Nov. 1, nine days after House Labor acted, said research has shown "that even the most respected and reputable polygraphers make mistakes . . . which can unjustly condemn and stigmatize an individual for life, rob him of his livelihood or bar him from just advancement."

"The Hatch-Kennedy combination will make the bill extremely difficult to stop" in the Senate, Williams said. But a leading opponent, Richard L. Lesher, president of the Chamber of Commerce of the United States, has predicted that it will be stopped "before this is all over."

"I just can't see passing more legislation to protect criminals and drug-pushers," Lesher said on "It's Your Business" earlier this month. The Chamber of Commerce television program was taped before the introduction of the Hatch-Kennedy bill.

Problems such as "getting drugs off the street" and trying to protect "the future of our children," including those in day care centers, "are just as important as national security issues," Lesher said, adding that polygraph tests in the work place could assist in accomplishing those aims. The chamber favors polygraphing "the executive work force" as well as rank-and-file employees, he said.

Currently, seven states prohibit any use of polygraphs in private employment. In varying ways, 19 other states and the District of Columbia make it illegal for a private employer to require or request polygraphing.

Polygraph tests generally are not admissible as evidence in criminal trials. "How ironic that we protect criminals from these devices, yet subject hundreds of thousands of innocent workers to these devices," Kemp said in urging support for the House bill. "It is time that we extend the same basic protection to workers which we offer hardened criminals."

Many companies have decided on their own not to use polygraphs. IBM told the Senate Judiciary subcommittee on the Constitution in 1978 that it "does not and has not used polygraph or similar types of equipment. . . .IBM is committed to respecting the dignity of its employes, and the way in which the company handles information about them is a part of that basic respect." IBM has not changed its position in the ensuing seven years, a spokesman said recently.

The now-defunct Privacy Protection Study Commission heard testimony about polygraphs from 12 major employers, including Equitable Life Assurance Society of the U.S., General Electric, IBM, Inland Steel Co. Inc., J.C. Penney co., Ford Motor Co., Manufacturers Hanover Trust Co., Exxon Corp., E. I. duPont de Nemours Inc. and Rockwell International Corp. The commission also received written statements from, or interviews with, a number of other employers, including General Motors Corp., Procter & Gamble Co. and Abbott Laboratories.

None of the 12 "used polygraphs in pre-employment screening of job applicants, or regularly administered the polygraph or any similar truth-verifications test to its employes," Chairman david F. Linowes told the Senate subcommittee in 1978.

Other companeis use the machines only for special purposes such as investigations, rejecting their routine use in pre-employment screening. Members of this group include at least three large corporations that own and franchise a combined total of nearly 15,000 McDonald's, Pizza Hut and Burger King fast-food outlets; Safeway, the largest supermarket chain; Holiday Corp., which owns and franchises Holiday Inns and also owns Harrah's casinos, and Montgomery Ward.

All of the fast-food firms said their polygraph policies are mandatory for corporate-owned outlets, but voluntary for their franchisees. These independent business operators are encouraged to, and do, follow the corporate policies voluntarily, spokesmen said.

McDonald's Corp.'s "policy is that we do not use polygraphs for pre-employment screening," spokesman Terri Capatosto said. "We prefer to rely on the integrity of our people. . . . I know of no franchises that

are using polygraphs. In particular, they like to develop a family-type atmosphere among their employes, and they put their faith in their people." McDonald's has about 6,700 U.S. outlets and owns about one-quarter of them.

Pizza Hut's policy is the policy of its owner, PepsiCo Inc., which, with 110,000 employes, is the country's 11th largest private employer. That policy is: no polygraphing of job applicants.

"The reason we don't give [pre-employment polygraph tests] is that there's no evidence that they are either valid or useful for this purpose," said PepsiCo. Public Affairs Director James M. Griffith. "And there's also the perception that the tests can be misused."

He added, "We can't dictate to franchises, but as far as we know, if polygraphs are used, it's on a rare occasion. . . . Virtually everyone follows our lead."

Griffith said his inquiries turned up no one who knew of polygrath use by Pizza Hut. Pizza Hut owns about 2,000 outlets and franchises about the same number.

Burger King has "not used, and [does] not intend to use in the future, polygraphs as a pre-employment screening tool," said Joyce Meyers, a spokesman for Pillsbury Co., the owner. She added that Burger King "apparently never [has] considered using them." Burger King has more than 4,000 outlets, of which Pillsbury owns about 800.

Safeway's "corporate policy is to not use the polygraph as a prescreening device when we're hiring," said public relations manager Felicia del Campo. "We feel there is no proof that the polygraph works for this purpose. . . .

"We don't have a corporate policy on using polygraphs in investigations," del Campo continued. "However, retail divisions in states which permit their use do sometimes offer a polygraph test to employees suspected of theft when a large loss is involved. But it's not mandated, and we don't use it regularly or to any great extent." Safeway has about 2,000 U.S. stores.

"Holiday Inns does not use a polygraph except in investigations where permissible by law," Holiday Corp., Communications Director David G. Daly said. "It is used with the employee's permission only, as an aid or tool, but never as evidence, and never as the only tool. In none of our properties is it used for pre-employment screening." There are 1,500 U.S. Holiday Inns, including 170 that are company-owned.

Holiday Corp. also owns a Harrah's casino in New Jersey, which does not permit polygraphing, and a Harrah's in Nevada, which does allow it. "Neither East nor West Harrah's uses a polygraph for preemployment screening," Daly said.

Many companies do use the machines for a variety of purposes, including screening would-be employees. These include members of the National Wholesale Druggists Association, the National Association of Chain Drug Stores Inc. and the National Association of Retail Druggists. Those associations take a position on polygraph exams shared by the federal Drug Enforcement Administration.

Ronald W. Buzzeo, DEA's deputy administrator for diversion control, says that the agency supports polygraph use "for pre-employment screening and as a subsequent investigatory tool in appropriate [controlled-substance] cases, provided that it is permitted by state and local laws."

Peoples Drug Stores Inc. Chairman Sheldon W. Fantle said that the nationwide, 835-store chain uses polygraphs to control drug diversions and thefts. Polygraphing should be "at the discretion of the employer," he said. He termed the House bill "a weak recognition" of the need, and said it will "not get the job done."

Jewelers of America, an organization of 12,000 retail jewelers, and Manfacturing Jewelers and Silversmiths of America, which has 2,400 members, told the House subcommittee hearing that a ban on private-sector use of polygraphs "would have a devastating impact on the jewelry industry."

The machine "is not infallible, [but] it has been my experience, and that of many other jewelers, that it is the most accurate and efficient means of confirming information included on an employment application," spokesman Larry Sherwood said.

Security consultant William L. Cole of Borg-Warner Corp., owner of Wells Fargo Armored Service Corp., Wells Fargo Guard Services and Burns International Security Services, has raised this question: "If the U.S. government, states and municipalities have the right to use polygraph testing to protect themselves from dishonest employes, why should the security industry as well as other employers not have access to the same technology and protection?

PROFILE OF A POLYGRAPH—HOW IT WORKS, AND WHAT IT DOESN'T DO

(By Morton Mitz)

Each year, hundreds of thousands of jobseekers take a polygraph test. The prospective employer's assumption and rationale are that it—or any screening technique—will enable the company to predict illegal conduct more accurately than by relying on chance.

A polygraph measures certain "arousal" reactions. Advocates contend that, under questioning by the machine operator, lying or deceptiveness induces fear, the fear creates stress and the stress reveals itself in measurable changes in cardiovascular activity (blood pressure, heart rate, pulse), the rate and depth of breathing, and sweating.

Under this theory, the polygraph is not a "lie detector," because what it measures is the fear of detection, not lying or deceptiveness itself.

Similarly, J. Kirk Barfoot, past president of the American Polygraph Association, said: "The instrument makes no decisions and is nothing more than a diagnostic tool. No bells ring, no lights light, and there is nothing that can be compared to a computer which gives a definitive answer based on the input which is fed into it."

The examiner attaches three devices to a person taking a test (the "examinee," in the jargon): an arm cuff similar to the "cardio cuff" used to measure blood pressure, one tube around the chest and another around the abdomen, and electrodes on two fingertips. The cuff drives one pen, the tubes two more, and the electrodes a fourth. Each pen produces a line on a chart.

Normally, the operator conducts an initial interview to try to generate a psychological atmosphere in which the examinee will accept the accuracy of the test he is about to take and accept also that all of the questions to be put are of equal importance. These include "irrelevant" questions involving usually innocuous matters (such as the person's nickname) and "relevant" questions (such as, Have you ever been fired?). The responses to irrelevant questions yield baselines to be contracted with the lines resulting from responses to sensitive questions.

Commonly, pre-employment screening tests last 15 minutes to an hour, compared with three, four, or more hours for national-security-related and criminal-investigation examinations. During the examination, the operator reviews with the person answers suggesting possible deception.

Finally, after a post-test interview, the examiner assesses all of the results. He is the one who "must make a decision as to truthfulness or falsehood," Lightfoot told a House Education and Labor subcommittee last summer. In screening job applicants, "The examiner should be thought of as a personnel or interviewing specialist, who simply uses a polygraph to assist him in making decisions," he said.

Often, an examiner is paid $25 to $50—a fee well below the cost of time-consuming reviews of resumes, checks of references and the like.

The Office of Technology Assessment concluded in a 1983 report "that there is at present only limited scientific evidence for establishing the validity of polygraph testing." OTA said its review of 24 relevant studies meeting minimal acceptable scientific criteria found that, for example, correct guilty detections ranged from about 35 to 100 percent.

"Overall, the cumulative research evidence suggests that, when used in criminal investigations, the polygraph test detects deception better than chance, but with error rates that could be considered significant," OTA said.

OTA also found "that the mathematical chance of incorrect identification of innocent persons as deceptive (false positives) is highest when the polygraph is used for screening purposes."

The report said that "the examinee's intelligence level, state of psychological health, emotional stability and belief in the 'machine' are among the other factors that may, at least theoretically, affect physiological responses."

Supporters of using the results of polygraph tests argue that the results are reliable and that the tests provide a cost-effective method of screening out undesirable employes.

"Hundreds of thousands of companies . . . depend on polygraph screening to maintain acceptable profit margins," Barefoot said. "If [it] were to be denied to these companies, many of them eventually would be forced out of business due to higher theft rates by employes. Those which would not be forced out of business would simply have to raise the prices of their products . . .

Douglas G. Williams, a former Oklahoma City detective sergeant and author of a widely circulated underground manual on how to beat the machine, told House hearings on whether to bar the results of polygraph tests that it is possible to defeat the machine.

"I can tell the complete truth, or a complete lie, or anything in between, and still pass any lie detector test given any time, by anyone anywhere," Williams testified.

The OTA report cited "limited" evidence that deceptive persons who use physicial countermeasures including meprobamate, a particular tranquilizer, and hypnosis, "and who can distinguish nonrelevant from relevant questions . . . can increase their chances of avoiding detection."

"Employers routinely circumvent Federal law simply by asking employees to take a lie detector test," Williams charged. Although

many areas such as past arrests and sexual habits are off-limits to employers in pre-employment tests, an employer "can disregard the law by paying a 'hired gun' to ask questions he is legally prohibited from asking . . ." he said.

Sharply contrasting appraisals come from Barefoot and Lawrence W. Talley, Days Inns' vice president for risk management.

"All of the scientific surveys of people who have actually taken polygraph tests show that the great majority do not find the test to be offensive, objectionable, or an invasion of privacy," Professor Frank Horvath, director of the American Polygraph Association Research Center at Michigan State University, wrote in USA Today.

Most polygraphers "have had little scientific or clinical psychological training," said psychologist Benjamin Kleinmuntz of the University of Illinois. "The typical background is a high school education and a six-week-to-six-month course in polygraphic examination and psychology—depending on state certification requirements, if any."

Even under the best of circumstances, when an examiner advises a person not be hired, he doesn't know whether the applicant would have made a bad or good employe, according to opponents of the tests. Nor does he know whether his inferences from the person's past foretell his or her future. And, commonly, the applicant neither sees the results of the exam or of the examiner's assessment nor knows just who may see the results.

TRIBUTE TO LEROY TYUS

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. CLAY. Mr. Speaker, I am honored and privileged that Mr. Leroy Tyus, a longtime friend and political ally, has been chosen by the Service Employee Union, Local 50, as its "Person of the Year."

This award is given annually to a person or an organization that has given dedicated service to the St. Louis community.

My friend, Leroy Tyus, was born in Brownsville, TN, on February 4, 1916, to Mr. O.T. and Odelia Parker Tyus. He began his elementary and secondary education here in Brownsville and later attended Lane College in Jackson, TN. After 3 years at Lane College he decided to enter Lincoln University Law School, which was at that time located in St. Louis, MO. This was the beginning of his service years to the city of St. Louis.

In 1945, Leroy married Marie Holton and from this union two daughters were born, Cheryl and Cathy.

His first years of service to the St. Louis community began when he assumed the operation of the Army canteen from 1942–45. Shortly thereafter he owned and operated the very popular and successful Tyus Hotel and Antler Tavern. Soon after this Mr. Tyus became involved in local politics. He was elected to the Missouri House of Representatives where he served with distinction from 1950–60. He then was elected the committeeman of the 20th ward from 1960–83, at which time he retired. He also served as a delegate to the Democratic National Convention from 1964–80, was chairman of the first congressional Democratic Party, constable, righth magistrate district, operated his own private security agency, was a real estate broker, and is now currently a member of the Missouri Democratic Executive Committee.

Mr. Speaker, I feel that it is altogether fitting and proper that this distinguished, dedicated public servant, and politician has been selected to receive this outstanding award from the Service Employee Union, Local 50. I offer him and his wife and family my congratulations for a job well done and my best wishes for continued success in the future.

TRIBUTE TO MARGARET HELFRICH RETTINO

HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. TORRICELLI. Mr. Speaker, I rise today to pay tribute to Margaret Helfrich Rettino on the occasion of her 90th birthday. Born in Jersey City to William Helfrich and Margaret Reilly, Mrs. Rettino made her home in Moonachie, NJ when she met and married Louis F. Rettino in 1916.

Always actively involved in social causes, Margaret began her participation more than 70 years ago when she marched through the streets of Jersey City demanding the right to vote for the women of America. She is active in the Moonachie Senior Citizens Club, of which she is a past president.

Through the years she has also served her community as a reporter for the record, as a county committee woman from Bergen County, NJ as an officer of the St. Margaret of Cortona Rosary Society, as a member of the Washington Park Hose Co., Auxiliary, the Moonachie Volunteer Ambulance Corps, and has been a visiting homemaker with the Home Health Aide Service of Bergen County.

The Bergen County Board of Freeholders has recognized her work with the Bergen County Senior Citizens by presenting her with several citations throughout the years.

On Saturday, January 11, 1986, I look forward to joining Margaret Helfrich Rettino and her six children—Gesulmina Stagg, Agnes De Santo, Rose Wuestefeld, Louis, Rev. Mr. Robert Rettino and Brother William Rettino—her two sisters—Gertrude McVicar and Genevieve McCarthy—and her many friends and family to pay tribute to this fine woman on such a special occasion.

TORT REFORM RESPONSE TO INSURANCE CRISIS QUESTIONED

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. FLORIO. Mr. Speaker, in seeking solutions to the current crisis of liability insurance availability, it is tempting to blame our tort system and the courts. This inclination is understandable. The courts have the authority to require compensation for injuries, so some people conclude that if premiums are rising, the courts must be entirely to blame.

Others point out that the purpose of insurance is to pay people when they are injured and that many factors besides tort standards affect whether coverage can be provided. They suggest that availability and affordability of insurance are also a function of whether there are enough prudently managed insurance companies financially capable of providing insurance; whether injuries are minimized through careful risk management; and whether regulators are exercising appropriate oversight. An ill-conceived or precipitous revision of the tort system might ultimately make things worse by removing incentives for risk management.

An articulate statement by Marlen Dooley elaborating some of these points appeared in a recent edition of the Camden Courier-Post. I am inserting a copy in the RECORD for the information of my colleagues and the public.

LIABILITY STANDARDS ARE NOT THE CAUSE OF INSURANCE CRISIS

(By Marlen Dooley)

Last August, a legislative commission was formed in New Jersey to examine the reduced availability of environmental impairment liability (EIL) insurance, and the dramatic rise in premiums. EIL insurance covers injury or property damage due to non-sudden, accidental releases of hazardous substances.

Insurance companies blame large awards, judicial interpretations favoring the insured rather the insurer, and the unpredictability of the high-risk market for their reluctance to cover EIL. The solution they offer is to alter the present liability standards—by legislating a monetary limit for liability, and by weakening the strict liability, or no-fault, standard used in court cases.

While these measures may be a safety net for the insurance industry, they are a disaster for the people of New Jersey. A cap on liability would only require industry to be responsible for claims filed against it up to a set amount. But someone must still pay for damages in excess of that amount. In all likelihood, that someone will be the state and, in the end, the taxpayer. This is wrong. The creators of pollution must be made to bear responsibility for it.

In addition, strict liability makes those who operate hazardous activities liable for damages regardless of how carefully they operate. This is because the industry is aware from the start that a plant, simply by its operation, creates a danger.

This standard does not mean that a victim will automatically win a court case. Plain-

tiffs must still prove that a particular site or chemical was the cause of their injury. This standard does, however, make it easier for victims to have their day in court. It also serves to place the initial burden of proof on the industry. If the standard is changed, the burden will be difficult for the victim to bear, both from a financial and an evidentiary standpoint.

But, there is another reason for maintaining strict liability. The purpose of strict liability is to cause those in control of dangerous substances to take whatever action is necessary to prevent releases into the environment. If those who handle toxic waste are aware that they are responsible for all damages occurring from their activities no matter how careful they are, they will be motivated to use the highest standard of care to avoid accidents.

Rather than seek to change the strict liability standard, insurance companies should play a major role in encouraging safer practices. First, the industry could require safety measures in its EIL contracts. For example, many insurance contracts require smoke alarms or sprinkler systems for fire coverage.

Second, by setting the costs of insurance premiums in relation to the amount of risk involved, those activities that are extremely dangerous would become very costly to insure. At some point, they could be priced out of the market. Thus the market would decide that an activity cannot be continued unless a safer method of operation is used.

But, the insurance companies have not sought to encourage safer practices. Instead, there has been little relationship between the level of risk to the environment and the cost of insurance. A 1985 U.S. Government Accounting Office study shows that for the past 10 years, the casualty insurance industry has charged unrealistically low premiums for high-risk activities. The premiums did not cover the possible claims, but they did provide a steady source of cash for reinvestment purposes. Now that investment rates have fallen, the gap between premium loss and investment gain has narrowed.

To make up for investment income, insurance companies are charging excessive premiums. This cash-flow underwriting practice not only doesn't result in safer practices but also leads to an unstable market and periodic crises, such as New Jersey's.

Insurance companies were given a monopoly under the McCarron-Ferguson Act. They receive substantial tax advantages, and cannot be sued for antitrust violations. The extraordinary economic benefits typical of a monopoly were granted because of the belief that the public good would be served by a uniformity of standards. The public would not be served by changing much needed liability standards. It is time the insurance companies lived up to their responsibility to the public.

Until they do, the state, which was granted power by Congress to oversee this industry, should examine the rate-making practices that have led to this crisis, and more strongly regulate the industry. In the interim, the state should institute measures, such as self-insurance pools, to assist municipalities and private entities that are unable to afford or even obtain EIL insurance.

EAST BAY WOMEN FOR PEACE AND EDITH LAUB CONTINUE TO STRIVE FOR WORLD PEACE ON 24TH ANNIVERSARY

HON. RONALD V. DELLUMS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. DELLUMS. Mr. Speaker, I wish to call your attention to a remarkable group, and invite you and my colleagues to join me in sending greetings to the East Bay Women for Peace, on the occasion of their 24th anniversary celebration, as well as to Edith Laub, who has been its chairwoman for the past 12 years.

I ask my colleagues to join me in saluting their dedication to the achievement of disarmament under effective international controls, large cuts in the military budget, and fulfillment of human needs. East Bay Women for Peace, which is affiliated with Women Strike for Peace nationally, came into being in 1961 to protest atmospheric nuclear tests. They have continued the campaign over the years to stop all nuclear tests, leading to the thousands of signatures collected for presentation at the summit meeting in Geneva, urging the United States to join the Soviet Union in a permanent comprehensive nuclear test ban treaty.

I take great pleasure in wishing them as productive a record in their next 24 years as in the first and to acknowledge the leadership of their chair, Edith Laub.

Happy 24th birthday, East Bay Women for Peace.

JAMAICA HIGH SCHOOL TO RECEIVE PRESIDENTIAL AWARD FOR EDUCATIONAL EXCELLENCE

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. ACKERMAN. Mr. Speaker, I rise today to congratulate and praise Jamaica High School, of Queens County, NY, which will receive the Presidential award honoring educational excellence, to be presented by the regional representative of the Secretary of Education, on Friday, December 13.

Mr. Speaker, the truly outstanding and exemplary academic achievements of Jamaica High School make it uniquely deserving of this honor. Through a highly dedicated staff, whose motto is "Standards and Sympathy," along with the introduction of new and innovative programs, this preeminent high school has managed to inspire its students collectively to achieve a graduation rate that is over 94 percent, a dropout rate that is less than 4 percent, and a competency rate of 98 percent. These statistics, along with the fact that approximately 85 percent of its students go on to further their education, place Jamaica High School well above the national average.

More important than these numbers, however, is the high school's rich tradition of blazing new trails with innovative programs designed to fill intellectual gaps. Jamaica was the first high school in New York City to offer a humanities program. Furthermore, this fine hall of learning does not forsake the underachiever; it has projects that develop and cultivate the potential of young students who may need some additional or intensive instruction. Its math-science institute; a program to develop critical thinking skills; the school's computer science institute; and the Queens Academy of Finance, which the school directs, are just a few of the bold educational initiatives which set Jamaica High School apart.

As further testimony to the exceptional quality of this fine academic institution, it recently received a Carnegie Foundation grant of $43,000 for humanities research in multiethnic values. It is entirely appropriate that this school should be so honored, for it is itself so ethnically diverse, and it has worked so hard to emphasize the advantages of this diversity and capitalize on it.

I am proud to say that the accomplishments of Jamaica High School are not merely confined to the classroom. Its Action Program, set up at the start of this decade, requires students to complete four terms of community service before graduation, thus giving them a feeling of esteem and positive direction, as well as offering benefits to the school's neighbors.

Mr. Speaker, I call now on my colleagues in the U.S. House of Representatives to join me in congratulating Jamaica High School, its principal, Eileen Petruzillo, its staff, and its student body, for the unique and laudatory academic and social achievements that have earned this high honor.

OREGON JTPA PROGRAM

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. AUCOIN. Mr. Speaker, recognizing that it was time for a new approach to the problems of unemployment, Congress passed the Job Training Partnership Act [JTPA] in 1983. JTPA combines Federal dollars with local initiatives, giving States wide latitude to tailor job training programs to meet specific needs.

During the 2 years JTPA has been in operation, my State of Oregon has come up with some innovative training programs. So innovative, in fact, that the National Alliance of Business has singled out Oregon as the premier JTPA program in the Nation. In presenting the award, William Kolberg, president of the National Alliance of Business, stated that "Oregon has been selected as the outstanding example of how a State is working with public-private part-

nerships to solve the Nation's unemployment problems."

Oregon's JTPA Program is administered by an outstanding group of private industry councils. These councils employ the talents of local government officials, business executives and managers—individuals such as Chuck McClellan, Western division manager for Portland General Electric; Chuck Frost, vice president of Tektronix, Inc; Vern Ryles of Poppers Supply, Co. and many other busy executives who have given freely of their time.

The wisdom of this approach is borne out by the number of people who have received services through the program. In 1984, 80 percent of all adult clients, 70 percent of youth, and 86 percent of their dislocated worker participants found jobs.

This year, JTPA has provided services to over 24,000 economically disadvantaged or unemployed individuals. Despite double-digit unemployment in much of the State, three out of four persons who contacted the Oregon Private Industry Council were given the chance to find meaningful, long-term employment.

Oregon's JTPA program has been unique in other ways. We've developed cooperative efforts between JTPA and local economic development agencies, creating a favorable climate for the expansion of existing firms and the location of new business in our State. The involvement of area business has made it possible for JTPA to focus on the needs of the community and fill those needs more effectively and more efficiently.

The Oregon JTPA coalition has also initiated an effort to reduce the number of high school dropouts in Oregon. The coalition is in the midst of a 3-year program to create alternative schools, combining job training with the regular academic curriculum. The goal of the program is to keep kids in school longer, with supplementary job training to help them meet the challenges of the marketplace when they do leave.

I congratulate those individuals involved with the Oregon JTPA Program, and wish them continued success.

VICTORY OVER DRUGS IN PARAGUAY

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. KOSTMAYER. Mr. Speaker, the problem of drug abuse is something that concerns us all.

I hear frequently from parents, teachers, law enforcement personnel, and students about drug problems—problems that infect all communities, all types of schools, and potentially young adults of all ages and social background.

The battle against drugs must be fought in all areas—not the least of which is off our shores. For nearly all abused narcotics, particularly cocaine and heroin, are illegally imported from abroad.

That is why it is vital our State Department through its Bureau on International Narcotics Matters continues to urge other countries to cooperate with us in eliminating international traffic in narcotics.

I want to report a tremendous success in this war against drugs in Latin America to my colleagues, Mr. Speaker.

In October 1984 some 49,000 gallons of chemicals—ether, acetone, and hydrochloric acid—obviously intended for use in the manufacture of cocaine, were seized in Paraguay.

Paraguayan officials at first refused repeated requests by our Ambassador to meet to discuss the seized chemicals, and it was only natural that officials at the Bureau for International Narcotics Matters believed that the material seized would eventually wind up producing cocaine.

When I visited Paraguay in January of this year as a member of the House Foreign Affairs Committee with my colleague from New Jersey [Mr. TORRICELLI], I raised this issue with Gen. Alfredo Stroessner, the President of Paraguay.

Mr. TORRICELLI and I pressed the issue, and I told General Stroessner that there were concerns that high Paraguayan officials could be involved in the importation and ultimate use of the seized chemicals. I urged him in the strongest possible terms to destroy these chemicals.

General Stroessner assured me that the chemicals would not wind up in the drug trade. I am happy to inform my colleagues, Mr. Speaker, that today I have received confirmation from the State Department that after a lengthy legal process in Paraguay, the chemicals have been returned to Germany, where they were manufactured. This transfer took place under U.S. supervision. The U.S. Consul in Frankfurt cabled Washington that the chemicals, sent by ship through Bremerhaven, have been received at their place of origin, the German chemical firm, Merck.

I want to commend the State Department for following through on this case. The cooperation of other governments has not always been what it should be in matters involving narcotics trafficking. In this instance, pressure was brought to bear, and we have achieved a significant victory. The 49,000 gallons of chemicals seized, if used by drug traffickers, could have produced 8 tons of cocaine—the equivalent of fully 10 percent of the estimated United States annual consumption.

I would also like to thank 59 of my colleagues who joined me in writing to General Stroessner last February to express our concern.

We must continue to work with Latin America and other countries to halt drug production at its source. This type of effort is worth it in the long run, Mr. Speaker.

SALUTE TO TOMMY WINEBRENNER

HON. OLYMPIA J. SNOWE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Ms. SNOWE. Mr. Speaker, I want to join in the genuine and sincere outpouring of farewell wishes for Tommy Winebrenner, whose departure takes away a part of this great institution, the U.S. House of Representatives.

Like some other Members, I had experience in the State legislature before being elected to this body, but I quickly found that the differences were legion. As a freshman, the complexities and confusion here in the House were overwhelming at times. Tommy Winebrenner, with courtesy and without fail, was enormously helpful in assisting me to get my bearing. He made me realize that there was indeed some hope that I would survive my first term.

I know that we've all probably gone to Tommy with what might charitably be described as inane questions, yet he handled even these with grace and aplomb. I think that he proves without question that merely having the information is not enough, you have to care about others and know their needs if you are to be a success in life. Tommy's great skill lies not just in his knowledge of this House, but in his appreciation of it and his willingness to help in any way possible.

Mr. Speaker, I am tempted to say that I hope Tommy doesn't really enjoy his new career, and that he will come back and work with us again. But I will not. He has given more of himself than anyone could possibly ask. He has made contribution to the success and prestige of this body any elected official would be proud of.

Tommy, you have been part of the fiber, unseen by the public, which nonetheless keeps our great experiment in democracy alive and well. I am, personally, grateful, for your patience and assistance to me, and for your undying faith in the American Republic.

PEGGY GOLDWATER WAS A FRIEND

HON. JOHN McCAIN

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 11, 1985

Mr. MCCAIN. Mr. Speaker, those of us who were fortunate enough to have known Peggy Goldwater, who passed away Wednesday, were inspired by her compassion, intelligence, and sincere consideration for everyone she met. The 1964 convention is so memorable because of the picture of Senator GOLDWATER with a very lovely, striking woman at his side. I sincerely hope

that all America will remember her this way.

For many years, sometimes trying years, Peggy stood beside her husband, providing support and inspiration to one of the country's most distinguished leaders. She touched the lives of thousands through her work for Planned Parenthood, Phoenix's St. Luke's Hospital, and Mount Vernon College in Washington, DC. Few have accomplished as much in one lifetime as Peggy Goldwater and few could ever hope to match her dedication to serving mankind.

I consider myself a very lucky person to say Peggy Goldwater was a friend. Treasuring that friendship forever, I will turn often to my memories of this remarkable woman for inspiration.

HOLLYWOOD, FL, CELEBRATES 60TH BIRTHDAY

HON. LAWRENCE J. SMITH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. SMITH of Florida. Mr. Speaker, I salute 60 great citizens who have made contributions to the past, present, and future of the city of Hollywood, FL. These people came to Hollywood and fell in love with this oasis on the exciting gold coast and not only made it their home, but made it bigger and better. These people live and raised families in Hollywood and put back into the community what they took out to ensure that our city has another 60 vibrant years.

These citizens were recently honored by the Hollywood Democratic Club at a wonderful dinner and they are so deserving of honor that I want to personally record their names in this record. I salute the following people: Wilson Atkinson, Hank August, Ross Beckerman, Claude Blocker, Harvey Breeding, Dave Coay, Maurice Connell, Walter Cope, Irv Cowan, Betty Derington, Doug Donn, Barry Epstein, Bill Foster, Ed Foster, Art Frimet, Issac Gammel, Harry Gampel, Henry Graham, Myrtle Gray, Skip Grkovic, Jeff Gross, Gleason Halloway, Jim Hartley, Keith Hessey, William Horvitz, Doug Kaplan, Charles Lantz, Molly Leban, Quentin Long, Stan Marguilies, Mike Marinelli, Jesse Martin, Marilyn Morris, Bill Moy, Sal Mudano, Charlie Nelson, August Paoli, Charles Paoli, Michael Phillips, Frank Pinter, Arthur Raymond, David Rusah, Edward Salzman, Sheldon Schlessinger, Ronnie Schlichte, Art Segall, Al Serman, Phyllis Silverman, Mark Siple, Slatts Slater, Lew Soli, Ted Sorin, Cedric Start, Ben Tobin, Gert Tulk, Elmer Weigle, Rodney Young, George Young, Donald Zeller, and George Zinkler.

CALL TO CONSCIENCE

HON. BEN ERDREICH

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. ERDREICH. Mr. Speaker, I want to add my voice to those of my colleagues who speak out on the deplorable situation of those in the Soviet Union who wish to emigrate but have over and over been denied this very basic human right.

Having returned from a trip to the Soviet Union this summer and meeting with many Soviet Jews, and those of other faiths, I am as committed as ever to continue our efforts to help those who have sought to emigrate, be reunited with family and have the freedom to follow their religious beliefs.

The recent summit with President Reagan and Secretary Gorbachev has produced little hope that the situation will change for people like the Boris Ghinis family or the Mikhail Kazanovich family who have been trying to emigrate for years but because of absurd reasons have not been granted visas. I was able to meet Mikhail Kazanovich while in Leningrad and have been in touch here in the United States with Irene Ghinis' family. I was moved by the courage and continued sense of hope that these people displayed in spite of the loss of employment, restrictions on university enrollment, illegal searches of homes, and an endless list of harassments of those who have tried to exercise their right to emigrate.

Mr. Speaker, I implore the Soviet Union to uphold the treaties and agreements they have signed and allow those that wish to emigrate so that husbands, wives, and children will be reunited to live as a family and live a life that they seek.

A BILL TO ESTABLISH THE RICHARD M. NIXON NATIONAL HISTORIC SITE

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. DANNEMEYER. Mr. Speaker, today I am introducing a bill, at the unanimous request of the Yorba Linda City Council, to establish the Richard M. Nixon National Historic Site at the place of his birth in Yorba Linda, CA. The site will consist of his birthplace home and a visitor service center in existing facilities on 7.2 acres of land located in my congressional district.

This small one and one-half story frame bungalow was the home of Frank and Hannah Nixon for 10 years. Frank Nixon built the house in 1912 on the 9-acre farm where he raised citrus. The following year, on January 9, 1913, it was the birthplace of their second son, Richard Milhous. In 1922, when citrus farming became unprofitable, he sold the property and moved the family to Whittier. A small rear addition was put on the house at an unknown date and would be removed during restoration.

The property was owned by various individuals and by the local school board before the Nixon Birthplace Foundation gained title in 1978. The foundation owns a 1.1-acre tract in the immediate vicinity of the house. The Yorba Linda Elementary School District owns 6.1 acres of the original property which includes buildings ideally suited for the visitor service center envisioned by the bill. Private residents own the remaining 1.8 acres which would not be affected by this bill. The birthplace, which is in good repair, is currently leased out and not open to the public, although the exterior and historic markers may be viewed.

President Nixon expressed a preference for the birthplace as a National Historic Landmark at the time the issue was considered and ultimately agreed to by the National Park Service in May 1973. Representatives of former President Nixon, in response to recent inquiries, have confirmed that he still regards the birthplace as the most significant of the sites associated with him.

Specifically, the bill does the following:

SECTION 1. SHORT TITLE

This section states that this act may be cited as the "Richard M. Nixon National Historic Site Act".

SECTION 2. STATEMENT OF PURPOSE

This section states that the purpose of this act is to preserve and interpret the birthplace of Richard M. Nixon for the benefit, education, and inspiration of present and future generations.

SECTION 3. ACQUISITION AND RESTORATION OF PROPERTY

This section authorizes the Secretary of the Interior to:

First, acquire the birthplace property and improvements located at 18061 Yorba Linda Boulevard in Yorba Linda, CA;

Second, acquire the adjacent property and improvements owned by the Yorba Linda Elementary School District;

Third, restore the birthplace home and property surrounding the home within this historic site to its condition at the time of the birth of Richard M. Nixon; and

Fourth, develop the existing buildings within the site as a visitor center.

The Secretary is authorized to acquire and restore the property in this section by donation, or with donated or appropriated funds.

SECTION 4. ESTABLISHMENT AND ADMINISTRATION OF THE RICHARD M. NIXON NATIONAL HISTORIC SITE

This section establishes that the property acquired under section 3 shall be known as the Richard M. Nixon National Historic site and shall be administered by the Secretary in accordance with the act of August 25, 1916 (16 U.S.C. 1 et seq.) the act of August 21, 1935 (16 U.S.C. 461 et seq.), and the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4601–4 et seq.).

The Secretary is authorized to enter into agreements with public or private entities for the operation and maintenance of the

site under the law cited in this section. The Secretary is also authorized to collect entrance or user fees under this section.

SECTION 5. ESTABLISHMENT OF THE RICHARD M. NIXON NATIONAL HISTORIC LANDMARK AT THE SITE OF HIS FIRST LAW OFFICE IN LA HABRA, CA

This section requires the Secretary of the Interior to list the former law office of Richard M. Nixon on the National Register of Historic Places if it satisfies the criteria established by the Secretary for listing on such Register.

Because of the size and location of the office, it is not feasible for the National Park Service to operate and administer the site. Since listing property on the National Register does not require any appropriations, it is an appropriate method for recognizing the significant role of Richard Nixon's legal background in his political career. This bill does not change current criteria for listing property on the National Register of Historic Places and expenditures beyond commemorating the property with announcements and plaques are specifically prohibited.

While my bill focuses on the Richard M. Nixon National Historic Site, I understand that the National Park Service has recommended passage of legislation to authorize historic sites for all three living former Presidents. I support this effort and hope that the committee will act favorably on this bill in tandem with legislation for the other living Presidents.

BALANCING ACT

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. GARCIA. Mr. Speaker, after 4 years of ballooning deficits, the administration has finally come to its senses and, for the moment at least, has agreed to cut defense spending equally with domestic spending. As I said yesterday during the discussion on the Gramm-Rudman budget proposal, this administration has a history of insisting on increased defense spending while lowering taxes despite the size of the deficit. If, as they say, history repeats itself, we can predict from now the breakdown of the Gramm-Rudman reduction process. It almost sounds like some new diet—let's hope new weapons do not prove to be too much of a temptation.

Where has this adminstration been for the last 4 years, that they have just now begun to wake up to the dangers of their economic policies? The question of why the President is willing to do a complete turnabout on his pet program was succinctly answered in an article in today's Washington Post.

One reason, they said, is that with three years left in his term, Reagan has come to view the $200 billion deficits as a potentially serious blot on the record of his presidency. For several years, Reagan ignored those aides—such as then-director of the budget David A. Stockman—who warned of peril in big deficits. But last summer, officials say, Reagan began taking a different—and more urgent—view of the red ink.

"He said, 'I am going to be judged on it.'" says the senior official. "That's made it real for him."

This deficit has been real since this administration took office. All of a sudden the fear that history may show that this President left office with the most staggering deficits in our country's history has put the fear of spending into the President.

The Congress, in passing this legislation, has bound itself to reducing deficits. Let us hope that the President will feel equally bound when it comes time to do the cutting.

GRAMM-RUDMAN AMENDMENT

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 12, 1985

Mr. RAHALL. Mr. Speaker, I wish to comment on the Balanced Budget and Emergency Deficit Control Act, frequently referred to as the Gramm-Rudman amendment, which has been incorporated into House Joint Resolution 372, the debt limit increase. After a great deal of deliberation, I find that in the interests of my constituents, I must vote against this measure, and did so last evening.

Initially, I opposed the Gramm-Rudman proposal to incorporate a balanced budget mechanism into the debt limit bill. My reasons were twofold. First, if this type of reform had merit, I believed that it could and should withstand the rigor of the committee process. A bill which is addressed by the full House and Senate without deliberation by the appropriate House and Senate committees, has more than ample room for serious flaw. As Representatives of our fellow countrymen, we are entrusted to review, to the fullest extent possible, every measure which is to become the law of the land. In a matter of such magnitude, this responsibility is especially present. I continue to believe that we cannot justify bypassing the committee process with such haste on a matter of such grave importance.

Second, I did not believe that this proposal was either fair or responsible. The original Gramm-Rudman proposal exempted several important, and costly, programs—totaling roughly one-half of the Federal budget—from the automatic reduction mechanism created by the amendment, leaving the burden of deficit reduction to America's veterans, needy, handicapped, and elderly. The President and the Senate were especially protective of defense programs at the expense of much needed social programs. It was with great consternation that I noted the exemption of prior-year contracts and obligations under the defense program, representing 38 percent of the total defense budget. I support a strong national defense. However, I do not believe that it can only be maintained by gouging Federal programs which are designed to provide the basic needs of our Nation's children, veterans, elderly, disabled, and needy.

While the conference agreement attempts to alleviate some of the burden placed on the recepients of certain low-income and pension programs, I do not believe that it fully satisfies my original concerns.

As in the original proposal, the agreement fails to address the matter of automatic reductions in the most fair and responsible fashion. It sets fixed dollar limits on the deficit, declining steadily until a balanced budget is reached in 1991. Further, the agreement also estalbishes a process referred to as "sequestration," that would make automatic spending cuts if the deficit limits are not otherwise met.

To make matters worse, however, the deficit targets for fiscal year 1986 were lowered considerably from what the Senate had proposed, thus ensuring that the process of making further cuts in the deficit will begin this year. The revised year-by-year limits would be as follows: fiscal year 1986, $179.9 billion; fiscal year 1987, $144 billion; fiscal year 1988, $108 billion; fiscal year 1989, $72 billion; fiscal year 1990, $36 billion; fiscal year 1991, $0. There will almost certainly be cuts in social programs this year if this measure is adopted.

Congress as a body has not prepared for the level of deficit reduction required by this measure. We can not now say that we would like to have a deficit of $179.9 billion in 1986. That is something that we should have prepared for. It is our job to ensure that the purse is divided in a fair and responsible fashion. We can not shirk that responsibility by saying at this late hour that everyone—no matter what the circumstances—must pay a fair share to achieve our whim.

Some of my colleagues will argue that this is a fair compromise. After all, the conference agreement requires that half of the necessary spending cuts come from defense and half from nondefense programs. In addition, some programs would be exempted from automatic cuts, and cuts for others would be determined by special rules and limitations. While this is a more reasonable approach to deficit reduction, we can not be so blind as to assume that this type of radical reduction will not do harm—both in the short and long term—to our economy.

Furthermore, in so short a time, can we be certain that we have thoroughly reviewed this measure? We must not jump on the bandwagon of deficit reduction without first checking that the wheels are secure. I urge my colleagues to think about this measure. See it for what it is—a hastily conceived attempt to address one of the most serious issues of this decade. I for one believe we owe our opponent—the Federal deficit—a more thorough review. We can no longer afford to be hasty in determining budgetary matters.

SENATE—*Friday, December 13, 1985*

(Legislative day of Monday, December 9, 1985)

The Senate met at 10:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

In a moment of silence, let us remember Dean Burridge, who works in our leader's office. His father was buried yesterday.

God of Abraham, Isaac, and Israel, this sixth day of Hanukkah, remembered by Jewish people worldwide, celebrates their deliverance and the miracle 2,000 years ago, of the lamps in the temple which burned for 8 days though there was oil enough for only 1 day. We praise You, Lord, for the resilience and perseverance of this remarkable people, despite indescribable suffering and persecution. May Your sovereign blessing continue to rest and abide with them everywhere and may Your divine deliverance come to those who are oppressed today, to the glory of Your name and fulfillment of Your purpose.

Father in Heaven, be present in the midst of conferences and committees and with those seeking agreement on the issues which face Congress and must be resolved before we adjourn. Give wisdom to the conferees that justice will be done and especially we pray for Your care and Your comfort for the farmers who wait anxiously for equitable resolution to their desperate plight. In the name of Him who knows, who understands, who loves. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, the leaders have 10 minutes, and then routine morning business not to extend beyond the hour of 11:15 a.m., with Senators permitted to speak therein for not more than 5 minutes each. Then we are going to return to the White Earth Indian bill, S. 1396, under a time agreement. I am advised, unfortunately, that there have been three votes asked for on that matter. I would hope that we could vitiate the yeas and nays in a couple of those instances. It is another example of punishing a number of our colleagues who are tied up in very important conferences. They are going to have to leave the conference, come to the floor, and cast a vote that I think could be handled with a voice vote or a division or whatever.

So I hope that the managers of that bill can reduce the number of rollcalls, since the majority leader is involved in a conference on the farm bill. We have 20 or 30 other Senators involved in the reconciliation conference, and the continuing resolution conference. I hope that—and I was not here when the votes were ordered—whoever requested the votes might reconsider and let us maybe have one instead of three votes.

Also, the Senate could turn to S. 1915, the counterterrorism bill, but only if there is a time agreement; the same with armor-piercing bullets, S. 104; and any conference reports available on the so-called must items. I do not believe any of those will be available today. We will also take up any other Legislative or Executive Calendar items that can be cleared. I hope we can now take care of most of the nominations on the Executive Calendar, particularly the judicial nominations some of which have been pending for a long time. I have had a call this morning from the Attorney General asking for us to expedite or at least clear those before we leave here today. I am hopeful that the distinguished Presiding Officer might be able to help us in that area.

I am advised that the low level nuclear waste compact, which we hoped to do by unanimous consent, is now being objected to by the Senator from Oklahoma, Senator BOREN. Hopefully that can be worked out.

Therefore, we will have a fairly busy day today. I do not know of any reason to be in session on tomorrow, unless I am advised by 1 or 2 o'clock by Senator HATFIELD or Senator DOMENICI that they would have the continuing resolution conference report completed, which I do not believe is possible, or the reconciliation conference report, which I do not believe is possible.

So I believe it is safe to assume, unless I hear to the contrary, that we will not be in session tomorrow and there is not much reason for a late session today. If we can dispose of all these matters, perhaps we can be gone from here by 3 o'clock. Again, we are seeking to accommodate over half the Members of the Senate who are involved in one conference or another. They will be involved in those, I assume, late into the evening and probably most of the day tomorrow.

TRAGIC CRASH OF A MILITARY AIRCRAFT

Mr. DOLE. Mr. President, yesterday morning, a DC-8 charter, which left Germany bound for Hopkinsville, KY, carrying 250 servicemen of the 3d Battalion 502d Infantry of the 101st Division and 8 crew, tragically crashed, killing all aboard—including servicemen from my home State of Kansas.

The families of these brave men returning home for the holidays deserve our heartfelt condolences. While difficult times lay ahead, I know their loved ones will find comfort in the many expressions of love and affection from family and friends.

It is a cruel irony, Mr. President, that these servicemen, as part of the Sinai Peacekeeping Force, served in an area of the world fraught with violence. It was their responsibility to help maintain the peace and security in a region accustomed to the scourge of war. These servicemen may not have died on the battlefield, but how often we forget that simply being an American serviceman is a dangerous undertaking. How often we forget the routine stresses and strains to which these courageous men are subjected on a daily basis.

These proud men in uniform were returning home to spend time with family and friends; it was indeed going to be a joyous holiday. While tragedies of this kind happen all too often, the fact that so many servicemen died in this one plane crash serves, once again, as a graphic reminder to all of us the sacrifice these patriotic Americans are prepared to make on behalf of their country in the cause of peace and freedom.

Mr. President, I know I speak for my many colleagues who represent the many States these men hail from, in expressing profound sorrow at the death of these men, and extend our condolences to the families of the deceased.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDENT pro tempore. The distinguished acting minority leader is recognized.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that 2 minutes of the Democratic leader's time be reserved for his use later in the day at his discretion.

The PRESIDENT pro tempore. Without objection, it is so ordered.

WHEN THE RISE OF TERRORISM JOINS NUKE PROLIFERATION: WATCH OUT!

Mr. PROXMIRE. Mr. President, one of the most disturbing elements in international relations in 1985 is the rise of terrorism. It is the nightmare of the age. Within the next few years, it could become infinitely worse. Why? Here is why: To date, terrorists have struck with TNT, grenades, and small arms. Unless we stop the spread of nuclear weapons, the time is coming, and coming soon, when terrorists will strike with small but absolutely devastating nuclear charges. Already both superpowers have tens of thousands of tactical nuclear weapons. Many of these weapons are small enough to be carried by one person. They can easily be concealed in the trunk or back seat of an ordinary passenger car. These compact nuclear weapons have the power to blow an entire city block to smithereens. So what happens when, sometime in the next few years, terrorists begin to work with tactical nuclear weapons?

Because of the shocking impact of television, right now, terrorism is a front and center concern throughout the world. Americans still carry vividly in our minds the terrible massacre of 231 marines in Beirut, We are haunted by the tragedy of U.S. State Department officials kidnaped and murdered. In the last few months, civilian passenger planes carrying American citizens have been hijacked. Terrorists savagely shot some of the passengers. Terrorists even seized a cruise ship. They brutally murdered an elderly, ill American passenger.

Will these terrible incidents pass like a bad dream? No. We can expect these cruel, violent acts to continue. Have we developed a strategy or even the beginning of a strategy to stop these terrorist acts? No. Terrorists strike at anytime, in any place, with an infinite variety of motives. Escape is easy for them. Jet flight has spectacularly diminished the time it takes to traverse thousands of miles. A terrorist can choose any of 213 separate sovereign countries in every part of the world. Even on those rare occasions when U.S. military officials can trace a terrorist's escape route, the United States has no effective extradition treaties in many cases.

There are steps we can take to protect ourselves against this terrorist threat. We can increase our efforts to penetrate terrorist organizations wherever they exist with our own intelligence agencies. We can work more cooperatively with foreign intelligence. For instance, the Israelis are reputed to have an extraordinarily efficient intelligence capability in the Middle East. We can provide more thorough security precautions for international flights that use American airports. We can insist, as a condition of American travel, that other countries also institute the most meticulous and thorough security safeguards for international flights. We can put far more resources into the pursuit of terrorists who perpetrate crimes against American citizens. We can pursue such criminals, relentlessly, and do our best to bring them to justice.

Now let us not kid ourselves, Mr. President. Even if we pursue all of these antiterrorist activities fully and faithfully, we cannot prevent determined and fanatical terrorists from vicious acts of violence and brutality against American citizens everywhere in the world including within the territory of our own United States. And we can only diminish that terrorist activity to the extent that we make its results in the damage it does to America's resolve less than the damage we can threaten to the terrorists, and to the state that may support the terrorists.

Now suppose these terrorists begin to secure control of tactical nuclear weapons. Then what happens? The advantage for the terrorist swiftly and sharply increases. Then a single terrorist bomb does not simply blow up a barracks and some 200 Americans. It can blow up a large part of a city and kill tens of thousands of Americans.

Armed with tactical nuclear weapons, the terrorist does not become more vulnerable. He becomes less vulnerable. He can plant his nuclear charge in a locker in the Grand Central Station in New York City, peacefully deposit his 50 cents, set the timer on his nuclear charge for 6 hours, and take the next flight to someplace a couple of thousands miles away.

Could this happen? It not only can—it will. How do we stop it? We stop the spread of nuclear weapons technology. Only a few weeks ago, a new study by Leonard Spector for the Carnegie Endowment for Peace showed how dangerously nuclear weapons proliferation has been picking up steam. Mr. President, this country has the greatest potential capability of any country in the world to stop nuclear weapons proliferation. Together with the Soviet Union, we have the power, the technology, and certainly the motive to stem the spread of nuclear weapons. We are not doing that now. We will not do it unless we recognize that with the rist of terrorism, the spread of nuclear weapons to more and more countries constitutes the most serious danger to human life in the world today. We can stop it. We must.

TRIBUTE TO MESSRS. HYNES, BEAN, HART, AND NORTON

Mr. PROXMIRE. Mr. President, it is time we Senators recognize the long, hard hours put in on behalf of the Senate by the young men who serve this body in the Democratic cloakroom. They are Patrick Hynes, Bob Bean, Joe Hart, and Bill Norton. They come to work every morning at 8 o'clock or earlier. They work until at least 45 minutes after the Senate has gone out. They take little or no time out for breaks—even for lunch and dinner. Typically they eat at their desks. They man the telephones for 10 or 12 or 14 hours day after day, every day. Sometimes they work until after midnight. Unlike Senators, during those long hours they never take a nap, or have a drink or watch television or read the paper. They work.

They do everything they can to round up Senators during rollcalls. They have to know whether Senators are in their offices in the Senate office building, or in their capital offices, or at a committee hearing, or a committee markup or in one of the House office buildings in conference, or at some agency downtown, or in a restaurant or a tavern or an embassy. Wherever Senators are, the young men in the cloakroom find them, alert them to rollcalls, and often provide transportation for them.

Patrick, Bob, Joe, and Bill also keep Senators informed and up-to-date on what is going on on the floor, what is pending, what the pending business provides, what the prospects are for a rollcall and when the rollcall may occur.

Mr. President, this cloakroom work is highpressure business. These young men have to respond instantly and accurately. They have to put up with criticism—almost always unfair criticism. Senators occasionally take out their frustration at missing a rollcall or missing plane reservations, or staying too late by rudeness to the cloakroom people. Senators' staffs also are sometimes brusque and mean. But in spite of the long hours, the high pressure, the often rude treatment, I have never in the 28 years I have served in this body heard a single ill tempered or impolite word from these young men, or their predecessors, and I have never heard another Senator or Senate staffer who has reported even a single incident of impolite conduct.

Mr. President, my secretary tells me when she talks with staff people on other staffs, she often gets a brushoff—or from the White House, or from other people. They are human. We can expect them to make mistakes. But it is astonishing to me that these young men in our cloakroom have been so remarkably polite.

Mr. President, here is a civility aspect of this body that we have too

seldom noted. We take it for granted. We should not. I doubt if there is any group of people in this country who when they work long hours, under pressure, are more faithfully, competently, and courteously served than we are by our cloakroom personnel. All of us owe thanks to Patrick Hynes, Bob Bean, Joe Hart, and Bill Norton. It is time they received it.

Mr. President, I apologize for having made this expression of gratitude to Democratic cloakroom workers partisan. But I am a Democrat. My associations with the Republican cloakroom have all been very happy and civil. But they have been confined to rare occasions.

MYTH OF THE DAY: CHINA IS ABANDONING SOCIALISM

Mr. PROXMIRE. Mr. President, the myth of the day is that China is abandoning socialism. Catchy slogans have recently glossed the front covers of America's weeklies, describing extraordinary changes now being undertaken in China. Two of the most expressive titles were "Capitalism in China" and "China, Moving Away from Marx." Some observers have stretched the interpretation further, claiming that China was "repudiating Marxism," "embracing capitalism" and even adopting a pluralistic form of government.

Now, the political and economic reforms instituted in China since Mao's death in 1976 have been significant, but limited, very limited. Specifically, let us examine the four key determinants of an economic system: property ownership, decisionmaking power, information and coordination flows, and motivational factors.

PROPERTY OWNERSHIP

If capitalism can be defined as the private proprietorship of economic activity, then signs of capitalism in China remain very minor indeed. The state continues to own almost all of the means of production—the land, buildings, and technology—and some 400,000 industrial enterprises. In fact, in 1984, state-owned enterprises produced 75 percent of gross urban industrial output, and accounted for 68 percent of total retail sales. Cooperatives not privately owned enterprise accounted for almost all of the remainder. Private enterprise as we know it is still doing little in China.

Over the past 5 years, the number of individually owned retail and service stores have multiplied more than 15 fold—from 686,000 in 1980 to 9.3 million in 1984 to 10.6 million today.

In the rural areas, the collectives still own most of the land, although they are increasingly leasing out parcels of land to individual families for 15 years or longer. Under this new production responsibility system, families meet state production quotas and then are free to decide what to produce and how much.

DECISIONMAKING POWERS

Decisionmaking in China remains largely vertical, in the sense that the party plays a major role in society. The party continues to control appointments to important positions in the government and state enterprises and exercise supervision over the nomination of candidates for election to local legislatures. The party still initiates the great majority of major national policies and undertakes occasional attempts to encourage proper moral behavior, such as the spiritual pollution campaign. While the party is willing to permit considerable creativity in the interpretation of Marxism, it does not tolerate the acceptance of any ideological alternative.

The Chinese leadership has accelerated its program of decentralizing economic control. After 1978, and more dramatically following the Third Plenum of the Twelfth Party Central Committee in October 1984, the party provided greater autonomy to various enterprises, allowing them production, supply, marketing, and even some pricing decisions. They were also given greater freedom over labor recruitment practices and wage levels. The decentralization of decisionmaking authority—used with great success in the countryside as well—has helped China's top 8 percent real economic growth in the past 2 years.

INFORMATION AND COORDINATION FLOWS

The state still plays the determining role in the setting of prices. Commodities of national importance, such as steel, coal, oil, and grain, are still subject to mandatory planning. Other goods are generally subject to guidance planning—whereby the state uses its control over taxes, pricing, capital, and supplies to encourage production—with market adjustments. In both industry and agriculture the state makes most of the production and allocation decisions.

While the state does influence the setting of prices to a large extent, markets are increasingly playing a major role in allocation and pricing. In the rural areas, more and more produce is being sold on the free market. In industry, products that remain after state plans have been fufilled can be sold to consumers or wholesalers for prices determined by market forces. In the end, however, the role of the market is still subordinate to that of the plan.

MOTIVATIONAL FACTORS

Material incentives are not only accepted by the Chinese leadership, but also are praised. The pragmatic Deng Xiaoping, who once remarked that it did not matter if a cat was black or white—as long as it catches mice, was recently enthusiastic in discussing the responsibility system: "If you want to bring the initiative of the peasants into play, you should given them the power to make money." Making money and profit is no longer a bad thing.

The collective ideals have not been tarnished either. The educational system, the workplace, and the family unit all encourage the inculcation of strong moral and social values. Indeed, social cooperation and harmonious society have both constituted a foundation for Chinese political philosophy throughout the centuries. The conclusion, then, is that material and moral incentives both play vital roles in the Chinese economy.

In sum, remarkable transformations have gripped China in the past months. The reforms are real; their consequences are potentially revolutionary. Somehow and someway, the American observer needs to take off his colored lenses and take a good hard look at the world's most populous country. He will not find a modern Western liberal state nor a free market laissez-faire economy. It is time to debunk the myth: China is not abandoning socialism.

ATROCITIES REVEALED IN AFGHANISTAN

Mr. PROXMIRE. Mr. President, Dr. Julliette Fournot is director of a French humanitarian organization aiding victims of the war in Afghanistan. On October 4, the National Review published her account of an incident in a southern Afghani province where hundreds of men, women, and children were murdered.

Based on a series of interviews conducted among survivors, Dr. Fournot documented synchronized massacres in four Afghani villages. She learned that on December 12 of last year, 400 Soviet soldiers had surrounded these 4 villages. With tank reinforcements, the soldiers entered homes and at close range shot the occupants, including pregnant women. Before Afghani resistance could arrive, the number of dead rose to 631.

More accounts from Afghanistan reveal other atrocities: Decapitation, mutilation, and gory murders. These are not acts of war. These calculated, deliberate killings of hundreds of innocent civilians closely compare to genocide.

Documentation of incidents like the Afghanistan massacres prove that genocidal tendencies are not things of the past. These events continue to occur today. Their gruesome details not only remind us of the Holocaust of the past, but also of the need to prevent such human disasters from occurring today and in the future.

The Genocide Convention is a preventive mechanism against this awful phenomenon. Its provisions will check

the abuse of human rights and human life in grotesquely violated nations like Afghanistan. Ratification of the convention will champion progress toward peace across the globe.

For more than 30 years the Genocide Convention has awaited the advice and consent of the Senate. Eight Presidents have urged for its ratification.

This unquestionable mandate should spur the Senate to quickly ratify the Genocide Convention. It must be done to restrain the rising death tolls in Afghanistan and around the world.

Mr. President, I yield the floor.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER (Mr. HATFIELD). Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond the hour of 11:15 a.m. with statements limited therein to 5 minutes each.

CRISIS IN NATURAL GAS MARKETPLACE

Mr. BOREN. Mr. President, I would like to point out a crisis situation that is emerging in the natural gas marketplace among producers, transporters, and consumers. It is also of grave concern to many of my colleagues from both producing and consuming States.

I see my colleague from New Jersey is on the floor at the moment. He is one of those who has expressed the greatest level of concern for this crisis, and how it is impacting consumers.

My own State of Oklahoma is one of the largest producers of natural gas. At present, it is estimated that approximately 600 million cubic feet a day of natural gas is "shut in," causing tremendous economic dislocation.

Not enough attention has been paid to the problems of independent producers whose gas has been shut in. Something must be done immediately to assure that their gas will be carried to their markets on a fair and nondiscriminatory basis by pipelines.

I want also to assure that the pipelines will be fairly treated. They have some legitimate concerns I will work to address. However, in the meantime, if pipelines do not start to voluntarily carry gas for the producers, I will work with my colleagues, including the distinguished Senator from New Jersey, early in the next session to write legislation to make certain that shut-in gas will be moved to the consumer markets.

Of course, consumers as well as producers are suffering as a result of the present stalemate. We could face the closing of plants and the loss of jobs if we fail to get gas to the end use consumers on a fair basis. We cannot afford to wait until all of the problems of gas pricing are solved before dealing with the immediate transportation crisis.

This problem stems from the failure of the interstate pipelines to participate in the opportunity to voluntarily carry gas, which was afforded them by the Federal Energy Regulatory Commission [FERC] in their order 436. The FERC attempted to address many problems within the industry in this order: Transportation, take-or-pay liabilities, expedited certification, and block billing. As the Senate struggled and failed to comprehensively address these issues last year because there were too many problems to resolve, so the FERC may also be hampered. Perhaps it is time to address these issues separately.

Part A of FERC order 436 was intended to introduce competition into the interstate natural gas industry so as to benefit both consumer and producers through the vehicle of open access transportation. But, its effect on the industry since its issuance on October 9 has been just the opposite. Various programs that have been in place, referred to as special marketing programs [SMP], that heretofore provided for the transportation of natural gas, have ceased, thereby causing two immediate adverse effects. First, producers have lost the opportunity to sell "market sensitive" priced gas via the SMP's, causing billions of cubic feet a day of gas to be shut in in the producing States. Second, commercial and industrial companies, which represent all residential customers throughout the country, have lost the opportunity to purchase market-sensitive priced gas. This gas, in all instances, falls below the weighted average cost of the gas supplied by interstate pipelines system.

Congressional hearings were held on this order. The testimony heard from a vast segment of the Natural Gas Industry States in essence that open access, nondiscriminating transportation of natural gas, a concept known as contract carriage, must be available to insure the accessibility of competitive supplies of natural gas.

In response to the problems caused by the order, Senate Resolution 255 was introduced on November 7. It asked that the FERC provide certain incentives to pipelines which would provide them a reason to voluntarily transport gas.

Recent action by the FERC has provided some incentives. On Tuesday, December 10, the FERC extended the period for conversion for contract demand customers from 4 years to 5 years and reduced the percentage reduction from 25 percent annually to 15 percent the first 2 years, 20 percent the third year, and 25 percent each of the 2 remaining years. In addition, the FERC allowed for the extension of the expiration date previously set this Sunday, December 15, for section 311 transactions under the NGPA to continue until February 15, 1986. The pipelines have now received additional incentives to participate voluntarily in the open access transportation.

I hope that they will move to do so while we work on the overall pricing problems in the natural gas industry. Pipelines do have legitimate long-range concerns but we must in the short run get the gas moving to consumers on a non-discriminatory basis for the independent producing sector and for the sake of consumers as well.

I repeat, Mr. President, if this does not happen on a voluntary basis, I will certainly work with my colleagues early in the next session to write legislation to make certain that this shut-in gas moves at fair prices to consumer markets.

Mr. BRADLEY. Mr. President, the problem that both the Senator from Oklahoma and I are addressing today is a problem that results from there being more than adequate supplies of gas in the producing States of this country, there being very strong demand for this gas in the consuming States of this country, and there being an expressed unwillingness on the part of the major interstate pipelines to carry the gas from the willing producer to the willing consumer. This is a problem that I have worked with for at least the last 2 to 3 years on so-called contract carriage legislation, as part of the overall effort to try to allow the market to allocate gas and price gas nationally, and, over the last year, as an effort simply to connect these two willing participants in the marketplace, the consumer and the producer.

Mr. President, a little history: the original rule 436 was issued back in May 1985. It was a complex order and contained four interdependent parts. All aspects of the industry were affected and the four parts worked together as a package to spread the burden implicit in a sudden shift to a decontrolled national gas transportation system.

In October 1985, part 4 of the rules, the so-called block billing part, was delayed until the summer of 1986. This move, which was largely due to unsubtle pressure, I might say, from elements of the Senate Energy Committee, was an expensive one for consumers and a victory, I believe, for the producers. Studies have estimated that the block billing provision would have saved consumers about $5 billion this year.

But then in November 1985 a modified rule was enacted. It did not have block billing. The emphasis was now solidly on pipeline companies and the access to gas transportation on a nondiscriminatory basis.

This, I believe, was still a proconsumer rule and it had only two prob-

lems: The rule was voluntary and, almost without exception, the pipelines did not volunteer. In fact, only one major pipeline, Columbia Gas, has agreed to participate.

As it has turned out, the Columbia system is now being used to capacity for the first time in years.

Mr. President, there was also on this page Tuesday another FERC action. That action made two fundamental changes in the rule. First, it reduced the flexibility that pipeline customers will have to switch to suppliers who decide to participate in a competitive market. And, second, the grandfathering provisions which allowed certain gas transportation agreements to remain temporarily in effect were extended.

Neither of these changes represents a strengthening of the rule. Both, in fact, are changes much more likely to undercut the rule.

I say this for several reasons.

First, the extension of grandfathering provisions takes the heat off the pipelines. Even though many customers will remain cut off from the benefits of a competitive transportation system, the pipelines now face an enlarged market for gas. The market pressures for nondiscriminatory access, therefore, are mitigated.

Second, the access to competitive markets envisioned by FERC is metered by customers' allowable contract demand reduction. The latest FERC action slows dramatically the rate at which firm customers can turn to the competitive market.

The rule originally permitted a yearly contract demand reduction of 25 percent for each of 4 years. The modified rule has a 5-year phasing period with only 15 percent contract demand reduction allowed in the first or second year.

I might say by reference that the original bill that I introduced on contract carriage would have permitted 100 percent access immediately.

So, Mr. President, I think it is important that we look ahead at the direction that the FERC rulings have taken and at the reluctance on the part of the pipelines to carry the gas. In looking at the FERC rulings in the best possible light, we could say they should be incentives for the pipelines. Then we have to caution the pipelines to make sure they take this opportunity to embrace a market based on price competition.

The Senate is going to recess and we are going to go over until January. If over the next 6 weeks there is no progress and pipelines do not begin to carry more gas to willing consumers from willing producers, personally I think it could be time for legislation to mandate such action.

I might also say that a piece of legislation that was backed by a coalition of angry gas producers who have the gas and want to sell it, and angry gas consumers who want to buy the lowest possible priced gas, seems to me to be legislation that would move with speed and success in this body.

Mr. BOREN. Mr. President, I want to congratulate my colleague from New Jersey for the comments he has just made. Of course, it would be no surprise that on some points of the energy policy, the Senator from New Jersey and the Senator from Oklahoma would not be in absolute and total agreement. Block billing is one instance which has been mentioned today. Oklahoma has a different point of view.

What does come through loud and clear is what has just been said by both of us, that there is a very strong common bond between consumers who want to buy gas at a fair price and producers who now have their gas shut in and want an opportunity to sell it.

I agree with what the Senator from New Jersey said, that this is a very strong coalition that is building, a very strong community of interests that binds producing and consuming States together. I think it is a coalition that will be able very effectively to move legislation early in the next session if there is not action taken on a voluntary basis by the pipelines to provide the transportation of this gas.

My State is both a producing and a consuming State. We have consumers who are also going to be hurt and are being hurt by the failure to move gas. We have producers who are being devastated. They have no cash-flow now as their gas is being shut in. They are not able to service the notes on the money they borrowed to drill those wells, produce those wells. We have farmers. I do not tell anybody in this body the plight the farmers are in even those who are royalty owners. There are 100,000 royalty owners in my State alone who are principally farmers but who are deprived of that source of extra income to help pay their mortgage and save their land because this gas is now being shut in and not moved by the pipelines.

I understand the pipelines have some concerns. As I said earlier I am willing to try to work to address those concerns, but at this time, there is such a strong common interest in fair nondiscriminatory distribution of the gas now being shut in—inflicting economic damage at one end of the pipeline, being denied to consumers on a fair basis, inflicting economic damage at the other end of the pipeline—that I think we will be forced to take action if there is no action by the producers themselves.

Mr. President, I appreciate the comments made by my colleague from New Jersey.

Mr. BRADLEY. Mr. President, if I may, I wish to compliment the Senator from Oklahoma on the conviction with which he made his point. I think that both of us would like to see pipelines voluntarily carry gas. Both of us would like to see FERC remain strong in its view that the pipelines should carry the gas. I think as a last resort, we would look at legislative remedies, but I think the colloquy today should clearly put people on notice that we certainly do not exclude legislative remedies and that we will continue to talk along with many of our other colleagues, so that in the absence of any kind of substantial progress, there could very well be a legislative effort in the next session.

Mr. BOREN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. COHEN). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BOREN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

TRIBUTE TO TOM IMESON

Mr. HATFIELD. Mr. President, as the Sun sets on this session of the Congress, it might be helpful to look in retrospect at the milestones which came to pass in the last 12 months. Many will be quick to point to the Reagan-Gorbachev summit, the hysteria surrounding the adoption of deficit reduction package, which led to the resulting exercise in fantasy called Gramm-Rudman, and the numerous incidents worldwide exposing the spread of terrorism. All of those are worthy of immediate recognition.

But I would like to point to another milestone, one which passed quietly but not without poigniancy, which occurred in September when Tom Imeson left my staff to take a position with my friends at Pacific Power & Light [PP&L].

I first met Tom when he was a scruffy, wild-eyed 19-year-old kid. It was at that time in 1969 that Tom began working on my staff, and no one, not Tom, not I, not anyone, could have foreseen the tremendous service which was to come to the citizens of Oregon and this great country. When he left the Senate 3 months ago, in his wake were countless hours of staff work which went into historic legislation like the Oregon Omnibus Wilderness Act of 1977, the Wilderness Act of 1984, the timber contract relief bill, and the multitudes of other Oregon natural resource initiatives. Excepting a brief period in 1972 when he was working on my first reelection campaign, and the year of 1980 when Tom left my office to go into private business—until he came to his senses and returned to my employ—Tom Imeson's service to the people of Oregon was

uninterrupted. In many ways he became my eyes, my ears, and my voice in meeting after meeting on natural resource issues in virtually every city and county in Oregon. I cannot count the number of times representatives of environmental groups or timber companies or civic groups came to me and shared with me their high regard for Tom and for the manner in which he represented me. They would point to his sincerity, his humiliy, and most of all, to his truthfulness and competence, and value him as an exceptional asset of my office. Of course they did not have to tell me this—I knew it, Gerry Frank, our office AA knew it, and every past or present member of my staff knew it.

In the departure of Tom Imeson, I am reminded of a statement attributed to George Bernard Shaw, on precisely what constitutes happiness and fulfillment. He said:

> This is the true joy in life, the being used for a purpose recognized by yourself as a mighty one; the being thoroughly worn out before you are thrown on the scrap heap; the being a force of Nature instead of a feverish, selfish little clod of ailments and grievances complaining that the world will not devote itself to making you happy.

When I think of Tom Imeson, I think of a man with a great sense of purpose. He sees himself first as a husband to his wife Brenda and as a father to his sons Sean and David. And he sees himself as playing a role in the stewardship of the natural resources of the Nation, particularly the Northwest. In both of these capacities, Tom sees his purpose permeated by the desire to serve his God.

So while the Senate's loss, particularly my loss, is great, it is not begrudging. We are happy for Tom in his new employment with PP&L and we know that he will bring to that organization his customary competence and pleasantness as he endeavors to serve his purpose on this Earth by serving the needs of his family and his fellow citizens.

MIA's

Mr. LEAHY. Mr. President, one of the tragic legacies of the Vietnam war is the nearly 2,500 American servicemen listed as missing in action and, over a decade after the end of the war, still unaccounted for. The MIA families continue to endure uncertainty about the fate of their loved ones. There continue to be tantalizing hints that a handful may even still be alive. The Nation cannot bring to a close this sad chapter in its history. Whatever one thinks of the Vietnam war—and I was a firm opponent of our involvement—all Americans want to see this terrible MIA tragedy brought to a conclusive end.

I am appalled by the Government of Vietnam's manipulation of the MIA issue, apparently as part of an effort to prolong contact with the United States Government in the hope that these discussions might lead to wider contacts. Vietnam desperately needs economic assistance, and has long hoped the United States might become a major source of aid. In this Chamber, there may be many differing views on the wisdom or value of diplomatic ties or aid relationships with Vietnam. However, I believe no member of the Senate or indeed the Congress, would tolerate for an instant the use of the MIA issue as the basis for a broader exchange with that country.

If, as many believe, Vietnam is deliberately prolonging the search for the MIA's, and even is "warehousing" the remains of some to release periodically so that the United States will continue this channel of contact, then Hanoi profoundly misunderstands the feelings of all Americans about our missing men.

Mr. President, a bipartisan delegation of Senators, led by Senators FRANK MURKOWSKI and DENNIS DECONCINI, will go to Vietnam, Laos, and Thailand in January to seek greater cooperation from the governments of those countries in finally resolving the MIA cases. This is a most important and difficult mission, and I warmly commend Senators MURKOWSKI and DECONCINI for undertaking it. They have my strong support and my best wishes for success in their meetings. There are families of MIA's in my own State of Vermont. I want the U.S. Government to do everything possible to free any prisoners that may still remain in Indochina, and to find and bring home to a final resting place the honored dead.

Senators MURKOWSKI and DECONCINI demonstrate that this is an issue which unites Americans. It is a human issue—not a partisan one.

MARTHA LAMKIN AWARDED PRESIDENTIAL RANK MERITORIOUS EXECUTIVE AWARD

Mr. LUGAR. Mr. President, this week, my longtime friend, the area office director for HUD, Martha Lamkin, was awarded the Presidential Rank Meritorious Executive Award. She was 1 of only 96 Federal executives who received this award, although over 6,700 Federal executives were eligible.

To me, this was an extraordinary event. Located outside of Washington, working in a department that has not always enjoyed the best reputation, Martha Lamkin was picked for one of the most prestigious awards available to Federal employees.

She was picked because she epitomizes the best in public service. Quietly and professionally, she has transformed the State HUD office into an efficient, responsive, cost-effective organization.

In spite of large budget cuts at HUD, staff reductions at every level, and new stringent cost limitations in each program, Mrs. Lamkin has made HUD a positive force for Indiana progress. Builders, city officials, and homeowners have all found a new partner.

Cities throughout Indiana have found a willing ally in their efforts to develop, and to fight decay. Builders have found someone who has tried to help projects move forward rather than someone who has hindered. Cooperation and partnership have been achieved while meeting every efficiency and cost-cutting directive imposed by Washington.

Martha has achieved a remarkable record which is altogether consistent with her past record of dedication and high public service. She is well known and respected throughout Indiana. Now she has received a little well-deserved recognition at the national level and I thought my colleagues would like to hear an example of dedication and excellence as we struggle through the final days of this session.

YOUTH EMPLOYMENT OPPORTUNITY WAGE ACT OF 1985

Mr. DENTON. Mr. President, I regret that the Congress has not yet enacted the Youth Employment Opportunity Wage Act of 1985. It contains a jobs program that makes sense. The bill has 28 cosponsors and is an initiative proposed by the administration.

We know that employers are often reluctant to hire unskilled young people at the current minimum wage. By passing this legislation, we will give employers a real incentive to hire and train young people who might not otherwise have the opportunity to gain work experience and a paycheck.

I believe that we all understand the importance of work experience as a qualification for many types of employment. The National Bureau of Economic Research has estimated that work experience for young people is an important determinant of wages in the first 4 years out of school. The study suggests that each year of work experience is associated with a 10- to 20-percent increase in wages.

It is not surprising, therefore, that the proposal has gained the support of political and community leaders from across the political spectrum.

Supporters of the proposal from the business community include the U.S. Chamber of Commerce, the Business Roundtable, the National Federation of Independent Business, the National Association of Manufacturers, and the National Small Business Association. Furthermore, the proposal is supported by the National Conference of

Black Mayors, the American Association of Black Women Entrepreneurs, Inc., the National Alliance of Postal and Federal Employees, the National Association of Cuban-American Women and Men, and the other organizations particularly concerned about the well-being of minorities. These are only some of the organizations that support the bill. Many of these organizations have worked diligently for the enactment of the proposal. I am particularly proud that the Alabama Conference of Black Mayors strongly supports the measure. These leaders realize that the best hope for America's future lies in promoting job opportunities for teenagers.

It is not simply a question of economics. Serious social problems are created by youth unemployment. There is a definite correlation between juvenile crime and unemployment among young people. On the other hand, youthful employment teaches responsibility, budgeting skills, and the importance of economic independence. Most of us can remember well the great value of our own early employment and realize that we want our young people today to enjoy those same benefits.

The amendment contains several important provisions. It targets jobs for young people under the age of 20 years; the program would run from May 1 to September 30 for a period of 3 years; it allows employers to hire youth at $2.50 per hour, or about 75 percent of the current minimum wage, without requiring employers to meet certain paperwork requirements; it prohibits employers from using the program to displace current employees; and it would not add to the Federal budget deficit.

Some people are worried that by creating a youth minimum wage differential we will harm adult workers. I reemphasize, therefore, that this measure contains several important safeguards. First, it would create a temporary program of only 3 years duration; and it would require a report by the Secretary of Labor on the efficacy and effectiveness of a youth wage differential.

Second, the bill contains prohibitions against, and penalties for, displacing adult workers by substituting lower cost youth employees. Moreover, the program would not apply to any young person who has been employed by the employer at any time during the 90-day period prior to May 1 of any year during which the program would be in effect.

Those protections should ensure the integrity of the existing minimum wage, provide employers with incentives to hire teenagers, and give us an opportunity to experiment boldly with a new type jobs program, one that does not add to the Federal deficit.

Mr. President, I hope that my colleagues will recognize the need for the youth opportunity wage amendment. Despite sustained economic growth over the past several years, youth unemployment remains tragically high. The Department of Labor announced last week that over 10 million jobs have been created since President Reagan took office. Unfortunately, far too few have been created for our youth. The unemployment rate for youths as a whole is approximately 20 percent, while the rate is more than double that for black youth. In my home State of Alabama, the overall rate is approximately 30 percent.

If we act soon, thousands of teenagers in Alabama and across the Nation will benefit. It is estimated that the program would create approximately 400,000 new summer jobs for our youth. In addition, if those States with minimum wage laws also provide for a $2.50 summer minimum for young people, the employment could increase to 640,000 new jobs.

It is time for the Congress to enact this proposal. We should not let pass another summer during which millions of teenagers face the discouragement and frustration of unemployment. Let us instead use the power of the marketplace to tape the tremendous resource represented by our Nation's young people.

Mr. President, I ask unanimous consent to insert in the RECORD an article from the Birmingham News written by the Honorable William Brock, a list of all the organizations supporting the measure, and other material from several organizations supporting the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Birmingham News, June 23, 1985]

A "YOUTH OPPORTUNITY WAGE" BELOW MINIMUM WAGE MAKES LOTS OF SENSE

(By William E. Brock, Secretary of Labor)

Diversity is an exciting American phenomenon. As I've traveled throughout the country it's a fascinating montage. But there is, sadly, a common tragedy—teenagers are out of work in alarming proportions. According to the latest Labor Department figures, the nation's overall teenage unemployment rate is 18.9 percent. For black kids it's much worse—40.4 percent.

This is simply unacceptable. There is no single solution to this problem, but one idea that can be tried quickly and easily is a youth opportunity wage. This proposal would create additional summer jobs for teenagers by permitting employers to pay them $2.50 per hour instead of $3.35. It's a pretty straightforward concept. It says that many youngsters can't get work, can't get that first job, because companies now are required to pay any and all workers the minimum wage.

For many young people—especially those from disadvantaged backgrounds—the first step on the job ladder is the steepest. They've never had a real job before, so they have no work experience and no references from former employers.

Often their parents and friends are unemployed, so they are of little help in finding a job. The result is a cycle of frustration and failure that can lead to a lifetime of unemployment, welfare and crime.

A youth wage could help break the cycle. It imposes no paperwork or other bureaucratic burdens on employers. It simply encourages them to take a look at their operations with an eye toward finding additional entry-level jobs that they are willing to fill at $2.50 per hour but not $3.35. Isn't it better for a teenager to be working for $2.50 an hour than not to be working at all?

Of course, young people hired under a youth wage will appreciate the money they earn. In the long run, however, less tangible benefits may be more important. Those hired will experience the sense of pride and self-respect that goes with being a productive member of a society that puts a high value on work. They also will learn the essential disciplines of work: Punctuality, productivity, following directions and respect for supervisors and co-workers.

The youth wage proposal is only one part of a much broader effort to reduce teenage unemployment. This year the administration has allocated $825 million to the states to fund 770,000 summer jobs for disadvantaged youth. Young people also receive priority attention under the Job Training Partnership Act. Of the more than $3.2 billion spent on job training by the Department of Labor last year, more than $2 billion was targeted to youth.

The youth wage would supplement these efforts. But it would do so without requiring the expenditure of any tax dollars or adding to the budget deficit. And it would create jobs in the private sector. Here in the Birmingham area, as in the rest of the nation, the private sector is where the vast majority of jobs are, and where today's young people will have to earn their living as tomorrow's adults. The sooner they become acquainted with the private job market, how it functions and what its employers expect, the better.

Although untried in the United States, a general youth wage differential is not an untested idea. It is part of an overall approach to youth unemployment in Canada, as well as in the Netherlands, Sweden, New Zealand and Australia. By and large, the youth differential wage programs in these democracies have increased employment opportunities for young people.

Youth unemployment has been a festering problem in our country for more than three decades. A special wage for teenagers might make some difference. It could create 400,000 or more additional jobs. The administration's proposal calls for a three-year test limited to the summer months. It includes safeguards that can and will be enforced. It requires an evaluation report to Congress. And if it doesn't work, we can go on to something else.

But we owe it to ourselves and to our young people to give it a chance.

STATEMENT BY BOARD OF NATIONAL CONFERENCE OF BLACK MAYORS, APRIL 20, 1984

In a dramatic opening session of the National Conference of Black Mayors, the urgent need for new national policies to reduce unemployment among minority youth led to the passage of a resolution in support of an experimental summer youth opportunity wage program.

The resolution came in the face of strong arguments against relaxing any aspect of the standard wage floor.

At issue was the Mayors' concern that any lessening of wage standards versus the compelling need to develop new solutions to get minority youth off the streets and into gainful employment be addressed immediately. Present estimates of black teenage unemployment range as high at 75 percent.

A critical element in persuading the National Conference of Black Mayors' membership to go along with the ground-breaking resolution was the experimental character of the initiative, as well as the crisis in black teenage unemployment.

The real-life experience of black mayors at the grass roots level of government—seeing more and more structurally unemployed minorities and especially young blacks—and less and less money for summer employment—dictated that there be some effort, some experiment to help now to solve the problem.

The mayors hope that their leadership on the subject will lead to a constructive dialogue within the national and local black communities on how best to assure mainstream employment for black youth.

The fear expressed by some mayors was that support for this youth measure might be misread or misconstrued to suggest weakened support for full adult employment at full wages. To meet these concerns, clear provisions were insisted upon to bar any adult worker displacement, under pain of civil and criminal penalties.

RESOLUTION ADOPTED BY BOARD OF NATIONAL CONFERENCE OF BLACK MAYORS, ST. LOUIS, MO., APRIL 18, 1984

The National Conference of Black Mayors (NCBM) believes that everyone should earn the minimum wage or above. However, given the tremendous problem of youth unemployment and particularly the problem of minority youth unemployment and given the persistence of the tragedy of youth unemployment, despite a history of programs designed to reduce youth unemployment, be it resolved the NCBM supports an experimental summer youth opportunity wage program which increases youth employment opportunities which would not displace youth or adults currently employed at or above the minimum wage, and which provides sanctions sufficient to prevent abuse.

NATION'S OLDEST FEDERAL INDUSTRIAL UNION ENDORSES YEOW

In spite of labor opposition to a lower wage for youth workers during the summer months, the National Executive Board of the independent black led National Alliance of Postal and Federal Employees, today, endorsed the "Youth Employment Opportunity Wage Act of 1985."

"As the men and women on the National Alliance's Board struggled with the competing arguments for and against the legislative proposal known as YEOW, two factors above others compelled us to support the proposal," explained NAPFE President, Robert L. White, in announcing the Union's decision.

"First, youth unemployment is a major problem. The excessively high rate of unemployment among black teens is a national disgrace. No program to date has stemmed the tide of runaway youth unemployment. Clearly, our youth need job opportunities. And YEOW promises to create 400,000 summer jobs for youth.

"Second, even though the National Alliance unequivocally supports the minimum wage and believes that the current minimum is too low, the Union also realizes that many youth lack the adequate skills to earn the minimum wage. The YEOW program will give youth a foot in the door. The YEOW wage rate is a floor not a ceiling. A youth's first job leads to another job. We cannot afford to trap our youth in a lifetime of joblessness. Even if not fully successful, YEOW deserves a chance to prove its critics wrong."

Essentially, YEOW, if enacted, would apply to youth 19 and under from May 1 to September 30. It calls for a temporary three year program which would allow employers to hire youth at $2.50 per hour. White said the Union's leadership is satisified adult workers will not be displaced by youth workers provided there is strong enforcement of sanctions against substitution.

Commenting on the fact that the NAPFE position is a sharp departure from the stance taken by the affiliated unions, White said, "We are not afraid to stand alone on issues when we are guided by principle. In 1984, we were the only union at the national level to endorse Reverend Jesse Jackson's candidacy for the Democratic nomination. We were criticized then and we expect criticism now."

White emphasized the Union's endorsement of YEOW in no way supersedes its strong support for H.R. 671, "The Youth Employment Incentive Act." According to White, "It is simply imperative that as many steps as possible be taken to cure the problem of youth unemployment." White concluded, "It is significant that the National Conference of Black Mayors endorsed the experimental summer program since it is comprised of the very mayors who are confronted with the problems of jobless youth on a daily basis."

The NAPFE, the oldest industrial union in the federal government, has a regular and associate membership of approximately 50,000 spanning 137 locals in 37 states, the District of Columbia and the Virgin Islands.

U.S. CHAMBER ASKS EVERY MEMBER OF CONGRESS TO SUPPORT YOUTH EMPLOYMENT OPPORTUNITY WAGE ACT

WASHINGTON.—The U.S. Chamber of Commerce has asked each member of Congress to support passage of the Youth Employment Opportunity Wage Act which would allow the summertime hiring of 16-to-19-year-olds at 75 percent of the federal minimum wage.

In individual letters to all senators and representatives, Chamber President Richard L. Lesher said, "The need to provide job opportunities for youth is a critical problem which Congress has not addressed adequately to date."

He noted that the bill is also backed by the National Conference of Black Mayors, the Fraternal Order of Police and the Boys' Clubs of America.

Passage of the legislation would give more young people the opportunity not only to make necessary money from summer jobs but to gain the needed work experience for future permanent employment, Lesher said.

"The youth differential benefits employers, employees, consumers and young people. Employers, particularly small businesses in the service and retail industries, could hire additional workers and offer more services. The full-time year-round employee, who now often carries a heavier workload and more responsibilities as a result of reduced staffs, would benefit from additional help.

"Consumers might be afforded better service in cleaner and safer marketplaces. Most importantly, more young people would be given the opportunity to work, would be told "yes" instead of "no" when they put in their job applications, and would learn job skills and disciplines," Lesher said.

RESOLUTION OF SUPPORT—YOUTH EMPLOYMENT OPPORTUNITY WAGE ACT

Whereas, Boys Clubs of America currently serves over 1.2 million boys and girls in 1,100 Clubs across this nation and has been in service to young people for 78 years;

Whereas, the youth unemployment rate among 16 to 19-year-olds is currently over 18%, and is much higher among inner city youth;

Whereas, less than 3% of the more than 6,000,000 jobs created since November, 1982, have gone to teenagers;

Whereas, the unemployment rate for adults has consistently shown improvement and been under the 10% level for some time, thereby, easing the concern that teenagers might take their parents' jobs;

Whereas, the Youth Employment Opportunity Wage Act provides for stiff penalties, including fines and prison terms, against employers who discharge adult workers to hire eligible youth;

Whereas, the Youth Employment Opportunity Wage Act provides for a three year experimental program where 16 to 19-year-olds could be paid 75% of current minimum wage ($2.50 per hour);

Whereas, this Youth Employment Opportunity wage would only be in effect from May 1 through September 30, each of the three years;

Whereas, thousands of Boys Club members are unemployed and currently faced with limited employment opportunities;

Whereas, research indicates that the Youth Employment Opportunity Wage Act would create 400,000 to 640,000 new summer jobs for youth;

Whereas, at the summer peak only 58% of all the nation's white youth have jobs, and only 31% of all black youths have summer jobs;

Therefore, be it resolved that Boys Clubs of America supports the proposed Youth Employment Opportunity Wage Act which we view as a realistic effort to ease the unemployment problem among our nation's young people.

IN SUPPORT OF THE YOUTH EMPLOYMENT OPPORTUNITY WAGE

DEAR SENATOR: The Boys Club of America, Inc., Inter-Racial Conference for Human Life, National Alliance of Business, National Puerto Rican Forum, OICs of America, Inc., and SER—Jobs for Progress, Inc. share a common goal of increasing employment opportunities for the economically disadvantaged. For many years, a large part of our resources and daily activities have centered on providing training, counseling and leadership to needy and minority youth as they seek jobs or to those who work with them in this endeavor. We are very aware, from first hand experience, of the debilitating effects on society and young people when they cannot find work at a critical state in their development toward self-sufficiency.

We join together in this letter to reiterate our support for the youth employment opportunity wage (S. 797) now before the Senate. We endorse this measure because we realize, as does the Senate, that the magnitude of youth unemployment, particularly for minorities, affects our national well being and that this tragic situation cannot continue unabated without serious consequences. The youth employment opportunity wage provides an immediate and important response.

We have carefully considered the many issues inherent in a youth wage rate. Ultimately, we chose to support the Administration's proposal because it offers the promise of employment to potentially hundreds of thousands of young people currently denied the chance to gain experience, self confidence, effective work habits, and income for one's labor. Youth unemployment is caused, to a great extent, by the economy's inability to absorb all those who want work. The summer youth employment opportunity is designed to act as a stimulus for job creation—as many as 400,000 new jobs could result from its implementation. Any other initiative providing immediate job opportunities for so many young people would be prohibitive in a time of budget constraint.

Further, we believe that this legislation has been constructed to address the most pertinent concerns arising from a nationwide implementation of a youth differential. The legislation limits the wage rate to May through September and puts in place sanctions for the discharge, transfer or demotion of any current employees to protect workers not covered by the youth wage. Most significantly, this is a demonstration proposal that must be evaluated during the trial period. If Congress is satisfied with the results, the youth employment opportunity wage may be reauthorized. If not, the demonstration will be terminated. Regardless, we will have gathered extensive and valuable information on this long debated issue and its effect on youth employment.

At times, the current minimum wage works against the interest of those who are perceived by employers as less productive due to limited experience or age or immaturity. Workers who bear this burden most heavily are youth, and minorities in particular—the very individuals who often need extra help in entering the labor market. We are hopeful that by easing the minimum wage on a very limited basis, that young people will be less penalized by this side effect of the minimum wage law.

Finally, our organizations are strong advocates on behalf of targeted education and training programs serving economically and educationally disadvantaged young people. The youth employment opportunity wage is not a substitute for those programs that provide basic education, employability development, and skill training that will lead to long-term integration into the work force. These programs are essential because they deal with youth unemployment and its causal relationship from poor schooling, racial discrimination, and other socio-economic factors. But we recognize that these programs are limited to the extent that they depend on public funding, federal, state or local institutional support, attendant paperwork, and outreach to the targeted population. The youth employment opportunity wage is able to by-pass these hurdles in large part and make its case directly to the public. Employers may choose whether or not they will offer youth the new wage rate for summer employment, and teenagers can decide on their own whether to accept a job at that rate.

We believe the youth employment opportunity wage rate deserves to be tried. Coupled with a thorough federally supported evaluation, there is much to be gained and learned with little risk from this effort that can help improve the futures of our nation's young people.

We urge your support for this proposal, and we look forward to discussing this issue with you further.

Sincerely,

William R. Bricker, National Director, Boys Clubs of America; William H. Kolberg, President, National Alliance of Business; Elton Jolly, President, OICs of America, Inc.; Maurice Dawkins, President, Inter-Racial Conference for Human Life; Hector Valezquez, President, National Puerto Rican Forum; Rolando Esparza, President, SER-Jobs for Progress, Inc.

THE SALT II TREATY

Mr. LEAHY. Mr. President, as the 1st session of the 99th Congress draws to its weary close, I ask the Members to reflect on a very important fact: Had the SALT II Treaty been ratified, it would have expired on December 31 of this year. However, instead of having a legally binding treaty, the United States has been following a policy of informal observance of the main provisions of SALT II, so long as the Soviet Union showed equal restraint. That is a policy I and others in this body have advocated and, under considerable political pressure from the administration to leave it a free hand, fought to preserve.

In 1984, Senators BUMPER, CHAFEE, HEINZ and I introduced an amendment to the defense authorization bill urging President Reagan to continue the mutual observance of the SALT II ceilings, which the President calls the no-undercut policy. Our amendment putting the Senate on record for the first time in support of observance of SALT since Congress voted in favor of the SALT I agreements, passed by an 82 to 17 vote. To put it bluntly, Mr. President, 1984 was an election year, and many people wished to have a cost-free arms control vote. I say cost-free because, as was well understood in the executive branch and in Congress, the "no-undercut" policy required nothing of the United States in terms of dismantlements to that point, while forcing the Soviet Union to make significant cuts in sea-launched ballistic missiles to remain within the applicable SALT limits. Nevertheless, as I vividly recall, our amendment was bitterly criticized by some in this body, and fought until the last moment by the administration. Only when it became crystal clear that the Bumpers-Leahy-Chafee-Heinz amendment would pass comfortably did the administration drop its resistance.

This year proved a more difficult test for the mutual restraint policy. In August, the seventh U.S. Trident submarine, the U.S.S. *Alaska*, went to sea trials. Had the United States not initiated compensating reductions in other mutiple warhead ballistic missiles, we would have beached a key SALT II ceiling. Again, the same bipartisan coalition pressed the Senate to declare its support for the "no-undercut" or mutual restraint policy, in order to avoid a total collapse of restraints on strategic offensive systems. On June 5, by a 90 to 5 vote, the Senate adopted our resolution. This was the second time the Senate voted overwhelmingly that the United States should continue the SALT II ceilings. Mr. President, I would like to recall for my colleagues the key language of that amendment:

The United States should, through December 31, 1986, continue to refrain from undercutting the provisions of existing strategic offensive arms agreements to the extent that the Soviet Union refrains from undercutting those provisions, or until a new strategic offensive arms agreement is concluded; and provided, however, nothing in this section shall be construed as prohibiting the U.S. from carrying out other pro-

portionate responses to Soviet undercutting of strategic arms provisions.

On June 10, after the Senate vote, President Reagan announced that he would order the dismantling of the launchers on an old Poseidon submarine to offset the missiles on the new Trident. Thus, the policy of informally observing the SALT II limits was preserved, even at the cost of the United States, for the first time, actually dismantling strategic launchers to comply with the numerical ceilings.

Mr. President, we are all familiar with President Reagan's characterization of the SALT II Treaty as "fatally flawed" when he was campaigning against then-President Carter. Once in office, however, and facing the responsibility for U.S. security, President Reagan found, just as the Joint Chiefs of Staff had testified in 1979, that the SALT II Treaty limits favored the United States. More was required of the Soviet Union to comply with the SALT ceilings than was required of the United States. The deal was a good one for the United States, and it made no sense to scrap it. So, campaign rhetoric forgotten and real responsibility on his shoulders, the President decided to protect the national interest. I applaud him for it, even though I believe it would have been far better had he used his tremendous political base in 1981 to have asked the Senate to approve ratification of the SALT Treaty. This would have gained for the United States even more advantage, as the Soviets would have had to take a net reduction in strategic missiles of some 250 launchers to reach the new ceiling of 2,250. Perhaps even more importantly, the way would have been cleared for immediate initiation of SALT III negotiations. I do not think it inconceivable that, had SALT II been ratified in 1981, we could be on the threshold of deep reductions in SALT III at this very moment.

Mr. President, I ask unanimous consent to include in the RECORD several newspaper articles about the views of the Joint Chiefs of Staff toward observance of the SALT II limits and about the President's June 10 decision. I also ask unanimous consent to include in the RECORD at the conclusion of my remarks some excerpts from a recent study by the Arms Control Association entitled "Countdown on SALT II," which detail the dismantlements required by both the Soviet Union and the United States to remain within the numerical limits of SALT, and an article from today's Washington Post about the support of our NATO allies of the no-Undercut policy.

I would like to remind Members of the Senate again of the December 31, 1986, date cited in the Bumpers-Leahy amendment. It is clear the balance of obligations under the SALT II limits favor the United States through that period—and even longer in my judgment. Therefore, when the November summit was announced, I was optimistic that President Reagan, having twice made the decision to preserve the SALT limits, would seek an agreement with General Secretary Gorbachev to extend the interim restraint regime at least through next year. Senators BUMPERS, CHAFEE, HEINZ and I wrote the President urging him to take this step. My hopes were heightened when I read several stories in the press as the summit approached that conversations were going on between Secretary of State Shultz and his Soviet counterpart about the "no-undercut" policy, and that tentative agreement had been reached.

Then, Mr. President, came the notorious leak of the letter to the President from Secretary of Defense Weinberger recommending against any understanding with Mr. Gorbachev on SALT. This was a heavy-handed maneuver to energize SALT opponents and to box in the President. It may have coincided with the Presidents own views. It certainly made it politically more difficult for him to deal with the issue in Geneva. In any event, as we all know, the opportunity to seek an explicit understanding with the Soviets on the interim restrain regime was foregone. By all accounts in the press, the Soviets wanted such an understanding and it was easily within our reach had the President wished to capitalize on Secretary Shultz' presummit discussions.

Next year more decisions will be required of the President about SALT. In May, the United States will send the eighth Trident submarine to sea. The U.S.S. *Nevada* will put the United States over the 1,200 limit on launchers of multiple warhead missiles unless the President orders the offsetting dismantlement of the launchers on two Poseidon-class submarines. I read in the press that the Navy has already identified the candidate submarines. This is very encouraging. With another summit scheduled next year, there is reason to think that the President will maintain the current policy at least until he meets again with Mr. Gorbachev. Nevertheless, there will be great pressure on him to scrap the SALT limits. This effort is already visible in the press. I would simply remind the President that the U.S. Senate has twice made known, by huge majorities, that it believes the United States should not abandon the SALT regime, at least through 1986, while efforts are made to conclude a new arms agreement.

I ask unanimous consent that an article from Business Week of December 9 on the arms control situation facing the President after the summit be included in the RECORD at the conclusion on my remarks.

Mr. President, I and many others have fought for several years now to keep the United States and the Soviet Union within the SALT framework. We do so knowing full well that the SALT II Treaty is less than an ideal arms control agreement. We are aware that much more significant reductions and limitations are urgently needed to bring the arms race under control. But, we also recognize that, even with its absurdly high ceilings, its designed room for growth in weapons, its allowances for new systems, SALT is all that presently stands between the two superpowers and a totally unrestrained race in strategic nuclear weapons. That is why we have fought so hard, and why we, or certainly I at least, will continue to fight to keep the SALT regime in being until a new agreement is in place.

Mr. President, I firmly believe history will someday judge that not ratifying the SALT II Treaty was one of the major failures of the U.S. foreign policy in the final quarter of the 20th century. The strategic, diplomatic, and political costs have been very high, and only partly redeemed by the informal mutual observance of the numerical limits. In truth, the limits and ceilings of SALT are far less significant than the process of dialog on strategic stability for which SALT framework was devised. That process, inaugurated in 1968, was to be a rational effort by two nations which understood their very physical existence was at stake to reduce the risk of nuclear war. Its interruption in 1979 was a tragedy. The failure to resume it seriously in 1981 was equally a tragedy. What else but tragedy can we call the loss of the last 5 years?

Mr. President, one of the peculiar characteristics of being American is to have an abiding faith in technology's ability to solve problems. Technology has served us well, and contributed to the highest living standard in the world. But we also have a tendency to think technology can solve the nuclear threat. The President's conviction, and I believe it is a sincere and well-meant conviction, that star wars can end the nuclear menace is a manifestation of our fascination with technological solutions to a fundamentally political problem. Real disarmament depends on a basic alteration of the political equation between East and West. That will be a long time in coming. In the meantime, it is vital that we do whatever is possible to avoid a nuclear catastrophe. By failing to ratify SALT II and to get on immediately with SALT III, we have disrupted the most hopeful, most meaningful attempt to lower that terrible danger.

President Reagan has chosen a new and different strategy, one which combines an immense nuclear modernization program, a new technological ini-

tiative in strategic defense, and an effort to negotiate deep reductions at Geneva. I do not know what his strategy will produce. In frankness, my fear is it will lead only to even more frightful weapons, less security, greater instability, and a growing risk of nuclear holocaust.

Mr. President, December 1985 is indeed a month to remember. It might have been a month when we were celebrating the replacement of SALT by a new arms reduction treaty. Instead, to my profound regret, it is a month when we are marking what might have been.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[Published by the Arms Control Association and the Ploughshares Fund]

COUNTDOWN ON SALT II

U.S. SALT DEACTIVATIONS

The SALT I and SALT II agreements have required the United States to deactivate 320 ICBMs, 544 SLBMs and 11 nuclear-missile carrying submarines:

Between 1972-75, the United States removed 260 Minuteman I ICBMs and 60 Minuteman II ICBMs in order to increase the number of Minuteman III ICBMs from 230 to 550. (Replacement of the Minuteman I and II by the newer, MIRVed Minuteman III had been scheduled before SALT I.)

Since 1972, the United States has replaced 176 Polaris A-3 SLBMs on 11 submarines with Poseidon C-3 SLBMs.

Since 1979, the United States has replaced 192 C-3 SLBMs with Trident C-4 SLBMs on 12 submarines.

Since 1980, the United States has withdrawn 10 Polaris submarines carrying 160 A-3 SLBMs in preparation for the deployment of Trident subs.

In 1985 the United States was required to dismantle a Poseidon submarine carrying 16 C-3 missiles to remain within the SALT II limits as a new Trident missile-carrying sub began sea trials.

Between 1985-90, SALT II will require the United States to remove or retire a number of older ICBMs, SLBMs or ALCM-carrying bombers as new ones are deployed. Although the precise number of deactivations would depend on developments in U.S. modernization programs, approximately 200-300 systems would have to be removed:

The United States is scheduled to deploy between 50 and 100 MX missiles. For every MX deployed, a Minuteman III will have to be removed.

Three additional Trident subs are scheduled to be deployed, each with 24 C-4 or D-5 missiles. Because the United States has reached the 1,200 ceiling on MIRVed launchers, it will have to dismantle a MIRVed ICBM launcher or MIRVed SLBM launcher for every MIRVed SLBM deployed.

The United States plans to modify 96 B-52H bombers to carry ALCMs. (98 B-52Gs have already been so modified.) Once the number of ALCM-carrying B-52s reaches 120 in late 1986, the United States will have to retire either an existing ALCM-carrying B-52G or a MIRVed ICBM or SLBM launcher for each additional B-52H deployed.

SOVIET SALT DEACTIVATIONS

The SALT I and SALT II accords have required the Soviet Union to remove 1,007 ICBMs, 233 SLBMs, and 13 Yankee-class nuclear missile-carrying submarines:

In order to comply with the SALT I and II "freeze" on "heavy" ICBMs, between 1973-80 the Soviet Union withdrew 288 SS-9 ICBMs as SS-18 ICBMs entered the force. SALT II also prohibited the Soviet Union from testing and deploying a "new" heavy ICBM and limited the extent to which existing heavy ICBMs could be modernized.

Between 1974-84, the Soviet Union removed 510 SS-11 ICBMs as newer SS-17, SS-18 and SS-19 ICBMs were deployed.

Between 1979-85, the Soviet Union dismantled the missile-carrying portion of 13 Yankee-class submarines as new Delta- and Typhoon-class subs were added.

Between 1975-78, the Soviet Union dismantled 209 SS-7 and SS-8 ICBM launchers to allow for permitted increases in SLBMs.

Between 1977-85, the Soviet Union removed 212 SS-N-6 SLBMs as SS-N-18 and SS-N-20 SLBMs were introduced.

Between 1980-85, the Soviet Union removed 15 SS-N-5 SLBMs as it increased the number of SS-N-18 SLBMs.

Between 1983-85, the Soviet Union removed six SS-N-8 SLBMs as it increased the number of SS-N-20 SLBMs.

Had SALT II been ratified, the Soviet Union would have been obligated to reduce its aggregate number of ICBMs, SLBMs, and heavy bombers to 2,400 and then to 2,250 by January 1, 1981. Under those limits, the Soviet Union would have been obligated to dismantle approximately 250 additional launchers, probably ICBMs.

Between 1985-90, SALT II will require the Soviet Union to remove older ICBMs and SLBMs as new ones are deployed. Although the precise number of retirements will depend on the number and character of the new systems the Soviets deploy, they will have to deactivate approximately 500 to 600 missiles and launchers.

Between 1985-90, the Soviet Union is expected to deploy 250 SS-25 single-warheads ICBMs. For every SS-25 deployed in a silo, SS-11 or SS-13 ICBM will have to be removed. For every SS-25 deployed in a mobile mode, an SS-11 or SS-13 silo will have to be destroyed. (Recent reports indicate that the Soviet Union has begun dismantling SS-11 silos.)

Between 1986-90, the Soviet Union is expected to deploy 135 new SS-24 ten-MIRV ICBMs. For every SS-24 deployed in a silo, a MIRVed SS-17, SS-18 or SS-19 will have to be removed. For every SS-24 deployed in a mobile mode, an SS-17, SS-18, or SS-19 silo will have to be destroyed.

Between 1985 and 1988, the Soviet Union is expected to continue deployments of its MIRVed SS-NX-23 and SS-N-20 SLBMs. Prior to reaching the 1,200 ceiling on MIRVed launchers, the Soviets will have to remove an existing single-warhead SLBM for each SS-NX-23 or SS-N-20 deployed in order to stay within the overall aggregate of 2,504 launchers. In all, 80 SS-N-6s and SS-N-8s will probably be deactivated.

Once the 1,200 ceiling on MIRVed launchers is reached, the Soviet Union will be obliged to retire the MIRVed SS-N-18 SLBM or a MIRVed ICBM for every SS-N-20 and SS-NX-23 SLBM deployed. In all, 64 such systems will probably be removed.

Between 1985-90, the Soviet Union is expected to continue deployment of one Delta- and one Typhoon-class sub per year. For every sub deployed, the Soviet Union will have to dismantle the missile-launch section of a Yankee- or older Delta-class submarine.

[From the Burlington Free Press, June 12, 1985]

SALT II DECISION WAS CORRECT

Proving again that he knows when to part company with his right wing friends, President Reagan has abandoned his cold war rhetoric to announce that the United States will continue to honor the spirit of the Salt II treaty.

Angry conservatives, citing numerous violations by the Soviet Union, say Reagan has engaged in appeasement and unilateral disarmament by agreeing to dismantle an older Poseidon missile-firing submarine when a new Trident submarine is put in service later this year.

Our guess is that criticism is not shared by most Americans who understand that to abandon Salt II now would undermine efforts by the United States to conclude a new agreement with the Russians.

Even those of us who supported ratification of Salt II—the treaty was signed in 1979 by President Carter but was never approved by Congress—acknowledged is only a small step in efforts to reduce the nuclear arsenals of the world's superpowers.

However flawed the treaty might be, it represents a step in the direction of bringing the nuclear arms race under control in an era of overkill. If it had been abandoned by the United States, it would have been impossible to reach a more comprehensive agreement between the United States and the Soviet Union.

Certainly conservatives should be concerned about the failure of the Soviet Union to live up to the agreement. To abandon it, however, is to admit there is no hope of achieving sane controls over nuclear arms. Better that conservatives continue to press the fight for the Star Wars defense system than advocate our refusal to honor the treaty.

Reagan's decision is a clear signal to the rest of the world that the United States is committed to bringing an end to the arms race; and to reducing the risk of a nuclear holocaust.

[From the Christian Science Monitor, June 11, 1985]

WHY SALT II SURVIVES

(By Joseph C. Harsch)

Without much doubt President Reagan would have been happy to kill off the SALT II arms control treaty as he was being urged to do up to the last moment by his secretary of defense. Caspar Weinberger.

After all, Mr. Reagan had campaigned against the SALT II treaty during the 1980 campaign, just as he campaigned against the treaty with Panama.

But, as in the case of the Panama treaty, the matter of strategic arms limitations can look different from inside the White House. Mr. Reagan has never said a public word against the Panama treaty since he entered the White House or made any serious move to undo it. Now he has decided to let SALT live on in spite of alleged imperfections in the unratified treaty itself and in spite of allegations that the Soviets have been cheating on its provisions.

The reason comes in three parts. You may judge for yourself which reason carried the most weight when the President finally had to make his decision between Mr. Weinberger, who wanted to kill the whole SALT process, and Secretary of State George Shultz, who wants to go on with it.

First, there was a vote in the Senate last Thursday, June 6. The resolution before the chamber was "whether the U.S. should, through Dec. 31, 1986, continue to refrain from undercutting the provisions of existing strategic arms agreements to the extent that the Soviet Union refrains from undercutting those provisions. . . ."

The resolution is not binding on the administration, but the vote was 90 in favor of continuing to observe the SALT provisions against 5 in favor of ending the whole process. Any president will give serious attention to a vote in the Senate as overwhelming as 90 to 5.

It is a footnote to the Senate vote that public opinion polls have consistently shown a strong balance in favor both of pursuing arms control talks with the Soviets and of honoring those arms control agreements that already exist. It is assumed by all concerned that if the President were to scrap SALT II, the action would put an abrupt end to any prospect of any further arms control agreements with the Soviets. It would mean an open and unrestrained arms race.

Second, the NATO allies are all strongly in favor of continuing the arms control process, both by honoring all existing arms control agreements (insofar as the Soviets honor them) and by pursuing the arms control talks in Geneva. Had Mr. Reagan decided to go against the wishes of his partners in the NATO alliance, he would have handed an enormous propaganda platform to the Soviets.

Repudiation of the arms control process by the U.S. would have revived the peaceniks, and ban-the-bombers, the neutralists, and the marchers. The anti-American forces all over Europe would have been reactivated. The urge to neutralism that is always latent in Europe would have revived. America's best friends in Europe begged the President to keep SALT alive.

Then there was a third and essentially realistic reason. Which side would actually build the new strategic weapons, or weapons of any kind, if the lid were taken off the arms race?

Neither you nor I know for certain the answer to that question. But the people best qualified by training to appraise that answer are the members of the Joint Chiefs of Staff in Washington. They recommended in favor of keeping SALT II, on the ground that it would be easier for the Soviets to increase the number of their strategic missiles than for the U.S. The Soviets have their assembly lines going. They have bigger launcher missiles than the U.S. These could be fitted with more warheads.

In the opinion of the military experts, the present SALT rules restrict and limit the Soviets more than they restrict and limit the U.S. Besides, if the Soviets built many more nuclear warheads for their long-range missiles, the Pentagon would feel forced to try to meet the new Soviet buildup. This could take funds that the Joint Chiefs would rather have for other weapons.

Add that in the present Washington climate dominated by a torrent of reports of defense contract cheating, it would be more difficult for the Pentagon to get extra funds out of Congress than it would be for Moscow to get extra funds.

For these reasons Mr. Reagan continues to observe the SALT II treaty in spite of what he said about it on the hustings before he became President.

[From the Christian Science Monitor, June 11, 1985]

REAGAN DECIDES TO ABIDE BY SALT II

WASHINGTON.—SALT II remains intact.

After intense debate within the administration and facing extremely strong pressure from the European allies and Congress, President Reagan Monday announced the United States will continue to comply with the unratified second strategic arms limitation treaty.

Mr. Reagan has informed Soviet leader Mikhail Gorbachev of this decision, the White House said.

This means the US will deactivate and disassemble a Poseidon missile submarine to keep the US within the SALT II limits when sea trials of the seventh Trident submarine begin in September.

But in view of alleged Soviet violations of the accord, the President will keep available "proportionate responses" as a hedge against the consequences of Soviet actions. Such responses include accelerating development of the one-warhead Midgetman missile in addition to the 10-warhead MX and beefing up command and control facilities.

Reagan's decision indicates that the more moderate forces in his administration, led by US Secretary of State George P. Shultz, have won out over Defense Secretary Casper W. Weinberger and the hard-liners, who favor scrapping the pact. Clearly the decision has been a politically difficult one for the President, who treads a fine line between wanting not to undermine the arms negotiations in Geneva and yet still satisfy his conservative constituents.

The President's present stance carries some ironies. For years he campaigned against the unratified SALT II as running counter to US national interests and giving the Soviets the ability to build up their strategic nuclear forces. Now there is a growing recognition within the administration that, while the accord is far from ideal as an arms control vehicle, it is better than having no limits at all.

This is the basic position of the NATO allies, who warn that abandonment of SALT II would remove the one instrument now providing some stability in the US-Soviet strategic balance. Administration officials say the NATO pressures mounted greatly over the weekend, as European leaders urged the US not to further burden the nuclear and space arms negotiations under way in Geneva, and strain the atmosphere for a possible Gorbachev-Reagan summit meeting. The Geneva talks already are deadlocked over the President's "star wars" program.

"We studied this carefully from all ends and there's no doubt that the Soviets are violating the pact and we have no reason to continue the present policy of restraint," says a senior official.

"But because of the strong sentiment of our allies, who argued that we should go the extra mile and because of our own desire to go one step better and put ourselves on a higher plane than they, we went in this direction."

Under the pact, each side is permitted 1,200 multiple-warhead ballistic missiles on land and at sea. The Trident submarine carries 24 missiles, as against 16 on the Poseidon. So deployment of the next Trident will put the US at 14 missiles over the 1,200-missile limit unless a Poseidon is dismantled. The US has 1,190 long-range ballistic missiles.

Defense Secretary Weinberger argued that, inasmuch as the Soviets have not shown restraint in complying with SALT II, the US is under no further obligation to do so and should allow the pact to lapse.

Many in the arms control community and even members of the Joint Chiefs of Staff believe that an American breach of the treaty would be far more advantageous to the Soviets than to the US. This argument apparently weighed heavily in the final decision to comply with the pact.

For instance, the Soviet Union now has 818 ICBMs with multiple warheads, just under the 820 limit for land-based missiles. The US has only 550 multiple-warhead land-based missiles. So if there is a mutual breakout from the accord, the Soviet could quickly breach the 820 limit, especially because they are ready to deploy the new SS-X-24, the one new missile permitted under SALT II.

Some arms control experts say that—administration claims to the contrary—there has been no material Soviet breach of SALT II. Even the encryption of some missile-test data, while bad, has not been crucial to checking USSR missile tests.

"Encryption was done in the face of our not ratifying the treaty," says Gerard Smith, who negotiated the SALT I treaty. "Why should they help us out when we did not ratify the treaty? From their view, there was some flexibility because we can verify the Soviets without having access to all the telemetry."

The more important measure of compliance, says Mr. Smith, is staying within the limits for land-based and sea-based missiles—which the Soviets have done.

For all the flaws of the SALT agreements, arms controllers feel they have served a constructive purpose. Since the SALT I agreement was signed in 1972, experts estimate, the Soviets have dismantled 458 operational missiles on land and sea to stay within treaty limits (as against none for the US). This is more than 25 percent of the current US force in numbers and about one-third in terms of throw-weight, say experts.

One option considered in the National Security Council during heated internal debate these past few weeks involved dry-docking a Poseidon submarine but not destroying the missiles. Inasmuch as the US has six months to destroy the Poseidon, simply dry-coking the vessel would be technically within the treaty provisions.

The President has also directed the Department of Defense to make a specific review of Soviet actions and uncorrected violations and to identify specific actions the US might take to accelerate or augment its modernization program in response to Soviet violations. Such review would relate to defense activities and budget for 1986, say officials.

ADVISERS CONFLICT ON SALT II

(By George C. Wilson)

When President Reagan heard recommendations of his top advisers yesterday on whether to continue respecting the SALT II treaty, he faced an ironic difference of opinion between his civilian secretary of defense and his uniformed military aides.

The secretary recommended that the United States cease observing an arms control agreement he considers useless to American security, but the admiral and generals of the Joint Chiefs of Staff declined to endorse that suggestion.

Instead, the chiefs said the decision on sticking by SALT II after the unratified

treaty expires at the end of this year is a "political" one that Reagan will have to make. They warned that it would be risky to retire a Poseidon submarine and its 14 missiles later this year, as SALT II would require, but also noted the benefits of continued adherence to the arms pact's limits on both superpowers' nuclear arsenals.

The chiefs' presentation at the National Security Council meeting "was an analytical one," according to an administration official. "They reviewed where we are and where we would be in our strategic modernization program compared to the Soviets under various situations."

Gen. John W. Vessey Jr., chairman of the Joint Chiefs, emphasized that Congress may restrict the deployment of the new MX land missile so severely, officials said, that it might not be wise to retire the older Poseidon submarines as more new Trident missile subs go to sea.

Vessey's linkage of MX and Poseidon sounded to some officials like a step away from the chief's formerly solid support of SALT II and toward the position of Defense Secretary Casper W. Weinberger.

But the chiefs would not join Weinberger in flatly recommending abandonment of the SALT II treaty. Usually it is the civilian leaders urging the generals and admirals to support an arms control treaty, as was the case during the birth of both SALT I and II.

In the past, Vessey and the other chiefs have said that anything that limits the number of warheads targeted on the United States eases their problem of protecting the nation. From a military point of view, the potential nuclear threat to the United States depends on the number of warheads the Soviets can target against this nation's weapons and cities. The Joint Chiefs have traditionally argued that arms control agreements that hold down the number of Soviet warheads tend to stabilize the balance of terror, and hence are useful.

Both superpowers have relied on more than arms control agreements to protect their strategic forces. The United States and Soviet Union first fortified their land missiles by placing them underground and later sent other missiles to sea in submarines to decrease their vulnerability. Now the United States and Soviet Union are trying to make their land-based strategic missiles mobile to foil attack.

The Air Force is developing a small, mobile land missile called Midgetman which would be hauled around military bases to make it hard to target or hit. But the Midgetman could eventually prove vulnerable, too, if the Soviet Union deploys enough warheads to barrage the limited number of military bases where they could be located.

Without negotiated limits, some military analysts warn, the Soviets could deploy so many warheads that the only survivable long-range mobile missiles would belong to the Navy and its submarine fleet. Many Air Force leaders see the limits in SALT II as the best way to keep their land missiles from becoming obsolete. The Air Force could lose much of its strategic role if even mobile missiles became unacceptably vulnerable.

Navy and Army leaders also see military advantages to sticking with SALT II limits. With an unlimited number of warheads, the Soviets might be able to spray the areas of the oceans where U.S. submarines are known to hide. The Army, which has a big role in the nation's missile defense effort, would find itself faced with more Soviet warheads than its missile defenses could handle. Some military specialists also see an unlimited number of Soviet warheads as a threat to Reagan's hopes for a missile defense.

Weinberger and his arms control adviser at the Pentagon, Richard N. Perle, counter that the Soviet strategic buildup and modernization program would not be as inhibited as the United States' under the SALT II limits. They add that the Soviets have failed to live up to the limits in existing arms control agreements anyway, making continuing with SALT a losing proposition for the United States.

[From the Washington Post, June 4, 1985]

ALLIES COUNSEL KEEPING TREATY

(By Karen DeYoung)

LONDON, June 3.—The Western European allies believe that the SALT II limits on nuclear weapons should not be allowed to lapse, and fear that a U.S. decision against continued observance of the accord would be a setback for arms control, according to a number of allied government officials interviewed recently.

Several North Atlantic Treaty Organization governments, as well as NATO Secretary General Lord Carrington, have let the Reagan administration know that refusal to respect SALT II now could generate a hostile public backlash.

One European political leader, reflecting a widespread view, said that doing away with SALT II would make it more difficult in general for allied governments to defend the idea that the Reagan administration is sincere about arms control.

The Europeans say they are acutely conscious of their reputation in some U.S. circles as weak-willed, interfering partners. They say they have remained discreet in expressing to Washington their desire that the United States not break the treaty restrictions when they expire at the end of this year.

But they nevertheless have followed closely internal administration debates over continued U.S. observance. Officials said that the U.S.-Soviet treaty, which never was ratified by Congress but to which both countries pledged adherence until expiration, will be a key topic in their discussions with Secretary of State George P. Shultz when NATO foreign ministers meet in Estoril, Portugal, this week.

Already, Dutch Foreign Minister Hans van den Broeck is said to have told Shultz that breaking out of SALT II limits would make it even more difficult for his governments to win public support for deployment of 48 cruise missiles this fall.

"There will be many, many discussions between now and the 10th" of June, when the administration is due to inform Congress of its SALT II plans, one British official said.

Shultz is said to share the European belief that although the Soviets may have "cheated" on compliance, SALT II should continue in some form.

Shultz is expected to use the European warnings as ammunition in the debate with Defense Secretary Caspar W. Weinberger, who is said to argue that the treaty has been "unsuccessful" in holding back the Soviets and should be abandoned.

But while they continue to hold discussions with U.S. officials, the allies say they are reluctant to press the administration, or to make their views public. To do so, officials here and in West Germany said, would give the impression of a possible rift between them and the United States just as the second round of U.S.-Soviet talks on nuclear weapons reductions are to begin in Geneva.

At the same time, European governments feel that they have spent a significant amount of alliance capital recently in wavering over deployment of medium-range missiles, questioning U.S. economic policies and in their somewhat equivocal response to President Reagan's Strategic Defense Initiative.

Since SALT II is a bilateral accord between the United States and the Soviets, the British official said, it would be seen as "a bit cheeky to tell the U.S. what to do."

This official and others in the government and private defense community here said that the British government has three criteria on which its concerns about the SALT II decision are based.

First is that it "not undermine the whole process of arms control," either substantively or by supporting public notions here that Reagan is not serious about the subject.

"There is no public relations value in terminating the treaty," one defense academic said. "Now that the Russians have said they are willing to carry on" with the treaty from their end, "for the Americans to say no would be very silly. It is hard to see what they would gain."

Arguments by U.S. officials such as Assistant Defense Secretary Richard Perle that the Soviets already are so far ahead of the United States in ballistic missiles that the treaty is meaningless "have no intellectual substance," he said. "If the numbers don't matter, why are [U.S. officials] always putting out all those charts and graphs, and talking about gaps?"

The second British concern, officials here said, is that "whatever is decided helps in Geneva."

"The European view, or at least the British view," said one official, "is that we are basically in favor of arms control. Anything that makes that more difficult, or undermines existing agreements, we're against."

Thirdly, they said, there is an inherent element of "alliance management" in the SALT II decision, and a need to allay allied concerns even if consultation is not mandatory.

Several European allies remain skeptical about administration claims that it has the right to "break out" of arms control deals because of Soviet violations.

There is some concern about the Soviet encoding of missile test data and deployment of SSX24 missiles that are expected to become operational next year. But the Europeans say such matters are not grave enough to warrant desertion of the SALT II framework.

In addition, there is disagreement between Washington and the allies over what the administration has described as a principal example of Soviet treaty violations.

The view of many in the Pentagon is that the Soviet radar installation at Krasnoyarsk in Siberia is a battle-management facility that violates the antiballistic missile treaty.

The Europeans say they have not seen satellite reconnaissance photos that lead them to believe that the radar system is anything but an early warning or space tracking station. "We don't absolutely think it is a violation," an official here said.

The Europeans say, however, that they will continue to be discreet in expressing their concerns. "There is a limit to how much Europe can get involved in American strategic planning," said the academic.

[From Business Week, Dec. 9, 1985]

HOW TO TELL IF THE SUMMIT WAS MORE THAN JUST TALK

The attempt by President Ronald Reagan and General Secretary Mikhail S. Gorbachev to arrange a modus vivendi between the two superpowers is a fragile process. So far, it amounts to a pledge to keep talking despite continuing disagreements in key areas such as curbing nuclear weapons and avoiding conflicts in Third World trouble spots. By contrast, the Nixon-Brezhnev detente in the 1970s created a major stake, for both sides, in containing the arms race through the Anti-Ballistic Missile (AMB) treaty, the SALT I treaty, and negotiations for SALT II.

Decisions on SALT II that Reagan faces early next year will help to sustain the new "minidetente"—or to bury it. After Jan. 1, the formal expiration date of the unratified SALT II treaty, Reagan will have to decide whether to continue to observe its provisions or at least not to repudiate them. A test will come next spring when, to stay within the SALT II limitations, he will have to decide whether to dismantle an old Poseidon missile submarine when a new Trident begins sea trials. Compliance would give the arms talks an impetus they now lack. The deadlines on these issues could also force Reagan to take sides more clearly than he has up to now in the fierce debate within the Administration between arms control advocates and those, like Defense Secretary Caspar W. Weinberger, who want to scrap SALT II and relax ABM.

NO CLEAR PICTURE

For the time being, the summit is yielding substantial political gains for both Reagan and Gorbachev, at home as well as in countries they seek to influence, particularly in Western Europe. For Reagan, the agreement to consult regularly, to meet again at summits in 1986 and 1987, and to "accelerate" arms talks will ease worries in Congress and among European allies about an open-ended nuclear arms race. And Gorbachev, by yielding nothing on substantive issues, proved to the Communist Party hierarchy in Moscow that he is tough and consistent while reassuring Western Europeans with his reasonable approach. But "neither side has developed a clear picture of where it thinks relations are going and where it wants them to go," says Dimitri Simes, a Soviet expert at the Carnegie Endowment for International Peace and the Johns Hopkins School of Advanced International Studies. "That leaves future summits very vulnerable to events in Afghanistan, Nicaragua, Eastern Europe, or elsewhere, even if the Soviets don't want to stir things up."

In the arms talks that resume early next year, the lack of guidelines for negotiators could create a new deadlock at the outset over the major U.S.-Soviet dispute: whether to link cutbacks in offensive missiles to the Kremlin's demand that President Reagan halt his Strategic Defense Initiative, known as Star Wars. "Some Administration officials are taking [the Geneva commitment] to mean that we can go ahead with negotiations on offensive weapons and put SDI at least temporarily to one side," says Helmut Sonnenfeldt, a former National Security Council expert on the Soviet Union. "I doubt that the Soviets see it that way."

JUST DREAMING

Less predictable, and potentially less manageable, are U.S.-Soviet strains that could flare up in "regional" trouble spots. What put the last nail in the coffin of the Nixon-Brezhnev detente was Moscow's 1979 invasion of Afghanistan. Gorbachev indicated, according to Secretary of State George P. Shultz, that he is looking for a way out of the Afghan stalemate. But chances of a settlement are remote because Moscow, like the U.S. in Vietnam, is not willing to admit defeat. The Soviets "are determined not to abandon the regime in Kabul," warns Simes. "And if anyone thinks the U.S. and Pakistan can or will guarantee that the rebels won't continue to rise against that regime, they are living in a land of dreams."

One boost to stability in U.S.-Soviet relations is the apparent decline in Soviet enthusiasm for investing resources and political prestige to support new "wars of national liberation" in the Third World. But there is no sign that Moscow and its allies intend to abandon commitments they have already made. In Vietnam, which occupies Cambodia, the Soviets are expanding their naval base. In Angola, Fidel Castro is more determined than ever to keep Cuban troops in place as turmoil mounts in South Africa. And in Nicaragua, the payoff from a relatively modest Soviet investment in military and economic aid is a political asset that Gorbachev will not abandon lightly.

For U.S. business, a potential benefit is suggested by Gorbachev's invitation to U.S. companies to participate in "major" Soviet Projects. Top executives who will fly to Moscow in December for a meeting of the U.S.-U.S.S.R. Trade & Economic Council should learn more about their prospects.

So far, though, there is little to fill out the framework of the Geneva process in the months ahead. The good news, in the view of Paul C. Warnke, who headed the U.S. SALT II negotiators, is that the two leaders plan to meet again. The bad news, he fears, is that they will not achieve much in those talks, either.

[From the New York Times, Nov. 24, 1985]

U.S. SAYS SOVIET COMPLIES ON SOME ARMS ISSUES

(By Michael R. Gordon)

WASHINGTON, Nov. 23.—The Soviet Union has quietly taken steps to reduce some American concerns over purported arms-control violations, according to Administration officials.

The Soviet moves involve the cutting up of bombers and, according to intelligence reports, the possible removal of SS-16 missiles from a test center at Plesetsk in northern Russia.

The moves are of political importance because the United States has taken the position that it will not undercut the 1979 strategic arms treaty as long as the Soviet Union does not.

The 1979 treaty issue was not pursued at the Geneva summit meeting, officials said today. Nor was the question of Soviet violations dealt with in detail.

On Friday, a State Department official said these issues had not been raised in Geneva because they had been discussed by Secretary of State George P. Shultz on an earlier visit to Moscow. Mr. Shultz was said to have affirmed the policy not to undercut the treaty, although reserving the right to make appropriate responses to actions not permitted in the treaty.

REPORT TO CONGRESS DUE DEC. 1

The issue will receive attention soon when the Administration submits a report to Congress on purported Soviet violations. The report is due Dec. 1.

Administration officials caution that the positive Soviet moves have not removed concerns over other purported violations, such as the charge that the Soviet Union has violated the 1972 antiballistic missile treaty by building a large phased-array radar at Abalakovo near Krasnoyarsk in central Siberia.

The United States says the ABM Treaty does not permit such missile-tracking tracking radars in the interior of either country. The Soviet Union says the radar is intended to track space vehicles not incoming missiles.

The reported developments at Plesetsk are of interest because the 1979 treaty bans the testing and deployment of the mobile SS-16. It had been kept at Plesetsk, and an issue has been whether this constituted deployment.

In February, the United States said the Russians had committed a "probable violation" by deploying. But now, an American official said, "that problem may be going away."

The evidence is not conclusive and consists of observations of the moving of support equipment for mobile missiles, such as transporters for warheads, onto rail cars.

CONSENSUS ON PLESETSK MOVES

Officials said there was a consensus among intelligence officials that the activity at Plesetsk was consistent with the view that equipment for SS-16 missiles was being sent into storage.

But another possible interpretation, an official said, is that the equipment being moved might be for a different missile, the mobile SS-25.

Officials say the Russians may be in the process of moving in SS-25's as SS-16's are being taken away.

"They do not make the activities observable at a time when national technical means are capable of monitoring them," an official said, referring to satellite surveillance. Officials said no S-16's had been seen since the signing of the 1979 treaty.

There is less debate over other steps described by the Russians. The Soviet Union has said that it will not add to the number of strategic systems it had at the time of the signing of the 1979 treaty. That number was 2,504.

SYSTEMS DEPLOYED AND RETIRED

As new systems have been deployed, older systems have been retired. By a recent count the Soviet Union has dismantled 50 SS-11's to compensate for the deployment of 45 SS-25's.

The Soviet Union has also said that it has dismantled more than 30 Bison bombers to compensate for the deployment of new Bear-H bombers, which can carry cruise missiles.

The bombers have been placed in plain view at an airfield, officials said. This summer, the tail sections of 15 of the old Bison bombers were being cut off. The Soviet Union says the others have been converted to fuel tankers.

An Administration official said the United States have not accepted this Soviet assertion because the conversion of the planes could not be verified.

"There is no discernible difference in their external configuration," he said.

Officials say the issue is complicated by the fact that procedures on bomber dismantlements were never worked out after the Soviet intervention in Afghanistan and the United States decision not to ratify the 1979 treaty.

In addition to the moves relating to this treaty, there is general agreement that the Soviet Union has taken steps to stay within the limits of the first strategic arms treaty, of 1972, by continuing to cut up the missile-carrying portion of old Yankee submarines.

This leaves three purported violations of concern to the United States. They are the Siberian radar, which the United States says violates the 1972 antiballistic missile treaty, and the encoding of missile test telemetry and the development of the SS-25, which are said to be in violation of the 1979 treaty.

[From the Washington Post, Dec. 13, 1985]

NATO ALLIES PRAISE U.S. COOPERATION

(By John M. Goshko)

BRUSSELS, Dec. 12.—North Atlantic Treaty Organization foreign ministers unanimously praised the United States today for consulting its European allies prior to last month's Geneva summit and urged Washington to continue such consultations as it pursues further negotiations with the Soviet Union.

Sources familiar with the secret discussions at the NATO winter meeting here agreed that they were characterized by unusual harmony and praise for President Reagan's performance in his meeting with Soviet leader Mikhal Gorbachev.

The Europeans made clear to Secretary of State George P. Shultz their desire that the United States continue its voluntary compliance with the restraints spelled out in the unratified 1979 SALT II treaty.

There also were signs of continued European uneasiness about Reagan's Strategic Defense Initiative, or "Star Wars," and the effects that the Star Wars research program have on existing NATO doctrines of nuclear deterrence.

But, the sources agreed, the dominant theme was an upbeat emphasis on what one source called the need for "strength, dialogue and realism" as the United States prepares for further Geneva arms-control talks with the Soviets and an expected second Reagan-Gorbachev summit during 1986.

The ministers also approved a new policy, pushed strongly by the United States, calling for greater efforts to avoid duplication and waste in the development and production of new armaments. NATO officials acknowledged that substantial problems must be overcome if the policy is to be successful, but the U.S. delegation greeted the move as a positive step at a time of "national budget restraints and a widening gap between Warsaw Pact and NATO conventional capabilities."

The major European concern was focused on an impending decision by Reagan about whether the United States will continue adhering to SALT II restraints. Some senior administration officials have advocated abandoning that policy because of alleged Soviet violations of SALT II.

At the time of the last NATO ministerial meeting in June, Reagan announced that the United States would continue observing SALT II restrictions, but would keep reviewing that policy in the light of future Soviet conduct. The sources said that the Europeans, apparently relying on private assurances from Shultz, appear satisfied that the United States will continue that approach.

Some ministers, particularly British Foreign Secretary Geoffrey Howe, reportedly emphasized to Shultz the need for substantive progress in the Geneva arms talks if the United States wants to avoid a resurgence of antinuclear sentiment in West European public opinion.

Others, notably West German Foreign Minister Hans-Dietrich Genscher, reportedly noted lingering concern in Europe that the American SDI program, with its emphasis on a space-based shield against offensive nuclear missiles, could weaken the U.S. commitment to the nuclear defense of Western Europe.

But, while Gorbachev stressed that considerable further study and discussion is needed about the long-range effects of Star Wars defenses, the sources said that the issue appeared to be less controversial than in the past.

INTERIM RESTRAINT

Mr. CHAFEE. Mr. President, I am pleased to join my colleagues in this very important colloquy on the question of U.S. adherance to the unratified SALT II Treaty that expires on December 31.

In the absence of a new agreement on strategic offensive arms, a decision by the United States to abandon the existing policy not to undercut the terms of that SALT II Treaty would severely threaten the stability and predictability of the United States-Soviet strategic relationship. If we fail to adhere to SALT II restrictions, we would once again be off to the races—an arms race in which the Soviet Union would outpace the United States, at least in the near term. Over the longer term, the two sides would be forced to dramatically increase their advanced strategic weapons. To enter into such a race would jeopardize the chances for effective arms control and would have serious negative consequences on U.S. security objectives.

The United States and the Soviet Union should extend their commitment to adhere to the treaty, as was done when the SALT I Interim Agreement on Strategic Offensive Arms expired in 1977. If this is not done, there will be no agreed constraints in effect on the strategic offensive forces of the two superpowers.

I am not overlooking the fact that we have formally charged the Soviet Union with violations of the SALT II Treaty dealing with encryption and deployment of the SS-16 mobile missile. Likewise, the Soviet Union has leveled countercharges of U.S. violations concerning deployment of ground launched cruise missiles and Pershing II missiles in Europe. None of these charges are clear cut, and all relate to complex treaty provisions that are subject to differing interpretations. These problems should be vigorously addressed through the Standing Consultative Commission set up by the treaty for that purpose. The conversion of these accusations into a propaganda battle reduces the prospects of a satisfactory resolution and will undercut public confidence not only in SALT II, but also in the arms control process in general.

I would, however, like to point out that the both nations have generally adhered to the provisions of the SALT treaties on offensive weaponry. To comply with the limits established by SALT II and SALT I Interim Agreement, which SALT II replaced, the Soviet Union from 1972 to 1985 removed 1,007 land-based and 233 submarine-based ballistic missiles from its active force and dismantled 13 Yankee-class ballistic missile-carrying submarines as new weapons entered the force. Past Soviet military practices suggest that these missiles would not have been retired nearly as rapidly in the absence of SALT I limitations. On the U.S. side, 320 land-based and 544 submarine-based missiles have been removed and 11 ballistic missile-carrying submarines have been dismantled.

In the years 1985-90, SALT II will require the Soviet Union to remove between 500 and 600 ballistic missiles and to destroy missile silos equivalent to the number of mobile missiles deployed. In the absence of SALT II, the Soviet Union could deploy the SS-X-24, the SS-25 and other missiles now in advanced development without retiring any of its fixed land-based missiles, such as the SS-17, SS-18, SS-19 and SS-11. On the U.S. side, SALT II will require, between 1985 and 1990, the removal of between 200 and 300 missiles or bombers from the force as new systems are deployed.

Abandonment of the SALT II limits before a new strategic arms agreement is reached would thus harm U.S. security interests. By 1990 the Soviet Union could increase its total number of nuclear warheads and bomber weapons by almost 7,000—roughly twice the increase that the United States could make over the same period, and 4,000 more than the Soviets could deploy under SALT II. Without SALT, the Soviet Union could significantly increase the number and improve the capabilities of its heavy land-based missiles—the weapons that the Reagan administration considers the most threatening. In the long run, irrespective of which side ultimately gained a quantitative advantage, the United States would face the serious dangers and expenses of an all out nuclear arms race.

I feel it is in the best interest of our Nation to reaffirm the present political commitment not to undercut the SALT agreements. Reaffirmation, whether through bilateral agreement with the Soviet Union or unilateral declarations, would preserve crucial constraints on the arms race and improve the prospects for resolving disputes and for negotiating a new United States-Soviet agreement to limit and reduce nuclear weapons.

INTERIM STRATEGIC ARMS RESTRAINT

Mr. HEINZ. Mr. President, in 2 weeks the SALT II Treaty signed by the United States and the Soviet

Union in 1979, but never ratified, will expire. I want to use that milestone as another opportunity to stress the benefits of maintaining the current U.S. policy of conditional compliance with the treaty.

As most of my colleagues and I reaffirmed in June of this year, the United States is better off with the essential quantitative limits imposed by the SALT II Treaty than it would be without them. And despite serious, unresolved questions concerning Soviet compliance with certain other provisons of the SALT II regime, both sides have so far taken the steps necessary to stay within the central limits on multiple warhead missiles.

As the SALT II expiration approaches, so does the deadline for a Pentagon report on proportionate responses to Soviet violations of treaty provisions. Whatever the findings of this report, I hope that when President Reagan reads this document and considers its recommendations he will stand by his wise decision earlier this year to preserve the essential restraints on MIRV'd missiles so long as the Soviets do the same. There are responses to unsatisfactory Soviet behavior which will not undermine this crucial element of the SALT II package. We must keep in mind that while the Soviet Union has not been forthcoming in explaining such actions as the construction of the Krasnoyarsk radar or the testing of two new ICBM types, they have dismantled missiles in order to stay within the ceilings on MIRV'd systems.

So long as the Soviets respect the MIRV sublimits now in place, it will remain in the interest of the United States to likewise abide by these limits. Our military leaders recognize this. That is the reason they support President Reagan's policy of conditional compliance. This past March the then-commander of the Strategic Air Command, Gen. Bennie Davis, told a Senate committee that he had concluded the United States should continue to abide by SALT II limitations. His sentiments are shared by many prominent former military leaders, including Gen. Brent Scowcroft and Gen. David Jones, former head of the Joint Chiefs.

Our European allies also support continued compliance with existing limits. At a June conference of the NATO countries in Lisbon, West German Foreign Minister Hans Dietrich Genscher strongly endorsed President Reagan's policy of not undercutting SALT II. The allies recognize that maintaining the important restraints we have in place today is a good way of increasing the chances for success at the bargaining table in Geneva.

I join my colleagues in urging the President to reaffirm his commitment to abide by the essential provisions of the SALT II Treaty so long as the Soviets do the same.

Mr. SIMON. Mr. President, I am pleased to speak in favor of continuing to abide by the terms of the 1979 SALT II Treaty. If this treaty had been ratified by the Senate, it would have expired on December 31, 1985. Our policy has been to live up to its provisions as long as the Soviets do likewise. Apart from some ongoing minor disputes, they have done so, and we have generally done so. I urge the administration to continue its "no undercut" commitment until a new strategic arms treaty is negotiated.

The SALT II Treaty has been under attack for some time now. Candidate Reagan in 1980 called it "fatally flawed." Just before the summit, Secretary of Defense Caspar Weinberger wrote the President asking him to consider the disadvantages we would face if we maintained our support for the treaty. Secretary Weinberger outlined the numbers, but he was mixing apples and oranges: He listed all the reductions that would take place under the treaty, concluding that we would have to dismantle many more weapons systems than the Soviets, but failed to point out that he compared United States warheads with Soviet missiles.

Since many warheads can fit on one missile, naturally his numbers favored the U.S.S.R.

Some in the Defense Department are preparing a proportional response study, reportedly advocating selective violations to match Soviet violations. This is not the way to bolster a treaty that virtually all agree is in our national interest. Proportional responses should be a matter of last resort, and only then after we are absolutely certain that significant Soviet violations are occurring.

But instead of taking advantage of the dispute-resolution mechanism established in SALT I—the Standing Consultative Commission, or SCC—we have been treated to more than 2 years of public disclosure and denunciation. We have not allowed the SCC to operate quietly and privately and effectively. In the constant glare of publicity, the most insignificant or questionable violation becomes a major incident. If we are really concerned about Soviet violations, our time would be better spent trying to rectify problems through the SCC instead of amplifying them through the media.

SALT II is a long and complex treaty, the product of 7 years of negotiation. The treaty set up special counting rules and prohibited excessive encryption of missile flight test data to ease the difficulties of verification; imposed a freeze on the number of warheads that could be placed on a missile; prohibited new heavy ICBM's like the Soviet SS-18; and placed subceilings on the number of multiple warhead ballistic missiles that may be deployed by either side.

Critics charge that the Soviets have not lived up to these and other key provisions. There are questions about compliance; this is natural on something as complex as this. But it should be noted that Moscow has dismantled almost 700 more land-based missiles and 2 more ballistic missile submarines than we have since SALT I began in 1972.

But the importance of SALT II lies in what may have occurred in its absence. There the record is clear. Without SALT II constraints, the U.S.S.R. could have added another 4,000 strategic warheads by 1990. Under SALT II, the Soviets must dismantle about 300 more missiles than we must as each side modernizes its strategic forces.

The treaty has been unfairly abused. Its ratification would have been in our national security interests. That is still true today. But some of the treaty's terms need revision and others have expired.

I urge my colleagues and administration officials who are not in favor of the treaty to reconsider the consequences to the strategic balance and to arms control if we abandon SALT II. I would also urge the Reagan administration to live up to the treaty's terms as long as the Soviet Union does likewise, and to postpone any proportional responses until the SCC has a fair chance of resolving disputes. We should not usher in 1986 with a program designed to damage the climate for future arms reductions. Let's give the summit process a chance to succeed, and let's give our Geneva negotiators a vote of confidence in diplomacy over confrontation.

SALT NO-UNDERCUT

Mr. EVANS. Mr. President, September 16, 1985, was a milestone in the recent history of arms control. On that day the commander of the *Sam Rayburn*, a 22-year-old Poseidon nuclear missile submarine, piloted that vessel into the Charleston Naval Shipyard so that work could begin on dismantling its missile tubes.

Taking the *Sam Rayburn* out of service was a clear and unequivocal statement that the United States has retained its featly to the arms control process. In effect, we have said that even though the SALT II Treaty was never ratified, and even though the treaty, even had it been ratified, would have expired on the last day of December this year, we believe that the integrity of the arms control framework should be preserved even as we seek to improve it.

I am certain that it was difficult for the President to make the decision he did. He has stated in the past his belief that the SALT II Treaty has serious flaws. Yet he recognizes that, de-

spite its flaws, SALT II is good for America.

Mr. President, there is a certain irony in the belief that the imperfections of arms control agreements are cause to abandon the arms control process. No one has ever claimed that the process is infallible or that the agreements concluded to date are the best possible agreements. However, if history teaches us any lesson, it teaches us success is often forged in the hot fires of failure.

We as humans are imperfect by nature. Yet it is our unique ability to apprehend an idea that often guides us to proper action.

The SALT I interim agreement was, by today's standards, crude. By its terms it froze each superpower's arsenal of missile launchers without imposing any qualitative restrictions on the missiles placed in those launchers. One of the results of that lack of foresight was that the Soviets were able to deploy the SS-18 missile with its tremendous throw-weight capability. No missile poses a greater threat to the United States today.

By any measure, the SALT II agreement was a vast improvement over SALT I. SALT II established quantitative ceilings and subceilings limiting deployment of the major strategic weapons systems possessed by each side. We also learned from the mistakes of SALT I and established certain qualitative restrictions on new systems.

Yet, despite the lessons learned during a decade of negotiations, we have only recently begun to focus on the appropriate arms control idea: arms reduction. SALT I and SALT II were flawed not so much because of their terms, but because they served merely to manage what have proved to be ineluctable increases in the destructive capability possessed by both the Soviet Union and the United States.

We need to reduce our nuclear stockpiles. I am greatly encouraged that both the United States and the Soviet Union currently have on the table at Geneva proposals to reduce by half the number of warheads deployed on each side. Yet, it is apparent that much more work—and much more time—is needed before we can expect an agreement.

I firmly believe that, just as SALT II was founded on SALT I, future agreements must rest on a firm footing. The rubble of destroyed agreements will not sustain any lasting future structure.

Over the next months, I expect to be involved actively in the continuing debate about the defense policies of our country. Yet, I recognize that as a U.S. Senator I can only provide advice to those ultimately charged with preserving our security. It is my fervent hope that the next round of discussions in Geneva will take us closer to the ultimate goal that all people share: A secure and lasting peace.

ON MAINTAINING THE SALT II TREATY

Mr. KERRY. Mr. President, the SALT II Treaty expires in 2 weeks.

The question this Nation faces is whether or not continued adherence to the agreement is in the interests of the national security of the United States.

Simply put, is the United States safer if both it and the Soviet Union abide by the numerical restraints on nuclear weapons contained in SALT II, or are we safer resuming an unrestrained competition to add warheads and delivery systems to the nuclear stockpile by both sides?

Neither the President nor anyone I think in this body believes that anyone can win a nuclear war. Our nuclear forces can blow up the Soviet Union many times over, should it ever attempt a first strike. How is our security improved by eliminating the restraints on the arms race by ceasing to abide by SALT II?

It has been suggested that SALT II offers the United States no real protections against a Soviet buildup, and that the Soviet Union cheats on arms control agreements, and that the United States should not tie its hands while the Soviets continue a relentless nuclear buildup.

It is true that there are compliance issues, and these issues must be resolved—either in Geneva, or at the Standing Consultative Commission. But it is also true that SALT II has already demonstrably restrained Soviet behavior, and continues to place limits on nuclear weapons.

To comply with the limits established by SALT II and by the SALT I interim agreement, the Soviet Union, from 1972 to 1985, removed more than 1,000 land-based and 233 submarine-based ballistic missiles as new weapons have entered the force. Without these limits, the Soviets need not have dismantled these nuclear weapons. In the same period, the United States has dismantled 320 land-based missiles and 544 submarine-based missiles to comply with the SALT limits.

The SALT II limits will become even more important over the next 5 years than they have in the past. If SALT II limits remain in effect, the Soviet Union must remove 500 to 600 ballistic missiles by 1990, and must destroy missile silos equivalent to the number of mobile missiles they deploy. In the absence of this treaty, the Soviet Union could deploy SS-X-24 and SS-25 missiles without retiring any of its land-based missiles—SS-17's, SS-18's, SS-19's, and SS-11's.

It is particularly important that the United States not abandon the SALT II limits while we are seeking to negotiate cuts in nuclear weapons at Geneva. The Geneva negotiations will be difficult in any case. The difficulties can only increase if the fixed limits set by SALT II are abandoned, and both sides begin unilateral deployments of new nuclear weapons. At the least, SALT II has provided a fixed base from which both sides can work to negotiate a new treaty. It is far harder to negotiate a treaty when both sides present a "moving target" in the form of further deployments beyond the SALT II levels.

I believe that U.S. security would be best served by formal ratification of SALT II. In the absence of ratification, we should at least reaffirm our present political commitment not to undercut the SALT agreements. Such a reaffirmation would preserve constraints on the arms race, improve the prospects for resolving disputes over compliance, and for negotiating a new United States-Soviet agreement to limit and reduce nuclear weapons.

Now is not the time to abandon SALT II and the treaty process, but to strengthen it.

(By request of Mr. EVANS, the following statement was ordered to be printed in the RECORD:)

● Mr. GORTON. Mr. President, the Geneva meeting between the leaders of the United States and the Soviet Union focused the world's attention on issues of peace, including the critical importance of the arms control talks. This meeting did not produce a breakthrough in arms control, but so long as the United States and the Soviet Union continue to show restraint in developing and deploying new nuclear weapons systems there is good reason to be hopeful that progress may come in the future. I'd like to take this opportunity to express my strong support for the President's decision earlier this summer which keeps the United States in compliance with strategic arms agreements and to explain why I believe he made the right choice.

In the summer of 1984, I urged the President to abide by SALT II so long as the Soviets acted with comparable restraint. At that time, his position on continued United States compliance was under reconsideration because of concerns over questionable Soviet activities. In my view, eventual progress in arms control, then impossible because of the Soviet walkout, depended on a period of mutual interim restraint to keep the cap on the arms race until talks could resume and new agreements reached. The President assured me personally that we would continue not to undercut the agreements until a thorough policy review was completed.

That review was mandated by Congress and was timely because the seventh Trident nuclear submarine, the *Alaska*, would soon begin sea trials. Its 24 missiles would have put the United States over SALT II limitations. In

order to comply, we would need to dismantle an older Poseidon submarine. The result of our restraint, if the Soviets matched it, would be to demonstrate faith in strategic arms negotiations without loss to our security.

Essentially, the President had three choices. He could have decided to keep the Poseidon, thus exceeding SALT II limits going against the advice of the Senate and our NATO allies. Such a course of action was advocated by some on the ground that, in view of probable Soviet violations, it would make little sense for the United States to adhere to SALT II unilaterally. The problem with this position is that Soviet violations have not yet been flagrant and irreversible, but would probably become so if the United States opted to ignore the agreements. The arms race would surely escalate.

Another option open to the President was to exploit a gray area of the treaty, specifically that portion which requires dismantling older weapons systems when new ones come on line. The possibility of putting the Poseidon in drydock, rather than removing its missiles and launch tubes, was given very serious consideration. The problem with this option is that it would clearly violate the spirit of SALT, and give the Soviets the opportunity to build more offensive weapons as they could claim that they were not responsible for the collapse of the agreements.

In addition to removing curbs on the arms race, both of these options would also have damaged the negotiating atmosphere at Geneva. Wisely, the President chose the third path of moderation. By making a commitment to another period of compliance, which should extend beyond SALT's expiration date, the United States has given the Soviets an opportunity to show restraint themselves and good faith at the bargaining table. An interim framework for mutual restraint, which establishes a bridge between SALT and future agreements, is in American and Soviet—indeed all people's—interests.

Mr. President, if the Soviet Union shows comparable faith, the likelihood for progress in the Geneva talks and continued peace will be greatly enhanced. The ball is clearly in the Soviet's court.●

Mr. RIEGLE. Mr. President, according to recent news reports, President Reagan may be preparing to alter current U.S. policy of adhering to the limits of the SALT II Treaty.

I rise today to join my colleagues in urging the President to continue our no-undercut policy with respect to this important arms control agreement.

Through an amendment adopted last year by a vote of 82-17, the Senate expressed its overwhelming support for continuation, through 1985, of this policy. The Senate further urged the administration to vigorously pursue the resolution of any alleged Soviet treaty violations through proper channels—the Standing Consultative Commission.

Mr. President, I commend the administration for its voluntary compliance with Congress' recommendation to honor the SALT II limits.

On June 10, 1985, President Reagan announced that, despite concerns over Soviet noncompliance with SALT II, he believed it to be in our national interest to:

> • • • continue to refrain from undercutting existing strategic arms agreements to the extent that the Soviet Union exercises comparable restraint and provided that the Soviet Union actively pursues arms reduction agreements in the currently ongoing nuclear and space talks in Geneva.

In September, the United States dismantled a Poseidon nuclear submarine in order to prevent the imminent deployment of a new Trident submarine from pushing the number of U.S. multiwarhead ballistic missiles above the ceilings set by SALT II.

Mr. President, the question of continued compliance with the terms of the SALT II Treaty first presented itself to the Reagan administration in 1981.

The reasoning that led the President to determine that it was in our best national security interests to continue a no-undercut policy 3 years ago is just as compelling today.

SALT II, despite its flaws, has imposed some important restraints on the arms race. Superpower compliance with that agreement has reduced somewhat the risk of a nuclear war, and has, I believe, moved us one step closer to stopping and eventually reversing, the nuclear buildup. That is why both countries find it in their mutual interests, despite deep suspicion and mistrust, to continue to honor the limits of the SALT II Treaty.

Two key issues of concern to advocates and opponents of the no-undercut policy alike are alleged violations of the terms of the treaty and the fear that one superpower may decide to break out of the treaty's limits altogether.

It remains a fact that the Soviet Union has a much greater breakout potential than does the United States. Instead of building complicated new systems like the MX, the Soviets could simply add more warheads to the missiles they already have. The giant SS-18 missile currently carries 10 warheads, but it could be fitted with 30 or more. As a result, the Soviets could have 15,000 warheads by the end of the decade—a significantly higher number than they are allowed to have under SALT II. That, in turn, could force the United States into a costly expansion of its offensive and defensive capabilities.

I have long felt that failure to decelerate the arms race by mutual agreement can only lead to an unrestrained acceleration of the arms race. However frail the tangible gains of SALT II may appear, their greatest value can be measured by the absence of monumental new dangers that would quickly appear without SALT II.

My support for continuation of the no-undercut policy, like my earlier support for Senate ratification of the SALT II Treaty, is based on my belief that the monitoring safeguards and procedures in the treaty provide us with important means of keeping track of Soviet strategic arms activity.

Our legitimate concern over Soviet treaty violations must not blind us to the fact that, like the United States, the Soviet Union has taken concrete steps, including the dismantling of some of their own weapons systems, in order to stay within the SALT limits.

Mr. President, the Standing Consultative Commission, created by the SALT I accords in 1972, exists to monitor SALT compliance, and provides a forum in which the two superpowers can address their concerns over potential violations. In a recent article, Sidney N. Graybeal, former U.S. Commissioner to the SCC, and Michael Krepon, of the Carnegie Endowment for International Peace, noted:

> • • • both governments have taken care to keep the SCC channel open during periods of harsh public exchanges. Useful discussions of sensitive military subjects continued even after the Soviet Union walked out of negotiations on strategic and intermediate range nuclear forces in 1983. Recently, modest progress has been made in the SCC, although major compliance problems, such as the construction of the Krasnoyarsk radar, have not been satisfactorily resolved.

Arguing that "the Standing Consultative Commission is an indispensable channel of communications between the superpowers over SALT implementation and compliance • • •", the authors caution that:

> When political relations between negotiating partners deteriorate to the point where intentions toward existing treaty obligations are called into question, the SCC cannot be an effective, problem-solving forum. If and when bilateral relations improve and both superpowers clearly signal their desire to reaffirm existing SALT commitments, the SCC can again resolve difficult compliance problems.

Mr. President, the recent summit meeting in Geneva between President Reagan and Soviet leader Gorbachev demonstrated the desire of both superpowers for improved bilateral relations.

As efforts continue to put into place concrete agreements to facilitate closer United States-Soviet relations, it is critically important to preserve, for as long as possible, existing arms control agreements. It would be the height of folly to discard the only

mechanism we have to restrain an even more frantic arms race.

Therefore, I urge the President continue the no-undercut policy, which has the strong support of our NATO allies. Their vital security interests, like our own, are best served through continued compliance with SALT II.

Mr. HART. Mr. President, as we approach the formal expiration of the SALT II Treaty on December 31 of this year, it is critical for this body to express its strong, bipartisan support for continued adherence to this treaty. Although unratified, this treaty has guided this administration in its nuclear policies since 1981. This is sound policy and the administration should be commended. However, it is now time for both the United States and the Soviet Union to extend their commitment to the treaty's provisions, as was done when the SALT I interim agreement on offsensive arms expired in 1977.

Mr. President, as the administration has recognized by its own actions, the SALT II Treaty has contributed to the security of the United States by imposing verifiable constraints on Soviet force developments. Even with the controversies we have experienced in the past few years over both sides' compliance to the treaty's provisions, no one disputes we are better off with some contraints on the Soviet nuclear arsenal than with none at all.

By the administration's own analysis, the Soviet Unon is observing the most important numerical ceilings in SALT II, including those of special importance to U.S. security—constraints on multiple warhead systems. Agreed constraints on these systems have directly contributed to stability by discouraging accelerated Soviet development of missiles which pose a particular threat to the survivability of our own deterent.

Moreover, since the inception of the SALT I interim agreement, treaty obligations have forced the Soviet Union to dismantle a significant number of strategic nuclear systems. Between 1972 and 1985, the Soviet Union removed 1,057 land-based and 233 submarine-based ballistic missiles from its active forces and dismantled 13 *Yankee* class ballistic missile-carrying submarines. These force reductions would not have been possible in the absence of SALT II.

Mr. President, at a time when our Government has placed the highest priority on reducing nuclear arsenals and lessening the risk of nuclear war, continued adherence to a treaty which constrains a Soviet strategic buildup is simple prudence. Abandonment of the SALT II limits would reduce significantly the prospects for reaching a new United States-Soviet strategic arms agreement. Any further erosion of the framework for arms control developed over three successive administrations would, by definition, erode the foundations upon which any new agreements must build.

In the aftermath of the recent United States-Soviet summit meeting, even the modest step of extending the SALT II Treaty would be an important demonstration of our commitment to seek broader and more comprehensive arms control agreements—and of our commitment as a nation to world peace.

SALT STRENGTHENS AMERICAN SECURITY

Mr. BUMPERS. Mr. President, It has been 6½ years since the United States and the Soviet Union last signed an agreement to place some restraints on the nuclear arms race. There was a great debate at the time about whether SALT II was in our national security interest. I was greatly disappointed that the Senate chose not to ratify the treaty because I thought then, as I believe now, that SALT II was a modest but useful step for our security. This was also the opinion of the Joint Chiefs of Staff and has remained their opinion. Why SALT's critics didn't believe them I just don't know.

Today, as we approach the date of December 31, 1985, when that treaty would have expired had it been ratified, we can look back and see who was right. For even though we didn't ratify SALT II, we did the next best thing: We pledged to abide by it, and the Soviets did likewise. More importantly, with the benefit of this look back, we can look forward and see what should be our future policy with regard to both SALT II and the offensive limits of SALT I which, incredibly enough, expired over 8 years ago yet still place limits on the forces of both sides.

A look back shows clearly that the arguments of those who opposed SALT II were seriously flawed. SALT II was criticized because it would not produce real reductions in nuclear weapons, it would allow the Soviets to increase its warhead levels, it would allow the Soviets a monopoly in heavy ICBM's, and it did not count the Backfire bomber as a strategic weapon. The major flaws in the critics' arguments were that they ignored the advantages that SALT II gave us. They never demonstrated—because they could not—how rejecting SALT II made any of those problems easier for us, and they utterly failed to address the real question: Would we be better off with the treaty or without it?

So SALT II would not have stopped the Soviets from increasing their warhead levels. Did failing to ratify SALT II stop them? Of course not. But Soviet SALT adherence has left their warhead totals smaller than they otherwise would be, and continued SALT adherence will continue to provide that important benefit.

So SALT II would give the Soviets a monopoly in heavy ICBM's. Did failing to ratify SALT II make this monopoly go away? Of course not. We never planned to build any of those monster missiles anyway.

SALT II didn't include the Backfire bomber in its limits. Did failing to ratify SALT II limit the Soviet Backfire threat? Of course not. But SALT II did limit the Backfire's production rate, and now it has been recently reported that the Pentagon was wrong, the Backfire does not have the range that SALT's critics once claimed it did.

What has SALT done over the years? A lot more than its critics want the American people to know about. SALT has forced the Soviets to dismantle about 500 operational missiles and bombers that otherwise would have remained operational. The United States, by contrast, has had to dismantle only 16.

The Soviets are continuing to dismantle missiles today to comply with SALT. This is one of the great untold stories of arms control. Since 1978, the Soviets have dismantled 13 operational missile firing Yankee-class nuclear submarines to comply with SALT I's offensive limits, which technically have expired, and they continue to do this. According to the New York Times, the Soviets have dismantled SS-11 ICBM's and Bison bombers in recent months to compensate for the deployment of SS-25 missiles and Bear-H bombers. I ask unanimous consent that the article "United States Says Soviet Complies on Some Arms Issues" be printed in the RECORD at the conclusion of my remarks.

It is ironic that renewed opposition to SALT is occurring now, just as both sides really begin to bump up against the SALT II limits, requiring significant dismantling on both sides. One wonders if the critics aren't really just objecting to any reductions in nuclear weapons at all.

What would happen if we continue the President's wise policy of continuing to abide by SALT? Through 1987, the Soviets would have to dismantle about 4 times as many missiles as would the United States, 308 versus about 74. Depending on which missiles are dismantled, the United States would dismantle from 240 to 740 warheads, while the Soviets would dismantle about 500. The Soviets would have to dismantle far more throw-weight than would we.

Furthermore, Poseidon submarines to be dismantled for SALT reasons would reach their 30-year life limits and have to be dismantled anyway in 1993 and 1994.

If we drop our policy of abiding by SALT, the Soviets will not have to make any of these reductions. Furthermore, they would be free to add up to 20 more warheads on each of their 308 SS-18 ICBM's, adding over 6,000 warheads to their totals. They

could build still more SS-18's. They could easily exceed the SALT II limit of 820 MIRV'd ICBM launchers—since they now have 818—and are getting ready to deploy their new MIRV'd SS-24 next year.

The great increase in Soviet ICBM warheads would pose a major threat to the survivability of the small ICBM because the Soviets could just barrage the area in which the mobile small ICBM would be deployed. In addition, this growth of Soviet warheads would also magnify the already difficult task confronting any star wars system, as the administration has already conceded.

Some say that because the Soviets have violated some of SALT's provisions we should junk the treaty. Yet every Soviet compliance problem we have would be worse without SALT. Ending SALT will not stop the SS-25, will not stop the Soviet missile encryption, and will not stop the Krasnoyarsk radar. We should press our compliance concerns with Soviets, but we would be foolish to junk SALT.

Defense Secretary Weinberger, a known foe of SALT, recently said in London that the Soviets are deploying more SS-25 missiles. What he fails to tell us is that the Soviets are chopping up older missiles to stay within the SALT limits. Ending SALT won't stop the Soviets from deploying those SS-25's. All it will stop is the Soviet practice of dismantling older missiles as they deploy new ones. That's why the Joint Chiefs support SALT, and why I do, too.

The Senate has spoken out clearly and convincingly for maintaining our current SALT policy on several occasions. In 1984 the Senate accepted my amendment supporting the President's SALT policy by the vote of 82-17. Earlier this year the Senate again accepted my SALT amendment by a vote of 90-5. And again, the Senate rejected an attempt to overturn the President's wise decision to scrap a Poseidon submarine and stay within the SALT II limits by a vote of 80-17.

Our distinguished colleague, the senior Senator from Virginia, has put it very well when he told a Washington Times reporter last month that it's "quite logical" for President Reagan and Mr. Gorbachev to talk about extending SALT II. According to the Times story:

> Mr. Warner said extending the SALT II agreement would be "conducive to continuation" of the separate arms control talks between the two countries, scheduled to continue in Geneva next year. "A sharp turn away from that policy could well be detrimental to the atmosphere in which these talks are being conducted," he said.

I heartily agree with this typically astute assessment from our esteemed colleague.

Our allies strongly support our current SALT policy. Every one of our NATO allies endorsed SALT II back in 1979, and they continue to do so today. Listen to the words of West Germany's Hans-Dietrich Genscher, West Germany's Foreign Minister, just last month, as quoted by Stern magazine:

> At the Lisbon NATO conference in June we supported the United States sentiment of commitment to the SALT II Treaty, although it was never ratified. Because it is very difficult to make new agreements in arms control, it is all the more important to most carefully preserve existing treaties and adhere to them.

Rejecting SALT now, before we have a new strategic arms agreement in place, would be a body blow to the NATO alliance, and would allow the Soviets to have a propaganda field day in Europe.

Listen to what our top military experts say. Gen. Brent Scowcroft has pointed out:

> Yes, I think we should [comply with SALT II]. There are restraints in the treaty on the Soviets which, however modest, are better than having no restraints at all.

Or Gen. David Jones, then-JCS Chairman, pointed out in 1981: "There is not even a marginal military reason for exceeding the SALT limits."

Or the then-commander in chief of the Strategic Air Command, Gen. Bennie Davis, told the Strategic Forces Subcommittee of Armed Services in March, "I have made that assessment privately that we should continue to abide by the SALT II limitations."

Despite all these arguments, some persist in hawking the myth that SALT is not good for our security. They suggest that since SALT II would have expired on December 31, 1985, we should just let it drop. What a mistake that would be. There is no magic to the date December 31. After all, both we and the Soviets have been abiding by the offensive limits of SALT I, and they technically expired on October 3, 1977.

If we had done the right thing back in 1979 and ratified SALT II, there would still have been no significance to the end of this month. We probably would have already ratified SALT III by now and would be well on our way to negotiating SALT IV. We would have had substantially lower limits on nuclear weapons, warheads as well as launchers, and the Soviets' throw-weight would have been lower as well. Everyone knew that warheads had to be limited in future arms agreements, and advanced planning in 1979 and 1980 was already pointing in that direction. We might already be at the 4,500 to 6,000 warhead level that is the centerpiece of this administration's proposals, and which still seems far away.

So where do we go from here? Clearly, we should continue to pursue a new arms agreement that will reduce the number of nuclear weapons on both sides and increase the stability of the forces that both sides have. And in the meantime, we should keep some form of restraints in place while we pursue this new agreement.

The existing SALT framework is an excellent place to start. We should modify it so that our small ICBM program can proceed. We should also give serious thought to a mutual cut of say 10 percent in the existing SALT II ceilings. This would force the Soviets to dismantle 500 missiles and bombers, including 30 of their giant SS-18 ICBM's, with about 1,000 warheads. Because we are already under most of SALT's ceilings, we would only have to dismantle 130 vulnerable ICBM's with fewer than 400 warheads.

For someone who campaigned in 1980 on a misguided platform that claimed SALT II was fatally flawed, this 10-percent cut might be too much for the President, despite its clear advantages for the United States. But, at a minimum, the United States should continue to keep the SALT limits in place in the crucial months and years ahead before a new agreement is reached.

The next decision point will be this coming May, when the eighth Trident submarine goes out to sea trials. This would cause us to exceed the SALT II limit of 1,200 launchers of MIRV'd missiles unless we take offsetting steps. I call upon the President to continue the fine precedent he established last June and direct the Defense Department to dismantle the appropriate weapons so that we stay within the SALT ceilings.

As President Reagan so wisely said last June:

> Despite the Soviet record over the last years, it remains in our interest to establish an interim framework of truly mutual restraint on strategic offensive arms as we pursue * * * the ongoing negotiations in Geneva.

Let's go forward and follow this sound advice, and make our great country, and the whole world, a little safer.

Mr. President, I ask unanimous consent that the executive summary of the Arms Control Association's recent excellent report, "Countdown on SALT II," be placed in the RECORD at the conclusion of my statement, as well as an article I wrote last month for the Christian Science Monitor.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, Nov. 24, 1985]

U.S. SAYS SOVIET COMPLIES ON SOME ARMS ISSUES

(By Michael R. Gordon)

WASHINGTON.—The Soviet Union has quietly taken steps to reduce some American concerns over purported arms-control violations, according to Administration officials.

The Soviet moves involve the cutting up of bombers and, according to intelligence re-

ports, the possible removal of SS-16 missiles from a test center at Plesetsk in northern Russia.

The moves are of political importance because the United States has taken the position that it will not undercut the 1979 strategic arms treaty as long as the Soviet Union does not.

The 1979 treaty issue was not pursued at the Geneva summit meeting, officials said today. Nor was the question of Soviet violations dealt with in detail.

On Friday, a State Department official said these issues had not been raised in Geneva because they had been discussed by Secretary of State George P. Shultz on an earlier visit to Moscow. Mr. Shultz was said to have affirmed the policy not to undercut the treaty, although reserving the right to make appropriate responses to actions not permitted by the treaty.

REPORT TO CONGRESS DUE DECEMBER 1

The issue will receive attention soon when the Administration submits a report to Congress on purported Soviet violations. The report is due Dec. 1.

Administration officials caution that the positive Soviet moves have not removed concerns over other purported violations, such as the charge that the Soviet Union has violated the 1972 antiballistic missile treaty by building a large phased-array radar at Abalakovo near Krasnoyarsk in central Siberia.

The United States says the ABM Treaty does not permit such missile-tracking radars in the interior of either country. The Soviet Union says the radar is intended to track space vehicles not incoming missiles.

The reported developments at Plesetsk are of interest because the 1979 treaty bans the testing and deployment of the mobile SS-16. It has been kept at Plesetsk and an issue has been whether this constituted deployment.

In February, the United States said the Russians had committed a "probable violation" by deploying. But now, an American official said, "that problem may be going away."

The evidence is not conclusive and consists of observations of the moving of support equipment for mobile missiles, such as transporters for warheads, onto rail cars.

CONSENSUS ON PLESETSK MOVES

Officials said there was a consensus among intelligence officials that the activity at Plesetsk was consistent with the view that equipment for SS-16 missiles was being sent into storage.

But another possible interpretation, an official said, is that the equipment being moved might be for a different missile, the mobile SS-25.

Officials say the Russians may be in the process of moving in SS-25's as SS-16's are being taken away.

"They do not make the activities observable at a time when national technical means are capable of monitoring them," an official said, referring to satellite surveillance. Officials said no SS-16's had been seen since the signing of the 1979 treaty.

There is less debate over steps described by the Russians. The Soviet Union has said that it will not add to the number of strategic systems it had at the time of the signing of the 1979 treaty. That number was 2,504.

SYSTEMS DEPLOYED AND RETIRED

As new systems have been deployed, older systems have been retired. By a recent count the Soviet Union has dismantled 50 SS-11's to compensate for the deployment of 45 SS-25's.

The Soviet Union has also said that it has dismantled more than 30 Bison bombers to compensate for the deployment of new Bear-H bombers, which can carry cruise missiles.

The bombers have been placed in plain view at an airfield, officials said. This summer, the tail sections of 15 of the old Bison bombers were being cut off. The Soviet Union says the others have been converted to fuel tankers.

An Administration official said the United States had not accepted this Soviet assertion because the conversion of the planes could not be verified.

"There is no discernible difference in their external configuration," he said.

Officials say the issue is complicated by the fact that procedures on bomber dismantlements were never worked out after the Soviet intervention in Afghanistan and the United States decision not to ratify the 1979 treaty.

In addition to the moves relating to this treaty, there is general agreement that the Soviet Union has taken steps to stay within the limits of the first strategic arms treaty, of 1972, by continuing to cut up the missile-carrying portion of old Yankee submarines.

This leaves three purported violations of concern to the United States. They are the Siberian radar, which the United States says violates the 1972 antiballistic missile treaty, and the encoding of missile test telemetry and the development of the SS-25, which are said to be in violation of the 1979 treaty.

COUNTDOWN ON SALT II—THE CASE FOR PRESERVING SALT II LIMITS ON U.S. AND SOVIET STRATEGIC FORCES

EXECUTIVE SUMMARY

The survival of the unratified SALT II Treaty, which has limited U.S. and Soviet strategic forces since 1979, is in doubt. The treaty, whose provisions are presently adhered to as the result of a political commitment by both the United States and the Soviet Union, is scheduled to expire on December 31, 1985. The United States and the Soviet Union could extend their commitment to adhere to the treaty's provisions, as was done when the SALT I Interim Agreement on Strategic Offensive Arms expired in 1977. If this is not done, there will be no agreed constraints in effect on the strategic offensive forces of the superpowers. If the United States pursues a policy of "proportionate responses" to alleged Soviet acts of non-compliance with SALT II, the treaty will almost certainly erode to accommodate the military programs of the superpowers.

The SALT II Treaty has contributed to U.S. security by substantially constraining the buildup of threatening Soviet strategic offensive forces. SALT II establishes equal limits on the aggregate number of strategic offensive systems (land-based and sea-based ballistic missile launchers and long-range bombers) of the two superpowers. The Treaty also imposes equal sublimits and qualitative restrictions on fixed land-based missiles and MIRVs—the weapons that are most threatening to the strategic balance. These provisions of SALT II will prove of even greater value to U.S. security during the balance of this decade as a new generation of Soviet strategic forces enters the field.

To comply with the limits established by SALT II and the SALT I Interim Agreement, which SALT II replaced, the Soviet Union from 1972 to 1985 removed 1,007 land-based and 233 submarine-based ballistic missiles from the active force and dismantled 13 Yankee-class ballistic missile-carrying submarines as new weapons entered the force. Past Soviet military practices suggest that these missiles would not have been retired nearly as rapidly in the absence of SALT limitations. On the U.S. side, 320 land-based and 544 submarine-based missiles have been removed and 11 ballistic missile-carrying submarines have been dismantled.

In the years 1985-1990, SALT II will require the Soviet Union to remove at least 500 to 600 ballistic missiles and to destroy missile silos equivalent to the number of mobile missiles deployed. In the absence of SALT II, the Soviet Union could deploy SS-X-24, SS-25, and other missiles now in advanced development without retiring any of its fixed land-based missiles (SS-17, SS-18, SS-19, SS-11). On the U.S. side, SALT II will require from 1985 to 1990 the removal of between 200 to 300 missiles or bombers from the force as new systems are deployed.

Abandonment of the SALT II limits before a new strategic arms agreement is reached would harm U.S. security interests. By 1990 the Soviet Union could increase its total number of nuclear warheads and bomber weapons by almost 7,000, roughly twice the increase that the United States could make over the same period and 4,000 more than the Soviets could deploy under SALT II. Without SALT, the Soviet Union could significantly increase the number and improve the capabilities of its "heavy" land-based missiles, the weapons that the Reagan administration considers the most threatening. In the longer run, irrespective of which side ultimately gained a quantitative advantage, the United States would face the serious dangers and expenses of an all-out nuclear arms race.

Abandonment of the SALT II limits would reduce significantly the prospects for reaching a new U.S.-Soviet strategic arms accord. The collapse of the existing framework of arms control and the buildup of additional nuclear forces would inevitably complicate the process of attempting to achieve deep reductions in strategic forces.

The U.S. policy of "proportionate response" to alleged Soviet non-compliance with the provisions of SALT II threatens to erode the Treaty and destroy it over a period of time as an effective constraint on strategic offensive forces. When President Reagan announced on June 10 that the United States would refrain from undercutting SALT II by deactivating and dismantling an existing Poseidon submarine to compensate for a new Trident II submarine scheduled to start sea trials in September 1985, he stated that the United States will carry out "proportionate responses" to alleged Soviet SALT II violations. He also stated that the United States "will keep open all programmatic options for handling such milestones as they occur in the future." Specifically, he indicated that the United States retained the option to test and deploy the Midgetman missile in response to the alleged Soviet testing and deployment of a second new intercontinental missile (SS-25) in violation of a provision of SALT II. A policy of "proportionate responses" could result in the rapid erosion of the SALT II Treaty regime. Since the Soviet Union insists it is operating in compliance with SALT II, U.S. actions clearly in violation would very likely provoke the Soviet Union to undertake its own "proportionate responses." The Soviet Union could quickly implement such a policy since it has a

number of new strategic missiles in advanced development. Such a process would soon convert SALT II into a meaningless document which each side would circumvent whenever the treaty conflicted with ongoing weapons programs.

The United States has formally charged the Soviet Union with violations of the SALT II Treaty, and the Soviet Union has leveled countercharges of U.S. violations. Specifically, the United States has accused the Soviet Union of the following violations of the Treaty: testing and deployment of a second "new type" of land-based ballistic missile when only one is allowed; telemetry "encryption" that impedes treaty verification; and deployment of SS-16 mobile land-based ballistic missiles. The Soviet Union has denied these charges and in turn accused the United States of several violations of the treaty, including the deployment of ground-launched cruise and Pershing II missiles in Europe. None of these charges are clear-cut, and all relate to complex treaty provisions that are subject to differing interpretations. While these problems should be vigorously pursued to maintain the integrity of the treaty, they cannot be resolved by public accusations that only harden positions or "proportionate responses" that legitimize and institutionalize the process of non-compliance with the treaty. Compliance issues should be addressed through the Standing Consultative Commission, which was established under SALT for this purpose, and by high-level private diplomacy. The conversion of this serious problem into a propaganda battle reduces the prospects of a satisfactory resolution and will undercut public confidence not only in SALT II, but also in the arms control process in general.

U.S. security would be best served by formal ratification of SALT II, extended for several years, but such an outcome appears unlikely. In the absence of formal ratification, the best course at this time for the United States would be reaffirmation of the present political commitment not to undercut the SALT agreements. Reaffirmation, either through bilateral agreement with the Soviet Union or unilateral declarations, would preserve crucial constraints on the arms race and improve the prospects for resolving compliance disputes and for negotiating a new U.S.-Soviet agreement to limit and reduce nuclear weapons.

[From the Christian Science Monitor, Nov. 19, 1985]

SALT SUCCESSES AND THE GENEVA SUMMIT

(By Dale Bumpers)

In the weeks preceding the Reagan-Gorbachev summit, the administration sought to dampen expectations that any major arms control agreements will be reached. While White House aversion to disappointing the American people on this important issue is understandable, it overlooks the real possibilities for limited but significant steps to slow the arms race.

The Reagan administration has sought to keep down expectations that a major breakthrough is likely, particularly on arms control. It should not be surprising that Americans have high hopes for the summit: all five summits of the Nixon, Ford, and Carter administrations yielded important arms accords. Given the absence of any arms control progress during the five Reagan years, it is natural that the public would look to the first Reagan summit for hope of at least some curbs on the arms race.

While the United States and Soviet Union are miles apart on almost every arms control issue, from strategic arms and antisatellite weapons to nuclear testing, there is one area where their positions are similar and the potential for agreement is high: a framework for keeping existing arms restraints in place while we continue the task of negotiating a new one.

President Reagan made an important first step in this direction when he said in June that "despite the Soviet record over the last years, it remains in our interest to establish an interim framework of truly mutual restraint on strategic offensive arms as we pursue . . . the ongoing negotiations in Geneva." Surely we are better off with SALT than without it. SALT has forced the Soviets to dismantle over 450 nuclear-tipped missiles vs. only 16 for the U.S., and it will force them to dismantle over four times more than we do by the end of 1987. It also recognizes that the Soviets would have thousands more nuclear warheads without SALT than with it.

While SALT II was never ratified and the SALT I offensive arms limits technically expired eight years ago, each side has announced separately that it would abide by them. This informal and very fragile arrangement is under new attack by some political appointees in the administration who have a long track record of unremitting hostility to SALT and other realistic arms control measures, such as the ABM Treaty. In addition to the usual litany of Soviet arms violations, they also argue that since SALT II would have expired on Dec. 31 of this year anyway, we should stop complying with it.

Renouncing SALT would be a dangerous decision that would trigger an all-out offensive arms race which studies show could double the already bloated nuclear arsenals of both sides in less than a decade. Furthermore, the pressures on SALT will increase in the months ahead as we approach the time when our eighth Trident sub goes out to sea in May, and as the Soviets start to deploy their new MIRVed SS-24 ICBM. Both these events would violate SALT ceilings unless offsetting actions are taken. Renouncing SALT would also damage US relations with our NATO allies, who strongly support the SALT restraint framework. At a minimum, our policy of maintaining existing SALT limits while trying to negotiate new agreements needs to be reinforced. Recent comments by a senior administration official that SALT II could be extended past 1985 constitutes sound advice.

Given how far apart both sides are in the arms talks, I believe the President when he says a new agreement may well not be reached in the next several years. This makes it all the more important to strengthen the currently shaky interim restraint framework the President discussed in June. There is great similarity in the public statements on SALT made by both sides, so agreement on a common position should be possible. This could also be accomplished by language dealing with avenues for resolving our concerns about certain alleged Soviet SALT violations. The alleged ABM Treaty violations could be dealt with similarly.

Reaffirming SALT would have important benefits for US security. Continuation of SALT will force the Soviets to dismantle older SS-11 and MIRVed SS-17 missiles as they deploy their new SS-25s and MIRVed SS-24s. SALT will also force them to dismantle additional missile-firing submarines as they deploy new ones. (SALT has already forced them to dismantle 13 since 1978.)

If the President wanted to make a bolder move, he could offer a mutual cut of 10 percent in the existing SALT II ceilings. This would force the USSR to dismantle 500 missiles and bombers, including 30 giant SS-18 ICBMs, with about 1,000 warheads. The US, benefiting from the fact that we are already under most of SALT's ceilings, would only have to dismantle as few as 130 vulnerable ICBMs with fewer than 400 warheads. Other kinds of interim agreements are possible as well.

For someone who campaigned in 1980 on a platform that mistakenly claimed SALT II was fatally flawed, this 10 percent cut in SALT ceilings might be too much for the President, despite its clear advantages. At the summit he should seek the realistic goal of ensuring that there will be at least some restraints on offensive arms in place in the crucial next few years before a new agreement is reached. We must have the wisdom and courage to take these small steps to strengthen US security and set the stage for further arms control progress.

COMMEMORATING THE 75TH ANNIVERSARY OF THE NEW PITTSBURGH COURIER

Mr. SPECTER. Mr. President, on Wednesday, December 11, 1985, the New Pittsburgh Courier, one of Pennsylvania's most prestigious newspapers commemorated its 75th anniversary of service to Pittsburgh's black community, the Commonwealth of Pennsylvania, and the Nation.

Since 1910, the Pittsburgh Courier has consistently demonstrated its commitment to being the voice, eyes, and ears of the black community. Historically, this has been the role of the black press since the founding of the Nation's first black newspaper, Freedom's Journal, 158 years ago. As the voice of its readers, the black press has had to speak out against the injustices perpetrated against black Americans. It has also served as a major vehicle for communicating events occurring within the black community, and informing readers of events in Africa and other locations in the Third World.

For the past several years, I have had the opportunity of working with the New Pittsburgh Courier to help inform the Pittsburgh black community of legislative initiatives under consideration by the U.S. Senate. I have been greatly impressed by the commitment and dedication of this newspaper to its readers, and what in my view has seemed to be unfailing integrity in reporting.

It is, therefore, with sincere admiration that I salute the New Pittsburgh Courier on the occasion of its 75th anniversary, and wish this newspaper many, many more years of continuing to serve its readers in the fine tradition of the black press in America.

Mr. President, I ask that the text of an article appearing in the December 14, 1985, edition of the New Pittsburgh

Courier appear in the RECORD immediately following my statement.

COMMEMORATING 75 YEARS OF COMMUNITY SERVICE

(By Y. Denise Caldwell)

"Without the black press, the black man would not know who he is nor what is happening to his struggle for the freedom of citizenship."—Valerie Myers, former editor of the Syracuse (N.Y.) Challenger.

Historically, the role of the black press has been to be the voice of the black community. As the voice, it has had to speak out on all the issues pertinent to achieving amicable relations between Blacks and Whites, both nationally and locally.

In addition, the black press has been the eyes and ears of the black community, relaying to its readers the events that occur within their realms—from weddings, births and deaths to meetings and balls.

Locally, the *New Pittsburgh Courier* has been valiantly providing its readers with news and information for the past 75 years.

Since 1910, it has acted as a vessel for local black leaders to use to combat the problems associated with being Black.

Robert L. Vann, a founding father and editor of the *Courier*, is credited with establishing the reputation of the paper. He and Ira Lewis were responsible for the focus of the paper. They purportedly "launched numerous crusades on behalf of the black community and black citizens generally. These crusades were against jim-crowism and discrimination against Blacks in major league baseball."

In addition, Vann "saw to it that the paper was taken into the South, for in some localities black citizens were prohibited from reading black publications."

This greatly improved the circulation of the paper, which fell off during the decline of the railroad industry.

"In some instances, Pullman porters distributed the product as a courtesy to help spread the word of the black press," said Rod Doss, vice-president and general manager of the *New Pittsburgh Courier*.

The word was being spread, and the people were listening to and heeding the advice of *Courier* editors.

As reported in a special issue of the *Pittsburgh Press* Sunday Roto Magazine, by Jerry Byrd "those old enough to remember like to recall that the '*Courier* urged two million black voters to go turn (Abraham) Lincoln's picture to the wall. That debt is paid' . . . and switch from Republican to Democratic party."

"The *Courier* was always a crusading organ," said Hazel Garland, columnist and former editor-in-chief of the *Courier*. "We crusaded for the rights of Blacks."

Her tenure at the paper began in 1944 when she was a part-time reporter. Two years later she became a full-time reporter and in 1972 was named city editor. She became editor-in-chief in 1974 but retired from that position in 1977 to become a columnist.

An example of the editorial attitude of the *Courier*, as remembered by Mrs. Garland, includes the time the paper published "Muhammad Speaks" columns.

"It was for the black Moslems," she said. "They were calling whites 'White Devils' and a lot of white Jewish merchants threatened to pull out (their advertising)."

Another issue attacked by the *Courier* was the Double-V for Victory At Home As Well As Abroad.

"This was during WWII, and we were fighting to break down the walls of segregation while our boys were overseas fighting for freedom," Mrs. Garland explained.

She said that publicity generated by the *Courier* and other black newspapers led to the creation of the Anti-Discrimination laws by President Truman.

Under the auspices of William G. Nunn, Sr., the managing editor of the *Courier*, and P.L. Prattis, executive editor, the *Courier* reached an all-time high circulation of 400,000 in 1948.

"We took on the issues," said Mrs. Garland. "We were particularly strong in the South. We crusaded the rights of the Scottsboro Boys (as well as others). During this period, Blacks relied on the *Courier*. Many grew up on the paper and it was the only way they found out what was happening in the country (and in the city)," she said.

Writing these stories were well-known *Courier* correspondents and editors. Most notable were the national reporters, such as former editor Robert Ratcliffe. He travelled through the South during the 1950s to gather information on the living conditions of Blacks.

Courier reporters could be found around the world. They covered the news from the war efforts to the political status of foreign countries. Some of them went on to become famous working for white news bureaus.

They included George Padmore, who was the *Courier* London correspondent in 1923; Theodore Stanford and Collins George were war correspondents in 1945; and Stanley Roberts, who was the Washington Bureau chief for the *Courier*.

Roberts is particularly remembered for being the only reporter to interview Gen. Douglas MacArthur after his return from the Orient. Roberts' interview concerned the fact that the black press was blaming MacArthur for the abuse black soldiers were suffering and for army desegregation. MacArthur told Roberts that black soldiers were not being utilized by the armed forces. His quote, "They didn't send me enough of them," became part of a two-part series on black troops.

Another renowned *Courier* editor and reporter, George S. Schuyler, covered South Africa, the West Indies, French West Africa and the Dominican Republic as a war correspondent. He was with the *Courier* from 1944 until 1964.

The *Courier* also maintained an excellent relationship with the community locally by publishing news from community reporters.

There were several people assigned to various neighborhoods in the area. In the 1940's, Allen R. Reddick wrote "News of Hill City" which focused on the Hill District; Cheerful Parrish reported on events in Beaver Valley. Amelia Ray covered Shenango Valley; Writt A. Richards wrote the "Bedford-Terrace Notes" and John Clark was responsible for the Wylie Avenue column.

Besides international and local news there were articles from special correspondents on everything from social ills to philosophical laments. These writers included Leotha Hick-Shaw; Ethel L. Payne; Zora Neale Hurston and Langston Hughes.

Frank E. Bolden, who was *Courier* city editor from 1954 to 1962, recalls some of the strident series published during his reign.

"I'm especially proud of the series 'Heroes In Blue.' (which was responsible for the) upgrading of the city police department," he said. "There was only one black police lieutenant at that time—Jim Robertson."

In keeping with the policy to upgrade the status of Blacks in the community and to protect their civil rights, the *Courier* also ran a series on how Blacks were being shortchanged by area merchants.

"Some butcher stores had scales that were not honest," said Bolden. "They were cheating black customers . . . and some taverns were using shot glasses with thick bottoms. So we ran the article and the Tavern Owners Association and some Italian thugs threatened us, but we weren't afraid."

Bolden said that the article eventually led to Pennsylvania Liquor Control Board investigation which straightened things out.

Most recently, the *Courier* ran a story concerning a fire-bombing in Forest Hills which has led to an investigation of the neighborhoods's racial composition and policies.

Currently under the management of the Sengstacke Newspaper chain, which purchased the paper in 1966, the *Courier* has been focusing on rebuilding and restructuring its standing in the community.

Issues and events of particular interest to the *Courier* editorial staff include reporting on the lack of black representation in city government, the increase of violence towards black homeowners in predominantly white neighborhoods and the massive unemployment problem among young black males.

Traditional values are still strong, however. They are seen in the longstanding social columms by Mrs. Garland: the religious coverage by Mattie Trent, *Courier* religion and lifestyle editor: the well-established sports acumen of Sports Editor Eddie Jefferies and the single-handed coverage of black entertainers in the city by Timothy Cox.

All of these serve to illustrate the commitment the *Courier* has to providing the black community with news and information about their world as only a black newspaper can—by being the voice, the eyes and the ears of its readers.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

WHITE EARTH RESERVATION LAND SETTLEMENT ACT OF 1985

Mr. ANDREWS. Mr. President, what is the pending business?

The PRESIDING OFFICER. Under the previous order, the Senate will now resume consideration of the pending business, S. 1396, which will be stated by title.

The legislative clerk read as follows:

A bill (S. 1396) to settle unresolved claims relating to certain Indian lands on the White Earth Indian Reservation, to remove clouds from the titles to certain lands, and for other purposes.

The Senate proceeded to consider the bill.

AMENDMENT NO. 1415

The PRESIDING OFFICER. Under the previous order, there will now be 20 minutes debate on amendment No. 1415, to be equally divided and controlled by the Senator from Montana [Mr. MELCHER] and the Senator from Minnesota [Mr. BOSCHWITZ], or their designees, to permit debate on the

Durenberger motion to table the Melcher motion to appeal the ruling of the Chair that the Melcher amendment No. 1415 was nongermane.

Mr. ANDREWS. Mr. President, I reserve temporarily the time allotted on this side, pending the arrival of the Senator from Minnesota.

Mr. MELCHER. Mr. President, this is a bill to extinguish the title of thousands of Indian allottees. It is strongly backed by the State of Minnesota, by its Governor, by its legislature, and by its Senators and some of the House Members. But it is opposed totally by the White Earth Band of the Chippewas. It is opposed totally by a couple of public interest groups in the State of Minnesota: The Minnesota Public Interest Research Group and the League of Women Voters of Minnesota, who specifically, on November 18, issued a resolution opposing the passage of this bill. It is also opposed by the United Townships Association, which represents both Indians and non-Indians in the White Earth Indian Reservation.

The White Earth Indian Reservation was originally 762,000 acres reserved for the White Earth Band of the Chippewas. It has presently dwindled to 56,000 acres. That is 6 percent of the total.

Early in this century, most of the Indian allotments on White Earth passed into the hands of the timber companies, and they passed into the hands of the timber companies because there was valuable timber on the land. Now they have the timber off, and that value is gone; most is now in private hands.

Also, strangely enough, the State of Minnesota possesses 165,000 acres of the Indian allotment land on the White Earth Reservation.

All this was purported to be legal under the Clapp amendment, which passed Congress in 1906. But let us review a couple of facts.

The Indian land was held in trust by the United States for the individual Indians. As long as the land was held in trust, it could neither be sold nor taxed.

There are literally thousands of claims now pending by the Indians who are trying to get some just compensation for their land or their land back, one or the other. The Department of the Interior has been looking at this over the last 5 years, putting together the most valid claims, and they have identified those that they say have "merit."

This bill would do two things: It would extinguish the title for these Indian allottees, but it would permit a narrow window of opportunity to go into court and fight out this battle. I say a narrow window because it is only for 6 months, and they must find all the records they can during that time. They must get legal advice during that 6 months, and then they must go into court and claim what is theirs, and get some compensation for it.

Even that narrow window would not be in this bill except for one fact: The Justice Department advised the authors of this bill that unless there was some narrow window, there would be a question of constitutionality. That, in itself, raises a point of how you limit somebody's constitutional rights to a narrow window of 6 months.

The bill in its totality should be defeated.

It is no small wonder that the Governor of Minnesota is for it, that the attorney general of Minnesota is for it, that the legislature of Minnesota is for it. Why would they not be for it? How are they going to explain why the State has 165,000 acres of Indian land?

I know of no other State that has acquired land through tax forfeitures or fraudulent, unlawful probates. But this State has. It is a disgrace. It is a disgrace for those who want to accommodate the interests—the political interests, mind you—of the Governor, of the attorney general, of the State legislature.

A word or two about the generosity of the State legislature of Minnesota. Within the bill, they are going to give back 10,000 acres out of the 165,000 acres that they probably have no right at all to hold. The claims that have been identified on behalf of the Indians, which the Department of the Interior says have "merit," amount to about 100,000 acres of what the State now holds, out of that 165,000 acres.

So the pending amendment merely allows some help from the United States in legal advice and legal assistance in those instances that have been identified as having "claims with legal merit" by these Indians.

These are individual Indians. These are heirs for the most part to the original Indian allottee. They do have their rights. There is equity, we hope, within the Government itself, the U.S. Government. I hope there is equity in the government of the State of Minnesota. I trust there is. I trust there is because after all, these Chippewas, this White Earth Band of Chippewas are also citizens of the State of Minnesota. So the State should be even-handed.

The question immediately before us is a ruling on the amendment that would allow some legal advice and assistance by the United States to those Indians for whose claims the U.S. Government, through the Department of Interior, have found to have "legal merit," and to assist them in that process. That is all the amendment does. I believe it was unfortunate that the amendment was challenged on the basis of whether or not it was germane because it certainly is germane and that is why I appealed the ruling of the Chair, and I hope that we will win on that one because it is basic. It is fundamental. It is a question of whether we want to show some equity and justice in our deliberations here in the Senate.

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. ANDREWS. Mr. President, while I do not share the opinions of my colleague from Montana on the basic bill, I think this amendment has a good deal of justice and reason in it, but I would be more than happy now to yield the time reserved for this side to my colleague and good friend, the Senator from Minnesota.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. DURENBERGER. Mr. President, I am grateful to my colleague from North Dakota. I am not going to take much time. I am prepared to yield back at least any time that the Senator from North Dakota might allot to me off of our side.

I just restate the argument that I made yesterday on my own behalf and on behalf of the main author of this legislation, my colleague from Minnesota.

The whole purpose of S. 1396 on the floor today is to avoid litigation. In many of these claim cases, practically all of your claim cases, the choice is to litigate the claims or the choice is to resolve the claims without litigation. The whole purpose of the latter course of action, of course, is to determine people's rights and their compensation by involving all of the parties or as many of the parties who might be claimed against as possible in that process.

Of course, that is what we have done here. I spoke yesterday to the liability, if any, of the State of Minnesota, of the counties involved, and of the Federal Government, three of the levels of Government that may be involved, in order to bring all three parties in in some equitable fashion to discharge their obligations in monetary terms to the claimants, and then in addition to that without any legal claim against any of the governments to provide for the White Earth Tribe additional compensation in the form of monetary and land which is all part of one single compromise. And part of that compromise was that we not promote the litigation this amendment would promote.

For that reason, I will object, and continue to object to my colleague's amendment simply because it is designed to promote litigation in an area where that kind of litigation would be antithetical to the interest of the Indian claimants.

Mr. MELCHER. Mr. President, there has been no compromise. Compromise indicates that there is an agreement between the two sides. One side here is the Indians and the other side is the

State of Minnesota. That is where these legal claims are, these claims "that have legal merit." They are against the State of Minnesota.

There has been no compromise and that is the fallacy of this whole bill. The precedent that is being set here, if this bill becomes law, of not having a consensus agreement with the injured party, and that is the Indians, is a terrible precedent for this Senate to endure.

The PRESIDING OFFICER. The time of the Senator has expired.

There remains 7 minutes of the Senator from Minnesota.

Mr. DURENBERGER. Mr. President, I am prepared to yield back my time. However, I do not know whether or not the manager of the bill and chairman of the committee may want to make any comments.

Mr. ANDREWS. Mr. President, I yield back the remainder of time that might be allotted to me.

The PRESIDING OFFICER. The question is on the motion to table.

Mr. MELCHER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MELCHER. Mr. President, I ask for the yeas and nays on the motion.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

Mr. MELCHER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ANDREWS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ANDREWS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question recurs on the motion of the Senator from Minnesota [Mr. DURENBERGER] to table the appeal of the ruling of the Chair.

The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST], the Senator from Arizona [Mr. GOLDWATER], the Senator from Washington [Mr. GORTON], the Senator from Utah [Mr. HATCH], the Senator from Kansas [Mrs. KASSEBAUM], and the Senator from Maryland [Mr. MATHIAS], are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Connecticut [Mr. DODD], is necessarily absent.

I also announce that the Senator from Florida [Mr. CHILES], is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 56, nays 36, as follows:

[Rollcall Vote No. 374 Leg.]

YEAS—56

Abdnor	Gramm	Packwood
Armstrong	Grassley	Pressler
Bentsen	Hatfield	Proxmire
Biden	Hawkins	Quayle
Bingaman	Hecht	Roth
Boschwitz	Heinz	Rudman
Bumpers	Helms	Simpson
Chafee	Hollings	Specter
Cochran	Humphrey	Stafford
Cohen	Johnston	Stevens
D'Amato	Kasten	Symms
Danforth	Laxalt	Thurmond
Denton	Long	Trible
Dixon	Lugar	Wallop
Dole	Mattingly	Warner
Domenici	McClure	Weicker
Durenberger	McConnell	Wilson
Evans	Murkowski	Zorinsky
Garn	Nickles	

NAYS—36

Andrews	Gore	Metzenbaum
Baucus	Harkin	Mitchell
Boren	Hart	Moynihan
Bradley	Heflin	Nunn
Burdick	Inouye	Pell
Byrd	Kennedy	Pryor
Cranston	Kerry	Riegle
DeConcini	Lautenberg	Rockefeller
Eagleton	Leahy	Sarbanes
Exon	Levin	Sasser
Ford	Matsunaga	Simon
Glenn	Melcher	Stennis

NOT VOTING—8

Chiles	Goldwater	Kassebaum
Dodd	Gorton	Mathias
East	Hatch	

So the motion to lay on the table the appeal of the ruling of the Chair was agreed to.

Mr. DOLE. I move to reconsider the vote by which the motion was agreed to.

Mr. DURENBERGER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1416

THE PRESIDING OFFICER. The question is on amendment 1416. Who yields time?

Mr. MELCHER addressed the Chair.

THE PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, Indian land is not subject to taxation by the county or the State as long as it is held in trust by the United States for the Indian allottee or for the tribe.

The original 760,000 acres of the White Earth Reservation belonging to the White Earth Band and the Chippewas has shrunk to 56,000 acres at present.

In that shrinkage, in that loss of land, 165,000 acres is now held by the State of Minnesota on the reservation. Over 100,000 acres of that land that the State of Minnesota now owns was acquired by tax forfeiture.

There is no doubt that in the case of tax forfeiture, the Indian land was held in trust. On the question of the collection of taxes, that collection is unlawful. There is no question about that.

Mr. President, I ask for the yeas and nays on the amendment.

THE PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MELCHER. Mr. President, what is not known is how much of that 165,000 acres was acquired through unlawful tax forfeiture.

There has been a 7-year investigation by the Interior Department to identify these Indians whose claims have legal merit and that involve the land that the State of Minnesota now holds. So this amendment which I am now offering requires that the State of Minnesota enter into an agreement with the Secretary providing for the transfer of that amount of Indian land which is determined by the U.S. Department of Justice to have been acquired by the State of Minnesota through tax forfeiture and that that land shall be returned to the tribe.

Mr. President, the plenary power over Indians is in the hands of Congress. The responsibility to make sure that that is handled correctly between the Indians and the States is the responsibility of Congress.

This bill would only return 10,000 acres to the Indians out of the 165,000 acres that the State now has. I think that is totally unjust and has no merit. The amendment would correct that flaw to the extent that, on those claims where it was clearly demonstrated that the State acquired them unlawfully, the land would be returned to the tribe. That is simple justice, no more and no less than that. I strongly urge support of the amendment.

WHITE EARTH INDIANS AGREE TO PROVISIONS IN S. 1396

Mr. BOSCHWITZ. Mr. President, my colleague from Montana argues that there isn't a consensus for this bill. There will never be appropriate Indian consent to this bill. The real parties in interest are Indian heirs to the original allottees—and no one knows who they are because the Department of THE Interior for the last 60 years did not think it needed to keep track of White Earth mixed-bloods. The heirs probably number in the thousands. They will not be identified unless the Department of THE Interior does so under the mandate of this bill. In short, the heirs cannot consent because we don't know who

they are, and they do not know who they are.

In the absence of the heirs, we look to the White Earth Tribe. Tribal representatives helped draft this bill. The tribal council voted 3 to 1 to endorse this bill in April of this year. The tribe sent letters to the congressional delegation urging us to introduce it and pass it.

Later, this became a tribal political football. In the absence of the full council, a 2-to-0 vote withdrew endorsement later in the year. However, nothing can alter the fact that the tribe helped write it, the tribe originally endorsed it, and the popularly elected tribal chief continues to support it. And it has significant support among rank and file tribal members.

In the last analysis, we must assume some responsibility for doing what is right. In the absence of this bill, both Indians and non-Indians will suffer.

A couple of months ago the chief judge of the U.S. District Court for South Dakota ruled against Indian heirs in a lawsuit based on one type of land claims. The chief judge concluded:

> While the court has found there to be no judicial merit to plaintiff's claims, this does not mean that it is not repelled by what was done to the Indian allottees by the United States under the authority of the Burke Act. These claims can justly be considered a "moral" debt, but one that cannot be paid by clouding the title to the millions of acres affected by the forced fee policy of 1916–21 . . . Congress should now accept responsibility for its actions, and provide monetary compensation for the estates of those allottees injured by the forced fee patent policy, at the same time relieving the thousands of innocent parties who now own the land of the expenses and uncertainties of further litigation. Congressional action is the only complete solution to this dispute, and it should be delayed no longer.

Those words could have been written about the White Earth land dispute. This bill does offer a just, fair, and complete solution to a problem caused by our own predecessors in these congressional halls. The bill has the support of local Democrats and Republicans; it was drafted with the assistance of the Indians, administration, and congressional committees. It is the right thing to do.

(Mr. HECHT assumed the Chair.)

Mr. ANDREWS. Mr. President, this matter was debated extensively yesterday. We yield back the time on this side.

Mr. DURENBERGER. Mr. President, if the Senator from Montana has yielded back his time, I am prepared to make a motion.

Mr. MELCHER. Yes, Mr. President, I am prepared to yield it back.

Mr. DURENBERGER. Mr. President, I move to lay the amendment on the table.

I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay the amendment of the Senator from Montana on the table. The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST], the Senator from Arizona [Mr. GOLDWATER], the Senator from Washington [Mr. GORTON], the Senator from Utah [Mr. HATCH], the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Nevada [Mr. LAXALT], and the Senator from Maryland [Mr. MATHIAS] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Connecticut [Mr. DODD] and the Senator from Mississippi [Mr. STENNIS] are necessarily absent.

I also announce that the Senator from Florida [Mr. CHILES] is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 53, nays 37, as follows:

[Rollcall Vote No. 375 Leg.]

YEAS—53

Abdnor	Garn	Pressler

NOT VOTING—10

Chiles	Gorton	Mathias
Dodd	Hatch	Stennis
East	Kassebaum	
Goldwater	Laxalt	

So the motion to lay on the table was agreed to.

Mr. DURENBERGER. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. ANDREWS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MELCHER. Mr. President, the distinguished Senators from Minnesota are my friends. They testified before the Select Committee on Indian Affairs, and have repeated here on the floor of the Senate, that the land dispute on the White Earth Reservation exists because of congressional acts and Federal actions and that there is a responsibility for the Federal Government to provide a remedy.

I certainly agree with the Senators that certain acts of Congress and the executive branch contributed to the problems at White Earth. While I agree that a legislative resolution is preferable to a litigated solution, I strongly disagree with the settlement provisions contained in this bill, S. 1396.

This bill is not fair to the Indians who have been deprived of the use of their land for nearly 80 years. This bill does not require an adequate contribution from the State of Minnesota, which possesses 165,000 acres of land on the reservation.

The State of Minnesota certainly shares with the Federal Government and private individuals complicity in unlawfully taking Indian land. This bill does not provide sufficient constitutional safeguards for those Indians who seek to rightfully assert title to their land.

This land dispute on the White Earth originated in 1906, right here in the U.S. Senate, when Senator Clapp of Minnesota was successful in having an amendment adopted to an appropriation bill, and it started a chain reaction. Without following the proper procedures, the land was acquired from the Indians, while still in trust. That was unlawful.

In the nearly 80 years following the Clapp amendment, the courts, including the Supreme Court, have consistently held that the tax immunity of Indian trust land could not be ended without the Indians' consent, so long as the trust status continued. The *Zah Zah* case, decided by the Minnesota Supreme Court in 1977, which brought the entire issue to a head, extended this protection to all aspects of the trust status, including restrictions on alienation. In other words, the court ruled against the Clapp amendment.

Now, the words that have been spoken here on the floor by the Senators from Minnesota sound good, as did Senator Clapps' back in 1906. They use the words "negotiations," "settlement," "fairness," and "cooperation." Unfortunately, these words do not apply to this legislation. The White Earth Indians have fought this bill tooth and nail, and I judge they will continue to do so, probably in the courts, if the bill is signed into law. Just as the courts following the Clapp

amendment found that that law could not deny Indians of their rights as beneficiaries of the Federal trustee, I am convinced the courts will find that this bill also denies Indians of their property rights in violation of the U.S. Constitution. This bill will not clear up anything. Not only will claims be filed in court by Indian allottees and heirs seeking title to their land as well as damages, but also suits will be brought challenging the constitutionality of this bill should it become law.

The amendments I proposed would have made this a fairer bill and perhaps provided some remedy for the constitutional problems the bill raises. However, even if these amendments had been adopted the bill still would have been flawed. I think the Senate should reject this bill so that all parties can engage in meaningful negotiations on the White Earth land claims in Minnesota.

Mr. President, I ask unanimous consent to have printed in the RECORD certain correspondence with the Department of Justice relating to this matter.

There being no objection, the correspondence was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF JUSTICE,
Washington, DC, September 21, 1984.

Hon. MARK ANDREWS,
Chairman, Select Committee on Indian Affairs, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: In an effort to develop the Administration's position on an amendment to H.R. 2246, the "White Earth Reservation Land Settlement Act," the Office of Management and Budget requested the Department of Justice to review this amendment. The Department was in the process of studying this amendment when we were advised that the Department of the Interior had submitted the amendment to your Committee for consideration.

The situation on the White Earth Land Reservation poses some interesting legal questions that require careful review. On that reservation, there are a number of cases where Indians have claims to land which have not been owned by other for decades. Those Indians lost the land for a variety of reasons. In some situations, they were deprived of the land through transactions which were legally void. This bill seeks to provide compensation to the Indians or their successors while preserving the present status of ownership of the land.

The Department will continue to study this complicated issue and the proposed amendment. When we have completed our analysis, we will advise you of our views.

Sincerely,

ROBERT A. MCCONNELL,
Assistant Attorney General, Office of Legislative and Intergovernmental Affairs.

SEPTEMBER 27, 1985.

Mr. PHILLIP D. BRADY,
Acting Assistant Attorney General, Office of Legislative and Inter-Governmental Affairs, U.S. Department of Justice, Washington, DC.

DEAR MR. BRADY: S. 1396, a bill to settle unresolved land claims on the White Earth Indian Reservation, is currently under consideration by the Select Committee on Indian Affairs. A similar version of S. 1396 was before the Senate in the 98th Congress but was never acted upon.

On Septebmer 21, 1984, Robert A. McConnell, Assistant Attorney General, Office of Legislative and Intergovernmental Affairs, Department of Justice wrote to the Committee and indicated that the Department would study the legal questions raised by the proposed legislation, complete an analysis, and advise the Committee of the Department's views. To date, the Department of Justice has not forwarded to the Committee any critique of the White Earth legislation, or offered any alternative suggestions on how the land claim issues on White Earth might be resolved.

A copy of S. 1396 is enclosed for your information and use as is a copy of the September 21, 1984 letter. Please review and provide the Committee with a written analysis of the bill as soon a possible.

Best regards.

Sincerely,

MARK ANDREWS,
Chairman.
JOHN MELCHER,
Ranking Minority Member.

U.S. SENATE,
SELECT COMMITTEE ON INDIAN AFFAIRS,
Washington, DC, October 28, 1985.

Hon. MARK ANDREWS,
Chairman, Select Committee on Indian Affairs, U.S. Senate, Washington, DC.

DEAR MARK: As you know, on September 27th we sent a letter to Mr. Phillip Brady, Acting Assistant Attorney General, Office of Legislative and Intergovernmental Affairs, U.S. Department of Justice, a copy of which is attached, requesting an analysis of S. 1396, the White Earth Settlement Act.

As of today we have not received this analysis or even an acknowledgement to our letter. The staff has inquired about the status of the analysis and was told by an official in Mr. Brady's office that the Department was working on it but there was no projected completion date.

In light of the fact that during the last Congress the Justice Department believed that similar legislation raised legal questions requiring careful review, I believe it would be advisable to postpone Committee consideration of the bill until the Justice Department has completed the analysis and advised the Committee of its views.

Best personal regards.

Sincerely,

JOHN MELCHER

U.S. DEPARTMENT OF JUSTICE,
OFFICE OF LEGISLATIVE AND INTERGOVERNMENTAL AFFAIRS,
Washington, D.C., November 6, 1985.

Hon. JOHN MELCHER,
Ranking Minority Member, Select Committee on Indian Affairs, U.S. Senate, Washington, DC.

DEAR SENATOR MELCHER: This is in response to your request for the views of the Department of Justice on S. 1396, a bill to settle unresolved land claims on the White Earth Indian Reservation.

The Department has had the opportunity to review and analyze several predecessor versions of this bill. On May 16, 1985, we reported on S. 885 to the Office of Management and Budget and noted potential constitutional and technical issues with that bill. Our detailed review of S. 1396 indicates, however, that these problems have been rectified and that it does not appear to contain any legal or constitutional infirmities. Whether this legislation should be enacted involves questions as to which the Department of Justice defers to the Department of Interior.

The Office of Management and Budget has advised this Department that there is no objection to the submission of this report from the standpoint of the Administration's program.

Sincerely,

PHILLIP D. BRADY,
Acting Assistant Attorney General.

NOVEMBER 12, 1985.

Mr. PHILLIP BRADY,
Acting Assistant Attorney General, Office of Legislative and Intergovernmental Affairs, U.S. Department of Justice, Washington, DC.

DEAR MR. BRADY: On November 7, 1985, the Select Committee on Indian Affairs ordered reported S. 1396, a bill to settle unresolved land claims on the White Earth Indian Reservation. At that time the Committee reviewed and discussed the letter dated November 6, 1985, from the Department of Justice which simply concluded that S. 1396 does not appear to contain any "legal or constitutional infirmities."

This conclusory statement is simply inadequate to the Committee's needs and is not responsive to the inquiries that were raised in the letter from the Chairman and Ranking Minority Member of this Committee to you on September 27, 1985, or the questions posed by Senator Boschwitz, Senator Durenberger and Congressman Stangeland in their letter to Attorney General Meese on May 23, 1985.

We are particularly troubled by the statement in your letter that on May 16, 1985, the Department of Justice, in a report to OMB on S. 885, noted "potential constitutional and technical issues" with that bill. Since S. 1396 is patterned after S. 885 and is similar in most major respects, it is most important that this Committee be provided with an adequate analysis of any constitutional issues touching upon this legislation, particularly as it relates to issues identified in your report to OMB on S. 885.

We would sincerely appreciate it if you would take immediate steps to provide the Committee with this analysis.

Best regards.

Sincerely,

Mark Andrews, Chairman, John Melcher, Ranking Minority Member, Barry Goldwater, Daniel K. Inouye, Slade Gorton, Dennis DeConcini, Frank H. Murkowski, Quentin N. Burdick, James Abdnor.

U.S. DEPARTMENT OF JUSTICE,
OFFICE OF LEGISLATIVE AND INTERGOVERNMENTAL AFFAIRS,
Washington, DC, December 4, 1985.

Hon. MARK ANDREWS,
Chairman, Select Committee on Indian Affairs, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: This responds to your letter of November 12, 1985, concerning possible constitutional infirmities in S. 1396, a bill to settle unresolved claims relating to certain allotted Indian lands on the White Earth Reservation in Minnesota. While we very much regret that you concluded that our analysis was not sufficiently detailed to assist you, the fact remains that the bill was carefully researched by lawyers in the Department and no authority was

found which rendered any portion of the bill unconstitutional.

The November 12 letter indicated that you were particularly concerned about "potential constitutional and technical issues" mentioned in our May 16, 1984, report to the Office of Management and Budget on S. 885, an earlier version of S. 1396. In that report (a copy of which is attached) we noted that S. 885 could present constitutional difficulties if it was interpreted to legislate a taking without just compensation of some claims by Indian allottees to land associated with the White Earth Reservation. However, we noted that this difficulty did not necessarily render the bill unconstitutional because of the existence of the Tucker Act, 28 U.S.C. §§ 1346, 1491, which provides a general right to recover just compensation for the taking of property. Because a Tucker Act remedy likely existed for any taking caused by S. 885, the bill presented no fatal constitutional infirmity, but we recommended that an explicit reference to the Tucker Act be made in the proposed statute to remove any risk that a court might hold it unconstitutional. S. 1396 has addressed the taking issue by explicitly providing, in subsections 6(d) and 6(e), a Tucker Act remedy to any person entitled to just compensation for the loss of his property.[1]

In their letter dated May 23, 1985, Senators Boschwitz and Durenberger and Congressman Stangeland requested the Department's opinion regarding the constitutionality of two specific provisions of the proposed legislation. Those provisions (1) extinguish the right of an allottee or an heir to sue for the title to the property in question as of the date of enactment and (2) require the Secretary of the Interior to forfeit to the White Earth Band the amount of compensation due to any allottee or heir if they cannot be found after two years of diligent effort by the Secretary to locate them. As to the first issue, *State of Minnesota* v. *Zay Zah*, 259 N.W. 2d 580 (Minn. 1977), *cert. denied*, 436 U.S. 917 (1978) and other cases establish Congress may, in the exercise of its authority over the conduct of Indian affairs, create vested property rights by virtue of establishing a trust relationship. Once created, "none of the rights derived from the trust can be divested without due process under the Fifth Amendment." *Zay Zah*, 259 N.W.2d at 584. S. 1396 provides the necessary Fifth Amendment due process by rpoviding a Tucker Act remedy to those allottees or heirs who establish a taking.

Similarly, in regard to the forfeiture provision, Congress can put whatever restrictions it chooses on an allottee's or an heir's claim to compensation as long as appropriate constitutional protections are provided as required by the Fifth Amendment's right to adequate compensation and due process of law for the taking of property. S. 1396 provides not only the minimal Tucker Act remedy and compensation but also additional due process protections including notice, appropriate administrative procedures and judicial review of those procedures. The requirement that the Secretary diligently attempt to find each allottee and heir for two years is another procedural safeguard to ensure that compensation is in fact paid to the appropriate persons. We understand that the forfeiture provision of the bill is merely a mechanism to alleviate the administrative burden and economic waste of holding the compensation funds for an extended period, possibly in perpetuity. Because the allottees and heirs have a Tucker Act remedy for any taking of their property that results from the bill, the forfeiture provision does not render the bill unconstitutional. In fact, the forfeiture provision is very much akin to the escheat provisions of Title 25 which provide that where an Indian holding a trust or restricted allotment of lands dies intestate without heirs, the land shall escheat to the tribe owning the land at the time of allotment or to the United States. See 25 U.S.C. §§ 373a, 373b; *see also Minn. Stat.* § 525.16(6).

We trust that the foregoing will be helpful to you in explaining our position on the constitutionality of S. 1396. Whether this legislation should be enacted involves policy considerations as to which the Department of Justice defers to the Department of the Interior. We are ready to assist you further in any way you consider appropriate.

Sincerely,

PHILLIP D. BRADY,
Acting Assistant Attorney General, Office of Legislative and Intergovernmental Affairs.

U.S. DEPARTMENT OF JUSTICE,
OFFICE OF LEGISLATIVE AND INTERGOVERNMENTAL AFFAIRS,
Washington, DC, May 16, 1984.

Hon. DAVID A. STOCKMAN,
Director, Office of Management and Budget, Washington, DC.

DEAR MR. STOCKMAN: We have reviewed S. 885, a bill "To settle unresolved claims relating to certain allotted Indian lands on the White Earth Indian Reservation, to remove clouds from the titles to certain lands, and for other purposes." We defer to the views of the Department of the Interior as to the passage of this bill.

This bill seeks to solve a particularly difficult situation on the White Earth Reservation in Minnesota. On that reservation, there are a number of cases where Indians have claims to land which have now been owned by others for decades. Those Indians lost the land for a variety of reasons. In some situations, they were deprived of the land through transactions which were legally void. This bill seeks to provide compensation to the Indians or their successors but, at the same time, to preserve the present status of ownership of the land.

This is a situation which has no solution which will satisfy everybody. No doubt, many of the Indians would prefer to have their land back, rather than compensation. Nonetheless, the bill represents a reasonable solution to the problem.

One legal problem, however, needs to be addressed. Under the Fifth Amendment to the Constitution, the United States is required to pay just compensation for any property which it takes. Although parties may agree to the amount of just compensation, in the absence of agreement the property owner is entitled to have a court determine the issue. If the United States takes property by statute and does not provide an opportunity for a judicial determination of just compensation, the statute is unconstitutional and void. Compare *Choate* v. *Trapp*, 224 U.S. 665 (1912).

At present, some Indians may have valid claims to real property on the White Earth Reservation, which would be taken by the bill. If such valid claims exist they are, of course, property, and if the bill "takes" them the owners of the claims are entitled to just compensation for the value of that property at the date the bill was enacted. The provisions in the bill are insufficient to meet this requirement because they do not purport to address the present value of the claims, nor do they purport to provide for a judicial determination of that present value. Nor does the bill provide for interest, the amount of which is also a question for the courts.

This difficulty is not fatal because of the existence of the Tucker Act, 23 U.S.C. 1346 and 1491. The Supreme Court has held that when statutes take property, there is a general right to recover just compensation under that Act, unless that Act is made expressly inapplicable. See the *Regional Rail Act Cases*, 419 U.S. 102, 126-127 (1974). Under the proposed bill, a Tucker Act remedy probably exists for constitutional takings caused by the Act. Nonetheless, it would be useful to expressly so state in the language of the proposed statute itself, or (less desirably) in its legislative history. Otherwise, there is at least some risk that a court might hold the statute unconstitutional.

We also have some technical comments:

1. Section 1(a). The Act of January 14, 1889, is set out at 25 Stat. 642. The Act of February 8, 1887, is set out at 24 Stat. 388. The citations to the Statutes at Large should probably be included in the bill.

2. Section 1(c) (page 2, line 7), "toll" should be "roll".

3. Section 1(d). This section defines "inherited" as used in the bill to mean received as a result of testate or intestate succession, as determined by the Secretary. It would be useful to add "or any combination of testate or intestate successiono" after the words "intestate succession" in this definition, to make it clear that a person need not be the direct heir of the first allottee in order to come under the bill. In addition, the term "heir", which is also used in the statute, should be defined. A sentence might be added to the end of this subsection: "An 'Heir' shall be a person who has 'inherited,' as that term is defined in the preceding sentence."

4. Section 1(j) (page 4, lines 5-7). It would simplify the definition of "Interest" by adding a period after "allotment" and deleting the rest of the sentence.

5. Section 2(b). On page 5, lines 10 and 24, and page 6, line 3, the bill refers to "interests." In each instance, this should be changed to "allotments or interests".

On page 7, lines 1 and 7, the bill refers to "any allotment". In each instance, this should be changed to any allotment or interest".

6. Section 4. On page 7, line 25, and page 8, lines 1 and 3, "allotments" should be changed to "interests or allotments".

7. Section 5. On page 8, line 17, "allotment" should be changed to "interest or allotment".

Sincerely, (Signed)

ROBERT A. MCCONNELL,
Assistant Attorney General, Office of Legislative and Intergovernmental Affairs.

---

[1] In our report to OMB, the Department also made some technical comments on S. 885. We suggested that (1) citations to the Statutes at Large be included in the bill; (2) an apparent typographical error be corrected; (3) the definition of "inherited" be clarified; (4) the term "heir" be explicitly defined; (5) the definition "interest" be modified; and (6) that various references to the term "allotment" or "allotments" be clarified to include any "interest" or "interests." Our current review of S. 1396 indicates that all of these technical changes have been made in accordance with our suggestions.

U.S. SENATE,
SELECT COMMITTEE ON INDIAN AFFAIRS,
Washington, DC, December 5, 1985.

Mr. PHILLIP BRADY,
Acting Assistant Attorney General, Office of Legislative and Intergovernmental Affairs, U.S. Department of Justice, Office of the Assistant Attorney General, Washington, DC.

DEAR MR. BRADY: Thank you for your letter of December 4, 1985, regarding the constitutionality of S. 1396, a bill to settle unresolved claims relating to certain allotted Indian lands on the White Earth Reservation in Minnesota.

Please respond to the following additional questions regarding S. 1396, as soon as possible.

1. Was the trust status ended on the Indian allottee's land in question on the White Earth Reservation?

2. Since the case law has established that trust allotments could not go out of trust status, what could be the rationale to extinguish Indian title on the White Earth Reservation?

3. Was the trust responsibility adhered to on the White Earth Reservation?

4. How could the state of Minnesota acquire the lands in question?

Sincerely,

JOHN MELCHER.

U.S. DEPARTMENT OF JUSTICE,
OFFICE OF LEGISLATIVE AND INTERGOVERNMENTAL AFFAIRS,
Washington, DC, December 6, 1985.

Hon. JOHN MELCHER,
U.S. Senate, Washington, DC.

DEAR SENATOR MELCHER: This is in response to your December 5, 1985, letter concerning S. 1396, a bill to settle unresolved claims relating to certain allotted Indian lands of the White Earth Reservation in Minnesota. Your letter requested that we respond to the four following questions:

1. Was the trust status ended on the Indian allottee's land in question on the White Earth Reservation?

Response: We are not sufficiently aware of the facts in the White Earth situation to ascertain whether in some instances the trust status of certain allottees has been terminated. We would defer to the Interior Department for that information. *State of Minnesota* v. *Zay Zah*, 259 N.W. 2d 580 (Minn. 1977), *cert. denied* 436 U.S. 917 (1978), held that the trust status for all allotments was not terminated by the Clapp Amendment, 34 Stat. 353 (1906), but did not answer whether Congress was constitutionally prohibited from terminating allotments on the White Earth Reservation. We are unaware of any cases which deny Congress the authority to terminate allotments as long as appropriate constitutional safeguards against a taking without due process or just compensation are observed.

2. Since the case law has established that trust allotments could not go out of trust status, what could be the rationale to extinguish Indian title on the White Earth Reservation?

Response:

As is evident from our response to Question (1), we do not necessarily agree that case law has established that trust allotments cannot go out of trust status. In fact, Zay Zah explicitly recognizes that the rights derived from the trust status can be divested as long as the necessary Fifth Amendment due process is provided. We can only state that we know of no case law which holds that Congress is constitutionally proscribed from terminating allotments on the White Earth Reservation.

3. Was the trust responsibility adhered to on the White Earth Reservation?

Response: We are not sufficiently acquainted with the facts surrounding the White Earth Reservation to answer that question and would once again defer to the Interior Department for a response.

4. How could the state of Minnesota acquire the lands in question?

Response:

Although we are not aware of all the facts, it is our understanding that the state acquired title to some allotments when taxes were not paid after the expiration of the twenty-five year tax-free period.

We would note that the Department of Justice has taken no position on whether this legislation should or should not be enacted. We have reviewed the legislation and found it not to be in violation of the United States Constitution because it provides that anyone who can establish that his property rights are adversely affected can recover just compensation in a judicial proceeding. If the legislation is enacted and any person sues pursuant to the Tucker Act to recover just compensation, the court hearing the case will have to decide the legal issue of whether the plaintiff had title to land or title to a claim to land on the date of enactment, whether the bill caused his land or claim to be taken, and, if so, the amount of compensation that must be paid to him.

Sincerely,

PHILLIP D. BRADY,
Acting Assistant Attorney General, Office of Legislative and Intergovernmental Affairs.

The PRESIDING OFFICER. The time of the Senator from Montana has expired.

Mr. BOSCHWITZ. Mr. President, again, I rise to urge my colleagues to support the bill now before the Senate, S. 1396, the White Earth Reservation Land Settlement Act of 1985.

As I explained to my colleagues yesterday, on June 27, 1985, Senator DURENBERGER joined me to introduce S. 1396. This bill seeks to solve a very difficult and complex land claims problem that exists on the White Earth Reservation in Minnesota. Over 100,000 acres of land on the reservation are subject to claims. Our bill would provide compensation to the Indian allottees or their heirs while at the same time removing the cloud on the titles to the affected lands.

This bill is supported by the chairman of the White Earth Band of Chippewa Indians and all State and Federal elected officials from both parties representing the area, including Governor Rudy Perpich, Congressman ARLAN STANGELAND, Minnesota Attorney General Hubert H. Humphrey III, and former Governor and U.S. Senator Wendell Anderson.

The circumstances surrounding the land disputes we seek to resolve are extremely complex and involve highly technical legal issues. We feel the bill confronts these problems in a comprehensive and fair manner. The alternative to enacting S. 1396 is expensive, time consuming, and potentially explosive litigation which very likely would leave most Indian claimants with nothing.

The land claim problems stem from conflicting congressional and executive actions beginning nearly 100 years ago. Congressional acts in 1887 and 1889 established a national policy of allotting tribal lands among individual members of the tribes occupying a reservation. The allotment process on White Earth began in 1902. The land was to be held in trust by the United States on behalf of the individual Indian allottees.

In 1906, Congress enacted the Burke Act which permitted the Secretary of the Interior to issue to each Indian a "patent in fee," conferring outright ownership and legal title and removing all restrictions to sale, encumbrance or taxation. That same year Congress adopted the Clapp amendment to an Indian appropriation bill which removed restrictions from allotments made to "mixed blood" Indians on the White Earth Reservation and in line with the Burke Act, authorized the Secretary to approve sales by "full bloods" with their consent. These actions led to the taxation of land by the State and counties, some of which was lost because of nonpayment of taxes.

Court decisions, including a 1977 Minnesota Supreme Court decision—Minnesota versus Zay Zah—have held that, taken together, these congressional actions may have abrogated vested rights of Indians without compensation. Currently, nearly 19,000 acres of land are under claim because of these tax forfeitures. This is one category of claim addressed by this bill.

A second category of claims results from conflicting rulings by Interior Department Solicitors. In 1915, the Solictor ruled that the Federal Government was not responsible for determining the heirs of deceased White Earth Indians and distributing their trust estates. Therefore, this probating was done by the State and counties. In 1979 the Solicitor reversed the 1915 ruling, stating that these probates were, in fact, the responsibility of the Federal Government. Therefore, any lands sold by Indian heirs determined by a non-Federal probate are subject to claim. Currently, over 10,000 acres of land are under claim due to having been the subject of State court probates.

The third major category of claim is due to conflicting State and Federal interpretation of the age of majority for females. At the time of these transactions—and still today—Minnesota's age of majority was 18. Federal common law recognizes 21 as the age of majority for females in certain circumstances. Federal statutes required that any sale of land by minor Indians have the approval of the Secretary of

the Interior. Many sales were made by female Indians between the ages of 18 and 21 without Secretarial approval. They were made in accordance with State law and without objection by the Secretary of the Interior. Current owners of land originally sold by these 18- to 21-year-old females now find their land titles clouded. These sales make up most of the largest category of claims, totaling over 60,000 acres.

These very complex issues will lead to protracted litigation if not resolved by legislation. And the only certain result of litigating those claims is that these problems would continue to exist for a long time. If litigated, there are no assurances those making the claims would prevail, especially those claims resulting from minor aged sales and improper probates. If litigated, the White Earth Band as an entity would have no claim.

By contrast, this legislative solution has the following components.

First. Compensation would be provided for all the claims. The allottees and heirs would receive compensation equal to the fair market value of the land as of the transaction, less compensation actually received, plus 5-percent interest compounded annually. The Department of the Interior estimates that this compensation would total approximately $10.4 million. Any unclaimed shares will revert to the White Earth Band.

Second. An additional $6.6 million will be provided to the White Earth Band for economic development.

Third. The State of Minnesota, by an act of the State legislature, will provide 10,000 acres of current State and county land to the band.

Fourth. The clearing of land titles would take place at the time of the appropriation of the $6.6 million for the White Earth Band, and the Secretary of the Interior's approval of the 10,000 acres to be provided by the State of Minnesota, or 180 days following enactment, whichever is later.

Some opponents of this bill argue that the Federal Government should restore the full 825,000 acres that originally comprised the reservation to the White Earth Band. This is an unrealistic attempt to rewrite history to undo the allotment process that took place on many reservations, and only took place on White Earth after being agreed to by a vote of the tribal membership.

The opponents also claim the bill is unconstitutional because claimants' rights are being extinguished. This is done in many Indian land claim cases. The Department of Justice and the CRS American Law Division have both reviewed the bill and concluded that it is constitutional.

Some opponents may argue that the Federal Government has no responsibility to resolve these issues. Such a position is clearly irresponsible and ignores the results of Federal acts of legislation that led to the problem.

The White Earth situation differs from the usual eastern land claim matters in that it does not involve the State violating Federal law. The land claims at White Earth appear mostly to be based on transactions which took place in accordance with specific Federal statutes or executive branch policies, and which were subsequently questioned several decades later.

For example, the claims relating to allegedly invalid State probates are a direct result of a 1915 Department of the Interior Solicitor's opinion—an opinion which was reversed by a different Solicitor and declared invalid in 1978. The forced fee patent claims are a direct result of transactions made under the Federal Burke Act and Interior Department policies. The tax forfeitures were conducted in accordance with the clear wording of the Clapp Act. Sales by mixed-blood women between the ages of 18 and 21 were valid under State law and were accepted for decades by the Interior Department, which deferred to State law on questions of age of majority. The fact that virtually all of the claims dealt with in S. 1396 arise because of past Federal laws and policies is what lead the bill authors to accept the propriety of a Federal settlement.

Most of the provisions of the bill are a result of over 2 years of negotiations among the State of Minnesota, Department of the Interior, White Earth Band, local governments, members and staff of the House Interior Committee and Senate Select Committee on Indian Affairs, and the OMB. The bill embodies several compromises to accommodate some quite varying interests. It was drafted with the assistance of the White Earth Band of Chippewa Indians. It received the endorsement of the White Earth Band in April, although tribal political infighting has resulted in the withdrawal of that endorsement. As I previously stated, the bill is supported by Minnesota State and Federal officials, including Gov. Rudy Perpich, Attorney General Hubert H. Humphrey III, and Congressman ARLAN STANGELAND.

It is a fair and equitable proposal. I ask for my colleagues' support.

Mr. DURENBERGER. Mr. President, I am prepared to yield back the remainder of our time.

The PRESIDING OFFICER. The question is on agreeing to the committee substitute.

The committee substitute was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed by a third reading and was read the third time.

The PRESIDING OFFICER. The question is on final passage.

Mr. MELCHER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST], the Senator from Arizona [Mr. GOLDWATER], the Senator from Washington [Mr. GORTON], the Senator from Utah [Mr. HATCH], the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Nevada [Mr. LAXALT], the Senator from Maryland [Mr. MATHIAS], and the Senator from South Carolina [Mr. THURMOND] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Florida [Mr. CHILES] is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 56, nays 35, as follows:

[Rollcall Vote No. 376 Leg.]

So the bill (S. 1396), as amended, was passed, as follows:

S. 1396

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

That this Act may be cited as the "White Earth Reservation Land Settlement Act of 1985".

SEC. 2. The Congress finds that—

(1) claims on behalf of Indian allottees or heirs and the White Earth Band involving substantial amounts of land within the White Earth Indian Reservation in Minnesota are the subject of existing and potential lawsuits involving many and diverse interests in Minnesota, and are creating great hardship and uncertainty for government, Indian communities, and non-Indian communities;

(2) the lawsuits and uncertainty will result in great expense and expenditure of time, and could have a profound negative impact on the social and well-being of everyone on the reservation;

(3) the White Earth Band of Chippewa Indians, State of Minnesota, along with its political subdivisions, and other interested parties have made diligent efforts to fashion a settlement to these claims, and the Federal Government, by providing the assistance specified in this Act, will make possible the implementation of a permanent settlement with regard to these claims;

(4) past United States laws and policies have contributed to the uncertainty surrounding the claims;

(5) it is in the long-term interest of the United States, State of Minnesota, White Earth Band, Indians, and non-Indians for the United States to assist in the implementation of a fair and equitable settlement of these claims; and

(6) this Act will settle unresolved legal uncertainties relating to these claims.

SEC. 3. For purposes of this Act:

(a) "Allotment" shall mean an allocation of land on the White Earth Reservation, Minnesota, granted, pursuant to the Act of January 14, 1889 (25 Stat. 642), and the Act of February 8, 1887 (24 Stat. 388), to a Chippewa Indian.

(b) "Allottee" shall mean the recipient of an allotment.

(c) "Full blood" shall mean a Chippewa Indian of the White Earth Reservation, Minnesota, who was designated as a full blood Indian on the roll approved by the United States District Court for the District of Minnesota on October 1, 1920, or who was so designated by a decree of a Federal court of competent jurisdiction; it shall also refer to an individual who is not designated on said roll but who is the biological child of two full blood parents so designated on the roll or of one full blood parent so designated on the roll and one parent who was an Indian enrolled in any other federally recognized Indian tribe, band, or community.

(d) "Inherited" shall mean received as a result of testate or intestate succession or any combination of testate or intestate succession, which succession shall be determined by the Secretary of the Interior or his authorized representative.

(e) "Mixed blood" shall mean a Chippewa Indian of the White Earth Reservation, Minnesota, who was designated as a mixed blood Indian on the roll approved by the United States District Court of Minnesota on October 1, 1920, unless designated a full blood by decree of a Federal court of competent jurisdiction; it shall also refer to any descendants of an individual who was listed on said roll providing the descendant was not a full blood under the definition in subsection (c) of this section. The term "mixed blood" shall not include an Indian enrolled in any federally recognized Indian tribe, band, or community other than the White Earth Band.

(f) "Tax forfeited" shall mean an allotment which, pursuant to State law, was declared forfeited for nonpayment of real property taxes and purportedly transferred directly to the State of Minnesota or to private parties or governmental entities.

(g) "Majority" shall mean the age of twenty-one years or older.

(h) "Secretary" shall mean the Secretary of the Interior or his/or her authorized representative.

(i) "Trust period" shall mean the period during which the United States held an allotment in trust for the allottee or the allottee's heirs. For the purpose of this Act, the Executive Order Numbered 4642 of May 5, 1927, Executive Order Numbered 5768 of December 10, 1931, and Executive Order Numbered 5953 of November 23, 1932, shall be deemed to have extended trust periods on all allotments or interests therein the trust periods for which would otherwise have expired in 1927, 1932, or 1933, notwithstanding the issuance of any fee patents for which there were no applications, and if such allotments were not specifically exempted from the Executive orders; and the Indian Reorganization Act of June 18, 1934, shall be deemed to have extended indefinitely trust periods on all allotments or interests therein the trust periods for which would otherwise have expired on June 18, 1934, or at any time thereafter. Said Executive orders and Act shall be deemed not to have extended the trust period for allotments or interests which were sold or mortgaged by adult mixed bloods, by non-Indians, or with the approval of the Secretary, or for allotments or interests which were sold or mortgaged by anyone where such sale or mortgage was the subject of litigation in Federal court which proceeded to a judgment on the merits and where the outcome of such litigation did not vacate or void said sale or mortgage.

(j) "Interest", except where such item is used in conjunction with "compound", shall mean a fractional holding, less than the whole, held in an allotment.

(k) "Adult" shall mean having attained the age of majority.

(l) "Heir" shall mean one who received or was entitled to receive an allotment or interest as a result of testate or intestate succession under applicable Federal or Minnesota law.

(m) "Transfer" includes but is not limited to any voluntary or involuntary sale, mortgage, tax forfeiture or conveyance pursuant to State law; any transaction the purpose of which was to effect a sale, mortgage, tax forfeiture or conveyance pursuant to State law; any Act, event, or circumstance that resulted in a change of title to, possession of, dominion over, or control of an allotment or interest therein.

SEC. 4. (a) The provisions of this Act shall apply to the following allotments:

(1) allotments which were never sold or mortgaged by the allottees or by their heirs and which were tax forfeited during the trust period;

(2) allotments which were sold or mortgaged during the trust period, without the approval of the Secretary, by the allottees prior to having attained majority, and were never again sold or mortgaged either by the allottees upon their having attained majority or by heirs of the allottees;

(3) allotments which were sold or mortgaged during the trust period by full blood allottees without the approval of the Secretary, and were never again the subject of a sale or mortgage by heirs of the allottees; and

(4) allotments which were never sold or mortgaged by the allottees, but which subsequent to the deaths of the allottees, purportedly were sold or mortgaged, during the trust period, by administrators, executors, or representatives, operating under authority from State courts, and were never again the subject of a sale or mortgage by heirs of the allottees.

(b) The provisions of this Act shall also apply to the following allotments or interests in allotments:

(1) allotments or interests which were inherited by full or mixed bloods who never sold or mortgaged their allotments or interests or by Indians enrolled in other federally recognized Indian tribes, bands, or communities who never sold or mortgaged their allotments or interests, where the allotments or interests were tax forfeited during the trust period;

(2) allotments or interests which were inherited by mixed bloods under the age of majority and which were sold or mortgaged during the trust period without the approval of the Secretary prior to such mixed bloods having attained majority, but which were never again sold or mortgaged by them upon having attained majority or by their heirs;

(3) allotments or interests which were inherited by full bloods or by Indians enrolled in other federally recognized Indian tribes, bands, or communities, who sold or mortgaged such allotments or interests during the trust period without the approval of the Secretary;

(4) allotments or interests which were inherited by full or mixed bloods who never sold or mortgaged their allotments or interests, but which, subsequent to the deaths of such heirs, were sold or mortgaged during the trust period by administrators, operating under authority from State courts;

(5) allotments or interests which were owned by allottees or which were inherited by full or mixed bloods for whom guardians were appointed by State courts, which guardians sold or mortgaged the allotments or interests during the trust period without the approval of the Secretary;

(6) interests which were inherited by full or mixed bloods who never sold or mortgaged their interests during the trust period, even though other interests in the same allotment were sold by other heirs where the land comprising the allotment has been claimed in full by other parties adversely to the full or mixed bloods who never sold or mortgaged their interests; and

(7) allotments or interests which were inherited by full or mixed bloods or by Indians enrolled in other federally recognized Indian tribes, bands, or communities which were never sold or mortgaged during the trust period but which were purportedly distributed by State court probate proceedings to other individuals.

(c) This Act shall not apply to—

(1) any allotment or interest the sale or mortgage of which was the subject of litigation which proceeded to a judgment on the merits in Federal courts and where the outcome of such litigation was other than vacating and voiding such sale or mortgage;

(2) any allotment or interest which was tax forfeited subsequent to the date on which the tax exemption was declared by a Federal court to have expired;

(3) any allotment or interest which was sold, mortgaged, or tax forfeited after the expiration of the trust period; or

(4) any allotment or interest which was sold or mortgaged at any time by an adult mixed blood Indian.

Nothing in this Act is intended to question the validity of the transactions relating to allotments or interests as described in section 4(c), and such allotments and interests are declared to be outside the scope of this Act.

SEC. 5. (a) Any determination of the heirs of any person holding an allotment or interest, made by the courts of the State of Minnesota, which is filed with the proper county recording officer prior to May 9, 1979, shall be deemed to have effectively transferred the title of the decedent in the allotment or interest to the heirs so determined unless a separate determination of heirs has been made by the Secretary before the effective date of this Act and such determination has been filed with the proper county recording officer within six months after the effective date of this Act. Nothing in this subsection shall be construed to remove any allotment described in section 4 from the compensation provided for in the Act.

(b) The proper county recording officer is the county recorder of the county in which the allotment or interest is located if the title has not been registered pursuant to Minnesota law. If the title has been so registered, the proper county recording officer shall be the Registrar of Titles in the county in which the allotment or interest is located.

(c) As to any allotment which was granted to an allottee who had died prior to the selection date of the allotment, the granting of such allotment is hereby ratified and confirmed, and shall be of the same effect as if the allotment had been selected by the allottee before the allottee's death: *Provided*, That the White Earth Band of Chippewa Indians shall be compensated for such allotments in the manner provided in sections 6, 7, and 8.

(d) As to any allotment that was made under the provisions of the Treaty of March 19, 1867 (16 Stat. 719), and which was reallotted under the provisions of the Act of January 14, 1889 (25 Stat. 642), such reallotment is hereby ratified and confirmed.

SEC. 6. (a) As soon as the conditions set forth in section 10 of this Act have been met, the Secretary shall publish a certification in the Federal Register that such conditions have been met. After such publication, any allotment or interest which the Secretary, in accordance with this Act, determines falls within the provisions of section 4(a), 4(b), or 5(c), the tax forfeiture, sale, mortgage, or other transfer, as described therein, shall be deemed to have been made in accordance with the Constitution and all laws of the United States specifically applicable to transfers of allotments or interests held by the United States in trust for Indians, and Congress hereby does approve and ratify any such transfer effective as of the date of said transfer, subject to the provisions of section 6(c). Compensation for loss of allotments or interests resulting from this approval and ratification shall be determined and processed according to the provisions of section 8.

(b) By virtue of the approval and ratification of transfers of allotments or interests therein effected by this section, all claims against the United States, the State of Minnesota or any subdivisions thereof, or any other person or entity, by the White Earth Band, its members, or by any other Indian tribe or Indian, or any successors in interest thereof, arising out of, and at the time of or subsequent to, the transfers described in section 4(a), 4(b), or 5(c) and based on any interest in or nontreaty rights involving such allotments or interests therein, shall be deemed never to have existed as of the date of the transfer, subject to the provisions of this Act.

(c) Notwithstanding any provision of law other than the provisions of this section, any action in any court to recover title or damages relating to transactions described in section 4(a), 4(b), 5(a), or 5(c), shall be forever barred unless the complaint is filed not later than one hundred and eighty days following enactment of this Act, or prior to the publication required by section 6(a) whichever occurs later in time: *Provided*, That immediately upon the date of enactment of this Act any such action on behalf of the White Earth Band of Chippewa Indians shall be forever barred, unless the publication required by section 6(a) does not take place within two years of the date of enactment of this Act in which case the bar of any such action on behalf of the White Earth Band of Chippewa Indians shall be deemed lifted and nullified: *Provided further*, That the Secretary shall not issue to the White Earth Band any report rejecting litigation nor submit to Congress any legislation report pursuant to section 2415 of title 28, United States Code, relating to transactions described in section 4(a), 4(b), 5(a), or 5(c) of this Act, until and unless the bar against actions on behalf of the White Earth Band is lifted and nullified. Any such action filed within the time period allowed by this subsection shall not be barred; however, the filing of any such action by an allottee, heir, or others entitled to compensation under this Act shall bar such allottee, heir, or others from receiving compensation pursuant to the provisions of section 8. The United States District Court for the District of Minnesota shall have exclusive jurisdiction over any such action otherwise properly filed within the time allowed by this subsection.

(d) This section shall not bar an heir, allottee, or any other person entitled to compensation under this Act from maintaining an action, based on the transactions described in section 4(a), 4(b), 5(a), or 5(c), against the United States in the Claims Court pursuant to the Tucker Act, section 1491 of title 28, United States Code, challenging the constitutional adequacy of the compensation provisions of section 8(a) as they apply to a particular allotment or interest: *Provided*, That such action shall be filed with the Claims Court not later than one hundred and eighty days after the issuance of the notice of the Secretary's compensation determination as provided in section 8(c). If such an action is not filed within the one-hundred-and-eighty-day period, it shall be forever barred. The United States hereby waives any sovereign immunity defense it may have to such an action but does not waive any other defenses it may have to such action. The filing of an action by any heir, allottee, or any other person under the provisions of this section shall bar such person forever from receiving compensation pursuant to the provisions of section 8.

SEC. 7. (a) The Secretary is hereby authorized to and shall diligently investigate to the maximum extent practicable all White Earth allotments and shall determine which allotments or interest fall within any of the provisions of section 4(a), 4(b), or 5(c). As to all such allotments or interests determined to be within the provisions of section 4(a), 4(b), or 5(c), the Secretary shall prepare lists of such allotments or interests, which shall include allotment number, land description, and allottee's name, in English and Ojibway where available. A first list shall be published within one hundred and eighty days after the date of enactment of this Act in the Federal Register; in a newspaper of general circulation in Mahnomen County, Minnesota; in a newspaper of general circulation in Becker County, Minnesota; in a newspaper of general circulation in Clearwater County, Minnesota; in one newspaper of general circulation in metropolitan Minneapolis-Saint Paul; and, in the Secretary's discretion, in any appropriate band or tribal newspaper. Publication in the required newspapers shall take place no later than thirty days after publication in the Federal Register.

(b) Any tribe, band, or group of Indians, or any individual shall have one year after the date of publication in the Federal Register to submit to the Secretary any additional allotments or interests which the tribe, band, group, or individual believes should fall within any of the provisions of section 4(a), 4(b), or 5(c). The Secretary, without such submissions, may also independently determine that additional allotments or interests fall within such provisions. Any additional allotments or interests submitted to the Secretary shall be accompanied by a statement identifying the allotment or interest and its land description and summarizing the reasons why it should be added to the list required by this section.

(c) The Secretary shall determine which additional allotments or interests fall within the provisions of the section 4(a), 4(b), or 5(c), and not later than five hundred and forty days of the date of publication of the Secretary's first list in the Federal Register, the Secretary shall publish a second list in the Federal Register and previously required newspapers of the allotments or interests the Secretary has determined should be added to the first published list.

(d) Any determination made by the Secretary under this section to include an allotment or interest on the first list required by the section to be published in the Federal Register may be judicially reviewed pursuant to the Administrative Procedure Act not later than ninety days of the publication date of the first list of the Federal Register. Any such action not filed within such ninety-day period shall be forever barred. Any determination made by the Secretary to include an allotment or interest on the second list required by this section to be published in the Federal Register, or any determination made by the Secretary not to include an allotment or interest on such list, may be judicially reviewed pursuant to the Administrative Procedure Act within ninety days of the publication date of the second list in the Federal Register. Any such action not filed within such ninety-day period shall be forever barred. Exclusive jurisdiction over actions under this subdivision is hereby rested in the United States District Court for the District of Minnesota.

SEC. 8. (a) Compensation for a loss of an allotment or interest shall be the fair market value of the land interest therein as of the date of tax forfeiture, sale, allotment, mortgage, or other transfer described in section 4(a), 4(b), or 5(c), less any compensation actually received, plus interest compounded annually at 5 per centum from the date of said loss of an allotment or interest until the date of enactment of this Act, and at the general rate of interest earned by United States Department of the Interior funds thereafter. A determination of com-

pensation actually received shall be supported by federal, state, or local public documents filed contemporaneously with the transaction or by clear and convincing evidence. Compensation actually received shall not be subtracted from the fair market value in any instance where an allotment or interest was sold or mortgaged by a full or mixed blood, under the age of eighteen years, or in any instance where there is prima facie evidence that fraud occurred in a sale or mortgage. No compensation for loss of an allotment or interest relating to transfers described in section 4(b) shall be granted to any person or the heirs of such person where such allotment or interest was received pursuant to State court probate proceedings and where also it has been or is determined by the Secretary that such person or heirs were not entitled to inherit the allotment or interest.

(b) For the purpose of this section, the date of transfer applicable to interests described in section 4(b)(6) shall be the last date on which any interest in the subject allotment was transferred by document of record by any other heir of the allottee; and the date of transfer applicable to allotments described in section 5(c) shall be the selection date. For purposes of this section, the Secretary shall establish the fair market value of various types of land for various years, which shall govern the compensation payable under this section unless a claimant demonstrates that a particular allotment or interest had a value materially different from the value established by the Secretary.

(c) The Secretary shall provide written notice of the Secretary's compensation determination to the allottees or heirs entitled thereto. Such notice shall describe the basis for the Secretary's determination, the applicable time limits for judicial review of the determination, and the process whereby such compensation will be distributed. The Secretary shall proceed to make such heirship determinations as may be necessary to provide the notice required by this section: *Provided*, That the Secretary shall accept as conclusive evidence of heirship any determination of the courts of the State of Minnesota as provided in section 5(a) of this Act: *Provided further*, That the Secretary shall give written notice only to those allottees or heirs whose addresses can be ascertained by reasonable and diligent efforts; otherwise such notice shall be given by publication in the Federal Register.

(d) The Secretary's administrative determination of the appropriate amount of compensation computed pursuant to the provisions of this Act may be judicially reviewed pursuant to the Administrative Procedure Act not later one hundred and eighty days after the issuance of notice as aforesaid; after such time the Secretary's determination shall be conclusive and all judicial review shall be barred. Exclusive jurisdiction over any such action is hereby vested in the United States District Court for the District of Minnesota.

(e) Once a compensation determination has become conclusive according to the provisions of subsection (d), the Secretary shall certify such determination to the Secretary of the Treasury and such conclusive determination shall be treated as a final judgment, award or, compromise settlement under the provisions of title 31, United States Code, section 1304. The Secretary of the Treasury is authorized and directed to pay out of the funds in the Treasury into a separate interest bearing White Earth Settlement Fund account the amount certified by the Secretary of the Interior in each case. The Secretary of the Interior shall then make a diligent effort to locate each allottee or heir; however, if, after two years from the date on which a determination becomes conclusive an allottee or heir cannot be located, the Secretary of the Interior shall declare the amount owing to such allottee or heir forfeited.

(f) Any and all amounts forfeited pursuant to subsection (e) together with the interest accumulated thereon, pursuant to section 8 shall be transferred annually to the fund established under section 12 for the White Earth Band.

SEC. 9. The Secretary shall determine the heirs, if heretofore undetermined, or modify the inventory of an existing heirship determination of any full or mixed blood or Indian enrolled in any other federally recognized Indian tribe, band, or community, where appropriate for the purposes of this Act: *Provided*, That the Secretary shall accept any determination of heirship by the courts of the State of Minnesota as provided in section 5(a) of this Act.

SEC. 10. (a) The provisions of section 6 of this Act shall take effect upon the publication in the Federal Register by the Secretary of certification that the following conditions have been satisfied:

(1) The State of Minnesota, in accordance with Laws of Minnesota 1984, chapter 539, has entered into an agreement with the Secretary providing for the transfer of ten thousand acres of land within the exterior boundaries of the White Earth Reservation to the United States to hold in trust for the White Earth Band of Chippewa Indians as the State's contribution to the settlement provided for by this Act. The Secretary shall not enter into such an agreement until the Secretary determines, or the authorized governing body of the band certifies to the Secretary in writing, that the agreement will result in the transfer of ten thousand acres which possess reasonable value for the White Earth Band, including but not limited to value for agricultural, recreational, forestry, commercial, residential, industrial, or general land consolidation purposes. The land transferred pursuant to this subsection shall be accepted by the United States subject to all existing accesses, roads, easements, rights of way, or similar uses unless the Governor and Attorney General of the State of Minnesota certify in writing to the Secretary the State's intent to abandon such uses on a particular parcel.

(2) The State, in accordance with the Laws of Minnesota 1984, chapter 539, has appropriated $500,000 for the purpose of providing the United States with technical and computer assistance for implementing the settlement provided for in this Act.

(3) The United States has appropriated $6,600,000 for economic development for the benefit of the White Earth Band of Chippewa Indians.

(b) Upon final acceptance by the Secretary, the land referred to in subsection (a)(1) shall be deemed to have been reserved as of the date of the establishment of the White Earth Reservation and to be part of the trust land of the White Earth Reservation for all purposes.

SEC. 11. Nothing in this Act is intended to alter the jurisdiction currently possessed by the White Earth Band of Chippewa Indians, the State of Minnesota, or the United States over Indians or non-Indians within the exterior boundaries of the White Earth Reservation.

SEC. 12. (a) There is established in the Treasury of the United States a fund to be known as the White Earth Economic Development and Tribal Government Fund. Money in this Fund shall be held in trust by the United States for the White Earth Band of Chippewa Indians, and shall be invested and managed by the Secretary in the same manner as tribal trust funds pursuant to the Act of June 24, 1938 (25 U.S.C. 162a).

(b) The White Earth Economic Development and Tribal Government Fund shall consist of—

(1) money received by the White Earth Band as compensation pursuant to section 8; and

(2) money received by the White Earth Band as a result of amounts forfeited pursuant to section 8(f); and

(3) money received as an appropriation pursuant to section 15; and

(4) income accruing on such sums.

Income accruing to the White Earth Economic Development and Tribal Government Fund shall, without further appropriation, be available for expenditure as provided in subsection (c).

(c) Income from the fund may be used by the authorized governing body of the band for band administration. Principal and income may be used by the authorized governing body of the band for economic development, land acquisition, and investments: *Provided, however*, That under no circumstances shall any portion of the moneys described in subsection (b) be used for per capita payments to any members of the band: *Provided further*, That none of the funds described in subsection (b) shall be expended by the governing body of the band until—

(1) such body has adopted a band financial ordinance and investment plan for the use of such funds; and

(2) such body has submitted to the Secretary a waiver of liability on the part of the United States for any loss resulting from the use of such funds; and

(3) the Secretary has approved the band financial ordinance and investment plan. The Secretary shall approve or reject in writing such ordinance and plan within sixty days of the date it is mailed or otherwise submitted to him: *Provided*, That such ordinance and plan shall be deemed approved if, sixty days after submission, the Secretary has not so approved or rejected it. The Secretary shall approve the ordinance and plan if it adequately contains the element specified in section 12(d).

SEC. 13. Notwithstanding any other law to the contrary, the United States grants its permission to the State of Minnesota to transfer land to the White Earth Band as described in section 10(a)(1) which prior to the date of enactment of this Act may have been obtained by the State pursuant to other Federal law or with Federal assistance. Any restrictions or conditions imposed by any other Federal law or regulation on the transfer of such land are hereby waived and removed.

SEC. 14. Not later than five years, or as soon as possible, after the date of enactment of this Act, the Secretary shall make all determinations, provide all notices, and complete the administrative work necessary to accomplish the objectives of this Act. The Secretary shall give priority in making compensation determinations and payments under this Act to original allottees and elderly heirs. The Secretary shall submit a report by January 1 of each year to the chairman of the House of Representatives Committee on Interior and Insular Affairs

and the chairman of the Senate Committee on Indian Affairs, which report shall summarize the administrative progress to date and shall estimate the amount and nature of work left to be done.

SEC. 15. (a) There are hereby authorized to be appropriated to the White Earth Band $6,600,000 as a grant to be expended as provided in section 12.

SEC. 16. None of the moneys which are distributed under this Act shall be subject to Federal or State income taxes or be considered as income or resources in determining eligibility for or the amount of assistance under the Social Security Act or any other federally assisted program.

SEC. 17. The Secretary is authorized, if so requested by the authorized governing body of the White Earth Band, to exchange any of the land which is transferred to the United States as described in section 10(a)(1) for any other land within the exterior boundaries of the White Earth Reservation which is owned by the United States, the State of Minnesota, or any of the State's political subdivisions. Nothing in this section shall be deemed to require an exchange not agreed to by all parties to the exchange.

SEC. 18. Any lands acquired by the White Earth Band within the exterior boundaries of the White Earth Reservation with funds referred to in section 12, or by the Secretary pursuant to section 17, shall be held in trust by the United States. Such lands shall be deemed to have been reserved from the date of the establishment of said reservation and to be part of the trust land of the White Earth Band for all purposes.

Mr. DURENBERGER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BOSCHWITZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DURENBERGER. Mr. President, I want to express my gratitude to the chairmen of the committees involved—Senator ANDREWS of North Dakota, and the ranking member, Senator MELCHER—for expediting passage of this legislation.

It has not been easy legislation. It has not been easy legislation here on the floor.

I appreciate also the indulgence of all of our colleagues. It was not our desire to have the bill voted on at this particular time. At least, speaking on my own behalf, I regret the timing by which this bill was passed.

Also I expressed my particular appreciation to my colleague from Minnesota, for his initiative, and in particular for his patience outside of this Chamber in various ways. He probably has been pressed to the limit by a most difficult undertaking on his behalf. But he has stuck to his guns, so to speak, on a matter that was very difficult to compromise.

I conclude by complimenting him in particular for providing that patient leadership which was so necessary to bring this matter to a successful conclusion.

Mr. BOSCHWITZ. Mr. President, I thank my senior colleague from Minnesota, Senator DURENBERGER. Indeed, it has taken considerable patience. His patience was an integral part in making the whole thing happen. We spent an enormous amount of time on this. I thank him. I also thank my colleague on the other side of the Hill, Congressman STANGELAND, who attended innumerable meetings with us in trying to work out a moderate, fair, and balanced package.

I also want to thank the officials of the State of Minnesota, the Governor, Rudy Perpich, and also Attorney General Humphrey; and, particularly Jim Schoessler, who is on his staff and who put an inordinate amount of time and effort into making and developing this bill, and helping to see that it pass.

I also must say a word about the leader of the White Earth Band of Chippewa Indians, Darrell "Chip" Wadena, who, in the face of considerable adversity stood for his principles, and stood for his people. He is the leader of that band. He has supported this bill. He hung in there in the face of considerable political adversity because he felt it was right for his people. For this he must certainly be complimented.

It is not often that we see that type of genuine leadership, taking such political risks, and going this far in supporting the principles he believes in.

I yield the floor.

Mr. MELCHER. Mr. President, I recognize the diligence, persistence, and the great amount of time that the Senators from Minnesota put into this bill on the White Earth settlement.

I think it is unfortunate that the bill, however, is flawed, and probably needs to be looked at very seriously by the House of Representatives.

It is for that reason that I wanted to make sure that the Senate voted on my amendments, and on final passage so that we do have the record clear on the bill itself.

If there is going to be a White Earth settlement that avoids rather than promotes litigation, I believe the bill will have to be changed. The amendments I offered, while not correcting all of the bills flaws would have made it a better bill. I am not sure how the House wants to treat this bill. But we have a record here in the Senate for review by the House Members who will handle the bill, which I think is important.

I hope the record will be reviewed before the House takes action on this bill. And I understand the hopes and intentions of my friends from Minnesota that the bill be enacted into law this session, or at least be passed by the House so that we can see whether the President will sign it. But I trust the House will want to review the debate here in the Senate, and be advised of what issues were raised in that debate.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. DENTON). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SASSER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MEMORIALIZING CERTAIN MEMBERS OF THE 101ST AIRBORNE DIVISION

Mr. SASSER. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 274) memorializing certain members of the 101st Airborne Division.

The PRESIDING OFFICER. Is the objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. SASSER. Mr. President, I rise today to address my colleagues on behalf of the 250 members of the 101st Airborne Division who lost their lives in one of the most tragic peacetime accidents in our history.

These brave soldiers were returning home to their families and loved ones after serving for several months as members of the Sinai Peacekeeping Force. They had kept the peace in a part of the world that desperately needed their service. And now, during this holiest of times, they were coming home to celebrate the Christmas season with family and friends.

But shortly after takeoff from Gander International Airport, their plane crashed, and in an instant these brave men were taken from us in one of the worst military air disasters in history.

Certainly no one here can fully comprehend the dimensions of this tragedy. One is literally numb at the loss that we have incurred. And I know that every Member of the U.S. Senate, joins with us in offering our heartfelt condolences to the families, friends, and neighbors of these brave soldiers.

The loss that we have experienced in this tragedy will be felt for many years to come, by the mothers and fathers, the wives, the children, and the friends of all who lost their lives yesterday morning. But in our grief, we must never lose sight of the fact that these courageous members of the 101st Airborne Division were working to protect our country and bring about peace in a troubled world. They had a mission to fulfill that took them far away from family and friends. They had a lonely mission that did not re-

ceive a tremendous amount of attention or notice. But they had the most important mission of all—the mission of peace.

As we all celebrate the joy of this holy season, let us all stop and offer our prayers for these men and their loved ones. Let us remember them and be thankful for their service to us.

And let us remember the words of our Lord who said nearly 2,000 years ago, "Blessed are the peacemakers for they shall inherit the Earth."

These men who were with us and now are gone were peacemakers in every sense of the word. We are all the better for their time with us, and may the good Lord receive them and bless them for peace, honor, and bravery they brought to an imperfect world.

Mr. GORE. Mr. President, I join my senior colleague, Senator SASSER, as well as Senator FORD and Senator MCCONNELL, in expressing grief at the events in Newfoundland and expressing condolences to the families of the brave soldiers who died.

It was with shock and sorrow that America received the terrible news of the DC-8 crash in Newfoundland yesterday morning, the worst military air crash in our Nation's history.

Our prayers and our heartfelt condolences go out for the families of these heroes, who were returning from a mission of peace on the world's behalf.

They performed their duties with excellence in every respect. Their dignity and dedication made all America proud. Now their tragic and terrible deaths deeply sadden every American.

The details of the crash are not fully known. The charter flight, arranged by Arrow Airlines of Miami, FL, crashed at 5:15 a.m. e.s.t. upon takeoff from the Gander Airport in Newfoundland. Aboard were 8 crew members and 250 Army persons, all members of the 3d Battalion, 502 Infantry of the 101 Airborne Division. All were stationed at Fort Campbell.

The group had been serving at South Camp in Sinai since last July as part of the multinational force. This group was the third such party to depart for Fort Campbell over the last several weeks. Also participating in this peacekeeping mission were troops from Australia, Colombia, Fiji, France, Italy, the Netherlands, New Zealand, the United Kingdom, and Uruguay.

The flight originated in Cairo and stopped to refuel twice, in Koln, West Germany, and at Gander.

This loss represents the most men the 101st Airborne Division has ever lost in a single day, even in battle.

This division has fought and won more important battles for this country than any other division in our armed services.

No official determination has yet been made as to the cause of the crash. The Canadian Government will be conducting the investigation. The Pentagon, the Federal Aviation Administration, and the National Highway Safety Transportation Administration will be assisting in the investigation. Certainly, authorities in both our countries must make haste to determine what went wrong in the skies over Newfoundland.

This has been a tragic year for aviation—the worst in history. Nearly 2,000 people have died in some 34 accidents.

If it is eventually determined that faulty procedures contributed to this crash, then we in this body must wait no longer before insisting upon dramatic improvements in procedures for ensuring air safety.

A complete list of the casualties has not yet been made public because the next of kin are being located and informed. Many Tennesseans have lost their lives, as have many brave soldiers from States throughout our Nation.

A relief fund has been established by the Tennessean, a newspaper in Nashville, and WSMV, a television station in Nashville, to help the family members of those who perished in this air disaster.

Mr. President, it is difficult to describe in words the shock experienced by Fort Campbell in particular, by Tennessee and Kentucky, and by the entire county. These Americans devoted their lives to the pursuit of peace in our world. In this season of peace, we owe it to their memory to devote ourselves to the pursuit of peace.

Mr. President, I ask unanimous consent to have printed in the RECORD statements made on the editorial pages of the Nashville Banner, the Nashville Tennessean, and the Clarksville Leaf-Chronicle, which have eloquently expressed the sadness we all feel and the tribute we all wish to pay to these heroes who died in Newfoundland.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Nashville Banner, Dec. 13, 1985]

A HEAVY LOSS FOR FORT, MIDSTATE

All Middle Tennesseans will join their neighbors at Fort Campbell in sorrow for the disaster that has struck the Army base.

The crash that killed 258 people in Gander, Newfoundland, Thursday—248 of them Fort Campbell soldiers—is all the more saddening because it came at a festive time of year, when the troops aboard the plane were on their way home for Christmas.

The plane, a DC-8 which belonged to Arrow Air of Miami, Fla., was carrying members of the 101st Airborne Division from the Middle East home to Fort Campbell. The soldiers had been assigned to the international peacekeeping force on Egypt's Siani Peninsula since July. Their tour of duty was over and they were heading home.

One planeload arrived at the base Dec. 5. The plane that crashed was the second of three.

The atmosphere at the fort changed quickly from one of celebration and anticipation to one of shock and sadness. The troops had been expected home at 9 a.m., and would have been greeted by their relatives and the fort's band in a traditional homecoming ceremony.

Many of those waiting did not even know whether their loved ones had been aboard the plane, since the casualty list had not been completed and relatives notified.

The toll from the crash was the worst ever in military aviation. The only disaster even close was the crash in 1975 of a C-5 cargo plane carrying babies and orphans out of South Vietnam. That crash left 155 people dead.

The famed 101st Airborne Division, in all its battles in World War II and the Vietnam War, has had no comparable single-day loss of life.

Base commander Maj. Gen. Burton D. Patrick expressed well the loss to the Army and to the community. "We have suffered a tragic loss that will be everlasting, and our hearts go out to the families and loved ones of these brave soldiers who were on their way home from the peacekeeping mission in the Sinai," he said.

"They did a magnificent job. Their mission was flawless. For six months there, they kept the peace. Then by some quirk of fate, some plane falls from the sky. . . . This is the deepest, most heartfelt tragedy of my time in the Army."

The cause of the crash was not immediately known, and many questions remain to be answered about the accident. The plane was an old one. It was a veteran of service with five airlines. It had 50,000 hours of flying—about 27 million miles.

Arrow Air was the subject of an in-depth government investigation in early 1984 after authorities expressed concern the airline might be expanding too quickly. A company spokesman said the airline had since resolved matters with the Federal Aviation Administration and now is in good standing.

Appropriately, Gov. Lamar Alexander ordered flags outside all state buildings in Tennessee flown at half-staff.

Even before Thursday's crash, 1985 had become commercial aviation's worst year ever, with more than 1,400 people killed in air accidents worldwide. The loss of the Fort Campbell troops brings that reality home to Middle Tennesseans.

[From the Nashville Tennessean, Dec. 13, 1985]

A TRAGIC BLOW TO THIS AREA

The deaths of 248 Fort Campbell soldiers in a plane crash in Newfoundland yesterday is a cause of great sadness in this region. Many of the servicemen were known to people in middle Tennessee and southern Kentucky and many had wives, children, other relatives and friends in the area.

The servicemen were coming home for Christmas from the Sinai Peninsula where they had been serving as part of a multi-national force monitoring the peace treaty between Egypt and Israel.

The crash was a shock to the entire nation. But the grief was especially keen at Fort Campbell where families and friends had gathered yesterday morning to welcome the men home. "The family members had not seen their loved ones for more than five months," said a spokesman at the base. "They were already in the gymnasium ready to greet them when the announcement (of the crash) was made."

The troops were part of an 11-nation force created under the 1979 peace treaty ending hostilities between Egypt and Israel. The Fort Campbell troops were stationed at the southern end of the peninsula.

There are many ways for American servicemen to die in this turbulent era of "local" wars, terrorism and other threats to peace. This nation, in its efforts to keep the peace and prevent the spread of hostile forces, places great burdens on those who volunteer to serve in its armed forces.

These men and women are sent to distant spots on the earth to serve long periods of time in desolate, lonely places, often without due recognition by the public. Although much of their service is tedious and dull it is not trivial and thankless.

The soldiers in the Sinai Peninsula generally found their duty there to be uneventful, and perhaps many Americans had forgotten they were there. But the Fort Campbell men killed in Newfoundland yesterday died in the line of duty just as surely as if they had died on the battlefield, and their families and friends should know that the nation mourns their deaths just as it mourns the loss of all its heroes.

[From the Clarksville Leaf-Chronicle, Dec. 13, 1985]

AIR DISASTER SHOCKS AREA

They were superbly trained; they had performed their mission well; they were coming home; they were almost there—and then they were dead.

Not killed by enemy fire or in the name of freedom, but in an accident—a freak accident that could have happened to anyone, except that it didn't. It happened to 250 Fort Campbell solidiers.

Our soldiers.

Our neighbors, our freinds, our loved ones.

The enormity of the loss is almost too great to contemplate at such close range.

When the men left in July, they knew their mission was dangerous, but the danger was in the Middle East, in the Sinai, where the soldiers were acting as a peace-keeping force. When their assignment ended Wednesday, their long months of battling the desert, its tension and its loneliness, were finally over, and they thought they were safe.

So did their families, who joyfully prepared for their homecoming and the holidays ahead. Thursday was the day they had all been waiting for through 180 days of agonizing separation and worry.

But when the families gathered on post for the expected arrival of their men, they were greeted instead by an announcement of their deaths. The soldiers made it out of Egypt and across the ocean but not out of Newfoundland.

Never has the community felt such a shock—for this is peacetime, and the number killed is so high.

In the next few days, there should be more information about why the plane crashed. Was it ice, or was there some kind of explosion?

Why did our men die?

A technical explanation is only the beginning; a deeper understanding of what happened on Dec. 12, 1985 will take years of searching and prayer to accomplish.

Until then, along with every citizen in Montgomery County, we can only add our sympathy and our grief to those whose husbands, sons, fathers and brothers have died so tragically.

Mr. FORD. Mr. President, Kentuckians are saddened during this Christmas season after the crash yesterday morning which killed 248 persons, most of whom were members of the U.S. Army's 101st Airborne Division.

We in Kentucky have always been proud to provide a home for this division which has given us some of our Nation's most outstanding soldiers. Sadly, through its storied history of combat in World War II and Vietnam, the division never suffered more deaths in a single day than it did when the DC-8 plane crashed just after takeoff from Gander International Airport in Newfoundland.

It was heartbreaking to learn of the young families who, while anxiously awaiting the return of their loved ones for the holidays, were told of the fatal crash. Two hundred people had gathered at Fort Campbell for a welcome home event for the members of the 3d Battalion, 502d Infantry of the 101st Airborne Division, Air Assault, only to have this tragic news dash their hopes and expectations for a happy homecoming and joyous holiday season.

These soldiers were returning from spending 6 months in the Sinai Desert with the United Nations peacekeeping force. They were looking forward to being back in the United States and spending leisure time with their loved ones after a job well done.

Our thoughts and prayers are with the families and friends of the soldiers on the ill-fated plane and with the entire Fort Campbell community. We share their sorrow and grieve with them.

These young men died in service to their country and for the cause of world peace. One cannot ask more than this of a citizen soldier, and we honor their names.

Mr. McCONNELL. Mr. President, as I rise in support of this resolution my heart goes out to the families of the men and women of the 101st Division who died in this tragic plane crash. There is little which I can say to ease the grief and pain they are experiencing.

These families supported the 101st as they served their Nation here and in the Sinai. These families have been proud of the skill, the record of accomplishments and the spirit of the 101st. I spent more time with the Screamin' Eagles this spring and I didn't just see talent and dedication, I experienced it. I was completely swept up by it. It was a pleasure to be a part of a group of men and women who liked what they were doing and did it exceptionally well. This is the tradition of the 101st.

This tradition has been dependent on the care, the love, and support of the families of those who serve. The backbone of the 101st and this country are those men, those women, those children who have encouraged, humored, advised, stood by and stood fast with their servicemen. As a father, I know just how important a child's smile or story can be. I know how flagging morale can be boosted by that spark. I know the difference family can make. Just as we pay homage today to the valor, dedication, and capabilities of the men who served, so too, should we pay tribute to those who stood by them.

We are all familiar with the record of the 101st. We know how ably they served in the Sinai fulfilling our Nation's responsibility and commitment to peace in the Middle East. They are soldiers we can be proud of and deeply mourn their loss. But the tradition continues. The 101st will go on to serve the United States with distinction and honor. We can be sure of that. I hope the families will look to the example of the 101st and find the courage and faith to continue to believe they served with dignity, honor, and for cause. It is the last which is the hardest for all of us to accept in this time of loss. The cause was peace, the price was high, but the tradition they exemplified will be with us always.

Mr. SASSER. Mr. President, I ask unanimous consent that the 100 Members of the Senate be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SASSER. Mr. President, I move adoption of the resolution.

The PRESIDING OFFICER. If there be no further debate, the question is on agreeing to the resolution.

The resolution (S. Res. 274) was unanimously agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 274

Whereas the Sinai Peacekeeping Force has been essential to maintaining world peace since the signing of the Camp David Accord,

Whereas the 101st Airborne Division Screamin' Eagles is one of our nation's finest and best trained units and has a distinguished history of sacrifice and commitment to the nation in the cause of peace,

Whereas, members of the 3rd Battalion 502nd Infantry of the 101st Airborne Division had just completed a six-month assignment as members of the multinational peacekeeping force in the Sinai,

Whereas 250 members of the 3rd Battalion 502 Infantry of the 101st Airborne, on their journey home from a mission of peace died in a plane crash in Gander, New Foundland, Canada,

Whereas this accident involved more casualities than the 101st Airborne Division has suffered in any single day in peacetime or wartime.

Whereas in this season of Christmas the nation owes a debt of gratitude to these soldiers who gave their lives selflessly in maintaining our country's national security and goal of world peace,

Be it resolved by the United States Senate that it extends its sincere condolences to

members of all the families of the soldiers of the 101st Airborne division who died in service to their country.

Mr. SASSER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LEVIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. Mr. President, I ask unanimous consent that I be allowed to proceed as if in morning business for 2 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

JAPAN THREATENS TO MAKE TRADE PROBLEMS WORSE

Mr. LEVIN. Mr. President, the Japanese Government is reported today to have decided to allow Japanese automobile manufacturers to ship an unlimited number of cars to the United States market next year, ending 5 years of so-called voluntary restraint. This decision, if the reports prove to be accurate, would follow a year of explosive growth in Japanese exports to the United States, coupled with foot-dragging in the negotiations to open up Japanese markets to our goods. Japan's automobile exports to the United States have increased by nearly 25 percent this year over last year, which means more than $4 billion worth of additional cars and trucks made in Japan have entered our markets in 1985 than in 1984.

Japan cannot be so naive as to believe that the United States will continue to be taken advantage of like this. Trade is supposed to be a two-way street, but Japan is overloading its side of the street and they have "One Way" signs on the other. Prime Minister Nakasone of Japan has declared his determination to lower the United States-Japan trade deficit and exhorted his countrymen to "Buy American." But if this decision on unrestrained auto exports is an indication of his plan, I shudder to see the rest of it.

Mr. President, we have, for too long sat by and watched our trade deficit with Japan escalate. Congress must enact strong legislation to reduce our trade deficit. It has long been obvious Japan has no intention of doing so.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. WARNER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RESIGNATION OF ROBERT McFARLANE

Mr. WARNER. Mr. President, it is a privilege for me to appear on the floor of the Senate this afternoon with my distinguished colleague, the Senator from Georgia [Mr. NUNN]. We serve together on the Senate Armed Services Committee, where he is the ranking minority member. It has been a privilege to serve these past 7 years together.

This afternoon, we join to express our views with respect to the very significant contributions to our Nation's security made by Robert McFarlane while serving as the President's National Security Adviser.

Mr. McFarlane brought to this position a long career of professional achievements which uniquely qualified him to protect the interests of the United States and to make his contribution toward a more peaceful world.

As a principal adviser to the President on national security matters, he provided reasoned and balanced advice on many crucial issues involving war and peace, as well as long-term national goals and interests, that shape America's relations with other nations.

Bud McFarlane's steady hand during crisis situations, his mastery of complex arms control issues, and his perseverance in convincing the President to undertake a series of summit meetings with the Soviet General Secretary highlight the proud legacy of service he leaves behind.

The Washington Post, in a December 5 editorial entitled "The McFarlane Loss," offers an insightful look into the service of Mr. McFarlane.

I would like to quote a portion of this unusual and highly commendatory piece and I ask unanimous consent that the article be printed in its entirety following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. WARNER. Mr. President, I quote: "He has been that rarest of public officials, a loyal, honorable, and unassuming man who was also intelligent and tough."

That is a characterization that would make any man proud.

Bud McFarlane deserves it.

I would add that his low-key nature, his willingness to accept responsibility and his keen understanding of the value of letting other people take credit for the many successes he and his staff achieved are key reasons for the outstanding reputation he enjoys.

I worked very closely with Bud McFarlane when I was designated by Senators Tower and STENNIS to investigate the Iran rescue operation for the Senate Armed Services Committee. His work on that report clearly reflects his understanding of the men and women of our Armed Forces from private to four star rank.

His unwavering loyalty to the President, his ability to mediate egos and yet keep his own ego intact, and the manner in which he never let his many successes go to his head mark him as one of a kind.

His lengthy, subdued, and sometimes a little boring after-dinner speeches also marked him as one of a kind, but he went for substance not glitter.

Thomas Jefferson, that most distinguished statesman from Virginia, during times of peril past, once offered the hope that "God grant that men of principle shall be our principal men."

I offer my thanks and those of my distinguished colleagues to one of this country's "principal" men for the leadership and selfless service he has provided this great country of ours.

There is no greater tribute we can offer to Bud McFarlane than the thanks of a grateful nation.

We are also grateful for the training he provided his successor, Admiral Poindexter. I know the Admiral well from the early 1970's, where we served together in the Navy Secretariat, and I look forward to the solid leadership he will provide as the President's newly appointed National Security Adviser.

With those thanks, I know that all join me in wishing Bud, his charming wife, Jonda, and his family, who steadfastly stood beside him and accepted the hardships thrust on families from a total commitment to public service, Godspeed in all they undertake.

I yield to the Senator from Georgia.

EXHIBIT 1

[From the Washington Post, Dec. 5, 1985]

THE McFARLANE LOSS

It is too late to save the president's resigning national security adviser, Robert C. McFarlane, from what befell him at the White House. But there may still be time to save him now: transformation by administration critics on the left into someone he never was—a kind of doomed and valiant closet dove shoved out by the forces of reaction and darkness. By about Friday, we should guess, the aforementioned dark forces will of course be striking back, countering that Mr. McFarlane, mourned by so many of the administration's ideological foes, can hardly have been the right man for the job. Et cetera.

Let us try a little pre-emptive strike here. Mr. McFarlane is no dove—doomed, valiant, closet or otherwise. He is a very conservative and sober-minded military officer turned civilian, who has become a specialist in national security policy. The job he had has always been a delicate one to fill and has regularly been redefined by those who held it. Some were more and some were less assertive, intrusive, imaginative, self-starting and egomaniacal. McGeorge Bundy, Walt Rostow, Henry Kissinger, Brent Scowcroft, Zbigniew Brzezinski, Richard Allen, William Clark—you don't exactly find a pattern there.

Some of these men were more illustrious than Mr. McFarlane, but we can't think of any who was more helpful to the president he served. This, we suspect, will be noted as time goes on. By the time Mr. McFarlane took the White House job, a major task awaited: to find a way to turn the fruits of Mr. Reagan's military buildup into actual policy options. He gave over a great deal of time and thought to this. Mr. McFarlane also had some successes as a manager and arbiter of departmental clashes. He has been the kind of public servant who is not fully appreciated until he is no longer around to do the countless quiet, essential tasks that an employer tends to take for granted. He has been that rarest of public officials, a loyal, honorable and unassuming man who was also intelligent and tough.

A near-frantic effort has been mounted by persons close to White House chief of staff Donald Regan to counter the stories that Mr. Regan's manipulating and muscling had a part in Mr. McFarlane's decision to leave. And yesterday both Mr. McFarlane and the president dismissed the reports as nonsense. We wish they had been nonsense. The muscling and manipulating were particularly egregious, and they did have an effect.

Neither Mr. McFarlane's job nor that of Mr. Regan is subject to Senate confirmation, and a president has the widest possible discretion in choosing the persons he wants for them. Chemistry, as it is called, work habits, style and personal quirk all play a part, and for all we know Mr. Regan may suit Mr. Reagan's needs just fine. But from the outside it sure doesn't look that way. His ascendancy has been one grating episode after another—George Bush, Margaret Heckler, Robert McFarlane—just as his Cabinet years were marked by open combat with others high up in the Reagan government. Mr. Regan is a very ambitious man. He is said to like to be seen in the right places at the right time. The stories are legion. At Geneva he had himself photographed draped over the back of the couch on which Ronald Reagan and Mikhail Gorbachev were sitting. Mr. McFarlane is just the opposite, and you would think that the self-effacing man would have presented no particular challenge or threat to the other. But it seems not to have been regarded by Mr. Regan that way.

Mr. McFarlane's successor is to be his deputy, Vice Adm. John Poindexter. Good luck. That the choice evidently had to be agreeable to Mr. Regan as well as to the president puts a couple of extra bricks in the new fellow's knapsack. But Adm. Poindexter must know, from his time in the White House, how great is the president's need for someone capable of performing the crucial balance-wheel function defined and assumed by Mr. McFarlane.

At the summit, the president put himself in a way to move toward major policy decisions. But he has not yet made those decisions. In the absence of a McFarlane, the internal chemistry of the Reagan administration's policy process will be different. Let us hope it works.

Mr. NUNN. Mr. President, I should like to associate myself with the very fine remarks of the Senator from Virginia, who has known Mr. McFarlane for a number of years. The Senator from Virginia has expressed very eloquently the views of all of us who know Robert McFarlane and know him to be a very fine and dedicated American public servant.

Mr. President, I want to pay tribute to Robert C. McFarlane on the occasion of his resignation as the Assistant to the President for National Security Affairs. He has served as President Reagan's National Security Adviser since October of 1983 and has served the President and the country in an outstanding fashion.

Bud McFarlane first concluded a distinguished career as a Marine Corps officer and retired as a lieutenant colonel. He is a graduate of the Naval Academy and his tours of duty included Japan, Korea, and Vietnam.

In 1971, Bud joined the Nixon administration as a White House Fellow and in 1973 became military assistant to Henry Kissinger at the National Security Council as well as continuing State Department duties. He remained during the Ford administration.

In 1979, he left the Marine Corps and joined the Senate Armed Services Committee as a professional staff member. That was the first time I had had a chance to meet and work with Bud McFarlane directly.

He worked closely with the committee members and shared his vast knowledge of national security issues.

In 1981, he went to the State Department to serve as a counselor and later became Deputy Assistant to the President for National Security Affairs. He also served as a special envoy to the Middle East before being elevated by President Reagan to the position of Assistant to the President for National Security Affairs.

I have always believed that the first prerequisite to a strong national defense is the establishment of a bipartisan consensus in support of the key elements of our national security policy. Bud McFarlane has a keen recognition of this. It has been the hallmark of Bud's approach ever since I first met him when he joined the Armed Services Committee staff in 1979.

Over the past 2 years, Bud McFarlane repeatedly demonstrated a great capacity for forging a partnership between the President and a bipartisan majority in the Congress on major national security issues. His leadership helped reach understandings on such issues as MX, the strategic builddown concept, humanitarian aid to resistance forces in Nicaragua, the establishment of risk reduction centers, in which Senator WARNER and I have been involved over the last 3 years, and U.S. policy with respect to existing strategic arms control agreements.

Bud McFarlane's success in concluding these agreements underscored his appreciation for the constitutional role of the Congress in this area. But it is also reflected in the extraordinary level of trust and confidence that he was able to establish with congressional leaders.

I might add that Bud McFarlane always did his homework well and he knew the issues inside and out. He was an individual who knew the substance of complex issues in great detail, and I found this to be of tremendous help in all of my conversations and dealings with him.

Mr. President, as the Senator from Virginia has said so well, we owe a great debt of gratitude to Robert McFarlane for the service he has rendered this country for almost 30 years in uniform, in the Senate, and in the White House. I wish him every success in whatever enterprise or endeavor to which he turns his attention.

Mr. WARNER. Mr. President, I address to my colleague the observation that as we and other Members of the Senate pursue our tasks we frequently call on former members of the administration, the bipartisans, to come forward and give us advice.

The distinguished Senator from Georgia mentioned the nuclear risk reduction center concept on which I have been privileged to work with him these many years, and indeed we formed a group of advisers in that context to assist us in our work. This has made major contributions to the success of this effort to date.

I was thinking this week when we were scheduled to have a hearing of the Armed Services Committee at which time Dr. Brzezinski, a former National Security Adviser, was to have appeared as a witness.

The Senator will also recall that when we were preparing to go to the Soviet Union in September of this year we talked extensively with Dr. Kissinger.

I bring forth this history only to state that it would be my expectation that Mr. McFarlane will be invited in a formal and informal sense by Members of the Senate on a number of occasions to give his advice on subjects in the future.

Mr. NUNN. Mr. President, I certainly share that observation and I hope that we are able to take advantage of Bud McFarlane's considerable expertise and his reputation for candor and integrity.

I believe that if we do reschedule the hearing with Dr. Brzezinski, which had to be postponed on the defense reorganization, it would be a great help to have Bud McFarlane to come some time next year to talk about that subject, perhaps informally and perhaps in a hearing, and on many other subjects he would possibly be a great benefit to our committee.

The Senator from Virginia has made a very good suggestion in which I wholly concur.

Mr. WARNER. I thank the Senator from Georgia.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. RIEGLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

JAPAN INTENDS TO REMOVE VOLUNTARY AUTO IMPORT LIMITATION

Mr. RIEGLE. Mr. President, I take the floor this afternoon to alert my colleagues to a very disturbing piece of news, and that is an announcement coming from Japan today and the newspapers in that country indicating that in the coming year, 1986, they intend to remove any further voluntary import limitation on the number of Japanese-built cars coming into the United States.

I believe this is a very serious error in judgment on the part of the decisionmakers in Japan. And this is an action I think that cannot be tolerated by this country.

We have a trade deficit with Japan this year of roughly $50 billion. That means that $50 billion in American wealth is going out of this country to Japan and with it hundreds of thousands, indeed, millions of American jobs. The Japanese automobile penetration in the United States market is now about 23 percent and rising. That means that 23 percent of all the cars sold in the United States are Japanese automobiles.

If the voluntary import limitations are taken off, using various pricing advantages and currency valuation advantages and other trade gimmicks employed by the Japanese, it is estimated they could easily drive their market share in the United States up to 30 percent and higher over a relatively short period of time, perhaps 2 years or so, to a penetration level of as much as 40 percent.

If that is allowed to happen, we will probably lose another million American jobs—and I am talking about good jobs; I am talking about jobs in the industrial base, middle-class jobs, jobs involved with high-value-added work that are critical to maintaining American leadership in manufacturing. We need to have available those manufacturing resources in the event there is a need for a full defense mobilization, as we found in earlier wartime periods.

We need to have that manufacturing base in place and it needs to be modern, it needs to be state of the art. That cannot happen if we continue to see an increase in the trade invasion from countries like Japan.

Japan is not a fair trading partner. They are an unfair trading partner. That is the reason today why our trade deficit with that nation, the highest we have with any nation, is at the $50 billion a year level. They systematically block American products out of the Japanese market in instance after instance after instance—agricultural products, manufacturing products, high-technology products.

We cannot sell our products in Japan because they will not let us do so. And yet they take full advantage of the open U.S. market and they use a variety of predatory trading practices. One of the worst we have seen recently is with respect to semiconductor sales. They have come in, in a high-technology area, with below-cost pricing, which is a violation of the trade laws, in order to kill off the American companies and to achieve a dominant market position. That is not what friendly nations do. That is what unfriendly nations do. It is outrageous that it is happening. It is outrageous that it continues.

There is absolutely no justification for any increase in the percentage of Japanese cars coming into the United States, particularly in light of the sorry record of the trading rules and activities on the part of Japan, who, in so many ways, are unfair in their dealings with us in the trading system.

It is estimated that we have already lost at least 1 million jobs out of the manufacturing automotive sector because of our trade deficit with Japan in cars and trucks. They will ship in this year about 2.3 million Japanese cars and take about approximately 2,000 American cars. And we are going to lose about $25 billion in the process.

That is $25 billion of scarce American capital going overseas, and of course the loss of jobs that it represents. So we cannot afford, and this Nation cannot afford to see that penetration level go higher. It is absolutely irresponsible, and selfish in the extreme for Japan to even contemplate increasing this trade surplus with the United States and dumping more Japanese products in this country. It is unthinkable.

When we provide as we do such a large share of the free world defense in costs—and most particularly for Japan which spends a pittance on national defense—we pay for their defense, and at the same time we provide the defense umbrella for Japan and other free world nations. They turn around and damage consciously the economy of the United States.

We became a debtor nation just 4 months ago for the first time since 1914. At the rate we are going in another 10 months we will be the leading debtor nation in the world. We will surpass Brazil, Mexico, and other nations standing there with a tin cup. We are going to be out borrowing and begging international money just as they have had to do, and are doing today. It has been estimated by the New York Federal Reserve Board that by 1990 we will owe the rest of the world, because of these trade deficits, a figure somewhere between $500 billion and $1 trillion—that we will net debtors to that extent. When that happens, we have to continue to borrow foreign money. What interest rates will we have to pay? How much will the American standard of living have to come down to accommodate those foreign lenders' willingness to extend that kind of credit to us? They will have us right by the throat. It is outrageous if they get away with this.

Frankly, the President and this administration has done virtually nothing to step up to this problem. They do not even seem to understand that it is happening. They are late, they are weak, and they have failed to respond time after time after time. That is why the trade deficit now is at $150 billion and why we have now slipped into this disgrace of having become a debtor Nation.

We have no program to restore our competitiveness, and no systematic broad-gauged national level program to do it. We had a national commission established a year ago on U.S. competitiveness named by the Reagan administration with 30 leading people across this country named to that Presidential commission.

After nearly a year's work, they reported back and said our country was in deep trouble in the trade area. They recommended a whole series of initiatives that needed to be taken to make us more competitive, more productive, to lower the cost of capital, and to create a new trade department in the Cabinet. It was such a strong set of recommendations, and they were unanimous—even the President's science adviser was on the commission.

And yet the Reagan administration has done absolutely nothing to implement the findings of that Presidential commission—yes, their own Presidential commission. They have just looked the other way. They have put the report in a file drawer, and America continues to slide further and further behind.

Now we see the arrogance of Japan today, saying they are going to drive their level of import penetration even higher in the area of cars and trucks even though they keep our products out of Japan, and they have a $50 billion trade surplus with the United States this year. It is just outrageous. It is time for action. It is time for leadership—not a lot of talk, not a lot of diversion action but real action that deals directly with this problem.

So I have sent a letter to the President today asking him to give the kind of strong leadership in dealing with this problem that is required, and not to wait any longer—not to let us slip deeper into the hole in terms of our international standing as a debtor

nation but to tell the Japanese that they already have a large enough market share in this country.

If they want to take action, the action they ought to take is to open their markets to U.S. goods—open their markets to U.S. computers and to U.S. products of all kinds, U.S. cars, and U.S. agricultural products. But they have been unwilling to do that. They want a one-way street in the trade area, not a two-way street. That is not the action of a friendly nation.

I am here to say today that this is one Senator that will not stand by and watch this continue. If this persists, if Japan holds to this course of increasing the trade surplus, of damaging the industrial base in this country, of blocking our products out of their market at the same time they come in with predatory practices to swamp our market with their surplus production, then they will have made some adversaries for themselves in this country that will fight back, and fight back with every means at our command.

It is unreasonable, it is unfair, and it is an act of national arrogance. It is a form of piracy. It is a form of trade piracy to do what they are doing—to operate on a double standard. Every time we engage them in this discussion, they just give us the runaround. We cannot get straight answers. They promise action but it is action off in the future. They say they will open up this market. Then they fail to do it. They say they will provide relief, and then it is a pittance. Those are not acceptable actions. This news coming out of Japan today is really an outrageous declaration. I think the Japanese intend to do more damage to the American economy.

Free trade ought to mean fair trade. It ought to mean an equal kind of relationship. There are many ways that Japan can close its trade surplus they have with us instead of driving it higher. Bring it down. Bring it down to a balance. Come in here and buy American products, open up their markets to our goods, and not flood their surplus production into the United States. That is what a good friend would do. That is what a fair trading partner would do. But that is not the behavior we see.

I say to the others in this country that continue to pound on the domestic auto industry, or other industries, such as the semiconductor industry in this country, that we had better start helping American industry because they are facing not just competition from other companies that happen to be international companies. They are facing a concerted strategy by national governments—national governments working in concert with the companies of these countries—to come in here and devastate the industrial base of the United States. The numbers are there to show it.

We now have millions of workers that have lost their jobs in this country, and many more that are in jeopardy if these kinds of additional predatory steps are going to be taken by nations like Japan.

So it is not right. I hope that the officials in Japan will pay attention to the feeling here in the United States about it. It is unfair on its face. It is unacceptable on its face. To have the gall, as is the case today with these announcements out of Japan—that they are prepared to make this problem even worse—is not something that I think the United States can accept or will accept.

Mr. President, I yield the floor.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. QUAYLE). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

PRESIDENTIAL APPROVAL

A message from the President of the United States announced that on December 11, 1985, he approved and signed the following joint resolution:

S.J. Res. 206. Joint resolution to authorize and request the President to designate the month of December 1985 as "Made in America Month."

MESSAGE FROM THE HOUSE RECEIVED DURING THE RECESS

ENROLLED JOINT RESOLUTION SIGNED

Under the authority of the order of the Senate of January 3, 1985, the Secretary of the Senate, on December 12, 1985, during the recess of the Senate, received a message from the House of Representatives announcing that the Speaker had signed the following enrolled joint resolution:

H.J. Res. 476. Joint resolution making further continuing appropriations for fiscal year 1986.

Under the authority of the order of the Senate of January 3, 1985, the enrolled joint resolution was signed on December 12, 1985, during the recess of the Senate, by the President pro tempore [Mr. THURMOND].

MESSAGES FROM THE HOUSE

ENROLLED BILLS SIGNED

At 3:27 p.m., a message from the House of Representatives, delivered by Mr. Solomon, one of its clerks, announced that the Speaker has signed the following enrolled bills:

H.R. 664. An act to amend the Panama Canal Act of 1979 with respect to the payment of interest on the investment of the United States;

H.R. 729. An act to amend the Panama Canal Act of 1979 in order that claims for vessels damaged outside-the-locks may be resolved in the same manner as those vessels damaged inside the locks, and for other purposes;

H.R. 1534. An act to convert the temporary authority to allow Federal employees to work on a flexible or compressed schedule under title 5, United States Code, into permanent authority;

H.R. 1627. An act to designate certain national forest system lands in the State of Kentucky for inclusion in the National Wilderness Preservation System, to release other forest lands for multiple use management, and for other purposes;

H.R. 2976. An act to direct the Secretary of Agriculture to release the condition requiring that a parcel of land conveyed to New York State be used for public purposes and to convey U.S. mineral interests in the parcel to New York State;

H.R. 3085. An act to clear title to certain lands along the California-Nevada boundary;

H.R. 3735. An act to designate the pedestrian walkway crossing the Potomac River at Harpers Ferry National Historic Park as the "Goodloe E. Byron Memorial Pedestrian Walkway";

H.R. 3918. An act to extend until December 18, 1985, the application of certain tobacco excise taxes, trade adjustment assistance, certain medicare reimbursement provisions, and borrowing authority under the railroad unemployment insurance program; and

H.R. 3919. An act to extend temporarily the dairy price support program and certain food stamp program provisions, and for other purposes.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, December 13, 1985, she had presented to the President of the United States the following enrolled bill:

S. 947. An act to amend the Foreign Assistance Act of 1961 with respect to the activities of the Overseas Private Investment Corporation.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. STAFFORD, from the Committee on Environment and Public Works, without amendment:

S. 1740. A bill to designate Bloomington Lake located on the North Branch of the Potomac River, near Bloomington, MD, and Keyser, WV, as the "Jennings Randolph Lake" (Rept. No. 99-221).

By Mr. HATFIELD (for Mr. MATHIAS), from the Committee on Rules and Administration, with amendments:

S. Res. 204. An original resolution authorizing supplemental expenditures by the Select Committee on Indian Affairs (Rept. No. 99-222).

By Mr. THURMOND, from the Committee on the Judiciary, with an amendment:

H.R. 3511. A bill to amend title 18, United States Code, with respect to certain bribery and related offenses.

By Mr. D'AMATO (for Mr. GARN), from the Committee on Banking, Housing, and Urban Affairs, with an amendment in the nature of a substitute:

S. 918. A bill to amend the Securities Exchange Act of 1934 to authorize the Securities and Exchange Commission to subject banks, associations, and other entities that exercise fiduciary powers, to the same regulations as brokers-dealers, pursuant to section 14(b) of the Securities Exchange Act of 1934.

Mr. THURMOND. Mr. President, I am reporting H.R. 3511, a bill to amend the current bank bribery statue of more precisely define the prohibited conduct. The bill was ordered to be reported favorably with one amendment by the Committee on the Judiciary on December 12, 1985. Due to the fact that the end of the first session of this Congress is imminent and we are most eager to pass this bill prior to adjournment, we have decided not to file a report. The committee does, however, agree with the recommendation and the substantive comments in the report submitted by the Committee on the Judiciary of the House of Representatives.

The efforts of the 98th Congress to revise the bank bribery provisions in the Comprehensive Crime Control Act resulted in far too broad an offense. Because the offense does not require a corrupt or bad purpose, it reaches all kinds of otherwise legitimate and acceptable conduct. Thus, a person may commit a Federal crime for engaging in activities recognized by all to be normal, legitimate business conduct. This bill appropriately cures this and other defects in the current law.

The amendment added by the Judiciary Committee was recommended by the Department of Justice. The amendment corrects an enigma in the bill as passed by the House. In order for the receipt of a bribe or gratuity by a bank official to fall within the prohibitions of subsection (A)(2) of new section 215, according to the House version, the giving of the bribe or gratuity must be prohibited by subsection (A)(1) which proscribes "corruptly" giving a "thing or value" to a bank official. Thus, the criminality of the receipt of a "thing of value" would depend on the intent of both the person who gives it and the person who receives it. In practice, this element of derivative intent would require the Government to prove beyond a reasonable doubt in the trial of a bank official the corrupt intent of the person giving the "thing of value." If proof is sufficient to show corrupt intent on the part of the recipient, the intent of the donor should be irrelevant as a matter of law. This problem has been cured by striking the words in subsection (A)(2) "if the giving, offering or promising of that thing of value would be or is in violation of paragraph (1)" and substituting the language of subsection (A)(1), which would, in its current form, be "intending to be influenced or rewarded in connection with any business or transaction of such institution."

H.R. 3511 has passed the House of Representatives and has been reported by the Committee on the Judiciary without objection. I urge my colleagues to act swiftly on passing this noncontroversial legislation.

Mr. DECONCINI. Mr. President, I am pleased to join with Chairman THURMOND in reporting H.R. 3511 to the Senate from the Judiciary Committee. This legislation would clarify certain ambiguities in the Comprehensive Crime Control Act of 1984 related to the crime of bank bribery.

On May 22, 1985, I introduced S. 1214 to address the problem presented by the 1984 act. S. 1214 was identical to H.R. 2617, introduced in the House by Representatives GEKAS, GLICKMAN, and MCCOLLUM. This House bill became H.R. 3511 when it passed the House Judciary Committee. S. 1214 and H.R. 3511 take the same approach to the problem and I wholeheartedly recommend that the Senate take action to quickly approve H.R. 3511.

Section 1107 of the 1984 Comprehensive Crime Control Act amended section 215 of title 18 to strengthen the Federal prohibition against offering or receiving bribes in connection with the business of a bank or other financial institution. I believe, however, that the language of the section encompasses a wide range of accepted business practices that were not the intended target of the statute.

Many routine banking activities are now potential violations under the law since the statute covers all situations where financial institution employees, directly or indirectly, seek or accept "anything of value" from anyone in "connection with any transaction or business of such financial institution." The statute fails to draw necessary distinctions between recognized business conduct and conduct that may constitute a danger to customers or investors. The receipt of advertising and promotional items of nominal value and the testimonial dinner recognizing the community services of a financial institution executive are just two examples of activities that could be construed to be covered by this statute.

Unless modified, this statute threatens to chill legitimate interaction between financial institution employees, customers, and professionals who serve these institutions. The impact of this unnecessarily broad language could impair the business operations of financial institutions resulting in a detriment to their customers, stockholders, and the general public. The sweeping and overbroad terms of the statute equally condemn those involved in legitimate business activity and those intent upon obtaining an illegal gain from the business of banking and suggest no ground for distinguishing between them. No limiting purpose is set forth in the legislative history. Finally, the statue enacted last year contains no *mens rea* or knowiedge requirement.

H.R. 3511 amends title 18 to make a distinction between the conduct Congress intended to proscribe and legitimate business activities. I support any effort to penalize those who would subvert the fiduciary relationship that America's financial institutions have with its customers and the public at large. I believe that we can accomplish this purpose without calling into question legitimate conduct. The proposed language would modify the section to apply only to conduct undertaken with an "intent" to corruptly influence any transaction of a financial institution. These changes will insure that the common-law, State, and Federal statutory definitions of bribery as the "corrupt intent to influence" remain unchanged.

Mr. D'AMATO. Mr. President, I urge my colleagues to support S. 918, the Shareholder Communications Act of 1984 because it will improve the access of certain shareholders to proxy materials. S. 918, in its present form, varies from the legislation that I introduced earlier this year. The legislation was amended in the Senate Banking Committee in response to the concerns of the banking industry during our consideration of this legislation. These institutions were concerned that S. 918, as originally introduced, could have breached the confidential relationship between a bank and certain of its clients. As explained in greater detail below, S. 918 as amended by the Senate Banking Committee, avoids the breach of any existing confidential relationship between a bank and its present clients by recognizing the important distinctions between stock held by broker-dealers for their customers and stock held by a bank trust departments as a fiduciary.

51-059 O-87-19 (Pt. 26)

The Shareholder Communications Act is designed to extend the authority of the Securities and Exchange Commission [SEC] to improve the proxy dissemination process by enabling the SEC to promulgate rules and regulations relating to the dissemination of these materials to banks, associations and other entities that exercise fiduciary powers and hold stock on behalf of beneficial owner.

Section 14(b) of the Exchange Act currently grants the SEC the authority to regulate the activities of broker-dealers regarding proxy dissemination and voting with respect to shares held by them on behalf of beneficial owners. Under this authority, the Commission has adopted rule 14b-1, which requires broker-dealers to disseminate proxy and other material to beneficial owners. (See, Release No. 34-13719 (July 5, 1977) (42 FR 35953)). The Commission amended that rule to improve the proxy dissemination process with respect to the activities of broker-dealers and to add a provision which will make it easier for issuers to communicate directly with certain beneficial owners. (See, Release No. 34-20021 (July 28, 1983) (48 FR 35082)).

However, neither the SEC, nor bank regulators have authority to regulate the proxy processing activities of banks, associations and other entities that exercise fiduciary powers and hold stock on behalf of beneficial owners. The SEC is therefore unable to extend rule 14b-1 or similar provisions to them. The inability to regulate banks and other entities in this regard creates a gap which denies beneficial owners of securities held by banks and other entities the benefits of the rules of the SEC that require timely delivery of information. The absence of such authority is especially significant with respect to banks, because banks hold a majority of the securities registered in nominee name. To remedy this deficiency, the Commission's Advisory Committee on Shareholder Communications, composed of private sector participants, including representatives of issuers, banks, broker-dealers and others, recommended that legislation be enacted to cover banks. (See, "Improving Communications Between Issuers and Beneficial Owners of Nominee Held Securities," report of the Advisory Committee on Shareholder Communications, June 1982).

Section 2 of the Shareholder Communications Act amends section 14(b) of the Exchange Act to make that section applicable to banks, associations, and any other entities that exercise fiduciary powers. This would give the SEC the authority to adopt rules and regulations that would require bank nominees, association nominees, and other nominees that exercise fiduciary powers, to perform certain tasks with respect to proxy voting and distribution of proxies in respect of shares held in nominee name but where voting rights have been reserved. This authority would be delayed for 1 year, under section 3 of the bill to accord the SEC an adequate opportunity to promulgate thoughtful and effective rules and regulations.

Section 2 extends the SEC's authority to the trust and custodial activities of "banks," as that term is defined in section 3(a)(6) of the Exchange Act, and to other entities, such as savings and loan associations and savings banks. Among the entities covered by this provision are associations, as defined in 12 U.S.C. section 1462(d) (1982). Such associations are Federal savings and loan associations or savings banks chartered by the Federal Home Loan Bank Board [FHLBB] under 12 U.S.C. section 1464(n) (1982). In addition, State savings and loan associations and savings banks and other entities who are or become authorized to exercise fiduciary powers would come within the ambit of the legislation. Historically, these other entities did not have fiduciary powers and, thus, did not hold securities in trust or custodian accounts on behalf of their customers. In recent years, however, a growing number of these entities, both at the State and Federal level, have been granted fiduciary powers and now are maintaining trust and custodian accounts. These activities are indistinguishable from the trust activities of banks and other entities that engage in similar fiduciary activities, and, thus, should be subject to the same regulations as banks with respect to those activities.

Section 2 recognizes that banks, and other associations and entities, as well as broker-dealers, hold securities that are beneficially owned by others. The legislation is intended to assure that shareholders who have retained the right to vote stock held in another name have the opportunity to vote that stock in a timely manner irrespective of the nature of the institution in whose name the stock is registered.

Consistent with this section, the SEC has indicated that it expects to extend rule 14b-1 to banks and, as it becomes appropriate, to other entities. Extension of similar requirements to banks and other entities will ensure that beneficial owners of securities held by them will receive the same protection as beneficial owners of securities held by broker-dealers.

Section 2 enables the SEC more effectively to carry out its mandate to protect shareholders. It is not intended to alter the overall regulatory scheme for banks and other institutions affected by this provision. The SEC is not intended to serve as a bank inspector or investigator, nor does this legislation provide that authority. However, when a securities violation occurs under this section, the SEC shall use its existing enforcement authority to obtain compliance.

THE COMMITTEE AMENDMENT

The Banking Committee amended S. 918 by adding section 2(b). Section 2(b) was added to ensure that the SEC, in carrying out its responsibilities under this provision, recognizes the important distinctions between stock held by broker-dealers for their customers and stock held by a bank trust department as fiduciary. The relationship between a trustee and a beneficiary is unique, and the courts have consistently held trustees to high standards.

During the Banking Committee's consideration of this legislation, issues were raised by banking institutions with regard to the disclosure of the identity of beneficial owners of securities held in nominee's name. The banking institutions contended that such disclosures would violate an institution's fiduciary duty to protect the privacy of a customer. In recognition of the unique relationships between trustees and beneficiaries and the duties owed by trustees to beneficiaries, the regulations to be issued by the SEC under section 2(b) shall be applicable only where someone other than the bank trustee has voting authority, and any disclosure required by the regulations shall be applicable only to those who have voting authority. The legislation does not require trustees to disclose trust beneficiaries or other bank customers who do not have the power to vote.

Concerns about violations of a shareholder's privacy were particularly relevant to the standard of disclosure that the SEC could adopt. The SEC's rules with respect to broker-dealers require disclosure of the name, address and number of shares registered in the name of the brokerage firm unless the shareholder objects. Representatives of the banking industry felt that disclosing the same information—required from broker-dealers by the SEC's rules—with regard to their existing accounts without the customer's affirmative consent would violate the customer's privacy and potentially expose the banks to liability. They argued that they should be required to supply the names and other customer information only if the customer affirmatively consented. At the same time, banking industry representatives contended that these same considerations would not apply with new customers, who could be advised upon the opening of an account that their names would be supplied to issuers unless they objected.

Therefore, section 2(b) was adopted to accommodate these concerns. The SEC, in exercising its rulemaking authority under section 2(b) shall not require the disclosure of names of bene-

ficial owners of securities in an account held by the bank on the date of enactment unless the beneficial owner consents to the disclosure. By contrast, the SEC could require that the names of beneficial owners of securities held in accounts with the bank after the date of enactment must be supplied to issuers unless the customer objected to the disclosure.

Because of the differences between brokerage accounts and fiduciary accounts and the numerous State statutes specifically relating to the confidentiality of bank records, an "affirmative consent" requirement, may be the more appropriate standard for rules promulgated pursuant to this section that are applicable to banks, associations and any other entities that exercise fiduciary powers, rather than the "nonobjection" standard adopted in the Commission's rule applicable to brokerage accounts. While the affirmative consent standard is appropriate to avoid breaches of a bank's duty to or the violation of a privacy right of a customer, a bank is in a different posture with regard to a new customer upon enactment of this legislation. Upon enactment of this legislation, a bank opening a new customer account would be on notice of the applicability of the nonobjection standard for beneficial owner disclosure and any such concerns would be adequately addressed by the bank at the time the new account is opened.

Section 2(b) is designed to grant the SEC authority to address the concerns of the banks and simultaneously ensure that banks are complying with the legislation's purpose of facilitating shareholder communication. The rules promulgated by the SEC should be designed to ensure that the intent of the legislation is realized and that the institutions covered by this act make a good faith effort to obtain responses from their customers. Therefore the legislation provides that the restrictions on SEC rulemaking shall not apply if the SEC determines that the institutions covered by this act have not made a good faith effort to obtain the affirmative consent of their existing customers. The SEC will provide guidance in its rulemaking to assist the affected institutions in the determination of the conduct constituting a good faith effort to obtain affirmative consent.

In recognition of the concerns expressed to the committee that led to the adoption of section 2(b), the SEC must consider the privacy rights of bank customers in promulgating any rule governing bank proxy processing. The legislation contemplates that the SEC, in its rulemaking, must address the concerns of those who comment on the rules and regulations promulgated pursuant to this section. The SEC is expected to work in conjunction with the bank regulatory agencies to develop a regulatory scheme that is appropriate for banks.

Legislation, containing identical provisions, was passed by the other body this summer. I urge my colleagues to give favorable consideration to this bill which will enable shareholders to be provided with more information and allow issuers to communicate more expeditiously with their shareholders.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. HATCH, from the Committee on Labor and Human Resources:

William J. Doyle, III, of Maryland, to be inspector general, Railroad Retirement Board.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. METZENBAUM (for himself, Mr. LEAHY, Mr. SIMON, Mr. SPECTER, and Mr. DECONCINI):

S. 1938. A bill to make permanent the requirements of the manufacturing clause of the copyright law; to the Committee on the Judiciary.

By Mr. HELMS:

S. 1939. A bill for the relief of Ali Maalizadeh; to the Committee on the Judicary.

By Mr. DENTON:

S. 1940. A bill to protect the security of the United States by creating the offense of international terrorism, and for other purposes; to the Committee on the Judiciary.

S. 1941. A bill to protect the security of the United States by providing for sanctions against any country that provides support for perpetrators of acts of international terrorism; to the Committee on Foreign Relations.

S. 1942. A bill to amend title 10, United States Code, to improve the security of United States military installations; to the Committee on Armed Services.

By Mr. DIXON:

S. 1943. A bill to amend the Federal Deposit Insurance Act; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. SASSER (for himself, Mr. HEINZ, Mr. SARBANES and Mr. GORE):

S. 1944. A bill to amend titles II and XVI of the Social Security Act to prohibit, in hearings relating to disability benefits, the adversarial involvement of any representative of the Department of Health and Human Services, or any State agency involved; to the Committee on Finance.

By Mr. DURENBERGER (for himself, Mr. LUGAR and Mr. PELL):

S. 1945. A bill to authorize the expenditure of Polish currencies held by the United States for projects to assist handicapped and orphaned Polish children; to the Committee on Foreign Relations.

By Mr. WEICKER:

S. 1946. A bill to designate the West Branch of the Farmington River as a study area for inclusion in the national wild and scenic rivers system, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. DURENBERGER (for himself and Mr. LEAHY):

S. 1947. A bill to enhance the protection of United States interests under the Foreign Missions Act; to the Committee on Foreign Relations.

By Mr. WEICKER:

S. 1948. A bill to assure that high quality services are furnished to developmentally disabled individuals and mentally ill individuals in residential facilities and by providers of home and community-based services which receive funds under the Medicare or Medicaid programs, and to amend the Developmental Disabilities Assistance and Bill of Rights Act to require that residential programs meet Medicaid standards; to the Committee on Finance.

By Mr. DENTON (for himself and Mr. LEAHY):

S.J. Res. 249. Joint resolution to proclaim October 23, 1986, as "A Time of Remembrance" for all victims of terrorism throughout the world; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. SASSER (for himself, Mr. GORE, Mr. FORD, Mr. NUNN, Mr. MCCONNELL, Mr. BYRD, Mr. ABDNOR, Mr. ANDREWS, Mr. ARMSTRONG, Mr. BAUCUS, Mr. BENTSEN, Mr. BIDEN, Mr. BINGAMAN, Mr. BOREN, Mr. BOSCHWITZ, Mr. BRADLEY, Mr. BUMPERS, Mr. BURDICK, Mr. CHAFEE, Mr. CHILES, Mr. COCHRAN, Mr. COHEN, Mr. CRANSTON, Mr. D'AMATO, Mr. DANFORTH, Mr. DECONCINI, Mr. DENTON, Mr. DIXON, Mr. DODD, Mr. DOLE, Mr. DOMENICI, Mr. DURENBERGER, Mr. EAGLETON, Mr. EAST, Mr. EVANS, Mr. EXON, Mr. GARN, Mr. GLENN, Mr. GOLDWATER, Mr. GORTON, Mr. GRAMM, Mr. GRASSLEY, Mr. HARKIN, Mr. HART, Mr. HATCH, Mr. HATFIELD, Mrs. HAWKINS, Mr. HECHT, Mr. HEFLIN, Mr. HEINZ, Mr. HELMS, Mr. HOLLINGS, Mr. HUMPHREY, Mr. INOUYE, Mr. JOHNSTON, Mrs. KASSEBAUM, Mr. KASTEN, Mr. KENNEDY, Mr. KERRY, Mr. LAUTENBERG, Mr. LAXALT, Mr. LEAHY, Mr. LEVIN, Mr. LONG, Mr. LUGAR, Mr. MATHIAS, Mr. MATSUNAGA, Mr. MATTINGLY, Mr. MCCLURE, Mr. MELCHER, Mr. METZENBAUM, Mr. MITCHELL, Mr. MOYNIHAN, Mr. MURKOWSKI, Mr. NICKLES, Mr. PACKWOOD, Mr. PELL, Mr. PRESSLER, Mr. PROXMIRE, Mr. PRYOR, Mr. QUAYLE, Mr. RIEGLE, Mr. ROCKEFELLER, Mr. ROTH, Mr. RUDMAN, Mr. SARBANES, Mr. SIMON, Mr. SIMPSON, Mr. SPECTER, Mr. STAFFORD, Mr. STENNIS, Mr. STEVENS, Mr. SYMMS, Mr. THURMOND, Mr. TRIBLE, Mr. WALLOP, Mr. WARNER, Mr. WEICKER, Mr. WILSON, and Mr. ZORINSKY):

S. Res. 274. Resolution memorializing certain members of the 101st Airborne Division; considered and agreed to.

By Mr. HUMPHREY:

S. Res. 275. Resolution to express the opposition of the United States to the "one-child" family planning policies of the Government of the People's Republic of China

and to encourage the People's Republic of China to abandon such policies; to the Committee on Foreign Relations.

By Mr. DENTON:

S. Con. Res. 94. Concurrent resolution expressing the sense of the Congress that the President should declare a State of national emergency with respect to terrorist acts committed against nationals of the United States; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. METZENBAUM (for himself, Mr. PACKWOOD and Mr. MOYNIHAN):

S. Con. Res. 95. Concurrent resolution to recognize and honor the contributions of Consumers Union; to the Committee on Commerce, Science, and Transportation.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. METZENBAUM (for himself, Mr. LEAHY, Mr. SIMON, Mr. Specter, and Mr. DECONCINI):

S. 1938. A bill to make permanent the requirements of the manufacturing clause of the copyright law; to the Committee on the Judiciary.

EXTENDING MANUFACTURING CLAUSE OF COPYRIGHT ACT

● Mr. METZENBAUM. Mr. President, today I am introducing legislation which permanently extends the manufacturing clause of the Copyright Act. For over 94 years, the manufacturing clause has helped U.S. printing to become a modern, vibrant industry, able to employ 1.2 million persons across all 50 States. The legislation which I am introducing today will ensure the continued success of our Nation's seventh largest industry.

The manufacturing clause of the Copyright Act requires that material which is preponderantly of a nondramatic literary nature and is written in English by an American or by an author domiciled in the United States must be printed in the United States or Canada in order to be entitled to the full and unqualified protection of U.S. copyright laws. The manufacturing clause is currently due to expire on July 1, 1986.

Our Nation is fortunate to have a strong printing industry. However, the expiration of the manufacturing clause would cripple our domestic industry. A 1981 Department of Labor study anticipated a loss of up to 172,000 jobs in the printing industry and a total loss of as many as 367,000 job opportunities throughout our economy as a result of foreign competition. Much of the work now done by the American printing industry, including books, catalogs, directories, commercial printing, business forms and periodicals, would be victims of low-wage foreign competition. Essentially, American printing would lose the bulk of domestic printing orders.

Furthermore, the expiration of the manufacturing clause would have a catastrophic effect on our Nation's small businesses. Small printing shops comprise the backbone of U.S. printing. In fact, more than 31,000 of the 42,000 printing companies in the United States employ 20 or fewer workers. These small businesses do not have the resources to build offshore plants.

As in many other areas of international trade, our foreign trading partners are not playing fair. Many foreign nations have established both tariff and nontariff trade barriers which restrict imports of U.S. printing goods.

The trade deficit has reached record proportions. The United States has become a debtor nation for the first time since World War I, and America is rapidly losing its manufacturing base. For the American printing industry, the manufacturing clause remains the most important way to alleviate the severe influence of threatening international economic conditions.

The extension of the manufacturing clause will provide the conditions necessary for our Nation's modern printing industry to remain successful. Clearly, by continuing this important provision of the Copyright Act, we will enable hundreds of thousands of Americans to remain employed.

Mr. President, I ask unanimous consent to have the text of the bill to extend the manufacturing clause of the Copyright Act printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1938

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 601(a) of title 17, United States Code, is amended by striking out "Prior to July 1, 1986, and except" and inserting in lieu thereof "Except".●

By Mr. DENTON:

S. 1940. A bill to protect the security of the United States by creating the offense of international terrorism, and for other purposes; to the Committee on the Judiciary.

INTERNATIONAL TERRORISM CONTROL ACT

Mr. DENTON. Mr. President, I rise today to introduce the International Terrorism Control Act of 1985, which would help to protect American lives and interests by creating the legal offense of international terrorism. The bill provides for the prosecution and punishment of individuals who commit terrorist acts which are directed against Americans or the U.S. Government and which are committed outside the boundaries of the United States. It also provides for the punishment of Americans who either serve or provide training to international terrorists.

We are all mindful of the depraved and barbaric acts that terrorists have committed against Americans abroad in just the last 6 months. Incidents such as the TWA and *Achille Lauro* hijackings, involving, as they did, the brutal and senseless murders of innocent Americans, have filled us all with anger and frustration. Those feelings, have intensified as we have watched the major criminals go free, often with the assistance of foreign governments.

The final and, perhaps, bitterest irony of each of these episodes has been our realization that international terrorism is not, in itself, a crime under current U.S. law. The Internation Terrorism Control Act of 1985 is designed to rectify that situation.

The bill provides that the crime of international terrorism involves a violent act occurring outside the boundaries of the United States which would be in violation of U.S. law if committed within the United States, and which appears to be intended to intimidate a civilian population, to influence Government policy by intimidation, or to affect the conduct of Government. Such an act is punishable under the bill by imprisonment for any term of years, or life, or by death if such act results in the death of any person.

In order for a terrorist act to be punishable under the bill, either the offender or the victim of the act must be a national of the United States, the offender must be found in the United States, or the government which is sought to be compelled by the terrorist act must be the U.S. Government. Even if the terrorist act is committed inside the United States, it would still be punishable under the bill if the U.S. Government is the government sought to be compelled by the act.

The bill also makes it a crime for any national, permanent resident alien, or business entity of the United States either to serve in or provide training to the armed forces or intelligence agencies of any foreign government, faction, or international terrorist group whose terrorist activities are determined by the President to affect adversely the national security or foreign relations of the United States or the physical security or propety interests of Americans. The penalties for such activities would include imprisonment for up to 10 years, fines of $500,000 or more, and forfeiture of property derived from or used in the commission of such acts.

In addition, the bill would permit the President, upon authorization of the Congress by joint resolution, to exercise a broad range of powers in dealing with foreign countries that either engage in or support international terrorism. Those powers would include the use of military force to protect Americans abroad, the conduct of intelligence activities, and the imposition of economic and other sanctions against those countries.

Finally, the bill would facilitate cooperation between the United States

and foreign governments in combating terrorism by authorizing our Government to assist foreign governments in finding and prosecuting terrorists, and also by greatly improving our statutes governing the extradiction of criminals.

Mr. President, we simply must act now to fill the critical void that currently exists in our Criminal Code. We must have the ability to prosecute and punish international terrorists for their acts, many of which are not now crimes under U.S. law. The bill will fill the void. It will make it abundantly clear to terrorists that the United States will spare no effort to bring them to justice. Terrorists must understand the fact if they are to be discouraged from engaging in their heinous activities. It is in the interest of deterring future incidents of international terrorism that I urge the Senate to act promptly on the bill.

I ask unanimous consent that the text of the bill appear in the RECORD immediately following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1940

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "International Terrorism Control Act of 1985".

STATEMENT OF FINDINGS

SEC. 2. The Congress finds that international terrorism is—

(1) a violent act dangerous to human life;

(2) directed at government, diplomacy, commerce, and innocent people throughout the world;

(3) a violent, coercive, intimidating means to gain notoriety or achieve a political goal;

(4) an offense against humanity which results in the loss of life of innocent people, denial of rights, and damage to property;

(5) an unlawful restraint on diplomacy and commerce;

(6) a threat to national security and United States nationals; and

(7) an illegitimate force in relations between States.

TERRORISM OFFENSES

SEC. 3. (a) Title 18 of the United States Code is amended by adding the following new chapter after chapter 113:

"CHAPTER 113A—TERRORISM

"Sec.
"2331. International terrorist activities.
"2332. Military and intelligence assistance to certain foreign governments, factions, groups.

"§ 2331. International terrorist activities

"(a) Except as provided in subsection (b) of this section, whoever, whether inside the United States or outside the United States, commits a violent act or an act dangerous to human life that—

"(1) is a violation of the criminal laws of the United States or of any State, or that would be a criminal violation if committed within the jurisdiction of the United States or any State;

"(2) appears to be intended—

"(A) to intimidate or coerce a civilian population;

"(B) to influence the policy of a government by intimidation or coercion; or

"(C) to affect the conduct of a government by assassination or kidnaping; and

"(3) occurs totally outside the United States or transcends national boundaries in terms of the means by which it is accomplished, the persons they appear intended to coerce or intimidate, or the locale in which their perpetrators operate or seek asylum,

shall be punished by imprisonment for any term of years or life or by death, subject to the provisions of subsection (c), if the death of any person results from the commission of such act.

"(b)(1) It is not an offense under this section if the conduct required for the offense occurred outside the United States unless—

"(A) the offender or the person seized, killed, assaulted, attacked, or detained is a national of the United States;

"(B) the offender is found in the United States; or

"(C) the governmental organization sought to be compelled is the Government of the United States.

"(2) It is not an offense under this section if,—

"(A) the conduct required for the offense occurred inside the United States; and

"(B) each alleged offender and each person seized, killed, assaulted, attacked, or detained are nationals of the United States and each alleged offender is found in the United States,

unless the governmental organization sought to be compelled is the Government of the United States.

"(c)(1) A person shall be subjected to the penalty of death for an offense prohibited by this section only if a hearing is held in accordance with this subsection.

"(2) When a defendant is found guilty of or pleads guilty to an offense under this section for which one of the sentences provided is death, the judge who presided at the trial or before whom the guilty plea was entered shall conduct a separate sentencing hearing to determine the existence or nonexistence of the factors set forth in paragraphs (6) and (7), for the purpose of determining the sentence to be imposed. The hearing shall not be held if the Government stipulates that none of the aggravating factors set forth in paragraph (7) exists or that one or more of the mitigating factors set forth in paragraph (6) exists. The hearings shall be conducted—

"(A) before the jury which determined the defendant's guilt;

"(B) before a jury impaneled for the purpose of the hearing if—

"(i) the defendant was convicted upon a plea of guilty;

"(ii) the defendant was convicted after a trial before the court sitting without a jury; or

"(iii) the jury which determined the defendant's guilt has been discharged by the court for good cause; or

"(C) before the court alone, upon the motion of the defendant and with the approval of the court and of the Government.

"(3) In the sentencing hearing the court shall disclose to the defendant or his counsel all material contained in any presentence report, if one has been prepared, except such material as the court determines is required to be withheld for the protection of human life or for the protection of the national security. Any presentence information withheld from the defendant shall not be considered in determining the existence or the nonexistence of the factors set forth in paragraph (6) or (7). Any information relevant to any of the mitigating factors set forth in paragraph (6) may be presented by either the Government or the defendant, regardless of its admissibility under the rules governing admission of evidence at criminal trials; but the admissibility of information relevant to any of the aggravating factors set forth in paragraph (7) shall be governed by the rules governing the admission of evidence at criminal trials. The Government and the defendant shall be permitted to rebut any information received at the hearing, and shall be given fair opportunity to present argument as to the adequacy of the information to establish the existence of any of the factors set forth in paragraph (6) or (7). The burden of establishing the existence of any of the factors set forth in paragraph (7) is on the Government. The burden of establishing the existence of any of the factors set forth in paragraph (6) is on the defendant.

"(4) The jury, or if there is no jury, the court shall return a special verdict setting forth its findings as to the existence or nonexistence of each of the factors set forth in paragraph (6) and as to the existence or nonexistence of each of the factors set forth in paragraph (7).

"(5) If the jury or, if there is no jury, the court finds by a preponderance of the information that one or more of the factors set forth in paragraph (7) exists and that none of the factors set forth in paragraph (6) exists, the court shall sentence the defendant to death. If the jury or, if there is no jury, the court finds that none of the aggravating factors set forth in paragraph (7) exists, or finds that one or more of the mitigating factors set forth in paragraph (6) exists, the court shall not sentence the defendant to death but shall impose any other sentence provided for the offense for which the defendant was convicted.

"(6) The court shall not impose the sentence of death on the defendant if the jury or, if there is no jury, the court finds by a special verdict as provided in paragraph (4) that at the time of the offense—

"(A) he was under the age of eighteen;

"(B) his capacity to appreciate the wrongfulness of his conduct or to conform his conduct to the requirements of law was significantly impaired, but not so impaired as to constitute a defense to prosecution;

"(C) he was under unusual and substantial duress, although not such duress as to constitute a defense to prosecution;

"(D) he was a principal (as defined in section 2(a) of title 18 of the United States Code (18 U.S.C. 2(a))) in the offense, which was committed by another, but his participation was relatively minor, although not so minor as to constitute a defense to prosecution; or

"(E) he could not reasonably have foreseen that his conduct in the course of the commission of the offense for which he was convicted would cause, or would create a grave risk of causing death to another person.

"(7) If no factor set forth in paragraph (6) is present, the court shall impose the sentence of death on the defendant if the jury, or, if there is no jury, the court finds by a special verdict as provided in paragraph (4) that the death of another person resulted from the commission or attempted commission of the offense, and

"(A) the defendant has been convicted of another Federal or State offense (committed either before or at the time of the commission or attempted commission of the offense) for which a sentence of life imprisonment or death was impossible;

"(B) the defendant has previously been convicted of two or more Federal or State offenses with a penalty of more than one year imprisonment (committed on different occasions before the time of the commission or attempted commission of the offense), involving the infliction of serious bodily injury upon another person;

"(C) in the commission or attempted commission of the offense, the defendant knowingly created a grave risk of death to another person in addition to the victim of the offense or attempted offense; or

"(D) the defendant committed or attempted to commit the offense in an especially heinous, cruel, or depraved manner.

"(d) As used in this section, the term 'national of the United States' has the meaning given such term in section 101(a)(22) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(22)).

"§ 2332. Military and intelligence assistance to certain foreign governments, factions, and international terrorist groups

"(a) Except as provided in subsections (h) and (i), it shall be unlawful for any national of the United States, any permanent resident alien of the United States, or any United States business entity willfully to perform or attempt to perform anywhere in the world any of the following acts:

"(1) serve in the armed forces or any intelligence agency of any foreign government, faction, or international terrorist group which is named in a determination in effect under subsection (d); or

"(2) provide training in any capacity to the armed forces or any intelligence agency, or their agents, of any foreign government, faction, or international terrorist group named in a determination in effect under subsection (d).

"(b) Except as provided in subsections (h) and (i), it shall be unlawful for any person or entity within the boundaries of the United States, its territories or possessions, willfully to perform or attempt to provide training in any capacity to the armed forces or any intelligence agency, or their agents, of any foreign government, faction, or international terrorist group named in a determination in effect under subsection (d).

"(c) Whoever violates this section shall be fined not more than five times the total compensation received for such violation, or $500,000, whichever is greater, or imprisoned for not more than ten years, or both, for each such offense.

"(d) Whenever the President in consultation with his Cabinet finds that the acts or likely acts of international terrorism of a foreign government, faction, or international terrorist group are such to adversely affect the national security, foreign relations of the United States, or the physical security of the person or property of a private entity of the United States warrant a ban on the foreign government's, faction's or international terrorist group's receipt of services or other assistance in support of such acts as described in subsection (a) or (b), the President may issue a determination naming such foreign government, faction, or international terrorist group for which such finding has been made. If the Secretary of State in consultation with the Cabinet finds that the conditions which were the basis for any determination issued under this subsection have changed in such a manner as to warrant revocation of such determination, or that the national security or foreign relations of the United States so warrant, the Secretary may revoke such determination in whole or in part. Any determination issued pursuant to this subsection shall cease to have any effect one year from the date of its publication unless renewed at or before that time by the Secretary of State. Any determination, or the renewal or revocation thereof, issued pursuant to this subsection shall be published in the Federal Register and shall become effective immediately on publication. Any revocation or lapsing of a determination shall not affect any action or proceeding based on any conduct committed prior to the effective date of such revocation or lapsing.

"(e) For the purpose of this section, any finding of fact made in any determination or renewal issued pursuant to subsection (d) shall be conclusive. No question concerning the validity of the issuance of such determination or renewal may be raised by a defendant as a defense in or as an objection to any trial or hearing if such determination or renewal was issued and published in the Federal Register in accordance with subsection (d).

"(f) An affirmative defense shall exist with respect to any act committed outside of the United States within thirty days after the effective date of any determination affecting such person if the act was performed pursuant to an agreement or contract entered into prior to the effective date of the determination.

"(g)(1) Whoever has been convicted of a violation of this section, in addition to any other penalty prescribed by this section, shall forfeit to the United States—

"(A) any property constituting, or derived from, any proceeds he obtained, directly or indirectly, as a result of such violation; and

"(B) any of his property used, or intended to be used, to commit, or to facilitate the commission of, such violation.

"(2) The procedures in any criminal forfeiture under this section, and the duties and authority of the courts of the United States and the Attorney General with respect to any criminal forfeiture action under this section or with respect to any property that may be subject to forfeiture under this section, are to be governed by the provisions of section 1963 of this title.

"(h) This section shall not be construed to prohibit the provision of medical services or medical training for humanitarian purposes, or the recruitment or solicitation thereof.

"(i) Nothing in this section shall be construed to create criminal liability for any activities conducted by officials of the United States Government, or their agents, which are properly authorized and conducted in accordance with Federal statutes and Executive orders governing such activities.

"(j) For the purposes of this section—

"(1) the term 'foreign government' has the meaning given it in section 1116(b)(2) of this title;

"(2) the term 'armed forces' includes any regular, irregular, paramilitary, guerrilla, or police force;

"(3) the term 'faction' includes any political party, body of insurgents, or other group which seeks to overthrow the government of, become the government of, or otherwise assert control over or influence any foreign country or territory, possession, department, district, province, or other political subdivision of any such foreign country through the threat or use of force of arms;

"(4) the term 'group' means an association of persons, whether or not a legal entity;

"(5) the term 'international terrorist group' means a group which engages in international terrorism;

"(6) the term 'international terrorism' has the meaning given to it in section 101(c) of the Foreign Intelligence Surveillance Act of 1978 (50 U.S.C. 1801(c));

"(7) the term 'intelligence agency' means any entity which engages in the collection, analysis, or dissemination of information concerning the activities, capabilities, plan or intention of governments, organization, or persons, in whole or in part by covert means;

"(8) the term 'United States business entity' means any sole proprietorship, partnership, company, association, or corporation organized under the laws of, or having its principal place of business within the United States, any State, the District of Columbia, or any territory or possession of the United States;

"(9) the term 'national of the United States' has the meaning given to it in section 101(a)(22) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(22));

"(10) the term 'permanent resident alien of the United States' means an alien lawfully admitted for permanent residence in the United States as defined in section 101(a)(20) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(20)); and

"(11) the term 'private entity of the United States' means

"(A) an individual who is—

"(i) a national of the United States; or

"(ii) a permanent resident alien of the United States;

"(B) an employee or contractor of the United States Government, regardless of nationality, who is the victim or intended victim of an act of terrorism by virtue of that employment;

"(C) a sole proprietorship, partnership, company, or association composed in whole or in part of nationals or permanent resident aliens of the United States; or

"(D) a corporation organized under the laws of the United States, any State, the District of Columbia, or any territory or possession of the United States, and any foreign subsidiary of such corporation.".

(b) The chapter analysis of part I of title 18 is amended by adding the following new item after the item relating to chapter 113:

"113A. Terrorism ..... 2331".

(c) Section 3238 of title 18, United States Code, is amended by—

(1) striking out "The" and inserting in lieu thereof "(a) Except as provided in subsection (b), the"; and

(2) adding at the end the following new subsection:

"(b) The trial of any offense under section 2332 of this title which is committed out of the jurisdiction of any particular State or district may be held in any district. Nothing contained in this subsection may be construed to restrict any right of a defendant under any rule in effect under section 3771 of this title.".

(d) Section 11 of title 18 is amended by striking out the phrase "as used in this title except in sections 112, 878, 970, 1116, and 1201," and inserting in lieu thereof: "as used in this title except in sections 112, 878, 970, 1116, 1201, and 2332,".

UNITED STATES COOPERATION WITH FOREIGN GOVERNMENTS IN COMBATING TERRORISM

SEC. 4. The Attorney General and the Secretary of State are authorized to—

(1) cooperate jointly with foreign and international law enforcement agencies for the purpose of combating international terrorism; and

(2) provide evidentiary support to foreign governments for the prosecution of international terrorists.

EXTRADITION

SEC. 5. (a) Chapter 209 of title 18, United States Code, is amended as follows:

(1) Section 3181 is deleted.

(2) Section 3182 is redesignated as section "3181".

(3) Section 3183 is redesignated as section "3182" and is amended by striking out "or the Panama Canal Zone" in the first sentence.

(4) A new section 3183 is added as follows:

"§ 3183. Payment of fees and costs

"All costs or expenses incurred in any interstate rendition proceeding and apprehending, securing, and transmitting a fugitive shall be paid by the demanding authority.".

(5) Sections 3184 through 3195 are deleted.

(6) The chapter heading and section analysis are amended to read as follows:

"CHAPTER 209—INTERSTATE RENDITION

"3181. Fugitives from State or Territory to State, District, or Territory.
"3182. Fugitives from State, Territory or Possession into extraterritorial jurisdiction of the United States.
"3183. Payment of fees and costs.".

(b) A new chapter 210 of title 18 of the United States Code is added as follows:

"CHAPTER 210—INTERNATIONAL EXTRADITION

"Sec.
"3191. Extradition authority in general.
"3192. Initial procedure.
"3193. Waiver of extradition hearing and consent to removal.
"3194. Extradition hearing.
"3195. Appeal.
"3196. Surrender of a person to a foreign state.
"3197. Receipt of a person from a foreign state.
"3198. General provisions for chapter.

"§ 3191. Extradition authority in general

"The United States may extradite a person to a foreign state pursuant to this chapter only if—

"(a) there is a treaty concerning extradition between the United States and the foreign state; and

"(b) the foreign state requests extradition within the terms of the applicable treaty.

"§ 3192. Initial procedure

"(a) IN GENERAL.—The Attorney General may file a complaint charging that a person is extraditable. The Attorney General shall file the complaint in the United States district court—

"(1) for the district in which the person may be found; or

"(2) for the District of Columbia, if the Attorney General does not know where the person may be found.

"(b) COMPLAINT.—The complaint shall be made under oath or affirmation, and shall specify the offense for which extradition is sought. The complaint—

"(1) shall be accompanied by a copy of the request for extradition and by the evidence and documents required by the applicable treaty; or

"(2) if not accompanied by the materials specified in paragraph (1)—

"(A) shall contain—

"(i) information sufficient to identify the person sought;

"(ii) a statement of the essential facts constituting the offense that the person is believed to have committed, or a statement that an arrest warrant for the person is outstanding in the foreign state; and

"(iii) a description of the circumstances that justify the person's arrest; or

"(B) shall contain such other information as is required by the applicable treaty;

and shall be supplemented before the extradition hearing by the materials specified in paragraph (1).

"(c) ARREST OR SUMMONS.—Upon receipt of a complaint, the court shall issue a warrant for the arrest of the person sought, or, if the Attorney General so requests, a summons to the person to appear at an extradition hearing. The warrant or summons shall be executed in the manner prescribed by rule 4(d) of the Federal Rules of Criminal Procedure. A person arrested pursuant to this section shall be taken without unnecessary delay before the nearest available court for an extradition hearing.

"(d) DETENTION OR RELEASE OF ARRESTED PERSON.—

"(1) The court shall order that a person arrested under this section be held in official detention pending the extradition hearing unless the person establishes to the satisfaction of the court that special circumstances require his release.

"(2) Unless otherwise provided by the applicable treaty, if a person is detained pursuant to paragraph (1) in a proceeding in which the complaint is filed under subsection (b)(2), and if, within sixty days of the person's arrest, the court has not received—

"(A) the evidence or documents required by the applicable treaty; or

"(B) notice that the evidence or documents have been received by the Department of State and will promptly be transmitted to the court;

the court may order that the person be released from official detention pending the extradition hearing.

"(3) If the court orders the release of the person pending the extradition hearing, it shall impose conditions of release that will reasonably assure the appearance of the person as required and the safety of any other person and the community.

"§ 3193. Waiver of extradition hearing and consent to removal

"(a) INFORMING THE COURT OF WAIVER AND CONSENT.—A person against whom a complaint is filed may waive the requirements of formal extradition proceedings, including an order of surrender, by informing the court that he consents to removal to the foreign state.

"(b) INQUIRY BY THE COURT.—The court, upon being informed of the person's consent to removal, shall—

"(1) inform the person that he has a right to consult with counsel and that, if he is financially unable to obtain counsel, counsel may be appointed to represent him pursuant to section 3006A; and

"(2) address the person to determine whether his consent is—

"(A) voluntary, and not the result of a threat or other improper inducement; and

"(B) given with full knowledge of its consequences, including the fact that it may not be revoked after the court has accepted it.

"(c) FINDING OF CONSENT AND ORDER OF REMOVAL.—If the court finds that the person's consent to removal is voluntary and given with full knowledge of its consequences, it shall, unless the Attorney General notifies the court that the foreign state or the United States objects to such removal, order the surrender of the person to the custody of a duly appointed agent of the foreign state requesting extradition. The court shall order that the person be held in official detention until surrendered.

"(d) LIMITATION ON DETENTION PENDING REMOVAL.—A person whom the court orders surrendered pursuant to subsection (c) may, upon reasonable notice to the Secretary of State, petition the court for release from official detention if, excluding any time during which removal is delayed by judicial proceedings, the person is not removed from the United States within thirty days after the court ordered the person's surrender. The court may grant the petition unless the Secretary of State, through the Attorney General, shows good cause why the petition should not be granted.

"§ 3194. Extradition hearing

"(a) IN GENERAL.—The court shall hold a hearing to determine whether the person against whom a complaint is filed is extraditable as provided in subsection (d), unless the hearing is waived pursuant to section 3193. The court does not have jurisdiction to determine—

"(1) the merits of the charge against the person by the foreign state;

"(2) whether the foreign state is seeking the extradition of the person for the purpose of prosecuting or punishing the person for his political opinions, race, religion, or nationality; or

"(3) whether the extradition of the person to the foreign state seeking his return would be incompatible with humanitarian considerations.

The hearing shall be held as soon as practicable after the arrest of the person or issuance of the summons.

"(b) RIGHTS OF THE PERSON SOUGHT.—The court shall inform the person of the limited purpose of the hearing, and shall inform him that—

"(1) he has the right to be represented by counsel and that, if he is financially unable to obtain counsel, counsel may be appointed to represent him pursuant to section 3006A; and

"(2) he may cross-examine witnesses who appear against him and may introduce evidence in his own behalf with respect to the matters set forth in subsection (d).

"(c) EVIDENCE.—

"(1) A deposition, warrant, or other document, or a copy thereof, is admissible as evidence in the hearing if—

"(A) it is authenticated in accordance with the provisions of an applicable treaty or law of the United States;

"(B) it is authenticated in accordance with the applicable law of the foreign state, and such authentication may be established conclusively by a showing that—

"(i) a judge, magistrate, or other appropriate officer of the foreign state has signed a certification to that effect; and

"(ii) a diplomatic or consular officer of the United States who is assigned or accredited to the foreign state, or a diplomatic or consular officer of the foreign state who is assigned or accredited to the United States, has certified the signature and position of the judge, magistrate, or other officer; or

"(C) other evidence is sufficient to enable the court to conclude that the document is authentic.

"(2) A certificate or affidavit by an appropriate official of the Department of State is admissible as evidence of the existence of a treaty or its interpretation.

"(3) If the applicable treaty requires that such evidence be presented on behalf of the foreign state as would justify ordering a trial of the person if the offense had been committed in the United States, the requirement is satisfied if the evidence establishes probable cause to believe that an offense was committed and that the person sought committed it.

"(d) FINDINGS.—The court shall find that the person is extraditable if it finds that—

"(1) there is probable cause to believe that the person arrested or summoned to appear is the person sought in the foreign state;

"(2) the evidence presented is sufficient to support the complaint under the provisions of the applicable treaty;

"(3) no defense to extradition specified in the applicable treaty, and within the jurisdiction of the court, exists; and

"(4) the act upon which the request for extradition is based would constitute an offense punishable under the laws of—

"(A) the United States;

"(B) the State where the fugitive is found; or

"(C) a majority of the States.

The court may base a finding that a person is extraditable upon evidence consisting, in whole or in part, of hearsay or of properly certified documents.

"(e) POLITICAL OFFENSES AND OFFENSES OF A POLITICAL CHARACTER.—The court shall not find the person extraditable after a hearing under this section if the court finds that the person has established by clear and convincing evidence that any offense for which such person may be subject to prosecution or punishment if extradited is a political offense or an offense of a political character. For the purposes of this subsection, the terms 'political offense' and 'offense of a political character'—

"(1) do not include—

"(A) an offense within the scope of the Convention for the Suppression of Unlawful Seizure of Aircraft, signed at The Hague on December 16, 1970;

"(B) an offense within the scope of the Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation, signed at Montreal on September 23, 1971;

"(C) a serious offense involving an attack against the life, physical integrity, or liberty of internationally protected persons (as defined in section 1116 of this title), including diplomatic agents;

"(D) an offense with respect to which a multilateral treaty obligates the United States to either extradite or prosecute a person accused of the offense;

"(E) an offense that consists of the manufacture, importation, distribution, or sale of narcotics or dangerous drugs;

"(F) an offense that consists of rape;

"(G) an attempt or conspiracy to commit an offense described in subparagraphs (A) through (F) of this paragraph, or participation as an accomplice of a person who commits, attempts, or conspires to commit such an offense.

"(2) Except in extraordinary circumstances, do not include—

"(A) an offense that consists of homicide, assault with intent to commit serious bodily injury, kidnaping, the taking of a hostage, or a serious unlawful detention;

"(B) an offense involving the use of a firearm (as such term is defined in section 921 of this title) if such use endangers a person other than the offender;

"(C) an attempt or conspiracy to commit an offense described in subparagraph (A) or (B) of this paragraph, or participation as an accomplice of a person who commits, attempts, or conspires to commit such an offense.

The court shall not take evidence with respect to, or otherwise consider, an issue under this subsection until the court determines the person is otherwise extraditable. Upon motion of the Attorney General or the person sought to be extradited, the United States district court may order the determination of any issue under this subsection by a judge of such court.

"(f) CERTIFICATION OF FINDINGS TO THE SECRETARY OF STATE.—

"(1) If the court finds that the person is extraditable, it shall state the reasons for its findings as to each charge or conviction, and certify its findings, together with a transcript of the proceedings, to the Secretary of State. The court shall order that the person be held in official detention until surrendered to a duly appointed agent of the foreign state, or until the Secretary of State declines to order the person's surrender.

"(2) If the court finds that the person is not extraditable, it shall state the reasons for its findings as to each charge or conviction, and certify the findings, together with such report as the court considers appropriate, to the Secretary of State. The Attorney General may commence a new action for extradition of the person only with the agreement of the Secretary of State.

"§ 3195. Appeal

"(a) IN GENERAL.—Either party may appeal, to the appropriate United States court of appeals, the findings by the district court on a complaint for extradition. The appeal shall be taken in the manner prescribed by rules 3 and 4(b) of the Federal Rules of Appellate Procedure, and shall be heard as soon as practicable after the filing of the notice of appeal. Pending determination of the appeal, the district court shall stay the extradition of a person found extraditable.

"(b) DETENTION OR RELEASE PENDING APPEAL.—If the district court found that the person sought is—

"(1) extraditable, it shall order that the person be held in official detention pending determination of the appeal, or pending a finding by the court of appeals that the person has established that special circumstances require his release;

"(2) not extraditable, it shall order that the person be released pending determination of an appeal unless the court is satisfied that the person is likely to flee or to endanger the safety of any other person or the community.

If the court orders the release of a person pending determination of an appeal, it shall impose conditions of release that will reasonably assure the appearance of the person as required and the safety of any other person and the community.

"(c) SUBSEQUENT REVIEW.—No court has jurisdiction to review a finding that a person is extraditable unless the person has exhausted his remedies under subsection (a). If the person files a petition for habeas corpus or for other review, he shall specify whether the finding that he is extraditable has been upheld by a court, and, if so, shall specify the court, the date, and the nature of each such proceeding. A court does not have jurisdiction to entertain a person's petition for habeas corpus or for other review if his commitment has previously been upheld, unless the court finds that the grounds for the petition or appeal could not previously have been presented.

"§ 3196. Surrender of a person to a foreign state

"(a) RESPONSIBILITY OF THE SECRETARY OF STATE.—If a person is found extraditable pursuant to section 3194, the Secretary of State, upon consideration of the provisions of the applicable treaty and this chapter—

"(1) may order the surrender of the person to the custody of a duly appointed agent of the foreign state requesting extradition;

"(2) may order such surrender of the person contingent on the acceptance by the foreign state of such conditions as the Secretary considers necessary to effectuate the purposes of the treaty or the interest of justice; or

"(3) may decline to order the surrender of the person if the Secretary is persuaded that—

"(A) the foreign state is seeking extradition of the person for the purpose of prosecuting or punishing the person because of his political opinions, race, religion, or nationality; or

"(B) the extradition of the person to the foreign state seeking his return would be incompatible with humanitarian considerations.

The Secretary may order the surrender of a person who is a national of the United States unless such surrender is expressly forbidden by the applicable treaty or by the laws of the United States. A decision of the Secretary under paragraph (1), (2), or (3) is a matter solely within the discretion of the Secretary and is not subject to judicial review: *Provided, however,* That in determining the application of paragraph (3), the Secretary shall consult with the appropriate bureaus and offices of the Department of State, including the Bureau of Human Rights and Humanitarian Affairs.

"(b) NOTICE OF DECISION.—The Secretary of State, upon ordering a person's surrender or denying a request for extradition in whole or in part, shall notify the person sought, the diplomatic representative of the foreign state, the Attorney General, and the court that found the person extraditable. If the Secretary orders the person's surrender, he also shall notify the diplomatic representative of the foreign state of the time limitation on the person's detention that is provided by subsection (c)(2).

"(c) LIMITATION ON DETENTION PENDING DECISION OR REMOVAL.—A person who is found extraditable pursuant to section 3194 may, upon reasonable notice to the Secretary of State, petition the court for release from official detention if, excluding any time during which removal is delayed by judicial proceedings—

"(1) the Secretary does not order the person's surrender, or decline to order the person's surrender, within forty-five days after his receipt of the court's findings and the transcript of the proceedings; or

"(2) the person is not removed from the United States within thirty days after the Secretary ordered the person's surrender.

The court may grant the petition unless the Secretary of State, through the Attorney General, shows good cause why the petition should not be granted.

"§ 3197. Receipt of a person from a foreign state

"(a) APPOINTMENT AND AUTHORITY OF RECEIVING AGENT.—The Attorney General shall appoint an agent to receive, from a foreign state, custody of a person accused of a Federal, State, or local offense. The agent shall have the authority of a United States marshal. The agent shall convey the person directly to the Federal or State jurisdiction that sought his return.

"(b) TEMPORARY EXTRADITION TO THE UNITED STATES.—If a foreign state delivers custody of a person accused of a Federal, State, or local offense to an agent of the United States on the condition that the person be returned to the foreign state at the conclusion of criminal proceedings in the United States, the Bureau of Prisons shall hold the person in custody pending the conclusion of the proceedings, and shall then surrender the person to a duly appointed agent of the foreign state. The return of the person to the foreign state is not subject to the requirements of this chapter.

"§ 3198. General provisions for chapter

"(a) DEFINITIONS.—As used in this chapter—

"(1) 'court' means

"(A) a United States district court established pursuant to section 132 of title 28, United States Code, the District Court of Guam, the District Court of the Virgin Islands, or the District Court of the Northern Mariana Islands; or

"(B) a United States magistrate authorized to conduct an extradition proceeding;

"(2) 'foreign state', when used in other than a geographic sense, means the government of a foreign state;

"(3) 'foreign state', when used in a geographic sense, includes all territory under the jurisdiction of a foreign state, including a colony, dependency, and constituent part of the state; its air space and territorial waters; and vessels or aircraft registered in the state;

"(4) 'treaty' includes a treaty, convention, or international agreement, bilateral or multilateral, that is in force after advice and consent by the Senate; and

"(5) 'warrant', as used with reference to a foreign state, means any judicial document authorizing the arrest or detention of a person accused or convicted of a crime.

"(b) PAYMENT OF FEES AND COSTS.—Unless otherwise specified by treaty, all transportation costs, subsistence expenses, and translation costs incurred in connection with the extradition or return of a person at the request of—

"(1) a foreign state, shall be borne by the foreign state unless the Secretary of State directs otherwise;

"(2) a State, shall be borne by the State; and

"(3) the United States, shall be borne by the United States.".

(c) This section shall take effect on the first day of the first month after enactment, and shall be applicable to extradition and rendition proceedings commenced thereafter.

SPECIAL AUTHORITIES FOR THE PRESIDENT

SEC. 6. (a) Whenever the President determines that a foreign country is engaging in or supporting acts of terrorism against United States nationals and that he needs the authority contained in subsection (b) to deal effectively with the actions of such country, he shall prepare and transmit to the Congress a report identifying such country and requesting the enactment of a joint resolution granting him such authority.

(b) Upon the enactment into law of a joint resolution declaring a foreign country to be engaging in or supporting acts of terrorism against United States nationals, the President is authorized for a period of not to exceed one year or until the termination of such joint resolution, whichever occurs first, to—

(1) introduce United States Armed Forces, notwithstanding any other provision of law, to—

(A) protect, rescue, or allow the safe evacuation of United States nationals; or

(B) conduct operations within the terrorist country to prevent, interdict, or retaliate against acts of terrorism directed against United States nationals;

(2) conduct increased intelligence activities, including carrying out covert activities and making propaganda broadcasts against the terrorist country;

(3) evacuate United States nationals from such country;

(4) restrict the travel of United States nationals to such country;

(5) seize assets of such country which are subject to the jurisdiction of the United States;

(6) cease cultural, technical, and humanitarian exchanges with such country;

(7) increase trade and cultural, technical, and humanitarian exchanges with countries which are adversaries of such country;

(8) terminate telecommunications to and from such country;

(9) quarantine the armed forces, regular and irregular, of such country; and

(10) impose a trade embargo on such country.

(c)(1) For purposes of subsection (b), the term "joint resolution" means a joint resolution, the matter after the resolving clause of which is as follows: "That the country of ———— is declared to be engaging in or supporting acts of terrorism against United States nationals", the blank space therein to be appropriately filled.

(2) A joint resolution described in paragraph (1) shall be considered in the Senate in accordance with the provisions of section 601(b) of the International Security Assistance and Arms Export Control Act of 1976, except that for purposes of such section the report described in subsection (a) shall be deemed to be a certification.

(3) For the purpose of expediting the consideration and enactment of a joint resolution under this subsection, a motion to proceed to the consideration of any such joint resolution after it has been reported by the appropriate committee shall be treated as highly privileged in the House of Representatives.

(d) For purposes of this section, the term "national of the United States" means—

(1) a natural person who is a citizen of the United States or who owes permanent allegiance to the United States; and

(2) a corporation or other legal entity which is organized under the laws of the United States, any State or territory thereof, or the District of Columbia, if natural persons who are nationals of the United States own, directly or indirectly, more than 50 per centum of the outstanding capital stock or other beneficial interest in such legal entity.

By Mr. DENTON:

S. 1941. A bill to protect the security of the United States by providing for sanctions against any country that provides support for perpetrators of acts of international terrorism; to the Committee on Foreign Relations.

INTERNATIONAL TERRORISM DETERRENCE ACT

● Mr. DENTON. Mr. President, I rise today to introduce the International Terrorism Deterrence Act of 1985. The bill is aimed at curbing the activities of various nation states in support of international terrorism, which—as a form of low intensity warfare—is being used to erode the influence and strategic position of the Western democracies and to enhance the power of the Soviet Union, its client states, and allies.

The shocking hijacking of the Italian cruise ship, the *Achille Lauro*, TWA flight 847, and EgyptAir 648 were not isolated incidents. They were only 3 of the more than roughly 705 terrorist acts that have been committed to date in 1985, at a cost of death or injury to 143 Americans and countless others. They are among only the most recent of the thousands of terrorist acts undertaken since 1973, except that the hijackings have served to heighten American awareness of the cold, calculating nature of those persons or groups who use international terrorism to advance their political and ideological objectives. They have starkly revealed how little regard their perpetrators, strategists, and financiers have for human life and the values that are the core of the Western democratic world. Accordingly, a consensus is developing for stronger action against terrorism.

During the past 4 years, however, it has become clearly evident from studying the testimony obtained, in more than 60 hearings before the Subcommittee on Security and Terrorism, which I chair, that terrorist groups do not operate alone. Indeed, their effectiveness is considerably influenced by the material assistance, training, and sanctuary that they receive from state sponsors. Yet, there has been very little effort to discourage such support, even though it is every bit as despicable as the terrorist acts and organizations themselves.

The International Terrorism Deterrence Act seeks to impair the life support system for international terrorism. First, it would require the Secretary of State to identify those foreign states that provide support for international acts of terrorism. The resulting designations would be subject to annual review and update. Only a determination that a particular nation state has ceased its support for international terrorism would qualify it to be removed from the list.

Then, upon a finding that a state supports terrorists, the President would be required to impose a range of sanctions against it. All or a portion of sanctions could be waived if the President notifies the Congress that such a

waiver would be in the national security interests of the United States.

The sanctions are designed to convey our displeasure and to establish clear penalties for state support of international terrorism. They include a suspension of any U.S. assistance or preferential trade treatment, a mandate for U.S. representatives to oppose loans through multilateral lending institutions, and termination of access to Export-Import Bank Loans. Furthermore, the bill would require the President either to prohibit the importation of any products from that country or to impose an additional duty on their import.

I recognize that unilateral U.S. action to restrict imports may be considered by some as a controversial course, but the dangers posed to life and liberty by international terrorism have become too great. The countries that encourage such criminal behavior must be made to feel the full weight of our condemnation. In those cases where we do not now provide bilateral aid or preferential trade treatment, a restriction on imports might be the only penalty we are able to impose.

Furthermore, the right to restrict imports for reasons of national security has long been recognized by the international community. I believe that the time has now come to state explicitly that the Congress regards international terrorism as a clear threat to our national security, which requires extraordinary unilateral action. To the extent that we are able to deny export revenue to a state sponsor of international terrorism, we diminish its ability to destabilize the western world through intimidation and violence.

The International Terrorism Deterrence Act of 1985, however, also requires the President to negotiate with our allies to obtain an agreement that they would impose similar sanctions. Since 40 percent of all terrorists acts are now aimed at Americans, American facilities, or American interests, it is appropriate for the United States to lead the effort, but the history of sanctions demonstrates that the most effective action is coordinated action. I believe that a joint effort to ostracize and penalize those nation states that support international terrorists is long overdue and hope that the President will pursue this option vigorously, with the full support of the U.S. Congress.

In conclusion, the International Terrorism Deterrence Act contains two other important provisions. It would establish a trust fund, to be known as the "Anti-Terrorism Trust Fund," which would be administered by the Secretary of the Treasury. The Secretary would be authorized to replenish the trust fund from revenue arising from any antiterrorism import duties, and it would be used to combat terrorism and to compensate its victims. It seems entirely appropriate that those states that finance terrorism should also make restitution to the victims.

The bill also makes clear that acts of international terrorism are an "unusual and extraordinary threat against the national security, foreign policy or economy of the United States" within the meaning of section 202 of the International Emergency Economic Powers Act. In 1979, in response to the Iranian seizure of the American Embassy and its occupants in Teheran, President Carter exercised his authority under that act to freeze Iranian assets in the United States. I believe that the threat of further use of that authority could help to deter states from sponsoring terror, or indirectly deny to those countries the benefits of investing or otherwise locating some of their resources in the United States.

Mr. President, despite all the discussion about international terrorism that has taken place on the Senate floor and in the Halls of Congress, as a body we have yet done little to stem its growth. I urge my colleagues to cosponsor the International Terrorism Deterrence Act of 1985 and to help me move it through the Congress to the President's desk for signature. It is an attempt to target the source of international terrorism—those states that provide the material aid, the training, the sanctuary.

Mr. President, I ask unanimous consent that the text of the bill as printed in the RECORD.

There being no objection the bill was ordered to be printed in the RECORD, as follows:

S. 1941

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "International Terrorism Deterrence Act of 1985."

STATEMENT OF FINDINGS

SEC. 2. The Congress finds that international terrorism—

(1) involves acts dangerous to human life or other violent acts;

(2) is directed at government, diplomacy, commerce, and innocent people throughout the world;

(3) is a violent, coercive, intimidating means to gain notoriety for a cause or achieve a political goal;

(4) involves offenses against humanity which result in the loss of life of innocent people, denial of human rights, or damage to property;

(5) is an unlawful restraint on diplomacy and commerce;

(6) is a threat to the national security of the United States and its nationals; and

(7) is an illegitimate force in relations between states.

SANCTIONS AGAINST INTERNATIONAL TERRORISM

SEC. 3. (a)(1) The Secretary of State shall identify each foreign state that provides support for acts of international terrorism and shall cause such identification to be published in the Federal Register. Such identification shall remain in effect until a determination is made with respect to such country under paragraph (2).

(2) If the Secretary of State determines that a foreign state identified under paragraph (1) has ceased providing support for acts of international terrorism, the Secretary of State shall cause such determination to be published in the Federal Register.

(3) Not later than February 15 of 1986, and not later than February 15 of each year thereafter, the Secretary of State shall submit to the Congress a report listing the names of each foreign state with respect to which an identification under paragraph (1) has been made.

(4) For purposes of this subsection, the term "support" includes financial or other material support, sanctuary, or training.

(b) Notwithstanding any other provision of law, if a foreign state is identified under subsection (a)(1)—

(1) the President shall terminate, withdraw, or suspend any portion of any trade agreement or treaty that relates to the provision of nondiscriminatory (most-favored-nation) trade treatment to such state;

(2) such state shall be denied nondiscriminatory (most-favored-nation) trade treatment by the United States and the products of such country shall be subject to the rates of duty set forth in column number 2 of the Tariff Schedules of the United States;

(3) the provisions of title V of the Trade Act of 1974 shall not apply with respect to the products of such state;

(4) the provisions of the Caribbean Basin Economic Recovery Act shall not apply with respect to the products of such state during the period covered by such indentification;

(5) the President shall—

(A) prohibit the importation into the United States of all articles that are the growth or product of such state, or

(B) impose an additional duty on such articles; (6) the President shall—

(A) terminate United States assistance,

(B) terminate duty-free treatment provided under any provision of law to the products of such state,

(C) terminate access to Export-Import Bank loans, and

(D) require the United States Executive Director to each international financial institution to vote against loans from such institution to such state; and

(7) the President may suspend the foreign air carrier permit issued pursuant to section 402 of the Federal Aviation Act of 1958 of each airline of such state and further suspend the right of any air carrier to operate in foreign air transportation to or from such state.

(c) It is the sense of the Congress that whenever a foreign state is identified under subsection (a)(1) the President should negotiate with the allies of the United States an agreement to impose against such foreign state sanctions which are similar to the sanctions described in subsection (b).

(d)(1) The President may waive all, or any portion of, the provisions of subsection (b) with respect to any foreign state if the President determines that such a waiver would be in the national security interests of the United States. the President shall submit to the Congress written notice of any waiver made under this paragraph.

(2) Any waiver made under paragraph (1) may be revoked by the President at any time.

ANTI-TERRORISM TRUST FUND

SEC. 4. (a) There is hereby established within the Treasury of the United States a trust fund to be known as the Anti-Terrorism Trust Fund (hereafter in this section referred to as the "Trust Fund"), consisting of such amounts as may be transferred or credited to the Trust Fund as provided in this section or otherwise appropriated to the Trust Fund.

(b) The Secretary of the Treasury shall transfer to the Trust Fund out of the general fund of the Treasury of the United States amounts determined by the Secretary of the Treasury to be equivalent to the amounts received into such general fund that are attributable to duties imposed by the President under section 3(b)(5)(E).

(c) The amounts which are required to be transferred under subsection (b) shall be transferred at least quarterly from the general fund of the Treasury of the United States to the Trust Fund on the basis of estimates made by the Secretary of the Treasury of the amounts referred to in subsection (b) that are received into the Treasury. Proper adjustments shall be made in the amounts subsequently transferred to the extent prior estimates were in excess of, or less than, the amounts required to be transferred.

(d) The Secretary of the Treasury shall be the trustee of the Trust Fund, and shall submit an annual report to the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives on the financial condition and the results of the operations of the Trust Fund during the fiscal year preceding the fiscal year in which such report is submitted and on the expected condition and operations of the Trust Fund during the fiscal year in which such report is submitted and the 5 fiscal years succeeding such fiscal year. Such report shall be printed as a House document of the session of the Congress to which the report is made.

(e) It shall be the duty of the Secretary of the Treasury to invest such portion of the Trust Fund as is not, in his judgment, required to meet current withdrawals. Such investments may be made only in interest-bearing obligations of the United States. For such purpose, such obligations may be acquired—

(1) on original issue at the issue price, or

(2) by purchase of outstanding obligations at the market price.

(f) Any obligation acquired by the trust Fund may be sold by the secretary of the Treasury at the market price.

(g) The interest on, and the proceeds from the sale or redemption of, any obligations held in the Trust Fund shall be credited to and form a part of the Trust Fund.

(h) Amounts in the Trust Fund shall be available, as provided in advance by appropriations Acts, only to provide compensation to the victims of terrorism and to combat terrorism, including the payment of any reward granted under chapter 204 of title 18, United States Code.

APPLICATION OF INTERNATIONAL EMERGENCY ECONOMIC POWERS ACT

SEC. 5. Any act of terrorism against a citizen, property, or interests of the United States, occurring in whole or substantial part outside the United States, may be considered by the President to be an unusual and extraordinary threat against the national security, foreign policy, or economy of the United States within the meaning of section 202 of the International Emergency Economic Powers Act.

DEFINITIONS

SEC. 6. For purposes of this Act—

(1) the term "international financial institution" means the International Monetary Fund, the International Bank for Reconstruction and Development, the International Development Association, the Inter-American Development Bank, the Asian Development Bank, the African Development Bank, and the African Development Fund; and

(2) the term "international terrorism" means activities that—

(A) involve acts dangerous to human life or other violent acts that are a violation of the criminal laws of the United States or of any state or that would be a criminal violation if committed within the jurisdiction of the United States or any state;

(B) appear to be intended—

(i) to intimidate or coerce a civilian population;

(ii) to influence the policy of a government by intimidation or coercion; or

(iii) to affect the conduct of a government by assassination or kidnaping; and

(C) occur totally outside the United States or transcend national boundaries in terms of the means by which they are accomplished, the persons they appear intended to coerce or intimidate, or the locale in which their perpetrators operate or seek asylum; and

(3) the term "United States assistance" means any assistance of any kind (other than assistance involving only the provision of food or medicine) which is provided by grant, sale, loan, lease, credit, guaranty, or insurance, or by any other means, by any agency or instrumentality of the United States Government to or for the benefit of any foreign country, including—

(A) assistance under the Foreign Assistance Act of 1961 (including programs under title IV of chapter 2 of part I, relating to the Overseas Private Investment Corporation, but excluding programs under chapter 8 of part I, relating to international narcotic control assistance);

(B) sales, credits, and guaranties under the Arms Export Control Act;

(C) sales under title I (including title III) of the Agricultural Trade Development and Assistance Act of 1954 and donations under title II of such Act of nonfood commodities;

(D) financing programs of the Commodity Credit Corporation for export sales of nonfood commodities;

(E) financing under the Export-Import Bank Act of 1945;

(F) assistance under the Migration and Refugee Assistance Act of 1962;

(G) programs under the Peace Corps Act;

(H) assistance under the Inter-American Foundation Act;

(I) assistance under the African Development Foundation Act;

(J) financial assistance for foreign persons or groups under the Mutual Educational and Cultural Exchange Act of 1961; and

(K) assistance of any kind under any other Act.●

By Mr. DENTON:

S. 1942. A bill to amend title 10, U.S. Code, to improve the security of U.S. military installations; to the Committee on Armed Services.

MILITARY INSTALLATION SECURITY AND ANTITERRORISM ACT

● Mr. DENTON. Mr. President, I rise today to introduce the "Military Installation Security and Antiterrorism Act of 1985." The bill will provide for the common defense and security of the United States by securing the Nation's military installations from access by terrorists and those persons who may engage in espionage against the Nation's interests.

Mr. President, recent events surrounding the Walker espionage case have made it abundantly clear that the threat of Soviet and Eastern bloc espionage is real and pervasive. The Soviet Union and its client-states have a massive effort underway in this country to amass large amounts of material about our military secrets and technology.

Often the security of our Nation and its military installations has been compromised by Soviet agents working with defense contractors. For example, the following defense contractor employees have been convicted of espionage:

First. Arthur James Walker, VSE Corp., Chesapeake, VA. Convicted on August 9, 1985, for selling—conspiring to sell—secret information to the Soviet Union.

Second. Thomas Patrick Cavanagh, Northrop Corp., Advanced Systems Division, Pico Rivera, CA, convicted of espionage in May 1984 for attempting to sell classified information to the Soviet Union.

Third. Ruby Louise Schuler, employee of System Control Technology, Inc., CA, deceased before the facts became known, but found to have conspired with James Durward Harper, her husband, who was subsequently convicted of espionage in 1983, for the Polish Intelligence Service.

Fourth. William Holden Bell, Hughes Aircraft Co., El Segundo, CA, convicted on four counts of espionage, involving the Polish Intelligence Service, in October 1981.

Fifth. Christopher J. Boyce, TRW, Inc., Redondo Beach, CA, convicted of eight counts of espionage in 1977, on behalf of the Soviet Union.

Sixth. Sadag K. Dedeyan, John Hopkins Applied Physics Laboratory, convicted on violation of Espionage Act by failing to report the illegal photographing of documents in his possession in 1975. Classified information was passed to the Soviet Union by an accomplice.

Seventh. John William Butenko, convicted on December 2, 1964, of espionage for the Soviet Union. Identified as civilian electronic engineer, specific contractor unknown.

Mr. President, the Soviets and Eastern bloc intelligence gathering in the United States has caused untold damage to our national security. The technological lead enjoyed by the United States in certain defense-related areas has been seriously eroded by the Soviet successes in obtaining classified scientific and technical informa-

tion. In addition, Soviet spying has cost our country billions of dollars in stolen technology and military secrets. To reverse the trend, we must protect our military installations from access by would-be terrorists and those persons who may engage in espionage activity.

The "Military Installation Security and Antiterrorism Act of 1985" will provide the necessary protection. Specifically, the bill will require appropriate Federal agencies to conduct a criminal history check on contractor personnel whenever such personnel are to perform a contract on a military installation. The bill also requires that the Secretary of Defense to institute such procedures as the Secretary determines necessary to ensure that contractor personnel are not granted access to a military installation until a criminal history check has been conducted on such contractor personnel and the Secretary concerned has reviewed the information made available as the result of the check.

Finally, the bill specifically authorizes the Federal Government to obtain access to local criminal justice records when conducting the required criminal history check. Such access is permitted only if the person under investigation consents in writing. Additionally, the criminal history information obtained pursuant to the request would be afforded the same protection as provided by the Privacy Act.

Mr. President, the bill will help to ensure that only individuals who are reliable and trustworthy will have access to our military installations. It will safeguard the security of the United States and the welfare of the American people by protecting our military installations from infiltration by would-be espionage agents. Additionally, the bill will help protect against terrorists who would find military installations an attractive target.

Mr. President, I urge the Senate to pass this necessary legislation expeditiously.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1942

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This act may be cited as "Military Installation Security and Antiterrorism Act of 1985".

CONGRESSIONAL FINDINGS

SEC. 2. The Congress finds—

(1) that Congress has the responsibility under the Constitution to provide for the common defense and security of the United States;

(2) that the interests of national security require that the Nation's military installations be secure from access by terrorists and those persons who may engage in espionage against the interest of the United States;

(3) that the increasing threat of terrorist and espionage against the United States is greatly enhanced by the relatively free access available to facilities on military installations;

(4) that the interests of national security require that appropriate Federal agencies conduct a criminal history check on contractor personnel whenever such personnel are to perform a contract on a military installation; and

(5) that the interests of national security require that the Department of Defense have access to criminal history information on contractor personnel referred to in clause (4) in order to determine whether any such personnel should be prohibited from performing a contract on a military installation.

DEFENSE CONTRACTORS

SEC. 3. (a) Chapter 141 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 2407. Contractor security requirements

"(a) In this section—

"(1) 'Criminal justice agency' means—

"(A) a Federal or State court; or

"(B) an agency of the Federal Government or of a State or local government, or a component of any such agency, which (i) performs law enforcement or other criminal justice functions for such government pursuant to law or an Executive order, and (ii) allocates a substantial part of its annual budget to performing such functions.

"(2) 'Criminal history' means, in the case of any person, information which has been collected by a criminal justice agency on that person, including descriptions and notations with regard to the following:

"(A) Arrest.

"(B) Detention.

"(C) Indictment, information, or other formal criminal charge.

"(D) The disposition, if any, of a matter specified in clause (A), (B), or (C).

"(E) Sentencing.

"(F) Correction supervision.

"(G) Release from confinement.

The term also includes fingerprint records and other identifying information on a person if such records or other information has been included in a criminal history record in connection with any action described in clauses (A) through (G) of the first sentence or such records or other information has been used in connection with any such action taken in the case of such person.

"(3) 'State' includes the District of Columbia, the Commonwealth of Puerto Rico, the Northern Mariana Islands, Guam, the Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States.

"(b)(1) Each contract which is to be performed on a military installation shall include a provision which prohibits contractor personnel from performing such contract until (A) a criminal history check has been made on such contractor personnel by one or more appropriate Federal agencies, as determined by the Secretary concerned, and (B) the Secretary has reviewed any information made available as the result of such check.

"(2) The Secretary of Defense shall institute such procedures as the Secretary determines necessary to ensure that contractor personnel are not granted access to a military installation to perform a contract until a criminal history check has been conducted on such contractor personnel and the Secretary concerned has reviewed the information made available as the result of such check.

"(c)(1) Notwithstanding any other provision of Federal law or of any law or regulation of any State or political subdivision of a State, upon receiving a request from the Secretary concerned or the head of any other department or agency of the Federal Government for a criminal history record or any person referred to in subsection (b) and the written consent of the person concerned (as required by subsection (a)), the head of a criminal justice agency shall make available to the Secretary or other head of a department or agency requesting such record any criminal history record maintained by the criminal justice agency on such person.

"(2) A fee charged by a criminal justice agency for furnishing a criminal history record to the Department of Defense or another department or agency of the Federal Government under this subsection may not exceed the fee charged for furnishing such information to such department or agency or any other department or agency of a government referred to in subsection (a)(1)(B) under any other provision of law.

"(d) The Secretary concerned or the head of any other department or agency of the Federal Government may not request, under this section, a criminal history record on any person unless such Secretary or other head of a department or agency has first obtained the person's written consent for the release of any such criminal history record to such Secretary or other head of a department or agency for the purposes of this section.

"(e) A criminal history record obtained by the Secretary concerned or the head of any other department or agency of the Federal Government under this section may not be disclosed except (1) in response to a request referred to in subsection (c), or (2) as provided in section 552a of title 5.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"2407. Contractor security requirements.".

(b)(1) Subsection (b) of section 2407 of title 10, United States Code, as added by such subsection (a), shall apply to contracts awarded on or after the date of the enactment of this Act.

(2) Subsections (c), (d), and (e) of such section shall apply with respect to any request made under such subsection (c) on or after the date of the enactment of this Act.●

By Mr. DIXON:

S. 1943. A bill to amend the Federal Deposit Insurance Act; to the Committee on Banking, Housing, and Urban Affairs.

AGRICULTURAL BANK ASSISTANCE ACT

● Mr. DIXON. Mr. President, I am today introducing the Agricultural Bank Assistance Act of 1985. This legislation is based on S. 1151, the Farm Credit Relief Act, which I introduced, together with my distinguished colleagues, Senators JOHNSTON, PRYOR, SASSER, and RIEGLE, on May 16 of this year.

This bill is more limited than S. 1151. It is an attempt at a compromise,

to ensure that hard-pressed agricultural banks and their farmer-customers get the kind of assistance they need. It is, however, similar in concept to the Farm Credit Relief Act, and it does contain the provisions that are at the core of that legislation.

This bill is an attempt to address part of the crisis that is devastating American agriculture and our rural economy. One of the most troubling aspects of this crisis has been the explosion of farm debt. Farmers now owe more than $215 billion, and the simple truth is that too-low prices for agricultural products means that it is more and more difficult for farmers to service that debt.

Farm prices are down, and the value of farm land has dropped by as much as 40 percent or even more. Bankruptcies, however, are way up, and unless we are able to provide some badly needed assistance, the current appalling bankruptcy rate is likely to go much, much higher.

Unless we act, many of our Nation's full-time farmers will be wiped out. Many of these farmers were able to get a crop into the ground this spring, but without help, its doubtful that many of them will be able to do so next year. The shakiest of these mid-sized farmers owe nearly a third of total farm debt—over $73 billion—an amount that compares with the Latin American debt held by the Nation's largest banks.

Farm debt, however, unlike foreign debt, is not held largely by money center banks. It is held by the Nation's more than 4,200 agricultural banks. These banks are small in size, but they are of vital importance to their communities.

While they do not hold the bulk of long-term debt, agricultural banks are a major source of operating and other short-term loans. According to the Comptroller of the Currency, banks hold about $9 billion of the $112 billion in long-term debt, and they hold almost $40 billion, or about 40 percent of the short-term debt. This is a serious problem because while most farmers have the resources to service their mortgage debt, many can no longer also meet their short-term debt obligations.

Agricultural banks are therefore also under serious strains, and the evidence is that their problems are becoming more severe. We had 79 bank failures last year—the highest number since the Great Depression—and a disproportionate number of those failing were agricultural banks. This trend appears to be continuing. Over 1,100 banks—an all-time record—are on the Federal regulators problem list. There have already been over 100 bank failures this year, many of which were agricultural banks, and there could be as many as 130 or more before the year is out.

This trend is especially troubling because historically agricultural banks are among the strongest in our financial system. Agricultural banks traditionally have a very strong capital base, and they have followed the kind of prudent banking practices that have protected their depositors.

As strong as they are, however, agricultural banks are not immune from a crisis in the overall agricultural economy. There is no way they could be immune. More than 1,700 banks have more than 50 percent of their portfolios in agricultural loans, and that figure greatly understates the true dimensions of the problem since it does not include loans to agribusiness and other rural businesses dependent on a strong and profitable agricultural sector.

What we need, therefore, are solutions directed toward helping both farmers and the agricultural banks that serve them. It makes no sense to help the banks alone if that help does not permit them to continue to play an active role in their local communities. And farmers clearly need help to restructure their debts so that they are not forced off the land or put in the position of being tenant farmers on what was their land.

This bill, Mr. President, is an attempt to provide assistance and needed flexibility for both farmers and their lenders. It does not pretend to be a complete solution to the problems of either, but it will provide needed transitional assistance as more fundamental, long-term solutions are put into place. We need to make it possible for farm exports to begin expanding again. We need to restore the opportunity to make a profit to American farmers. We need to bring interest rates down to more reasonable levels. But all these things will take time; time that many of our farmers and rural financial institutions do not have unless we are able to act soon on appropriate safety net protections.

The provisions of this amendment ought to be a component of this safety net. It will permit banks to negotiate with farmers on appropriate debt restructuring, restructuring that will leave farmers with payments they can meet while bringing the banks greater financial returns than foreclosure would. It helps ensure that farmers aren't forced off their land, and helps the banks retain customers that they want to retain, customers that they have had a good relationship with over the years and who, with this help, will be good customers again. It does not require any bank to act to restructure loans. It simply permits banks to take actions, with the approval of Federal regulators, that banks believe are in their interests and which will benefit hard-pressed but fundamentally sound farmers.

The heart of the legislation is a provision that permits agricultural banks to write down loans from their book value to their fair market value. Banks can do this now, but under current law, they must deduct the amount written off from their capital all at once. Even though agricultural banks are well-capitalized, they cannot withstand losses of this magnitude, so banks are forced to foreclose rather than write down loans. This benefits neither the banks nor the farmers.

Current law forces banks to try not to acknowledge the extent of their problems, because any losses in a loan portfolio must be written off against capital at the time they are recognized. Now in normal business conditions that is sound practice. In the current crisis situation in our agricultural economy, however, the pressure on agriculture bank capital it creates is so great that it actually adds to the problems facing both farmers and banks. Losses on agricultural loans can cause reductions in bank capital. That reduction can force a bank to call in more loans, generating more losses, forcing still further reductions in bank capital, and so on, in a destructive cycle that could destroy both the bank and many basically sound American farmers. At the very least, banks may have to withdraw as lenders to their communities with all the problems that the loss of such a major source of credit always causes.

Amortizing the losses, however, creates an incentive for banks to deal with their problems in a way that can help to minimize those losses. I do not suggest this step lightly. I recognize the seriousness of this proposal. But I believe that the only alternative to this kind of package is direct assistance—and with our budget problems, it is difficult to see how that kind of help could be provided.

The bill also permits eligible banks to amortize their losses on the reduced value of farmland they acquired in the process of handling an agricultural loan where the bank is still holding the property but must write down the asset value of the land on its books. This provision will help reduce the continued downward pressure on agricultural land prices, and assist banks in managing the swollen land portfolios many of them now hold.

Let me say in conclusion that this proposal, if enacted, will work to provide needed assistance for American farmers who deserve our help. It will also provide assistance for agricultural banks, who through no fault of their own, are being squeezed by the ongoing agricultural crisis, permitting these fundamentally sound banks to weather this storm.

The bill has been drastically scaled back from the proposal I offered during consideration of the farm bill.

It can truly be called a compromise. It is however, the best sort of compromise, one that will still work effectively for farmers and bankers.

We have provided special assistance for financial institutions in the past, most recently for foreign loans and for the housing industry. We are assisting the Farm Credit System. I think agricultural banks and their farmer-customers are just as deserving of the assistance of the U.S. Senate. There will be hearings on this legislation, S. 1151, and perhaps other proposals to assist financial institutions in their customers in rural America. I urge my colleagues to join me in working to see that this issue gets the kind of high-priority consideration it needs, and I hope to see early enactment of this legislation in the next session. I ask unanimous consent that an explanation of the bill and a copy of the legislation be included in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1943

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Agricultural Bank Assistance Act of 1985".

SEC. 2. Section 13 of the Federal Deposit Insurance Act (12 U.S.C. 1823) is amended by adding at the end thereof the following:

"(j)(1) The appropriate Federal banking agency shall permit an agricultural bank to take the actions referred to in paragraph (2) if it finds that there is no evidence that fraud or criminal abuse on the part of the bank led to the losses referred to in paragraph (2).

"(2)(A) Any loss on any qualified agricultural loan that an agricultural bank would otherwise be required to show on its annual financial statement for any year between December 31, 1984, and January 1, 1990, may be amortized on its financial statements over a period of not to exceed 10 years, as specified in regulations issued by the appropriate Federal banking agency.

"(B) An agricultural bank may reappraise the value of any real estate or other property, real or personal, that it acquired coincident to the making of a qualified agricultural loan and that it owned on January 1, 1985, and any such additional property that it acquires prior to January 1, 1990. Any loss that such bank would otherwise be required to show on its annual financial statements as the results of such reappraisal may be amortized on its financial statements over a period of not to exceed 10 years, as specified in regulations issued by the appropriate Federal banking agency.

"(3) The appropriate Federal banking agency may issue regulations implementing this subsection with respect to banks that it supervises.

"(4) As used in this subsection—

"(A) the term 'agricultural' means a bank which is significantly involved in agricultural lending, as determined by the appropriate Federal banking agency, and the deposits of which are insured by the Federal Deposit Insurance Corporation; and

"(P) the term 'qualified agricultural loan' means a loan made to finance the production of agricultural products or livestock in the United States, a loan secured by farmland or farm machinery, or such other category of loans as the appropriate Federal banking agency may deem eligible.".

AGRICULTURAL BANK ASSISTANCE ACT OF 1985—EXPLANATION OF PROVISIONS

The bill would permit a commercial bank which is significantly involved in agricultural lending to amortize, over a period up to 10 years, two kinds of losses resulting from its lending activity to agriculture (provided that such losses did not result from fraud or criminal abuse on the part of the bank). The two kinds of losses eligible for multi-year amortization are:

(1) Losses on agricultural loans, whereby in the absence of the bill the bank would have to charge off the entire loss in the immediate year that it is recognized.

Example: An agricultural bank makes an operating loan to a farmer who owes $100,000 on the loan. A bank regulatory agency classifies the loan, so that $30,000 of loss must be recognized by the bank in 1985. Without the bill, the bank must charge off $30,000 in 1985; with the bill, the bank may charge off $3,000 per year during 1985-1994.

(2) Losses on reduced value of property (mostly farmland) which a bank acquired in the process of handling an agricultural loan, whereby the bank still holds the property but must devalue it as an asset.

Example: An agricultural bank acquires 200 acres of farmland in 1984 in a farm debt workout situation. At the time acquired, the land was valued at $2,000 per acre ($400,000), but in 1985 is appraised and revalued at $1,500 per acre ($300,000). Without the bill, the bank asset value of the land would be reduced by $100,000 in 1985; with the bill, the bank may reduce the asset value of the land by $10,000 per year in 1985-1994.

The bill provides for a 5-year period (1985-1989), during which losses that are recognized of the two kinds described above could be stretched out over a period up to 10 years. The bill should result in no cost to the U.S. Treasury, since the banks themselves would absorb the losses over the period of time that is provided.

The amortized farm loan loss accounting will help agricultural banks to remain competitive suppliers of credit to farmers, by permitting the banks to absorb part of their farm lending losses over a period of time sufficient for the agricultural economy and the banks' earnings to have an opportunity to recover. Once the banks' net earnings recovered, the retained earnings and capital position of the agricultural banks could be fully replenished.●

By Mr. SASSER (for himself, Mr. HEINZ, Mr. SARBANES, and Mr. GORE):

S. 1944. A bill to amend titles II and XVI of the Social Security Act to prohibit, in hearings relating to disability benefits, the adversarial involvement of any representative of the Department of Health and Human Services, or any State agency involved; to the Committee on Finance.

SOCIAL SECURITY DISABILITY HEARING ACT

● Mr. SASSER. Mr. President, I rise today to introduce legislation which will greatly improve the Social Security Disability Insurance Program.

Mr. President, in the last 2 years, the Senate has led efforts making sure that the Social Security Disability Program was being administered fairly and efficiently. The Social Security Disability Reform Act of 1984 went a long way toward ensuring that individuals who were, in fact, disabled were granted the disability benefits to which they were rightfully entitled. And we can be proud of this major legislative achievement. But there remains a major flaw in the disability system—a remnant from the days when benefits were wrongly denied because the system was inequitably tilted against claimants.

I am referring to the Social Security Administration's so-called representation project which was initiated by the SSA 3 years ago and which continues today in four offices of hearings and appeals across the country: Baltimore, MD, Pasadena, CA, Columbia, SC, and Kingsport, TN. In a nutshell, the project allowed the Social Security Administration to hire paid adversaries to oppose in both oral and written form the disability claims of individuals at the hearing level of disability adjudication.

This program was originally labeled an experiment designed to increase the efficiency and decrease the costs of Social Security hearing offices. However, the House Select Committee on Aging has examined this program and found that these objectives have not been met. Rather, this project has proven to be unwise, unfair, and unsuccessful. It is unwise because it promotes adversarial proceedings when they are uncalled for. It is unfair because it pits disability claimants against high-powered lawyers. And it is unsuccessful because there are no proven savings or increases in efficiency.

Today, along with my distinguished colleagues, Mr. HEINZ, Mr. SARBANES, and Mr. GORE, I am introducing legislation which will end the use of these so-called representatives who are hired to advocate against individuals' claims for Social Security disability benefits. Our legislation curbs the use of adversarial administrative hearings which have the effect of forcing Social Security claimants to hire their own lawyers if they want to get a fair hearing. It is simply not appropriate for our Social Security Administration to be in the business of defeating claims brought under the Social Security Disability Insurance Program and Supplemental Security Income Program, both entitlement programs.

These disability programs should require only that claimants demonstrate their entitlement to benefits by showing that their condition(s) meet the disability guidelines. Moving beyond this framework toward adversarial proceedings not only violates the intent of the Social Security Act, it violates both the due process and equal protection clauses of the 14th

amendment. If there is a need for additional staff assistance at hearing offices, this need should be met through additional nonadversarial staff, thereby avoiding such violations.

The legislation which we are introducing today prohibits the use of SSA representatives at any level of disability determination at which there is a face-to-face meeting between the SSA or contracted State agency and an individual claimant. It prohibits retroactively to April 9, 1985, the use of such representatives. This date is appropriate because it is the 3-year anniversary of the representation project. In 1982, the SSA announced the program as an experiment. But, after 2 years, the SSA extended the experiment, which had evolved into a project, for "at least 1 year" in order to do further evaluation. This meant that the project could continue indefinitely, and that it could be expanded.

Today, the program has survived well beyond the 1-year extension, and the SSA is already in the process of expanding it to affect more hearing offices and to give the representatives even more power in their advocacy against disability claimants. This planned expansion is occurring despite the House Select Committee on Aging's finding that no savings were forthcoming from the program. Indeed, it appears that the SSA has been trying to secure more time in order to obtain better figures to justify the continued existence and expansion of the program. In view of the absence of administrative savings and equity to disability claimants, these expansion plans must be halted and the program terminated.

Our legislation also addresses the difficulties and hardships which have been generated by this adversarial project. We require the SSA to provide to individuals for whom the SSA's decision to deny or terminate disability benefits was affirmed at a hearing after April 9, 1985, and in which an SSA representative participated, due notice and a 60-day opportunity to request a rehearing on the entitlement of that individual to disability benefits.

At the rehearing, the evidence of disability will be limited to the evidence which was in the record prior to the hearing in which the SSA representative participated. The claimant and the administrative law judge may continue to call upon witnesses as provided in current law. However, no witness may take the role of an advocate for the SSA. The rehearing will simply be a hearing without the use of the SSA representative.

If the individual's claim for benefits is approved at the rehearing, then benefits will be paid retroactively for all months in which benefits would have been payable had the approval of benefits been made at the prior hearing in which the representative participated.

Mr. President, I believe that this legislation will help to ensure that the Social Security disability determination process is fair. It is wrong for us to permit this abuse of administrative power to continue unabated. I urge my colleagues to join as cosponsors to this important piece of legislation. Our legislation is a major step forward in our disability program. It guarantees that our Nation's disabled persons will not face immense and often insurmountable obstacles as they pursue their lawful entitlements.●

By Mr. DURENBERGER (for himself, Mr. LUGAR, and Mr. PELL):

S. 1945. A bill to authorize the expenditure of Polish currencies held by the United States for projects to assist handicapped and orphaned Polish children; to the Committee on Foreign Relations.

ASSISTANCE FOR HANDICAPPED AND ORPHANED POLISH CHILDREN

● Mr. DURENBERGER. Mr. President, it gives me great pleasure to introduce legislation that will further both the foreign policy of the United States and the best humanitarian impulses of the American people, without cost to the taxpayers of our country.

During my trip to Poland this past summer, I became acutely aware of the need to maintain the bonds of friendship between the American and Polish peoples despite our differences with the Polish Government. I also am convinced that it is essential for us to do what we can to strengthen Polish institutions that can moderate the behavior of the regime.

After consulting with the administration, I am today introducing legislation that will help accomplish both of these objectives, as well as advance U.S. humanitarian efforts on behalf of the Polish people. This bill would make available nonconvertible Polish zloties, generated by the sale of surplus U.S. dairy products to Poland since 1981, for use in construction and renovation projects to be undertaken under the auspices of the Charity Commission of the Polish Catholic Episcopate for the benefit of handicapped and orphaned children.

Mr. President, this bill is patterned after Public Law 98-266 of April 17, 1984, which provided in a similar fashion for the Clement J. Zablocki Memorial Outpatient Facility at the American Children's Hospital in Krakow. Unlike that legislation, however, the bill that I have introduced today would not require the appropriation of any U.S. funds.

Mr. President, my bill would make available in amounts to be determined by the United States certain so-called nonconvertible zloties held by the U.S. Government. These Polish currencies can be used only within Poland for Embassy in-country expenses and for humanitarian purposes agreed upon by the Polish and United States Governments. Thus, the renovation and construction projects for which the bill provides will be accomplished without cost to U.S. taxpayers. Moreover, the projects will be undertaken under church auspices, which will advance the U.S. foreign policy goal of strengthening such nongovernmental institutions in Poland. The bill does not constitute or imply an endorsement of the Polish regime. It is designed to carry forward the historic people-to-people friendship between America and Poland, and to benefit orphaned and handicapped children, a worthy cause anywhere.

Mr. President, I am honored to have the distinguished chairman and ranking minority member of the Committee on Foreign Relations as cosponsors of this legislation, and I welcome other Senators to join me in sponsoring this bill.

Mr. President, I ask that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1945

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That such amounts as may be necessary of the Polish currencies held by the United States which have been generated by the sale to Poland of surplus United States dairy products shall be available for construction and renovation projects to be undertaken in Poland under the auspices of the Charity Commission of the Polish Catholic Episcopate for the benefit of handicapped and orphaned children. Such currencies may be utilized without regard to the requirements of section 1306 of title 31, United States Code, or any other provision of law.●

By Mr. WEICKER:

S. 1946. A bill to designate the West Branch of the Farmington River as a study area for inclusion in the National Wild and Scenic Rivers System, and for other purposes; to the Committee on Energy and Natural Resources.

FARMINGTON WILD AND SCENIC RIVER STUDY ACT

Mr. WEICKER. Mr. President, Connecticut ranks fourth among the 50 States in population density, with 647 residents per square mile. Nobody would expect with this population density there could be significant area classified as wild or scenic. Yet in the midst of this urban center, only 12 miles from Hartford, CT's second largest city, there lies a river, the Farmington, that possesses a unique diversity of natural, cultural, historic, and recreational features.

Due to the unique features of the Farmington, the National Park Service included three segments of the river in

the Nationwide Rivers Inventory in 1980. The inventory determines which rivers and river segments are eligible for study and inclusion in the National Wild and Scenic Rivers System. By including the Farmington River, the Park Service recognized the unique resources that demonstrate the river to be of national significance and worthy of conservation.

Among the river's resources are its white water rapids and gorges, undeveloped lands, important sport fisheries, prime agricultural lands, scenic and cultural areas, and buildings and structures that played an historic role in Connecticut and New England.

A mere listing of the characteristics of the Farmington does not do it justice. However, special attention should be paid to the fact that the river is an exceptional recreational resource and one of New England's outstanding sport fisheries. Connecticut's largest trout fishery is supported by the river and the New England River Basins Commission has recognized it as an important cold water fishery.

The Farmington also plays a role in the Connecticut River Basin Atlantic Salmon Restoration Program. Its part in this program could make the Farmington River an important salmon sport fishing area.

The river's recreational potential is immense and its use is growing every year. There is white water canoeing and kayaking through the river's gorges and rapids. One segment of one river, the Tariffville Gorge, is used for the National Olympic Kayaking Trials and the National Poling Championships.

Twenty sites in the river corridor have been recognized as National Historic Landmarks and National Historic Register sites. The Farmington River has come a long way since the 1950's when it was considered an open sewer. In fact, the water quality efforts along the river are now recognized by the Department of Interior as a proven example of intergovernmental and private efforts that have led to the rivers' excellent water quality today. This important job is never complete and there is continued support for ongoing purification efforts along the Farmington.

The Farmington River Watershed Association deserves much of the credit for its efforts over the past 32 years to encourage conservation of the natural resources of the Farmington River and for its many contributions to improve the river's water quality. The association has always been in the forefront of protecting and enhancing the river's resources.

As the Farmington River comes under increased pressure of conflicting interests that could bring deterioration of its unique resources, it is imperative that we maintain, preserve, and protect these resources for the future.

Therefore, I am today introducing legislation, the Farmington Wild and Scenic River Study Act, that would designate the West Branch of the Farmington River as a study area for inclusion in the National Wild and Scenic River System. This bill is nearly identical to legislation introduced in the House by Representative NANCY JOHNSON, H.R. 2191. A minor change has been made in the Senate bill that is intended to promote greater participation in the study by representatives of each of the towns that border along the rivers' banks, and from the two States through which the river flows. This would be accomplished by expanding the membership of the study committee to include; two members appointed by the Governor of the State of Connecticut, at least one of whom shall be a member of the Metropolitan District Commission; two members appointed by the Governor of the Commonwealth of Massachusetts; two members of the Farmington River Watershed Association, and, one member from each of the eight towns located along the west branch of the river, each to be appointed by the governing body of the respective towns.

Mr. President, I am also pleased to add that the proposal to study the west branch of the Farmington River has the unanimous support of the Connecticut communities in the Farmington River Valley.

I urge prompt consideration of this legislation by the Senate.

By Mr. DURENBERGER (for himself and Mr. LEAHY):

S. 1947. A bill to enhance the protection of U.S. interests under the Foreign Missions Act; to the Committee on Foreign Relations.

COVERAGE OF COMMERCIAL ENTITIES UNDER THE FOREIGN MISSIONS ACT

● Mr. DURENBERGER. Mr. President, today I join with the distinguished vice chairman of the Select Committee on Intelligence to introduce legislation to ensure that the national security interests of the United States are safeguarded from the activities of corporations or other commercial entities controlled by foreign elements hostile to our country. The legislation we have introduced would clarify the definition of "foreign mission" in the Foreign Missions Act so as to remove any doubt that such commercial entities can be subjected to the controls in that act.

When Senator LEAHY and I testified before the Permanent Subcommittee on Investigations of the Committee on Governmental Affairs in October on the hostile intelligence services threat to the United States, we emphasized that our adversaries have become adept at using commercial cover and business dealings for espionage purposes, and we cited a number of specific instances in which activities had done damage to our national security.

The Select Committee on Intelligence and the Permanent Subcommittee on Investigations have been focusing on counterintelligence issues throughout the year. Senator ROTH, the distinguished chairman of the Committee on Governmental Affairs and of the Permanent Subcommittee on Investigations, and Senator NUNN, the ranking minority member of that subcommittee, also are members of the Intelligence Committee, and there has been excellent cooperation between the committees as both seek to identify, in concert with the executive branch, actions that can be taken to improve U.S. counterintelligence and security protections.

A number of important steps already have been taken this year, including an expansion of the Foreign Missions Act definition of "foreign mission" that was included in section 127 of the Foreign Relations Authorization Act for fiscal years 1986 and 1987 (Public Law 99-93, August 16, 1985). That change substituted the phrase "mission to or agency in" for the more restrictive term "official mission." Thus, while there may have been ambiguity previously, it now is clear that Foreign Missions Act controls can be applied to Soviet and Warsaw Pact state trading organizations such as the Soviet company AMTORG, because such organizations clearly are foreign government agencies performing governmental activities.

The remaining problem, which Senator LEAHY and I seek to solve with the legislation we have introduced today, involves commercial entities that may not fall under the rubric of an agency or may not, at least ostensibly, be involved in diplomatic, consular, or other governmental activities, even if they are owned or controlled by foreign governments or organizations. The record available to us indicates that such commercial entities are capable of engaging in or providing cover for activities just as inimical to the United States as some of the activities of State trading companies.

In order to prevent potentially dangerous commercial establishments from continuing to avoid Foreign Missions Act controls, our bill makes several changes in the act's definition of "foreign mission." First the phrase "or entity" is added, so that the definition would state that foreign mission means any mission to or agency or entity in the United States. This would permit commercial establishments to be designated as "foreign missions" by categorizing them as "entities" rather than as missions or agencies. Next, the bill would strike the word "governmental" from the text above clause (A) and substitute the

phrase "which is involved in" for the word "involving." This change would enable commercial entities to be subject to Foreign Missions Act restrictions on the basis of their involvement in any "activities" of a foreign government or organization; the current redundent and confusing specification that such activities must be diplomatic, consular, or governmental would be eliminated. Finally, the phrase "or which is substantially owned or effectively controlled by" is added to the definition, so that a commercial entity can also be subjected to Foreign Missions Act restrictions strictly on the basis of an ownership or control test.

We believe that these changes are advisable to clarify the ability of the Secretary of State to apply Foreign Missions Act controls to commercial entities operating in the United States which are involved in the activities of foreign governments or organizations, or which are owned or controlled by such governments or organizations. It is clear that certain of these commercial establishments may be performing activities which pose a threat to U.S. national security. We must give those charged with defending U.S. interests the tools that they need to deal effectively with such threats.

It should be emphasized that the changes made by the bill that Senator LEAHY and I have introduced today would not require application of Foreign Missions Act controls to any commercial establishment. Instead, the bill would enable the Secretary of State to apply such controls in appropriate circumstances. Thus, commercial establishments engaged exclusively in legitimate business activities will not be affected. The bill would impact only on commercial establishments whose activities on behalf of foreign governments or organizations are inimical to U.S. national security interests.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1947

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 202(a)(4) of the State Department Basic Authorities Act of 1956 (22 U.S.C. 4302(a)(4)) is amended to read as follows:

"(4) "foreign mission" means any mission to or agency or entity in the United States which is involved in the diplomatic, consular or other activities of, or which is substantially owned or effectively controlled by—

(A) a foreign government, or

(B) an organization (other than an international organization, as defined in section 209(b) of this title) representing a territory or political entity which has been granted diplomatic or other official privileges and immunities under the laws of the United States or which engages in some aspect of the conduct of the international affairs to such territory or political entity,

including any real property of such a mission and including the personnel of such a mission;".●

By Mr. WEICKER:

S. 1948. A bill to assure that high quality services are furnished to developmentally disabled individuals and mentally ill individuals in residential facilties and by providers of home and community-based services which receive funds under the Medicare or Medicaid Programs, and to amend the Developmental Disabilities Assistance and Bill of Rights Act to require that residential programs meet Medicaid standards; to the Committee on Finance.

QUALITY SERVICES FOR DISABLED INDIVIDUALS ACT

Mr. WEICKER. Mr. President, I rise today to introduce the Quality Services for Disabled Individuals Act. This bill is my second legislative initiative in response to the hearing I chaired this session on the care of institutionized mentally disabled persons, and the 9-month investigation which preceded them. My interest in initiating this investigation was not solely because of my role as chairman of the Subcommittee on the Handicapped. As a parent and a citizen I have been regularly shocked by reports in the media of physical abuse, violence, and death in State facilities for the mentally disabled.

So last year, I initiated an intensive investigation into care and treatment in our Nation's institutions for the mentally disabled. This was a followup to nearly 2 years of hearings, investigations, and other research. What we found was not pretty. What we found was not acceptable. What we found left me, and I think the American public, with a sense of shock and outrage. Right now, in 1985, in the United States, our most vulnerable citizens are routinely victims of abuse, neglect, and serious physical injury, and are forced to live in conditions which we ourselves would not tolerate. What we found is the shame of this great Nation.

In 3 days of testimony before the Subcommittee on the Handicapped and the Appropriations Subcommitte on Labor/HHS/Education, we heard example after example of mistreatment of this Nation's mentally disabled citizens. We heard of misuse and overuse of drugs. We heard of physical violence, of rape, of unexplained death. We heard of young people tied naked to the floor in four-point restraints for days. We heard of filthy living conditions and received testimony about conditions in which a retarded boy who developed a near-fatal brain infection after periods when he was observed chewing on a urine soaked stocking and crawling through human feces. We heard of a human being, who happened to be retarded, being confined to a shower stall for 3 years with nothing but a thin cotton sheet between his naked body and the tile floor. We heard of residents denied water and food so that they suffered from malnutrition.

Yes, this is the Nation's shame. But even more, it is the shame of this esteemed body and the Federal Government that supports these institutions by certifying them as acceptable and funding them with Federal dollars.

You might ask how this can happen. I certainly did. I asked how our Federal system of monitoring to assure quality care in programs receiving Federal funds could allow such conditions to exist. After all, when we provided for Federal audits of institutional care as part of Federal funding, we expected our tax money would be linked directly to quality care.

But that is not the case. Indeed the monitoring of State facilities is minimal and ineffective and focuses on paperwork rather than people. For the most part, States certify their own facilities as acceptable for receipt of Federal funds. And while statutory authority exists for the Department of Health and Human Services to "look-behind" or validate the State certification decision, such validation reviews have been limited and do not ensure timely corrections when deficiencies are identified. In fact, many facilities have repeated deficiencies yet still maintain their certification. At our hearings, a nurse told us of a State hospital operating below "minimally acceptable standards" for 2 consecutive years. Still no action was taken by State or Federal officials.

A system based on such a conflict of interest cannot work. Indeed we have documented that it is not working. And we in the Congress cannot allow our precious tax revenues to be spent in facilities that strip the very essence of citizenship from disabled Americans. We cannot allow individual State agencies to be the sole authority to tap the U.S. Treasury when that money is spent in facilities that include in their list of abuses a trampling of basic human rights.

Today I introduce a bill to remedy this situation.

The Quality of Services for Disabled Individuals Act has been developed, after months of research and lengthy discussions, to remedy the problems identified during the staff investigation and hearings. Its purpose is simple: To create a mechanism to ensure that disabled individuals receive quality services in programs receiving Federal funds—quality services that enables them to achieve their maximum potential through increased independence, productivity, and integration into the community. The qual-

ity services bill accomplishes this by establishing a system of monitoring and certification that removes the existing conflict of interest in the certification process, and creates a new client-centered survey system for certification to replace the current paper-centered survey. It centralizes within the Department of Health and Human Services the responsibilities for assuring quality of services furnished to disabled persons in programs receiving funds through titles 18 and 19 of the Social Security Act, so that coordinated leadership, guidance, and support for such services will be available. And it creates financial incentives for States to develop a range of community programs so that institutionalization can be prevented or reduced, so that our disabled citizens can be under the watchful eye of their neighbors with the community supports they need and deserve.

We must be clear about the Federal Government's responsibilities—our responsibilities—to the vulnerable citizens of this country. We must create a mechanism to ensure quality services—in the institutions, in the hospitals, and in the communities, so that our successors 10 years from now will not hear the same tragic stories that we hear today.

The Quality Services for Disabled Individuals Act will accomplish this goal.

I urge my colleagues to examine the record on this issue and join me in this vital and important reform. I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1948

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Quality Services for Disabled Individuals Act of 1985".

SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress finds that—

(1) institutionalized developmentally disabled individuals and mentally ill individuals in this country frequently live in substandard conditions and are vulnerable to abuse and neglect;

(2) the Federal Government does not have an adequate system of quality assurance for services furnished to developmentally disabled individuals and mentally ill individuals through the Medicaid and Medicare programs, and that, specifically—

(A) current law governing certification of institutions for developmentally disabled individuals and psychiatric hospitals for mentally ill individuals is inadequate, and creates a conflict of interest by allowing the State to certify that facilities which it operates meet Federal requirements;

(B) State surveys for certification, and validation surveys performed by the Secretary of Health and Human Services, focus on written policies and plans and do not measure the actual provision of services to residents; and

(C) validation surveys by the Secretary of Health and Human Services are limited in number and do not ensure timely corrections when deficiencies are identified; and

(3) substantial amounts of Medicaid dollars are spent in large institutions, and there is little Federal financial incentive for States to create smaller alternative settings.

(b) PURPOSE.—(1) It is the overall purpose of this Act to amend titles XVIII and XIX of the Social Security Act to—

(A) assure that individuals with developmental disabilities or mental illness receive the quality services necessary to enable them to achieve their maximum potential through increased independence, productivity, and integration into the community; and

(B) establish and operate a system for monitoring the provision of such services to eligible individuals.

(2) The specific purposes of this Act are—

(A) to centralize within the Department of Health and Human Services the responsibilities for assuring the quality of services furnished to developmentally disabled individuals and mentally ill individuals under titles XVIII and XIX of the Social Security Act;

(B) to create quality assurance mechanisms in the survey and certification of providers of services for such individuals under such titles in order to ensure that appropriate services are furnished to promote the independence, productivity, and integration of such individuals into society; and

(C) to create incentives for States to include home and community-based services for such individuals under their Medicaid programs.

TITLE I—BUREAU OF QUALITY SERVICES

SEC. 101. BUREAU OF QUALITY SERVICES.

Title XIX of the Social Security Act is amended by adding at the end thereof the following new section:

"BUREAU OF QUALITY SERVICES

"SEC. 1919. (a) ESTABLISHMENT OF BUREAU.—(1) The Secretary shall establish, within the Health Care Financing Administration, a Bureau of Quality Services for Developmentally Disabled Individuals and Mentally Ill Individuals (hereafter in this section referred to as the 'Bureau'). The Bureau shall be the principal office in the Department of Health and Human Services for administering and carrying out programs relating to the furnishing of quality services to developmentally disabled individuals and mentally ill individuals under this title and title XVIII, in order to promote their independence, productivity, and integration into the community, and to provide coordinated leadership, guidance, and support for such services.

"(2) The Bureau shall be headed by a Director who shall be appointed by the Secretary. Such position shall be placed in grade ES-4, and shall be designated a career reserved position in the Senior Executive Service. The Director shall have training and experience in the furnishing of services to developmentally disabled individuals and mentally ill individuals.

"(3) The Secretary shall establish within the Bureau an Office of Quality Service for Developmentally Disabled Individuals, which shall be headed by a Director who shall be appointed by the Secretary in consultation with the Bureau Director. Such position shall be placed in grade GS-15 of the General Schedule. Such Director shall have training and experience in the furnishing of services to developmentally disabled individuals.

"(4) The Secretary shall establish within the Bureau an Office of Quality Service for Mentally Ill Individuals, which shall be headed by a Director who shall be appointed by the Secretary in consultation with the Bureau Director. Such position shall be placed in grade GS-15 of the General Schedule. Such Director shall have training and experience in the furnishing of services to mentally ill individuals.

"(5) The additional staffing of the Bureau and its divisions shall be in sufficient numbers to meet program needs, and at levels which will attract and maintain the most qualified personnel. Such staff shall include individuals who have training and experience in the provision of services to developmentally disabled individuals, and individuals who have training and experience in the provision of services to mentally ill individuals.

"(6) The Bureau shall be established and staffed within 6 months after the date of the enactment of this section.

"(b) DUTIES AND RESPONSIBILITIES.—The Bureau shall—

"(1) make a determination, within 30 days, to certify, decertify, or terminate participation of residential facilities based on the surveys conducted by the States pursuant to section 1922;

"(2) oversee regional offices of the Department of Health and Human Services in the certification process for residential facilities which furnish services under State plans approved under this title to developmentally disabled individuals or mentally ill individuals or which furnish services under title XVIII to mentally ill individuals;

"(3) perform surveys of such facilities and other providers if the State does not satisfactorily perform such surveys in accordance with section 1922;

"(4) receive and review the findings and recommendations of the State survey agencies established under section 1922 and of any other reviews of such facilities and other providers, and consider such findings and recommendations in the certification process and validation surveys for such facilities and other providers;

"(5) conduct independent validation surveys of residential facilities and providers of home and community-based services which furnish services under State plans approved under this title to developmentally disabled individuals, including annual surveys of—

"(A) 100 percent of such residential facilities which have 300 or more beds;

"(B) 40 percent of such residential facilities which have more than 15 but less than 300 beds;

"(C) 20 percent of such residential facilities which have 15 beds or less;

"(D) 30 percent of the providers which furnish home and community-based services; and

"(E) 100 percent of such residential facilities and other providers which have serious deficiencies or repeated deficiencies noted in previous State or Federal surveys;

"(6) conduct independent annual validation surveys of—

"(A) 100 percent of the psychiatric hospitals (and distinct parts of hospitals which qualify as psychiatric hospitals) which furnish services under title XVIII, or under State plans approved under this title, to mentally ill individuals; and

"(B) 50 percent of other residential facilities and other providers which furnish home and community-based services under

such State plan to mentally ill individuals, including 100 percent of such providers which have serious or repeated deficiencies noted in previous State or Federal surveys;

"(7) with the Assistant Secretary of Education for Special Education and Rehabilitative Services and with the Commissioner of the Administration on Developmental Disabilities—

"(A) jointly develop, within 12 months after the date of the enactment of this section, standards for residential facilities which furnish services under the State plan to developmentally disabled individuals, as required by section 1920(a); and

"(B) jointly develop, within 18 months after the date of the enactment of this section, survey procedures and a training curriculum for surveyors who conduct surveys under section 1922 of residential facilities and providers of home and community-based services which furnish services under State plans approved under this title to developmentally disabled individuals;

"(8) with the Assistant Secretary of Education for Special Education and Rehabilitative Services and with the Director of the National Institute of Mental Health—

"(A) jointly develop, within 12 months after the date of the enactment of this section, standards for residential facilities which furnish services under the State plan to mentally ill individuals, as required by section 1921(a); and

"(B) jointly develop, within 18 months after the date of the enactment of this section, survey procedures and a training curriculum for surveyors who conduct surveys under section 1922 of residential facilities and providers of home and community-based services which furnish services under title XVIII or under State plans approved under this title to mentally ill individuals;

"(9) implement, oversee, and evaluate the effectiveness of, the training programs for State surveyors established under sections 1920(c) and 1921(c);

"(10) review provisions of State plans (and amendments thereto), and make recommendations with respect to the approval of such provisions or amendments, to furnish home and community-based services for developmentally disabled individuals or mentally ill individuals under sections 1920(d) and 1921(d), and establish and implement a monitoring system to evaluate the furnishing of services pursuant to such sections; and

"(11) advise the Secretary with respect to all aspects of the policies implemented under this title and title XVIII which may have an impact on developmentally disabled or mentally ill individuals, and recommend policy initiatives and modifications as necessary in order to improve overall services under this title and title XVIII in order to promote the independence, productivity, and integration into the community of developmentally disabled individuals and mentally ill individuals.".

TITLE II—QUALITY SERVICES FOR DEVELOPMENTALLY DISABLED INDIVIDUALS.

SEC. 201. STANDARDS AND TRAINING.

(a) Title XIX of the Social Security Act is amended by adding after section 1919 (as added by section 101 of this Act) the following new section:

"QUALITY SERVICES FOR DEVELOPMENTALLY DISABLED INDIVIDUALS

"SEC. 1920. (a) STANDARDS FOR RESIDENTIAL FACILITIES.—(1) The Secretary shall establish standards, within 12 months after the date of the enactment of this section, which shall apply to all residential facilities which furnish services under a State plan under this title to developmentally disabled individuals. Such standards shall be developed jointly by the Secretary, the Assistant Secretary of Education for Special Education and Rehabilitative Services, and the Commissioner of the Administration on Developmental Disabilities.

"(2) The standards shall be developed on the basis of the following principles:

"(A) Services shall be furnished based on individual needs and shall be systematically organized to assure optimal individual development and independent functioning.

"(B) Services shall be furnished in accordance with the requirements of an individualized habilitation plan which reflects the needs of the individual in all areas of independent functioning, including (but not limited to) health and physical development, independent living skills, receptive and expressive communication skills, cognitive learning, mobility, self-direction, socialization skills, leisure skills, vocational and work skills, and use of integrated community services.

"(C) Services shall be furnished in a manner which will maximize opportunities for interaction between disabled and nondisabled individuals.

"(D) Physical facilities used for the purpose of habilitation or living shall comply with the applicable standards governing fire safety, health, and sanitation.

"(E) Community-based facilities used for the purpose of living shall have interior and exterior features comparable to those of other residences in the local surrounding area which are occupied by nondisabled individuals.

"(F) Active treatment shall be furnished.

"(3) For purposes of this subsection, the term 'active treatment' means treatment which—

"(A) requires the furnishing of health-related and habilitative services;

"(B) requires the individual's regular participation in a program of service enabling the individual to achieve maximum potential through increased independence, productivity, and integration into the community (as defined in paragraphs (8), (9), and (10) of section 102 of the Developmental Disabilities Assistance and Bill of Rights Act (42 U.S.C. 6001)); and

"(C) is specified within an individualized, written habilitation plan which—

"(i) is developed by an interdisciplinary team of professionals, the individual, and, where appropriate, such individual's parents, guardian, or other representative;

"(ii) is based on a comprehensive assessment of the individual's health, behavioral, therapeutic, and comprehensive habilitative service needs, including (but not limited to) consideration of independent living skills, receptive and expressive communication skills, cognitive learning, mobility, self-direction, socialization skills, leisure skills, vocational and work skills, and use of integrated community services; and

"(iii) is reevaluated at least annually by the agency primarily responsible for the delivery of services to such individual, with participation by such individual and his parents, guardian, or other representative, in order to determine the appropriateness and effectiveness of the services being furnished.

"(4) For purposes of this subsection, the term 'habilitative services' means any services designed to assist individuals in acquiring, retaining, and improving self-help, socialization, and adaptive skills, including (but not limited to) prevocational, vocational, educational, and supported employment services.

"(5) For purposes of this section, section 1919, and section 1922, the term 'developmentally disabled individual' means an individual who has a developmental disability as defined in section 102(7) of the Developmental Disabilities Assistance and Bill of Rights Act (42 U.S.C. 6001(7)).

"(b) STATE ASSURANCES.—As a condition of participation under this title, the State must make assurances satisfactory to the Secretary that—

"(1) the State will fully implement the Bill of Rights for the Developmentally Disabled as specified in section 110 of the Developmental Disabilities Assistance and Bill of Rights Act (42 U.S.C. 6009); and

"(2) the State will furnish access to all residential facilities providing services under the State plan to developmentally disabled individuals by the Protection and Advocacy Program for the Developmentally Disabled, established under section 142 of the Developmental Disabilities Assistance and Bill of Rights Act (42 U.S.C. 6042).

"(c) TRAINING OF SURVEY PERSONNEL.—(1) The Secretary, through the Bureau of Quality Services established under section 1919, shall, with the Assistant Secretary of Education for Special Education and Rehabilitative Services and the Commissioner of the Administration on Developmental Disabilities—

"(A) jointly develop, within 18 months after the date of the enactment of this section, a standard training curriculum for State personnel who perform surveys under section 1922 of residential facilities and providers of home and community-based services which furnish services under the State plan to individuals with developmental disabilities; and

"(B) jointly establish, within 18 months after the date of the enactment of this section, standard procedures for conducting surveys of such facilities and other providers.

The training curriculum and survey procedures shall include evaluation of the furnishing of active treatment as required under subsection (a)(2)(F) of this section.

"(2) Using the curriculum developed under paragraph (1)(A), the Secretary, through the Bureau of Quality Services, shall establish, within 18 months after the date of the enactment of this section, regional training centers for providing training to State personnel who conduct surveys of such facilities and other providers. Training at such centers shall be furnished by contracts awarded on a competitive basis. Such contracts may be awarded only to applicants who have demonstrated experience and competence in the training of specialists in the field of developmental disabilities.".

SEC. 202. HOME AND COMMUNITY-BASED SERVICES FOR DEVELOPMENTALLY DISABLED INDIVIDUALS.

Section 1920 of the Social Security Act (as added by section 201 of this Act) is amended by adding at the end thereof the following new subsection:

"(d) HOME AND COMMUNITY-BASED SERVICES.—(1) Each State shall include under its State plan home and community-based services for developmentally disabled individuals in accordance with this subsection.

"(2)(A) For purposes of this subsection, the term 'home and community-based services' means—

"(i) case management;

"(ii) services of a homemaker or home health aide;

"(iii) personal care, including attendant care;

"(iv) adult day health services;

"(v) habilitative and rehabilitative services;

"(vi) respite care; and

"(vii) any other services which the Secretary approves, excluding room and board.

"(B) For purposes of this subsection, the term 'habilitative services' means habilitative services (as defined in subsection (a)(4)) necessary to successfully reside in home or community-based settings.

"(3) Any State which includes home and community-based services under this subsection must—

"(A) furnish assurances satisfactory to the Secretary that the State will—

"(i) maintain at least its fiscal year 1985 level of funding in supporting similar services for eligible and potentially eligible developmentally disabled individuals through available State and local funding sources;

"(ii) restrict such services to those developmentally disabled individuals who, in the absence of such services, would require placement in long-term care institutions for which payment would be made under the State plan, the average per capita cost of which is estimated to be equal to or greater than the proposed home and community-based care alternative; and

"(iii) institute necessary safeguards to protect the health and welfare of developmentally disabled individuals receiving services under this subsection, including licensing or certification standards and furnishing of active treatment as defined in subsection (a)(3); and

"(B) submit to the Secretary a comprehensive plan which—

"(i) establishes an identification and screening process for potentially eligible developmentally disabled individuals;

"(ii) establishes appropriate level of care criteria which will ensure placement which meets individual needs, and maximizes opportunities for independence, productivity, and integration into the community;

"(iii) establishes a preadmission screening program to prevent unnecessary institutionalization;

"(iv) outlines a strategy for developing the required home and community-based resources;

"(v) specifies a strategy for coordinating the activities of State and local agencies responsible for achieving these objectives;

"(vi) outlines procedures to assure that developmentally disabled individuals are guaranteed procedural due process safeguards in the provision of services under the State plan, comparable to the procedures required under section 615 of the Education of the Handicapped Act; and

"(vii) is approved by the State Developmental Disabilities Council.

"(4) The Secretary shall approve any services furnished under this subsection if the State meets the requirements of this subsection. The Secretary may not—

"(A) impose any restriction on the number of individuals who receive home and community-based services under this subsection;

"(B) limit the manner in which the State compares the costs of home and community-based services versus institutional services for purposes of paragraph (3)(A)(ii); or

"(C) delay action or approval of any provision of the State plan (or amendment thereto) to furnish services under this subsection beyond 90 days after the date on which the provision or amendment is submitted.".

TITLE III—QUALITY SERVICES FOR MENTALLY ILL INDIVIDUALS

SEC. 301. STANDARDS AND TRAINING.

Title XIX of the Social Security Act is amended by adding after section 1920 (as added by title II of this Act) the following new section:

"QUALITY SERVICES FOR MENTALLY ILL INDIVIDUALS

"SEC. 1921. (a) STANDARDS FOR RESIDENTIAL FACILITIES.—(1) The Secretary shall establish standards, within 18 months after the date of the enactment of this section, which shall apply to all residential facilities which furnish services under title XVIII or under a State plan under this title to mentally ill individuals. Such standards shall be jointly developed by the Secretary, the Assistant Secretary of Education for Special Education and Rehabilitative Services, and the Director of the National Institute of Mental Health.

"(2) The standards shall include the requirement that active treatment be furnished for all mentally ill individuals receiving services in the facility.

"(3) For purposes of paragraph (2), the term 'active treatment' means that—

"(A) an individualized, goal-oriented, written plan of services, developed by an interdisciplinary team of mental health professionals and members of other appropriate disciplines, and with the participation of the mentally ill individual, shall be developed within 5 days after admission to the facility, based on—

"(i) daily interviews with the patient for the first 5 days after admission;

"(ii) a thorough diagnosis and assessment of the individual's medical, psychological, behavioral, and current functional status; and

"(iii) consultation with family members and legal guardians; and

"(B) the written plan of services developed under subparagraph (A) shall—

"(i) be designed to improve the symptoms which necessitated placement in a residential facility and improve the individual's level of functioning;

"(ii) prescribe an integrated program of therapies, activities, and experiences to assure optimal individual development and enhance independence, productivity, and integration into the community (as defined in paragraphs (8), (9), and (10) of section 102 of the Developmental Disabilities Assistance and Bill of Rights Act (42 U.S.C. 6001));

"(iii) include postdischarge plans and coordination of residential services with related community services to ensure continuity of care, including assistance in applying for public benefits to which the individual may be entitled;

"(iv) include documentation of all treatments administered, as well as an assessment of the individual's response to such treatments, which shall be included in the individual's medical record in a manner and frequency which enables the treatment team to evaluate the effectiveness of such treatments;

"(v) require that all treatment and therapeutic activities be administered or supervised by a qualified mental health professional; and

"(vi) be reviewed and modified as needed, but not less often than every 30 days, with the active participation of the mentally ill individual in such reviews.

"(b) STATE ASSURANCES.—As a condition of participation under this title, the State must make assurances satisfactory to the Secretary that—

"(1) the State will fully implement the Bill of Rights for the Mentally Ill as specified in the provisions of S. 974 (99th Congress, 1st Session) as such bill was passed by the Senate; and

"(2) the State will furnish access to all residential facilities providing services under the State plan to mentally ill individuals by the Protection and Advocacy Program for the Mentally Ill, as established under such bill S. 974.

"(c) TRAINING OF SURVEY PERSONNEL.—(1) The Secretary, through the Bureau of Quality Services established under section 1919, the Assistant Secretary of Education for Special Education and Rehabilitative Services, and the Director of the National Institute of Mental Health shall—

"(A) jointly develop, within 18 months after the date of the enactment of this section, a standard training curriculum for State personnel who perform surveys under section 1922 of residential facilities and providers of home and community-based services which furnish services under title XVIII or under the State plan to mentally ill individuals; and

"(B) jointly establish, within 18 months after the date of the enactment of this section, standard procedures for conducting surveys of such facilities and other providers.

The training curriculum and survey procedures shall include evaluation of the furnishing of active treatment as required under subsection (a)(3) of this section.

"(2) Using the curriculum developed under paragraph (1)(A), the Secretary, through the Bureau of Quality Services, shall, within 18 months after the date of the enactment of this section, establish regional training centers for providing training to State personnel who conduct surveys of such facilities and other providers. Training at such centers shall be furnished by contracts awarded on a competitive basis. Such contracts may be awarded only to applicants who have demonstrated experience and competence in the training of specialists in the field of mental illness.".

SEC. 302. HOME AND COMMUNITY-BASED SERVICES FOR MENTALLY ILL INDIVIDUALS.

Section 1921 of the Social Security Act (as added by section 301 of this Act) is amended by adding at the end thereof the following new subsection:

"(d) HOME AND COMMUNITY-BASED SERVICES.—(1) Any State may include under its State plan home and community-based services for mentally ill individuals in accordance with this subsection.

"(2)(A) For purposes of this subsection, the term 'home and community-based services' means—

"(i) case management;

"(ii) specialized, prevocational and vocational services to enhance independence, productivity, and community integration of mentally ill individuals, including employment training, support necessary to maintain the employment of such individuals, and other training and therapeutic activities;

"(iii) day mental health treatment and services;

"(iv) habilitative and rehabilitative services;

"(v) respite care; and

"(vi) any other services which the Secretary approves, excluding room and board.

"(3) Any State which includes home and community-based services under this subsection must—

"(A) furnish assurances satisfactory to the Secretary that the State will—

"(i) maintain at least its fiscal year 1985 level of funding in supporting similar services for eligible and potentially eligible mentally ill individuals through available State and local funding sources;

"(ii) restrict such services to those mentally ill individuals who, in the absence of such services, would require placement in residential facilities for which payment would be made under title XVIII or under the State plan, the average per capita cost of which is estimated to be equal to or greater than the proposed home and community-based care alternative; and

"(iii) institute necessary safeguards to protect the health and welfare of mentally ill individuals receiving services under this subsection, including licensing or certification standards and provision of active treatment as defined in subsection (a)(3); and

"(B) submit to the Secretary a comprehensive plan which—

"(i) establishes an identification and screening process for potentially eligible mentally ill individuals;

"(ii) establishes appropriate level of care criteria which will ensure placement which meets individual needs, and maximizes opportunities for independence, productivity, and integration into the community;

"(iii) establishes a preadmission screening program to prevent unnecessary hospitalization or institutionalization;

"(iv) outlines a strategy for developing the required home and community-based resources;

"(v) specifies a strategy for coordinating the activities of State and local agencies responsible for achieving these objectives; and

"(vi) outlines procedures to assure that mentally ill individuals are guaranteed procedural due process safeguards in the provision of services under the State plan.

"(4) The Secretary shall approve any services furnished under this subsection if the State meets the requirements of this subsection. The Secretary may not—

"(A) impose any restriction on the number of individuals who receive home and community-based services under this subsection;

"(B) limit the manner in which the State compares the costs of home and community-based services versus institutional services for purposes of paragraph (3)(A)(ii); or

"(C) delay action or approval of any provision of the State plan (or amendment thereto) to furnish services under this subsection beyond 90 days after the date on which the provision or amendment is submitted.".

TITLE IV—STATE SURVEYS AND CERTIFICATIONS

SEC. 401. STATE SURVEYS AND CERTIFICATIONS OF RESIDENTIAL FACILITIES AND OTHER PROVIDERS FURNISHING SERVICES TO DEVELOPMENTALLY DISABLED OR MENTALLY ILL INDIVIDUALS.

Title XIX of the Social Security Act is amended by adding after section 1921 (as added by title III of this Act) the following new section:

"STATE SURVEYS AND CERTIFICATIONS OF FACILITIES AND OTHER PROVIDERS FURNISHING SERVICES TO DEVELOPMENTALLY DISABLED OR MENTALLY ILL INDIVIDUALS

"SEC. 1922. (a) DESIGNATION OF STATE SURVEY AGENCY.—(1) The State shall designate a State survey agency which shall be responsible for conducting surveys in accordance with subsection (b) of all residential facilities and providers of home and community-based services in the State which receive payments under the State plan for services furnished to developmentally disabled individuals or mentally ill individuals, and all residential facilities in the State which receive payments under title XVIII for services furnished to mentally ill individuals.

"(2) The State survey agency designated under paragraph (1) must—

"(A) have sufficient personnel who are adequately trained to carry out the required surveys and are experienced in providing services to developmentally disabled individuals, and have sufficient personnel who are adequately trained to carry out the required surveys and are experienced in providing services to mentally ill individuals;

"(B) not have any responsibility for operating or financing any residential facility or other provider which receives funds under the State plan or under title XVIII; and

"(C) have sufficient authority under State law to carry out all activities required of such agency under this section.

"(b) RESPONSIBILITIES OF STATE SURVEY AGENCY.—(1) The State survey agency shall—

"(A) conduct annual surveys of all residential facilities and providers of home and community-based services in the State which furnish services under the State plan to developmentally disabled individuals, using one or more survey teams each of which is headed by a professional skilled in the field of services for developmentally disabled individuals;

"(B) conduct annual surveys of all residential facilities and providers of home and community-based services in the State which furnish services under the State plan to mentally ill individuals, and all residential facilities in the State which furnish services under title XVIII to mentally ill individuals, using one or more survey teams each of which is headed by a professional skilled in the field of services for mentally ill individuals;

"(C) receive and review the findings of utilization reviews, independent professional reviews, and inspections of care, carried out pursuant to paragraphs (26), (30), and (31) of section 1902(a), and consider such findings in making recommendations under subparagraph (D);

"(D) make recommendations to the Secretary on the basis of the surveys and other findings with respect to whether any facility or other provider surveyed should be certified or decertified for participation under the State plan and under title XVIII; and

"(E) furnish technical assistance to such facilities and other providers with respect to compliance with applicable Federal and State standards for participation under the State plan and under title XVIII.

"(2) Surveys conducted pursuant to paragraph (1) shall examine compliance by the facility or other provider with all requirements applicable under the State plan and title XVIII, including compliance with the standards established pursuant to sections 1919, 1920, and 1921.".

TITLE V—MISCELLANEOUS PROVISIONS

SEC. 501. CONFORMING AMENDMENTS.

(a) STATE PLAN REQUIREMENTS.—(1) Section 1902(a) of the Social Security Act is amended—

(A) by striking out "and" at the end of paragraph (45);

(B) by striking out the period at the end of paragraph (46) and inserting in lieu thereof "; and"; and

(C) by inserting after paragraph (46) the following new paragraph:

"(47) provide that the State will comply with the requirements of (and standards established under) sections 1920, 1921, and 1922 with respect to services for developmentally disabled individuals and mentally ill individuals.".

(2) Section 1902(a)(33)(B) of such Act is amended—

(A) by inserting "or, if applicable under section 1922, the State survey agency designated under such section," before "will perform"; and

(B) by inserting ", using the Bureau established under section 1919 where appropriate," after "to validate State determinations".

(3) Section 1903(g)(2) of such Act is amended by adding at the end thereof the following: "Such surveys shall, in the case of facilities providing services to developmentally disabled or mentally ill individuals, be carried out as provided in section 1922.".

(b) DEFINITIONS OF PSYCHIATRIC HOSPITAL.—(1) Section 1861(f)(4) of such Act is amended by striking out "to carry out an active program of treatment" and inserting in lieu thereof "to provide active treatment (as defined in section 1921(a)(3))".

(2) Section 1905(h)(1)(B) of such Act is amended to read as follows:

"(B) inpatient services which involve active treatment as defined in section 1921(a)(3); and".

(c) DEFINITION OF INTERMEDIATE CARE FACILITY SERVICES.—Section 1905(d) of the Social Security Act is amended by striking out all that precedes paragraph (3) and inserting in lieu thereof the following:

"(d) The term 'intermediate care facility services' may include services in a public institution (or distinct part thereof) for developmentally disabled individuals if—

"(1) the primary purpose of such institution (or distinct part thereof) is to furnish health or habilitative services to developmentally disabled individuals, and the institution meets the requirements of section 1920(a);

"(2) the developmentally disabled individual with respect to whom a request for payment is made under the plan is receiving active treatment as defined in section 1920(a)(3); and".

(d) MODIFICATION OF WAIVER PROVISIONS.—Section 1915(c) of the Social Security Act is amended by adding at the end thereof the following new paragraph:

"(5) Effective at such time as the provisions of sections 1920(d) and 1921(d) are implemented, waivers under this subsection shall not apply to home and community-based services provided to developmentally disabled individuals or mentally ill individuals; except that any waiver in effect under this subsection at the time such sections are implemented with respect to services for such individuals may remain in effect until the expiration of such waiver.".

(e) INDEPENDENT PROFESSIONAL REVIEWS AND UTILIZATION REVIEWS.—(1) Section 1902(a)(26)(C) of the Social Security Act is amended by inserting after "the State agency" the following: ", the State survey agency established under section 1922(a), and the Bureau of Quality Services established under section 1919,".

(2) Section 1902(a)(30)(B) of such Act is amended—

(A) by striking out "and" at the end of clause (i);

(B) by striking out the semicolon at the end of clause (ii) and inserting in lieu thereof ", and"; and

(C) by adding at the end thereof the following new clause:

"(iii) the information and data referred to in clause (ii) which relates to developmentally disabled individuals or mentally ill individuals shall be reported to the State survey agency established under section 1922(a) and to the Bureau of Quality Services established under section 1919;".

(3) Section 1902(a)(31)(C) of such Act is amended by inserting after "State agency" the following: "(and in the case of services furnished to developmentally disabled individuals or mentally ill individuals, to the State survey agency established under section 1922(a) and to the Bureau of Quality Services established under section 1919)".

(f) STANDARDS FOR RESIDENTIAL PROGRAMS.—Section 110(4)(A) of the Developmental Disabilities Assistance and Bill of Rights Act (42 U.S.C. 6009(4)(A)) is amended by striking out "on January 17, 1974 (39 Fed. Reg. pt. II)" and inserting in lieu thereof "pursuant to section 1920 of the Social Security Act".

SEC. 502. EFFECT OF ACCREDITATION.

Section 1865(b) of the Social Security Act is amended by inserting "(1)" after "(b)" and by adding at the end thereof the following new paragraph:

"(2) Notwithstanding any other provision of this title or title XIX, any institution (or distinct part thereof) shall not be deemed to meet the health and safety standards required for certification as a psychiatric hospital under section 1861(f) by reason of its accreditation by the Joint Commission on Accreditation of Hospitals.".

SEC. 503. EFFECTIVE DATE.

The amendments made by this Act shall become effective on the date of the enactment of this Act.●

By Mr. DENTON (for himself and Mr. LEAHY):

S.J. Res. 249. Joint resolution to proclaim October 23, 1986, as "A Time of Remembrance" for all victims of terrorism throughout the world; to the Committee on the Judiciary.

A TIME OF REMEMBRANCE

● Mr. DENTON. Mr. President, I rise today, along with my distinguished colleague and the ranking minority member of the Senate Judiciary Subcommittee on Security and Terrorism, Senator PATRICK J. LEAHY, to introduce a joint resolution proclaiming October 23, 1986, as "A Time of Remembrance" for all victims of terrorism throughout the world.

We have recently seen several acts of terrorism that resulted in the death of American citizens.

In June, the bloody terrorist assault on an outdoor cafe in El Salvador left four U.S. marines and two other Americans dead.

Also in June, the hijacking of TWA Flight 847 resulted in the death of Robert Dean Stethem, a member of the U.S. Navy.

Also, in October, we learned of the despicable and cowardly slaying of Leon Klinghoffer on board the *Achille Lauro.*

Most recently, we learned of the death of Scarlett Marie Rogenkamp, a passenger aboard Egypt Air Flight 648.

We are continually reminded by events such as those that America and its citizens are the primary target of international terrorists.

I know that we can do nothing to bring back the brave people who have lost their lives to terrorism, nor can we mitigate the losses suffered by their loved ones. We can, however, take the time to remember and honor the victims of terrorism throughout the world, and to let their friends and loved ones know that our remembrance of the victims will serve to strengthen our resolve to fight terrorism with all of our strength.

Mr. President, I am confident that we will win the fight against terrorism. We will win because, as my good friend and colleague from Vermont, Mr. LEAHY, has said, "Our love and strength is greater than their hate."

The Senator from Vermont made that statement on April 3, 1985, the day that he, I, and 35 other original cosponsors introduced Senate Joint Resolution 104, a joint resolution proclaiming October 23, 1985, as the second "Time of Remembrance" for all victims of terrorism throughout the world. The first "Time of Remembrance" was observed on October 23, 1984, the first anniversary of the tragic death of 241 U.S. servicemen in the terrorist bombing of the Marine barracks in Beirut.

The originating and driving organization behind the effort is No Greater Love, a national, nonprofit, nonpolitical, humanitarian organization dedicated to providing programs of care and friendship to children whose parents were killed while serving our country. During past year's "Times of Remembrance," No Greater Love sponsored commemorative ceremonies at Arlington National Cemetery.

The ceremonies were of international significance and success. Letters of support and appreciation were received from diplomatic officials, Governors, private organizations, and individuals throughout the Nation and around the world. It is because of the tremendous response, and because of the continuing tragedy of worldwide terrorism, that we introduced Senate Joint Resolution 249 in an effort to make "A Time of Remembrance" an annual occurrence.

Senate Joint Resolution 249 proclaims October 23, 1986, as "A Time of Remembrance." It urges "all Americans to take time to reflect on the sacrifices that have been made in the pursuit of peace and freedom and to promote active participation by the American people by the wearing of a purple ribbon, a symbol of patriotism, dignity, loyalty, and martyrdom." It also requests the President to issue a proclamation "calling upon the departments and agencies of the United States and interested organizations, groups, and individuals to fly U.S. flags at half mast throughout the world in the hope that the desire for peace and freedom may take firm root in every person and every nation."

Mr. President, I strongly urge my colleagues to support the resolution by joining as cosponsors.

I ask unanimous consent that the text of the resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

SENATE JOINT RESOLUTION 249

Whereas the problem of terrorism has become an international concern that knows no boundaries—religious, racial, political, or national;

Whereas thousands of men, women, and children have died at the hands of terrorists in nations around the world, and today terrorism continues to claim the lives of many peace-loving individuals;

Whereas October 23, 1983, is the date on which the largest number of Americans were killed in a single act of terrorism—the bombing of the United States compound in Beirut, Lebanon, in which two hundred and forty-one United States servicemen lost their lives;

Whereas many of these victims died defending ideals of peace and freedom; and

Whereas it is appropriate to honor all victims of terrorism, and in America to console the families of victims, and to cherish the freedom that their sacrifices make possible for all Americans: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That October 23, 1986, be proclaimed as "A Time of Remembrance", to urge all Americans to take time to reflect on the sacrifices that have been made in the pursuit of peace and freedom, and to promote active participation by the American people through the wearing of a purple ribbon, a symbol of patriotism, dignity, loyalty, and martydom. The President is authorized and requested to issue a proclamation calling upon the departments and agencies of the United States and interested organizations, groups, and individuals to fly United States flags at half staff throughout the world in the hope that the desire for peace and freedom take firm root in every person and every nation.●

ADDITIONAL COSPONSORS

S. 104

At the request of Mr. THURMOND, the names of the Senator from Iowa [Mr. HARKIN], and the Senator from Texas [Mr. BENTSEN] were added as cosponsors of S. 104, a bill to amend chapter 44, title 18, United States Code, to regulate the manufacture and importation of armor piercing bullets.

S. 1815

At the request of Mr. HATCH, the name of the Senator from California [Mr. CRANSTON] was added as a cosponsor of S. 1815, a bill to prevent the denial of employment opportunities by prohibiting the use of lie detectors by employers involved in or affecting interstate commerce.

S. 1835

At the request of Mr. METZENBAUM, the name of the Senator from South Carolina [Mr. HOLLINGS] was added as a cosponsor of S. 1835, a bill to provide assistance in alleviating the suffering of victims of Alzheimer's disease and their families.

S. 1889

At the request of Mr. DENTON, the names of the Senator from Maine [Mr. COHEN], and the Senator from Colorado [Mr. ARMSTRONG] were added as cosponsors of S. 1889, a bill to amend title 11 of the United States Code, relating to bankruptcy, to prevent discharge of administratively ordered support obligations.

S. 1919

At the request of Mr. ANDREWS, the names of the Senator from Florida [Mrs. HAWKINS], the Senator from North Dakota [Mr. BURDICK], and the Senator from Maryland [Mr. SARBANES] were added as cosponsors of S. 1919, a bill to establish a task force to examine the issues associated with abuse of the elderly.

S. 1920

At the request of Mr. LAUTENBERG, the names of the Senator from Michigan [Mr. RIEGLE], the Senator from Massachusetts [Mr. KENNEDY], the Senator from California [Mr. WILSON], the Senator from Maryland [Mr. MATHIAS], the Senator from Maryland [Mr. SARBANES], and the Senator from North Dakota [Mr. BURDICK] were added as cosponsors of S. 1920, a bill to extend the Superfund taxes.

S. 1935

At the request of Mr. STEVENS, the name of the Senator from Florida [Mr. CHILES] was withdrawn as a cosponsor of S. 1935, a bill to direct the Secretary of the department in which the Coast Guard is operating to cause certain vessels to be documented as vessels of the United States so as to be entitled to engage in the domestic coastwise trade, and for other purposes.

SENATE CONCURRENT RESOLUTION 69

At the request of Mr. DANFORTH, the names of the Senator from New Mexico [Mr. DOMENICI], and the Senator from Connecticut [Mr. WEICKER] were added as cosponsors of Senate Concurrent Resolution 69, a concurrent resolution to recognize the National Camp Fire Organization for 75 years of service.

SENATE CONCURRENT RESOLUTION 94—EXPRESSING THE SENSE OF CONGRESS WITH RESPECT TO TERRORIST ACTS COMMITTED AGAINST U.S. NATIONALS

Mr. DENTON submitted the following concurrent resolution; which was referred to the Committee on Banking, Housing, and Urban Affairs:

S. CON. RES. 94

Whereas acts of terrorism violate the civil rights of all people;

Whereas acts of terrorism cause wanton destruction of life and property;

Whereas acts of terrorism escalate violence and incite hatreds among peoples;

Whereas acts of terrorism undermine legitimate attempts to seek peaceful resolution of conflicts among nations;

Whereas acts of terrorism increase the risk of war;

Whereas the United States has been the principal target of international terrorism since 1968;

Whereas 459 nationals of the United States have been killed in terrorist attacks since 1970;

Whereas no single group, organization, or faction enjoys a monopoly on the perpetration of terrorist acts;

Whereas terrorism constitutes an unusual and extraordinary threat to the national security, foreign policy, and economy of the United States;

Whereas victims of terrorist acts or their survivors may seek a prejudgment attachment on and sue for damages against the assets or holdings of those committing terrorist acts; and

Whereas the International Emergency Economic Powers Act (50 U.S.C. 1701 et seq.) provides Presidential authority to deal with unusual and extraordinary threats to the national security, foreign policy, or economy of the United States if the President declares a national emergency with respect to such a threat: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that the President should—

(1) declare a national emergency with respect to acts of terrorism directed against the nationals, property, and interests of the United States;

(2) investigate and determine the nature and extent of those assets and holdings in the United States of the groups, organizations, or factions responsible for committing acts of terrorism; and

(3) prohibit transactions involving such assets and holdings in accordance with, and to the extent specified by, the authority granted by section 203 of the International Emergency Economic Powers Act (50 U.S.C. 1702).

● Mr. DENTON. Mr. President, I rise today to introduce a concurrent resolution expressing the sense of the Congress that the President should declare a state of national emergency with respect to terrorist acts committed against nationals of the United States and exercise the authority granted him by the International Emergency Economic Powers Act.

Mr. President, the pattern that emerges from studying the testimony obtained, in more than 60 hearings before the Subcommittee on Security and Terrorism, which I chair, and in joint hearings with the Foreign Relations Committee, is that terrorism is the most widely practiced form of modern warfare. It is both a major force and a major trend in international affairs. It has the strategic advantages of low risk, low cost, and alternatives of total deniability of self-accreditation. The blood is only on the hands of the fanatics, the surrogates in that kind of warfare.

The direct measured costs of terrorism to the United States are that since 1980, terrorist incidents overseas have taken over 300 American lives, and more than 400 Americans have suffered injuries. More than 100 Americans are acknowledged to have been kidnaped or taken hostage. I want to emphasize that many more are victims, but the ransoms are often paid quietly by companies seeking to avoid publicity and who write off the ransoms as a business expense.

Terrorism also costs the United States a very high, and still uncounted sacrifice in strategies and economic terms: Loss of access to raw materials, to trade advantages, sometimes to any trade at all. The synergism of connection between drugs and terrorism costs us dearly in social, economic, and security terms.

In responding to terrorism, this administration and others before it have often promised to take swift, firm action. We have said, we will pay no ransom, release no prisoners, nor yield in any way to terrorists demands. We have espoused a policy of no concessions.

Yet those statements of strong antiterrorist policy did not stop the attacks on our Embassies in Lebanon, or the October 23, 1983, suicide bombing attack of the Marine compound at Beirut Airport with the loss of 241 American lives. It did not stop the bombing of United States installations in Kuwait, and the continuing murders of United States military and civilian personnel abroad (including four marines and two American civilians plus seven others in El Salvador), the murder of Robert Dean Stethem aboard TWA flight 847 and, most recently, the murder of Leon Klinghoffer aboard the *Achille Lauro.*

Mr. President, we have come to a point in our history that requires that we establish both a foreign and domestic policy for dealing with the obvious threat. This country must take the offensive in the fight against terrorism. In this vein, I introduce Senate Concurrent Resolution 94.

The resolution would express the sense of Congress that the President should declare a state of national emergency with respect to terrorist acts committed against nationals of

the United States. Specifically, the resolution states:

That it is the sense of the Congress that the President should—

First, declare a national emergency with respect to acts of terrorism directed against the nationals, property, and interests of the United States;

Second, investigate and determine the nature and extent of those assets and holdings in the United States of the groups, organizations, or factions responsible for committing acts of terrorism; and

Third, prohibit transactions involving such assets and holdings in accordance with, and to the extent specified by, the authority granted by section 203 of the International Emergency Economic Powers Act (50 U.S.C. 1702).

The purpose of this resolution is simple: If this country can't apprehend the individuals responsible for terrorist acts, we can at least enjoin the terrorists from earning money in this country.

Mr. President, I believe that this resolution will represent a necessary step toward winning the fight against terrorism. I urge my colleagues to support this measure.●

SENATE CONCURRENT RESOLUTION 95—COMMENDING CONSUMERS UNION

Mr. METZENBAUM (for himself, Mr. PACKWOOD, and Mr. MOYNIHAN) submitted the following concurrent resolution; which was referred to the Committee on Commerce, Science, and Transportation:

S. CON. RES. 95

Whereas Consumers Union of United States, Inc., was formed in February of 1936, to provide consumers with information and counsel on consumer goods and services and matters relating to the expenditure of the family income, and to initiate and cooperate with individual and group efforts seeking to create and maintain decent living standards;

Whereas for the past fifty years Consumers Union has provided consumers with necessary facts to participate in an increasingly complex marketplace, through the publication Consumer Reports;

Whereas Consumers Union has become a widely respected source of impartial information about consumer products and services, and legislation and regulations affecting consumers;

Whereas Consumers Union has crusaded for fifty years for improvements in product safety, and has played an important role in reducing hazards to consumers;

Whereas Consumers Union has pursued reforms to make the marketplace more fair for consumers, and has been a leader in helping advance the consumer interest in the United States and around the world; and

Whereas Consumers Union is celebrating its fiftieth anniversary in 1986, with plans that include providing increased services: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress recognizes and honors the Consumers Union for the continuing contributions made in informing, protecting, and aiding consumers in the Nation.

● Mr. METZENBAUM. Mr. President, it is with great pleasure that I rise to submit a concurrent resolution commemorating 50 years of dedicated public service by Consumers Union of United States, Inc. Senators PACKWOOD and MOYNIHAN join me in cosponsoring this resolution honoring Consumers Union which celebrates its 50th anniversary throughout 1986.

Consumer Reports, the flagship monthly magazine of Consumers Union, has helped millions of Americans make better informed decisions in an increasingly complex marketplace. Beholden to no commercial interest because of its longstanding policy to accept no advertising, the magazine, and the organization behind it, have a well-deserved reputation for objectivity and independence. The magazine's unbiased information on everything from "best buys" in home appliances to reports on health quackery and inadequate labeling, have not only benefited consumers' pocketbooks but also their health.

The efforts of Consumers Union, however, do not stop with the publication of Consumer Reports. This organization operates an advocacy program which, to name but a few accomplishments, has helped forestall massive telephone-rate increases for consumers in the Southwest, reformed milk-pricing rules in California, and helped bring about the right of doctors, dentists, and vision specialists to advertise their services.

Through other publications and programs, Consumers Union has helped young children become better consumers, developed consumer-oriented radio and television programming, and provided consumer education services to schools throughout the Nation. In short, Consumers Union, through a variety of activities, has helped us all learn more about the purchases we make each day.

We all owe a debt of gratitude to this outstanding organization. Plain and simple—Consumers Union has made the marketplace a better, safer place for people in this country and throughout the world. I urge my colleagues to join me in honoring the 50th anniversary of Consumers Union of United States, Inc., and help me wish the organization continued success in its noble effort to inform and represent consumers.●

● Mr. PACKWOOD. Mr. President, I am pleased to be a cosponsor of the concurrent resolution offered by my good friend and colleague Senator METZENBAUM.

Consumers Union, which publishes Consumer Reports magazine, will celebrate its 50th anniversary throughout 1986. In the past 50 years Consumers Union has done much to protect and promote the interests of consumers. The world's largest independent product-testing organization, it has spoken out on behalf of consumers and has been instrumental in the creation of the Consumer Federation of America, the Center for Auto Safety, the American Council on Consumer Interests, the Washington Center for the Study of Services, and the International Organization of Consumers Union.

Millions of readers of Consumer Reports rely on Consumer Union's independent and impartial testing of business products and evaluation of business services. The valuable information provided by Consumers Union has improved the health, safety, and living standards of Americans. I commend Consumers Union for a job well done and I am pleased to honor the accomplishments of this organization during its 50th anniversary.●

SENATE RESOLUTION 274—MEMORIALIZING CERTAIN MEMBERS OF THE 101ST AIRBORNE

Mr. SASSER (for himself, Mr. GORE, Mr. FORD, Mr. NUNN, Mr. MCCONNELL, Mr. BYRD, Mr. ABDNOR, Mr. ANDREWS, Mr. ARMSTRONG, Mr. BAUCUS, Mr. BENTSEN, Mr. BIDEN, Mr. BINGAMAN, Mr. BOREN, Mr. BOSCHWITZ, Mr. BRADLEY, Mr. BUMPERS, Mr. BURDICK, Mr. CHAFEE, Mr. CHILES, Mr. COCHRAN, Mr. COHEN, Mr. CRANSTON, Mr. D'AMATO, Mr. DANFORTH, Mr. DECONCINI, Mr. DENTON, Mr. DIXON, Mr. DODD, Mr. DOLE, Mr. DOMENICI, Mr. DURENBERGER, Mr. EAGLETON, Mr. EAST, Mr. EVANS, Mr. EXON, Mr. GARN, Mr. GLENN, Mr. GOLDWATER, Mr. GORTON, Mr. GRAMM, Mr. GRASSLEY, Mr. HARKIN, Mr. HART, Mr. HATCH, Mr. HATFIELD, Mrs. HAWKINS, Mr. HECHT, Mr. HEFLIN, Mr. HEINZ, Mr. HELMS, Mr. HOLLINGS, Mr. HUMPHREY, Mr. INOUYE, Mr. JOHNSTON, Mrs. KASSEBAUM, Mr. KASTEN, Mr. KENNEDY, Mr. KERRY, Mr. LAUTENBERG, Mr. LAXALT, Mr. LEAHY, Mr. LEVIN, Mr. LONG, Mr. LUGAR, Mr. MATHIAS, Mr. MATSUNAGA, Mr. MATTINGLY, Mr. MCCLURE, Mr. MELCHER, Mr. METZENBAUM, Mr. MITCHELL, Mr. MOYNIHAN, Mr. MURKOWSKI, Mr. NICKLES, Mr. PACKWOOD, Mr. PELL, Mr. PRESSLER, Mr. PROXMIRE, Mr. PRYOR, Mr. QUAYLE, Mr. RIEGLE, Mr. ROCKEFELLER, Mr. ROTH, Mr. RUDMAN, Mr. SARBANES, Mr. SIMON, Mr. SIMPSON, Mr. SPECTER, Mr. STAFFORD, Mr. STENNIS, Mr. STEVENS, Mr. SYMMS, Mr. THURMOND, Mr. TRIBLE, Mr. WALLOP, Mr. WARNER, Mr. WEICKER, Mr. WILSON, and Mr. ZORINSKY) submitted the following resolution; which was considered and agreed to:

S. RES. 274

Whereas the Sinai Peacekeeping Force has been essential to maintaining world peace since the signing of the Camp David Accord,

Whereas the 101st Airborne Division Screamin' Eagles is one of our nation's finest and best trained units and has a distinguished history of sacrifice and commitment to the nation in the cause of peace,

Whereas, members of the 3d Battalion 502d Infantry of the 101st Airborne Division had just completed a six month assignment as members of the multinational peacekeeping force in the Sinai,

Whereas 250 members of the 3d Battalion 502d Infantry of the 101st Airborne, on their journey home from a mission of peace died in a plane crash in Gander, Newfoundland, Canada,

Whereas this accident involved more casualities than the 101st Airborne Division has suffered in any single day in peacetime or wartime,

Whereas in this season of Christmas the nation owes a debt of gratitude to these soldiers who gave their lives selflessly in maintaining our country's national security and goal of world peace: Therefore, be it

Resolved by the United States Senate, That it extends it sincere condolences to members of all the families of the soldiers of the 101st Airborne Division who died in service to their country.

SENATE RESOLUTION 275—CONDEMNING THE CHINESE POPULATION POLICY

Mr. HUMPHREY submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 275

Whereas, the policy and practice of the "one-child policy" of the People's Republic of China--

(A) establishes quotas limiting almost all citizens to one child per couple;

(B) determines, through the rationing of "birth coupons," when a couple may have their child;

(C) invades individual privacy by subjecting citizens to strict monitoring by State officials;

(D) intimidates couples verbally and threatens them with force to pressure compliance;

(E) reduces basic means of living such as salaries, rations, and housing and garden allotments; and applies various other disincentives and penalties;

(F) mandates the use of contraceptives or abortifacients such as the pill and the intrauterine device (IUD);

(G) forces the abortion of any pregnancies not planned by the State, even through the ninth month;

(H) compels sterilization for at least one individual in any couple with two children; and

(I) coerces individuals not complying with the mandates, requirements, and limitations described in clauses (A) through (H) by subjecting them to forced IUD-implantation, abortion, and sterilization;

Whereas, the policy and practice of the "one-child policy" leads couples to practice infanticide of female children in order that, in accordance with strong cultural and economic pressures, their single child be male; and

Whereas, the policy and practice of the "one-child policy" is repugnant to the moral and political values of democratic and free societies and runs counter to United States policies to promote democratic governments throughout the world and respect for human rights.

The Congress, therefore, be it:

Resolved, That the Senate encourages the Government of the People's Republic of China to abandon its coercive policies and practices under the "one-child" program and urges that Government to severely punish violators and to document efforts to this effect.

● Mr. HUMPHREY. Mr. President, we are all aware of the human rights abuses evident in China's population policies. Documentation of forced abortions and mandatory sterilization has come from various Government sources and from knowlegeable individuals representing the breadth of the political spectrum. Indeed, the Chinese Government itself has confirmed details of its coercive program in numerous policy statements.

Reports on the coercive aspects of the Chinese population policy are readily available to those with any interest at all in pursuing the subject. We continually learn of forced abortion and sterilization. We hear of female infanticide of enormous proportions—at least 200,000 little girls killed annually—according to Nick Eberstadt in his April 22, 1984 New York Times article—by desperate parents. This is an outrage!

And yet the Congress seems to be blind to the very real, documented abuses of the Chinese program. We force the imposition of sanctions in response to South African apartheid. For weeks apartheid occupied the front pages of this Nation's papers. We berate El Salvador for its death squads. There was a time when little else seemed to merit news attention. Shock and anger have all been registered in response to the policies of Chile, Argentina, the Phillipines—and the list goes on.

But the Congress fails to recognize or understand the gravity, the magnitude, the pervasiveness of the human rights abuses perpetrated by the Chinese Population Program. I will detail once again some of the abuses that have already been extensively documented by the State Department, by such authors as John Aird, Fox Butterfield, Nick Eberstadt, Steven Mosher, and by correspondents from the Washington Post, the New York Times, and "60 Minutes."

I begin with a brief description of the basis for the Communist population control program. After a 20-year period of turbulence and inconsistent population policy, the Chinese, in the mid-1970's, faced with the prospect of a rapidly growing population. The Communist government, therefore, set population limits of 1.2 billion Chinese in the year 2000, as noted in John Aird's testimony on October 9, 1985 before the House Subcommittees on Human Rights and International Organizations and on Asian and Pacific Affairs. At that time, the target dictated that each Chinese couple have no more than two children. However, the Communist government did not strictly enforce the two child policy, and by the very early 1980's population growth has not abated.

In 1982, the Chinese Communist Party reassesed the population situation and related policies. In order to meet the 1.2 billion person goal, a growth rate of 1 percent had to be achieved. Such a target limited each couple to no more than one child. The one child policy, then, summarized in policy statements by Wang Pingshan in two radio addresses on May 14 and 15, 1983, became the fundamental tenet of the Chinese Population Program.

To enforce the one-child limit, the Central Government establishes annual quotas of children for each province. Provincial bureaus then dictate to increasingly local levels of Government their particular birth quotas. At the lowest bureaucratic level, production team leadership assembles to assign birth coupons to the established number of childless couples. As the U.S. State Department "Country Report on Human Rights Practices for 1984" indicates, the Government then determines both the number of children—one—and the timing of that birth. State policy also regulates when an individual may marry, and encourages quality birth or eugenics. Exceptions to the one child policy exist only for certain high-level officials, and ethnic minorities.

As noted by the 1984 "Country Report," and Fox Butterfield in "China: Alive in the Bitter Sea," each Chinese couple is carefully monitored by small, local organizations known as street committees. The street committee tracks the woman's menstrual periods, and records other basic pregnancy information in order to pick up deviations from quotas and general family planning policies. Government family planners, alert to any menstrual irregularities, then provide prenatal care to women who are within the quota. Those mothers pregnant outside the quota—even those without children—are encouraged to seek an abortion. Steven Mosher in "Broken Earth" and Christopher Wren in a May 16, 1982 article in the New York Times explain that, if after repeated appeals, education, and increasingly forceful threats, the mother refuses to yield, officials apply various disincentives to the couple. These penalties range from the short-term reduction of rations, salaries, and privileges described in Eberstadt's article, to permanent cuts in food, garden, and housing allotments, salary, seniority, and so forth. Couples who have two or more children may suffer especially severe punishment.

In his radio addresses, Wang Pingshan and other family planning workers have described extensively the Government's official policy with regard to birth control and couples with extra-quota pregnancies. As I have noted above, each couple may have only one child, and that can occur only at the time established by the state. Michele Vink in a November 30, 1981 Wall Street Journal article, and John Erik in a January 3, 1982 New York Times article, note that couples not yet scheduled for a child must, regardless of their personal views on contraceptives and abortifacients use birth control methods such as the pill and the IUD. Unplanned pregnancies must—again, regardless of the couple's personal views on abortion—be aborted as soon as possible. The state mandates that any woman who has one living child must have an IUD inserted. The state, says Wang, prescribes mandatory sterilization for at least one partner of any couple with two children. "Under no circumstances," Wang insists, "may a third child be born." Let me repeat that: In no case, will a third child be born.

The strict birth requirements, the quotas and rewards established for state family planning workers, and the Government's unimpeded ability to probe even the most personal aspects of couples' lives—each of these factors interact and result in very few couples bearing two children. None, needless to say, bear a third.

Almost all researchers of Chinese population policy—and Michael Weisskopf of the Washington Post, in particular—note that to enforce such a policy effectively, the Government has resorted to coercion. Consequently, sterilizations are compelled, and IUD's are forcibly implanted. Abortion—78 million have been performed during 1971-82 according to the Chinese Government—is legal up to and beyond the eighth month. Often forced upon women who must be bound and carted off to "clinics," abortions have been performed as late as the ninth month of pregnancy.

One of the more heart-rending, and tragic conseqences of the Communist Population Program—noted by Mosher, Eberstadt and others—involves the widespread practice of female infanticide. I am unaware of any direct statements from the Government endorsing infanticide as a family planning tool, but there is concern that the absence of actual punishment for the practice of infanticide may indirectly indicate the state condones such activities. In addition, strong cultural and economic factors pressure parents to bear a male as their only child. Consequently, numerous sources indicate widespread female infanticide. Indeed, the Communist Government's Statistics for 1983 record a 111:100 ratio of male infants to female, revealing a loss of over 200,000 children of the latter gender.

Mr. President, I propose that we respond to this colossal abuse of human rights—both those rights of couples who desire to bear their children in privacy when and as often as they wish, and the rights of the preborn and newly born who lose their lives to the economically motivated dictates of the Chinese Communist population policy. I propose that the very least we can do is pass this resolution as a token of our sympathy with the people of China, and as an expression of our opposition to the population policy of the People's Republic of China.●

AMENDMENTS SUBMITTED

REGISTERING THE TITLES OF MOTOR VEHICLES

DANFORTH AMENDMENT NO. 1418

Mr. DOLE (for Mr. DANFORTH) proposes an amendment to the bill (S. 475) to amend the Motor Vehicle Information and Cost Savings Act to require certain information to be filed in registering the title of motor vehicles, and for other purposes; as follows:

On page 2, line 9, strike all from "by—" through "(ii)" on line 12 and insert in lieu thereof "by".

On page 3, line 8, strike "clause (ii) of".

On page 3, amend lines 12 through 20 to read as follows:

"(3) No registration card may be issued in any State for any motor vehicle used in interstate commerce unless the application for such registration card contains (determined as of the date on which such application is submitted) the information specified in paragraphs (1) and (2) of subsection (a). Each State shall maintain such information, together with the vehicle identification number to which such information pertains, for a period of 5 years after the information is received by the State.

On page 4, insert the following immediately after line 3:

"(5) The Secretary shall prescribe such rules as may be necessary to avoid the printing of mileage information pursuant to paragraph (1)(B)(ii) which may be false, misleading, or inaccurate. In order to prevent falsification or alteration of the mileage information required to be disclosed by a prior owner in accordance with paragraph (2), the Secretary shall prescribe such rules as may be necessary regarding the specific form to be used on certificates of title for compliance with the provisions of paragraph (1)(B)(iii). In addition, the Secretary shall prescribe rules regarding the actions to be taken by States with respect to the unauthorized alteration of motor vehicle certificates of title and other documents on which odometer information is required to be recorded or maintained.

On page 4, line 15, strike the quotation marks and the second period.

On page 4, insert the following immediately after line 15:

"(f)(1) Upon the termination or expiration of any lease for a motor vehicle, the lessee shall provide written disclosure to the lessor of the mileage of the vehicle at the time of such termination or expiration. Upon the request of such lessor, the lessee shall also provide to the lessor such mileage information as may be necessary for the lessor to comply with the requirements of subsection (d)(3).

"(2) The lessor of a motor vehicle shall provide written notice to the lessee of—

"(A) the mileage disclosure requirement set forth in paragraph (1); and

"(B) the penalties for failure to comply with such requirement.

"(3) Each lessor of a motor vehicle shall retain the written disclosure made by the lessee under paragraph (1) for four years after the date on which such lessor transfers ownership of the vehicle to any other person.

"(4) A lessor of a motor vehicle may use the vehicle mileage information provided by lessees under paragraph (1) for purposes of compliance with the requirements of subsection (a) unless such lessor has reason to believe that such information does not reflect the actual mileage of the vehicle. Failure of any lessee to comply with paragraph (1) shall not affect the ability of the lessor to transfer ownership of the vehicle to any other person.".

On page 5, line 6, strike "408(d)(4)" and insert in lieu thereof "408(d) (3) and (4)".

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. DURENBERGER. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Friday, December 13, 1985, in order to conduct a hearing on the nominations of: J.H. Tyler McConnell, Barry D. Schreibor, and Robert Setrakian to be members of the Board of Governors of the U.S. Postal Service.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

L.L. BEAN

● Mr. COHEN. Mr. President, over 70 years ago, an enterprising young hunter from Freeport, ME, grew tired of getting his feet soaked during deer season. To remedy his discomfort, he came up with the idea of creating a pair of lightweight rubber boots guaranteed to keep his feet dry.

The boots worked so well that he decided to sell them to his fellow hunters through the mail. The hunter was Leon Leonwood Bean, the founder of the world famous L.L. Bean Co.

That small business venture has grown into a multimillion-dollar corporation, a corporation that enjoyed $257 million in sales last year and hopes to hit $280 million this year. President Leon Gorman, the grandson

of the founder, deserves much credit for carrying on this fine Maine tradition.

The "down home" qualities that have put L.L. Bean on the map have not eroded over time. In many ways, the company represents the very best in Maine—the healthy outdoor way of life, quality craftsmanship, outstanding and friendly service, unmatched expertise and efficiency, and the willingness to stand behind every sale.

Mr. President, at this time, I submit two articles that recently appeared in Sports Illustrated and the Baltimore Sun that feature the most renowned outdoor company in the world for printing in the RECORD.

The articles follow:

USING THE OLD BEAN

(By John Skow)

Leon Leonwood Bean, the country slicker and demon merchandiser who founded the L.L. Bean store in Freeport, Maine, used to brush aside suggestions for expanding his business with a Down East nifty: "I'm eating three meals a day now, and I can't eat four." That was intensely exasperating to his grandson Leon Gorman, a young man just getting a feel for the family business. This was back in the early '60s, when L.L., who was born in 1872, was a very old man, and the catalog house he started more or less by accident in 1912 had fallen into a profound snooze.

Gorman was right to be worried. The average age of the employees in the store, he says now, was something like 67. L.L. was a humane employer and he never fired anyone, but he also was a tightfisted State-of-Mainer—minimum wage plus a nickel was his wage policy—who regarded company retirement programs as a gross extravagance. Thus no one retired. Ancient clerks filling catalog orders during the pre-Christmas rush ambled slowly into the systemless confusion of the stockroom, passed the time of day with each other, deliberated about deer hunts and gall-bladder operations and the weather, past and present, and eventually returned with a chamois shirt or a pair of Maine Hunting Shoes, or the news that the required item was out of stock, or maybe misplaced.

All of that has changed. L.L. Bean, the modern corporation, eats four meals a day. Gorman, now 51, is president. The company has a good retirement policy and pays good wages, for Maine. Sales last year were $253.7 million and are expected to reach $280 million to $290 million for '85. Growth seems to have steadied, after several roller-coaster years, at a healthy 12%. Some 68 million catalogs are mailed each year. Outside Gorman's office this fall, concrete was being poured and steel bolted for another expansion of Bean's huge distribution center in Freeport. Half a mile away, the Bean retail store, which looks like a ski lodge, is vast and prosperous. A sizable trout pool is the centerpiece of its main floor, but the place is so busy the fish are easy to miss.

The two million people who come here every year make Bean's the State's second-biggest tourist attraction, after the Atlantic Ocean, but ahead of Moosehead Lake and Mount Katahdin. On a normal day through the spring, summer and fall, parking lots at the retail store fill by 10:30 a.m., and customers are directed to satellite lots maintained by Bean a couple blocks away.

Freeport, an old shoe-factory town that once had a comfortable, old-shoe shabbiness to it, has been transformed by L.L. Bean's stupendous popularity into a theme park for shoppers. Dozens of outlet stores along the main street, all New Englandy in neat clapboards and carved wooden signs with gold letters, feed to satiation on the spill-over from the Bean store. Frye Boots, Ethel! Hathaway, O mistress mine! Dansk! Sweaterville! And look, the heart leapeth up Ralph Lauren! A free jitney bus that looks something like a San Francisco cable car percolates around town. McDonald's is so discreet that it is hard to find, but it's there.

What old L.L. would have made of this is uncertain. "Money," a compulsive truth-teller might answer. Sure, although from all accounts, three meals a day really were enough for this very shrewd old gent, just as long as about half of those days in his later years could be spent fishing in places like Florida. But L.L. died in 1974, at 94, and his attitudes were firmly in place before World War I. One of his shotguns, an old Parker 20-gauge, hangs on the wall of Gorman's neat office. But it is outlandish to imagine him sitting in his grandson's chair as president of L.L. Bean, Inc. in the mid-1980s, and having to deal with the corporate problems that are now basic stuff to every CEO in the nation. Can a healthy company simply stay at its present size, selling a good product at a good price, without growing? In L.L.'s world, why not? In Gorman's, the idea is absurd.

The singularity here is not so much that Bean under Gorman has had its operations brought up to date, and has positioned itself—we may as well speak corporatese—to run smoothly through the remainder of the century. A lot of medium-sized businesses have overcome similar problems after a founding entrepreneur has died or faltered. What sets L.L. Bean apart is something quite different from ordinary good management. Everyone seems to love L.L. Bean. At least those of us who are customers do. It is as if Bean were family, some sort of mildly eccentric but amiable uncle who lives up in Maine and sends us packages.

Yes, Sears sends us packages, and so do Eddie Bauer, Lands' End, Recreational Equipment, Inc., Brookstone, International Mountain Equipment, Orvis and so many others that if the tons of catalogs they mail only burned a little better, a householder in the snow belt would not have to split cordwood. Bean is just one of five or six firms I deal with. Over the last few months I have bought a good bench saw from Sears, an excellent pair of lightweight Raichle hiking shoes from REI, and some polypropylene expedition longies, no complaints, from IME. I have no emotional involvement whatsoever with these outfits. But Bean is another matter.

Mine is by no means the only mushy smile visible when Bean is mentioned. People send family photos to L.L. Bean, generally showing themselves proudly wearing some Bean garment. They chat on the phone to Bean, mentioning, perhaps, that they are thinking of sending their teenagers to Outward Bound, because you know how kids are these days, and does Bean's customer service rep think this is a good idea? He or she does. What sort of equipment would the kid need? Bean has a list, and can supply the stuff. Well, thanks, the customer will say, grateful for this pastoral counseling, you've really been a big help.

A few months ago a man called from California to ask for suggestions about names for his 8-week-old brindle Scottie. He had no catalog purchase in mind, and clearly he did not feel that his relationship with Bean necessarily had to involve matters of commerce. He got results, too; the customer service department deliberated and called him back, offering Drambuie, Chivas Regal, Wee Willie, Bonnie Prince Charlie and—since it was not clear that the pup was male—Blue Belle of Scotland.

Last New Year's Eve, about 6 p.m., two men and one woman walked into the store and, operating with the precision of a guerrilla team, committed matrimony on the landing of the main stairway. The woman and one of the men pledged to love and honor each other, while the other man, a justice of the peace, pronounced them husband and wife. They left to the cheers of customers and clerks.

Presumably most of this loosely focused good will is traceable, in one way or another, to L.L. himself. What is odd about this is that, as far as a listener can determine now, L.L. was a decent enough fellow, but by no means cuddly, by no means a lovable old coot. The sense is that he kept his distance emotionally from other people, a habit that in Maine is considered prudent and normal. The distance between L.L. and his customers, however, turned out to be precisely right, so that an astonishing spark of respect and friendliness could pass in both directions. This electrical current first began to alternate in 1912. Much later Leon Gorman wrote of his grandfather, "To hear that one of his products failed was a genuine shock to his system. He'd charge around the factory trying to find an explanation. Then he'd write the customer, return his money, enclose a gift, invite him fishing or do anything to make the matter right. That customer was a real person to L.L."

What happened in 1912 was that L.L., then 39 and a partner in a small and sleepy dry-goods store in Freeport run by his brother Ervin, decided to go into the mail-order business. Before this, he had sold soap and worked in a creamery without piling up either money or renown. Now he had a new product to sell, one of his own invention. The year before, vexed by chronically wet feet on deer hunts, he had hit on the notion of sewing lightweight, comfortable leather uppers to the rubber bottoms of ordinary galoshes. A local shoemaker had made up a pair for him, and he had tried the shoes out. They kept his feet dry, so he ordered a few more pairs and sold some of them in his brother's store.

L.L. said later that his first mail-order list came from Maine hunting licenses. He wrote and mailed out copies of a flier selling what he called the Maine Hunting Shoe. The flier's prose was pure L.L., as distinctive as early Hemingway: "Outside of your gun, nothing is so important to your outfit as your footwear. You cannot expect success hunting deer or moose if your feet are not properly dressed. The Maine Hunting Shoe is designed by a hunter who has tramped Maine woods for the past 18 years. They are light as a pair of moccasins with the protection of a heavy hunting boot. The vamps are made of the very best gum rubber money will buy. . . ."

The Bean prose style was to reach its peak decades later in the ad that ran year after year for the wondrous Heavy-Duty Belt: "A fancy dress belt looks out of place on heavy hunting pants. Made of high grade genuine cowhide with a brass-plated buckle." But all of the elements were there in that initial hunting-shoe puff—from the firm, friendly

advice to the insecure city tourist who, L.L. clearly understood, secretly dreaded showing up with the wrong hunting gear, to the forthright huckster's boast about superior materials. L.L. did not just mail his fliers and wait for the money to roll in. He sent follow-up letters. One F.N. Sawyer of Wakefield, Mass. received a note typed on the blank reverse side of the hunting-shoe flier. "Dear Sir," it began, "Recently I sent you a circular of my Maine Hunting Shoe. As I have not received your order I take the liberty of again calling your attention to my shoe. I am receiving so many compliments from all over the states that I am sure the shoe would please you and am willing to send you a pair on approval."

The truth was that the Maine Hunting Shoe was a flop, and L.L. was receiving little but complaints. Some 90 of the first 100 pairs were sent back by customers, or so went the story that Bean himself told, because the stitching that held the leather tops pulled out of the soft rubber bottoms. He had guaranteed each pair, however, and he scraped up enough money to turn 90 angry customers into 90 citizens impressed with his honesty. He borrowed more capital, persuaded the U.S. Rubber Co. of Boston to manufacture soles that would not separate from the uppers, sent out more fliers and was off at a gallop toward destiny. The new soles remained faithfully married to their uppers, and the "sports" (as city people who come to Maine to hunt, fish and paddle canoes were, and still are, called) happily sent in their orders.

In 1917 L.L. moved his growing operation from the basement of brother Ervin's drygoods store to a building across the street and added hand-knit stockings to his line. By 1924 he employed 25 people at an average wage of $25 a week, and yearly sales had reached $135,000. He was shipping out hunting shoes, which were made to seem finer and more up to date in each successive catalog—"The 1923 Maine Hunting Shoe," "The 1924 Maine Hunting Shoe," and so on. But what he was selling, he seemed to understand instinctively, was the absolute, unqualified reliability of L.L. Bean. The guarantee was and still is unconditional. You can send back a Bean product for any reason at any time, and get a replacement or your money back. Wear it a year, decide that it is not holding up and send it back. The guarantee still holds.

Hear this from Ken Stone, coach of the U.S. white-water canoeing team. Years ago, he said, he bought an inexpensive fishing rod from L.L. Bean. He used it for several seasons, and then snapped off the tip by slamming a car door on it. He took it to the Freeport store, explained what had happened, not failing to mention the car door, and asked if he could buy a replacement tip. He got one, for no charge, and used the rod for another few years. Then a friend borrowed it, tripped while climbing down a steep riverbank and again broke the tip off. This time the Freeport store had no replacement tip; the rod was too old. The clerk told Stone to pick out a new rod. Stone explained that the break could not be blamed on Bean or the manufacturer. "It doesn't matter," said the clerk. "There's no charge. Bean stands behind its products."

Full disclosure: When he said this, Stone was under contract to L.L. Bean to make an instructional videotape on white-water canoeing techniques. But it was clear that he did not tell the story to please Bean but simply because the subject of Bean had come up. It was his Bean story, and like most of us who have one, he had been telling it for years.

Those unlucky buyers of the first poorly made hunting shoes no doubt told similar Bean stories after L.L. sent their money back, and so the customer list grew. The reputation Bean was developing was not just for honesty and straightforward products, but for a kind of quirky thriftiness that made customers grin and think, "That's Maine for you." Don't throw away your worn-out hunting shoes, L.L. advised. Send them back and we will sew on brand new bottoms, with new eyelets and laces, for $3.10, or $3.30 for the style with heels. This was genius at work. The reason that customers had worn-out hunting shoes was that gum rubber is very soft and not especially durable. L.L. turned this flaw into unbeatable word-of-mouth advertising.

No item was too piffling for the Bean treatment. In the fall 1926 book, he boasted that his bootlaces were "the result of several seasons of experimenting to produce a perfect lace for high-cut shoes and moccasins. These laces are not rawhide with weak places, but are hand-cut from high grade selected leather. Every lace is hand-tested and guaranteed 100% perfect." The laces went for 10¢ for eight-inch shoes and 26¢ for 16-inch shoes. Even in 1926 the profit on such transactions could not have justified the catalog space given to them. But L.L. knew what he was doing. The message here was that Bean took pains to make the smallest details perfect.

Some of Bean's offerings, it must be admitted, were completely gaga, though even these seemed only to add to L.L.'s reputation. *In Search of L.L. Bean*, the graceful and entertaining history of the company by *The Boston Globe* outdoor writer M.R. Montgomery, notes some rubber long johns that L.L. tried out, no doubt after being soaked on a deer-hunting trip. In the fall of 1933, a Depression year and thus a time for thrift, L.L. suggested that for only $2.85, moccasin bottoms could be sewn to the uppers of rubber-bottomed hunting shoes for the upland bird season, and then, before deer-hunting began, the same boot could be returned to Freeport for reconversion to rubber for another $2.85.

In the same catalog, however, L.L. promoted an alltime winner, the Bean chamois shirt, at $2.15. "This is the shirt I personally use on all my hunting and fishing trips," he advised his congregation. It was, he said, "the best value in a shirt we have ever offered." True enough, last year an elderly widow sent a 50-year-old red chamois shirt back to Bean's, not for a refund, but because she thought the firm might like to see how good it still was. Chamois shirts, like blue jeans and violins, mellow with age, and while Bean did not invent them, neither did Johnny Appleseed invent apples. The Freeport store spread them around the country and saw them sprout in other companies' mail-order catalogs.

That sort of competition was decades in the future in 1951, the year L.L. made his last major contribution to Bean's reputation for vivid eccentricity. Weary of being awakened at his home in Freeport by hunters and fishermen who were driving through town late at night and needed a few articles from the store, he made the sort of decision that would have driven an accountant to distraction. It might have been reasonable to keep the place open to 10 p.m., say, on Friday and Saturday nights. But no, L.L. was not in a mood to fool around with halfway measures or hard-to-remember schedules. He did not ponder unduly over cost effectiveness. He simply decided that L.L. Bean would never close.

To this day it has not, except for L.L.'s funeral. When a major remodeling of L.L.'s old white-frame store was undertaken in 1976, no locks were fitted to the front door. You can stroll through the place at 4 a.m. on Christmas, and more than a few people do.

The oddly personal loyalty that L.L.'s customers felt for the store and its eccentric owner might have been expected to disappear like morning dew after the old man's death. The store was running on inertia, says Gorman, who took over as president in 1967 when he was 32. Much of what the catalog offered was outdated, and quality had slipped. The store itself was old and shabby, inventory control was a matter of guess and hunch; shipping was slow and disorganized; sales figures had flattened. Gorman's preparation for running a business consisted of a B.A. in government from Bowdoin College and four years in the Navy, supplemented by some night courses in business after he had signed on in 1960 as the only college graduate working for L.L. Bean. "I was green as grass," he says now, shaking his head at the memory.

Gorman in his middle years is a lean, reserved man, polite and thoughtful in manner. He is not a storyteller or speechifier, and he will never be a beloved old Maine character even if he runs the company til he is 94. An outsider gets the impression of considerable intelligence, doggedly applied. He was not much of a sportsman when he took over, he admits. Did L.L. ever take him hunting? "Only once," Gorman says. But sport, like marketing techniques, was part of what the new company president had to learn. He did learn and now is a bicyclist, a bird shooter and an enthusiastic cross-country skier—though it's as sure as Halley's Comet that you will never read, in some future Bean catalog, "These are the skis and poles that Mr. Gorman himself uses in his conditioning runs. . . ."

The business that Gorman took over in 1967 was essentially a turn-of-the century dry-goods store with a hunting and fishing department and, somewhere out back, a shoe factory whose artisans also made duffel bags and red suspenders. How Gorman rebuilt this creaky structure as a sizable modern corporation still recognizable as L.L. Bean has been a case study three times for the Harvard Business School and has been cited in textbooks, as well as in *A Passion for Excellence* by Tom Peters (coauthor of *In Search of Excellence*) and Nancy Austin, as an example of superior executive practice.

The company now has the look and feel of institutional strength. Bill End, Gorman's 36-year-old second in command, sits at his clean desk looking, though only from the shinbones up, as it turns out, like the alert young Harvard MBA that he is—his shirtsleeves are buttoned and his tie pinned. He answers questions easily. No, Bean should not expand by starting a chain of retail stores. Retailing on a nationwide scale is a tough business and not Bean's specialty. "We should stick to what we know," he says.

He sounds very corporate indeed, until he is asked about his own sporting interests. Then he jacks one leg above desk level, revealing an enormous Danner Yukon cold-weather hunting boot. He is breaking these monsters in, he says, for a bighorn-sheep hunting trip in British Columbia he has scheduled in 10 days. Furthermore, he says,

he has just returned from a fly-fishing trip to Alaska, and he expects to be in Ontario for the opening of the duck and goose season.

The company encourages active sports participation, he says, and any Bean exec can get an extra week's vacation to do product testing, an activity that includes checking out Danner Yukon Boots in British Columbia.

It is not just management that gets out in the field. Clerks in the canoe department, as you would expect, can tell you from experience the relative advantages of a square-ended or a beaver-tail paddle. Somewhat surprisingly, however, the lecturer at a free public slide show on fall bird migration is Dan Nickerson, a hand sewer of shoes in the Bean shop. He is a skilled amateur ornithologist who spent 4½ weeks this year helping to make an atlas of bird-breeding sites in the outback of northwestern Ontario, on an expedition partly sponsored by Bean. The company puts on about 100 clinics a year in Freeport on such subjects as bird-dog handling and winter camping, and most of them draw on the specialized knowledge of Bean employees.

Obviously a firm like L.L. Bean would be expected to attract workers who enjoy hunting, fishing and other outdoor sports that don't involve throwing a ball around. But now something more than natural selection is going on. In the past couple of years Bean's commitment to outdoor sports has reached a level so intense as to almost suggest Casper Weinberger brooming about the Soviets.

What alarmed the Bean management, from Gorman on down, was a fluky wave of prosperity that began in 1980. That was the year when Lisa Birnback came out with *The Official Preppy Handbook*, a wickedly accurate satire on the feeding, mating and dress habits of the Eastern private school set. If you were a preppy, the handbook explained, you wore a lot of gear from L.L. Bean: hunting shoes, chinos, Norwegian sweaters and so on. As a result of the book, Bean was flooded with unexpected orders. Everyone wanted to be a preppy and treated Birnbach's joke book as if it really were a handbook. It was hard to get into Phillips Andover, but it was easy to order boating moccasins and a down vest from Bean's. For a while it seemed that the fad would not die until everyone in the country was fully Beaned—from trooper cap to gum-soled loungers.

The company's sales grew crazily in 1981 and '82 then nearly stopped growing in '83. By this time Gorman had realized that Bean was in danger of being seen by its new customers not as a sporting-goods dealer, but as last year's fashion house. Bean's rededication to sports began forthwith. Pushed by Gorman, product-development man Ned Kitchel developed a line of Bean bicycles, with light aluminum frames built by a U.S. firm called Cannondale. Hunting and fishing product development manager Scott Sanford, a 32-year-old U of Southern Maine grad, reviewed Bean's fishing-rod line and installed a $200 graphite fly rod, high for Bean. Bill End describes testing a line of Spanish shotguns being considered for Beans house label. After 10 days of shooting, he said, "not one of the five guns we bought was still functioning." Bean chose an Italian manufacturer. Fishing rods and shotguns don't add much to Bean's bottom line. What they do is give Bean the opportunity to sell chamois shirts and Baxter State Parkas to customers who value shooting and fishing. Stone's instructional tape on whitewater canoeing and three others that Bean will market on fly-fishing, bicycling and outdoor photography are as much statements as products, and the statement is that Bean knows the outdoors.

In the meantime, the world of L.L. Bean goes on 24 hours a day: 100 order-takers in Portland, 12 miles from Freeport, reassure callers panicked by the looming specter of Christmas. Shoemaker Nickerson, working with an awl in each hand, stitches the right toe of a pair of size 8 men's premium beef-roll loungers and perhaps thinks about the tiny blackpool warbler, a bird that is known to fly from the U.S. to South America without stopping. Laboratory technician Merv Wyman is 3½ hours into an eight-hour test of a sample of down insulation that requires him to separate every fiber with a pair of tweezers. And customer service rep John Noone is speaking soothingly on the phone to a man in Florida who says, grumpily that he has just received notice that the shirt he ordered for his son's birthday is out of stock.

Does Bean have the same thing in yellow? Noone calls up the man's transaction on his computer terminal, sees that a refund check has already been sent, then makes sure that the store has a yellow tennis shirt in the right size, and says yes. The trouble is, the man gripes, his son's birthday is five days away, and there isn't time for him to send another personal check to Bean. That's O.K., says Noone, just send back our refund check when you get it; we're not worried. He marks the delivery as Federal Express, no charge, thereby turning Bean's profit on a $16 item into quite a loss. The customer says, "Well, uh, that's fine," sounding surprised to find that he is no longer grumpy. "I've been dealing with you for a long time." Noone thanks him, says goodby and hangs up. In a moment the red light on his phone is glowing again.

On this same fall day or one just like it, Rod Lane, 29, an assistant product manager for Bean, and Erika Hadley, 25, one of the firm's computer operators, are standing on a rocky shore in Freeport overlooking Casco Bay. The sun is shining. The sea is calm. The dollar is steady against major European currencies.

A photographer crouches and twiddles. An art director calls out directions. Lane and Hadley, impeccably Beaned in New Balance light hiking shoes, unwrinkled stretch chinos and plaid shirts just out of the box, are posing for a spring catalog. They seem slightly ill at ease, as if they feel silly having all this attention paid to them. They are good-looking people—he is tall and light-haired, she is slim and dark—but it is easy to see that they are not professional models. They look, in fact, like people from an L.L. Bean catalog. L.L. himself was his own model, the cheapest available, in the early catalogs.

Bean now publishes some 20 different catalogs a year, counting the four large seasonal books of 136 pages each that are sent to regular customers. The catalog art is sent to be digitalized on tape, composed into pages on CRT consoles and beamed to the printers by satellite—in an operation that begins in Freeport, continues in Warsaw, Ind. and is completed in Spartanburg, S.C. The expense of professional models would not add much to what all of this costs, but Gorman, very much his grandfather's grandson, clearly feels that the cleft-chinned men and the hearty, glorious women from the modeling agencies still would not look right.

By tradition, Bean's models not only look like real people, that is exactly what they are. The cheerful, imperfect faces in the catalogs are those of company employees and, in one recent instance, of Bill End's English setter, Rémy, a real dog. After Rémy made his appearance, looking jaunty on a Hollofil-stuffed, plaid dog bed, one Bean customer called in to say, Never mind the bed, where could he find such a dog?

No such stardom is likely for Lane or Hadley, because as it happens their photo will be cropped, showing only their snappy chinos, 97% cotton/3% Lycra spandex, which "look like your old favorites but provide a superior and comfortable nonbinding fit." Better luck next time, when one or the other may get to pose in some upper-body garment that usually has a head sticking out, such as a handknit Icelandic sweater or a camouflage mackinaw. In the meantime, the phones in the order department ring steadily. All of which suggests that L.L.'s 73-year-old bright idea is still in good hands.

[From the Baltimore Sun, Dec. 9, 1985]

THE MAINE THING IS SAYING YOU HAVE BEAN THERE

The best thing about L.L. Bean is that there isn't anything in the whole store I want, and the second best thing is that it's open all the time, 365 days a year, in case I change my mind.

The store, as you probably know, is in Freeport, Maine, a coastal town north of Portland. Although movie producers probably would pass it by when searching for the perfect New England set, the town nevertheless is in New England and therefore possesses some degree of what we may call "quaint quotient." Especially on Thanksgiving, when ice covers the ground and snow fills the air.

Picture this. Because of the holiday and hazardous driving conditions, the streets and sidewalks are virtually empty and silent in the snow. It is the kind of scene where serenity and almost pure simplicity cause you unconsciously to hold your breath, so as not to disturb even one element of the whole.

Then, you round a corner, and there it is. L.L. Bean. Big, modern, new. And amazingly, because you've seen almost no one else on the surrounding highways, hundreds of people appear, scurrying to and from hundreds of cars on the adjoining parking lots. All of a sudden, this tiny nick of New England is Saturday morning K mart.

Where did they all come from? And why, on Thanksgiving, are they not home with kith and kin, celebrating with American traditional turkey dinner and American traditional football watching? Because they have chosen an even more American, more traditional means of celebration. Shopping.

"Except for the baby, we did every bit of our entire Christmas shopping just in this one afternoon," says Mary Elizabeth Watson of Boston, who, along with her husband and two small children, is barely visible above the mountain of packages they've purchased.

All of it? What about elderly aunts and teeny-bopper nieces, we ask. Aren't there any of those on your list? The food section for the aunts, Ms. Watson says, and granny gowns for the nieces. But another woman, a visitor from Wisconsin, says she made only one purchase, a pair of corduroy slacks. "They're for me, just so I could go home with something that has 'L.L. Bean' on it," she says.

In our party is a young man, a freshman at nearby Bowdoin. He has chosen me as his ally because we are the scoffers of the group. We laugh at the plethora of BMWs, Volvos and Jeeps in the lot and shake our heads at all these Bean-crazed consumers: then walk inside for a better view of the spectacle.

The spacious lobby resembles that of a fine hotel and, after passing through—signing the guest book first, of course—we discover brightly lit, wide aisles, attractively arranged displays and clearly marked specials. The staff is friendly, helpful and efficient.

In spite of the crowd, checkout lines are short, there is ample space for browsing, and I soon realize that while there isn't anything in the store I want for myself, there are many things my nephews—one collegiate, the other outdoorsy—want. There are many things my brother wants and neighbors and old friends. And OK. There are a few things I might consent to own myself.

The freshman slides up to me and snickers. "This is capitalism run amok," he says.

"Umm," I reply and hold up two sweaters. "What do you think? The blue or the wine? The blue's on my color chart."

Clearly, he considers me a traitor. But I like L.L. Bean, I've decided. I like it a lot. As I said, the best thing about the store is that there isn't anything I want, and the second-best thing is that it's open all the time, in case I change my mind. Sometimes I do.●

INCREASES IN APPAREL IMPORTS NOT DUE TO DOLLAR

● Mr. HEINZ. Mr. President, one of the major issues in the debate Congress has been having on textile and apparel imports is the nature and source of the industries' problems. Throughout the debate there have been those, primarily academic economists, who have argued that the bulk of the problem is due to the high value of the dollar which has made imports relatively cheaper and our exports more expensive. Though this is an argument which has some validity when our entire economy's performance is examined, recent research demonstrates that, with respect to apparel imports, it is not the cause of the problem. Other factors, such as relative differences in labor costs, LDC industrial development and export promotion programs, and our negotiation and enforcement—or lack thereof—of bilateral agreements within the multifiber arrangement, have played a determinative role.

The research to which I refer, Mr. President, was done by Stanley Nehmer, president of Economic Consulting Services, Inc. Mr. Nehmer is probably one of the most experienced analysts of the textile and apparel industries in the country, having worked with them in both the Government and the private sector for more than 20 years. Mr. Nehmer and his colleagues at Economic Consulting Services make regular and frequent appearances before a number of congressional committees and are people on whom I rely for research and analysis on current international economic problems. Mr. Nehmer's latest study is an excellent piece of work on a timely subject. I commend it to Senators' attention, and I ask that it be printed in the RECORD.

The study follows:

REMARKS OF STANLEY NEHMER, PRESIDENT, ECONOMIC CONSULTING SERVICES INC., WASHINGTON, DC, TO INTERNATIONAL CONFERENCE OF THE KNITTING INDUSTRIES

CURRENCY FLUCTUATIONS AND INTERNATIONAL TRADE IN TEXTILES AND APPAREL: THE U.S. EXPERIENCE

I

Several important developments in the last few years with regard to the international trade and monetary positions of the United States have led many to conclude that they are all interrelated. Indeed some have been. But certainly not all.

The U.S. trade deficit rose in 1983 to $69 billion and again in 1984 to $123 billion. The forecast for this year is for a trade deficit of $140 billion to perhaps as high as $150 billion.

While this has been happening, the U.S. dollar was appreciating against the major currencies of the world by significant degrees. Between the end of 1982 and the end of 1984, the dollar appreciated by 7 percent against the Japanese yen, by 40 percent against the British pound, by 32 percent against the German mark, and by 43 percent against the French franc.

At the same time the Federal budget deficit in the U.S. was getting out of hand, keeping interest rates in this country high in relation to those in other countries. This has resulted in high demand for U.S. dollars by foreign investors seeking to place funds in relatively high yielding U.S. assets.

Thus, a high budget deficit, resulting in relatively high interest rates, spurring demand for U.S. dollars, has brought about an overvalued dollar in relation to other currencies, depressing the price of imports into the U.S. market and increasing the price of U.S. exports. The bottom line result, according to this analysis, is the large and growing U.S. trade deficit. If we can correct the overvalued U.S. dollar, many say, we will reduce our tremendous trade deficit.

If we apply this scenario to the textile/apparel situation we find that imports increased 32 percent in 1984, after a 25 percent increase in 1983. The textile/apparel trade deficit which was a mere $2.1 billion ten years ago became $10.6 billion in 1983 and $16.2 billion in 1984. In the first half of 1985, the textile/apparel trade deficit was 15 percent higher than in the same period a year earlier.

If the booming overall trade deficit is caused by the overvalued dollar, some say, then the import difficulties faced by the U.S. textile/apparel industries will be ameliorated when the U.S. dollar ceases to be overvalued and recedes to a lower rate of exchange with other currencies. Thus, to these soothsayers, both within the U.S. Government and those in the private sector, the cure for the very serious difficulties faced by the textile and apparel industries due to burgeoning imports, is to be found in rectifying the foreign exchange situation. Bring down the dollar, they say, and the textile/apparel import problems will be solved!

They are wrong. Certainly the meteoric rise in the strength of the dollar in recent years has had an impact on the level of imports into the U.S., but this has not been the primary cause of increasing textile/apparel imports. Superficial assumptions about the impact of the strength of the U.S. dollar on U.S. textile/apparel imports break down upon closer analysis.

Economic Consulting Services Inc. has done that analysis. I should like to share our findings with you.

II

We examined U.S. imports of textiles and apparel from the 25 largest country suppliers of these products to the United States. These 25 countries accounted for 92 percent of U.S. imports of textiles and apparel last year. The time period over which trends in imports and exchange rates and other factors were examined covered the years from 1974 to 1984. Total textile/apparel imports from these 25 countries rose from 3.9 billion square yard equivalents (SYE) in 1974 to 9.0 billion in 1984. Textile imports in this period increased from 2.1 billion SYE to 4.6 billion SYE apparel imports rose from 1.8 billion SYE to 4.4 billion SYE.

The 1974–84 period was chosen for several reasons. First, the years since 1974 cover the period during which the Multifiber Arrangement (MFA) has been in effect. Limiting our analysis to this time period permits a review of trends under a single ongoing international trade regime.

Second, this time period provides some historical perspective in which the recent trends in imports and their relationship to U.S. exchange rate movements can be more properly assessed. Significant increases in imports of textiles and apparel have occurred in the past absent the strong appreciation of the dollar, suggesting that other economic forces are at work in the current import surge as well.

Finally, the years 1974–1984 offer a period in which the U.S. dollar went through several phases of rapid change and relative stability. During the period we found the following changes in the strength of the U.S dollar against other world currencies: small fluctuations during 1974 and 1975, stability of the U.S. dollar during the 1976–1977 period, significant depreciation during 1978, stability at the "depreciated" level reached by year-end 1978 throughout 1979 and 1980, the return to the 1976–1977 level by 1981, and then steady and rapid appreciation through 1982–1984.

General assumptions about the relationship between the strength or weakness of the U.S. dollar and trends in U.S. imports of textiles and apparel can overlook the complexities of trade in these products. There have been for years several dozen major suppliers of textiles and apparel to the United States market. The trends in U.S. imports from these countries have not operated in concert but rather have fluctuated dramatically in patterns quite different from each other. Moreover, the rate of exchange between the U.S. dollar and the respective currencies of each of these countries has also moved in different patterns.

The broad product category known as "textiles and apparel" actually encompasses thousands of different products. An evaluation of the impact of exchange rate changes on U.S. imports had to take into account, at the very least, the two major groups of products, namely, apparel products and textile products. In general, the industrial structure, the level of capital intensity, the production process technology, and the characteristics of the end-use markets for

apparel vary quite dramatically from those of textiles.

There are other key factors to be considered. Primary among these other factors is relative labor costs. Textile production and, particularly, apparel production are relatively labor intensive. As a result, wage rates and overall labor costs are an important determinant of competitiveness of producers of these products, both within national economies and internationally. Given the wide disparity in labor costs among the major textile and apparel producing countries in the world, one would expect to find different relationships between exchange rate movements and the trend of U.S. imports from countries with significant differences in labor costs.

A second factor involves the active industrial development and export promotion programs of numerous developing countries. Such programs have frequently targeted the textile and apparel sectors as a prime means of creating employment and generating foreign exchange. Often these programs have involved the use of unfair trade practices by foreign countries and/or suppliers to augment their competitiveness. The use of subsidies that unfairly promote exports is widespread among many countries covered by our analysis and has been specifically documented with respect to textiles and apparel for many. These activities and practices have led to increased exports to the United States quite independently of exchange rate movements.

The third factor which will have a major impact on the trends in U.S. imports of textiles and apparel is competition among major country suppliers. Because of the size of the U.S. market and the importance of that market to many of these countries, intense competition has developed. One tool at the disposal of each country is the competitive devaluation of their currencies to improve price competitiveness. This does not refer to price competitiveness with U.S. producers, an advantage which most developing countries can already claim due to greatly lower labor costs. Rather this refers to price competitiveness with respect to other competing foreign suppliers.

Such devaluations may bear little or no relationship to the overall international strength or weakness of the U.S. dollar and can thus occur whether the U.S. dollar is considered generally strong or weak. These competitive devaluations may, however, have an impact on the ability of a given developing country to remain even with, or to increase sales to the U.S. market at a rate faster than, its competitors. This factor may affect the particular source of U.S. imports of textiles and apparel in any given year, but not the trend in aggeregate imports.

A fourth factor which has had an impact on the level of imports from individual countries has been the implementation of bilateral agreements between the United States and various foreign country suppliers pursuant to the Multi-Fiber Arrangement. The irregular application of selective controls on imports from various countries over the past decade in attempts to prevent disruption of the U.S. market has caused some fluctuations in the pattern of trade from various countries. In particular, the focus of import restraints on the very largest suppliers (i.e., Hong Kong, Taiwan, and Korea) has fostered the development of "new starters", many of which have grown rapidly in recent years.

The final factor which must be taken into account is, of course, the trend in the level of U.S. demand for textile and apparel products. Without properly factoring in the impact of changes in U.S. demand, assessments of the particular impact of exchange rate movements on the level of U.S. imports will be rendered less useful.

In consideration of the first of these factors—relative labor costs—one hypothesis of the analysis was that the trends in imports from those foreign countries with labor costs close or comparable to those in the United States would reflect relatively higher sensitivity to the rate of exchange between the U.S. dollar and the currencies of such countries. On the other hand, those countries with a significant absolute disparity in labor cost compared with the United States could be expected to demonstrate considerably less sensitivity in the relationship between their level of exports of textiles and apparel to the United States and the rate of exchange of their currencies against the U.S. dollar.

A second hypothesis was that U.S. imports of apparel, as opposed to textiles, would tend to show a less obvious relationship with exchange rate movements for several reasons.

First, apparel production is significantly more labor intensive than textile production. This would make U.S. apparel imports from highly competitive low-wage suppliers less sensitive to exchange rate movements than textile imports.

Second, apparel imports serve markets that are not "commodity type" markets as in the case of markets for most major textile products such as yarn and fabrics. Therefore, textile product markets are more sensitive to smaller price changes among suppliers and can be expected to be more sensitive to exchange rate movements.

Finally, this hypothesis also rests upon the fact that certain bilateral agreements may have led to a greater focus by certain foreign countries on the export of apparel and others on the export of textiles. For example, any restraining impact of a bilateral agreement on overall imports from a given country might cause a shift to apparel exports, which represent significantly higher value added per physical unit. On the other hand, a country facing particular restraints on major items of apparel could shift its focus to unrestrained textile categories. This would tend to affect U.S. import trends quite independently from exchange rate movements.

III

There were eighteen low-wage, developing countries included among the top 25 suppliers in 1984. Aggregate imports from these countries have increased sharply. Between 1974 and 1984, apparel imports from these eighteen countries rose from 1.5 billion SYE to 4.1 billion SYE. Textile imports rose from 0.86 billion SYE to 2.7 billion SYE.

The remaining top foreign country suppliers of textiles and apparel to the U.S. market in 1984 included five Western European countries, Canada, and Japan. Among the Western European countries were the United Kingdom, France, West Germany, Italy, and Spain. These seven countries generally have considerably higher labor costs than other countries included among the top 25 suppliers. One result of this is the heavy concentration of U.S. imports from these countries in textiles, as opposed to apparel. In 1984, the United States imported 1.1 billion square yard equivalents (SYE) of textiles and apparel from the Western European countries. Of this total, 1.0 billion SYE were textiles and 0.10 billion SYE were apparel.

Japan alone accounted for 0.74 billion SYE of U.S. textile and apparel imports in 1984, with imports of textiles at 0.6 billion SYE and imports of apparel at 0.14 billion SYE. With respect to Canada, the United States imported 0.30 billion SYE in 1984, virtually all of which was textiles.

Although there are some significant differences in import trends among these seven higher-wage countries, they have together experienced a loss in their share of U.S. imports since 1974. Of the combined total of imports from the top 25 suppliers covered in our analysis, these seven countries' share of U.S. textile imports fell from 59 percent in 1974 to 41 percent in 1984. For apparel, the decline was from an already low 14 percent to only 6 percent.

Thus, the overall trend in imports from the higher-wage countries is downward over the 1974–1984 period, despite increases registered in 1983 and 1984. In contrast, there is a clear increasing trend in imports from the eighteen low-wage developing countries throughout the period.

The period upon which this analysis focused includes the years 1982–1984. This is the period during which the dollar appreciated strongly against the currencies of the rest of the world to levels well above those registered during the previous decade. This is also the period when the U.S. began to experience massive increases in its merchandise trade deficit to successive record levels. The coincident trends in the U.S. dollar appreciation and the U.S. trade deficit have led, quite logically, to a common assumption that the latter is largely a function of the former. It is this period that should, therefore, show the greatest impact of the U.S. dollar appreciation on U.S. imports of textiles and apparel.

The first step of the analysis involved generating a general measurement of the magnitude of the impact of the U.S. dollar appreciation on the level of U.S. imports of textiles and apparel. Assuming the existence of such an impact, the central question to be answered is what would imports have been if the U.S. dollar had not appreciated during 1982–1984, all other things being equal. Available data provide a straightforward approach to estimating the answer.

The premise of this approach is that the growth in imports of textiles and apparel in recent years cannot be attributed to the appreciating U.S. dollar for those countries with currencies that have either maintained a stable rate of exchange with the U.S. dollar during the relevant period, or that have appreciated against the U.S. dollar. A review of the trends in each of the exchange rates between the U.S. dollar and the currencies of each of the top twenty-five suppliers identified several such instances, including the Dominican Republic, Haiti, Malaysia, Singapore, and Taiwan. In addition, Egypt has maintained parity with the U.S. dollar since 1979.

In 1984, these six countries accounted for 533 million SYE of textiles, and 1.2 billion SYE of apparel. Thus, these six countries in 1984 accounted for more than 11 percent of textile imports and for more than 27 percent of apparel imports from the 25 top suppliers.

These countries have maintained relatively stable or appreciating rates of exchange against the U.S. dollar. Of particular relevance is that in 1981 and 1984, and for most countries in other years as well, the curren-

cies of each country were at virtually the same level against the U.S. dollar.

Imports of textiles and apparel from these countries should thus provide a useful measurement of import trends that are reasonably exchange rate "neutral". Moreover, trends from these low-wage countries can provide some indication of the basic competitiveness of low-wage countries vis a vis the U.S. industry and provide a basis for estimating what U.S. imports from other low-wage suppliers would have been in the absence of the recent strong U.S. dollar appreciation.

Between 1981 and 1984, U.S. imports of textiles from the six exchange rate neutral countries rose by 84 percent, while imports of apparel increased by 48 percent. If we then look at the import growth rates of the other nineteen top suppliers, virtually all of which experienced significant depreciation of their currencies against the U.S. dollar during 1981-1984, we find that U.S. imports of textiles from these nineteen other top suppliers did not rise markedly more than the increase in textile imports from countries with relatively stable exchange rates. With respect to apparel, imports from the nineteen other countries rose by essentially the same rate as apparel imports from the six exchange rate neutral countries.

These comparisons suggest that the U.S. dollar appreciation in 1982-1984 had an impact, albeit relatively small, on the overall increase in U.S. imports of textiles, but had virtually no impact on increasing U.S. imports of apparel. These findings support the hypothesis that textile imports have been more sensitive to the U.S. dollar appreciation than apparel imports.

The observed exchange rate impact on U.S. textile imports can be quantified. If U.S. textile imports from the nineteen major suppliers had increased only by as much as U.S. textile imports from the six exchange rate neutral countries, then U.S. textile imports from these nineteen countries would have been 3.97 billion SYE in 1984 instead of the actual 4.12 billion SYE. This difference of 150 million SYE accounts for 7 percent of the total increase in U.S. textile imports between 1981 and 1984 from the top twenty-five countries. By this measurement, therefore, the U.S. dollar appreciation accounted for less than 10 percent of the increase in U.S. imports of textiles from these countries during the 1981-1984 period.

With respect to apparel, as noted, the observed exchange rate effect was negligible, as imports from the six exchange rate neutral countries and all other countries increased by essentially the same percent.

A further breakdown of the nineteen other top countries was done to ascertain any obvious patterns. Imports of both textiles and apparel from the twelve low-wage developing countries included among the nineteen other countries rose somewhat less rapidly than imports from the six exchange rate neutral countries.

By contrast, imports of both textiles and apparel from the five European countries and from Canada rose much more rapidly than other countries. Textile imports rose by 168 percent and 158 percent, respectively, from these sources. Apparel imports rose by 250 percent and 136 percent, respectively.

Japan alone showed growth of 46 percent in imports of textiles over the 1981-1984 period, or less than other countries, while growth in imports of apparel from Japan was 49 percent, or in line with all countries.

These comparisons strongly support the hypothesis that the U.S. dollar appreciation has had a greater impact on imports from countries with wage rates comparable to or close to those in the United States. The relatively small difference in the rates of growth in imports of both textiles and apparel from the six exchange rate neutral countries and the comparable growth in imports from other low-wage countries and Japan once again suggest little impact from the U.S. dollar appreciation.

To summarize our findings—

A large share of U.S. imports of textiles and apparel is supplied by a number of low-wage developing countries which have maintained relatively stable rates of exchange between their currencies and the U.S. dollar.

Between 1981 and 1984, aggregate U.S. imports from these six countries with stable rates of exchange against the dollar increased rapidly. Textile imports rose by 84 percent, and apparel imports rose by 48 percent.

The remaining major suppliers of U.S. imports of textiles and apparel include both low-wage and high-wage countries, most of whose currencies have depreciated significantly in the last several years.

Between 1981 and 1984, U.S. imports from these other major supplying countries also increased rapidly, but at a rate that was not significantly different than import growth from countries with stable exchange rates. Textile imports rose by 91 percent and apparel import rose by 49 percent.

A further breakdown of the major supplying countries experiencing depreciation against the U.S. dollar revealed significant differences between higher-wage countries and low-wage countries. Imports of both textiles and apparel from the low-wage developing countries rose less rapidly than imports from the six countries with relatively stable exchange rates. Imports of textiles rose 76 percent, and imports of apparel rose 46 percent.

By contrast, imports of both textiles and apparel from the five European countries and from Canada rose much more rapidly than other countries. Textile imports rose by 168 percent and 158 percent, respectively, from these sources. Apparel imports rose by 250 percent and 136 percent, respectively.

Japan alone showed growth of 46 percent in imports of textiles over the 1981-1984 period, or less than other countries, while growth in imports of apparel from Japan was 49 percent, or roughly in line with all countries.

Further analysis on a country-by-country basis supported the differences found in the impact of U.S. dollar appreciation on imports from higher-wage and low-wage countries. Country analyses suggest that virtually all apparel import growth and much of textile import growth from low-wage countries was not related to the U.S. dollar appreciation.

Country analyses further suggest that the increase in imports from the European countries and Canada, most of which is textiles, is largely related to the U.S. dollar appreciation.

My remarks would not be complete without some discussion of the recent intervention in the foreign exchange markets by the U.S., United Kingdom, France, Germany and Japan. On September 22, 1985, the finance ministers of these five countries agreed to a plan for governmental intervention in the foreign exchange markets to force down the value of the dollar. Recognize that this a formidable task. The daily volume of foreign exchange trading in U.S. dollars is absolutely immense, estimated at more than $100 billion per day.

Intervention has meant that the central banks in the other four countries embarked upon a program of selling U.S. dollars. As more dollars are made available for sale, the value of the dollar in relation to the other currencies declines while their values in relation to the dollar increases.

This is pretty strong medicine for these other governments to take. After all, to the extent their currencies appreciate against the dollar, their exports to us become more expensive and our exports to them become cheaper.

The greatest change that has happened since the September 22 meeting has been with the Japanese yen which has appreciated by about 16 percent to just over 200 yen to the dollar from around 240 yen to the dollar. The increase for both the German mark and the French franc has been around 9 percent. The British pound has strengthened by about 5 percent.

Two questions for us to consider is whether this decline in the value of the dollar will last and perhaps continue to decline, and whether this development will have an effect on the U.S. trade deficit and specifically on U.S. textile/apparel imports.

On the first question, no one knows what targets were agreed upon by the five finance ministers. Reports that are circulating indicated that the target for the yen is 190 to the dollar.

Time and again, governments have learned that you cannot fight "the market." You can make it pause, you can encourage it one way or the other, but corporate treasurers around the globe will not make business decisions on any basis other than the fundamentals of rates of return and profit. As the Economist magazine stated in an editorial immediately after the September 22 announcement, those intervening "will succeed only if they are working with the grain of the market."

The grain is set by economic fundamentals of monetary and fiscal policy. The important questions outstanding are: Will the United States be able to take the steps necessary to cut its budget deficit enough to ease its intense demand for credit? How long will governments, including our own, permit the massive buying and selling of currencies to expand or contract their own money supplies without measures to "sterilize" such movements? (Note that monetary policy is no less controversial in other countries than in the Unites States.) If significant monetary countermeasures by these governments are taken, it is guaranteed that there will be little lasting change in the strength of the dollar.

My own cynical view is that under present circumstances considering the policies of the governments involved, I do not believe that what has happened since September 22 will be of lasting effect.

But even if long lasting, we should remember that changes of this magnitude are unlikely to have a sufficiently powerful effect on trade flows to make much of a dent in our trade deficit. In addition, because of normal commercial ordering schedules, the trade effects that do take place will only begin to show up sometime next year.

Finally, if our analysis of the textile/apparel import situation in relation to the foreign exchange issue is correct, the recent developments will have no effect on the bulk of our textile/apparel imports, although conceivably, these developments could have an ameliorating effect sometime next year

on imports from Western Europe and perhaps Japan.●

NOTABLE ACTIVITIES FOR VETERANS IN ARKANSAS

● Mr. PRYOR. Mr. President, I would like to take a moment today to commend two notable activities in my home State of Arkansas. These are fitting examples of what can happen when public and private interests join together in a special partnership and solve some serious local problems.

There are today 55 national cemeteries in this country, cemeteries which theoretically contain a burial plot for every man and woman who ever served in our country's Armed Forces. But those cemeteries are quickly filling up. Since World War II, the Korean conflict, and the Vietnam war, we are literally running out of space.

In Arkansas we have three national cemeteries. These are in Little Rock, Fayetteville, and Fort Smith. The Little Rock cemetery is scheduled to close by the year 1987 and the one in Fayetteville next year. There are no plans to build any new cemeteries in the State.

But fortunately, Mr. President, a solution is in sight. And my fellow Arkansans, as they have done so many times in the past, are working to solve this problem on their own.

They have come up with a method of public and private partnership that can serve as a model to all of us. Fundraising efforts are underway in Fayetteville and Little Rock to expand those cemeteries. This is an attempt to ensure that those who gave so much in this country's hour of need will be given the right of a burial plot in a national cemetery.

The goal in Fayetteville is $200,000, and in Little Rock $100,000. When these are reached the land will be given to the Government to be maintained as part of the national cemetery system. This will be a gift in honor of those veterans who made the ultimate sacrifice. And with this successful expansion, burial space in Arkansas should be adequate well into the 21st century.

The other example of public and private partnership in Arkansas involves the men and women who served in Vietnam. As you know, Mr. President, the Vietnam Veterans Memorial here in Washington, dedicated in 1982, has become one of the most visited attractions in our Nation's Capital. Its presence has created an outpouring of affection for the veterans who served our country in one of its most trying times.

In Arkansas we are planning to pay tribute by building a monument to the nearly 1,000 Arkansans who answered their country's call by giving their lives. And again we are moving on our own to do the job, raising the necessary funds ourselves.

Act 394 of the 74th General Assembly of the State of Arkansas authorized the establishment of a fitting memorial to the Arkansas Vietnam veterans and provided a spot for its construction on the State capitol grounds. I am pleased to say that the goal of raising $100,000 for this memorial is almost a reality, and it is our hope that it will be dedicated on Veterans Day next year.

These are two examples, Mr. President, of the spirit of my home State and the people who live there. I feel they are worthy of recognition by my colleagues in the Senate.●

TRIBUTE TO AMBASSADOR RICHARD MULLER, AMBASSADOR OF FINLAND TO THE UNITED STATES

● Mr. LUGAR. Mr. President, this country, and the Congress in particular, is about to lose a valued friend. Dick Muller, the current Ambassador of Finland to the United States, is about to return home after years of valuable service in Washington on behalf of his country.

No foreign Ambassador to the United States has represented the interests and views of his country more fervently or objectively than Ambassador Muller. Like his immediate predecessor, he has not been content to merely observe the policymaking process in Washington; rather, he has sought out those in positions of authority not only in an effort to understand the process but also to insure that the views and positions of his country were taken into account in the decisionmaking process.

He initiated a series of monthly seminars at his residence that brought together key foreign policy personalities in Washington. He imparted to those seminar discussions great intellectual stimulation and rigor, while compelling the participants to consider all sides of an issue, particularly those with a direct impact on Northern Europe. He also sought to share his many contacts with other officials of the Finnish Government, including members of the Foreign Affairs Committee of the Finnish Parliament. It has been my pleasure as chairman of the Senate Foreign Relations Committee to welcome the Ambassador and visiting members of the Finnish Parliament to committee discussions on numerous occasions.

But his educational and representational tasks were not confined to Washington. He constantly urged Members of Congress to visit Finland in order to more fully appreciate the values, views and positions of the Finnish people and political parties. Last year, I was privileged to visit Finland for 3 days along with Senators ROTH and CHAFEE. It was a most enlightening and enjoyable experience, one that contributed greatly to my understanding of the policies and positions of the Finnish Government. Ambassador Muller took a personal interest and role in developing a schedule which made the visit so successful.

The firm foundation on which bilateral Finnish-American relations rests owes much to Dick Muller's talent and diligence. He has left his mark on Washington; he has also put his country "on the map" in the policy making community in this country. He has helped to mold our perceptions of Finland in a constructive manner. Our keener appreciation of Finland's policies and role in the world owes much to his untiring efforts.

We will miss him in Washington, but the improved level of understanding between our two countries will remain as a legacy of his tenure as Ambassador of Finland to the United States.●

FORMER SPECIAL AGENTS OF THE FBI URGE REDUCTION IN SOVIET BLOCK OFFICIALS IN UNITED STATES

● Mr. DENTON. Mr. President, the recent wave of espionage cases has made our country more aware of the threat to national security posed by the intelligence operations of the Soviet block countries. Those cases have involved the U.S. military services, and even U.S. intelligence agencies. The indication is that the hostile intelligence presence is widespread, and that the damage being done to our national security is indeed very serious.

Although much of the hostile intelligence activity against United States interests occurs overseas, the gravest threat to the national security of the United States is represented by the extensive presence of Soviet bloc intelligence officials in our country. As a recent unclassified report from the Department of Defense indicates, the Soviets have amassed, through their systematic intelligence gathering efforts, a large amount of material about American military technology and programs, as well as other national security-related information.

Most of the intelligence collected by the Soviets and their surrogates in the United States appears to derive from the activities of their diplomats and other official representatives. More then 2,500 Soviet and East bloc officials and quasi-official representatives—such as press correspondents and commerical officers—are present in the United States at any one time. The Soviets alone have about 1,400 official personnel of one type or another in the United States.

The FBI has estimated that between one-third and 40 percent of all Soviet

and Eastern bloc personnel in the United States are professional intelligence officers. Most of the rest must be presumed to be co-opted by the KGB, GRU—the Soviet military intelligence organization—or other East bloc intelligence services for a variety of espionage activities, including collecting information, spotting and recruiting Americans and other persons, serving as couriers, and other tasks.

All in all, Soviet and East bloc intelligence gathering in the United States causes untold damage to our national security. The United States technological lead in certain defense-related areas has been eroded by Soviet successes in obtaining classified scientific and technical information. The security of our military operations has been compromised by Soviet agents within the military. Soviet spying has cost us billions of dollars in stolen technology and military secrets. To reverse the trend, we must reduce the number of Soviet bloc officials in our country.

Mr. President, I ask to place in the RECORD a resolution, approved by the Society of Former Special Agents of the Federal Bureau of Investigation, urging support for a reduction in the number of Soviet bloc officials in our country as a means of countering Soviet bloc espionage. I urge my colleagues to review that well-reasoned resolution.

The resolution follows:

RESOLUTION ON COUNTERING SOVIET BLOC ESPIONAGE

Whereas, there are more than 2,500 Soviet bloc officials operating in the United States; and

Whereas, one-third to 40 percent of these diplomatic officials have intelligence missions in our country; and

Whereas, there has been a recent spate of arrests of Americans charged with espionage on behalf of the KGB and its allied intelligence services; and

Whereas, these arrests attest to the grave danger posed to our national security by the presence in the United States of such massive numbers of Soviet bloc spies; and

Whereas, the Director of the Federal Bureau of Investigation has stated, "We cannot, with the resources that have been given to us, continue to deal with foreign hostile presence in this country, without doing one of two things—increasing the resources or reducing the presence. I happen to favor reducing the presence": Now, therefore, be it

Resolved, That the Society of Former Special Agents of the Federal Bureau of Investigation, Inc., in support of the Director of the F.B.I., urges all patriotic Americans to lend their support and call for a reduction in the number of Soviet bloc officials in our country.

CHARLES J. WYLAND,
President, Society of Former Special Agents of the F.B.I., Inc.
LONG ISLAND CITY, NY, *December 9, 1985.*

JIM JONES

● Mr. SYMMS. Mr. President, whenever a man of real conviction, or solid "guts" as some call it, comes along, I believe the world should take note.

Mr. President, I would like to bring to the attention of my colleagues one such man, Idaho's attorney general, Jim Jones.

Jim may be known by some of my colleagues' staff members. At one time, he was a legislative assistant to former Senator Len Jordan of Idaho. While with Senator Jordan, Jim learned the virtues of brevity and tenacity.

That tenacity, together with his "guts" has helped Jim as he has taken on some very unpopular cases as attorney general.

But Jim has never been one to back away from a challenge. I really feel that if we had more people of solid conviction, more people like Jim Jones, our great Nation would be a far better place in which to live.

Mr. President, I ask that the following article from the Idaho Statesman about Jim Jones be printed in the RECORD.

The article follows:

[From the Idaho Statesman, Oct. 20, 1985]

JIM JONES: "I HAVE PROBABLY SUED MORE OF MY FRIENDS THAN MY ENEMIES."

(By Rod Gramer)

Three years ago, Idaho Attorney General Jim Jones was returning to Idaho from Washington, D.C., when he struck up a conversation with a man who was sitting in the next seat on the airplane.

The man asked Jones if he was a college student. When Jones told him that he was 40 years old and the attorney general of Idaho, the man replied, "Oh, you don't look like it."

A lot of people mistake Jones' age. It's easy to do, given his boyish face, post-like build and low-key personality.

"Several years ago I felt bad about it," Jones said. "After you hit 40, such comments only make you feel good."

Strangers might mistake Jones for a mild-mannered college student. But the people who have tangled with him on legal or political issues would not make the same mistake. After three years at the helm of the state's largest law office, Jones has established himself as a political maverick.

"I have probably sued more of my friends than my enemies," Jones said.

Jones was in office less than a year when he challenged the Idaho Power Co., one of the most Republican and politically powerful companies in Idaho, over water rights. Since then, he has clashed repeatedly with the company.

Idaho Power isn't the only one that has fenced with Jones. He has taken on the state's top Democrats and northern Idaho citizens over a Priest Lake resort development; he has sued gasoline dealers in Pocatello for price fixing; and soon he will argue for the right-to-work law before the Idaho Supreme Court.

Because the Legislature refused to fund a consumer fraud division in his office, Jones recently set up a volunteer program. But he hasn't given up on the Legislature: He plans to ask it for $129,000 next year to start a consumer fraud division.

The "con artists" know Idaho doesn't have a program and take advantage of it, Jones said. He said the average citizens can't afford to spend $400 pursuing a con artist. "We shouldn't have to put up with it," Jones said.

Jones seems to relish his reputation. "I think being willing to take a risk; I think people like that. I think you can be a low-key person and still have solid principles . . .," he said.

Jones grew up on a farm near Eden, 20 miles east of Jerome, and attended the University of Oregon, where he majored in engineering. He decided after a year that he didn't want to sit over a drawing board for the next 50 years.

He switched his major to political science and decided he wanted to be a U.S. Senator. He graduated from Northwestern Law School in Chicago.

After law school, Jones went into the Army as a first lieutenant (he had been in ROTC during college) and was sent to Vietnam, where he served from July 1968 to August 1969. Jones left the Army as a captain.

While in school, he worked summers for Idaho's Republican Sen. Len Jordan. In 1970, he joined Jordan's staff as a legislative assistant. It was then that Jones met his wife, Nancy who was working as a secretary for the House Administration Committee. They now have one child, Kathy, 8.

NO WORDS WASTED

In Jordan, Jones found a model for his own political ambition.

"He (Jordan) wouldn't waste 200 words when 20 would do," Jones said. "He didn't do things just to get political mileage out of them. He was a pretty good guy to look up to."

Jones liked Jordan's independent, common-sense style, which he believes he has duplicated in the attorney general's office.

Idaho Power probably wouldn't argue that Jones is an independent cuss. In 1982, Jones was interviewed by Idaho Power's political action committee, received its endorsement and its money.

But Idaho Power's PAC failed to ask Jones about water rights. If it had, Jones would have said that hydroelectric water rights should have a lower priority than other water uses. When the Idaho Supreme Court ruled in late 1982 that Idaho Power's water rights were not subordinated to other uses, Jones led efforts to get the company's rights subordinated.

Idaho Power Senior Vice President Logan Lanham told Jones that they should maintain good relations, even though they were on opposite sides of the water issue, Jones said. But the good relations didn't last long.

"It seemed from that period on the subject escalated," Jones said. "Each time they stepped up the tempo, I felt the state had to, too."

When Idaho Power launched a TV ad campaign to promote its water stand, Jones accused it of using ratepayers' money for propaganda. A pro-Idaho Power state senator accused Jones of having a conflict of interest because his family's water rights were at stake.

. . . A BIT PUZZLING

In an unprecedented move, Jones has filed as an intervenor in Idaho Power's $84 million rate increase case before the Idaho Public Utilities Commission.

Idaho Power spokesman Jim Taney said the company wonders about some of Jones' positions, such as intervening in the rate case. "It is a bit puzzling because the PUC is

staffed by members of the attorney general's staff," he said.

Taney said there are issues on which Jones and Idaho Power agree, but he admitted the rhetoric on both sides was excessive during the water rights fight. "At times we thought he (Jones) was excessive in some of the things he said, which made it more difficult," he said.

A friend recently asked Lanham if Jones could expect a donation from Idaho Power in 1986. Lanham replied with a "very cold no," Jones said.

Some people think Jones has benefited politically by taking on Idaho Power. His water stand probably helped him in eastern Idaho, where he could use some political fence-mending after challenging former 2nd District Rep. George Hansen in the 1978 and 1980 Republican primaries.

LIKE ROBIN HOOD

Democrats say Jones is vulnerable because he supported the state land swap with Diamond Lands Corp. on Priest Lake. When Jones went to Priest River last July, he was met by an angry crowd carrying placards and singing an anti-Jones song to the music of "John Brown's Body."

Democratic Chairman Mel Morgan said Jones made Justice Department lawyers look like "like Robin Hood" when he filed a civil lawsuit against Pocatello gas dealers, who were convicted of price fixing.

The Justice Department prosecuted the dealers for price-fixing and Jones later sued them for civil damages. The civil suit was settled out of court for $130,000. Jones plans to ask the court to give the money to the Bannock County Highway District.

Jones admits that 99 percent of his mail ran against the suit. "It seemed like everyone in the Rotary Club and all of my supporters" wrote, he said.

But Jones said: "If you are the state's lawyer, you have to pursue the unpopular cases as well as the popular ones."

On election day 1986, Jones hopes voters will back him because he took on the unpopular causes. "I think people like to see someone who will stick his neck on the line and do what's right for the state," he said.

With all his enemies, one would expect to see people standing in line next year to challenge Jones. But no Republican opponent is on the horizon, and the Democrats are having trouble finding a candidate.

THE POWER OF MONEY

Morgan said Democrats are concerned that Jones will "buy" the election with his personal wealth. "If not for that, we'd have two or three candidates interested in the job," he said.

Jones has spent about $220,000 of his own money in his two unsuccessful campaigns for Congress and his 1982 attorney general's race.

Jones earns about $100,000 a year, $42,000 from his attorney general's salary and $58,000 from his one-fifth interest in the family's corporate farm. The family corporation farms, 3,000 acres in the Magic Valley and operates a cattle feed lot.

Morgan said four Democrats may challenge Jones: Preston lawyer J.D. Williams; former Blaine County Prosecutor Keith Roark, Bonneville Democratic Chairman Russ Webb, and state Rep. Larry Echo-Hawk, D-Pocatello. But Williams who lost to Jones in 1982 by 5,980 votes, says he probably won't run. EchoHawk and Roark say they won't. Webb is thinking about it.

In one breath, Webb lists all the reasons Jones is vulnerable. In the next, he counts all the reasons not to run. One reason is that "lawyers are smart enough to avoid a suicide mission," he said.

If he runs, Webb thinks some money would come from Jones' foes. "I think it's fair to say there are a few dollars there that will shake off the branches without a lot of work," he said. The question is, how much, he added.

Jones said he's no longer interested in a House seat. He is looking for a race in 1990 for governor or for the Senate seat now held by Republican Jim McClure.

"I'd much prefer the Senate, if it's open," Jones said. He is sentimental about it; McClure's seat used to belong to Len Jordan. "If I can fill the seat, that is an additional inducement."●

IDAHO SPUD

● Mr. SYMMS. Mr. President, as we enter this holiday time our thoughts often turn to the symbols of the season: children, gifts, music, and candy. It is the latter that I want to bring to my colleagues' attention.

Mr. President, many of my colleagues probably do not know that Idaho has a thriving candy industry; and even has its own famous candy bar, the Idaho Spud, which sells very well along side Snickers and other national candies.

The Idaho Candy Co. owned by my friend John Wagers, still produces sweets in the same place, using much of the same equipment, as it did decades ago. In fact, in this high-technology age, a stroll into Idaho Candy Co. may remind a person of a trip to Santa's workshop.

Mr. President, I commend the founders and owners of the Idaho Candy Co. for their entrepreneurship, their concern for quality, and their support for their community.

Mr. President, I request that the attached article from the Idaho Statesman be printed in the RECORD.

The article follows:

[From the Idaho Statesman, Nov. 17, 1985]

THE CANDY MAN

(By Paul Beebe)

With its old-fashioned machines, glossy maple floors and an elevator still driven by leather belts, the Idaho Candy Co. factory on South 8th Street seems more like a museum than the modern business it actually is.

Idaho Candy, reportedly the state's oldest and largest candy-maker and distributor of confections, is preparing for the Christmas holiday season. But, inside the turn-of-the-century brick building on the east side of 8th Street, the frenetic Christmas season rush typical of late 20th-century factories still is a thing of the future.

The factory, at 512 S. 8th St., is just up the street from the company offices and shipping department at 500 S. 8th St. Two-thirds of the company's business is wholesaling confections, tobacco and other products. The rest is candy-making.

Under the high ceilings of the brick factory's second floor last week, chief candy-maker and plant manager Walter Gericke directed the production of 6 tons of hard Christmas candy.

With almost three decades of experience under his belt, Gericke rapidly worked coloring and flavor into a hundred-pound lump of sugar and corn syrup that had been scooped from an old copper vacuum pot.

Two assistants placed the lump into a machine where it was slowly turned. Soon, Gericke was feeding a green and white ribbon of candy into a second machine that shaped, textured and cut the plastic-like mass into hundreds of tiny candies.

"It's like being an artist," the German-born Gericke said later. "You have such a variety of items and decorations you can make. I've enjoyed it all my life."

The Christmas candy-making is watched over by John Wagers, an accountant who bought Idaho Candy two years ago from former owner Don Wakeman. Showing off his business to an outsider, Wagers acts more like a proud parent than the owner of a large company.

He likens candy-making to a retailing business. The company makes products that its customers want to buy.

"Retailing is a fun game," he said. "There is a magic in retailing. If I can come up with a good product (at the factory), then I know it can be resold."

Christmas candy sales are important, but the company's bread-and-butter product is the Idaho Spud, a coconut and chocolate-covered candy bar with a marshmallow center introduced by company founder T.O. Smith in the early 1900s. Wagers says the Spud, which is a regional brand, sells well alongside such national giants as the Snickers bar.

Two other candies also introduced by Smith—butter toffee and a peanut cluster bar with a vanilla center and smothered in chocolate known as the Old Faithful—also are large sellers.

Wagers declined to say what he paid for Idaho Candy or what its annual sales figures are. But, since 1983, when he bought the firm, sales have chugged forward 15 percent each year and the company is shipping about eight tons of candy to customers every day.

Is it profitable?

"You bet it is," Wagers said. "It's a stable business and a business that gives a reasonable return for the investment."

Wagers sees little advantage to modernizing the operation, despite the fact some machines are nearly 100 years old. Replacement parts are available, and "the new equipment would be somewhat the same thing," he said.

He is frequently amazed at the volume of candy that enters and leaves the company warehouse just down the street from the plant. On the day he took over the actual operations of Idaho Candy, he placed an order for 12 tons of licorice, which turned out to be little more than a month's supply.

"I had no idea people could eat so much," he said.

In Idaho Candy's main office are wooden cases that display most of the candies made or distributed by the firm. On the walls are old pictures of the company. Missing, however, is a picture of the founder, who Wagers calls a "genius."

Smith started making candy at the age of 17, shortly after leaving his family home in Salt Lake City. After working in several cities, he became a journeyman candymaker for McDonald's Candy Co. in Salt Lake City.

When he moved to Idaho in 1901, he tried other professions, working as a farmer, railroad fireman and construction worker.

Wagers said Smith helped build the Dewey Palace Hotel in Nampa.

But Smith decided to return to candymaking. In 1904, he started his own business in his home at 905 N. 7th St. When the business outgrew his house, Smith started a small factory behind what now is known as Baird's Dry Cleaners at 902 N. 8th St.

One of Smith's employees, Violet Brewer, 85, still works for the company. She began working at Idaho Candy 57 years ago, when she was 13.

A legend among the 22 employees for her longevity and the hand-dipped chocolates that she used to make, Brewer said she has no intention of retiring soon.

'I really don't know why I still work," she said. "I just like it here."●

PROPOSED ARMS SALES

● Mr. LUGAR. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon such notification, the Congress has 30 calendar days during which the sale may be reviewed. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

In keeping with the committee's intention to see that such information is available to the full Senate, I ask to have printed in the RECORD at this point the notifications which have been received. The classified annexes referred to in two of the covering letters are available to Senators in the office of the Foreign Relations Committee, SD-423.

The material follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, DC, December 6, 1985.

Hon. RICHARD C. LUGAR,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, we are forwarding under separate cover Transmittal No. 86-15, concerning the Department of the Navy's proposed Letters) of Offer to Singapore for defense articles and services estimated to cost $14 million or more. Since most of the essential elements of this proposed sale are to remain classified, we will not notify the news media.

Sincerely,

GLENN A. RUDD,
Acting Director.

Attachments.

POLICY JUSTIFICATION

(Deleted.)

(Deleted.)

(U) This proposed sale will contribute to the foreign policy and national security objectives of the United States by helping to improve the security of a friendly country which is a continuing force for peace and regional stability in Southeast Asia. Singapore's strategic location commands the primary route between the Indian and Pacific Oceans. Recognizing that its small size could make Singapore a target of aggression, Singapore's defense strategy has been to make it clear that an attack would be prohibitively expensive. Singapore sits astride the narrow entrance to the Strait of Malacca, one of the world's busiest waterways. Through this strait passes the bulk of tanker traffic from the Middle East to the Far East.

(Deleted) difficulty absorbing these missiles into its armed forces.

(U) The sale of this equipment and support will not affect the basic military balance in the region.

(U) The prime contractor will be the McDonnell Douglas Corporation of St. Louis, Missouri.

(U) Implementation of this sale will not require the assignment of any additional U.S. Government personnel or contractor representatives to Singapore.

(U) There will be no adverse impact on U.S. defense readiness as a result of this sale.

TRANSMITTAL NO. 86-15—NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b)(1) OF THE ARMS EXPORT CONTROL ACT

(i) (U) Prospective Purchaser: Singapore.

(ii) Total Estimated Value: Major Defense Equipment (Deleted); Other (Deleted); Total (Deleted).

(iii) Description of Articles or Services Offered: (Deleted).

(iv) (U) Military Department: Navy (LAY).

(v) (U) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) (U) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: See attached Annex.

(vii) (U) Section 28 Report: Case not included in Section 28 report.

(viii) (U) Date Report Delivered to Congress: December 9, 1985.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, DC, December 9, 1985.

Hon. RICHARD C. LUGAR,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 86-16 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Army's proposed Letter(s) of Offer to Korea for defense articles and services estimated to cost $57 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

GLENN A. RUDD,
Deputy Director.

TRANSMITTAL NO. 86-16—NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b)(1) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Korea.

(ii) Total Estimated Value: Major Defense Equipment,[1] $38 million; Other, $19 million; Total, $57 million.

[1] As defined in Section 47(6) of the Arms Export Control Act.

(iii) Description of Articles or Services Offered: One hundred thirty-three STINGER Guided Missile Systems, 599 STINGER reload rounds, tool kits, concurrent spare parts, technical assistance and training.

(iv) Military Department: Army (XWA and JFV).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: See Annex under separate cover.

(vii) Section 28 Report: Case not included in Section 28 report.

(viii) Date Report Delivered to Congress: December 9, 1985.

POLICY JUSTIFICATION

KOREA—GUIDED MISSILE SYSTEMS AND STINGER MISSILE ROUNDS

The Government of Korea has requested the purchase of 133 STINGER Guided Missile Systems, 599 STINGER reload rounds, tool kits, concurrent spare parts, technical assistance and training. The estimated cost is $57 million.

This sale will contribute to the foreign policy objectives of the United States by helping to improve the security of a friendly country which has been and continues to be an impetus for modernization and progress in Eastern Asia. The sale of this equipment and support will enhance deterrence and contribute to the preservation of peace and stability on the Korean peninsula.

The system proposed in this sale will enhance the Republic of Korea defensive capability and complement the preservation of peace and stability on the Korea peninsula, a key element in the security of Northeast Asia. Korea will have no difficulty absorbing these systems into its armed forces.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the General Dynamics Corporation of Pomona, California.

Implementation of this sale will require the assignment of five additional U.S. Government personnel for five months and one contractor representative for one month to Korea.

There will be no adverse impact on U.S. defense readiness as a result of this sale.●

ACADEMIC FREEDOM IN POLAND?

● Mr. DURENBERGER. Mr. President, on July 25, Poland's Sejm or Parliament approved a series of highly restrictive amendments to that country's law on higher education, despite the nearly unanimous opposition of the academic community. We now can determine that the Polish Government has decided to relegate the academic independence of Poland's universities to the ash heap of history. In order to comply with these antiacademic and antidemocratic amendments, the Polish Government has dismissed approximately 70 rectors and deans at 15 of Poland's leading universities for political reasons.

Historically, universities in Poland have been characterized by a high degree of self-government. When the

Polish Government first announced that it would seek to modify the administrative structures of Poland's universities in the fall of 1984, Deputy Prime Minister Rakowski also indicated that this draft proposal would be submitted to the academic community for consultation and amendment.

At all main universities in Poland, commissions established by faculty councils conducted opinion surveys among faculty members and students in January and February in order to gather wide-ranging opinion about specific items in the Government's education proposals. The results of that study were submitted by the senates of universities to the Main Council for Higher Education. Ninety percent of faculty members and a similar percentage of students expressed strong opposition to the proposed amendments to the law on higher education. The opposition of the Main Council to these proposals was formally published on March 8.

The Polish Government responded to this academic opposition by preparing an even more draconian proposal, which went much further in the direction of limiting university self-government than did the 1984 recommendations. These proposals were ultimately adopted by the Sejm in July and have now been acted upon by the Jaruzelski regime. The main features of the new law on higher education are as follows:

First, the Government will have increased powers to dismiss, suspend or transfer university teachers—it is feared that many dismissals will follow the passing of the new law;

Second, university teachers will have to take an oath pledging loyalty to the principle of a socialist university;

Third, the Government will have the right to veto any of four candidates for the post of rector, possibly also prorectors and deans of faculties;

Fourth, the Main Council of Higher Education—an elected body of 70 members representing all higher education institutions—will no longer have decisionmaking powers on the direction of education and research policies, but will serve only as a consultative body;

Fifth, the Government will have the right to close down, or to suspend, faculties or whole institutions "in the public interest;"

Sixth, the police will have the right to enter university campuses, even without being summoned by the university authorities;

Seventh, student self-government is virtually disbanded and their interests are to be represented by national Government-licensed youth organizations;

Eight, the Government will have the right to suspend or to expel students.

In the last weeks of November, the Government's ax began to fall against those academic leaders who differed with the Government's policies. The dismissal of the rectors and key deans of such institutions as Gdansk and Posnan Universities were conducted in an almost surreptitious fashion by a Government that is obviously fearful of negative public reaction. It is clear that General Jaruzelski feels that such repression will be lost in the warm afterglow of his visit with French President Francois Mitterand and that of former West German Chancellor Willy Brandt to Warsaw. It should be equally clear, however, that these dictatorial edicts against academic freedom will not go unremembered. The loss of academic independence of Poland's universities is a great tragedy for Western civilization.

Mr. President, I ask that articles from the Washington Post and Nature be printed in the RECORD. I further request that a June resolution by the Senate of the Technical University of Warsaw be printed in the RECORD.

The material follows:

[From the Washington Post]

POLISH REGIME CRACKS DOWN ON REBELLIOUS INTELLECTUALS

(By Jackson Diehl)

WARSAW, December 7.—The firing by communist authorities of about 70 rectors and deans in Poland's universities has prompted protests from students and faculty and signaled a toughening approach by the government of Gen. Wojciech Jaruzelski toward the nation's rebellious intellectuals.

Acting on recommendations by communist party cells, Education Ministry officials dismissed six rectors, the top university officials, and removed dozens of deans charged with individual schools and administrative affairs in 15 of Poland's 91 universities. Although carried out last week, the actions were confirmed only last night by the official news agency PAP.

The firings followed a controversial new law on higher education that drastically curtailed the role in university decision making by faculty and students and reintroduced political criteria into course work as well as the hiring and firing of staff.

University teachers, students and opposition intellectuals said the law was meant to put an end to independent activity in Poland's schools and the dismissals may mark the beginning of an extensive purge of intellectuals.

"The firings are a kind of test to see what will be the reaction of society," said Bronislaw Geremek, a medieval historian and an adviser to the outlawed trade union Solidarity who was fired from his own job at the Academy of Science earlier this year. "If there is not much reaction, they will move into a new phase of getting control over all intellectual circles through aggression."

The new education law was condemned by the senates of more than 50 universities last summer and was opposed even by some official political organizations and deputies in the communist-controlled parliament. Several university senates, made up of student, faculty, and university worker representatives, also met last week to criticize the firings.

After some debate, students in Warsaw decided not to strike over the latest action, fearing they would not attract enough active public support to win a confrontation with the authorities.

"It is simply not a good time in the country to start a student strike," said a university source active in the talks. "But if the authorities push further now they will be risking a united response."

Government officials have explained both the new university law and the firings as steps to improve efficiency and restore the "socialist character" of education.

Faculty members and political analysts say Jaruzelski is intent on restoring the leadership of the communist party to key social institutions before a party congress early next year. The party's lack of control over intellectual circles and cultural activities remains one of its most glaring failings by the standards of Soviet Bloc communism, they noted.

"The authorities know the intelligentsia has a tremendous impact on the social climate," said Geremek. "And the spirit of freedom in the Policy people is first of all, they think, connective to the intelligentsia."

In universities, authorities have faced the problem of losing authority to noncommunists. Ironically, the government facilitated this development during the period of martial law in 1982 by sanctioning a university reform that gave substantial power to the elected senates as well as to student self-governing council.

Three years later, official student organizations at major universities have only a handful of members and communist activists have found themselves outnumbered in the senate, the student government and other key bodies making decisions on faculty, administrators and courses. The Warsaw senate even created a special committee to monitor political prisoners.

Most of the deans and rectors dismissed last week were political independents or sympathizers of Solidarity who had been elected by senates and hoped to maintain a measure of university autonomy from the party and government. Under the new law, the minister of education was given blanket authority until Nov. 30 to fire the administrators and appoint new ones to complete their terms. In the future, the minister will also have the power to veto rector candidates nominated by the senate.

"The communists got tired of losing so many secret ballots," said Wojciech Lamentovich, a poltiical science professor. "Party candidates for professorships were losing quite frequently. . . . It was very unpleasant for them."

The new law also stripped the student government organizations of most of their powers, ousted their elected officers and turned their leadership over to the three communist-backed student organizations.

Even as such organizational changes will allow the communist party to regain control over university personnel and affairs, other parts of the law restore political criteria to curricula and the evaluation of professors.

In addition, professors hired or promoted by the universities will be required to sign an oath of loyalty to Poland's socialist system.

Faculty members said the new criteria open the way for an extensive purging of professors, and predicted that may be the government's next step.

[From Nature, Feb. 14, 1985]

HIGHER EDUCATION LAW REVISED

(By Vera Rich)

The Polish Higher Education Act of 1982, which embodies a watered down version of the reforms of the Solidarity period, is now

up for revision. Last month, a "public debate" was launched on proposed amendments to the act. Discussion is somewhat hampered, however, because no provisional draft of the proposed changes has been officially published. But reports in the underground press claim that the Ministry of Science, Higher Education and Technology wishes to deprive the universities of virtually all the autonomy won in 1980–81 and embodied in the 1982 act.

The minister himself, Dr Benon Miskiewicz, in an interview with the official Polish news agency PAP at the beginning of the present academic year, made barely-veiled threats that the law would be revised if the self-government bodies in higher education continued to exercise their autonomy. Within a few weeks, an alleged draft of the proposed changes began to circulate in academic circles, claiming to be a "confidential" document leaked to Solidarity by a source within the Ministry of Science, Higher Education and Technology. Miskiewicz repudiated the document, claiming that it was simply a "provocation" engineered by "antisocialist forces". Nevertheless, in a meeting with the Main Council for Higher Education, he outlined a scheme of tentative changes which one participant in the meeting described as "the same only less detailed" than the underground draft.

According to the draft, the proposed changes include.

Replacement of the open elections for university rectors by a choice between two candidates nominated by the minister; the successful candidate would then nominate the various deans who are also, at present, elected.

Depriving the university senates and faculty councils ("collegial bodies") of various rights which would then be vested in the selected nominees.

Removing from the collegial bodies the representatives of students, junior academic staff and auxiliary staff (such as librarians), leaving only senior academics and party and military representatives.

Empowering the minister to suspend or disband any collegial body, and to dismiss university staff and expel students, if he deems their activities "contrary to the interests of society."

Reorganizing the students' self-government bodies, described as an obstacle to "comprehensive socialist development" on the basis of the party-linked youth organizations, thereby bringing all matters of student welfare and social activity under party control.

Not surprisingly, former Solidarity activists in the universities and members of the pro-Solidarity Independent Students' Association (NZS) are opposed to the changes. Equally inevitably, the student "self-government committees" want to put up a fight, although the 1982 act forbids any formal links between the self-government committees of different universities and colleges, giving the minister an additional weapon against them.

More significant is the opposition shown by the Main Council for Higher Education. This is also an innovation of the Solidarity period, and consists of one representative of every higher education institution in Poland (except the Catholic University of Lublin). Many of the delegates to the Main Council are, however, Party members, elected because the universities feel that they might prove effective in putting over the university viewpoint to state and Party authorities without unnecessary hassle. The principal objection of the Main Council is that, even if the changes are necessary, they are premature. The existing law, it says, should be allowed to run for at least another three years, until the expiry of the term of office of the rectors elected under the law. Chopping and changing so quickly can only destabilize the universities.

Individual academics have spoken out strongly in favour of academic autonomy and the present structure of student "self-government committees"; they include Dr Jozef Gierowski, of the Jagiellonian University of Krakow and Dr Grzegorz Bialkowski of Warsaw who was elected in November in place of Dr Klemens Szaniawski, whose election in May was vetoed by Minister Miskiewicz. Some of their statements and press interviews were made before the official launching of the debate and make no direct reference to changing the act. Nevertheless, their tacit opposition to the proposals is clear. So far, the only group reported to have come out in favour of the change is a "young scientist" conference held earlier this month under the auspices of the official "Association of Polish Students". Even they, however, urged the active participation in academic decision-making by students, junior lecturers and auxiliary staff.

POSITION OF THE SENATE OF THE TECHNICAL UNIVERSITY OF WARSAW, 26 JUNE 1985

The Senate of the Warsaw Technical University deeply concerned for the future of Polish higher education, steeped in a sense of responsibility for generations which will determine the future of not only science and technology but also of our nation and state, feels morally obliged to present the following position.

In its resolution of 27th February 1985 the Senate took position on the proposed changes in legislation on higher education, by raising the fundamental issues of the social role of universities and conditions necessary for their proper functioning. The Senate said it shared the deep anxiety and concern caused in academic circles by the attempt, undertaken by the authorities, to inhibit the process of self-governing renewal of the universities, and to introduce an administrative system of control.

Contrary to the almost unanimous opinion of higher education establishments and the stand of the Main Council for Science and Higher Education, the authorities have recently decided to submit to the Sejm of the Polish People's Republic a bill changing the existing law on higher education in a way which almost totally liquidates the principle of self-government of universities and their independence. The severity of these changes is still further enhanced by regulations contained in two other legislative drafts: one on the office of the Minister of Science and Higher Education, and the other on changes in legislation governing academic degrees and distinctions. Particularly vigorous opposition is aroused by subjecting the whole range of staffing policy to political criteria and by the quite unprecedented step of making procedures on bestowing doctorates and assistant professorships dependent on arbitrary evaluations of ideological orthodoxy.

Disregard of the opinion of academic communities and the repressive character of the changes will cause serious damage to higher education, science and the national culture. We consider these steps to be a further stage in the process of subjecting legislation to the immediate interests of the authorities and another attempt to deprive society of its freedom.

Our community will find it difficult to resist feelings of bitterness and despondency. But such feelings must not be allowed for a moment to overshadow our primary aim which is to educate and form generations of young people who one day will decide the destiny of our nation. The legislative changes herald a time when the realization of this goal will become difficult and may require sacrifices. This, however, does not absolve any one of us from carrying to the utmost duties inherent in the dignity of academic teacher and the reputation of the Technical University of Warsaw with its patriotic and scientific traditions, in accordance with the text of the oath incorporated in the statute recently adopted by the Senate. We all have to carry out those duties conscientiously and with the greatest care, always mindful of the words of Jan Zamoyski, carved out in the Great Hall: "The Commonwealth is such as the upbringing of its youth allows."

The Senate appeals to the entire personnel of the Technical University for a wise and prudent stand needed to preserve our common achievements of recent years. The Senate hopes that Warsaw Technical University shall unitedly defend the supreme values necessary for the fulfillment of its social role.●

JUSTICE FOR ATOMIC VETERANS

● Mr. SIMON. Mr. President, a report released recently by the General Accounting Office and requested by my good friend, the senior Senator from California, makes for compelling reading, and also gives rise to greater impetus for Congress to fully address the health needs of those former service personnel who today are called atomic veterans.

Atomic veterans are former service men and women, originally numbering 250,000, who participated in the aboveground atomic testing program or in the occupation of Nagasaki or Hiroshima.

Senator CRANSTON, who has been at the forefront of addressing the inequities facing atomic veterans, asked the GAO to perform a case study to see if the Defense Nuclear Agency is correct when it claims that dose reconstructions of many of these service people prove they were not harmfully exposed to ionizing radiation in those atomic tests. Thousands of ailing veterans have been denied help based on these calculations by the Defense Nuclear Agency.

Based on what the GAO has discovered, we should all be grateful that Senator CRANSTON made that request, because it now is all the more apparent that a great injustice is being done to hundreds of veterans through these dose reconstructions—a methodology that is used to judge whether a veteran's cancer should be considered service-connected.

The GAO report faults the Defense Nuclear Agency for overreliance on

imprecise radiation film badge readings; ignoring internal radiation exposure of service personnel caused by breathing, eating, or drinking contaminated particles; neglecting evidence about safety violations; and dismissing ample evidence showing incomplete decontamination procedures during the test used in GAO's case study.

In some cases these problems during the atomic testing program were caused by intent, as with the Army troops who were ordered to march through the Nevada desert to ground zero after a test shot. In some cases they were caused by ignorance of the extent of the hazards of low-level radiation. But in every case it is injustice for these veterans to have their government as adversary when they appeal for medical and disability relief for ailments that are known to be related to radiation exposure.

The example studied by GAO was "Operation Crossroads." This was the exercise near Bikini Atoll in the South Pacific in which thousands of our constituents took part in two atomic tests. Let me speak for a moment about one of my constituents who participated. Bob Farmer of Steeleville, IL, was exposed to ionizing radiation as a young Navy seaman who scrubbed down the target ships after the two tests, swam in the contaminated lagoon and ingested contaminated food and water. Later in life Bob Farmer has had a number of health problems—including a thyroidectomy—that seem linked to his exposure, and all nine of the Farmer children have turned up with genetically linked problems, though only one was physically deformed at birth, and neither he nor his wife has any history of genetic problems.

Bob Farmer's case was my entry point into the atomic veterans issue several years ago, and his experience—along with the experiences of hundreds of other atomic veterans whose cases I have learned about in recent years—has convinced me that a legislative remedy for these veterans is needed. The legislative remedy I have proposed is the Atomic Veterans Relief Act, S. 707.

Medical science knows enough to show a relationship between low-level ionizing radiation and later health effects—particularly several kinds of cancer—but not enough yet to prove it in individual cases. That is why it is only fair, when exposed veterans are struck with radiogenic cancers, that we presume a relationship. With this service-connection status they could get adequate care in VA health facilities, their survivors can have death allowances, and disabled veterans can have disability allowances when warranted. Former service personnel have no other recourse for relief—not the courts, not the Pentagon—because damage suits by them are banned under the Feres Doctrine. Congress must provide the remedy.

I commend this GAO report to my colleagues. You will find it verifies what we have seen in case after case: Dose reconstruction is a convenient fiction that the Defense Nuclear Agency uses to deny its responsibility to these veterans.

It is time to close the book on that fiction.

Mr. President, I ask that the Executive Summary of this GAO report be printed in the RECORD.

The material follows:

EXECUTIVE SUMMARY

(GAO Report: "Operation Crossroads: Personnel Radiation Exposure Estimates Should Be Improved")

Many of the 42,000 military participants in the 1946 atmospheric nuclear weapons test, known as Operation Crossroads, were subjected to varying amounts of radiation exposure. Documents recently discovered by concerned private citizens raise questions about the accuracy of the Defense Nuclear Agency's [DNA] radiation exposure estimates. The Veterans Administration uses these estimates in adjudicating former participants' radiation-related disability claims.

Because of specific Congressional concerns, GAO reviewed certain issues regarding the radiation exposure of Crossroads participants, such as the reliability of the personnel film badges used to measure radiation, adequacy of the personnel decontamination procedures, and accuracy of DNA's radiation dose reconstruction.

BACKGROUND

Crossroads consisted of two nuclear bomb detonations in the Pacific Bikini Island lagoon from July 1 to August 10, 1946. After each detonation, a task force of approximately 42,000 military personnel and civilian scientists entered the lagoon and examined the damage to and radiation intensities on target ships.

Given the responsibility by the Secretary of Defense to estimate radiation doses for atmospheric nuclear weapons test participants, DNA—in October 1984—issued its report on Operation Crossroads, concluding that personnel had not been overexposed to radiation. DNA's position is based on radiation data recorded on film badges worn by about 6,300 of the 42,000 Crossroads participants and reconstructed external and internal radiation dose estimates for the participants.

RESULTS IN BRIEF

Crossroads personnel were exposed to four specific radiation types—internal alpha, internal and external beta, and external gamma. GAO found that DNA's calculation of exposure estimates for each radiation type may need adjustment because:

Film badges were not reliable for measuring both external gamma and beta radiation, as intended, and were not worn by all Crossroads participants;

Personnel decontamination procedures did not provide adequate protection for Crossroads personnel throughout the operation; and

DNA's dose reconstruction analysis for internal alpha and beta radiation has not properly estimated the possible personnel exposure from three potential pathways—inhalation, ingestion, and open wounds.

PRINCIPAL FINDINGS

Reliability of film badges.—DNA's radiation exposure estimates have made no allowance for inaccuracies attributable to film (in badges) or its processing. GAO found and DNA acknowledges that the recorded film badge readings would have had an overall inaccuracy of approximately ±30 percent because of inaccuracies in the film.

Further inaccuracies normally occur during film processing and reading. While it was not possible to calculate actual Crossroads inaccuracies, GAO found that a mid-1950's U.S. National Bureau of Standards test showed that readings by several laboratories of film badges similar to those at Crossroads, exposed to known amounts of radiation, were inaccurate by as much as ±100 percent. GAO believes it is unlikely that the film badge readings performed under harsh Crossroads conditions would have been more accurate than those in laboratories.

DNA recognizes the film badges at Crossroads were incapable of accurately recording external beta because the portion of the film intended for that measurement actually recorded both external gamma and beta. Although DNA assigned doses to personnel believing the badges overestimated external beta radiation, GAO found cases in which beta exposure may have been underestimated or not estimated at all.

Adequacy of personnel decontamination procedures.—Because DNA believes adequate personnel decontamination procedures existed for the beginning at Crossroads, its radiation exposure estimates do not recognize the possibility that personnel may have retained radioactivity on their bodies and clothes after working on contaminated target ships. In contast GAO believes this possibility exists because decontamination procedures were evolving at Crossroads. For example, the earliest evidence that GAO found of personnel being required to shower or change clothes after returning from contaminated target ships was in procedures issued on July 31, 1946, 6 days after the second detonation. Moreover, even after comprehensive decontamination procedures were instituted, some violations were reported. Thus, Crossroads participants were probably exposed to more radiation than accounted for by DNA.

Accuracy of international exposure dose reconstruction.—Internal radiation exposure was not measured at Operation Crossroads. DNA has estimated the exposure from inhaling radioactive materials but used a constant ration between alpha, beta, and gamma radiation that may have underestimated alpha radiation by a factor of from 5 to 10. Moreover, DNA has not evaluated internal radiation exposure from ingestion and open wounds. DNA believed, incorrectly, a prohibition against food consumption aboard target ships effectively precluded ingestion and did not know how to calculate from open wounds.

RECOMMENDATIONS

GAO recommends that the Secretary of Defense direct DNA to adjust, where feasible, the Crossroads participants' exposure estimates in the following manner:

Develop a range for each film badge reading that recognizes film and film processing inaccuracies; reassess the accuracy of the external beta radiation dose information for those who wore film badges and, because not all wore film badges, perform a dose reconstruction for external beta radiation;

Estimate the extent to which personnel received radiation exposure from a lack or violation of comprehensive decontamination procedures;

Reevaluate and disclose the possible errors or uncertainties associated with its analysis of internal radiation exposure by inhalation and analyze possible internal radiation exposure through ingestion or open wounds.

In addition, where any of the proceding actions have been determined not to be feasible, GAO recommends that the Secretary of Defense require DNA to document the reasons for each such determination so that the military services can provide this information to the Veterans Administration and the affected veterans.

AGENCY COMMENTS

The Department of Defense generally disagreed with the report's findings, conclusions, and recommendations. However, GAO's analysis of its comments showed that the Department (1) provided incorrect or unsupported statements, (2) misinterpreted certain Crossroads-related documents, or (3) presented information inconsistent with DNA's historical report on Operation Crossroads and other material. For these reasons, GAO continues to believe that the Department can improve radiation exposure estimates for Crossroads personnel by effectively addressing and implementing GAO's recommendations. The Veterans Administration stated that the report's recommendations for calculating radiation doses for Crossroads participants should also be applied to participants in all other atmospheric nuclear tests.●

● Mr. D'AMATO. Mr. President, I rise to day as "Human Rights Week" comes to a close to send a message to the Soviet Union and to express this Senator's view on the truth of human rights in the Soviet Union. Although today we end a week which has been set aside by Congress so the Nation's attention could be focused on violations of international human rights agreements, I would like to call the attention of Soviet leaders to the fact that, by doing so, we are not closing the record book on this issue until next year. Observing "Human Rights Week" is not an annual ritual during which we loft general platitudes on human rights toward the Soviet Union. Rather, it is a reflection of our continued commitment to see to it that human rights and fundamental freedoms for all people are secure.

This is not an easy task, but at last we are not alone in this effort. The dream for human rights and fundamental freedoms for all without distinction as to race, sex, language, or religion has grown to international proportion. Since World War II, when the world witnessed the Nazis systematic execution of the Jews, the issue of human rights has been catapulted to the forefront of the international agenda. In 1948, in 1966, and again in 1975, nations gathered together at the United Nations and in Helsinki to discuss basic human freedoms and to find ways to make certain they are respected by all nations—now and forever.

Out of these meetings emerged international human rights agreements which together detailed a broad range of specific, fundamental human freedoms: the Universal Declaration of Human Rights in 1948, the International Convention of the Elimination of Racial Discrimination and the International Convenant of Civil and Political Rights in 1966, and the Helsinki Final Act in 1975. These agreements concern what governments must not do to their people and what governments must do for their people.

By ratifying these agreements, governments pledge as a matter of law to refrain from subjecting its own people to arbitrary imprisonment and to execution of cruel or degrading treatment. They recognize the right of every person to the freedom of movement, the freedom of thought, the freedom of opinion; they recognize the freedom of conscience, religion, expression, assembly, and the right to freely emigrate.

But there exists today a government which has joined in these agreements, which has signed and ratified these agreements, and which has openly and flagrantly violated each and every human freedom the world has joined in agreement to protect. I speak, of course, of the Soviet Union.

This year is the 10th anniversary of the Helsinki Final Act, and we have seen no improvement in the treatment of Soviet Jewry since the Soviet Union signed the Final Act in 1975. The opportunity for renewed dialog between the United States and the Soviet Union offers some hope. As we are painfully aware, however, since Mr. Gorbachev became the First Secretary of the Soviet Communist Party, there has been no significant improvement in the position of Soviet Jewry. In fact, the situation has deteriorated further.

The hopes spawned by their signing of the Helsinki Final Act have been further dimmed. As chairman of the Helsinki Commission, I have heard nothing but witnesses telling horror stories of the repression and the persecution suffered by Jews in the Soviet Union—unparalled in any nation since World War II. Behind the Soviet's thinly disguished veil of anti-Zionism the number of "refuseniks," and the number of Jews carted off to Siberia and thrown into Gulags, has mounted dramatically.

Why? Because they speak out against those who deny them basic human freedoms. For this, they are jailed, brutalized, and persecuted.

In recent history, in an attempt to bargain with the West and to attain legitimacy and stature in the eyes of the world, the Soviet Union has allowed more than 250,000 Jews to emigrate. This approval, however, was not given to all Jews who wished to leave. After their failed policy of "induced assimilation," which followed Stalin's death and continued to the early 1960's, the Soviet Union selected those Jews for emigration who were deemed "nonassimilable"—those Jews who refused to be Russified by intense Soviet indoctrination efforts and who were considered by Soviet leaders as not willing to pledge their allegience to the Soviet state. Unfortunately, the Soviet Union today has all but barred Jewish emigration.

Since 1979, the level of Soviet-Jewish emigration has dropped by more than 98 percent, from 51,000 to only 896 in 1984. This decline has occured at a time when nearly 400,000 Jews, or refuseniks, have expressed a desire to emigrate to either the United States or to Israel, but are not given permission to leave.

As a result, they must live their lives in a society where they endure intimidation, where they are forced from their jobs, and where any attempt to preserve Jewish culture is met with swift retribution. Those brave enough to teach Hebrew, as Joseph Begun has been, are harassed, threatened, and incarcerated on trumped-up charges. They are kept in a closet, unable to tell their stories of inhuman treatment, and unable to live their lives according to basic human standards.

We know the story of the Beguns, the Sakharovs, and the many who suffered a similar fate, and yet the Soviet Union is unable to fathum our distrust of their system. How can the Soviet Union expect us to treat their words and their promises as meaningful expressions of the will of the Soviet State when they demonstrate systematic, pervasive, and continuing violations of every international human rights agreement they have signed. Our distrust will never change unless we see significant, permanent changes in Soviet actions.

Where do—and should—U.S. concerns about Soviet Jews and human rights rank among our concerns about arms control, trade, and regional issues? In my opinion, right up there at the top. When negotiating with the Soviet Union, the United States must not trade off the rights and futures of our fellow human beings in exchange for promises of trade, cultural exchange, or even security.

One possible option which may pressure the Soviet Union for change when approaching the question of Soviet Jewry is the concept of "operational linkage," an option the administration now is reviewing. This is not quiet diplomacy, but applied public pressure and international concern where appropriate. As envisaged in this option international standards of behavior are considered as a factor in our relations with the Soviet Union, specifically in areas such as trade and regional issues. We will reach agree-

ments and we will abide by them, unlike the Soviet Union, so long as other parties to the agreements honor their part.

It is my hope, as well as the hope of all freedom-loving peoples throughout the world, that the Soviet Union someday will change its historical persecution of innocent people whose dream it is to live as they choose—whose dream has become our and the world's dream, that all people should live with dignity, that their basic and fundamental freedoms must be respected. We must keep this dream alive.●

MIROSLAV MEDVID

● Mr. HUMPHREY. Mr. President, the case of Soviet seaman Miroslav Medvid is one in which I have maintained an active interest since this incident occurred last October. The plight of this brave young man brought together a coalition of public officials and organizations all across the political spectrum. All were united by the desire and efforts to ascertain Mr. Medvid's true intentions regarding his return to the Soviet Union. Many interested parties have issued statements in support of efforts to thoroughly investigate the bungling of the case of Miroslav Medvid by U.S. Government officials. On Friday, December 6, I introduced a resolution on behalf of myself and 52 of my colleagues that would establish a Senate panel on asylum to investigate the Medvid case, and the issue of political asylum in general. In view of the desire in the Senate for an immediate legislative investigation of this matter, I ask that several statements issued over the past few weeks by a few of those organizations interested in seeing a thorough review of this matter be printed in the RECORD.

The statements follow:

THE FREEDOM COUNCIL,
December 5, 1985.

To: TFC National Staff; TFC Regional Directors; State Coordinators.

From: TFC National Office, Bill James, Director, Marketing and Communication.

SPECIAL ALERT

In the next few days, Senator Gordon Humphrey (R-NH) will introduce a bill authorizing the creation of a special Senate panel on asylum. This is an outgrowth of the recent controversy in which American immigration officials twice forced a Russian seaman seeking asylum to return to the Soviet ship from which he had escaped.

Already, Senator Humphrey has about a dozen co-sponsors, including Democrats as well as Republicans, liberals as well as conservatives. This probably reflects the fact that the recent incident is one the American people understand and feel deeply about. The list of co-sponsors includes Senators Dixon of Illinois, Denton of Alabama, Grassley of Iowa, Kerry of Massachusetts, Wallop of Wyoming, Symms of Idaho, and Riegle of Michigan. The goal is to have over half of the Senate listed as co-sponsors by the middle of December.

You should alert members of The Freedom Council in your area about this matter and urge them to contact their Senators, asking them to put their names on the Humphrey-Dixon bill as co-sponsors.

The purpose of the panel is to investigate immigration policy as regards those seeking political asylum. The panel plans to investigate not only the Medvid incident, but additional similar problems that include a lack of coherent policy on the part of the Immigration Department.

NOVEMBER 5, 1985.

ACLU DEMANDS THAT MEDVID CASE BE REOPENED

The American Civil Liberties Union today called upon the INS to reopen the case of Myroslav Medvid, the Soviet seaman who last week fled his vessel and sought refuge in the United States.

In a telegram sent by Ira Glasser, ACLU Executive Director, to the Commissioner of the INS the civil liberties organization demanded that Mr. Medvid be taken off the ship and that counsel now seeking to represent him be permitted to meet with him. (A copy of the telegram is attached.)

Wade Henderson, Associate Director of the ACLU Washington Office, described the INS treatment as an all too typical violation of the spirit and letter of the law relating to political asylum. "Under the 1980 Refugee Act," Henderson pointed out, "an individual arriving on our shores is entitled to a meaningful opportunity to present a claim for asylum in a noncoercive setting. Whether the case involves Salvadorans or Nicaraguans stopped at the border, Haitians detained at sea, or a Soviet seaman jumping ship, the person should be questioned sympathetically to determine if he or she fears political persecution if sent home."

In Medvid's case, the ACLU pointed out, there were numerous violations of the existing regulations designed to safeguard an individual's right to seek asylum in the United States. Medvid, the record shows, was never offered the opportunity to file an asylum applications, was not told of his right to counsel or given access to counsel, and was forcibly returned to his ship prior to the consultation between INS and the State Department which the regulations require. These errors were compounded by his subsequent interrogation in the presence of Soviet authorities, violating the confidentiality of his claim and perhaps jeopordizing his safety.

Because of the substantial doubt that Medvid voluntarily waived his claim to asylum, he should be given an opportunity to consult with counsel, the right to file an asylum application if he desires to after that meeting, and a private interview before an impartial INS official. In its telegram to the INS, the ACLU demanded that those procedures be followed before Medvid leaves the United States.

"The first step," Henderson said, "is to seek to protect Medvid's rights. The second is for Congress to conduct a full inquiry into how the right to claim asylum is administered at our borders. This episode points up the urgent need for changes in the conduct of INS employees, if not in statutes and regulations, to insure that all who come to our borders seeking refuge from political oppression of any kind get a fair hearing."

The following is the text of a telegram sent today to the Commissioner of the INS by Ira Glasser, Executive Director of the ACLU:

The ACLU demands that the American government take whatever steps are necessary to insure that Myroslav Medvid is assured of his rights under the 1980 Refugee Act. At a minimum we believe that counsel now seeking to represent him must be given an opportunity to meet with him in a noncoercive setting to determine if he wishes to file a claim for asylum. If such a claim were to be filed we believe that it would require that Mr. Medvid be permitted to remain in the United States until the request is fully adjudicated.

STATEMENT OF HELSINKI WATCH REGARDING THE CASE OF MR. MIROSLAV MEDVID

[November 1, 1985]

The Helsinki Watch calls on United States officials to take further action in the case of Miroslav Medvid, the seaman who jumped ship, to assure that he is not returned to the Soviet Union involuntarily, if he has a well-founded fear of persecution.

In the view of the Helsinki Watch, the hurried processing of Mr. Medvid did not give him an adequate opportunity to obtain advice about his rights nor to consider in a calm atmosphere the consequences that he might suffer. We urge a delay in which Mr. Medvid would have an opportunity to determine how he wishes to exercise his rights.

The obvious contradiction between Mr. Medvid's behavior when he was forcibly put back on a Soviet freighter and his reported decision subsequently to return to the U.S.S.R. underscores the need for a less hurried consideration of his legal rights.

If Mr. Medvid is returned the United States should receive assurances that the United States Embassy personnel in the U.S.S.R. can see him to ascertain his well being.

The Helsinki Watch is a citizen organization that monitors and promotes compliance with the human rights provisions of the 1975 Helsinki Accords in the thirty-five nations that signed them. Its Chairman is Robert L. Bernstein; its Vice-Chairman are Orville Schell and Aryeh Neier; its Executive Director is Jeri Laber.

AMERICAN FEDERATION OF LABOR AND CONGRESS OF INDUSTRIAL ORGANIZATIONS
Washington, DC, November 4, 1985.

The PRESIDENT,
The White House,
Washington, DC.

DEAR MR. PRESIDENT: I am writing to you regarding the very urgent matter of Miroslav Medvid, the young Ukrainian sailor who was returned by the U.S. Border Patrol to the Soviet ship, the Marshal Konev.

Since his return to Soviet hands sufficient evidence has arisen to suggest that Mr. Medvid had in fact clearly sought political asylum but that his intentions were not properly conveyed to U.S. immigration officials.

Mrs. Irene Padoch, a translator for the Immigration and Naturalization Service, has indicated that Mr. Medvid had asked U.S. authorities for political asylum.

Moreover, there is reason to believe that before his second interview, he was subjected to severe coercion and threats at the hands of Soviet authorities.

Because this matter appears to be the source of a great deal of uncertainty and because there is the danger that an unconscionable injustice may be perpetrated, I urge you to act now to allow Mr. Medvid to be removed from the Marshal Konev so that

he can clearly and freely state his views to U.S. authorities.

If Mr. Medvid truly wants to return to the USSR, there can be no reason for the Soviets to deny him the opportunity to say so clearly and unequivocally. If, on the other hand, he wishes to seek asylum he ought to be permitted the opportunity to do so.

Your intervention would help to alleviate widespread public concern that a terrible mistake and grave injustice may have been committed in this matter.

The stakes in this case are high. We need recall the case of the Lithuanian sailor Simus Kudirka, who through an error was returned to Soviet authorities. Mr. Kudirka was subsequently sentenced to a decade of imprisonment for having sought freedom.

I urge you to act to see that justice is done and Mr. Medvid does not suffer the fate of Simas Kudirka. Such action is important because it would send a clear signal that the U.S. is ready to protect any Soviet citizen who risks his life in the hope of gaining freedom on our shores.

Sincerely,

LANE KIRKLAND,
President.

SAVE THE
OPPRESSED PEOPLE COMMITTEE,
Washington, DC, December 3, 1985.

Hon. GORDON HUMPHREY,
531 Hart Building,
Washington, DC.

DEAR SENATOR HUMPHREY: It is our understanding that you and other Members of Congress may investigate the circumstances surrounding the case of would-be defector Miroslav Medvid, the Ukranian soldier who was forcibly returned to the Soviet grainship Marshal Konev.

The Save the Oppressed People Committee was on the scene in Freedom Warrior, a 38 foot crew boat rented by STOP to draw attention to Medvid's plight. Our goal was to slow the progress of the ship and to buy time for legal appeals. We also sought to increase public pressure on the Administration to reconsider its handling of the case.

Unfortunately, the United States Coast Guard did not enforce the duly served Senate subpoena for Medvid. Further, Freedom Warrior was illegally detained for an hour and a half "safety inspection" as the Konev left the grain loading facility.

As Freedom Warrior steamed down river (and away from the press boat) to catch up with the ship, Coast Guard boat number 41475 attempted to ram us. We are fully prepared to substantiate this with photos and actual tapes of Coast Guard radio communications. Our attorneys are now preparing a $10 million lawsuit for infringement of our First Amendment rights, harassment, and vehicular assault.

We pleased that Members of Congress concerned about human rights are looking into this matter, and offer the full cooperation of the STOP Committee.

If there is anything we can to facilitate your efforts in this human rights case, please do not hesitate to contact us.

Sincerely,

DAVID FINZER,
Chairman.
LEE BELLINGER,
President.

STATEMENT OF MYRON WASYLYK, DIRECTOR, WASHINGTON OFFICE—UCCA

"On behalf of Ukrainian-Americans, the Ukrainian Congress Committee of America calls upon the Departments of State and Justice for a full and thorough accounting of all events involving the bureaucratic foul-up of the case of Ukrainian sailor, Myroslav Medvid.

"There are several questions that the State Department has left unanswered.

"First, in class involving defections, there is a standard set of procedures which call for the individual to be taken into custody for several days until necessary interviews are conducted. Yesterday, a State Department spokeman said that the prudent necessary steps in cases involving political asylum were not taken. We know that the sailor was taken to a hospital and that during his stay Soviet officials were present at all times. Those familiar with the Soviet style of justice know that the mere presence of Soviet officials during legal examination causes intimidation and heavy duress.

"If the State Department admits that necessary steps were not taken, then how did the State Department reach the conclusion to allow the sailor to leave?

"Secondly, in a White House meeting yesterday and in a letter sent to the President on Monday, the Ukrainian Congress urged the need for a Ukrainian interpretor. Since the seaman had specifically identified himself as a Ukrainian and not a Russian, we feel appropriate sensitivities regarding his position needed to be met by U.S. officials. The State Department yesterday refused to provide a Ukrainian interpretor. Since the press has reported that the text of the written document was in Russian, we have no assurances that the sailor knew what he was signing since he previously had trouble understanding a Russian interpretor.

"Thirdly, the State Department has given no assurances that the man captured by the border patrol is the same sailor who was interviewed by State Department officials, since several hours had elapsed from the time the border patrol placed him on the ship and the arrival of the first State Department official.

"Based on these facts, we urge the Departments of State and Justice to reveal a full accounting of the events involving Miroslav Medvid. Furthermore, knowing the fate awaiting any individual who embarrasses the Soviet state, we call upon Secretary of State Shultz to inform the U.S. Embassy in Moscow of our concerns and the need to monitor Miroslav Medvid to ensure his safety and well being.

COALITION FOR CONSTITUTIONAL JUSTICE AND SECURITY

CCJS protest the reprehensible return of Ukrainian seaman, Miroslav Medvid to the Soviets yesterday. We condemn the wanton disregard of Medvid's human rights as well as the serious violation of the U.S. Refugee Act, 1980., carried out deliberately and maliciously by the Justice Department's INS, the State Department, and Soviet officials.

We further condemn the blatant cover-up attempt being engineered. There has been no independent verification of what has transpired since Mr. Medvid first attempted to defect. No transcript has been made available. No attorneys, no church groups, no human right groups such as Amnesty International, no members of the media have been permitted to take part.

CCJS urges:

(1) an immediate investigation by Congress of the entire incident,

(2) Prosecution under U.S. law of those responsible for violation of U.S. Federal and State Statutes, and

(3) Detention of the Soviet ship until a Congressional probe is complete and Congress is satisfied that Medvid has been able to freely express his desire to leave or to stay in the U.S.

The current situation is an insult to the dignity and integrity of this country. CCJS, along with other groups such as State Department Watch, Baltic American Freedom League, Joint Baltic American National Committee, Ukrainian National Information Service, and many members of Congress have already issued statements condemning and deploring the Administration's handling of the Medvid affair to date.

ESTONIAN AMERICAN NATIONAL COUNCIL

We are shocked and outraged by the decision to return Ukrainian defector Miroslav Medvid to Soviet authorities, apparently with approval from the highest level of our government. For the U.S. Government to cold-bloodedly sacrifice any individual in order that an international photo opportunity in Geneva will not be upset is the height of hypocrisy and a betrayal of the ideals this country was founded on. This is a day of shame for all American and for freedom-loving people everywhere!

The Estonian American National Council joins the call for a full and thorough investigation of this entire incident, beginning with the Justice Department's Immigration and Naturalization Service. We ask that Representative Romano Mazzoli, House Subcommittee on Immigration, Refugees and International Law, and Senator Alan K. Simpson, Senate Subcommittee on Immigration and Refugee Policy, as Chairmen of the two congressional bodies with direct INS oversight, initiate immediate hearings into the disastrous handing of this case.

The U.S. Coast Guard and most other Americans learned the lessons of the 1970 Simas Kudirka case; tragically, INS did not.●

REPRESSION IN HAITI

● Mr. DURENBERGER. Mr. President, recent developments in Haiti leave one to question whether that country's Government will tolerate open dissent or a real process of democratization.

Over the past year, the Duvalier government had made some very tentative moves toward allowing opposition voices to speak out. Several events since the end of November suggests that democracy remains very far away for the unlucky people of Haiti. To commemorate the fifth anniversary of a crackdown by the Duvalier regime, a number of demonstrators marched peacefully through Haiti's third-largest city, Gonaives, on November 28. The Haitian security forces responded in characteristically heavy-handed fashion by firing into the crowd. Four youths, including a 13-year-old boy, were killed and as many as 14 others were wounded in this incident. In an official statement, the State Department called on the Haitian Government to punish all those responsible for this deplorable incident and critized the Haitian Government's use of

force in suppressing a peaceful demonstration.

The increasing outspokenness of the Haitian opposition has apparently caused the Duvalier government to strike back at dissidents. On July 22, President Duvalier conducted a referendum to ratify his position as president-for-life, to affirm his right to choose a successor and to create the post of prime minister. Many independent observers reported that this election was neither free nor fair. Since this referendum on political adjustments within Haiti was held, the Catholic Church radio station in Port-au-Prince, Radio Soleil, has been increasingly critical of the Government and has broadcast the views of leading opposition figures. In late July, several Catholic priests who had worked with Radio Soleil were expelled from Haiti by the Government.

Radio Soleil's reportage of the protest in Gonaives clearly proved an embarrassment for the Haitian Government. It is my understanding that heavy Government pressure was exerted on Radio Soleil and its manager, Monique Saint Vincent, from November 28 until December 5. Several high-ranking Haitian officials, including Foreign Affairs Minister Jean-Robert Estime, visited Radio Soleil's facilities on December 5 and ordered the station to cease all reporting on the Gonaives incident. At 11 a.m. on that day, Radio Soleil announced that it could not report on the Gonaives incident because of orders and named the officials. Later in the day, the Government denounced this action as "subversion" and closed the station. The ofifcial explanation for the closure was that the station's license had lapsed.

A second Catholic Church radio station in Haiti, Radio Ave Maria in Cap Haitien, was closed the next day following telephone threats against the staff and its manager, Emanuel Blaise, as well as several power outages. It appears that the Haitian Government was displeased with Radio Ave Maria's sponsorship of a prayer march to mark the events in Gonaives. The last remaining independent radio station in Haiti, the Protestant Radio Lumiere, voluntarily ceased broadcasting news on Monday. Several leaders of the opposition, including Hubert Deronceray, have been seized by the Government since November 28. Haiti's Catholic bishops have been summoned to meet with the Government, but they have thus far refused to comply.

I am pleased to report that the State Department has conveyed its strongest possible concern with all of these developments to the highest levels of the Haitian Government. I would like to state my full agreement with this position of our Government, and I would urge the Haitian Government to rescind its actions against these three radio stations and to allow these stations to resume their customary operations. I would also hope that Mr. Deronceray and the other political detainees would be released immediately and without condition.

Mr. President, I ask to enter an article from the Washington Post of December 8 on the recent events in Haiti in the RECORD.

The article follows:

SECOND CATHOLIC RADIO CLOSES IN HAITI—STATIONS WENT OFF THE AIR AFTER REPORTING ON DEMONSTRATIONS

PORT-AU-PRINCE, HAITI, December 7.—A Catholic radio station in Cap Haitien, Haiti's second-largest city, went off the air yesterday following several power outages and telephone threats against the staff, a spokesman said. It was the second station to go off the air following growing unrest in the country.

"Things have been rough. We've had interruptions in electric power and telephone threats," a spokesman for Radio Ave Maria said.

The 5-kilowatt radio station is affiliated with Catholic Radio Soleil, a station ordered off the air late Thursday. Authorities closed down Radio Soleil after it reported on the growing unrest and violence.

[A spokesman for the Washington Office on Haiti, a church-funded group, said two Cabinet ministers visited Radio Soleil on Thursday and ordered the station not to broadcast any news about demonstrations. It was then shut down.]

Four students were killed by police Nov. 28 in Gonaives, the scene of Haiti's food riots last year, and several other demonstrators were wounded.

Although no government-run media issued an official statement on Radio Ave Maria, officials say authorities were unhappy with its antigovernment stand.

Radio Ave Maria sponsored a prayer march following the Nov. 28 deaths in Gonaives, 110 miles north of Port-au-Prince.

The students were killed during a demonstration protesting the July 22 referendum giving President Jean-Claude Duvalier more power.

The government-run national television repeated an official statement issued by the minister of interior and national security, Jean-Marie Chanoince, announcing that Hubert Deronceray, a former minister of social affairs and delegate to UNESCO, has been arrested in his home Thursday.

Unconfirmed reports suggested that several other people have been arrested in Petit Goave, Cayes and Gonaives, where several demonstrations have been held following the student's death.

In Port-au-Prince, a government official said, "The president is in full control of the situation."●

NATIONAL THEATRE WEEK

● Mr. HATFIELD. Mr. President, I rise today in support of Senate Joint Resolution 247 sponsored by my good friend Senator MCCLURE designating the week of June 1-7, 1986, as National Theatre Week. The State of Oregon is fortunate to have several excellent professional and amateur theatre groups within its borders. Foremost among these organizations is the Oregon Shakespearean Festival which holds annual performances of William Shakespeare's works in the picturesque community of Ashland, OR.

Founded by Angus L. Bowmer on July 2, 1935, the Oregon Shakespearean Festival just celebrated its 50th anniversary. The festival is one of the oldest and largest not-for-profit theatres in North America, and has the distinction of having the first Elizabethan stage on this continent. It currently is heralded around the world as presenting some of the best and most authentic performances of Shakespeare's works.

Awarded in 1983 with both the Tony Award for outstanding regional theatre and the National Governors' Award for excellence in the arts, the Oregon Shakespearean Festival has brought Shakespeare's characters, as well as those of his fellow playwrights, to life for a diverse audience which now numbers more than 4 million. Shakespeare has a universal appeal, and as a people's theatre the festival is committed to an intensive program for youth as well as nourshing to the hearts and minds of its older audience.

The State of Oregon is proud to count the Oregon Shakespearean Festival as one of its most prized cultural jewels.●

SISTERLY LOVE

● Mr. DURENBERGER. Mr. President, those who are fortunate enough to live in the State of Minnesota have much to be proud of. Our lakes and parks and educational facilities provide a quality of life second to none in the United States. But our greatest source of pride is the remarkable quality of our people.

One such Minnesotan is Sister Mary Giovanni. Her story of service and compassion is an inspiring one. We first got acquainted when I was working on community projects in St. Paul. Sister Giovanni had a singular way of rounding up food and clothing for the needy. It did not matter the time or the day, she would just pick up the telephone and call whomever to inform them of what she wanted for a particular needy family. And more often than not, she got what she wanted.

She is equally as forthright in her approach to teaching. When society can no longer handle them, Sister Giovanni takes into her school the kids from St. Paul's West Side who have been in trouble with the law for drugs, alcohol, and theft. She teaches these kids "survival skills," and she does it firmly but with compassion.

I am a great admirer of her successful way of reaching kids who have been turned off by the traditional educational system. Not only does Sister Giovanni pray her kids will succeed; she makes it happen.

Mr. President, I ask that an article about Sister Giovanni from the November 1985 issue of Minneapolis-St. Paul magazine be inserted in the RECORD at this point. I trust my colleagues will find it inspiring.

The article follows:

SISTERLY LOVE

(Peg Meier prepared this first-person profile of Sister Mary Giovanni, 71, who heads the Guadalupe Area Project (GAP) on St. Paul's West Side, where she grew up. She and her staff teach teenage boys and girls who haven't succeeded in regular schools. She has been a nun for 50 years and has been with GAP for 25 years)

I get along with the underdog. Always have. It's no virtue; it's just the way I'm built. Good girls bore me. Some people get along with nice little girls who always do what they are told. I don't know how to handle them. What do you do if you come to class and everybody has their assignment done?

I like a challenge. I like these kids. I don't like what they do sometimes. I see them run in the streets and get into drugs and drink and stealing. They are basically survivors. I don't have a dumb bunny in the crowd.

Our kids are sent here by the courts or by counselors who can't handle them. The criterion is they have to be in trouble. If two kids want in and we have room for one. I'll take the one who's in the most trouble. I just tell the other one to hang on—somebody is going to goof up and them I'll have to kick them out and then you can take their place.

We've been around a long time and have a lot of success stories. People know that we care, and above all they know they will learn something here. Isn't that neat! So I have great expectations and I'm very, very hard on the kids. Man, you mess up here, kid, and you get it. Or I kick you out. And when I kick you out, you know I pray for you and you know you can come back when you're in shape again. The world is not waiting for them with a silver tray. Ten people are after a job, and they're not going to take a dropout. So you can come back if you settle down and study.

We've got about 45 kids in grades 9 through 12. Last year we didn't have any graduates because the four smart ones who could have earned credits didn't.

This place works for two reasons: First, kids know I'd sell the shirt off my back for them. Secondly, we have small classes. Some have only seven or eight kids, and that's a large class for us. See, our kids are not stupid, but they have lots of absenteeism. They lack skills. The only way you can pick up on that is if you have small classes.

I've found that naughty kids are usually very honest. They know they've got it coming. Another thing, these kids can smell a fake a mile off. You don't have to tell them, "Oh I love you" and all that. No, they know. If a kid comes to you for a math class, he knows you're not his mother or probation officer. Just teach him math he can use, and he'll know you're doing something for him, that you care about him.

I have nine teachers, and five of them have master's degrees. If the staff person isn't doing a good job, I fire them, no matter how good they may think they are. But I don't just fire them if they pull a boo-boo, once you know. They get a chance like the kids do. I try to be fair. I don't kick somebody out just because I happen to have an undigested bean in my middle. You're warned. See, all I'm concerned about is the kids. Sure, I care about the staff, but people smart enough to get hired here have got ways of taking care of themselves.

Here at GAP, we help neighborhood people. We used to do a lot with jobs, food, clothing, housing. But since His Nibs [President Reagan] is in, what can I do about jobs or housing for them? Now we have more food shelves to send them to, and one of our sisters opened a rummage center so I can send my people there for clothing. I think what our people need most is education. We have a terrible dropout rate in this area. I don't like to badmouth anybody, but I think that's the fault of inadequate facilities and, more important, inadequate educators. Now if that hurts their feelings, that's their problem. Teachers have to be good. I teach a course or two myself—Effective Living. I give you the tools and you use them. If you don't, you're a dunderhead.

We work with parents a lot. The adult haven't had a good education. They do fine with their kids up to fourth, fifth, sixth grade; they're the cutest most darling little kids. If the parents were in Mexico, they could handle adolescents too. In Mexico you tell them what to do and they do it. Here, your parents tell you to do something, and you don't do it. Our people don't know how to handle that. One woman told me, "I told him again and again not to do that." That's not how you train a kid. Get it?

The school is supported partially by the United Way. They give us $89,000 toward our budget of something like $308,000. The rest I pick up from here, there and everywhere. I run around to get support for the program—give talks, beg, sell stuff from our ceramics shop. The line I've used for some 20 years is, "There is not a thing on these tables that you need, but I need you so pick up one thing." I tell people they should make a choice of their charities, not contribute just because somebody has you on the mailing list.

I am positively certain that God wants this place, because when I first came here I had no source of income except donations. I wasn't under the United Way until about six or seven years ago. And so I told God, "Okay, if you want this program to succeed, you'll have to see that we get the green stuff." And He's never failed. Right now, I'm terribly much in the hole, but maybe we can get a second mortgage on this house.

I don't know any millionaires, but it's those numbers of people donating a little bit of their hard-earned money that have kept us going. Sometimes I'm told, "Tell people what it is you need. Computers? Books?" I say it sounds awful, but what I need is money! If I'm going to hold on to teachers I need to be able to pay them at least a little bit. I try to pay $13,000, up to $16,000. That's not very much. Our nuns have taken a cut in pay so I could do it.

One thing I don't do is teach religion in this house. There are a lot of ways to skin a cat, don't you know. In Effective Living class, I calm them down and get rid of tension. I teach them how to go into a deep relaxation. When they feel really great and relaxed, I say okay, imagine Christ is walking along the shore. If you don't want to talk to Him, that's fine. He'll just go right past. If you want, invite Him to sit down with you.

I tell them, "I believe God made me because He wanted me. He had a choice. He could have made a bird or a tree, but He wanted me. Wow, there must be something special about me! How come he made you, kid?" Same reason. Now, see, my kids are beginning to sit up taller. There are so many people in their lives who don't want them. Maybe they were never wanted; maybe they were classified as an "accident."

So when they're relaxed and feel like talking to Christ, I tell them to tell Him what's bugging them today. He knows it, but He would like you to tell Him. Then I keep my mouth shut. I tell God, "I don't know what they need but You know it, so get into them." After five, six minutes, they come out of it. I say, write down how you felt. What did you smell or what was your reaction? What insight did you get? It helps not only their souls but their writing.

Also, in the morning, I have them keep a journal. Each entry can't be more than half a page. It's good for their English to keep their thoughts concise.

I love to teach. I really love it. I'm supposed to have retired a long time ago, but I'm just getting into second gear. The thing that energizes me the most, outside of praying, is people. Kids know it. I get high on people. Some of my ideas are wacky, and they go out the window. But some are real good and I fight for them, and the fighting energizes me. To see a kid who is not succeeding and then to turn his life around. Wow!

It's great. The kids come back, those who make it, anyway. They come in and check on the kids who are misbehaving. That's another advantage of being here so long. When kids come in, I hardly have to tell them what the rules are. They know. They know if you're coming to waste time, this is not the place to be. 'Cuz she'll get you, kid. One of the guys who comes back regularly never even graduated. I threw him out. He was off his rocker about a girl. Oh God, I could wring those girls sometimes. They get a guy so confused he doesn't know which side is up. So anyway, he left school but he caught himself before it was too late. He's happily married now, to another girl, and he had a job putting in mufflers at some auto shop. He bragged about the fact that he worked there for seven years and never once was late. We taught him something.

I tell the kids, "I'll chew you out in this house, really good, because I want you to succeed. But I step my foot outside the door and I brag about whoever I can." So every once in a while, I'll meet a kid and I'll say, "Hey, I need to brag about you. What have you done lately?"

Another thing—every teacher has to write an evaluation for me every day of every class. If a kid did well or poorly, that's written on the evaluation. So when I come in the next morning, the kid gets patted on the back, either up high or low down.

We have all kinds of specialists working with the kids. We take volunteers from outside the area. I pay people in the area, even if it's only a little bit. Poor people can't volunteer. Also what you want is to get the kids out of the neighborhood every once in a while and let them see there's another world out there. We took the five best art students to the Minneapolis Institute of Arts. We took eight people who were very good with computers out to H.B. Fuller. The science kids went to the science museum.

I wear a habit for two reasons. First, I really treasure my position as a sister, a School Sister of Notre Dame. I worked hard to get that. That's why whenever I sign my name, I put SSND after it. Secondly, I want people to know who I work for. I work for God. In civvies I'd be just another old lady. Another old kooky lady. This way I'm a

kooky nun. This way I can smile at people and no one will think I'm making a pass at them. I get to smile or wave at anybody; even that can bring someone a little bit of happiness. Now, some people have said that I wear a habit because I can get money out of people. I'm insulted by that.

Sure, I'm a rebel. Got it from my father. He was always fighting the union, fighting the powers that be. I'm always fighting the bureaucracy every time I can. Some people say I fight the church, but I say, who's the church? It's like asking, what's America? America is the people, isn't it? You wouldn't say America is Reagan and those crazy fool senators and representatives, not some of them anyway. In your wildest dreams you wouldn't say that Reagan was America, would you? All right. Well, I say the church is people, and Christ is the head of the church. He's not here, so he has to delegate his power to humans, who make human mistakes.

Me too. I make mistakes. That's why every single day, I listen to people. How can we make this school better? That's not telling me what to do, that's helping me. Some people, once they get the smell of authority, they got to tell everybody down below. When I first came here, they thought if you were a teacher you were better than they were. It took me a long time to get them over that.

People come here to talk. They say, "I got a problem. I don't know if you can help me." And I'll say, "Come on, you tell me." And they'll say, "Do you have time?" I'll say, "Yeah, I've got time." And then everything gets shoved aside a bit. The deeper the trouble, the higher the priority of making a space for them.●

PROPOSED ARMS SALES

● Mr. LUGAR. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon such notification, the Congress has 30 calendar days during which the sale may be reviewed. The provision stipulates that, in the Senate, the notification of proposed sales be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is available to the full Senate, I ask to have printed in the RECORD at this point the notification I have received.

The notification follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, DC, December 11, 1985.

Hon. RICHARD C. LUGAR,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, we are fowarding herewith Transmittal No. 86-17, concerning the Department of the Air Force's proposed Letter(s) of Offer to Saudi Arabia for defense articles and services estimated to cost $500 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

PHILIP C. GAST,
Lieutenant General, USAF, Director.

TRANSMITTAL NO. 86-17

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b)(1) OF THE ARMS EXPORT CONTROL ACT

(i) Prospective Purchaser: Saudi Arabia.

(ii) Total Estimated Value: Major Defense Equipment:[1] $0 million; other: $500 million; total: $500 million.

(iii) Description of Articles or Services Offered: Contractor Technical Services (CTS) in support of the previous sale of F-15 aircraft and associated systems to the Royal Saudi Air Force (RSAF) to continue providing organizational and intermediate level maintenance and in-Kingdom classroom and on-the-job training for the period 1 July 1987 through 30 June 1990.

(iv) Military Department: Air Force (YGU).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold:

(vii) Section 28 Report: Case not included in Section 38 report.

(viii) Date Report Delivered to Congress: December 11, 1985.

POLICY JUSTIFICATION

SAUDI ARABIA—CONTRACTOR TECHNICAL SERVICES

The Government of Saudi Arabia has requested the purchase of Contractor Technical Services (CTS) in support of the previous sale of F-15 aircraft and associated systems to the Royal Saudi Air Force (RSAF) to continue providing organizational and intermediate level maintenance and in-Kingdom classroom and on-the-job training for the period 1 July 1987 through 30 June 1990. The estimated cost is $500 million.

This sale is consistent with the stated U.S. policy of assisting friendly nations to provide for their own defense by allowing the transfer of reasonable amounts of defense articles and services. It will demonstrate the continuing willingness of the United States to support the Saudi Arabian effort to improve the security of the country through modernization of its forces. In a regional context, enhancement of the defensive capabilities of Saudi Arabia will also contribute to overall Middle East security.

This case will provide for continuation of contractor organizational and intermediate level maintenance and training services provided since the 1978 purchase of F-15 aircraft. Assuring the readiness of previously purchased equipment is essential in demonstrating the reliability of U.S. equipment and commitments. For this reason it is important that provision of these services be unimpeded and that their quality be assured through U.S. Air Force program management and contract administration.

This sale will not affect the basic military balance in the region.

This proposed sale is being notified at this time to allow sufficient lead-time for full and competitive procurement in the implementation of this sale. Identification of the prime contractor will be determined at a later date.

[1] As defined in Section 47(6) of the Arms Export Control Act.

Implementation of this sale will not require the assignment of any additional U.S. Government personnel or contractor representative to Saudi Arabia.

There will be no adverse impact of U.S. defense readiness as a result of this sale.●

PROPOSED ARMS SALES

● Mr. LUGAR. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive prior notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon such notification, the Congress has 30 calendar days during which the sale may be reviewed. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Committee on Foreign Relations.

In keeping with the committee's intention to see that such information is available to the full Senate, I ask to have printed in the RECORD at this point the notifications which have been received. The classified annex referred to in one of the covering letters is available to Senators in the office of the Committee on Foreign Relations, room SD-423.

The notifications follow:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, DC, December 11, 1985.

In reply refer to: I-17168/85ct.

Hon. RICHARD C. LUGAR,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 86-18 and under separate cover the classified annex thereto. This Transmittal concerns the Department of the Army's proposed Letter(s) of Offer to Egypt for defense articles and services estimated to cost $68 million. Shortly after this letter is delivered to your office, we plan to notify the news media of the unclassified portion of this Transmittal.

Sincerely,

Lt. Gen. PHILIP C. GAST,
USAF, Director.

TRANSMITTAL NO. 86-18

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

(i) Prospective Purchaser: Egypt.

(ii) Total Estimated Value:

	Million
Major defense equipment[1]	$56
Other	12
Total	68

[1] As defined in section 47(6) of the Arms Export Control Act.

(iii) Description of Articles or Services Offered: Thirty-six M60A3 tanks with Tank Thermal Sights, machine guns, searchlights and smoke grenade launchers. This purchase will also include spare parts, tools, test sets and a basic load of smoke grenades.

(iv) Military Department: Army (UGW).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold: See Annex under separate cover.

(vii) Section 28 Report: Included in report for quarter ending June 30, 1985.

(viii) Date Report Delivered to Congress: December 11, 1985.

POLICY JUSTIFICATION

EGYPT—M60A3 TANKS

The Government of Egypt has requested the purchase of 36 M60A3 tanks with Tank Thermal Sights, machine guns, searchlights and smoke grenade launchers. This purchase will also include spare parts, tools, test sets and a basic load of smoke grenades. The estimated cost is $68 million.

The proposed sale supports the American foreign policy and national security objectives of assisting Egypt in its program of modernizing its armed forces to that it may provide for its own security and self-defense and contribute to regional security and stability. A strong and independent Egypt will be able to continue to participate in the Middle East peace process and resist incursions of Soviet client states in the region.

The Government of Egypt plans to use these tanks for force modernization. This sale would continue the ongoing program of replacing aging Soviet equipment with modern U.S. equipment. Egypt will have no difficulty absorbing these tanks into its armed forces.

The sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the General Dynamics Corporation of Warren, Michigan.

Implementation of this sale will require the assignment to Egypt of four additional U.S. Government personnel for 10 days.

There will be no adverse impact on U.S. defense readiness as a result of this sale.●

AID TO UNITA: A TEST OF THE REAGAN DOCTRINE

● Mr. ARMSTRONG. Mr. President, much has been said recently about the Reagan doctrine's commitment to aid freedom fighters attempting to push back the frontiers of Communist domination. It was my pleasure recently to appear on the PBS program, "American Interests," to debate the issue of the Reagan doctrine, particularly as it relates to Angola.

At the close of the program, Owen Harries, editor of the National Interest, said that the question of aid for the free forces in Angola comes down to one point—do we stand up for freedom or do we not. Or as he specifically stated, "It is time to put up or shut up."

Aid to UNITA, the National Union for the Total Independence of Angola, is in the national interest of the United States. In addition, UNITA's democratic freedom fighters enjoy bipartisan congressional support as was shown by the repeal of the Clark amendment which had prohibited aid to the free forces in Angola. Now it is time for the administration to put action behind the words. As Mr. Harries so clearly stated, if we truly believe in freedom, it is indeed time for us to put up or shut up.

Nowhere is there a better chance of success for democratic forces than in Angola. To better understand how we can help. I commend to my colleagues a recent piece by William W. Pascoe III which provides background on UNITA's struggle against Communist tyranny and clearly outlines why the Reagan doctrine is sound foreign policy for the United States to pursue in Angola. I ask that the article be printed in the RECORD.

The article follows:

ANGOLA TESTS THE REAGAN DOCTRINE

INTRODUCTION

Angolan government troops, backed by Cuban forces and directed by Soviet battle commanders, have been escalating their military campaign against the pro-Western insurgents of the National Union for the Total Independence of Angola (UNITA) led by Jonas Savimbi. Heavily resupplied by the Soviet Union over the past eighteen months, and bolstered by as many as 7,000 extra Cuban troops—bringing their total to more than 35,000 [1]—government forces launched their most serious offensive yet in their ten-year-old war against UNITA. Their goal: the capture of Jamba, UNITA's headquarters in southeastern Angola, and the destruction of Savimbi's formidable fighting forces.

The combat has been fierce. On September 28, the Luanda government claimed that Savimbi had abandoned his base at Jamba and withdrawn into neighboring Namibia.[2] Savimbi denied this and on October 8, brought Western journalists to the Lomba River to see the remains of a decimated MPLA-PT mechanized column.[3] UNITA had blunted the Angolan offensive 20 miles northwest of Mavinga, a key UNITA stronghold, and had forced the MPLA-PT to retreat.[4] For the moment, at least, Savimbi had won.

In Washington, meanwhile, a different battle has been raging. This one tests the Reagan Doctrine's commitment to help Freedom Fighters and push back the frontiers of communist domination. In this battle, U.S. officials have been wrestling with the question of Washington's policy toward Savimbi. His forces are genuine Freedom Fighters as defined by the Reagan Doctrine and thus clearly deserve U.S. backing. This is recognized on Capitol Hill by Republicans and Democrats alike. In the House, legislation calling for $27 million in humanitarian aid for UNITA was introduced on October 1;[5] a bill providing a similar amount in military aid was introduced October 24. Inexplicably, the State Department is actively opposing these bipartisan measures, even though they simply translate the Reagan Doctrine into action. Secretary of State George Shultz even has gone so far as to write House Minority Leader Robert Michel of Illinois, asking him to block the legislation.

This understandably puzzles some of Shultz's colleagues in the Administration. Secretary of Defense Caspar Weinberger and CIA Director William Casey apparently are pushing for substantial covert aid to UNITA.[6] They recognize that since 1976, Angola has been the key to Moscow's strategy for the region, providing a stable base for SWAPO guerrillas to destabilize Namibia.

The Administration now must make up its mind. Does it or does it not take seriously the Reagan Doctrine's pledge to aid Freedom Fighters? If it is more than empty rhetoric, the White House must direct the State Department to embrace and back vigorously Congress' bipartisan efforts to help UNITA.

ROOTS OF THE PROBLEM

Ten years ago, the departing Portuguese colonial government signed an agreement with the three Angolan independence movements. The Alvor Agreement created a coalition government made up of the MPLA, FNLA, and UNITA, which was to hold elections. Before they could be held, the MPLA imported 13,000 Cuban troops and Soviet advisors, and ousted the other two movements. The FNLA disbanded, while Savimbi and his UNITA forces retreated into Angola's southeastern corner, an area labelled by the Portuguese as "The Land That God Forgot."

From his redoubt, Savimbi has forged a powerful fighting machine.[7] In 1981, with his troops numbering 50,000, he recaptured Mavinga, a small town 150 miles to the northeast of Jamba. With its hard-packed gravel airstrip, Mavinga became a key logistical center for UNITA and the base for its supply lines to the north.

In August 1983, Savimbi launched a successful assault against the MPLA-PT garrison at Cangamba in central Angola. The two-week battle, the first major conventional UNITA attack against MPLA-PT forces, was a turning point in the war. It confirmed Savimbi as a serious threat to the Luanda regime, forced the Angolan communists to shift away from tentative negotiations with South Africa and back to the battlefield, and forced Moscow and Havana to reassess the situation.[8]

Immediately following the battle, Lucio Lara, believed to be the leader of the MPLA-PT's pro-Soviet faction, rushed to Moscow.[9] The Soviets apparently decided to reinforce their Angolan clients and began sending massive amounts of arms to Luanda, including T-62 heavy tanks, MiG-23 jet fighters, SU-22 fighter bombers, and MI-24 helicopter gunships. This bolstered an arsenal which already included MiG-17s, MiG-21s, and hundreds of T-54/55 and PT-76 tanks. Concurrently, the Soviets installed a new air defense line in southern Angola, deploying radars and SA-8 surface-to-air missiles. In November and December 1983, Additional Cuban troops were transferred to Angola from Ethiopia, bringing the total number to 35,000.[10]

Through last year and the first half of this year, the Soviets restocked the MPLA-PT's arsenal. By this August, government forces had over 500 Soviet tanks, including 30 T-62s; over 100 sophisticated Soviet fighter aircraft, including about 30 MiG-23s and 70 MiG-21s; and roughly 25 deadly MI-24 helicopter gunships. The value of these arms transfer has been estimated at $1 to $2 billion.[11]

THE SOVIET OFFENSIVE

The Soviet offensive began in earnest in late July, with a two-pronged assault. The strategic objective of the first prong was the capture of the Cazombo salient, an area of eastern Angola which juts into neighboring Zambia. It has the psychologicial importance of being the birthplace of the MPLA. Its recapture, and with it the reopening of the Benguela railway linking the mineral

Footnotes at end of article.

wealth of eastern Angola to the west coast ports, would provide a tremendous morale boost to MPLA-PT forces.

The assault was launched from recently recaptured Menongue, with air cover from Luena on the Benguela railway. Four government brigades, directed by Soviet commanders who coordinated ground, artillery, and air attacks, moved against UNITA positions. The advantages of direct Soviet operational control down to the battalion, and possibly even platoon, level were immediately evident: where MPLA-PT troops previously had advanced only until they encountered strong enemy fire and then fell back, this time they fought on under heavy fire. Savimbi inflicted hundreds of casualties on the attackers. But rather than risk a major conventional battle where he was outmanned and outgunned, he withdrew his forces to the south, where he anticipated the next thrust.

The objective of the second Soviet-led prong was the occupation of Jamba itself. Built up over the last several years, Jamba is UNITA's political, social, and cultural headquarters. With a population of 10,000 and factories, schools, and hospitals, it is Savimbi's showplace in the Angolan bush. Its loss would be a devastating blow to UNITA.

Four brigades of government troops were commanded by Soviet officers. Soviet and Cuban pilots flew the Angolan Air Force's MiG-21s, MiG-23s, SU-22s, and MI-24s, according to an Angolan pilot shot down and captured by UNITA.[12]

On September 25, Savimbi launched a counterattack, leading 5,500 UNITA soldiers against the 4,600 MPLA-PT troops caught between Mavinga and the river. Trapped in the loose, sandy soil of southeastern Angola, the Soviet armored vehicles and tanks were sitting ducks for the more mobile UNITA forces. The result was an overwhelming UNITA victory. On September 29, Soviet commanders ordered retreat, leaving behind 2,300 dead MPLA-PT troops; 410 UNITA soldiers were dead.[13] By one account, MPLA-PT losses included 79 vehicles destroyed, 52 captured, and 22 aircraft downed—including several MI-24s and at least one MiG-21.[14]

REASONS FOR THE OFFENSIVE

Several factors apparently prompted the Soviets and Angolans to launch their offensive. For one thing, Moscow surely wanted to bolster a client regime in geostrategically important southern Africa and to appear tough before the Geneva summit with Ronald Reagan. For another, Moscow probably wanted to shatter the Lusaka Accord and demonstrate to the black African states the vulnerability and weakness of U.S. diplomacy, which had backed the accord. For the Angolans, questions of prestige were involved, along with internal debates within the MPLA-PT politburo.

The Soviets and the MPLA also almost certainly felt that they had to check Savimbi's advances. July 1985 had been UNITA's best month ever. With 60,000 troops—34,000 guerrillas and 26,000 regulars[15]—under his command, Savimbi had mounted hundreds of attacks all over the country that month.

Moscow's decision to attack in Angola seems part of a worldwide pattern of Soviet offensives that include Afghanistan, Ethiopia, Mozambique, and Nicaragua. This may be part of Moscow's pre-summit posturing. Gorbachev not only would be testing the Reagan Doctrine but would be daring the U.S. Congress to deliver on its much-ballyhooed new support for anti-communist insurgencies.

The MPLA-PT had its own reasons for the offensive. Luanda was hosting the Ministerial Conference of Non-Aligned Nations in September and was anxious to undermine the image of UNITA as a viable force. Luanda probably feared that several of the delegations to the conference would call for negotiations that could lead to an Angolan coalition government as had originally been planned under the Alvor Agreement. UNITA already had demonstrated its capability to black out the capital. For good reason did the Angolan communist regime want to force Savimbi back into his base of operations.

The MPLA-PT, moreover, had scheduled its Second Party Congress for late November and early December. One faction of the party was expected to push for negotiations with UNITA, possibly leading to a coalition government. The aim of this group was to appear moderate enough to get U.S. diplomatic recognition and economic aid. The hardliners, however, sought to make the question moot by crushing UNITA before the Congress.

U.S. POLICY OPTIONS

The Reagan Administration now has an extraordinary opportunity in Angola. This is due to Savimbi's success in holding his troops together in the face of a massive Soviet-led onslaught, the rainy season which prevents another Soviet offensive at least until next March, and Congress' repeal of the 1976 Clark Amendment which banned U.S. aid to UNITA. Administration options include:

(1) Overt humanitarian aid. Representative Claude Pepper, a long-time liberal Democrat from Florida, helped lead the move to repeal the Clark Amendment. He now has introduced legislation in the House providing $27 million in humanitarian aid to Savimbi's forces. Modeled on the current aid package for the Nicaraguan Freedom Fighters, the funds would purchase food, clothing, and medicine; neither the CIA nor the Pentagon would be allowed to administer the program. It is believed that the White House assured Pepper that it will back such legislation.[16]

(2) Economic sanctions. Representative Bill McCollum, a Republican from Florida, has introduced legislation imposing economic sanctions on the Angolan government if progress is not made toward democracy in Angola; this must include negotiations with UNITA on forming a coalition government to prepare for elections. Based on the South Africa sanctions enacted by Congress this summer, McCollum's bill would restrict imports from Angola and prohibit new loans by U.S. government agencies and private banks to the Angolan government.

(3) Declare Angola Communist. The State Department has not yet formally labelled the decade-old MPLA-PT regime as "communist." That the Luanda regime is communist should be beyond doubt. Ten years ago it asked for and received massive arms supplies from Moscow; it hosts some 35,000 Cuban, Soviet, and communist bloc troops; and it has modeled its internal policies after the Soviet-dominated regimes of Eastern Europe. Whether the State Department classifies a nation as "communist" is of considerable substantive as well as symbolic importance. Communist nations, for example, cannot receive any U.S. economic or military assistance; nor are they eligible for Export-Import Bank loans.

(4) Raise the Angola issue at the Geneva summit. At his meeting later this month with Mikhail Gorbachev, Ronald Reagan could warn that continued Soviet interference in Angola contradicts Moscow's rhetoric that it is seeking world peace and stability. Reagan further could warn that this Soviet intervention in Angola is going to start meeting with active U.S. resistance.

(5) Covert military aid. Several Senators, including Republicans Steven Symms of Idaho and Orrin Hatch of Utah, are pressing the Administration to give covert military aid to UNITA. These funds could buy UNITA anti-aircraft and anti-tank weaponry, the arms they most need. This aid could be funnelled to UNITA through a friendly nation (as Pakistan channels U.S. covert aid to the Afghan Freedom Fighters) or the aid could be distributed directly to UNITA.

(6) Overt military aid. Representative Mark Siljander, a Republican from Michigan, has introduced legislation providing $27 million in overt military aid to UNITA. This bill already has 70 bipartisan cosponsors.[17] They argue that the time has come for the President to back up his rhetoric about supporting Freedom Fighters with action. And since the U.S. never has recognized the Luanda regime as the legitimate government of Angola, no laws would be broken by aiding forces seeking to overthrow the MPLA-PT.

CRITICISMS OF AID TO UNITA

Critics offer four arguments against providing such aid: (1) U.S. aid to UNITA strengthens the Angolan government's dependence on the Soviet Union and Cuba, and thereby increases Soviet influence in the region; (2) aid to UNITA undermines the three-way negotiations between the Angolans, the South Africans, and the U.S. over the independence of South West Africa/Namibia at a very delicate stage in the negotiations; (3) aid to UNITA would "ally" the U.S. with South Africa, thus damaging the U.S. image in southern Africa; and (4) aid to UNITA would widen the Angolan civil war.

As for the first argument, it is hard to see how the MPLA-PT could possibly become more dependent on the Soviets and Cubans than it already is. The regime receives massive amounts of military and economic assistance from the Soviet bloc, Soviet and Cuban pilots fly the combat missions for the Angolan Air Force, and Soviet officers have taken direct control of combat operations.[18]

There are serious doubts, moreover, as to the ability of the Angolan communist regime to send the Cuban troops and Soviet commanders home even if they wanted to. In a conversation held with The Heritage Foundation earlier this fall, Angolan Minister of Trade Ismael Gaspar Martins could not answer in the affirmative when asked if the MPLA-PT would be able to remove all Soviet bloc forces if it wanted to. Three times he was asked this question very specifically; three times he evaded it.

Even if U.S. aid to Savimbi would increase Soviet influence over the MPLA-PT, this would be of little consequence if Savimbi continues to win battles and eventually defeats the MPLA-PT or, at least, forces his way into a coalition government. The best way to reduce Soviet influence in southern Africa is to remove a Soviet client regime from power. Aid to UNITA could do just that.

The second argument against U.S. aid is made, curiously, by Secretary of State George Shultz. He claims that negotiations between South Africa and Angola have reached a very delicate stage; as such, goes the argument, U.S. aid to UNITA would

cause Angola to quit the discussions. Shultz and his principal State Department advisors feel that the only way to ease Cuban forces out of Angola is to broker an accord trading their departure for a South African withdrawal from Namibia.

The problem with this, of course, is that these negotiations have been underway for a decade and are no closer to conclusion now than when they began. The State Department, for reasons unknown, overlooks the fact that the main purpose of Cuban forces in Angola is to prop up the MPLA-PT regime. The only realistic hope of removing Cuban troops is a UNITA victory over the MPLA-PT.

The third argument is that aid to UNITA effectively would ally the U.S. with South Africa. While it is true that Pretoria aids UNITA overtly, so do West European, black African, and Middle Eastern states concerned about Soviet expansionism in southern Africa. By helping UNITA, therefore, Washington also would be allying with these nations.

U.S. aid to UNITA, in fact, actually would lessen Savimbi's reliance on South Africa. For one thing, U.S. aid would dilute immediately the influence of South Africa. For another, and more important, it would signal those nations already aiding UNITA that the U.S. agrees with them on the need to help Savimbi. They probably would increase their own aid, further weakening South Africa's influence.

The final argument against U.S. aid to UNITA is that it would widen the war. But this is only true if "widening" means enabling UNITA to fight effectively enough to win—and to end the civil war. The men and women of UNITA—Angolan, nationalist, and anti-colonialist—are fighting to drive the foreign Cuban and Soviet occupying forces from Angolan soil. Savimbi does not want or need foreign needs to help UNITA wage its war; in fact, he specifically rejects this solution. He merely wants aid.

CONCLUSION

The Soviet assumption of control of military actions in Angola is a serious escalation of Soviet intervention in southern Africa. It is a new threat to U.S. interests in that geostrategically and economically critical region. In response, the U.S. must take new actions to prevent the defeat of UNITA by Soviet-directed and Cuban-backed MPLA-PT troops.

The greatest threat to Savimbi comes from the addition of massive airpower to the Angolan arsenal. The deadly MI-24 helicopter gunship, already used by the Soviets in Afghanistan and Nicaragua, gives the MPLA-PT effective air cover and, when used in conjuction with high performance MiG-23 and SU-22 fighters, and in coordination with heavy T-62 tanks, shifts the tactical balance in Angola. Savimbi's forces so far have been able to destroy some of these helicopters only by attacking them on the ground with mortars. Shoulder-fired anti-aircraft missiles would greatly improve UNITA's defensive capability and would help to balance the tactical equation. Anti-tank weapons similarly would help UNITA.

Western European, black African, and Middle Eastern nations already aid UNITA. But they are hesitant to make their assistance known publicly for fear of provoking the Soviet Union. U.S. aid to UNITA would reassure them and encourage them to boost their backing. When the rainy season ends in March, the Soviets are sure to launch another offensive against UNITA. By then, the Reagan Administration will have demonstrated whether the Reagan Doctrine and its vow to help Freedom Fighters are simply empty rhetoric or a blueprint for American policy. Democrats and Republicans in Congress, in mounting numbers, want to turn that rehtoric into policy. Perplexingly, only the Administration—and particularly the State Department—stands in the way.

ADVANCE NOTIFICATION PROPOSED ARMS SALES

● Mr. LUGAR. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be reviewed. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Committee on Foreign Relations.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that such a notification has been received.

Interested Senators may inquire as to the details of this advance notification at the office of the Committee on Foreign Relations, room SD 423.

The notification follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, DC, December 6, 1985.
In reply refer to I-17394/85ct.
Dr. M. GRAEME BANNERMAN,
Deputy Staff Director, Committee on Foreign Relations, U.S. Senate, Washington, DC.

DEAR DR. BANNERMAN: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(d)(1) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Northeast Asian country tentatively estimated to cost $14 million or more.

Sincerely,

GLENN A. RUDD,
Acting Director.●

UNITED STATES-JAPANESE TRADE

● Mr. MURKOWSKI. Mr. President, now that Japan has announced that it will lift voluntary restraints on auto exports to the United States next year, the trade issue is squarely before the Congress. I have offered a sense of the Senate resolution (S. Res. 223) as one solution that could be beneficial to our trade problems in several ways.

We need United States participation in the transportation of Japanese automobile imports. Vehicle imports from Japan to the United States are projected to reach 2.3 million units, or 21.5 percent of the total United States automobile market in the current year. With today's announcement, that figure may well increase next year.

At the present time, all of the vehicles are being transported on Japanese owned or controlled ships. This is not a result of a competitive advantage of Japanese ships but the direct result of commercial cargo preference practiced between Japanese vehicle manufacturers and the Japanese shipowners.

Maritime union leaders and United States shipping companies have testified before Congress that United States-flag vessels can be competitive with Japanese vessels on a per voyage

operating cost basis. To garner some of this trade, both groups have indicated their willingness to join together to build ships in Japan, to be manned by American crews, assuming contracts could be obtained from Japanese auto manufacturers to amortize the cost of the ships.

As Japan's largest customer in the automobile market, it is only fair that we share in some of this trade. It would bring positive relief not only to our increasing services trade deficit with Japan but would create new jobs for our maritime labor industry.

For example, if United States shipping participated in just 20 percent of the Japanese carcarrier trade, almost $200 million would be generated in United States services trade. Additionally, the maintenance of a reasonable number of U.S.-flag vehicle carriers and attendant merchant seamen corps is an important national security consideration.

Mr. President, We have to find realistic ways to reduce our trade deficits without throwing up barriers of our own. To do this we are going to have to identify some specific proposals to Japan. We have only two choices—to ask them to market less in our country, which is unrealistic, or to encourage them to buy more U.S. products, natural resources and services.

I ask my colleagues to support this resolution. I intend to offer it as an amendment when the Senate next considers trade legislation.●

INDIAN EDUCATION PROGRAMS

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate turn to the consideration of Calendar No. 397, S. 1621, dealing with Indian education programs.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1621) to amend title 25, United States Code, relating to Indian education programs, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which has been reported from the Select Committee on Indian Affairs with an amendment to strike out all after the enacting clause, and insert the following:

That section 1128 of Public Law 95-561 (25 U.S.C. 2008), as amended, is amended by—

(1) deleting "Indian students" in subsection (a)(1) and substituting in lieu thereof "eligible Indian students"; and

(2) deleting "Indian child" between the words "for each" and "attending such school", and "for an" and "in public school" in subsection (b), and substitute in lieu thereof "eligible Indian student"; and

(3) by adding the following new subsections:

"(f) In this section 'eligible Indian student' means a student who—

"(1) is a member of or is at least a one-fourth degree Indian blood descendant of a member of an Indian tribe which is eligible for the special programs and services provided by the United States through the Bureau of Indian Affairs to Indians because of their status as Indians, and

"(2) resides on or near an Indian reservation or meets the criteria for attendance at a Bureau off-reservation boarding school.

"(g)(1) An eligible Indian student may not be charged tuition for attendance at a Bureau or contract school. A student attending a Bureau school under clause 2(C) of this subsection may not be charged tuition.

"(2) The Secretary may permit the attendance at a Bureau school of a student who is not an eligible Indian student if—

"(A) the Secretary determines that the student's attendance will not adversely affect the school's program for eligible Indian students because of cost, overcrowding, or violation of standards,

"(B) the school board consents, and

"(C) the student is a dependent of a bureau, Indian Health Service, or tribal government employee who lives on or near the school site, or

"(D) a tuition is paid for the student that is not more than that charged by the nearest public school district for out-of-district students. The tuition collected is in addition to the school's allocation under this section.

"(3) The school board of a contract school may permit students who are not eligible Indian students under this subsection to attend its contract school and any tuition collected for those students is in addition to funding under this section.".

SEC. 2. Any other provision of law notwithstanding, the Secretary of the Interior shall count for funding purposes under section 1128 of Public Law 95-561 during the 1985-1986 academic year each student attending a Bureau or contrct school during the count week for that year if the student (a) was counted for funding purposes under section 1128 for the 1984-1985 academic year and (b) is an eligible Indian student under the amendment to section 1128 in section 1 of this Act.

SEC. 3. The following provisions of law are hereby repealed—

(1) in the Act of March 1, 1907 (ch. 2285, 34 Stat. 1015) the first full paragraph on page 1018 (25 U.S.C. 288).

(2) in the Act of March 3, 1909 (ch. 263, 35 Stat. 781) the last two provisos in the second full paragraph on page 783 (25 U.S.C. 289).

"(3) in the Act of May 27, 1918 (ch. 86, 40 Stat. 561) the third proviso in the paragraph under the heading "SUPPORT OF INDIAN SCHOOLS" on page 564 (25 U.S.C. 297).".

Mr. ANDREWS. Mr. President, I rise in support of S. 1621, a bill to amend title 25 of the United States Code as it relates to Indian education programs.

Mr. President, beginning around 1912 Congress, in its annual appropriation acts, began limiting expenditure of Federal funds to educate children of less than one-quarter degree Indian blood if their parents were citizens of the United States and of the State wherein they lived and where there were adequate free school facilities provided. This provision was reenacted in each appropriation act until 1918 when it apparently became permanent law. The provision is now found in section 297 of title 25 of the United States Code.

Mr. President, tremendous changes have occurred in both Indian law and Indian policy since the date this provision was enacted. As a simple example, I would note that in 1924 all Indians born in the United States were made citizens of the United States. This citizenship legislation was in recognition of the fine military service performed by the American Indians in World War I. In 1934 Congress enacted the Indian Reorganization Act, an act that reversed 50 years of Federal policy that had looked toward the breakup of Indian reservations and disintegration of tribal governments. Both of these policy changes are inconsistent with the policy embodied in 25 U.S.C. 297. It has been a cornerstone of Federal Indian policy that Indian tribes are free to define their own membership. Section 297 encroaches on that policy.

Mr. President, in fashioning the provisions of S. 1621 as reported out of my committee, the committee was cognizant of a number of concerns of the executive branch. I believe we have reported a bill that addresses most, if not all, of those concerns.

Certainly there is no good reason why an Indian child living on an Indian reservation should be compelled to attend any school other than that which his fellow Indian children attend. The recent proposal of the Bureau of Indian Affairs to promulgate regulations to enforce the 1918 act after the many years of contrary practice is simply not reasonable. I might say, this BIA proposal would affect a number of children in my own State of North Dakota and I can well appreciate the concerns of these Indian children and their parents.

Mr. President, I urge that the Senate join with me in supporting this bill.

Mr. ABDNOR. Mr. President, I rise in support of S. 1621 which will define eligibility for BIA funded education programs. I commend my good friend, Senator MELCHER for his efforts on this bill and I am pleased to be a cosponsor of this legislation.

This legislation is vital to the well-being of nearly 1,000 schoolchildren attending schools funded by the Bureau of Indian Affairs and is necessary because of the BIA's efforts to enforce an old law which requires that students of less than one-fourth blood not be eligible for Federal Indian education programs.

Mr. President, this is a very serious premise. It has been the position of the Federal Government that individual Indian tribes have the right to determine their own membership criteria. If this legislation is not enacted,

we are taking the step of deciding by statute who is, and who is not, an American Indian.

Mr. President, the Bureau of Indian Affairs provided our committee with figures which indicate that 922 children attended BIA schools who, by the earlier statute, were not entitled to receive Federal assistance; 298 were identified as non-Indian and 590 as Indians of less than one-fourth degree. It is important to note that the majority of non-Indian students were dependents of BIA and Indian Health Service [IHS] employees. Many of the other children were of the Eastern Cherokee Tribe whom the BIA would deem ineligible for assistance. In my own State of South Dakota, it has been estimated that nearly 500 children would be made ineligible for Indian education programs.

This situation cannot continue. Our bill, S. 1621 addresses these concerns in a direct and simple manner by clarifying the eligibility criteria for BIA Programs and will assure that none of these children will be abandoned by the schools they are now attending. I urge my colleagues to consider the importance of this issue and join in assuring the education of these children.

Mr. MELCHER. Mr. President, I rise in support of the bill, S. 1621, to provide BIA school funding for all students who are members of federally recognized tribes.

Sometime in the past year or so, the BIA began to enforce a law that has been on the books for 67 years but which has never been enforced. Prior to the 1978 Indian Education Amendments and the regulations published pursuant thereto, schools were funded on a budgetary basis. The new amendments require a formula based on the number of students. Once the per pupil funding scheme became part of the budget, ways were sought to reduce this to eliminate ineligible students. The 1918 act was resurrected. Implementation of this act will have its greatest effect on the Cherokee School, Cherokee, NC, a school which has been funded for more than a century by the BIA and which has always served all children enrolled in the tribe. For 67 years the 1918 act was never enforced against the Cherokee School or the Indian children enrolled there. Now, it turns out, of the 900 students at the school, about 140 are ineligible because they are less than quarter blood. They can still go there but BIA is refusing to fund them, so the school will have to absorb the costs of educating these children. Or, they can go to public school. Neither of these choices is fair for anyone concerned, but least of all for the children.

I introduced this bill for various reasons, including the fact that for all BIA services, except education, membership in a federally recognized tribe is the sole criteria for eligibility. Second, the Congress has passed at least six major acts since 1918 dealing with education or eligibility for services and in each of those tribal membership is the criteria. It simply makes no sense now to change a practice that has continued for over half a century in a way that will discriminate, by race, against certain children, and to use as justification an old law that has been repealed by implication on at least six occasions. I hope all of my colleagues will join me in supporting this bill.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute.

The committee amendment was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and the third reading of the bill.

The bill (S. 1621), as amended was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 1621

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1128 of Public Law 95-561 (25 U.S.C. 2008), as amended, is amended by—

(1) deleting "Indian students" in subsection (a)(1) and substituting in lieu thereof "eligible Indian students"; and

(2) deleting "Indian child" between the words "for each" and "attending such school", and "for an" and "in public school" in subsection (b), and substitute in lieu thereof "eligible Indian student"; and

(3) by adding the following new subsections:

"(f) In this section 'eligible Indian student' means a student who—

"(1) is a member of or is at least a one-fourth degree Indian blood descendent of a member of an Indian tribe which is eligible for the special programs and services provided by the United States through the Bureau of Indian Affairs to Indians because of their status as Indians, and

"(2) resides on or near an Indian reservation or meets the criteria for attendance at a Bureau off-reservation boarding school.

"(g)(1) An eligible Indian student may not be charged tuition for attendance at a Bureau or contract school. A student attending a Bureau school under clause 2(C) of this subsection may not be charged tuition.

"(2) The Secretary may permit the attendance at a Bureau school of a student who is not an eligible Indian student if—

"(A) the Secretary determines that the student's attendance will not adversely affect the school's program for eligible Indian students because of cost, overcrowding, or violation of standards,

"(B) the school board consents, and

"(C) the student is a dependent of a Bureau, Indian Health Service, or tribal government employee who lives on or near the school site, or

"(D) a tuition is paid for the student that is not more than that charged by the nearest public school district for out-of-district students. The tuition collected is in addition to the school's allocation under this section.

"(3) The school board of a contract school may permit students who are not eligible Indian students under this subsection to attend its contract school and any tuition collected for those students is in addition to funding under this section.".

SEC. 2. Any other provision of law notwithstanding, the Secretary of the Interior shall count for funding purposes under section 1128 of Public Law 95-561 during the 1985-1986 academic year each student attending a Bureau or contract school during the count week for that year if the student (a) was counted for funding purposes under section 1128 for the 1984-1985 academic year and (b) is an eligible Indian student under the amendment to section 1128 in section 1 of this Act.

SEC. 3. The following provisions of law are hereby repealed—

(1) in the Act of March 1, 1907 (ch. 2285, 34 Stat. 1015) the first full paragraph on page 1018 (25 U.S.C. 288).

(2) in the Act of March 3, 1909 (ch. 263, 35 Stat. 781) the last two privisos in the second full paragraph on page 783 (25 U.S.C. 289).

(3) in the Act of May 27, 1918 (ch. 86, 40 Stat. 561) the third proviso in the paragraph under the heading "SUPPORT OF INDIAN SCHOOLS" on page 564 (25 U.S.C. 297).

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

COMPACT OF FREE ASSOCIATION

Mr. DOLE. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on House Joint Resolution 187.

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the amendment of the Senate to the joint resolution (H.J. Res. 187) to approve the "Compact of Free Association."

(The amendment of the House to the amendment of the Senate is printed in the RECORD of December 11, 1985, beginning at page 35808.)

Mr. McCLURE. Mr. President, I urge my colleagues to agree to the amendments to the joint resolution which have been passed by the House. While I believe that the original language passed by the Senate would be preferable, I do believe that the language passed by the House is an acceptable compromise to the original House version and Senate acceptance would avoid the need for a conference with the House.

For the benefit of my colleagues, since there will not be a conference and a statement of managers to rely on to interpret these provisions, I will ask unanimous consent that a section-by-section analysis of the House provisions be included in the RECORD at the close of my remarks. This analysis represents our interpretation of these

provisions and how they relate to the original Senate action.

Mr. President, I regret that final congressional action could not have taken place earlier this session, or even last Congress when the Committee on Energy and Natural Resources first reported the compact to the Senate. I again would like to offer my congratulations to the representatives of the Federated States of Micronesia and the Marshall Islands for their efforts in negotiating this agreement. While it is unfortunate that the agreement could not be preserved in its original form, I think that with the additional provisions they will find that the package, when taken as a whole, does represent an improvement. I would offer them my personal assurance that I will continue to take a strong and sympathtic interest in their future. I would hope that our respective nations will be able to enter into and develop this relationship with the same spirit of mutual respect and confidence which we have had over the years.

I think the record made during the Senate consideration of the compact fully lays out the history of the negotiations. I would refer anyone to that discussion and the report of the Committee on Energy and Natural Resources and the extensive hearing record. While I expressed some great displeasure with the sabotage of the agreement by the Department of the Treasury and the singular lackluster performance of the Office of Management and Budget in defending the President during the initial consideration of the compact, I think we can all breathe a little easier because Treasury did not follow through on their commitment to help after Senate passage. Had we had any more of their help, the President would probably be facing another 15 years of negotiations. I do appreciate the efforts of Senator PACKWOOD to try to hold the Senate version of trade. Without his assistance we would indeed be facing great difficulties.

I do want to say something about the trade provisions. I appreciate the support for the compact which the Governors of American Samoa, Guam, the Northern Mariana Islands, and Hawaii expressed. Governor Aryoshi's comments before the House Interior Committee in Hawaii are eloquent and to the point. Governor Bordallo also has made an exceptional statement in support. Governor Lutali's support is also important for those who would attempt to use the economy of American Samoa to undermine this agreement. I would hope that we would not have to consider local labor requirements as some would have us do.

This is a good agreement. I know that it has been frustrating for the Micronesians. I can only assure them that it has been as frustrating for me. There were significant differences between the Senate and the House and I know that at times the Micronesians must have thought that no one really cared or understood what was at issue. I can assure them that was not the case.

The number of hearings held by the House in fact represented their concern that the agreement be the best for all parties. The extensive House amendments were not designed to diminish in any fashion the commitment to free association. We had significant disagreements with the House, and we have resolved them, but I want to emphasize that at all times all parties kept in mind the aspirations of the Micronesian peoples and their governments. The significant amendments agreed to by the House bears ample evidence of that concern.

Mr. President, it has been a long 15 years since the Secretary of the Interior sent Harrison Loesch out to begin the negotiations. It has been a long 20 years since the first Congress of Micronesia studied the options for the future. There are many individuals whose contributions should be noted for we would not be here today if not for their work. Certainly the Micronesian leadership including Presidents Nakayama and Kabua are to be congratulated on their ability to hold fast to their determination to seek and achieve free association. The negotiators, including Andon Amaraich from the Federated States of Micronesia and the other members of their Commission including the Governors of the four states, Tony deBrum and the members of the delegations from the Marshall Islands, and the earliest negotiators for the original Congress of Micronesia including Lazarus Salii, now the President of the Republic of Palau all have faithfully represented the hopes and desires of their peoples and have achieved their goal of establishing a firm base for their future. I would also like to express my appreciation to Epel Ilon, the Washington representative for the federated states and to Asterio Takesy for their hard work and assistance to the committee as well as Oscar deBrum and Carl Ingram for the Marshall Islands. Without the patience and understanding which all of these individuals showed, we would not have been able to accomplish what we have. I am deeply grateful to all of them and their willingness to help the committee.

The negotiations with the Congress at times must have made the previous 15 years seem easy. The success of free association is more a tribute to their efforts than any action which we have taken here. I hope that the peoples of Micronesia fully appreciate the exceptional work which all of them have done to bring their nations into being.

I also think that appreciation should be expressed to the negotiators for the United States: Harrison Loesch, Haydn Williams, Phil Manhard, Peter Rosenblatt, and Fred Zeder. I have dealt with each and can assure my colleagues that through four administrations, these men held to the concept of free association and worked out a good arrangement. They are to be congratulated. I must say that we have had our differences, and some of the amendments reflect those differences. As firm as they were in their negotiations with the Micronesians, they were equally as firm with the Congress. Luckily we have the last word.

I think it would also be appropriate to mention some of the staff who labored on this agreement. I especially would like to mention Herman Marcuse of the Department of Justice who participated from Palau to Maui through virtually the entire negotiations. His mark is throughout the compact and he has been invaluable. I would note that the committee has relied on Herman's expertise in other areas such as the comprehensive judicial reform measure for the territories which was enactred last year. The late C. Brewster Chapman should also be noted. His contributions for the Department of the Interior were likewise of great value. Ruth Van Cleve and Rick Montoya from their positions responsible for the trust territory also made significant contributions. The staff over the years at the Office for Micronesian Status Negotiations also labored long and hard and should be congratulated. I would mention Jim Berg, Dick Teare, John Armstrong, Al Short, Dick Williams, and the others who have worked in the office over the years.

I would also like to acknowledge the deep commitment of many of our colleagues in the House. Congressmen SOLARZ, UDALL, SIEBERLING, YOUNG, LUJAN, BLAZ, LEACH, and others made this compact possible. Congressman LAGOMARSINO especially worked to bridge the two committees he serves on and his sympathetic consideration was essential. Several of the staff on the House side should also be acknowledged including Stanley Roth and Cindy Sprunger of the House Foreign Affairs Committee and Pat Krause, Manase Monsur, Stan Sloss, Roy Jones, and Jeff Farrow of the House Interior Committee. I especially want to single out Tom Dunmire who retired earlier this year after many years of service to the House committee. While Tom had many reservations about the compact, his commitment to the future of the trust territory over the years made many of the advancements which have occurred possible. The Micronesian peoples owe Tom a deep debt for his efforts on their behalf over the years.

I also want to acknowledge the late Congressman Phil Burton. Anyone who knew him also knew of his passion for the peoples of the territories and the trust territory. When the Covenant for the Mariana Islands was submitted 10 years ago, Phil had it out of the House almost before we had introduced it in the Senate. It took him a total of 3 days. His legacy is in the projects and the increased self-government throughout the islands and if it were not for him and his dedication, the Micronesian peoples would not have the basis for development which they now enjoy.

I want to express my appreication to Senators PACKWOOD and LUGAR for their assistance. This was a difficult road and we could not have traveled it without their assistance. I want to especially thank my colleague Senator JOHNSTON for his assistance. We came to the Senate together and have worked since we came here on this issue in a nonpartisan fashion. He, more than any other individual is responsible for the oversight and investigation in 1974-75 into public works management in the Trust Territory of the Pacific Islands. That oversight led to a definition of the capital infrastructure program. His support in the Appropriations Committee has enabled us to fulfill our commitments and we could not have reached this point without his strong support. I also need to say that Senator Jackson provided the committee throughout his service with a knowledge and concern which enabled us to present this agreement to the Senate. He had been present during the initial discussions which led to the trusteeship and he was responsible for virtually every significant development in the trust territory. He made it clear that this was not a partisan issue and I am grateful for his efforts as chairman of the committee until 1981 to involve all members of the committee.

I finally want to thank the staff who worked on this agreement: Jim Beirne, Frank Cushing, Al Stayman, and Gary Ellworth of the committee staff, Mike Harvey of the minority staff of the committee, and Laura Hudson of Senator JOHNSTON's staff. Their contributions have been invaluable.

Mr. President, this is a good agreement and I urge the Senate to agree with the House amendment to clear this measure for the President's signature.

Mr. President, I ask unanimous consent that the section-by-section analysis be printed in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS OF HOUSE AMENDMENT TO SENATE AMENDMENT TO H.J. RES. 187

Section 1—provides for a short title and table of contents.

TITLE I—APPROVAL OF COMPACT; INTERPRETATION OF, AND U.S. POLICIES REGARDING COMPACT AND SUPPLEMENTAL PROVISIONS

Section 101. Approval of compact.

This section approves the Compact for the Federated States of Micronesia (FSM) and the Republic of the Marshall Islands (RMI) and requires an Act of Congress to change any part of the Compact and certain of the subsidiary agreements. This section further provides that the subsidiary agreements to the Compact shall be considered to be bilateral agreements. Finally, the section provides that the Compact shall not become effective until the President has certified that the agreements under Sections 102 and 103 have been reached between the Free Associated States (FAS) and the U.S.

The Senate has previously provided that neither the Compact nor those subsidiary agreements incorporated by reference into it as well as the mutual security agreements could be changed other than by an act of Congress. The House originally would have enacted all of the subsidiary agreements. In discussions with the House, they agreed not to enact any agreements but would agree with the Senate formula of requiring formal action by Congress to change certain important agreements, provide for a notice and wait period for changes to other agreements which were more administrative, and a single notice requirement on others to ensure that the Congress remains informed. This is a substantial change, but one which does protect the legitimate interest of the Congress in seeing that the understandings which support the Compact are maintained.

Section 102. Agreements with FSM.

(a) Law enforcement assistance. This provision expands the provisions of Section 175 of the Compact by requiring the President of the U.S. to negotiate an agreement with the FSM which shall provide for mutual assistance in law enforcement, the control of illegal substances and other criminal laws. This provision also extends technical and training assistance in law enforcement as anticipated under Sections 224 and 226 of the Compact. Finally, this provision requires the President to consult with the appropriate agencies and to make annual reports to Congress on this agreement.

The Micronesian governments will need the full support of the United States as they fully assume the responsibilities of self government. Various programs such as that undertaken by the State of Alaska on police training have been very helpful, and this agreement will ensure full cooperation and, as requested, support from the United States as may be required.

(b) Economic development plan review process. This provision requires the FSM to submit economic development plans every 5 years to the U.S. and that the President review and report to Congress on these plans. The provision also requires that the President shall negotiate an agreement with the FSM to provide for GAO audits of U.S. assistance to the FSM, and that the FSM cooperate in those audits.

The section also authorizes the President to agree to an effective date based on the submission of three five-year plans for concurrence rather than a single fifteen-year plan. While the Compact contemplates a single plan, the difficulties of planning even five years in advance are obvious. We would not want to back the Micronesian governments into either a vague fifteen-year plan or hamper the needed flexibility which they must have to deal with unforeseen circumstances. The importance of the GAO audit can not be underestimated. GAO is capable of providing these new governments with important analyses of how various programs are working. Their recommendations can provide invaluable assistance to Micronesian managers in improving the operations of government and identifying weaknesses.

Section 103. Agreements with the RMI.

(a) and (b) These sections provide for the same agreements as Section 102 (a) and (b) but with the RMI.

(c) Ejit. This provision requires the President to negotiate an agreement with the RMI to ensure the continued use of Ejit Island by the people of Bikini until Bikini is habitable. This is consistent with U.S. policy regarding nuclear test victims.

It is important to note that the Government of the Marshall Islands has expressed a strong commitment to protect and provide for the populations of the four affected atolls. Should legal question arise which would affect the ability of the Government of the Marshall Islands to make Ejit available, the provision ensues assistance from the United States to help the Marshall Islands government provide alternative areas for the people of Bikini until Bikini is restored. Authorization for such assistance had been included within the ex gratia authorization contained in the Senate measure.

(d) Kwajalein. This provision declares that it is Congressional policy that payments to the Kwajalein Atoll landowners are required for U.S. national security under Title III of the Compact and that the failure to make these payments shall initiate the consultative procedures under Section 313 of the Compact. This section also authorizes assistance to the Kwajalein Atoll Development Authority. The authorization is covered by the existing open-ended authorization.

(e) Section 177 agreement. This provision amplifies the subsidiary agreement to section 177 of the Compact with respect to the selection of the fund manager. It is designed to ensure that the Republic of the Marshall Islands receives the fullest technical assitance from the United States in the selection of a fund manager.

(f) Nuclear test effects. This provision reiterates the provisions of Section 177 of the Compact which provides that the peoples of the four atolls shall receive $150 million in compensation for their injuries.

(g) Espousal provisions. This provision retiterates the provisions of Section 177 of the Compact which provide that there is full and final settlement of all nuclear effects claims.

In light of the statement made by some more interested in protracted litigation than compensation for the victims of the testing program, both the Senate and House agreed that an explicit endorsement of the resolution was important. Additional ex gratia assistance will be available in the future if circumstances warrant and this provision in no manner lessens the concern which we have for the population of the affected atolls. It is designed to prevent the Marshall Islands from becoming a tropical Bleak House.

(h) DOE health care programs and USDA food programs. This provision authorizes the U.S. to provide continued medical care to the 174 people of Rongelap exposed to radiation in a 1954 nuclear test and to provide continued food assistance to the people of Bikini and Enewetak pursuant to public laws 95-134 and 96-205. These provisions are covered by the existing open-end authoriza-

tion and are consistent with current U.S. policy on compensation to nuclear test victims.

It is our expectation that the cost of medical care and logistical support will total approximately $22.5 million over the next 11 years. The trust fund established under the section 177 agreement will provide the bulk of the funds necessary for this, but the ex gratia authorization will be available, as provided in the original Senate language, to cover any shortfall.

(i) Rongelap. This provision further refines Article II, section 1(e) of the subsidiary agreement implementing Section 177 of the Compact by requiring that the RMI review and report to the President on the DOE study of radiation levels on Rongelap to verify their adequacy. If they are not adequate, authorization is made for funds necessary to restore Rongelap to habitability. This is covered by the existing open-ended authorization and is consistent with the Senate report language on compensation to nuclear test victims.

(J) Four Atoll Health Care Program. This provision reiterates that U.S. assistance under section 1(a) of Article II of the Agreement for the Implementation of Section 177, shall be only for the people of the four atolls who were affected by U.S. nuclear testing. The provision clarifies that unspent funds under the program shall be returned each year to the Fund Manager for future use.

(k) Enjebi community trust fund. This provision requires the establishment of an "Enjebi Community Trust Fund" by the Secretary of the Treasury with a balance of $7.5 million to be transferred to the RMI provided that: the RMI establishes a fund manager, the U.S. monitors radiation conditions on Enjebi, and the U.S. provides for the resettlement of Enjebi or some other location by the people of Enjebi. This is covered by the openended authorization and is consistent with current U.S. policy on compensation to nuclear test victims.

It is important to note that although a fund will be established with a credited amount of $7.5 million, it remains for the Appropriations Committees to appropriate to the fund before any funds would be available. The Appropriations Committees have been considering this issue, and, as specified in the section, these funds would be ex gratia and covered by the original Senate language.

(1) Bikini Atoll cleanup. This provision reiterates and reaffirms the U.S. position as stated in the settlement agreement of March 15, 1985 in the People of Bikini et al. vs. the U.S. et al. Civ. No. 84-0425 (Dist. Ha.).

(m) Agreement on audits. This provision requires that the President shall negotiate an agreement with the RMI to provide for GAO audits of U.S. assistance to the RMI, and that the RMI shall cooperate in those audits. As with the FSM, this agreement will provide the new government with the expertise of the GAO to improve its operations.

Section 104. Interpretation of and United States policy regarding the compact.

(a) Human rights. This provision recognizes the FAS' official statements respecting human rights and freedoms and requires the Secretary of State to include the FSM and RMI in its annual report on human rights.

(b) Immigration. This provision clarifies that the right of an FSM or RMI citizen to enter the U.S. will not extend to persons who obtained such citizenship solely for the purpose offentering the U.S.

(c) Nonalienation of lands. This provision endorses the policies of the FSM and the RMI to prevent the alienation of land.

(d) Nuclear waste disposal. This provision states the Congressional understanding that the FSM and RMI will not permit other nations to store nuclear wastes as prohibited for the U.S. by Section 314 of the Compact.

(e) Impact of compact on U.S. areas. This provision requires the President to report to Congress on the impact of the Compact on other U.S. areas and recommend mitigation measures. It also declares Congressional intent to sympathetically and expeditiously redress adverse impacts. The provision also authorizes such sums as may be necessary to cover increased demands on services in the U.S. territories and Hawaii by immigrants from the FSM and RMI.

(f) Fisheries management. This provision clarifies that Section 121(b)(1) of the Compact is consistent with the MFCMA and the Fisherman's Protective Act and forbids that Compact funds may be used for enforcement actions against U.S. fishing (tuna) vessels in the absence of a licensing agreement. This provision also reaffirms U.S. policy to negotiate and conclude Pacific regional tuna licensing agreements. This is a restatement of existing policy.

Section 104(g). Foreign loans.

This provision specifically reaffirms the position of U.S. Government that it is not responsible for foreign loans or debt obtained by the FSM or RMI. It is a restatment of existing policy.

Section 105. Supplemental provision.

(a) Domestic program requirements. This provision specifically reaffirms the policy that U.S. programs and services extended to the Freely Associated States shall remain subject to the rules and regulations applicable to such programs in the U.S. It is a restatement of existing policy.

(b) Relations with the Federated States of Micronesia and the Marshall Islands. This provision amplifies that provisions of the Compact regarding U.S. representatives to the FSM or RMI by requiring the advice and consent of the Senate on the appointment of U.S. Representatives. It also concurs with the Senate position that the Secretary of State shall have responsibility over government to government relations while the Secretary of the Interior shall have responsibility over U.S. appropriations, program and services provided to the FSM or RMI.

The provision is specific in that all funds must be appropriated only to the Secretary of the Interior and may not be allocated to other agencies. To the extent the Administration believes that certain activities could best be conducted by other agencies, such as health care, it must so state explicitly in its annual budget submission and provide necessary legislative language. Only to the extent that Appropriations Acts specifically provide for such transfers will they be permitted. The language also permits the establishment of an interagency group to provide policy guidance. This language was suggested by OMB and neither the House nor the Senate could find a problem since we believed the President already had such authority and had already established Cabinet Councils and various other interagency task forces and advisory groups. Since there is presently an interagency group and a senior interagency group for status negotiations, the establishment of a single group may result in some economy in government. It should be made clear, however, that policy guidance is not a synonym for management nor would such a group have any ability to affect the responsibility or authority of the Secretary of the Interior.

(c) Continuing Trust Territory authorization. This section concurs with the Senate amendment extending the current open-end authorization of the Trust Territory.

(d) Medical referral debts. This provision specifically authorizes appropriations for medical referrals from the FSM or RMI. This provision is consistent with the broader Senate language.

(e) Survivability. This provision states that the provisions of this title shall continue to apply to any provision of the Compact so long as that specific provision remains effective, and even though the Compact itself may have ended.

(f) Registration for agents of Micronesian Governments. This provision provides for the registration of certain persons who act as agents of a FAS with an exception for individuals who are employed by such governments.

(g) Noncompliance sanctions. This provision states that the President of the U.S. shall not withhold payments with respect to the Compact unless as a sanction for noncompliance with an exception for certain provisions. Further this provision states that the Congress expects the FSM or RMI will abide by their agreements. This provision merely restates existing remedies available to contracting parties.

(h) Continuing programs and laws. This provision concurs with the Senate amendment extending certain programs (legal services, Public Health Service, FHA, FHmLA) and adds three more post-secondary education grant and loan assistance programs. This provision further provides for the termination of tort claims as the Trusteeship Agreement ceases.

(i) College of Micronesia. This provision specifically authorizes appropriations for education programs already covered by the open-end authorization, and reiterates eligibility for certain educational benefits and programs as anticipated under Section 224 of the Compact.

(j) Trust Territory debts to U.S. Federal agencies. This provision specifically authorizes appropriations to pay instrumentalities of the U.S. any amounts owed to them by the FSM or RMI. This is covered by existing open-end authorization.

(k) Use of DOD medical facilities. This provision authorizes continuation of medical referrals to DOD facilities and continuation of the National Health Service Corps as anticipated under Section 224 of the Compact.

(1) Technical assistance. This provision further details which U.S. technical assistance services may be provided under Section 226 of the Compact and enables agencies to provide such assistance if it could be provided domestically.

(m) Prior service benefits. This provision notes that persons who received Prior Service Benefits before July 1, 1968 shall continue to receive such payments. The original Senate language provided authorization to appropriate funds so that the program would have the resources to meet these obligations. That authorization is contained elsewhere in these amendments.

(n) Indefinite land use payments. This provision specifically authorizes appropriations for repayment of debts of the U.S. for use of land in the FSM or RMI. This is cov-

ered by the existing open-ended authorization.

(o) Communicable Disease Control Program. This provision specifically authorizes appropriations for disease control programs. This is covered by the existing open ended authorization.

(p) Trust funds. This provision further specifies the terms of Section 235 of the Compact regarding post Compact administration by requiring that the Secretary of the Interior discharge Section 235 responsibilities in consultation with the Government of the Marshall Islands.

(q) Annual reports. This provision further specifies the contents of the President's annual report to Congress to include determinations under Section 313 of the Compact regarding consultations between the U.S. government and the FSM and RMI.

(r) User fees. This provision clarifies that user fees shall apply in the FSM or RMI in the U.S.

Section 106. Construction contract assistance.

(a) Assistance to U.S. firms. This provision authorizes appropriations to assist U.S. firms (up to 20 percent of contract cost) which obtain contracts for construction or major repair of capital infrastructure within the FSM or RMI in providing technical assistance and training of local labor.

(b) Authorization appropriations to the FSM or RMI for the increased cost of awarding contracts to U.S. firms if they were to enact a U.S. preference law.

Section 107. Limitations.

(a) Prohibition. This provision specifically prohibits personnel of the Office for Micronesia Status Negotiations from working for the FSM or RMI for three years after U.S. employment has ceased. It is an amplification and specific extension of existing conflict-of-interest laws (Title 18. U.S.C. Chap. 11).

(b) Termination. This provision terminates the Office for Micronesian Status Negotiations and forbids support for such Office. This provision was not in the Senate passed resolution.

Section 108. Transitional immigration rule.

This provision provides that citizens of the Northern Marianas shall be treated as citizens of the U.S. for purposes of entry into the U.S.

Section 109. Timing.

This provision clarifies that no Compact payments may be made before October 1, 1985. This is no longer applicable.

Section 110. Implementation of audit agreements.

This section expands the provisions of sections 102(c)(4) and 103(m)(4) by detailing the President's responsibilities regarding financial audits of the FSM or RMI.

Section 111. Compensatory adjustments.

This section extends additional benefits to the FSM or RMI to compensate for the loss of certain tax and trade advantages as a result of amendments by the Senate Finance and House Ways and Means Committees. These benefits include the extension of certain educational and economic development services and programs as anticipated under Sections 221 and 224 of the Compact. In addition, authorization for full faith and credit appropriations are made to establish two Investment Development Loan Funds of $20 million for the FSM and $10 million for the RMI.

This section is explicitly designed to replace the tax and trade provisions which the Administration sought to have deleted. The funds should be so structured so that they will encourage U.S. private sector to enter into the FAS and assist in the economic development of the area. To that extent, they are to be limited to U.S. firms since the tax provisions would have been available only to U.S. firms.

TITLE II—COMPACT OF FREE ASSOCIATION

Section 201. This section contains the text of the Compact as submitted to Congress by the Administration and passed by the House and Senate. No changes have been made to the Compact language itself.

Section 202. Jurisdiction.

This section amplifies Section 321 of the Compact regarding U.S. military areas by reaffirming U.S. jurisdiction in these areas and providing for jurisdiction of the laws of the State of Hawaii in these areas. The section further provides that the U.S. District Court for Hawaii shall have jurisdiction for offenses and the authority to appoint Magistrates in these areas.

TITLE III—PACIFIC POLICY REPORTS

This title provides for a one year, then every 5 years, report to Congress on policies regarding the noncontiguous Pacific areas and specifies the content and procedures for development of these reports.

TITLE IV—CLARIFICATIONS OF CERTAIN TRADE AND TAX PROVISIONS OF THE COMPACT

Section 401. Tariff treatment.

As agreed to by the Senate Finance and House Ways and Means Committees, this section limits the trade benefits under Sections 242 and 243 of the Compact by excluding certain products from duty free import to the U.S. (watches, buttons, textiles, footware and to a degree, tuna).

Sections 402 and 403. These sections reconstruct the tax provisions of Sections 253 and 254 of the Compact so as to close certain potential tax loopholes of concern to the tax writing Committees.

Section 404. This section limits the tax benefits of Section 255 of the Compact regarding the extension of Section 936 of the IRC. The title reconstructs Section 255 to provide that Section 936 tax incentives to the FSM or RMI may be changed as a result of changes to the IRC and, in that case, the Secretary of Treasury shall negotiate with the FSM or RMI for equivalent benefits.

Section 405-408. Technical sections on tax provision regarding: definitions, effective dates, studies and consistency.

TITLE V—COMPACT OF FREE ASSOCIATION WITH PALAU

This title expresses Congressional approval, in principle, of a Compact with Palau as printed in the Congressional Record November 14, 1985, and provides that such Compact shall become effective upon transmittal by the President, certification by the President that the U.S. will be able to fully implement Title III of the Compact and enactment by Congress of a resolution of approval. This title also provides that certain Sections of this resolution shall apply to such Compact with Palau.

Mr. JOHNSTON. Mr. President, I join with the remarks of the distinguished chairman of the Committee on Energy and Natural Resources. I also support the compromise worked out with the House to avoid a conference on this vital measure. I fully concur with the assessment of Senator McCLURE that when taken as a whole this is a better agreement than that originally submitted by the administration. I also share his frustration with the efforts of the Department of the Treasury and the Office of Management and Budget to undercut the President. I hope that the territories were watching the performance of the Treasury and will keep it in mind before signing on with some strange proposal for "autonomy." I think that they, as well as the rest of us, will regret trusting our security and responsibility for the territories to the administrative convenience of Treasury.

I do want to emphasize certain aspects of the agreement with the House. Our agreement preserves the Senate position that no change or alteration may be made in the Mutual Security Agreements without an act of Congress. This is a condition of congressional approval and an explicit limitation to which the President must agree if he signs this resolution. I also want to repeat the comment in the sectional analysis that the authorization to establish an interagency group does not in any fashion limit or otherwise affect the authority or the responsibility of the Secretary of the Interior as set forth in the amendments. I am certain that OMB has other ideas in mind, but I want to serve notice that they will not work. I think that State can also forget about any significant new hires or elaborate residences. That is not in their future either.

I want to comment on one amendment which I think is just a bad idea, and that is the limitations placed on the future employment of the employees of the Office for Micronesian Status Negotiations which go far beyond existing law. Fred Zeder is not the easiest person to deal with, but I understand that he represents the administration and I really do not mind a difficult negotiator. The answer to difficult negotiators who fail to see right and reason are the other amendments which we have added to this resolution, not this type of personal assault. While I think it is just terrible to penalize clerical help in that office just because Fred does his job with his own unique style, I am willing to agree to this provision as part of this package. I do want to express my distaste for it. I know that the chairman shares my unhappiness.

I also want to join in Senator McCLURE's comments with respect to all the people who labored to produce this agreement. I really think that everyone should read the testimony presented by the Micronesians at our hearings. The testimony was moving and eloquent. I wish both the Federated States of Micronesia and the Republic of the Marshall Islands well. We have worked together during the trusteeship to build the basis for their nations, and I look forward to continuing to work with them to help build

their nations so that they can achieve their aspirations. They can count on my continued support and friendship. I last visited there when they were a trusteeship, I look forward to visiting them as sovereign self-governing nations. I hope the bonds of friendship and mutual respect between our peoples will continue and deepen in the future.

Mr. DOLE. Mr. President, I move that the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Kanasa.

The motion was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MOTOR VEHICLE INFORMATION AND COST SAVINGS ACT AMENDMENTS

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of Calendar No. 121, S. 475, the odometer bill.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 475) to amend the Motor Vehicle Information and Cost Savings Act to require certain information to be filed in registering the title of motor vehicles, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 1418

(Purpose: Make various amendments to the bill)

Mr. DOLE. Mr. President, I send an amendment to the desk on behalf of Senator DANFORTH and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE] for Mr. DANFORTH proposes an amendment numbered 1418.

Mr. DOLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, line 9, strike all from "by—" through "(ii)" on line 12 and insert in lieu thereof "by".

On page 3, line 8, strike "clause (ii) of".

On page 3, amend lines 12 through 20 to read as follows:

"(3) No registration card may be issued in any State for any motor vehicle used in interstate commerce unless the application for such registration card contains (determined as of the date on which such application is submitted) the information specified in paragraphs (1) and (2) of subsection (a). Each State shall maintain such information, together with the vehicle identification number to which such information pertains, for a period of 5 years after the information is received by the State.

On page 4, insert the following immediately after line 3:

"(5) The Secretary shall prescribe such rules as may be necessary to avoid the printing of mileage information pursuant to paragraph (1)(B)(ii) which may be false, misleading, or inaccurate. In order to prevent falsification or alteration of the mileage information required to be disclosed by a prior owner in accordance with paragraph (2), the Secretary shall prescribe such rules as may be necessary regarding the specific form to be used on certificates of title for compliance with the provisions of paragraph (a)(B)(iii). In addition, the Secretary shall prescribe rules regarding the actions to be taken by States with respect to the unauthorized alteration of motor vehicle certifications of title and other documents on which odometer information is required to be recorded or maintained.

On page 4, line 15, strike the quotation marks and the second period.

On page 4, insert the following immediately after line 15:

"(f)(1) Upon the termination or expiration of any lease for a motor vehicle, the lessee shall provide written disclosure to the lessor of the mileage of the vehicle at the time of such termination or expiration. Upon the request of such lessor, the lessee shall also provide to the lessor such mileage information as may be necessary for the lessor to comply with the requirements of subsection (d)(3).

"(2) The lessor of a motor vehicle shall provide written notice to the lessee of—

"(A) the mileage disclosure requirement set forth in paragraph (1); and

"(B) the penalties for failure to comply with such requirement.

"(3) Each lessor of a motor vehicle shall retain the written disclosure made by the lessee under paragraph (1) for four years after the date on which such lessor transfers ownership of the vehicle to any other person.

"(4) A lessor of a motor vehicle may use the vehicle mileage information provided by lessees under paragraph (1) for purposes of compliance with the requirements of subsection (a) unless such lessor has reason to believe that such information does not reflect the actual mileage of the vehicle. Failure of any lessee to comply with paragraph (1) shall not affect the ability of the lessor to transfer ownership of the vehicle to any other person.".

On page 5, line 6, strike "408(d)(4)" and insert in lieu thereof "408(d)(3) and (4)".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1418) was agreed to.

Mr. DANFORTH. Mr. President, S. 475 addresses a serious type of crime. Odometer tampering is a significant problem in this country; the U.S. Department of Transportation's National Highway Traffic Safety Administration estimates that the annual cost of odometer fraud to consumers exceeds $2 billion.

S. 475 takes steps to address this problem by closing the current loopholes in State motor vehicle titling laws. This legislation would create a record which would enable consumers to be better informed about the true mileage on used motor vehicles. Recognizing the varied titling and registration procedures among the States, however, S. 475 also would allow a State to submit to the Secretary of Transportation an alternative method for compliance with this legislation's registration requirements if that alternative method is effective in deterring odometer fraud.

S. 475 provides another effective means of combating odometer tampering by increasing the civil penalty for this crime from $1,000 to $2,000 and by making this crime a felony, with violators subject to a maximum criminal penalty of $50,000 and/or 3 years' imprisonment.

I would like to offer a committee amendment, endorsed by all Commerce Committee members. This amendment clarifies several of the provisions of S. 475 as reported by the committee, enhancing the effectiveness of this legislation. This amendment is not, however, intended to create any burdensome requirements for State authorities responsible for administering this legislation.

Mr. President, I believe S. 475 will help to reduce greatly the crime of odometer fraud. I urge my colleagues to join me in supporting this legislation.

Mr. GORTON. I congratulate my distinguished colleague from Nebraska for sponsoring this important bill. During my tenure as Washington's attorney general, I became very well aware of the risks posed to consumers by odometer fraud. This bill will make it easier to detect and prosecute those who profit from this unscrupulous practice.

I do have one question that I would like to discuss briefly with the Senator from Nebraska. The bill gives State departments of licensing 18 months from the date of enactment to comply with its provisions. It is my understanding that the State of Washington is in the process of purchasing and installing a computer system that will allow it to keep an annual record of odometer readings, as required by the bill. The system is scheduled to be in place as of January 1988. If the 18 month compliance period expired before this date, the State would be forced to incur considerable expense unless it could get an extension. It is possible that other States would have similar problems. Is it the Senator's understanding that, if a State is in the process of installing an automated system for handling license renewals, it may apply to the Secretary of Transportation for an ex-

tension of time to come into compliance until that system is in place?

Mr. EXON. That is correct. I appreciate my colleague's efforts to clarify this point.

Mr. GORTON. I thank the Senator.

Mr. EXON. Mr. President, one of the largest consumer frauds being perpetrated on the American public today is automobile and truck odometer rollback. This consumer fraud is not only one of the largest in terms of the number of consumers being defrauded, but it is also one of the most costly consumer frauds. It has been conservatively estimated that over 3 million used cars sold each year have had their odometers rolled back. It is also estimated that the average mileage reduction on a used car on which the odometer has been rolled back is 30,000 miles. This is equal to almost 3 years of driving by the average American.

The cost of this fraud to consumers is even more astounding. The National Highway Traffic Safety Administration estimates that the cost of odometer tampering to consumers is in excess of $2 billion annually. This amounts to an average cost of approximately $750 per car in cases where the odometer has been rolled back. However, because of the difficulty in tracing and identifying cars on which odometers have been rolled back, the number of cars involved and the total cost to consumers may be substantially greater than current estimates indicate. Even more alarming is the fact that the practice of odometer rollback is increasing each year. Not only is this particular consumer fraud extremely lucrative, but, in addition, it can be perpetrated with very little risk of ever being caught.

This is an extremely difficult problem to eliminate entirely, but certain steps can be taken and should be taken to help enforcement agencies, as well as the general public, in identifying those vehicles which have odometers that have been rolled back.

Mr. President, S. 475 is designed to prevent the rollback of odometers by strengthening the present law in three major ways. First, the bill would alter current annual registration and titling procedures so that a uniform "paper trail" of odometer readings can be created. Second, the bill attempts to deter odometer rollback by increasing both criminal and civil penalties for those who engage in odometer tampering. Third, this legislation grants new authority to the Secretary of Transportation to issue rules and regulations to address the problems of false and misleading odometer disclosures as well as to prescribe actions to be taken in the case of unauthorized alterations of documents containing odometer disclosures.

Mr. President, following the introduction of and the hearings on S. 475, a number of groups expressed an interest in the bill and offered suggestions to strengthen the bill and to reduce both the administrative and cost burdens associated with its implementation. State motor vehicle administrators expressed concern that the paperwork and administrative costs associated with printing the current odometer mileage on the face of the annual registration card would impose significant burdens on some State motor vehicle departments. They also expressed a concern that the provision requiring that the most recent registration card accompany the title in all vehicle sales could hamper the expeditious transfer of titles, since many owners misplace their registration cards.

We believe, Mr. President, that these expressions of concern have validity and consequently we have proposed to alter these requirements through committee amendments. First, the committee amendments being proposed today would eliminate both the requirement that the State print the current odometer reading of vehicles on the face of the registration card. Second, the requirement that the most recent registration card accompany the title in any vehicle transfer has also been eliminated. However, in order to establish a record of odometer readings for all vehicles, we have retained the requirement that an application for a registration card must include the true odometer reading of the vehicle at the time the application is submitted. The State must then retain this information together with the vehicle identification number for a period of 5 years. This information should prove extremely valuable to law enforcement agencies and to prosecutors in establishing that an odometer has been spun, and in identifying the owner of the vehicle at the time of the odometer rollback.

Mr. President, the automobile leasing companies expressed concern regarding their ability to provide accurate odometer mileage information as required by the bill. Although the leasing companies own the motor vehicle, the lessee has possession of the automobile. In order to help assure that the required odometer disclosures by leasing companies are accurate, the committee amendments would require the lessee to provide written disclosure to the lessor of the true odometer reading on the vehicle on an annual basis for registration purposes, as well as at the termination or expiration of their lease. The amendments would direct the leasing companies to notify the lessee of the reporting requirements and the penalties for failure to comply with the law. The leasing companies are required to retain the written disclosure made by the lessee for a period of 4 years. Leased automobiles are prime targets for those who engage in the clocking of odometers since they are normally high mileage, late model vehicles at the time of sale. The reporting requirements included in this legislation should aid in dramatically curtailing this practice.

Mr. President, these committee amendments also provide additional authorities to the Secretary of Transportation. As a result of information provided by the auto auction companies, it became apparent that the alteration of registration and title documents could be minimized if the Secretary were granted authority to prescribe rules regarding the specific form of odometer disclosure to be used on certificates of title. In addition, if the Secretary is granted authority to prescribe rules regarding this bill, we would not find ourselves here today passing this legislation which I believe would go a long way toward the elimination of odometer tampering in this Nation.

Mr. HOLLINGS. Mr. President, I commend Senator EXON for his efforts on behalf of consumers, paticularly used-car buyers, regarding his sponsorship of S. 475, the odometer tampering bill. This legislation is basically the same as that which was passed by the Senate in the 98th Congress, but was never taken up by the House. Hopefully, we'll get it signed into law this time around.

It has become apparent that odometer fraud is an extremely attractive method of making a fast and illegal buck. According to estimates by the National Highway Traffic Safety Administration [NHTSA], this practice is becoming increasingly widespread. NHTSA estimates that roughly 3 million used cars sold each year have had their odometers rolled back on an average of 30,000 miles per car, costing American consumers some $2 billion annually. Odometer tampering is clearly one of the largest consumer frauds being perpetrated on the American public today.

One of the reasons this practice is so lucrative is that it is so easy to do it without getting caught. This is especially true in the commercial market, which accounts for about 80 percent of used car sales. In a typical case of odometer fraud, a wholesaler will purchase one or more cars at an auction. The actual rollback of the odometer can be accomplished in a few seconds, and acquiring the supporting paperwork is often nearly as simple. In most cases, the odometer disclosure is made on a separate sheet of paper accompanying the title. The wholesaler can simply alter the odometer reading or provide a new disclosure.

In cases where the odometer reading is included on the title, the wholesaler can either alter the title or retitle the car in a State which doesn't require the reading to be included on the title.

To do this, a person need only send the information and the necessary registration and title fee to a business associate in another State, who would then have the car retitled. Since the new title would have no odometer reading, the wholesaler could then disclose whatever odometer reading he chooses.

The current situation, of course, presents law enforcement officials, reputable automobile dealers, and used car buyers with tremendous difficulties in identifying cars on which odometers have been rolled back. The outward appearance of the tampered vehicles often provides no clue as to its true mileage, because many of them are late model, high-mileage autos, such as those which have been leased. And once odometer tampering is discovered, the varieties and loopholes in State titling procedures virtually preclude any possibility of catching whoever is responsible and putting a stop to it.

Even if we were able to apprehend and convict a greater number of those engaging in odometer fraud, the existing penalties are hardly severe enough to discourage this practice. The current civil penalty is $1,000 per violation. Considering that an automobile is the second largest purchase that the average American makes in his or her lifetime, anyone convicted of defrauding an auto buyer should be subject to harsher penalties.

S. 475 is designed to reduce odometer fraud by providing for greater uniformity among States and tighter control of both the registration and titling of motor vehicles. In addition, the bill would increase the civil penalty for odometer tampering to $2,000 per violation. The bill also changes the criminal penalty for odometer tampering from 1 to 3 years' imprisonment, thereby making this crime a felony.

This legislation will protect both consumers and legitimate automobile dealers from a colossal ripoff that is increasing in size each year. I urge its swift Senate approval.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 475), as amended, was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 475

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 408 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1988) is amended by adding at the end thereof the following new subsections:

"(d)(1) No motor vehicle, the ownership of which is transferred by any person to another person in interstate commerce, may be registered or licensed for use in any State, or used in interstate commerce, unless—

"(A) the application to the State by the new owner of such motor vehicle for a certificate of title is accompanied by the prior owner's title (containing the information required under paragraph (2), where applicable);

"(B) the certificate of title (or other document indicating ownership) of such motor vehicle which is issued by the State to the new owner following such transfer—

"(i) is printed in bank note intaglio printing process;

"(ii) indicates on its face the mileage required to be disclosed by the transferor under subsection (a); and

"(iii) contains a space for the transferee to disclose (in the event of a future sale or other transfer of title by such transferee) the mileage at the time of such future transfer and to sign and date such disclosures.

"(2) In the case of an application for a new certificate of title for a motor vehicle, if the prior owner's certificate of title contains the space referred to in clause (iii) of paragraph (1)(B), when such certificate of title is submitted to the State under paragraph (1)(A), it shall contain a statement, signed and dated by such prior owner, of the mileage required to be disclosed by such prior owner under subsection (a).

"(3) No registration card may be issued in any State for any motor vehicle used in interstate commerce unless the application for such registration card contains (determined as of the date on which such application is submitted) the information specified in paragraphs (1) and (2) of subsection (a). Each State shall maintain such information, together with the vehicle identification number to which such information pertains, for a period of 5 years after the information is received by the State.

"(4) Any State may submit to the Secretary an alternative method for compliance with the requirements of this subsection by motor vehicles registered or licensed for use in the State. The Secretary may promulgate regulations establishing procedures for the consideration and approval of such alternative methods of compliance. No such alternative method may be approved unless the Secretary determines that such method is consistent with the purposes of this subsection.

"(5) The Secretary shall prescribe such rules as may be necessary to avoid the printing of mileage information pursuant to paragraph (1)(B)(ii) which may be false, misleading, or inaccurate. In order to prevent falsification or alteration of the mileage information required to be disclosed by a prior owner in accordance with paragraph (2), the Secretary shall prescribe such rules as may be necessary regardng the specific form to be used on certificates of title for compliance with the provisions of paragraph (1)(B)(iii). In addition, the Secretary shall prescribe rules regarding the actions to be taken by States with respect to the unauthorized alteration of motor vehicle certificates of title and other documents on which odometer information is required to be recorded or maintained.

"(e) If any motor vehicle is sold at an auction, the auction company which owns or operates the facilities at which such auction takes place shall maintain a record for a period of at least four years following the date of such sale that includes—

"(1) the name of the seller and the name of the buyer of the motor vehicle;

"(2) the vehicle identification number of the motor vehicle; and

"(3) the odometer reading on the date on which the auction company took possession of the motor vehicle.

"(f)(1) Upon the termination or expiration of any lease for a motor vehicle, the lessee shall provide written disclosure to the lessor of the mileage of the vehicle at the time of such termination or expiration. Upon the request of such lessor, the lessee shall also provide to the lessor such mileage information as may be necessary for the lessor to comply with the requirements of subsection (d)(3).

"(2) The lessor of a motor vehicle shall provide written notice to the lessee of—

"(A) the mileage disclosure requirement set forth in paragraph (1); and

"(B) the penalties for failure to comply with such requirement.

"(3) Each lessor of a motor vehicle shall retain the written disclosure made by the lessee under paragraph (1) for four years after the date on which such lesser transfers ownership of the vehicle to any other person.

"(4) A lessor of a motor vehicle may use the vehicle mileage information provided by lessees under paragraph (1) for purposes of compliance with the requirements of subsection (a) unless such lessor has reason to believe that such information does not reflect the actual mileage of the vehicle. Failure of any lessee to comply with paragraph (1) shall not affect the ability of the lessor to transfer ownership of the vehicle to any other person.".

SEC. 2. Section 402 of the Motor Vehicle Information and Cost Savings Act (15 U.S.C 1982) is amended by redesignating paragraphs (1) through (5) as (2) through (6), respectively, and by inserting before the newly designated paragraph (2) the following:

"(1) The term 'auction company' means any person who takes possession (whether through consignment, bailment, or through any other arrangement) of a motor vehicle owned by another person for purposes of selling such motor vehicle at an auction.".

SEC. 3. (a) Paragraphs (1) and (2) of section 408(d) of the Motor Vehicle Information and Cost Saving Act, as added by the first section, shall apply with respect to motor vehicles which are transferred after eighteen months after the date of enactment of this Act.

(b) Section 408(d) (3) and (4) of the Motor Vehicle Information and Cost Saving Act, as added by the first section, shall apply with respect to motor vehicles which are registered in any State after eighteen months after the date of the enactment of this Act.

(c) Section 408(e) of the Motor Vehicle Information and Cost Saving Act, as added by the first section, shall apply with respect to motor vehicles which are sold by an auction company after eighteen months after the date of the enactment of this Act.

(d) For purposes of this section, the terms "motor vehicle" and "auction company" shall have the same meanings as used in the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1901 et seq.).

SEC. 4 (a) Section 412(a) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1990b(a)) is amended by striking out "$1,000" and inserting in lieu thereof "$2,000".

(b) Section 413(a) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1990c(a)) is amended by striking out "one

year" and inserting in lieu thereof "three years".

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZING THE COMPILATION AND PRINTING OF BICENTENNIAL EDITION OF THE BIOGRAPHICAL DIRECTORY OF THE CONGRESS

Mr. DOLE. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on Senate Concurrent Resolution 85.

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the concurrent resolution (S. Con. Res. 85) to authorize the compilation and printing of the Bicentennial Edition of the Biographical Directory of the U.S. Congress, as follows:

Resolved, That the resolution from the Senate (S. Con. Res. 85) entitled "Concurrent resolution to authorize the compilation and printing of the Bicentennial Edition of the Biographical Directory of the United States Congress", do pass with the following amendments:

Strike out all after the resolving clause, and insert:

That (a) the Joint Committee on Printing shall publish and there shall be printed as a Senate document (with such illustrations and in such style and form as may be directed by the Joint Committee on Printing) a revised edition of the Biographical Directory of the American Congress for the period ending with the One Hundredth Congress (1774-1989). In celebration of the Bicentennial of the United States Congress, the revised edition shall be known as the "Biographical Directory of the United States Congress, 1774-1989: Bicentennial Edition".

(b) The Historian of the Senate and the Historian of the House of Representatives shall provide appropriate biographical data and other material for the revised edition, including data for—

(1) Senators and individuals who have served in both the Senate and the House of Representatives, to be provided by the Historian of the Senate; and

(2) Members of the House of Representatives (including Delegates and Resident Commissioners), to be provided by the Historian of the House of Representatives.

(c) In addition to the usual number, there shall be printed 7,985 copies of the revised edition, of which 2,045 copies shall be for the use of the Senate, 5,390 copies shall be for the use of the House of Representatives, and 550 copies shall be for the use of the Joint Committee on Printing.

Amend the title so as to read: "Concurrent resolution authorizing printing of the Biographical Directory of the United States Congress, 1774-1989: Bicentennial Edition.".

Mr. DOLE. Mr. President, I move that the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Kansas.

The motion was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PRINTING AUTHORIZATION—"1984: CIVIL LIBERTIES AND THE NATIONAL SECURITY STATE"

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on Rules and Administration be discharged from further consideration of House Concurrent Resolution 230 and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution will be stated by title.

The assistant legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 230) authorizing printing of additional copies of the transcript of hearings entitled "1984: Civil Liberties and the National Security State."

The PRESIDING OFFICER. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the concurrent resolution (H. Con. Res. 230) was considered and agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE CALENDAR

Mr. DOLE. Mr. President, I inquire of the distinguished minority leader if he is in a position to pass any of the following calendar items: Calendar Order No. 433, Calendar Order No. 467, Calendar Order No. 473, Calendar Order No. 474, and Calendar Order No. 479.

Mr. BYRD. Mr. President, there is no objection.

Mr. DOLE. Mr. President, I ask unanimous consent that the calendar items just identified be considered en bloc and passed en bloc and all committee amendments and preambles be considered agreed to en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRINTING OF COSTS ASSOCIATED WITH PROCESSING MASS-MAIL

The concurrent resolution (S. Con. Res. 91) to require publication in the CONGRESSIONAL RECORD of the costs incurred for processing mass-mail for individual Senators, Representatives, committees, and other offices, was considered, and agreed to; as follows:

S. CON. RES. 91

Resolved by the Senate (the House of Representatives concurring), That, two weeks after the close of each calendar quarter, or as soon as pacticable thereafter, the chairman of the Senate Committee on Rules and Administration shall cause to be published in the Congressional Record a tabulation of the costs of mass-mail processed for individual Senators, committees of Senate, and other offices of the Senate. Such tabulations shall set forth for each Senator, committee, or other office: (1) the name of the Senator, committee, or other office, (2) the total number of pieces mailed during the quarter, (3) the total postage and other costs associated with such mail for the quarter, and (4) with respect to Senators, the cost per capita, based on the total population of each Senator's State as set forth in the latest estimates of the Bureau of the Census. Information shall be arranged in three groups: Senators, committees, and other offices, and in alphabetical order by name of Senator, committee, or other office within such groupings.

SEC. 2. Two weeks after the close of each calendar quarter, or as soon as practicable thereafter, the chairman of the House Committee on House Administration shall cause to be published in the Congressional Record a tabulation of the costs of mass-mail processed for individual Representatives, committees of the House, and other offices of the House. Such tabulations shall set forth for each Representative, committee, or other office: (1) the name of the Representative, committee, or other office, (2) the total number of pieces mailed during the quarter, (3) the total postage and other costs associated with such mail for the quarter, and (4) with respect to Representatives, the cost per capita, based on the total population of each Representative's district as set forth in the latest estimates of the Bureau of the Census. Information shall be arranged in three groups: Representatives, committees, and other offices, and in alphabetical order by name of Representative, committee, or other office within such groupings.

SEC. 3. The mass-mail costs required to be published by sections 1 and 2 shall include the costs of postage, paper, and other operating costs incurred as a result of mass-mailings processed for such Senators, Representatives, committees, or other offices. Other operating costs, as used in the preceding sentence, shall include direct labor and managerial overhead, supplies and materials, and the prorated value of equipment. It shall not include the costs of space, power, heating, ventilation, and air conditioning with respect to mass-mailings processed by employees of the Senate or the House of Representatives in public buildings. Costs for space, power, heating, ventilation, and air conditioning included in costs for processing purchased from commercial sources may but need not be excluded. Costs associated with the writing and editing of the material printed in such mass-mailings shall not be included. The Senate Committee on Rules and Administration and the House Committee on House Administration shall prescribe regulations pertaining to the compilation of such costs by the appropriate organizations within their respective Houses.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

OPPOSING THE SOVIET UNION'S OCCUPATION OF AFGHANISTAN

The Senate proceeded to consider the joint resolution (S.J. Res. 240) opposing the Soviet Union's invasion and 6-year occupation of Afghanistan against the national will of the Afghan people, which had been reported from the Committee on Foreign Relations, with an amendment.

On page 2, strike line 7, through and including "(3)" on line 9.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

Mr. HUMPHREY. Mr. President, December 27 of this month marks the sixth anniversary of the brutal Soviet invasion of Afghanistan. This resolution strongly condemns the 6 years of aggression waged against the independent country and people of Afghanistan, and calls for a resolution to the conflict that provides self-determination for the Afghan people. The swift consideration that this resolution has received in both Houses of Congress clearly demonstrates the level of concern that the U.S. Government has for the situation in Afghanistan.

Now in its sixth year, the war has forced at least 4 million Afghans to flee for refuge in neighboring countries and throughout the world. The war has reduced vast areas of settled fields and pastures to absolute desolation. Farmers returning to their villages after having fled Afghanistan to escape the frequent carpet bombings, often can not even find a trace of their former homes and fields. Once eradicated diseases such as malaria and typhus have reappeared and are crippling the civilian population. Hepatitus has assumed epidemic proportions in Afghanistan.

The scale of the destruction wrought by the Soviet troops has recently been documented and confirmed by the United Nations. The Human Rights Committee of the General Assembly recently voted 75 to 23 to approve the report of the special rapporteur on the worsening human rights situation in Afghanistan. This report is the first United Nations document to ever openly condemn the Soviet Union for its human rights record.

This report stresses that current tactics being employed by Soviet and Karmal forces are "totally out of all proportion to any military requirement," and are designed not only to destroy opposition but to break the spirit of the people and destroy the traditional family structure. Soviet tactics have included the indiscriminate mass bombings and killings of civilians, mutilations and routine torture, the forced evacuation of rural areas, the imprisonment without trial of tens of thousands of political prisoners, and religious intolerance. Despite these ruthless Soviet tactics, the Afghan people continue to resist the imposition of an alien and atheistic ideology on their society.

The Soviet Union is finding it more and more difficult to hide its illegal occupation of Afghanistan behind the slogan of "fraternal socialism." The unrepresentative and ineffective character of the Karmal regime is obvious. The resistance is able to carry out its operations in all areas of the country while Soviet forces are unable to protect their own supply lines from ambush or sabotage. Meanwhile, the various Afghan commanders have been able to secure large areas of the country and have begun to rebuild the rudiments of government.

Mr. President, I am deeply saddened by the fact that the brutal Soviet invasion and occupation of Afghanistan has continued for 6 years, longer than the Soviet involvement in the Second World War. The Afghans are standing on the front line of the fight against totalitarianism. We must continue to support and honor their fight for it is the fight of all freedom loving people.

This resolution sends a strong message to the Soviet Union that the United States is firmly committed to seeing an immediate end to this brutal, genocidal attack on an innocent nation. The United States has not forgotten the Afghan people and we continue to support their heroic struggle for freedom.

The PRESIDING OFFICER. The joint resolution is before the Senate and open to further amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the joint resolution.

The joint resolution (S.J. Res. 240) was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution, as amended, and the preamble are as follows:

S.J. RES. 240

Whereas December 27, 1985, will mark six years years since the Soviet Union invaded the independent nation of Afghanistan;

Whereas, as a result of said invasion, over one-fourth of the prewar population has fled the country and now constitutes the largest refugee population in the world.

Whereas Soviet and Kabul regime forces have stepped up their military campaign against the civilian population, including attacks on Pakistan's territory;

Whereas Afghan freedom fighters have frustrated all Soviet attempts to suppress them and withstood unrelenting attacks by Soviet forces with unmatched courage and sacrifice and with high morale; and

Whereas the Soviet invasion and repression of the Afghan nation and people has been repreatedly condemned by the Nonaligned Movement, the United Nations, the European Parliament, the Islamic Conference Organization, and the Association of Southeast Asian Nations: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Senate of the United States of America—

(1) condemns the six years of aggression waged against the independent country and people of Afghanistan;

(2) urges expeditious conclusion of a negotiated political settlement based on—

(A) the complete withdrawal of all foreign troop;

(B) restoration of the independent and nonaligned status of Afghanistan;

(C) self-determination for the Afghan people; and

(D) the return of the Afghan refugees with safety and honor.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TRUCK AND BUS SAFETY WEEK

The joint resolution (S.J. Res. 235) to designate the week of January 26, 1986, to February 1, 1986, as "Truck and Bus Safety Week," was considered, ordered to be engrossed for a third reading, read the third time and passed.

The preamble was agreed to.

The joint resolution, and the preamble, are as follows:

S.J. RES. 235

Whereas trucks and buses provide essential transportation services to all Americans;

Whereas five million trucks travel more than one hundred and thirty-eight billion miles each year, bringing raw materials, finished goods, food, and other essential products to market;

Whereas the trucking industry alone employes more than seven million four hundred thousand Americans and generates annual revenues in excess of $200,000,000,000;

Whereas the bus industry employs approximately fifty thousand people and provides service to over ten thousand cities and communities;

Whereas the safe maintenance and operation of trucks and buses is vital to the health and safety of motorists, pedestrians, and other users of the Nation's highways, roads, and streets;

Whereas the safe maintenance and operation of trucks and buses is also vital to the companies and individuals directly involved in the provision of such transporation services;

Whereas the safe maintenance and operation of trucks carrying hazardous materials is essential not only to the safety of the immediate highway environment, but often to the surrounding environment as well;

Whereas State governments are increasing their efforts to improve safety compliance both on their own and with funding assistance provided by the Federal Government;

Whereas there is a continuing need for congressional inducement to improve highway safety; and

Whereas improvement in the safe operation of trucks and buses result from activities undertaken by management and labor, including activities to ensure driver professionalism: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to designate the week of January 26, 1986, to February 1, 1986, as "Truck and Bus Safety Week" and to call upon Federal, State, and local government agencies and the people of the United States to observe such week with appropriate programs, ceremonies, and activities.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL ORGAN AND TISSUE DONOR AWARENESS WEEK

The joint resolution (H.J. Res. 450) to authorize and request the President to issue a proclamation designating April 20 through April 26, 1986, as "National Organ and Tissue Donor Awareness Week," was considered.

Mr. GORTON. Mr. President, it is my great pleasure to speak in support of House Joint Resolution 450, and I urge my colleagues to join me in giving the Senate's final approval to this measure. House Joint Resolution 450 authorizes and requests the President to proclaim April 20 through 26, 1986, as "National Organ and Tissue Donor Awareness Week." It is the companion bill to Senate Joint Resolution 236 which I introduced earlier this year.

Modern medical technology has provided our health professions with the ability to take miraculous steps in improving the lives of debilitated Americans. A little more than 3 weeks ago, a 46-year-old Seattle man was suffering in intensive care at the University of Washington Hospital. This patient had endured two heart attacks within the last few years, and his doctors gave him very little time to live. On November 18, however, surgeons at the University of Washington in Seattle performed the first heart transplant in the Pacific Northwest on this patient. Thanks to the skill of his doctors, this 46-year-old man now has a greater than 65 percent chance of surviving for 5 years or more. His doctors even suggest that he may be able to return to work within 3 months.

Although this first recipient of a heart transplant in the Pacific Northwest will enjoy many productive years with loved ones and work associates, several other citizens presently are waiting in University Hospital's pool of potential heart recipients. Their average survival time if a heart cannot be found is 55 days. New antirejection drugs and doctors with improved surgical techniques are ready to extend these patients' lives—the missing ingredient to complete this miracle is a gift of life from an organ donor. Without donors, these patients and their families will continue to suffer pain, trauma, and frustration while waiting for the uncertain receipt of suitable organs.

The frustration of those on the waiting list at University Hospital is shared by the thousands who could have their quality of life improved by transplants of other tissues and organs. A corneal transplant can provide sight to the blind. A skin transplant can speed the recovery of burn victims and reduce their suffering significantly. Kidney transplants can break the chains that tie thousands of Americans to dialysis machines. Organ and tissue transplant technology can help those with bone cancer, liver disease, and pancreatic disorders. Yet without donors, none of these medical wonders can occur.

The American Council on Transplantation [ACT] reports that although over 90 percent of all Americans are aware of the need for organ and tissue donation, less than 15 percent of potential donors actually become donors. National groups such as ACT, as well as State and local organizations, currently are planning events for National Organ and Tissue Donor Awareness Week that will show these potential donors how easy it is to complete a donor card. My hope is that passage of this resolution will aid these organizations in their efforts to help the thousands who still wait for the miracle that can give them the gift of life or significantly improve the quality of their lives.

The PRESIDING OFFICER. The joint resolution is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the joint resolution.

The joint resolution (H.J. Res. 450) was ordered to a third reading, was read the third time, and passed.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

JOHN W. BYRNES POST OFFICE AND FEDERAL BUILDING

The bill (H.R. 2694) designating the U.S. Post Office Building located at 300 Packerland Drive, Green Bay, WI, as the "John W. Byrnes Post Office and Federal Building," was considered, ordered to a third reading, read the third time, and passed.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NOMINATIONS

Mr. DOLE. Mr. President, there are a number of nominations on the Executive Calendar. I understand that there are problems, on each side. In one case a Senator is demanding a vote on a certain nominee before they release the others. On this side, it is a question of getting some answers from the Attorney General before they will release any of the other 22 nominees. I do not suggest that is reasonable, but I suggest that it is happening.

There are also other nominations not even related to the Judiciary, one of those being the nomination of Margaret Heckler to be Ambassador to Ireland. I, frankly, see no reason why we should not dispose of that nomination. I hope there would be no objection.

I am willing to go along with the others, although I must say I have had more calls than I wished to take today on various nominees. But since the concerns are being expressed on both sides of the aisle, I advise Members that we probably will not be able to dispose of any of those until Monday.

Is there any objection to considering the nomination of Mrs. Heckler?

Mr. BYRD. Mr. President, I personally have no objection, may I say to the majority leader. There is an objection to taking up that nomination until there is agreement to a call up of Mr. Sporkin, also, which I believe is the first one under new reports on the list for the judiciary.

Mr. DOLE. That is the problem; they are judicial nominations and this is not.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR MONDAY, DECEMBER 16, 1985

RECESS UNTIL 12 NOON, MONDAY, DECEMBER 16, 1985

Mr. DOLE. Mr. President, I ask unanimous consent that once the Senate completes its business today, it

stand in recess until the hour of 12 noon on Monday, December 16, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR PROXMIRE

Mr. DOLE. Mr. President, I further ask unanimous consent that following the recognition of the two leaders under the standing order there be a special order in favor of the Senator from Wisconsin, Mr. PROXMIRE, for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. DOLE. Following the special order for Senator PROXMIRE, Mr. President, I ask unanimous consent that there be a period for the transaction of routine morning business for not to extend beyond the hour of 1 p.m. with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. DOLE. Mr. President, following routine morning business, the Senate can be expected to turn to any legislative or executive items that have been cleared—hopefully, all nominations. And I indicate that if we cannot clear nominations on Monday, we will just call up the nominations. There will be no protection on Monday, I would say, after 2 o'clock, on votes.

I just talked to Mrs. Heckler. She regrets that her nomination cannot be considered. I also regret that it cannot be considered. It has no relationship to anything that happened in the Judiciary Committee. But she is being held hostage along with a number of other people.

Mr. BYRD. Mr. President, as I have indicated earlier, I have no personal objection to taking up the nomination of Mrs. Heckler, but there are other Senators here who have rights, and, as I indicated to the distinguished majority leader, there is an objection on this side at least for today, the problem being that the nomination of Mr. Stanley Sporkin of Maryland to be U.S. District Judge for the District of Columbia is not being cleared on the other side.

I just say that for the RECORD.

Mr. DOLE. Mr. President, there is not any problem with Mr. Sporkin on this side. I understood in talking with Senator METZENBAUM that once the committee took action on the Sporkin nomination there would be no attempt to hold other nominations.

That has been changed saying, well, now they have it out of committee they will not vote. I am for Mr. Sporkin. I would be happy to do it at this very moment. There is a problem on the other side, as I expressed earlier.

I am prepared on this side, notwithstanding the objection, to take action on the Heckler nomination. I believe she is not any part of the problem, or in any way involved in any of the problems that have been occurring in relationship to the judicial nomination.

The holds are on the judicial nominations, one on this side, Buckley, and one on that side, Sporkin. Even if they wanted to hold judicial nominees, that would be of some relevance. But to hold all nominees, regardless of what they may have been nominated for, seems to me to be stretching the point. I guess that is a right Members have. It is not responsible, but it is a right, I guess.

Mr. BYRD. Mr. President, if the Senator will yield, I am sure that there is no problem with Ms. Heckler on this side. I can understand the distinguished majority leader's frustration that a Senator is objecting to Ms. Heckler. I experienced the same frustrations when I was the majority leader.

Of course, the Senator knows that any Senator can object. Of course, there cannot be unanimous consent, even though 99 Senators may be in favor of moving forward, if one Senator objects. The distinguished majority leader can move the nomination. He certainly has that right and he can do that.

It is not the first time, Mr. President, that the calendar has been held up because of one objection. I hope the matter will be resolved. I have no part in the quarrel, as far as I am concerned, but I do have to protect Senators on this side who may wish to object for the time being.

I know the distinguished majority leader has the same responsibility.

I thank the Senator.

RECESS UNTIL MONDAY, DECEMBER 16, 1985

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move that the Senate stand in recess until the hour of 12 noon, Monday, December 16, 1985.

The motion was agreed to, and the Senate, at 4:31 p.m., recessed until Monday, December 16, 1985, at 12 noon.

NOMINATIONS

Executive nominations received by the Senate December 13, 1985:

Department of State

James L. Malone, of Virginia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Belize.

EXECUTIVE OFFICE OF THE PRESIDENT

Michael A. Samuels, of the District of Columbia, to be a Deputy U.S. Trade Representative, with the rank of Ambassador vice Peter Otto Murphy.

INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT

Hugh W. Foster, of California, to be U.S. Alternate Executive Director of the International Bank for Reconstruction and Development for a term of 2 years. (Reappointment.)

NATIONAL COUNCIL ON EDUCATIONAL RESEASRCH

Donald Barr, of Connecticut, to be a member of the National Council on Educational Research for a term expiring September 30, 1988. (Reappointment.)

Robert H. Mattson, of Oregon, to be a member of the National Council on Educational Research for a term expiring September 30, 1988, vice Paul Copperman, term expired.

SENATE—*Monday December 16, 1985*

(Legislative day of Monday, December 9, 1985)

The Senate met at 12 noon, on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Death and life are in the power of the tongue * * *.—Proverbs 18:21.

Pleasant words are as a honeycomb, sweet to the soul and health to the bones.—Proverbs 16:24.

Father in Heaven, at this critical hour in the Senate, may the wisdom of Proverbs penetrate mind and heart. We have been this way before and the signs are very familiar: urgency, tension, stress, disappointment, impatience, frustration, anger—raw nerves, strong emotions, weary minds and bodies. Harsh, harmful words come easy under these conditions. Despite the pressure of these hours, loving Lord, grant that the Spirit who promises peace will control our tongues, that our speech "be always with grace, seasoned with salt, that we may know how we ought to answer everyone." (Colossians 4:6.)

In the name of Him who loved and healed with His words. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, the leaders have 10 minutes each, followed by a special order for the distinguished Senator from Wisconsin [Mr. PROXMIRE] for not to exceed 15 minutes, and routine morning business not to extend beyond 1 p.m., with Senators permitted to speak therein for not more than 5 minutes each.

Following routine morning business, the Senate can be expected to turn to any legislative or executive items that can be cleared for action. It is my hope that we can remove any problems which may remain concerning the Executive Calendar nominations today, and I would hope we might be able to do that by 2 p.m. As far as legislative matters, I am advised that the continuing resolution conference report will not be ready today. I am advised that the reconciliation conference report will not be ready today, and I know, having been a conferee on the farm bill, that that conference report will not be ready until late tomorrow evening. We are trying to get some agreement on farm credit, which is in the process. It may be, if we cannot reach an agreement, we will just have to go to conference on the differing House and Senate bills.

Beyond that, unless there is some agreement on that legislation, it would not be my intention to call it up. There is an Angola resolution, and I hope we can have bipartisan support for it. We have a number of cosponsors I understand on both sides of the aisle. I know the Senator from New Hampshire [Mr. HUMPHREY] has a resolution with reference to the Medvid case he desperately would like to have acted upon before Congress adjourns. On the cop-killer bullet legislation, we thought we had an agreement, but apparently the distinguished Senator from Idaho [Mr. SYMMS] has some amendments that he insists on offering. We probably will not be able to bring that bill up, but we are still working on it. Beyond that, I do not at this time think the Senate will be in session late. If we can clear up some of the executive nominations, we probably will not be in long.

There is the possibility of counterterrorism legislation. That would not occur until around 3 o'clock today.

I would assume it is safe to say this is the last week of the session. I cannot believe we would be in next week.

Mr. BYRD. Mr. President, will the distinguished majority leader yield?

Mr. DOLE. I yield.

Mr. BYRD. Does he anticipate rollcalls today?

Mr. DOLE. I hope not. I hope we could clear up the Executive Calendar, as much as we can. I have been working with Senator WEICKER from Connecticut. We are now I think about ready to have his objection satisfied. I do not think there are any real objections on that side.

It is a question of one nominee, and I think we can dispose of that nominee without any question.

I would rather not have any rollcalls if we can avoid it because I know some Members are unavoidably absent. Some have come back thinking there would be rollcalls, but if there is a way to avoid rollcalls, I would certainly like to do that. I understand a number of Senators may want to participate in the memorial service in Dover, DE, this afternoon.

Mr. BYRD. I thank the distinguished majority leader.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. HECHT). The minority leader is recognized.

SENATE AGENDA

CONTINUING RESOLUTION CONFERENCE

Mr. BYRD. Mr. President, the conference on the continuing resolution seems to be going along very well. There are a small number of issues outstanding, one of which involves the Interior appropriations bill. I have been in on that conference. One of the major thorns of disagreement was the clean coal technology moneys. I think that we have reached agreement on that item just a few minutes ago. There are a few other items have been cleared.

If I understand the distinguished majority leader, he is saying that conference reports in the main are what may be utilizing the attention of the Senate plus the Executive Calendar?

Mr. DOLE. Yes.

Mr. BYRD. On the calendar, is he thinking only with respect to nominees and not with respect to treaties?

Mr. DOLE. There are, I understand, maybe four treaties that can be cleared for action. We may be able to act on two of those treaties, and I guess we could have a division on those. It might not require a rollcall vote. But if there were to be a rollcall, I would hope we would postpone that until tomorrow after the policy luncheons.

Mr. BYRD. So I take it that the distinguished majority leader is talking about the conference reports on the continuing resolution, the reconciliation measure, the farm legislation, farm credit, and the Executive Calendar.

Mr. DOLE. That is essentially it.

The distinguished minority leader knows, having experienced it, that there are always a lot of Members trying to do things at the last moment. I do not fault them for it. If we can do it, I want to accommodate all Members. But I do not want to become involved in some lengthy debate with a number of rollcall votes on a bill that

may not be going anywhere, in any event, until next year.

So I hope we will be able to finish our business early on Wednesday, by noon or midafternoon.

Mr. BYRD. I thank the distinguished majority leader.

THE FARM BILL

Mr. DOLE. Mr. President, one of the conference reports is the farm bill. I know that—unless someone really covered the conference, and some reporters did—it is not a matter of national interest, in the sense that people follow it on television or radio or the daily papers, unless they live in the Farm Belt.

I just want to say that I believe that the conferees did good work on both sides—the House and the Senate, Republicans and Democrats. Having been a conferee in a number of farm conferences, I think the test really is how many people signed the conference report, and in this case it was unanimous. there was not a single member on either side—the House or the Senate, Democrat or Republican—who did not sign the conference report and who did not vote for the conference report.

That does not mean that all believe it is a perfect piece of legislation. There are things in the bill that I would like to have seen changed, and I am certain that could be said for other members on both sides of the aisle, in both bodies. But overall, in my view, it ended as it should have—a bipartisan farm bill, which has been the norm around this place as long as I have been here, and I hope that will continue through the consideration of the conference report. I see no reason why it should not.

Another encouraging sign is the fact that we were able to reduce the cost of this program in the neighborhood of $51 billion. Some will say $52 billion, some may say less, some may say whatever; but I am going to continue to say in the neighborhood of $51 billion.

It seems to me that we are fairly much on target with the figure announced by the White House that the President would agree to. He would sign the bill if we could come in that range, and we are in that range.

There has been no public statement from the White House. I have been in touch with the Secretary of Agriculture yesterday: with Don Regan, the Chief of Staff, late Saturday evening; with the White House congressional liaison today; with the Office of Management and Budget on Saturday. It is my hope that they are carefully reviewing not only the cost but also the policy changes, because there are a number of good policy changes in the farm bill that make it very worthwhile. So I am optimistic that the bill can and should be signed by the President.

I also suggest that another thing we need to complete would be the farm credit legislation; and in my view, that is fairly near completion. We need to get an agreement to bring it up, to bring the House language up, to put on a Senate amendment, and send it back to the House. From the farm front, I think many of us on both sides of the aisle are encouraged. We know there is still a serious problem that is going to take some time, but we believe that, with the passage of the farm bill and the farm credit bill, we have given rural America some hope for the holiday season.

Mr. BYRD. Mr. President, I ask unanimous consent to reserve the remainder of my time throughout the day.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. I yield the floor.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] is recognized for not to exceed 15 minutes.

A MODEST BUT CRITICAL STEP FOR ARMS CONTROL

Mr. PROXMIRE. Mr. President, it may be a crumb. It may be a whole loaf. But it is encouraging news these days when arms control gets anything. The conferees in the Defense Appropriations Subcommittee on the continuing resolution agreed on a larger increase in the defense budget than most observers thought possible. But arms control did salvage one mark of progress. Probably. For the time being. The House and Senate conferees on Defense appropriations settled in the conference report for a ban on the testing of new antisatellite weapons. Congressman LES AUCOIN is an able and staunch champion of arms control. AUCOIN called the conference decision, "An absolute triumph." He added: "We did more for arms control in 5 hours than has been done in the last 5 years." The Defense Department conducted one test in October. It had planned at least two other tests soon.

Why is this decision by the Defense appropriations conferees to end antisatellite testing important to arms control? The answer is that satellites are quintessential to arms control verification. Their destruction would make arms control agreements impossible. Testimony before the Defense Appropriations Committees by such experts as former CIA Directors William Colby and Stansfield Turner have documented the fact that satellites not only provide an extraordinary window on nuclear developments in the Soviet Union. They do more. They provide far and away the most reliable monitoring system for both sides in determining compliance or violation of arms control agreements. Our experts can secure only very limited material from published Soviet sources. Human intelligence, from defectors and American and foreign agents in the Soviet Union provides some help. But it is fragmentary, anecdotal, erratic, and unreliable. Satellites cannot only observe through photographs but they can derive a great deal of useful intelligence by detecting degrees of sound and heat. The satellite technology has been progressing swiftly—satellites now provide a far more useful source of intelligence for the United States than they do for the Soviet Union, for two reasons.

First, the American satellite technology is more advanced. Second, the United States is an open society. The Soviet Union is a closed society. The Soviets can determine a great deal about American nuclear developments simply by reading our free and wide-open press. Our military and technical journals, our great newspapers, even our congressional hearing records, disclose detailed, massive data about our American nuclear developments, including our compliance or lack of compliance with arms control treaties. As we know, in the Soviet Union the totalitarian Communist Party controls everything. It is simple for the Soviet Government to conceal their nuclear activities, including any violations of arms control treaties.

So satellites serve the interest of the United States far more importantly than they serve the interests of the Soviet Union in arms control. But won't the decision of Congress to stop antisatellite testing simply leave the antisatellite capability in the hands of the Soviet Union? And, are not the Soviets already ahead of us? Is it not true that they have tested and perfected antisatellite capability already?

The answer to that charge, Mr. President, is that the Soviets have, indeed, developed and deployed an antisatellite system. But it is crude and limited. It poses no threat to our high altitude satellites. These American satellites provide far-and-away the most critical and useful information about Soviet compliance or violation of arms control treaties. If the conferees had not acted to prevent the United States from going ahead with its planned additional tests on our high altitude antisatellite technology, our own satellites would certainly be in danger of a greatly stepped-up Soviet effort to destroy our high altitude satellites. The development by either superpower of this high altitude antisatellite technology would surely have jeopardized all future arms control agreements.

If either superpower were to develop the capacity to destroy the adversary's high altitude satellites the adversary would know that the other superpower held his most critical intelligence capability hostage. It would mean that, at any time and without notice, the adversary could take out the one satellite system that could provide by far the most important and the most reliable evidence of compliance or violation.

Suppose the Soviet Union now proceeds with its antisatellite technology. Suppose it begins to test as the United States already has. Then we can and should resume our antisatellite testing and development. But the Soviets surely know this. With both sides desisting from testing, satellites can continue to do the monitoring work that is quintessential to verification which in turn makes possible arms control agreements that can begin to stop the nuclear weapons arms race.

This has been a bad year for arms control. SDI or star wars seems on its way to destroying that most successful of all arms control agreements, the 1972 ABM Treaty. SALT II, the treaty that restrains offensive missiles, expires in 2 weeks and may not be revived. At least we still have the monitoring capability of our satellites healthy and constantly improving. The conferees' agreements on the continuing resolution keeps arms control hopes alive. Congressman LES AUCOIN may well be right when he said, "We did more for arms control in 5 hours than has been done in the last 5 years."

MYTH OF THE DAY

Mr. PROXMIRE. Mr. President, my myth of the day is that the tax changes made in the 1981 and 1982 tax laws will, in the long run, stimulate business investment, economic growth, and eventually reduce the Federal deficit.

A study prepared by members of the Federal Reserve Board and International Monetary Fund staffs reached just the opposite conclusion.

Using their sophisticated econometric model, the economists found that in large part the Federal deficit in the past 4 years was a result of the 23-percent reduction in personal income taxes and the substantial acceleration in depreciation allowances legislated in the two tax laws passed in 1981 and 1982.

When the econometric model is manipulated to keep the unemployment rate unchanged through monetary policy, the study found that the tax law changes "significantly skews the composition of output toward consumption and away from housing. The formation of business capital is boosted in the short run but eventually it too is reduced. Consequently, potential output is lower in the long run."

The study goes on to show that if the current fiscal policy is maintained it is likely that the real after-tax rate of interest will rise above the rate of growth of real output. The study concludes that:

> Under such conditions, the ratio of Federal debt to GNP would grow explosively unless fiscal policy were made sufficiently restrictive.

In other words, if we do not raise taxes, cut spending or do a combination of both, we will be faced with rising real interest rates, lower investment, anemic growth and runaway Federal deficits.

A FIRST STEP AGAINST TERRORISM

Mr. PROXMIRE. Mr. President, we have each been troubled by terrorism in recent weeks. The *Achille Lauro* and the TWA hijackings. The Beirut bombing. These incidents form a gruesome chain forged of disregard for human life and rejection of international law.

After each incident, I have listened to the recommendations of the President and my Senate colleagues and the fine people of Wisconsin. There is a remarkable consistency in these recommendations. Each of these Americans declares that human life is precious and the United States must do more to protect that life. Each declares that we should work to build greater international cooperation to battle terrorism. And each of these Americans is right.

We should start this battle by ratifying the Genocide Convention. For what is genocide? Surely it is terrorism bloated with the grotesque desire to destroy an entire civilization. What is the Genocide Convention but an effort to set up an international mechanism to battle this scourge?

The Genocide Convention is a sound piece of international law that does not threaten the rights of American citizens. Rather, it is a first step toward implementing the recommendations of so many Americans. The convention reaffirms that human life is precious and provides a framework for international cooperation to fight genocide.

Let us battle terrorism. Let us start by battling genocide—one of the ugliest manifestations of terrorism. Let us start by ratifying the Genocide Convention.

Mr. President, I yield the floor.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond the hour of 1 p.m., with statements therein limited to 5 minutes each.

COMPLIMENTS TO STAFF

Mr. LEAHY. Mr. President, I will be very brief. But during the past week-and-a-half, I have served on two committees of conference, both in appropriations and agriculture. The appropriation one is still going on; agriculture finished at around 6:30, 6:45 Saturday night.

In these committees of conference, we met late into the night each night, sometimes midnight. A number of us would meet afterward for another hour or 2 and then Members would go home.

The reason I mention this is not to talk about the long hours that Members on both sides of the aisle have put in, but, rather, Mr. President, to note the extraordinary work and dedicated work of the staff in both the Appropriations Committee and the Agriculture Committee, and say that I wish to compliment the staff of both bodies of both parties.

I believe many times when we hear the expression that we have agreed on something and "we will let staff work it out," that is a signal for us to leave and the staff to spend hours of very difficult work in doing just that—working it out.

Mr. President, we should realize that this body functions sometimes in spite of the 100 Members, but always because of the dedicated staff on both sides of the aisle, and those within the Chamber, the Official Reporters who are taking down the notes of what I am saying now, those who work in the various aspects of the Secretary's office, the Parliamentarians, those who run both the Cloakrooms here, and the pages, who are some of the most extraordinary young people that I have seen during the last 11 years I have been here. When people talk about those in Government, I do not think they will find any more dedicated than the people who make this branch of Government, the legislative branch of Government, work.

The 100 Senators, the 435 Representatives, the other Commissioners, Delegates, and so on who are elected come here temporarily to represent the people of their State or district. So much of the staff, though, are permanent professionals who ultimately work to do what is best for the country.

I know that the Agriculture Committee staff is now working on the statement of the managers. I hope that we would give them all the time they need. It is an extraordinary document, probably will run about a thousand pages long, and they need the time to make sure that no mistakes are made in incorporating those things

we voted on. I have the utmost confidence in them. I will have even more confidence if we give these extremely weary men and women the time to do their work.

Nobody is more eager to get home than I. Vermont is beautiful at this time of the year. I mention that to anybody who is planning to travel there. We have fresh snow; the skiing is great. It is lovely. Unlike Washington, the snow does not slow up anything.

But I am one Senator who is willing to take an extra day, if necessary, to allow those on the staff that are working out the reports from the various committee conferences to do it right. We have asked Herculean labors from them, but even Hercules needed time to complete his labors.

DISPOSAL OF LOW-LEVEL NUCLEAR WASTE

Mr. BOREN. Mr. President, there are four bills on the calendar now pending dealing with the problem of the disposal of low-level nuclear wastes. These bills include H.R. 1083, H.R. 3878, S. 1578, and S. 1517. There are also six bills on the calendar that grant the consent of Congress to regional compacts dealing with the same subject.

As our colleagues will recall, one of these became the vehicle for the consideration of the campaign reform amendment which I offered several days ago. That amendment was not tabled at that time, and still remains on the calendar attached to that particular piece of legislation. We had a discussion on the floor several days ago in which I said it was my intention to deny unanimous consent for the bringing up of any of these packages of bills which we regarded as necessary to secure the viability of the vehicle for consideration of campaign reform.

The majority leader during the discussion of the campaign reform amendment had indicated that it was his hope—not a definite promise, but it was his hope—that we could return to the campaign reform amendments sometime in the spring.

Mr. President, I simply want to say that I am absolutely willing—and I have communicated this to the majority leader, and I hope we will be able to work something out—to bring these matters, the compacts and the piece of legislation, to the floor for consideration. I would be perfectly willing to allow for all of them to be considered.

I will not object to any of them being considered as long as we could be assured that we would return to the campaign reform amendment, and make it the pending order of business on a date certain. I had proposed March 12. I am not particularly dedicated to any one date if that does not fit the schedule of the majority leader, if he wanted to make it a week earlier or a week later according to what would be beneficial to the Senate schedule.

I also understand that the initial proposal we made indicated that we would remain on this particular piece of legislation until it was disposed of.

I know the majority leader is under terrible time pressures. If, for example, we ended up facing a filibuster or prolonged debate of that particular issue, and the majority leader had other matters that he needed to bring before the body, I would understand why it might be difficult for him to agree to stay on that particular measure until action was fully concluded.

I would certainly be willing to also negotiate with him a reasonable amount of time that he would allow us to operate on this particular piece of legislation to see if we could complete it within a reasonable period of time understanding that if we could not he might then have to move on to other matters before action was completed.

I wanted to say, Mr. President, that as far as this Senator is concerned I am absolutely willing to listen to any counterproposals that might be made from the suggestion that I have previously made and had conveyed through the floor staff to the majority leader.

I am very optimistic that something can be worked out. This Senator is very flexible as to the particular date on which we would return. I feel very strongly we must be assured that we will return to it on a date certain.

I am also very flexible in terms of my understanding of the problems of the majority leader, that he might have to only promise that he would stay on it a certain period of time knowing we were going to have a very busy schedule on the Senate floor in the early and midspring period, and that we might have to make more than that one attempt to complete action on this proposal before we actually succeed.

So I am very hopeful that something can be worked out.

I see the distinguished majority whip on the floor. I hope we will not try to do that now, but I hope he will convey that there is a good deal of flexibility on this side in terms of what we might be able to work out.

THE 1985 FARM BILL

Mr. BOREN. Mr. President, I would like to mention there was discussion on this floor last week by this Senator, and potentially by others, that there might be a prolonged debate that would prevent the timely completion of the conference report of the Agriculture Committee on the 1985 farm bill.

I have to report that I think there was very significant progress made on the farm bill over the weekend. I have had an opportunity to be in discussions during the weekend as that conference report was finalized and to also have a chance to look at the report.

I certainly would not call the bill that we are going to be voting on later this week an adequate bill. Overall I think the bill fails to adequately address the income problems for farmers or provide an aggressive program to increase exports. Passage of this farm bill will do very little to reduce the crisis in rural America. As far as I am concerned, the fight is not over.

I think we should all realize that Congress will have to grapple with many of these same problems again next year. About the best thing we can say about the bill that has come out of conference is that it is not as bad as the original conference committee proposal.

I think it would have been even worse had there not been a group of Senators willing to bring that proposal to prolonged debate and postpone legislation until next year.

Originally, just over a week ago, we were looking at a proposal from the conference committee which would have dropped the income of an average Oklahoma wheat farmer in my State by 12 percent next year. At least the bill ended up coming out of conference not including any substantial reduction in farm income. Income levels at least in the first 2 years will continue about the same as under current law.

With the farmers in such a desperate situation today, there is no way that continuing the status quo can be considered as adequate.

As I said, Mr. President, it is at least a step forward from the 12-percent drop in income originally being considered by the conference committee.

Though I cannot say that I can endorse this bill and I cannot say that I think this bill will solve the problems that are out there in the agricultural community, it would not be the intention of this Senator to try to participate in any way in delaying consideration of that matter before we go home. I would anticipate that we will have the conference report before us and this Senator will participate to try to assure timely consideration of that conference report before Congress finishes this year.

Mr. SIMPSON addressed the Chair.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. SIMPSON. Mr. President, I listened to the remarks of my friend and colleague from Oklahoma. I appreciate his good faith, particularly with regard to the low-level waste bill.

Let me inform all Senators that we do have a very critical problem. I will not go into that to be repetitive, but I

51-059 O-87-21 (Pt. 26)

will say swiftly—and you can go back and review my remarks on this topic the other day—on January 1, 1986, the three receiving States in the United States will reject low-level waste coming from any other State in the Union. They will simply reject low-level radioactive material.

That is not from nuclear generators of electric power. That is ordinarily high-level waste.

What it is, effectively, is something that will stop hospitals that engage in uses of nuclear medicine who produce low-level waste products that are gloves, boots, things that go with nuclear medicine that helps to save lives in the country in all hospitals within the entire United States. In my State, the Senator's State, any State in the improvement of living standards. As Hungary, East Germany and even Bulgaria explore economic reform and trade openings to the West, we should encourage this slow and sometimes even stealthy evolution in their policies. As they increase economic tiese majority leader speak for himself on this negotiation. I hope he will continue negotiations with the leader because he alone can speak on this issue.

In my mind, I am certain that the majority leader will try to work toward a date and a time certain. I see no way personally, and the majority leader will certainly judge this, how we would stay on it until it is disposed of. I know of no way to assure that to any Senator. It would be folly to stand here and say that we would select a time and date certain and that we would stay on that issue until its final disposition. Even staying on it and interrupting and bringing up other things that would be topical is not something that I think would be for the "good of the order" in the Senate. We already have enough problems with quality of life. We have discussed that among ourselves. The Senator from Oklahoma is a very key part of that group.

If we are going to have a situation where everyone has their particular issue and it is to be brought up at a date and time certain until it is disposed of, where it cannot be laid aside, and it can be in order as business of the Senate that it cannot be returned to for a time, then I think we have sounded another death knell to the quality of life in the Senate. I wanted to share that with the Senator.

Mr. BOREN. Mr. President, I thank the Senator from Wyoming for the comments he has just made. Of course, I have had an opportunity to review fully the situation discussed earlier a few days ago on the floor in regard to these compacts and in regard to the transition legislation needed to assure that we have an adequate and a safe place to dispose of these low-level radiation wastes. I share with him the hope that we will be able to deal with that.

I understand that there are some difficulties now surfacing perhaps between two committees of the Senate that have been working on this same matter. I hope they will be able to resolve them.

I did simply want to say that if those two committees are able to resolve their problems, this Senator does stand very ready and willing to work with the majority leader to try to obtain an agreement so that we can move on and have them all considered. I do understand the point made by the Senator from Wyoming that if we were to take up the campaign reform amendments on a certain day, none of us standing here today can guarantee how much time the consideration of that issue might take.

Understanding the majority leader's problems, being sensitive to his problems of scheduling, and there may be other pressing matters at that time for us to consider, this Senator would be very willing to enter into some time agreement that while giving us a reasonable opportunity, assuring that we will have a reasonable chance for a reasonable period of time to look at this matter at that time it is called up for consideration, to not try to put the majority leader into a box where he could not move on to other things, or that he could not set this aside, after we have had a reasonable time to work on it, and go to some other matter.

I am sensitive to the point made by the Senator from Wyoming. If we got into a prolonged situation, a week or 2 weeks or some extended period of time on this measure, this Senator certainly understands there may be other pressing matters at that time and I would not want to tie the hands of the majority leader.

The first proposal we had sent to the majority leader did indicate we would remain on it until disposed of. This Senator would certainly be open to some counteroffer from the majority leader which will address his concerns about not having to stay on it an unreasonable amount of time if we were not able to finish it in a timely way.

I thank the Senator from Wyoming for his remarks. It sounds like we are well on our way toward approaching an agreement on that.

I see the distinguished Senator from South Carolina on the floor. He has discussed with me the very serious nature of this matter. I know it affects the State of South Carolina, one of the three States providing disposal sites. I know it is important not only nationally but to him particularly as it impinges upon South Carolina.

This Senator wants to assure all concerned that he is very willing to look at some proposal of the majority leader and to try to look at it in a very sympathetic fashion. Part of the opportunity will certainly be, if we had the chance to bring up this subject again and deal with it in a reasonable period of time, to give the majority leader flexibility for that to happen. I think we can arrange that.

As far as I am concerned, we see all of these numbers released except for our bid. The subject matter could be included on another vehicle. We have here, I think, potentially seven or eight different pieces of legislation and those numbers are available.

I appreciate the comments of the Senator from Wyoming and I appreciate also the information which has been supplied to me by my colleague from South Carolina, who is now on the floor. I am very hopeful we can work that out. I hope the two committees involved will also be able to proceed and to work out any problems they might have.

Mr. SIMPSON. Mr. President, I shall certainly yield the floor, but I want to indicate that the two committees are working diligently on the settlement of this matter. I think they are close with regard to the milestones that must be reached. Certainly, with what the Senator has said this morning, I think we can reach some accommodation; I certainly hope so. We shall certainly work toward that.

I yield the floor, Mr. President.

NATIONAL DRUNK AND DRUGGED DRIVING AWARENESS WEEK

Mr. DOLE. Mr. President, the week of December 15–21 has been designated as "National Drunk and Drugged Driving Awareness Week," to draw attention to the dangers of drunk driving and the efforts of people across the country to make our Nation's roads safer.

Thanks to the combined efforts of Federal, State and local governments and citizen's organizations such as Mothers Against Drunk Drivers and Students Against Drunk Drivers, between 1980 and 1984 the percentage of drunk drivers decreased 24 percent and the number of intoxicated drivers killed declined 24 percent.

MORE TO BE DONE

Although we are grateful for these past accomplishments, much more must be done. Many States have raised the legal drinking age to 21 in an effort to curb the use of alcohol by our Nation's youth. However, this affects only 15 percent of the drivers responsible for alcohol-related deaths. We must recognize that drunk drivers of any age are killers and target our programs accordingly to remove all drunk drivers from the roads.

Having served as a member of the President's Commission on Drunk Driving, I am fully aware of the peril-

ous situation drunk drivers impose upon our Nation. It is imperative that we combine educational programs, legislative measures, sentencing reform and enforcement. Designation of National Drunk and Drugged Driving Awareness Week is an important step in our battle against drunk driving. I salute the progress made thus far and reaffirm my commitment to make our roads and highways safe for the future.

CONRAIL

Mr. SPECTER. Mr. President, I rise today to address an issue of paramount importance to the freight rail system in the Northeast-Midwest region, and indeed, to the entire national transportation system. I refer to the proposed merger of the Conrail and Norfolk Southern railroads, and the creation thereby of the largest rail network in this country.

This issue clearly is not yet ripe for Senate action. Despite pressures from Norfolk Southern proponents, and recently quoted allegations by one of their lobbyists that "a handful of Senators treat this as a joke rather than as an important question of public policy," the fact remains that major antitrust issues have yet to be evaluated and resolved. That is hardly a joke.

In January 1985, the U.S. Department of Justice completed its review of the Norfolk Southern proposal to purchase Conrail. Its conclusion was unambiguous: "The merger would have a significant adverse effect on competition * * *." The Department of Justice found that, "* * * without appropriate divestitures, the proposed merger would violate both Clayton Act and Interstate Commerce Act merger review standards." (January 29, 1985, letter from Assistant Attorney General J. Paul McGrath to Secretary Dole, p. 1).

Since that date, almost 1 year ago, Norfolk Southern repeatedly has attempted to devise a divestiture plan that would meet Justice's requirements for "long-term, viable and competitive rail service" in the counties that would be most affected by the merger. Norfolk Southern also has been attempting to convince a rightfully skeptical audience that the two proposed divestee carriers—Guilford Transportation Industries and the Pittsburgh & Lake Erie Railroad—would provide a competitive counterbalance for the service currently provided by an independent Conrail.

Every analysis of these divestiture proposals thus far has produced the same conclusion: no divestiture plan can recreate the existing benefits of a strong, competitive independent Conrail. The proposed operations of Guilford and P&LE are miniscule in comparison to the proposed Norfolk Southern/Conrail merged system, which is more than five times the size of postdivestiture Guilford and P&LE combined, and which in 1984 had nearly 20 times their combined operating revenues. both the Interstate Commerce Commission staff, and the independent consultant to the Department of Justice, R.L. Banks & Associates, Inc., in analyses of previous divestiture proposals, have raised serious questions as to any prognosis of continued viability for both of these regional carriers.

Yet the present proposal—No. 3 to date—has not addressed these critical financial questions, and the Justice Department has admitted that the divestee carriers have not even submitted financial statements, financial projections, operating plans, and traffic and marketing studies.

With such obvious holes in the evaluation of divestiture plan No. 3, it is difficult to surmise how the Department of Justice can even state, as it did in its November 19 press release, that "on its face" this plan "appears" to address the anticompetitive concerns outlined in prior Justice analyses. Critics of the plan have noted that, in addition to the financial problems of the proposed divestees, the third plan continues to rely heavily on trackage rights, reciprocal switching arrangements, and car haulage agreements, which are costly, result in indirect routes, and create multicarrier service that often is inefficient and noncompetitive. Such shortcomings existed in the prior—rejected—plans, and they have not been remedied.

There has been a tremendous recent rush to remove the threat of antitrust violations. First, by a hurriedly announced Department of Justice "preliminary" indication of prima facie plan approval, and second, by a push to hold a Judiciary Committee hearing on this topic less than 48 hours after divestiture plan No. 3 was publicly released. The lack of opportunity to study this proposal, along with other procedural problems, let to the cancellation of the formal hearing and the substitution instead of an "informal gathering." Thus, the Judiciary Committee has not had opportunity to address the newest divestiture plan and Secretary Dole's commitment to appear before the Judiciary Committee to testify regarding the merger remains unfulfilled.

This last minute flurry of activity suggests a fear that plan No. 3, like its predecessors, will not withstand careful and measured analysis. The quickened desire for Senate action, as evidence by the attempt to raise the issue by unanimous consent on the Senate floor on December 5, to which I and numerous other Senators voiced strenuous objection, further indicates the pressure created by Norfolk Southern's threat to withdraw its offer at the end of 1985 if "substantial progress" has not been achieved.

Threats such as these should not sway Congress from its obligation to ensure that a divestiture does not violate the antitrust laws. In every respect, divestiture plan No. 3, like the others before it, demands careful scrutiny. Critical pieces are absent; critical assumptions are factually incorrect; and experts suggest that the marketing and operating assertions do not comport with reality.

The fundamental question is this: Why is Congress being asked to approve hastily a massive restructuring of the Northeast-Midwest rail system, which necessarily will cause a startup period of unknown duration, disrupt service, dislocate thousands of employees, and risk severe injury to rail competition? If the only answer to this question, as many may guess, is to accommodate Norfolk Southern's bid for Conrail, then the real joke is on the American taxpayer.

The independent Conrail of today is working. It has produced innovative, procompetitive, shipper-oriented service. Its long-term viability has been verified by the U.S. Railway Association, and by each and every independent analysis on this topic.

Sophisticated financial investors are willing to back the sale of Conrail through a series of public offerings which would keep Conrail independent and generate a higher sale price for the Government. This Morgan Stanley alternative, which I have supported through legislation, will guarantee continued aggressive rail competition by ensuring that three major railroads maintain existence in the region.

It has been almost 2 years since Secretary Dole solicited bids for the purchase of Conrail. Those 2 years gave Conrail the opportunity to prove itself even further as a money maker, and as a stand-alone rail system. Perhaps the idea of a rail merger, and the reliance on Norfolk Southern's "deep pockets" made sense 2 years ago. At this moment, however, it is quite clear that Conrail does not need Norfolk Southern. To the contrary, it is Norfolk Southern that needs Conrail—precisely because of Conrail's proven financial success, and the $100–$600 million in tax benefits which Norfolk Southern would gain through the merger.

Let us not proceed to a hasty decision on this important issue. Much is at stake—the proposed merger would injure local economies, cause job losses, and decrease any remaining incentive for economic development in the already suffering Northeast-Midwest region. Norfolk Southern voluntarily entered this process, and must be prepared to withstand reasonable scrutiny of its offer. Given the huge gains Norfolk Southern stands to reap

if the merger is approved, its threats to withdraw its bid must be examined nearly as closely as its continued—and thus far futile—attempts to provide sufficient divestiture plans. In any event, haste and hurried activity are not in order—Conrail must be returned to the public, but in the manner which provides the best return to the taxpayers, proper service to shippers, fair prices to consumers, and a minimum of competitive problems to the national rail transit network.

DON'T SCRAP SALT II

Mr. EAGLETON. Mr. President, if President Reagan is serious about negotiating a new arms accord with the Soviet Union, he must not make the perilous mistake of dismantling a mechanism that serves American national security interests and represents an important bridge between the superpowers. Yet, President Reagan has signaled that he may do just that by ceasing to honor the terms of the second Strategic Arms Limitation Treaty, SALT II, when it expires on December 31.

The administration's attitude toward SALT II over the years can best be described as fickle. The Reagan team has gone from condemning the fatally flawed treaty during the 1980 campaign, to announcing in 1981 that, while it would not submit the treaty for congressional ratification, it would observe a policy of not undercutting the provisions of the agreement.

Earlier this year the administration's commitment to a no undercut policy wavered in the face of a big test; the activation of the new *Ohio*-class Trident submarine, which went to sea trials last September. This new weapon carries 24 MIRV'd nuclear missiles, and its deployment would have pushed the United States over the SALT II ceiling of 1,200 MIRV'd ICBM's. In the course of public discussions about how to proceed, the White House threatened to ignore the treaty's MIRV limits as a proportional response to Soviet noncompliance with other provisions in SALT II. In June, the administration finally announced that it would dismantle a Poseidon nuclear submarine in order to stay within the MIRV limits.

Mr. President, can you imagine what turning our back to the agreement would have done to the Reagan-Gorbachev summit recently completed in Geneva? At worst, the summit would not have occurred, and at best, the atmosphere of the summit would have been poisoned by Soviet charges—which would not have been altogether off the mark—that the President was not serious about the summit or arms talks.

Would exceeding the MIRV limit have strengthened the President's position in Geneva? Clearly not. Would it have improved our standing in the world community? Hardly. Would it have given the Soviets a public relations club with which to beat us and an excuse to discontinue important constraints on its forces? Absolutely. Finally, would our national security have been enhanced by scrapping observance of the MIRV limits? The answer is no.

Mr. President, that is what it is all about: enhancing national security. At a point in time when nuclear Armageddon hangs above us like Damocles' sword, part of ensuring our national security involves limiting nuclear arsenals and reducing incentives for either side to launch a nuclear attack, which is precisely what the SALT agreements have provided us.

The other side of the national security equation in an arms control context—maintaining our military strength relative to Soviet's—has also been served by the SALT agreements. To stay within SALT boundaries, both sides have been forced to dismantle nuclear assets and it can be argued that the Soviets have been forced to dismantle more than the United States. It can also be said that should we decide to exceed the numerical limits on ICBM launchers, the Soviets would follow suit and are in a very good position to take advantage of such a break-out.

The Reagan administration's threats to ignore SALT II have been founded on its itemization of Soviet treaty violations. None of us should treat Soviet noncompliance lightly. The Reagan charges are serious. There is evidence that restraints are breaking down, if not according to the letter of the treaty, then certainly according to its spirit. That is not to say, however, that restraints are irretrievable.

The Reagan administration should dog the Soviets on its noncompliance at the diplomatic level. In the short term, it should seek to reach a mutual clarification of current obligations under treaties now in force—this would be a laudable and attainable goal for the U.S. team at the Geneva negotiations which are to resume in January. In the longer term, the administration should pursue the noncompliance issues in the Standing Consultative Committee—the forum created by the SALT talks to address SALT compliance questions.

The administration should not throw the baby out with the bath water by responding to Soviet noncompliance of certain provisions by rejecting the entire SALT II agreement. The risks of the current compliance problems are clearly outweighed by the benefits we reap from existing restraints on Soviet forces.

Mr. President, I cannot believe that the administration would be so foolish as follow through with its threat of ceasing its observance of SALT II, but my beliefs have been shaken by the President's recent statements and by the power that the antiarms control faction of White House advisors seems to have in the policymaking process.

Ignoring certain provisions of SALT II earlier this year would have been bad, but reneging on our commitment to the entire agreement at this delicate moment in superpower relations would be far worse. The tenuous momentum that the Reagan-Gorbachev summit gave to arms negotiations would be all but destroyed and President Reagan would probably end his second term with the dubious distinctions of being the only U.S. President in over two decades to have, first, not reached an arms accord with the Soviets; and second, ruined a predecessor's arms agreement.

Mr. President, the United States and the Soviet Union stand at a crossroads in their relationship. Both know that the present arms control regime is far from perfect. Both are aware that for the first time during the Reagan presidency, there exists a slight opportunity for improving bilateral relations and for finding new, mutually beneficial arms limitations. By discarding the unratified SALT II Agreement after its expiration later this month, President Reagan would shut the door to the potential for healthier United States-Soviet relations, productive arms negotiations, and a safer world. I join many of my colleagues in calling on the President to add to the momentum of the Geneva summit by continuing to abide by the unratified SALT II Treaty.

Mr. BOREN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

(Mr. PRESSLER occupied the chair during the quorum call.)

Mr. MELCHER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GORTON). Without objection, it is so ordered.

MINIMUM FARM BILL

Mr. MELCHER. Mr. President, the farm bill has passed the conference committee in a way that will probably assure House and Senate acceptance and get the President's signature. It is just the minimum framework to attempt to meet the farm crisis to keep American agriculture intact until better days come. More on agriculture credit and trade corrections must come yet. The total cost of the farm program will be a little more than $17 billion a year for commodities and conservation.

President Reagan should be the last person to complain about the cost because it is his administration's policies that have curtailed agricultural exports and winked at increased agricultural imports. Farmers should squawk the loudest because it is these policies that drive them to the wall and make them dependent upon Federal price supports and deficiency payments rather than on a decent market for their production. Wheat exports were down 20 percent over the past several years. They are even more disastrous this year, running well below 50 percent of the past 4-year average. Corn, soybean, and rice exports are also being clobbered, leaving commodity prices at a level that can only be compared to that of the 1930's.

The farm bill for farmers is not much to shout about, but at least it maintains target prices at virtually the same level for the next 3 years, something the Reagan administration said it could not stomach. If there is going to be any hope for farmers and rural America, it is because target price stability has been maintained and the export provisions in the bill have drawn to force the administration to export more. Mandatory minimum tonnages for food for peace—Public Law 480—and a broadened section 416, with more surplus commodities for friendly and hungry countries, plus the utilization of both those donations and commercial sales to match subsidized food sales from other countries, will require both the Agriculture and State Departments to get off the dime and clear more food exports.

To make sure that there is a some coordination in expediting of agricultural exports, the bill requires the appointment of a special adviser to the President.

While President Reagan has not sufficiently concerned himself with agriculture, the continuing sag in the farm and rural economy mandates attention to that problem now. The balance of trade for this year—with $150 billion more being imported than we have exported—has tracked with the continuing climb in Federal deficits. One cannot be corrected without correcting the other. A stronger U.S. economy is dependent upon production here.

American agricultural producers are the most efficient in the world. The failure to meet the subsidized competition from other countries in foreign food sales is not the fault of U.S. farmers, but the fault of the policies of this administration. The State Department has thwarted to delayed food sales to traditional U.S. customers such as Sierra Leone, Kenya, and the Philippines.

In addition, the bill has very strong conservation provisions. Prohibitions against sodbusting and swampbusting are significant and a major conservation reserve has been established that will be phased in over 5 years. Anybody who cares about the longrun future of the water and soil resources of this country has to be pleased with these provisions.

PLIGHT OF SOVIET JEWS

Mr. MATHIAS. Mr. President, the decision by the five Maryland rabbis to accept 15 days' imprisonment in a Federal penitentiary to dramatize the plight of Soviet Jews is an inspiring and exemplary gesture. This choice, which is consistent with the highest traditions of civil disobedience, sends a powerful message to the Soviet leaders, and should stimulate our own Government to ask itself whether we are doing enough to address this critical issue of human rights.

The circumstances surrounding these cases raise troubling questions.

While ordinarily a decision on a Presidential pardon must await the outcome of all judicial proceedings, surely it would be appropriate for the President to consider exercising his power to commute the sentences the rabbis are now serving. This decision would show compassion, while leaving the ultimate decision of legal issues to the courts.

In the meantime, my thoughts, and those of Marylanders of all creeds, are with the imprisoned rabbis, their families, and their congregations. Even more importantly, our thoughts must be with the Jewish victims of official mistreatment in the Soviet Union, along with our hopes for an improvement in their situation in the year ahead.

UNANIMOUS CONSENT AGREEMENT

NOMINATION OF JAMES L. BUCKLEY TO BE U.S. CIRCUIT COURT JUDGE FOR THE DISTRICT OF COLUMBIA

Mr. DOLE. Mr. President, as in executive session I ask unanimous consent that at the hour of 2 p.m. on tomorrow, Tuesday, December 17, 1985, the Senate go into executive session in order to consider the nomination of James L. Buckley to be U.S. circuit court judge for the District of Columbia, that there be 1 hour of debate equally divided between the chairman of the Judiciary Committee, and the Senator from Connecticut, Mr. DODD, or their designees.

I further ask unanimous consent that it now be in order to ask for the yeas and nays on the Buckley nomination, and that the vote on the nomination occur following the debate.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object, is the distinguished majority leader saying that the vote on the nomination will occur immediately upon the expiration, or yielding back of the time?

Mr. DOLE. Yes.

Mr. BYRD. Mr. President, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

(Later the following occurred:)

Mr. DOLE. Mr. President, under the previous unanimous-consent agreement we were to take up the Buckley nomination at 2 p.m. tomorrow. I now ask unanimous consent that we take up the nomination at 11 a.m. on tomorrow, Tuesday, December 17; that we got into executive session to consider the nomination of James L. Buckley to be U.S. circuit judge for the District of Columbia; that there be 1 hour of debate to be equally divided between the chairman of the Judiciary Committee and the Senator from Connecticut [Mr. DODD] or their designees.

I further ask unanimous consent that following yielding back of time or the separation of time the vote immediately occur.

The PRESIDING OFFICER. Without objection, it is so ordered.

(Conclusion of late proceedings.)

EXECUTIVE CALENDAR

Mr. DOLE. Mr. President, I would like to inquire of the distinguished minority leader if he is in a position to confirm any or all of the nominations on the Executive Calendar as follows:

Calendar No. 519, Calendar No. 520, Calendar Nos. 522, 523, 524, 525, 526, Calendar Nos. 558, 570, 571, 572, 573, Calendar Nos. 577, 578, 579, Calendar No. 581, Calendar Nos. 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, Calendar Nos. 609, 610, 611, 612, Calendar Nos. 614, 615, 616, 617, and 618, Calendar Nos. 620, 621, 622, 623, 624, and all nominations placed on the Secretary's desk except for Foreign Service nominations beginning with L. Paul Bremer III, and ending with Jerome F. Tolson, Jr.; and if the distinguished minority leader is in the position to confirm any or all of the nominations to which I just referred, I ask unanimous consent that the nominations just identified be considered en bloc, and confirmed en bloc.

Mr. BYRD. Mr. President, reserving the right to object, I wish to confer with the majority leader.

Mr. President, I believe we are ready on this side to go forward with the nominees. In fact, I know we are.

I would like to ask, however, while still reserving the right to object—and

the distinguished majority leader and I have had conferences on this matter—for the RECORD, I would like to ask the majority leader whether or not the administration has—in keeping with its recent assurances that were given in my office with the distinguished majority leader present—notified the distinguished majority leader present—notified the distinguished majority leader as to whether or not there are any candidates for recess appointments during the forthcoming adjournment sine die over to the 2 session of the 99th Congress.

Mr. DOLE. I might respond there has been no indication. As a matter of fact, the minority leader will recall they indicated that we would have advance notice, that we would be notified prior to adjournment.

I will ask further that a letter we are sending to the President today be made part of the RECORD, a letter where we jointly request that information in writing.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, December 16, 1985.

The PRESIDENT,
The White House,
Washington, DC.

DEAR MR. PRESIDENT: In the past, the issue of recess appointments has generated considerable controversy that has disrupted the expeditious handling on nonrecess appointments in the Senate. As we approach sine die adjournment, we would like to be advised of any plans the Administration has for making recess appointments before the Senate returns on January 21 of next year.

This request for notice prior to making the recess appointments is in accordance with the discussions we had earlier in the year on this subject.

Sincerely yours,

BOB DOLE,
Majority Leader.
ROBERT C. BYRD,
Minority Leader.

Mr. BYRD. Mr. President, I thank the distinguished majority leader. I take it the distinguished majority leader is in the same position I am at the moment; namely, that the administration has not indicated that any such recess appointments will be made.

Mr. DOLE. That is correct.

Mr. BYRD. I thank the distinguished majority leader. I revoke my reservation.

The PRESIDING OFFICER (Mr. COHEN). Without objection, it is so ordered.

The nominations considered and confirmed en bloc are as follows:

THE JUDICIARY

David R. Thompson, of California, to be U.S. circuit judge for the ninth circuit.

Bobby Ray Baldock, of New Mexico, to be U.S. circuit judge for the tenth circuit.

Glenn L. Archer, Jr., of Virginia, to be U.S. circuit judge for the Federal circuit.

Frank X. Altimari, of New York, to be U.S. circuit judge for the second circuit.

Patrick A. Conmy, of North Dakota, to be U.S. district judge for the District of North Dakota.

Lynn N. Hughes, of Texas, to be U.S. district judge for the Southern District of Texas.

Morris S. Arnold, of Arkansas, to be U.S. district judge for the Western District of Arkansas.

John T. Noonan, Jr., of California, to be U.S. circuit judge for the ninth circuit.

Deanell Reece Tacha, of Kansas, to be U.S. circuit judge for the tenth circuit.

Garrett E. Brown, Jr., of New Jersey, to be U.S. district judge for the District of New Jersey.

Robert L. Miller, Jr., of Indiana, to be U.S. district judge for the Northern District of Indiana.

DEPARTMENT OF JUSTICE

John R. Bolton, of Virginia, to be an Assistant Attorney General.

U.S. INTERNATIONAL TRADE COMMISSION

Anne E. Brunsdale, of the District of Columbia, to be a Member of the U.S. International Trade Commission.

DEPARTMENT OF COMMERCE

Paul Freedenberg, of Maryland, to be an Assistant Secretary of Commerce.

DEPARTMENT OF THE TREASURY

Francis Anthony Keating, II, of Oklahoma, to be an Assistant Secretary of the Treasury.

DEPARTMENT OF THE INTERIOR

Ralph W. Tarr, of Virginia, to be Solicitor of the Department of the Interior.

DEPARTMENT OF ENERGY

John C. Layton, of Virginia, to be Inspector General of the Department of Energy.

David M. L. Lindahl, of Virginia, to be Director of the Office of Alcohol Fuels.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

Ford Barney Ford, of Virginia, to be a member of the Federal Mine Safety and Health Review Commission.

NATIONAL MEDIATION BOARD

Walter C. Wallace, of New York, to be a member of the National Mediation Board.

Helen M. Witt, of Pennsylvania, to be a member of the National Mediation Board.

Charles L. Woods, of California, to be a member of the National Mediation Board.

DEPARTMENT OF EDUCATION

Bruce M. Carnes, of Virginia, to be Deputy Under Secretary for Planning, Budget and Evaluation, Department of Education.

Wendell L. Willkie, II, of the District of Columbia, to be General Counsel, Department of Education.

DEPARTMENT OF STATE

John Edwin Upston, of Virginia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Rwanda.

Rockwell Anthony Schnabel, of California, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Finland.

Margaret M. O'Shaughnessy Heckler, of Massachusetts, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Ireland.

Fred L. Hartley, of California, for the rank of Ambassador during the tenure of his service as Commissioner General of the U.S. Exhibition for the International Exposition, Vancouver, British Columbia, Canada, 1986.

U.S. ARMS CONTROL AND DISARMAMENT AGENCY

Michael H. Mobbs, of the District of Columbia, to be an Assistant Director of the U.S. Arms Control and Disarmament Agency.

U.S. INFORMATION AGENCY

Charles Edward Horner, of the District of Columbia, to be an Associate Director of the U.S. Informtion Agency.

SECURITIES AND EXCHANGE COMMISSION

Edward H. Fleischman, of New Jersey, to be a member of the Securities and Exchange Commission.

NATIONAL INSTITUTE OF BUILDING SCIENCES

Fred E. Hummel, of California, to be a member of the Board of Directors of the National Institute of Building Sciences.

THE JUDICIARY

Stanley Sporkin, of Maryland, to be U.S. district judge for the District of Columbia.

Alan B. Johnson, of Wyoming, to be U.S. district judge for the District of Wyoming.

J. Spencer Letts, of California, to be U.S. district judge for the Central District of California.

Dickran M. Tevrizian, Jr., of California, to be U.S. district judge for the Central District of California.

Harry D. Leinenweber, of Illinois, to be U.S. district judge for the Northern District of Illinois.

George H. Revercomb, of Virginia, to be U.S. district judge for the District of Columbia.

Duross Fitzpatrick, of Georgia, to be U.S. district judge for the Middle Ditrict of Georgia.

DEPARTMENT OF JUSTICE

Arnold I. Burns, of New York, to be Associate Attorney General.

MARINE MAMMAL COMMISSION

Robert Elsner, of Alaska, to be a member of the Marine Mammal Commission for the term expiring May 13, 1987.

DEPARTMENT OF COMMERCE

Alexander Hansen Good, of the District of Columbia, to be Director General of the United States and Foreign Commercial Services.

FEDERAL MARITIME COMMISSION

James J. Carey, of Illinois, to be a Federal Maritime Commissioner.

THE JUDICIARY

Harold L. Cushenberry, Jr., of the District of Columbia, to be an associate judge of the Superior Court of the District of Columbia.

Michael L. Rankin, of the District of Columbia, to be an associate judge of the Superior Court of the District of Columbia.

DEPARTMENT OF ENERGY

Sylvester R. Foley, Jr., of Florida, to be an Assistant Secretary of Energy (Defense Programs).

DEPARTMENT OF DEFENSE

Chapman B. Cox, of Virginia, to be an Assistant Secretary of Defense.

IN THE AIR FORCE

The following-named officers for appointment in the Reserve of the Air Force to the grade indicated, under the provisions of sections 593, 8218, 8373, and 8374, Title 10, United States Code:

To be major general

Brig. Gen. William G. Work, [redacted]FG, Air National Guard of the United States.

To be brigadier general

Col. Ray D. Airy, [redacted]FG, Air National Guard of the United States.

Col. John A. Slifer, Jr., [redacted]FG, Air National Guard of the United States.
Col. Thomas P. Webb, III [redacted]FG, Air National Guard of the United States.

The following-named officer under the provisions of Title 10, United States Code, Section 601, to be assigned to a position of importance and responsibility designated by the President under Title 10, United States Code, Section 601:

To be lieutenant general

Maj. Gen. Richard A. Burpee, [redacted]FR, U.S. Air Force.

IN THE ARMY

The following-named officer to be placed on the retired list in grade indicated under the provision of Title 10, United States Code. Section 1370.

To be lieutenant general

Lt. Gen. Robert L. Bergquist, [redacted] (age 54), U.S. Army.

IN THE NAVY

The following-named officer to be placed on the retired list in the grade indicated under the provisions of Title 10, United States Code, Section 1370.

To be vice admiral

Vice Adm. William P. Lawrence, [redacted]/1310, U. S. Navy.

The following-named captains of the line of the Navy for promotion to the permanent grade of rear admiral (lower half), pursuant to Title 10, United States Code, Section 624, subject to qualifications therefor as provided by law:

UNRESTRICTED LINE OFFICER

To be rear admiral (lower half)

Phillip Don Smith.
David Roland Morris.
Fredrick John Metz.
Edward Bigelow Baker, Jr.
Peter Gordon Chabot.
Jimmie Wilkes Taylor.
John Franklin Calhoun.
George Henry Strohsahl, Jr.
Jesse Jiminez Hernandez.
John William Bitoff.
David Michael Bennett.
Thomas Alexander Mercer.
Leighton Warren Smith, Jr.
Richard Chester Macke.
Henry Clayton McKinney.
David Rogers Oliver, Jr.
Kenneth Leroy Carlsen.
David Brooks Robinson.
George Washington Davis VI.
Arlington Fichtner Campbell.
Jerome Frost Smith, Jr.
Stephen Kent Chadwick.
Glenn Edward Whisler, Jr.
Craig Emery Dorman.
Geoffrey Lynn Chesbrough.
Grady Lee Jackson.
James Bernard Greene, Jr.
Joseph Paul Reason.

RESTRICTED LINE OFFICER—ENGINEERING DUTY OFFICER

To be rear admiral (lower half)

George Richard Meinig, Jr.
Walter Hollingsworth Cantrell.

AERONAUTICAL ENGINEERING DUTY OFFICER

To be rear admiral (lower half)

Larry Eugene Blose.

The following-named captains of the U.S. Navy for promotion to the permanent grade of rear admiral (lower half), pursuant to Title 10, United States Code, Section 624, subject to qualifications therefor as provided by law:

MEDICAL CORPS

To be rear admiral (lower half)

Russell Larry Marlor.
Daniel Barfield Lestage.
Donald Floyd Hagen.
William Arthur Buckendorf.

SUPPLY CORPS

To be rear admiral (lower half)

Brady Marshall Cole.
Peter Demayo.
Francis Leonard Filipiak.

CIVIL ENGINEER CORPS

To be rear admiral (lower half)

David Elliott Bottorff.
Jon Robert Ives.

DENTAL CORPS

To be rear admiral (lower half)

Milton Chipman Clegg.

MEDICAL SERVICE CORPS

To be rear admiral (lower half)

Donald Eugene Shuler.

The following-named officer, under the provisions of Title 10, United States Code, Section 601, to be reassigned to a position of importance and responsibility designated by the President under Title 10, United States Code, Section 601:

To be vice admiral

Vice Adm. Huntington Hardesty, [redacted]/1310, U.S. Navy.

The following-named officer, under the provisions of Title 10, United States Code, Section 601, to be reassigned to a position of importance and responsibility designated by the President under Title 10, United States Code, Section 601:

To be vice admiral

Rear Adm. James H. Webber, [redacted]/1440, U.S. Navy.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE AIR FORCE, ARMY, COAST GUARD, FOREIGN SERVICE, NAVY

Air Force nominations beginning Donald R. Klein, and ending Wesley G. Petty, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 6, 1985.

Army nominations beginning Mani Bala, and ending Alan F. Weir, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 6, 1985.

Army nominations beginning Benny L. Bachulis, and ending Anthony E. Curcio, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 9, 1985.

Coast Guard nominations beginning John J. Clare, and ending Robert P. Sniffen, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 6, 1985.

Coast Guard nominations beginning Barry R. Moore, and ending John H. Wigger, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 9, 1985.

Foreign Service nominations beginning Frank A. Padovano, and ending John E. Riesz, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 4, 1985.

Foreign Service nominations beginning Gerald W. Harvey, and ending Vincente Tang, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 4, 1985.

Navy nominations beginning Victor H. Ackley, and ending John E. Wilson, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 6, 1985.

Navy nomination of Donald F. Schorr, II, which was received by the Senate and appeared in the CONGRESSIONAL RECORD of December 11, 1985.

Navy nominations beginning Briana M. Albert, and ending Eric J. Zintz, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 11, 1985.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. BYRD. Mr. President, were the nominations confirmed en bloc?

The PRESIDING OFFICER. The Senator is correct.

Mr. BYRD. Mr. President, I move to lay the motion to reconsider on the table.

The motion to lay on the table is agreed to.

Mr. DOLE. I ask unanimous consent that the President be immediately notified that the Senate has given its consent to these nominations.

The PRESIDING OFFICER, Without objection, it is so ordered.

NOMINATION OF FRANK KEATING

Mr. BOREN. Mr. President, I rise to express my wholehearted support for the nomination of Mr. Frank Keating as Assistant Secretary of Treasury for Enforcement and Operations. I have long known him to be an able and dedicated public servant.

Since we were classmates in law school, I have respected Frank Keating for his unquestionable integrity and his commitment to the strict enforcement of the law. Through the years, he demonstrated those attributes in his capacity as a practicing attorney, as a State senator, and later as U.S. attorney. I have every confidence that he will continue to dedicate himself in a way that will make this

body proud to have confirmed his Presidential nomination.

We are fortunate to have such a man as Frank Keating willing to make the personal sacrifices that invariably accompany public service. I urge my colleagues to support it unanimously.

NOMINATION OF DAVID M.L. LINDAHL

Mr. McCLURE. Mr. President, on December 11, 1985 the Committee on Energy and Natural Resources, by a vote of 18 to 0, reported the nomination of David M.L. Lindahl, to be Director of the Office of Alcohol Fuels of the Department of Energy. Mr. Lindahl's nomination hearing was held on December 6. He has fully complied with the committee's rules requiring submittal of a financial disclosure report and a detailed information statement.

Mr. Lindahl's 13 years of experience with the Congressional Research Service as an energy policy specialist have provided him with extensive background knowledge of the alcohol fuel industry. In addition, for 2 years beginning in 1978, he served concurrently as a Federal representative for the National Petroleum Council. He has also worked for the U.S. Geological Survey and the Defense Intelligence Agency.

In his testimony before the committee, Mr. Lindahl described his view of the importance of alcohol fuels:

I believe alcohol fuels is a valued ingredient of our energy diversification efforts. It is an important component of energy security and our energy future. I am committed to a strong alcohol fuels alternative, and I look forward to working with Secretary Herrington towards helping fulfill the promise of this alternative fuel.

Mr. President, on behalf of the Committee on Energy and Natural Resources, I am pleased to recommend Senate approval of the Presidential nomination of David M.L. Lindahl for the position of Director of the Office of Alcohol Fuels of the Department of Energy.

NOMINATION OF BOBBY R. BALDOCK TO THE TENTH CIRCUIT COURT OF APPEALS

Mr. DOMENICI. Mr. President, it is a distinct pleasure to rise to commend the Senate's confirmation of the Honorable Bobby R. Baldock to a position on the U.S. Court of Appeals for the Tenth Circuit. It is a distinct pleasure because Judge Baldock is highly qualified for this position and because it is an uncommon privilege for a New Mexican to be accorded such an honor. As you know, New Mexico is relatively a new State, as States go, and we haven't had the opportunity to have many of our citizens serve on the court of appeals.

Let me share a story with you which illustrates how uncommon it is for a New Mexican to be nominated to the U.S. court of appeals. I am well aware that, by tradition, we Senators play a major role in the selection of Federal district court judges. In fact, we all know that it is very difficult for the President to get a district court judge approved if the Senator from the State opposes the nomination. But no New Mexican had ever been nominated for a court of appeals position in the 13 years in which I have served in this body, so I was unaware of the protocol of such nominations. I did not know that nominations to the court of appeals always have been the exclusive prerogative of the President. So when a New Mexican retired from the tenth circuit, I saw the vacancy and I really thought that the President had to appoint the person I wanted to the seat. It turns out that I was mistaken. But it just so happens that the man I thought ought to have the job is the man that the President wanted to nominate. Thus, the President did what I wanted him to do all along: He nominated the Honorable Bobby R. Baldock.

Let me point out that, not only does Judge Baldock have my support and the support of the President, but he has the support of the distinguished junior Senator from New Mexico and the support of all three members of the New Mexico delegation in the House of Representatives. So it is no surprise that the President did what I wanted him to do because it is clear to all concerned that Judge Baldock is the right man for this position. To illustrate my point, let me briefly summarize Judge Baldock's qualifications for you.

Judge Baldock has served as a judge of the Federal District Court of New Mexico since 1983. In his 2½ years on the bench, Judge Baldock has demonstrated that he possesses the qualities which are hallmarks of our American judiciary. His written opinions demonstrate research, analysis, and citation of the highest caliber. They are notable especially for their clarity, and occasionally for their humor, which should surprise no one who knows him. Judge Baldock's opinions highlight that he is a practitioner of judicial restraint and an advocate of judicial economy. He is protective of the right of access of litigants to the Federal courts, but dedicated to preserving federalism and the sovereignty of the States. He is sensitive to the separation of powers and the role of each of the branches of government. He is tough on crime, yet protective of the rights of criminal defendants. Judge Baldock's approach to law can best be characterized as nondogmatic and, above all, guided by commonsense.

Prior to assuming his place on the bench, Judge Baldock had a long and distinguished career as an attorney in Roswell, NM. He graduated from the University of Arizona School of Law in 1960, where he was on the law review and a member of Phi Alpha Delta Law Fraternity. Upon graduation, he entered private practice in Roswell with the firm that was to become Sanders, Bruin & Baldock when he became a partner in 1965. Judge Baldock remained with the firm until he was appointed to the district court in 1983.

Over the years, Judge Baldock has been involved with many professional organizations. He is a member of the State Bars of New Mexico and Arizona, the American Bar Association, and the New Mexico Trial Lawyers Association. He is a past president of the Chaves County Bar Association and has also served as a test grader for the New Mexico Board of Bar Examiners.

Although Judge Baldock was a distinguished trial attorney, he has taken an active role in examining and promoting alternative methods of dispute resolution. He has previously served on the New Mexico Medical-Legal Malpractice Panel and was a member of the American Arbitration Association. Currently, Judge Baldock serves as the New Mexico Federal Court Liason to the Alternative Methods of Dispute Resolution Committee of the State Bar of New Mexico.

Judge Baldock is noted for his service to his community. He was a charter member and chairman of the board of the Valley Bank of Commerce. For 9 years, he served with the New Mexico National Guard in the judge advocate's office. He has participated in a major way—as president, as chairman, or as board member—of the Roswell YMCA, the Eastern New Mexico State Fair Board, the Chaves County Cancer Crusade, the Roswell High School Booster Club, the Roswell chapter of Rotary International, and the Roswell Chamber of Commerce. He has been an active member of his church. Judge Baldock also has taken a particular interest in the well-being of our youth. In addition to his activities with the YMCA, he was director, manager, and coach of Roswell Little League for 10 years. For 18 years, he taught business law at Eastern New Mexico State University.

I have known Judge Baldock for many years. He is above all a very strong family man. I would be remiss if I didn't acknowledge the role his wife, Mary Jane, who everyone calls Spunky because of her vivacious personality, plays in his life. They are truly a team. They have been blessed with two fine sons, Bobby and Christopher. God willing, Judge Baldock will be on the bench for many years, as he is both young in age and young in spirit and he is dedicated to serving the cause of justice.

Let me say that the activities and achievements which I have mentioned today are just a small example of Judge Baldock's commitment and dedication to his work and his personal life. In sum, Judge Baldock is an outstanding individual, one who is

well-qualified, by temperament and experience, to meet the challenges and demands of the court of appeals. I commend the Senate on approving his nomination. I have no doubt that Judge Baldock will live up to the confidence and trust that this body has placed in him.

NOMINATION OF RALPH TARR

Mr. McCLURE. Mr. President, I urge the Senate to consent to the nomination of Ralph Tarr to be the Solicitor for the Department of the Interior. Mr. Tarr comes to the position well qualified to provide the advice which the Secretary of the Interior needs to fulfill his responsibilities for the programs within the Department. Mr. Tarr has complied with all of the requirements of the Senate and the Committee on Energy and Natural Resources. He testified before the committee on Wednesday, December 4, 1985, and has fully responded to all questions which members of the committee posed to him. Based on that record, the committee ordered the nomination favorably reported to the Senate on December 11, 1985, with a unanimous vote.

One issue which I feel should be addressed with respect to Mr. Tarr, and which obtains to almost any attorney who assumes Federal office, is the issue of recusal. There is a fine line which must be respected to preserve the integrity of the Government and at the same time provide to the Government the knowledge, experience, and leadership of nominees. When selecting a person to be the solicitor of an agency, you look not only to their general legal qualifications, but also to their experience and familiarity with the body of law which they must interpret. For most attorneys, the experience is gained in the practice of their profession, often in litigation against the very department which they will now serve. Mr. Tarr is no exception.

Water and water-related issues are perhaps the most complicated areas with which the Solicitor for the Department of the Interior must deal. They arise not only with respect to the Reclamation Program, but are also at the heart of many of our trust responsibilities for the Indian tribes. I would be very uncomfortable recommending to the Senate any nominee for this position who did not have some familiarity with this issue and certainly would not recommend a candidate who did not appreciate how complicated and fraught with controversy any water issue inevitably becomes. At the same time, I also want to be completely assured that the nominee will faithfully represent the Department and has appropriatedly considered the extent to which he must recuse himself from such issues. Mr. Tarr has done so.

The Westlands Water District of California is and has been the source of many issues affecting both Federal and State interests. Mr. Tarr at one point represented several farmers, some of whom were within the district, in litigation between the district and the Federal Government. At no time did he represent the district. Mr. Tarr made a complete and forthright explanation of his representation in that case. He has recused himself while at the Department of Justice from that case, and will continue to do so. Mr. Tarr's responses to questions for the record follow:

1. I wanted to clarify your answers to my questions regarding your future participation in matters involving the Westlands Water District.

(a) Will you recuse yourself from any participation in the case *Westlands Water District et al.* vs. *United States of America* (No. CV F-81-245-EDP)?

(b) Will you recuse yourself from any involvement in any future litigation involving the *Westlands Water District?*

Answer: (a) I am not familiar with the details of *Westlands Water District et al.*. v. *United States* (No. CV F-81-245-EDP). Based upon press reports concerning the issues of that case, however, there would appear to be no legal, ethical, or personal reason that would require my recusal from participation in the case if I am confirmed as Solicitor. As suggested in my testimony, I have never represented the Westlands Water District, and more specifically, I have never, nor I have been advised has my former law firm, been an attorney of record on behalf of any party in the case.

(b) Any such determination must be made on a case-by-case basis. The only case concerning which I have already made such a determination is the one I discussed during my testimony: *Pilibos* v. *Andrus* (No. F-78-62-CIV). I have recused myself from that case since coming to the government and will continue to do so, because I was counsel of record for plaintiff Pilibos in that case.

I can assure the Committee that, if confirmed as Solicitor, I will be vigilant in satisfying my ethical responsibilities as a lawyer and as an employee of the federal government. I will seek the assistance and advice of the Designated Agency Ethics Official in the Department to resolve any uncertainty I may have about the propriety of my participating in a particular matter.

In light of Mr. Tarr's responses and my own reading of the applicable Federal or professional ethical standards, I can find no reason for Mr. Tarr, as Solicitor of the Department of the Interior to disqualify himself from any case regarding reclamation law in general on the Westlands Water District. He must, of course, recuse himself from Pilibos versus Andrews.

I want to emphasize that I do not subscribe to any theory that a nominee must recuse himself from any area in which he is qualified to express an opinion. I want to state that explicitly for the record so that there is no uncertainty as to my expectations with respect to his future conduct. I concur fully in his statement of the circumstances which would lead to a future decision to recuse himself and I see no reason to question his integrity.

I would note that I also fully expect that he will immediately focus on the recent decisions by Judge Kane in Sierra Club versus John Block, et al., and Judge Pratt in National Wildlife Federation versus Robert F. Burford, et al., as well as the other significant issues which await the new solicitor. I wish Mr. Tarr well for he will have little time to relax. The job ahead of him will require all of his skills and patience. I believe he can do the job and I urge the Senate to consent to his nomination.

NOMINATION OF JOHN C. LAYTON

Mr. McCLURE. Mr. President, on December 11, 1985, the Committee on Energy and Natural Resources reported the nomination of John C. Layton to be inspector general of the Department of Energy. The vote was 18 to zero. Mr. Layton's nomination hearing was held on December 6. He has fully complied with the committee's rules requiring submittal of a financial disclosure report and a detailed information statement.

Mr. Layton is well qualified to be DOE's inspector general. He has served as the inspector general for the Department of the Treasury since September of last year, and he was deputy inspector general at NASA from 1983 to 1984. He has also worked as a special agent with the FBI for 8 years. Regarding his experience, Mr. Layton stated the following during his hearing:

My six years of experience in the Inspector General community has taught me that the Inspector General plays a critical role in assuring that tax dollars are spent in the most efficient manner possible and that government programs are free from fraud and waste. The nature of the position, as detailed by statute, and as it has evolved, places the Inspector General in a unique position, both as "independent" agency watchdog and as chief advisor to the Secretary on matters of program economy and integrity.

The duties of the inspector general are set forth in detail in the Department of Energy Organization Act. Mr. Layton described those responsibilities at his hearing:

The duties and responsibilities of the Department of Energy Inspector General are quite specific. He supervises and coordinates audit and investigative activities, as well as recommends policies and procedures to the Secretary of Energy for promoting economy and efficiency in the Department. The Inspector General is responsible for preventing and detecting fraud and abuse in the Department's programs and for identification of persons participating in fraud and abuse. Semi-annually, he reports a summary of his activities to the Secretary of Energy, Congress, and the Federal Energy Regulatory Commission.

Mr. President, on behalf of the Committee on Energy and Natural Resources, I am pleased to recommend Senate approval of the Presidential nomination of John C. Layton for the

position of inspector general of the Department of Energy.

EDWARD FLEISCHMAN: A WELCOME ADDITION TO GOVERNMENT

Mr. LAUTENBERG. Mr. President, I am pleased to rise in support of the nomination of Edward Fleischman of New Jersey to serve on the Securities and Exchange Commission.

Mr. Fleischman is an able, well-respected securities lawyer. He has practiced law with the Wall Street firm of Beekman & Bogue, and then Gaston Snow Beekman & Bogue for over 25 years. Those who know him well speak highly of his skills and integrity.

He has been an adjunct professor in securities regulation at New York University Law School, and has lectured and written on the subject. He has participated in a variety of American Bar Association committee activities, in an effort to assist practitioners and to improve the law in the area of securities regulation.

He will bring to the Commission experience, intelligence, and wisdom in the area of law and regulation that has a critical impact on capital formation, and the economy as a whole. Unfortunately, there are too few people like him, who are willing to leave prosperous careers in the private sector in order to apply their knowledge, and to make a contribution, to the work of government.

There are substantial issues that will come before the SEC during Mr. Fleischman's term. I understand that a comprehensive review of issues involving the area of takeovers and tender offers has been held off by the Commission Chairman, until vacancies on the Commission were filled. With Mr. Fleischman's confirmation, the Commission will finally be up to full strength.

Mr. President, the Securities and Exchange Commission has made a laudable effort in enforcing the law against insider trading. SEC enforcement actions have increased significantly since 1979. Yet, other enforcement, supervisory and regulatory matters are challenging the resources of the agency. Customer complaints and inquiries to the agency have doubled from 1979 to 1984. The number of companies registered under the Investment Company Act have gone up 200 percent. Broker dealer applications have gone up 100 percent. The number of registrations of initial public offerings is up 157 percent. The number of investor cases brought to securities dealers for arbitration has more than tripled.

I am hopeful that Mr. Fleischman will make a major contribution to fulfilling the Commission's mandate to police and regulate the securities industry, to protect the public, and to contribute to the maintenance of fair, orderly, and efficient capital markets essential to the health of our economy.

I support his nomination and urge my colleagues to confirm him.

DEANELL REECE TACHA NOMINATION TO BE A JUDGE OF THE TENTH CIRCUIT COURT OF APPEALS

Mr. DOLE. Mr. President, I am pleased and proud today to rise in support of the confirmation of Deanell Reece Tacha to serve on the 10th Circuit Court of Appeals. Joining me in my support for this outstanding nominee is my distinguished colleague from Kansas, Senator KASSEBAUM, and the many people throughout the State of Kansas who know and admire Deanell Tacha.

The nominee possesses excellent qualifications for the Senate's review and approval. Her background in law, teaching, college administration, Government and civic affairs is of the highest caliber. This background gives her the education, experience, discipline, and temperament needed for effective service on the Federal bench.

Deanell is a 1968 graduate of the University of Kansas. Among the many honors she received while attending Kansas University are her election to Phi Beta Kappa and Mortar board and her selection as an outstanding senior woman at the university and in the country.

While attending the Unviersity of Michigan Law School, she was a member of the student senate, competed successfully in moot court competition and served on the student-faculty admissions committee. She received her juris doctorate in 1971.

She was then appointed a White House fellow, in which capacity she directed a task force on lawyers and trial examiners designing an adjudication system as part of welfare reform legislation. She served in the office of the Secretary of Labor and represented the Secretary at several international meetings and conferences. She also was executive assistant to then Under Secretary of Labor for Manpower, Laurence Silberman, who the Senate recently confirmed to be a judge on the D.C. Circuit Court of Appeals.

Following her tenure at the Department of Labor, Deanell joined the faculty of the Kansas University Law School where she taught courses in administrative law, oil and gas, and communications law and directed the school's student legal aid program. In 1979 she was appointed the University's associate vice chancellor for academic affairs and in 1981, she assumed her current position as vice chancellor, which entails the supervision of all the university's academic programs and budgetary matters.

Her outside activities are too numerous to mention. Suffice it to say she has served on numerous law school and university committees, including the Blue Ribbon Committee on Freedom of Speech, Academic Affairs Affirmative Action, and Title IX Self-Evaluation. She has also been quite active on community- and State-based groups and organizations, including the Kansas Committee for the Humanities, the Kansas Women's Sports Advisory Committee, and a rape victim support service in Lawrence. In business affairs she has served on the boards of directors of Alliance Life Insurance Co. and the Lawrence Federal Savings and Loans Association.

Mr. President, I could go on for quite some time about the accomplishments of the nominee, but I will not belabor the point. I will simply reiterate my strongest support for this outstanding judicial candidate who, once confirmed by the Senate, will become only the second woman to be appointed to the 10th circuit bench and only the 17th in the 100 years since the circuit courts of appeal were established. I urge her prompt, unanimous approval by the full Senate and extend my deepest congratulations to her and her husband, John, and children, John, David, Sarah, and Leah.

IN SUPPORT OF THE NOMINATION OF STANLEY SPORKIN TO BE A U.S. DISTRICT JUDGE FOR THE DISTRICT OF COLUMBIA

Mr. PROXMIRE. Mr. President, it is with genuine enthusiasm and a feeling of personal affection that I lend my support to the nomination of Stanley Sporkin to be a U.S. district judge for the District of Columbia.

My Chairmanship of the Senate Banking Committee overlapped in large measure Stanley Sporkin's directorship of the Division of Enforcement of the Securities and Exchange Commission and a result I had numerous opportunities to work with and get to know him. Civil servants come and they go, but in my experience there has never been a more dedicated or effective public servant—or for that matter a more honest or compassionate one than Stanley Sporkin.

His outstanding career is documented by the many awards he has received. In 1979 Mr. Sporkin was a recipient of the President's Award for Distinguished Federal Civilian Service, the highest honor that can be granted to a member of the Federal career service. He received in 1978 the Rockefeller Award for Public Service from the Woodrow Wilson School of Public and International Affairs at Princeton University and in 1976 the National Civil Service League's Special Achievement Award. He has also been presented the Securities and Exchange Commission's Distinguished Service Award and Supervisory Excellence Award. In 1979 Mr. Sporkin was given the alumnus of the year award by Pennsylvania

State University. In 1981 Mr. Sporkin received the rank of the Meritorious Executive in the Senior Executive Service for sustained superior accomplishment in management of programs of the U.S. Government and for noteworthy achievement of quality and efficiency in the public service. In 1984 Mr. Sporkin received the Meritorious Officer in the Senior Intelligence Service Award for sustained superior accomplishments.

As the Chief of the Enforcement Division of the Securities and Exchange Commission Stanley Sporkin made his reputation as a fighter of corporate wrongdoing. Oftentimes he brought to justice prestigious corporations and white-collar businessmen who had run afoul of the law. But I have heard on excellent authority that in a number of instances the very lawyers who found themselves at the opposite end of the table of Stanley Sporkin were among his greatest admirers. I don't think any higher tribute can be paid a law enforcment official than to be respected by an adversary.

I think it is also fair to say that Stanley Sporkin attracted into Government some of the best talent the Enforcement Division of the SEC has seen in recent years and that his leadership of the division inspired many of the younger lawyers who worked with him and that morale at the Commission in the Enforcement Division was never higher than when he was there.

I have said it before and I will say it again: I think that this nomination is one of the best things President Reagan has done since he took office.

Stanley Sporkin's entire background attests to his qualifications for this position. He graduated Phi Beta Kappa from Pennsylvania State University. He graduated from Yale Law School. Afer graduate school he was a law clerk for two separate district court judges. He has trial experience and he has a proven record as being one of the toughest and fairest law enforcement officials ever to serve in the U.S. Government.

With respect to the judicial temperament he may be expected to bring to the job, one of this country's outstanding corporate securities lawyers has written:

> Mr. Sporkin reflects the very best qualities one could hope for in a judge. A man of great personal integrity, with a commitment to the highest professional ethics, I have watched Mr. Sporkin eschew prosecution where individuals claimed they had not been given a fair hearing, and I cannot recount the number of times Mr. Sporkin refused to pursue theories of law that he believed were not well grounded, either factually, or legally. In cases where violations of law had undoubtedly occurred, but unusual extenuating situations existed, Mr. Sporkin always found a way to effectuate the law's spirit, without crushing human spirit. It would be hard to characterize Mr. Sporkin as anything but committed to strong law enforcement, but never at the expense of human dignity, or individual liberties.

I think Harvey Pitt is right.

Mr. President, Stanley Sporkin's father was a judge in Philadelphia and I derive a great deal of satisfaction in helping to give a worthy son the opportunity to emulate his father.

I recommend this nomination to the full Senate without reservation or qualification and have no doubt that Stanley Sporkin will be an outstanding judge and a credit to our judiciary.

CONFIRMATION OF GARRETT BROWN TO THE U.S. DISTRICT COURT FOR THE DISTRICT OF NEW JERSEY

Mr. LAUTENBERG. Mr. President, I rise in support of the confirmation of Garrett Brown, who has been nominated to serve on the U.S. District Court for the District of New Jersey.

Mr. Brown is now acting Deputy Administrator of the Maritime Administration, where he previously served as chief counsel. He has also served as general counsel to the Government Printing Office.

Before 1981, Mr. Brown was engaged in the private practice of law in New Jersey. He was a partner in the Newark law firm of Stryker, Tams & Dill. Before entering private practice, he served as an assistant U.S. attorney for 4 years.

Mr. Brown has received high praise from those who have worked with him. If confirmed, he will be bestowed with the greatest honor of his career, and, I would say, the most profound responsibility and his greatest challenge. He will be charged with dispensing justice to all segments of our society—the poor, the accused, and the powerless, as well as the rich and powerful.

He will be charged with maintaining the public's respect for the law and the judicial system, while at the same time, not bending the law or the rights of individuals to popular opinion. Mr. Brown has expressed to me his appreciation of this responsibility.

Mr. President, New Jersey's courts are the most burdened in the third circuit. While the 14 district court judgeships assigned to the State are inadequate to meet the rising caseload, unfilled vacancies on the court have made matters worse. With Mr. Brown's confirmation, the State will have the benefit of its full complement of authorized judges.

Mr. Brown is an able, experienced practitioner. I am pleased his nomination has been confirmed.

INTERNATIONAL TELECOMMUNICATION CONVENTION (NAIROBI, 1982)

TAX CONVENTION WITH ITALY

TAX CONVENTION WITH CYPRUS

TAX CONVENTION WITH BARBADOS

Mr. DOLE. Mr. President, as in executive session, I ask unanimous consent that the following treaties on the Executive Calendar be considered at this time. Treaty documents numbered 99–6, International Convention with Nairobi; 98–28, Tax Convention with Italy; 98–32, Tax Convention with Cyprus; and 99–3, Tax Convention with Barbados.

Mr. BYRD. Mr. President, if I may respond to the distinguished majority leader's question in respect to the treaties, there is no objection on this side to the majority leader's request.

Mr. DOLE. I ask unanimous consent that the treaties be advanced through the various parliamentary stages up to and including the presentation of the resolutions of ratification; that all Foreign Relations Committee reported reservations and understandings be agreed to; and that there be 10 minutes of debate on the resolutions of ratification to the four treaties mentioned above, to be equally divided between the chairman of the Foreign Relations Committee and the ranking minority member or their designees.

Mr. BYRD. Mr. President, does the distinguished majority leader want to go forward with these today?

Mr. DOLE. Yes, Mr. President. I understand the distinguished chairman of the Foreign Relations Committee only asked that he might include a statement in the RECORD.

Mr. BYRD. Very well, Mr. President.

Mr. DOLE. Mr. President, I further ask unanimous consent that, following the conclusion or yielding back of time, the Senate proceed to vote on the resolutions of ratification, with one vote counting as four votes.

The PRESIDING OFFICER. Without objection, it is to ordered.

The resolutions of ratification are as follows:

RESOLUTION OF ADVICE AND CONSENT TO RATIFICATION TO THE INTERNATIONAL TELECOMMUNICATION CONVENTION—NAIROBI, 1982

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the International Telecommunication Convention, with Annexes, and a Final Protocol to the Convention, signed on behalf of the United States at Nairobi on November 6, 1982.

RESOLUTION OF ADVICE AND CONSENT TO RATIFICATION TO THE TAX CONVENTION WITH ITALY

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Convention between the Government of the United States and the Government of Italy for the Avoidance of Double Taxation with Respect to Taxes on Income and the Prevention of Fraud or Fiscal Evasion, together with a supplementary protocol and exchange of notes, signed at Rome on April 17, 1984, subject to the following: Understanding:

That the indirect credit available to a United States corporation with respect to dividends from a company which is a resident of Italy is not available if such company is a resident of the United States under United States law.

RESOLUTION OF ADVICE AND CONSENT TO RATIFICATION TO THE TAX CONVENTION WITH CYPRUS

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Convention between the Government of the United States and the Government of the Republic of Cyprus for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income, signed at Nicosia on March 19, 1984.

RESOLUTION OF ADVICE AND CONSENT TO RATIFICATION TO THE TAX CONVENTION WITH BARBADOS

Resolved, (two-thirds of the Senators present concurring therein), That the Senate advise and consent to the ratification of the Convention between the Government of the United States of America and the Government of Barbados for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income, together with a related exchange of notes, signed at Washington on December 31, 1984, subject to the following: Reservation.

That the words "voting power" in Article 10, paragraph 5 shall be construed to mean "voting power or value" for purposes of imposing the tax under section 531 of the Internal Revenue Code of 1954.

TAX TREATIES BETWEEN THE UNITED STATES AND ITALY, BARBADOS, AND CYPRUS

Mr. LUGAR. Mr. President, today the Senate is being asked to give its consent to the ratification of three bilateral tax treaties: an income tax convention and protocol with the Government of Italy [Treaty Doc. 98-28; Ex. Rept. 99-6]; an income tax convention with the Government of Cyprus [Treaty Doc. 98-32; Ex. Rept. 98-8]; and an income tax convention with the Government of Barbados [Treaty Doc. 99-3; Ex. Rept. 99-9].

These treaties are similar to those already in force between the United States and some 35 other countries. Generally speaking, these treaties provide that income earned by the national of one country in the other country will be taxed only once. Absent the treaties, in many cases this income would be taxed twice: Once in the country where it is earned and again by the home country of the national who earned it. Removing this burden of double taxation will encourage investment and otherwise promote economic cooperation between the United States and each of its treaty partners.

A second feature of these treaties is that they contain a number of provisions to reduce tax evasion and avoidance. The revenue authorities of each of our treaty partners will be able to share information with the Internal Revenue Service. Certain types of transactions, entered into only to avoid the payment of taxes, will no longer be permitted. These and other sections of the treaties will reduce opportunities for abuse.

The Committee on Foreign Relations reviewed these treaties at a hearing chaired by the distinguished Senator from Washington [Mr. EVANS]. Thanks to his leadership, the committee subsequently approved each of these treaties unanimously.

Mr. President, during the committee's deliberations on these treaties, the views of the Committee on Finance as well as those of the tax writing committee of the other body were solicited. The views of these two committee's are reflected in the reports filed by the Committee of Foreign Relations as well as the conditions attached to the resolutions of ratification. The Foreign Relations Committee appreciates the cooperation and assistance these two committees provided. The committee also thanks the staff of the Joint Committee on Taxation for its help.

Mr. President, I urge the Senate to approve these three treaties.

NAIROBI CONVENTION

Mr. PELL. Mr. President, I join with the chairman in support of the International Telecommunication Convention. This international agreement provides the legal basis for the International Telecommunications Union [ITU], which provides the framework for the orderly conduct of international telecommunications. The ITU, originally formed in 1932, is an amalgamation of earlier organizations developed by the international community over the past century to deal with questions of international telegraph, telephone, and radio communications. The purposes of the union are: (1) to maintain and extend international cooperation for the improvement and rational use of telecommunications of all kinds; (2) to promote the development of technical facilities and their most efficient operation with a view to improving telecommunication services and making these services generally available to the public; and (3) to harmonize the actions of nations in the attainment of those goals.

Mr. President, the ITU provides protection for U.S. Government and industry interests. Without the ITU, uses of the radio frequency spectrum and the geostationary orbit would be in disarray and conflict. Management of these resources would be extremely difficult, if not impossible, without recourse to a multilateral forum such as the ITU. Therefore, I urge my colleagues to support this Convention.

VARIOUS INCOME TAX TREATIES

Mr. President, today, the Senate is being asked to give its advice and consent to ratification of bilateral income tax treaties between the United States and Barbados, Cyprus, and Italy.

By and large, these treaties are similar to those already in effect between the United States and some 35 countries. The purpose of the pending treaties is to remove the burden of double taxation from U.S. persons and firms which may be doing business in another country and be subject to tax both there and in the United States on the same income. The treaties are also intended to provide U.S. persons with some certainty with respect to the rates at which various sources of income will be taxed. This will better enable U.S. citizens to make sound financial decisions. Finally, these treaties are intended to provide a framework by which tax officials in both countries can ensure that taxes are collected on those transactions which are subject to taxation, thereby thwarting tax evasion.

The Committee on Foreign Relations held hearings on all of these treaties and overwhelmingly recommended that the Senate give its advice and consent to ratification. I urge my colleagues to do so.

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. I request a division vote, and I yield back the time on this side, Mr. President.

Mr. BYRD. Mr. President, I yield back the time on this side.

The PRESIDING OFFICER. All time having been yielded back, the question occurs on the resolutions of ratification. A division is requested. Senators in favor of the resolutions of ratification will rise and stand until counted. (After a pause.) Those opposed will rise and stand until counted.

On a division, two-thirds of the Senators present having voted in the affirmative, the resolutions of ratification are agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolutions of ratification were agreed to.

Mr. BYRD. Mr. President, I move to lay the motion on the table.

The motion to lay on the table was agreed to.

DOD APPROPRIATIONS

Mr. PRYOR. Mr. President, in the next few hours the Senate will be taking up the Department of Defense appropriations which I assume is em-

bodied in the continuing resolution conference report. We have had a lot of discussion around here in the last several weeks about what the Gramm-Rudman amendment is going to do to the Department of Defense.

Now, Mr. President, this is a very major issue for Democrats, for the Republicans, for our country, and for this Congress. I rise this afternoon to pose some questions which I will ask the managers of the Department of Defense appropriation bill embodied in the continuing resolution. Whenever it comes up, whether it is Tuesday or Wednesday or Thursday, I am going to pose some questions and I want the managers, Mr. President, to be able to say that they have had ample time to consider my questions because I may be off base, but I do not think I am.

Mr. President, the House continuing resolution allowed $7.8 billion in transfers of previous year money for spending this year. The Senate bill comes along and allows $5.5 billion in these transfers to be spent this year.

Mr. President, from where did these billions of dollars come? It is very simple. They came from the funds in the Department of Defense that had been authorized, appropriated, but not spent—sitting there in an account or in several accounts and which were not obligated.

A great number of these dollars resulted from the fact that we over-appropriated to the Department of Defense because of inflation. We over-appropriated for inflation, inflation that never actually occurred.

And some of my colleagues have spoken at some length on this subject in the past.

When the House and Senate went to conference, the resulting conference report allowed zero dollars to be spent for transfers, but, Mr. President—and here is the clincher—the conference fenced $6.3 billion in previous year money identified as excess to current DOD needs.

Reportedly, this fenced $6.3 billion from past year accounts is available for subsequent supplementals and/or reductions, specifically when Gramm-Rudman hits us in February.

Does the Department of HHS have this same cushion that is brought forward to take care of Gramm-Rudman? Does the Department of Housing and Urban Development or the Commerce Department, or the U.S. Department of Agriculture? The answer, Mr. President, to the best of my knowledge, is "No." This, by the way, is the precise subject of a request that several other Senators and I have presented to the General Accounting Office. There is one department that today is going to be insulated, that is going to be protected from the claws of Gramm-Rudman. You guessed it, Mr. President. It is the Department of Defense. They have outfoxed us again—$6.3 billion carried over from previous years for a slush fund to pay the Gramm-Rudman bill for the Department of Defense. These, and some others, are the questions that I will ask the managers of the DOD bill when it comes to the floor of the Senate.

Another question is: Why is this $6.3 billion cushion being preserved for the Department of Defense? If all this money is excess to current needs, why is not this money being saved or, in other words, returned to the Treasury to reduce the deficit?

With all of this extra money floating around, with DOD awash in billions of dollars in unspent, unobligated funds in accounts, are we sure we have found all of it? Well, we found $6.3 billion of it. There might just be more laying around somewhere down there in unobligated accounts or in unused expenditures. I will be asking the GAO to look into exactly this question.

Mr. BYRD. Mr. President, will the Senator yield for a question?

Mr. PRYOR. I yield.

Mr. BYRD. I congratulate the Senator.

On two occasions at the White House, I told the President: "Mr. President, if you think for a moment that national defense is going to escape unscathed with the passage of Gramm-Rudman, you've got a big surprise."

Now that I have listened to the distinguished Senator from Arkansas, I am not so sure, after all, that the President is going to be surprised.

Mr. PRYOR. I might say to the distinguished Democratic leader that I do not know of another budget, other than the Department of Defense's, that will come before us that has this type of slush fund to accommodate Gramm-Rudman.

We heard, some weeks ago, Secretary Weinberger, to the effect that: "Oh, my goodness, Gramm-Rudman is going to close down the DOD. The Russians are going to be coming up the Potomac River the day after tomorrow if we pass Gramm-Rudman and have its claws into the money in the Department of Defense."

Even a larger question arises: We have found this $6.3 billion unspent. We are transferrring it now, it appears, to pay for Gramm-Rudman. My question is, how many more billions of dollars are unspent that we might actually save and help reduce the deficit? How much more from previous years? How much more from the fiscal year 1986 bill we are about to pass?

Mr. BYRD. Mr. President, will the Senator yield?

Mr. PRYOR. I yield.

Mr. BYRD. Does the Senator feel that, if the committees had held hearings on Gramm-Rudman, some of these moneys would have been discovered before now? Were there any hearings on Gramm-Rudman, any hearings in the Senate?

Mr. PRYOR. The Democratic leader is correct. There were no hearings, as I recall, on Gramm-Rudman. It came up one day, and I think they tried to pass it that same day.

Mr. BYRD. Did it not spring full flower here on the Senate floor?

Mr. PRYOR. It certainly did.

Mr. BYRD. Was there a committee markup?

Mr. PRYOR. There were weekend debates, Sunday debates. The "Sunday Afternon Debating Society" gathered, all 100 of us, to look at Gramm-Rudman.

Not to argue the merits or demerits of Gramm-Rudman; but if Gramm-Rudman is to apply, now that it has become law it should apply to all equally. The President signed it, by the way, in an almost top-secret ceremony. It was not publicized a great deal.

Mr. BYRD. There was not a Rose Garden ceremony.

Mr. PRYOR. It was too cold in the Rose Garden that day.

If Gramm-Rudman is to apply, then Gramm-Rudman must apply to all departments and all agencies equally, and there must not be any unequal treatment or an unfair advantage of one department over another or one function of Government over another. No department of agency should start out with a head start. It is this Senator's opinion that we have created just this situation.

We have insulated the Department of Defense from the Gramm-Rudman claws, we have isolated the Department of Defense from any real budget cuts. I think this is unfair.

This Senator may be proved wrong. If the managers of the bill come tomorrow or Wednesday or Thursday and can say, "Senator PRYOR, you are wrong," I will accept the fact that I am wrong.

From the past year's unobligated balances DOD, we have now created, in 1986, a slush fund of $6.3 billion to pay for Gramm-Rudman, so that the Department of Defense is not going to lose one paper clip. They have outfoxed us again, I say to the Democratic leader—the Department of Defense.

I hope I am wrong, and I hope that one of the managers will come to the floor today or tomorrow or Wednesday, during the debate, and say, "Senator PRYOR, you are wrong," and I will glady admit it. But I think these figures are right. If the conference report were available, I could speak with greater authority.

Mr. EXON. Mr. President, will the Senator yield for a question?

Mr. PRYOR. I am glad to yield to the Senator from Nebraska.

Mr. EXON. Mr. President, I say to my dear friend and colleague from Ar-

kansas that if he is accurate in telling the Senate what I am delighted to have brought to the attention of the U.S. Senate, this possible $6.3 billion slush fund—if he is accurate in his assessment, there is good news and there is bad news with regard to that, to use a cliche.

The bad part is that I do not know how many times we were all assured on the floor of the U.S. Senate, including a specific amendment offered by the junior Senator from Michigan, with regard to a mandatory, assured, guaranteed, 50-50 cut from domestic programs on one side and defense on the other. Of course, that was after more than half of the budget was essentially off limits. But the half of the budget that falls under Gramm-Rudman in this meat-ax approach guaranteed—I do not know how many times we heard that. Does the Senator mean to say that if this $6.3 billion slush fund to which he alluded is in fact the case, that means that the Senate was misled by the leaders into the position where 61 Members of the Senate, as I recall, voted for Gramm-Rudman under a false premise?

Mr. PRYOR. I respond to the Senator from Nebraska by saying that when Gramm-Rudman was discussed and debated and voted on, on this floor, we had not reached the final stage of the continuing resolution and the transferring of the $6.3 billion into what I call the Defense Department's Gramm-Rudman slush fund. So I am not saying that we were misled.

I am saying that something has happened that I want to look further into. I want to find the facts as they relate to the Department of Defense, and I want to know if the Department of Defense is going to be insulated, isolated, and removed from actually being cut like the rest of the Departments of Government in order to reduce the deficit.

Let me also say to my very good friend from Nebraska and to my very good friend the Democratic leader, the Senator from West Virginia, that I do not know that the Transportation Department has a slush fund to pay for Gramm-Rudman. I do not know that the Agriculture Department has a slush fund that we have built in to pay for Gramm-Rudman. I do not know that any of the public works projects or any other of the functions of Government have been granted a specific slush fund, so that we are going to be able to apply Gramm-Rudman but yet not have any meaningful effect on tightening up our belt.

So I say to my friend from Nebraska that what we have done—and I hope I will be proved wrong—is to have created a Gramm-Rudman slush fund account for the Department of Defense so that they will not have to tighten their belt and expend their money more wisely and efficiently, as the rest of the agencies and functions of Government will have to do. Under the fiscal policy being set, $435 hammers will continue to be possible.

Mr. EXON. Mr. President, will the Senator yield?

Mr. PRYOR. I yield.

Mr. EXON. A specific question: To the knowledge of the Senator from Arkansas, there is no Gramm-Rudman slush fund, billions of dollars or in any amount, for agriculture?

Mr. PRYOR. So far as I know, not 1 penny for agriculture. There is no slush fund to take care of Gramm-Rudman.

Mr. EXON. The bad news, I said a few moments ago, is that I feel that if the particular text of Gramm-Rudman has not been violated by this $6.3 billion slush fund that we are speculating may be the case—if that was not violated, certainly the spirit of that was violated, and there can be no question about that.

The good news, on the other hand, is that because the Senator from Arkansas has called this to our attention, I suspect that there will be a hue and cry: "Don't send this back to conference, because we want to go home for Christmas."

If we were to stay here, could we not amend and send them back in disagreement and take that $6.3 billion slush fund, which the Senator from Arkansas suspects is for defense only, and use that to make a dramatic reduction in the some $11 billion that we are told we will have to cut this spring?

The good news is that since the Senator has found it, and if Congress wishes to work its will, in the spirit of Gramm-Rudman, we could take that $6.3 billion slush fund which is not now appropriated and apply it to the horrifying $11 billion cuts that we are now told we will have to make sometime this spring.

Is that the good part of the equation?

Mr. PRYOR. The other option, I say to my friend from Nebraska is we could take that $6.3 billion, and whoever knows how much else, and we could apply it to the deficit. We could reduce the deficit by that much. That would be that much we would not have to cut.

The second thing we could do with that $6.3 billion is we could let that be a red flag to us to say if there is that much down in the Department of Defense in unexpended balances and accounts that are not obligated, then why do we not go back and look for more?

I think the Senator from Nebraska will well remember last spring when we were debating defense procurement and the reforms that we were attempting to adopt in order not to have any more Pentagon nightmares embarrassing ourselves, embarrassing the whole system because of the tremendous waste, I think the Senator from Nebraska will remember that all of a sudden Secretary Weinberger said: "Wait a minute. I have just found $4 billion that I did not know we had."

He said, "We did not know we had it."

How many more billions of dollars are down there? I am just very concerned. I am not raising an accusation this afternoon, I say to my friend from Nebraska and the Democratic leader. I am not making this as a statement of fact. I am just saying these are questions that I am going to ask when the DOD appropriation issue comes to the floor.

We did something else. Last May we debated for a whole day on this floor procurement reform: How to make those tax dollars go farther, how to keep these tremendous cost overruns from happening, how to really keep those Pentagon scandals that come out month after month from ever taking place again.

Well, the Senate beat back those major reforms. We adopted some minor reforms. It went to conference after the House had adopted major reforms, strong reforms that would have been meaningful. In conference, they were watered done. The conferees said, "Well, we do not have time to do this now, but when that appropriation bill for DOD comes into the Senate and to the House we are going to make certain that we have strong procurement reforms."

I say to my friend when the DOD appropriation conference report comes to the floor of the Senate if you can find one scintilla of a procurement reform in his legislation I will eat my hat because it is not in there. They have all been taken out, completely.

We have spent all of 1985 talking about how we are going to make those contractors honest, talking about how we are going to clean up that Pentagon, who we are going to stop buying $435 hammers, and all this business. Yet, here we are, almost Christmas Eve, and what have we done—not much. Just a few very weak proposals have made it into law. We have made a sham, and we have laughed, and we have made a mockery of procurement reform, and we today are also seeing, I am afraid to report, a $6.3 billion slush fund that is here for one reason and one reason only, and that is to keep the Department of Defense from having to sacrifice one paper clip toward the effects of Gramm-Rudman and the need for deficit reduction.

Mr. President, I yield the floor.

Mr. EXON. Mr. President, I thank my friend from Arkansas for his comments, and I am very pleased that I was here for the first beginning of a debate on Gramm-Rudman. I predict that there will be many hours, days,

months, perhaps years of debate on Gramm-Rudman and what it does or does not do, and that was one of the reasons that this Senator strongly opposed Gramm-Rudman as merely an instrument to break through the $2 trillion debt ceiling limit at the request of the President and that Gramm-Rudman was an escape valve to allow people to vote for the $2 trillion debt ceiling limit when otherwise those votes could not likely have been obtained at least in the Senate, very possibly in the House of Representatives.

So, at least the three of us who have spoken on this subject today can go down in history as the ones who were here when the first debate took place after the aftermath, the ruination aftermath of Gramm-Rudman, which I predict will come home to haunt us in many, many areas.

Mr. BYRD. Mr. President, anent Gramm-Rudman—in connection with which there were no Senate hearings, no Senate committee markup, no testimony given, no amendments offered in committee, nothing, it is just something that sprang full bloom right here on the Senate floor—there is a commonly known tune which I think is probably very fitting now for some who voted for Gramm-Rudman.

"I cried but my tears came too late."

Mr. PRYOR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. SASSER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. STAFFORD). Without objection, it is so ordered.

MICHAEL GREHL—A MEMPHIS TREASURE RETIRES

Mr. SASSER. Mr. President, I rise today to pay tribute to the career of a truly distinguished journalist and an extraordinary individual.

Last week, Michael Grehl retired from the Memphis Commercial Appeal. He had been its editor for 10 years. He came to Memphis in 1957—by way of Anchorage, AK—and through nearly 20 years, he helped to shape the consciousness of Memphis and of the Midsouth region.

Michael Grehl was a journalist's journalist. He began as an obit writer and worked his way up through every reporting and editing job in the newspaper business.

In each of those capacities, he held to the same principles. He was a stickler for detail. He was obsessed with accuracy. He was unmoved by special pleading. He was, quite simply, above fear or favor.

Mr. Grehl's strictness, his honesty, his devotion to the truth, have become virtual legends in Memphis, and they have given him a national reputation for maintaining the highest standards of journalistic integrity.

Throughout his working career, Mr. Grehl stood steadfastly for civil rights and equal justice. He despised ceremony without substance, and privilege without accomplishment. Above all, he fought tirelessly for the right of the people to know, and insisted on the responsibility of the journalist to inform.

His presence on a daily basis will be sorely missed by the journalistic community throughout the country, and he will always be remembered by the citizens of my own State for putting the demands of truthful, honest reporting above all personal or private motives.

But I am reassured that his sage counsel will continue to be available for those wise enough to seek it—and that includes this Senator, and I suspect many other people from all stations of life in Memphis and around the country.

I know my colleagues join me in wishing Mike Grehl a happy retirement. May he and his wonderful wife Audrey spend week after joyous week cruising their beloved Greek Islands.

Mr. President, I ask unanimous consent that the editorial about Michael Grehl, which appeared in the Commercial Appeal following his retirement, be printed in the RECORD. It is an eloquent testimonial to the work of a man who made a genuine contribution to the life of his city and the life of his profession.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

A FIGHTER RETIRES

The editor of The Commercial Appeal is not a distant, executive-suite presence, a disembodied voice of curt and abstruse memos interpreted down a chain of command.

The editor is a hands-on boss, a pervasive and persuasive personality, an active leader who puts his stamp on the newspaper.

That's the way it was under Edward Carmack, C. P. J. Mooney, Frank Ahlgren and Gordon Hanna.

That's that way it has been under Michael Grehl, who announced his retirement Wednesday.

The Commercial Appeal has been fortunate to have had superb editors over the years, men who set high standards and who had the talent and energy to lead by example. Grehl carried that heritage forward with a relentless commitment to excellence.

Grehl's retirement, however, is not so much an occasion for the newspaper's staff to reflect on his achievements as it is a mandate to assess the challenges that those achievements will continue to represent, like the beacon of the Scripps Howard Lighthouse.

When he came to Memphis in 1957 from Anchorage, Alaska, as a young reporter, Grehl did not know he would become The Commercial Appeal's editor. But he knew he wanted two things: to work for a great news-gathering organization and a widely respected newspaper and to understand the historic changes he sensed were taking place in the South.

Scripps Howard Newspapers and The Commercial Appeal met his first goal.

His passion for news and for the meaning of the news made him not only knowledgeable about but also keenly sensitive to the conflicts, strivings and potential of his adopted home.

Grehl's 10 years as editor of this newspaper were, in his words, "the best most satisfying years" of his career. It was a career of which any journalist could be proud, but which few journalists can duplicate.

Grehl taught many journalists their trade. More important, he taught them their calling—the honesty and fairness that should command their every professional act, the constant drive for improvement that should be their daily mission.

To some readers—even to some staff members—he may have seemed irascible and argumentative. He often said to his editorial page board. "What are you mad at today?," as if being mad and finding fault were the basic elements of the newspaper's opinion as expressed through its editorials.

But he also said often, "We can't always be mad at people."

There was no inconsistency.

He wanted editorials that said something of importance, that didn't wander aimlessly among "on the other hands," that were based on facts, that sopke simply and directly to readers about matters that affected them, that played no favorites, that excused no official failures or bunglings, that challenged men and women of influence to do their best for the community at large rather than for narrow interests. Being "mad" was a way of questioning everything, even the newspaper's policies.

He wanted editorials to be reasonable—up to a point. There were times when reason was not enough to express passionate convition. At those times he would thunder, "Can't we just say this is wrong and has to be fixed?

Grehl wanted to fix everything, but not just to be different or provocative.

Among his causes were these:

A State income tax, to be fair to taxpayers and to finance necessary public services, not just to expand State coffers.

Downtown redevelopment, to stimulate economic growth that would benefit all Memphians and Shelby Countians, not for the sake of nostalgia.

City-county consolidation, to create more effective decision-making, not for the sake of bigger government.

Social programs and civil rights legislation, to help the needy and to open up opportunities for all Americans to have fulfilling, productive lives, not because the programs could be characterized as "progressive."

Freedom of the press, to inform citizens of what was happening in their world, not—definately not—to assert privileges for the news media.

His goal was to enrich life, not to see the vindication of a pet idea or theory. He approached problems in search of realistic answers, not to justify proconceived ones.

Grehl is moving on to rest for a period beside a lake and to regain the strength that an editor's office consumes in a daily ritual of stress and aggravation. Severe illness had slowed him appreciably over the past year. But nothing was so characteristic

of him, perhaps, as his battle against that illness. It was a remarkable recovery, even if incomplete. It was the performance of a fighter.

He will continue to fight—to probe the meanings of the next chapter, to snap at whatever limits there may be, to gnaw on accepted wisdom and doctrinaire opinions and to dare all who will listen to question their own ideas and then to act with courage.

He will be mad at something, ready to argue with anyone and quick to support the underdog.

Those he has taught well will try to practice the same virtues at The Commercial Appeal as it ventures anew on the paths he marked. We can only hope to keep up with him.

VOLUNTARY AUTO RESTRAINT AGREEMENT WITH JAPAN

Mr. EAGLETON. Mr. President, in March 1985, I sharply criticized the administration's decision to abandon the voluntary auto restraint agreement with Japan in the absence of assurances that United States exports would have greater access to the Japanese market.

In a high-stakes poker game, which in many ways trade talks resemble, it isn't especially smart to lay your cards face up on the table before the betting begins.

That is precisely what we did when we dropped voluntary auto restraints without condition and without concession.

The results were predictable. Almost immediately, Japan announced that it would increase its shipment of autos to the United States by 25 percent in 1985 from 1.85 million units to 2.3 million units. At that figure, the Japanese share of the United States market would grow from about 18 to 22 percent.

According to press reports last week, an unidentified MITI official has said Japan will drop all restrictions on auto exports to the United States beginning March 1986. If that report is true—and it has not yet been officially confirmed—it is not inconceivable that Japanese penetration of our auto market could go as high as 30 percent in the next year or two. There are good reasons to expect such an import invasion.

First, Japan has a production capacity of approximately 12 million cars a year with a demand of only 3 million cars in its home market. Except for the United States, which now imposes no limit, export sales around the world are severely restricted by import quotas or domestic content requirements. Italy, for example, limits Japan to 2,000 vehicles a year. Great Britain restricts it to 11 percent of its market.

Second, not only is the United States the freest market in the world, it is also the most profitable. Despite a recent 16-percent reduction in the dollar's value over the yen, Japanese manufacturers have been able to maintain their prices in the United States market even while increasing sales volume. With the lifting of export restrictions, there will be intense competition among Japanese producers to capture an even larger share of the lucrative United States market.

Mr. President, the United States trade deficit with Japan in 1984 was $37 billion. This year, it will be $50 billion. Fully half of that deficit is in the automotive sector.

What has happened to United States sales to Japan during this time? Since the United States lifting of voluntary restraints, Japanese auto exports have increased at a $4 billion rate. United States exports to Japan, however, have been virtually flat. Complaints about Japan's restrictions on the export of United States leather goods, semiconductors, citrus, telecommunications equipment, et cetera, remain on the table, but unresolved issues.

Mr. President, Japanese auto exports to this country are speeding down a one-way street headed for a major collision with public sentiment in this country unless there is a recognition of the need for restraint and reciprocity. Congress will not sit by and should not sit by passively and allow the basic industry of this Nation to be destroyed by ungoverned trade exploitation.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

(Mr. BOSCHWITZ occupied the chair during the quorum call.)

Mr. BUMPERS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. Mr. President, what is the parliamentary situation?

The PRESIDING OFFICER (Mr. WARNER). The Chair advises the Senate that there is no pending business at the moment.

PREVENTION OF AIR DISASTERS

Mr. BUMPERS. Mr. President, I rise first to express my deep and profound sympathy to the families of the men who were killed in the tragic crash of the DC-8 taking off from Gander Airport in Newfoundland. I know that there was a memorial service held at Fort Campbell today, and I regret that some of us were unable to attend, but it is tragedy of mammoth proportions and my heart goes out to the families of all of those fine, fine men who died in that crash.

The way to make sure that neither I nor any other Member of the Senate ever again has to rise on the floor and express our sympathy to the families of men in a situation similar to this is to prevent it. The way not to experience a disaster is to make sure it does not happen.

Back in October 1983, the marine barracks in Lebanon were bombed by a terrorist, and the tragic loss of life there raised cries of negligence in the United States. I said at the time that I could not understand why the situation which occurred there could not have been foreseen. But I understand also that hindsight is always 20-20.

Now, in this instance, based on the superficial information I have about Arrow Air, the charter company that owned this flight, I cannot for the life of me understand why they were still flying for the Defense Department. But they have been doing a lot of business with the Defense Department. A lot of other charters do, too. The Army used 44 different charter airlines. Arrow, which is headquartered in Miami, flew 34 DOD charter flights in fiscal year 1985, and so far they have flown 16 in fiscal year 1986. Normally these domestic flights are handled by the Military Traffic Management Command; international flights are handled by the Military Airlift Command, but this particular flight was handled by the multinational force office in Rome, which was set up pursuant to the Camp David Accords.

Arrow moved about 7,000 passengers for DOD in fiscal year 1985, for which they were paid $1.6 million. Now, Arrow does not have any more charters scheduled for DOD in this year but they have three scheduled in January, one on January 11, one on January 15, and one on January 26, 1986. They have 14 planes: 3 727's, 1 DC-10, and 10 DC-8's. So far the only action that has ever been taken against them by the military was for a broken airconditioning system, torn carpets, and having dirty airplanes. But, Mr. President, Arrow has apparently paid $35,000 since 1984 to the Federal Aviation Administration in civil penalties for a variety of infractions: Bad recordkeeping, maintenance problems, flight time delays. What's more, their record in such matters has been worse than other airlines of the same size.

On November 15 of this year, one of their planes, transporting 128 marines, was leaving Grand Rapids, MI, for Toledo, OH, to pick up 124 soldiers from the Army. As they left Grand Rapids they put all the marines in the back of the plane because that would made it easier to board the soldiers in the front when they landed in Toledo. And so on takeoff the tail of the plane scraped the runway. Now, that is always a very dicey situation. But if that were not enough, the pilot did not even report the incident. Whether or not that plane and the plane that crashed at Gander are the same, I do

not know. There have been unconfirmed reports that it was. But I join my colleagues from Tennessee, Senators GORE and SASSER, in calling for a full-scale investigation. There were two investigations of Arrow underway at the time, one dealing with a situation where one or two maintenance people refused to sign off on some work, and the plane may have flown anyway. Furthermore, all of their DC-8's are technically in nonconformance. With FAR 36, the noise regulations. As a matter of fact, the noise regulation required that all older planes, chiefly 707's and DC-8's, either be retired or reengined with quieter engines by last January 1, 1985, and Arrow did not comply. Now they were granted an exemption, but the fact remains that our soldiers were being flown on aircraft with old jet engines that very few airlines still have.

Mr. President, the Government investigation ought to first determine whether or not these infractions were ever reported to either the Military Airlift Command, to the Military Traffic Management Command, and especially to the Multinational Force Office in Rome. If it was reported, why was Arrow permitted to continue flying charter flights for the Defense Department?

Second, there is a question, Was this the same plane that had had two aborted takeoffs in the past few months? Was it the same plane that scraped the runway? Was it a policy of Arrow when they were picking up troops at two different points to put all the troops in the back so it would be easier to load from the front. I would note that the civilian airlines on which I fly almost always put as many passengers in front as they can if it is not a full flight or if it is a light load.

Third, we should find out why the carrier was permitted to continue flying all their DC-8's, all apparently with old engines and in nonconformance with Federal regulations.

Mr. President, I have been in the Senate 11 years, and every time there is a tragedy—not of this magnitude, because we have not had many of this size—everybody comes over here to express their sorrow and then their outrage. It is a terribly frustrating thing to ask these questions about why 248 servicemen, the flower of American youth, are now dead, if it was not an unavoidable accident, and to say to all the parents of these men that if we make sure that this kind of negligence never occurs again, their sons would not have died in vain. But if we simply express our temporary outrage, calling for investigations and asking all the why-why-why's, then we know that this sort of thing is going to happen again.

Mr. President, I have made speeches many times about the Vietnam war. Terrible as it was, it could be the most productive war the United States ever fought, if we simply learn from it. History seems to show that we never learn anything from a war. As memories dim, people become anxious to find another war, because they do not remember how terrible wars are.

As memories dim here, sometimes people have a tendency to go back to the same old stand, doing business the same old way.

I hope there will be a very thorough investigation of that tragic plane crash. All the pinpointing of blame or indictments that might be handed down will not bring back those 248 men. But what we want to do is to make sure it does not happen again.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GOLDWATER). Without objection, it is so ordered.

REFERRAL OF S. 1574

Mr. SIMPSON. Mr. President, I ask unanimous consent that S. 1574, the smokeless tobacco health bill, be deemed to be referred to the Commerce Committee for 1 calendar day, and be placed back on the calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMPREHENSIVE SMOKELESS TOBACCO AND HEALTH EDUCATION ACT OF 1985

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate now turn to Calendar No. 448, S. 1574, smokeless tobacco.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 1574) to provide for public education concerning the health consequences for using smokeless tobacco products.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the bill which had been reported from the Committee on Labor and Human Resources with an amendment to strike out all after the enabling clause and insert the following:

S. 1574

That this Act may be cited as the "Comprehensive Smokeless Tobacco and Health Education Act of 1985".

PUBLIC EDUCATION

SEC. 2. (a)(1) The Secretary of Health and Human Services shall establish and carry out a program to inform the public of any changes to human health resulting from the use of smokeless tobacco products. In carrying out such program, the Secretary shall—

(A) develop educational programs and materials and public service announcements respecting the dangers to human health from the use of smokeless tobacco;

(B) make such programs, materials, and announcement available to States, local governments, school systems, and such other entities as the Secretary determines appropriate to further the purposes of this Act;

(C) conduct and support research on the effect of smokeless tobacco on human health; and

(D) collect, analyze, and disseminate information and studies on smokeless tobacco and health.

(2) In developing programs, materials, and announcements under paragraph (1), the Secretary shall consult with the Secretary of Education medical and public health entities, consumer groups, representatives of manufacturers of smokeless tobacco products, and other appropriate entities.

(b) The Secretary may provide technical assistance to States to assist such States in the development of educational programs and materials and public service announcements respecting the dangers to human health from the use of smokeless tobacco.

REPORT ON SMOKELESS TOBACCO AND HEALTH

SEC. 3. The Secretary shall transmit a report to the Congress not later than January 1, 1987, and biennially thereafter, containing—

(1) a description of the effects of health education efforts on the use of smokeless tobacco products;

(2) a description of the use by the public of smokeless tobacco products;

(3) an evaluation of the health effects of smokeless tobacco products and an identification of areas appropriate for further research; and

(4) such recommendations for legislation and administrative action as the Secretary considers appropriate.

SMOKELESS TOBACCO PRODUCTS PACKAGES

SEC. 4. (a) It shall be unlawful for any person to knowingly manufacture, package, or import for sale or distribution within the United States any smokeless tobacco product unless the package of the product bears, in accordance with the requirements of this Act, one of the following statements:

"WARNING: THIS PRODUCT MAY CAUSE MOUTH CANCER

"WARNING: THIS PRODUCT MAY CAUSE GUM DISEASE AND TOOTH LOSS

"WARNING: THIS PRODUCT IS NOT A SAFE ALTERNATIVE TO CIGARETTES".

(b) One of the statements required by subsection (a) shall appear in a conspicuous and prominent location on each package of a smokeless tobacco product, and shall appear in a conspicuous format and in conspicuous and legible type in contrast with all other printed material on the package.

(c) The statements required by subsection (a) shall—

(1) be randomly displayed by a manufacturer, packager, or importer of a smokeless tobacco product in each twelve-month period in as equal a number of times as is possible; and

(2) be randomly distributed in all parts of the United States in which such product is marketed.

(d)(1) Each manufacturer, packager, or importer of a smokeless tobacco product shall submit a plan to the Federal Trade Commission which specifies the method such manufacturer, packager, or importer

will use to display and distribute the statements required by subsection (a) in accordance with the requirements of subsections (b) and (c).

(2) The Federal Trade Commission shall approve a plan submitted by a manufacturer, packager, or importer of a smokeless tobacco product under paragraph (1) if such plan provides for the display and distribution on smokeless tobacco product packages of the statements required by subsection (a) in a manner which complies with this Act and the guidelines promulgated under section 6.

(e) This section and section 5 do not apply to a distributor or a retailer of any smokeless tobacco product which does not manufacture, package, or import smokeless tobacco products for sale or distribution within the United States.

ADVERTISING OF SMOKELESS TOBACCO PRODUCTS

SEC. 5. (a) It shall be unlawful for any manufacturer, packager, or importer of a smokeless tobacco product to knowingly advertise or cause to be advertised in the United States such smokeless tobacco product unless such advertisement bears, in accordance with this section, one of the statements specified in section 4(a).

(b) Each statement specified in section 4(a) shall be rotated every four months by the manufacturer, packager, or importer of smokeless tobacco products in an alternating sequence in the advertisements for each brand of a smokeless tobacco product, in accordance with a method prescribed by the Federal Trade Commission.

(c)(1) In the case of a printed advertisement of a smokeless tobacco product, one of the statements specified in section 4(a) shall appear on such advertisement in a conspicuous and prominent location and a conspicuous formal approved by the Federal Trade Commission, and in conspicuous and legible type in contrast with all other printed material in the advertisement.

(2) In the case of a radio or television advertisement of a smokeless tobacco product, one of the statements specified in section 4(a) shall be read once during the advertisement.

(d)(1) Each manufacturer, packager, or importer of a smokeless tobacco product shall submit a plan to the Federal Trade Commission which specifies the method such manufacturer, packager, or importer will use to rotate, display, and distribute in accordance with this Act the statements specified by section 4(a) in advertisements of smokeless tobacco products.

(2) The Federal Trade Commission shall approve a plan submitted by a manufacturer, packager, or importer of a smokeless tobacco product under paragraph (1) if such plan provides for the rotation, display, and distribution of the statements specified in section 4(a) on each advertisement of a smokeless tobacco product in a manner which complies with this Act and the guidelines promulgated under section 6.

REGULATIONS AND GUIDELINES

SEC. 6. (a) The Federal Trade Commission shall promulgate and periodically revise such regulations and guidelines as it may require to implement sections 4 and 5.

(b) Within 180 days after the date of enactment of this Act, the Federal Trade Commission shall promulgate guidelines with respect to—

(1) the display and distribution of the statements required by section 4(a) on packages of smokeless tobacco products; and

(2) the rotation, display, and distribution of the statements specified in section 4(a) on each advertisement of a smokeless tobacco product.

INGREDIENT REPORTING

SEC. 7. (a)(1) Each person who manufactures, packages, or imports smokeless tobacco products shall annually provide the Secretary with—

(A) a list of the ingredients added to tobacco in the manufacture of such products which does not identify the company which uses the ingredients or the brand of smokeless tobacco which contain the ingredients; and

(B) a specification of the quantity of nicotine contained in each such product.

(2) A person or group of persons required to provide information by this subsection may designate an individual or entity to provide the information required by this subsection.

(b)(1) At such times as the Secretary considers appropriate, the Secretary shall transmit to the Congress a report, based on the information provided under subsection (a), respecting—

(A) a summary of research activities and proposed research activities on the health effects of ingredients added to tobacco in the manufacture of smokeless tobacco products and the findings of such research;

(B) information pertaining to any such ingredient which in the judgment of the Secretary poses a health risk to users of smokeless tobacco; and

(C) any other information which the Secretary determines to be in the public interest.

(2)(A) Any information provided to the Secretary under subsection (A) shall be treated as trade secret or confidential information subject to section 552(B)(4) of title 5, United States Code, and section 1905 of title 18, United States Code, and shall not be revealed, except as provided in paragraph (1), to any person other than those authorized by the Secretary in carrying out their official duties under this section.

(B) Subparagraph (A) does not authorize the withholding of information provided under subsection (a) of this section from any duly authorized subcommittee or committee of the Congress. If a subcommittee or committee of the Congress requests the Secretary to provide it such information, the Secretary shall make the information available to the subcommittee or committee and shall, at the same time, notify in writing the person who provided the information of such request.

(C) The Secretary shall establish written procedures to assure the confidentiality of information provided under subsection (a) of this section. Such procedures shall include the designation of a duly authorized agent to serve as custodian of such information. The agent—

(i) shall take physical possession of the information and, when not in use by a person authorized to have access to such information, shall store it in a locked cabinet or file; and

(ii) shall maintain a complete record of any person who inspects or uses the information.

Such procedures shall require that any person permitted access to the information shall be instructed in writing not to disclose the information to anyone who is not entitled to have access to the information.

PENALTY

SEC. 8. Any person who is found to violate any provision of this Act shall be guilty of a misdemeanor and shall on conviction thereof be subject to a fine of not more than $10,000.

ENFORCEMENT

SEC. 9. The several district courts of the United States are invested with jurisdiction, for cause shown, to prevent and restrain violations of this Act upon application of the Federal Trade Commission or upon application of the Attorney General of the United States acting through the several United States attorneys in their several districts.

PREEMPTION

SEC. 10. (a) No statement relating to the use of smokeless tobacco products and health, other than the statements required by this Act, shall be required by any Federal agency to appear on any package or in any advertisement of a smokeless tobacco product.

(b) No statement relating to the use of smokeless tobacco products and health, other than the statements required by this Act, shall be required by any State or local law or regulation to be included on any package or in any advertisement of a smokeless tobacco product.

STUDY AND RECOMMENDATIONS

SEC. 11. After the Advisory Committee on the Health Consequences of Using Smokeless Tobacco appointed by the Surgeon General of the United States completes its study and report concerning the health consequences of using smokeless tobacco products, the Surgeon General shall review the findings and conclusions of such study. After the completion of such review, the Surgeon General, in consultation with the Federal Trade Commission, shall recommend to the Congress appropriate revisions to the statements specified in section 4(a). Any such recommendations shall be based on the findings and conclusions of such study.

DEFINITIONS

SEC. 12. For purposes of this Act—

(1) the term "package" means a pack, box, carton, can, or any other container of any kind in which smokeless tobacco is offered for sale, sold, or otherwise distributed to consumers;

(2) the term "person" has the same meaning as in section 3(5) of the Federal Cigarette Labeling and Advertising Act;

(3) the term "Secretary" means the Secretary of Health and Human Services;

(4) the term "smokeless tobacco" means any finely cut, ground, powdered, or leaf tobacco that is intended to be placed in the oral cavity; and

(5) the term "United States" has the same meaning as in section 3(3) of such Act.

EFFECTIVE DATE

SEC. 13. (a) Except as provided in subsection (b), this Act shall take effect one year after the date of enactment of this Act.

(b) Sections 2, 3, 4(d), 5(d), and 6 shall take effect on the date of enactment of this Act.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

Mr. HATCH. Mr. President, today we are considering S. 1574, the Smokeless Tobacco and Health Education Act of 1985. This bill, introduced by our colleague, Senator LUGAR and

myself, is an important first step toward educating the public about the health risks of smokeless tobacco products.

This bill requires warning labels on smokeless tobacco packages. It requires a warning to be read during each radio and television advertisement, and it requires a warning to be printed on all other advertisements. In addition, it will make the ingredients added to smokeless tobacco products be made available for research regarding their health effects.

There is now a pressing need for this legislation. Use of smokeless tobacco products is estimated to double between 1980 and 1990. Studies have shown that almost 10 percent of high school students regularly use smokeless tobacco products. In a recent study of the individuals who regularly use smokeless tobacco products, 88 percent started using these products before the age of 15, and 55 percent started before the age of 12. Among high school males, the number who regularly use smokeless tobacco products may actually be higher than the number who regularly smoke cigarettes. While the majority of teenagers know that cigarettes are dangerous, less than 40 percent are aware of the hazards of smokeless tobacco products.

I urge my colleagues to vote with me on this important piece of legislation.

Mr. DANFORTH. Mr. President, as chairman of the Senate Committee on Commerce, Science, and Transportation, I rise in support of S. 1574, the Comprehensive Smokeless Tobacco and Health Education Act of 1985. This measure has been referred to the Commerce Committee. The committee has reviewed S. 1574, and I commend the distinguished chairman and other members of the Labor and Human Resources Committee for their work on this important legislation and for their effort to promote disease prevention and health care with this bill.

Tobacco products are unique. Unlike many other products which may be hazardous only when misused, these products pose health hazards when used as intended, and S. 1574 is a timely and necessary effort to broaden public awareness of the particular health effects of smokeless tobacco use. There is a growing need for such legislation, because today more than 22 million Americans use smokeless tobacco products regularly, and the use of such products is increasing in popularity, particularly among young people, who regard them as a safe alternative to cigarettes.

In order to increase public awareness of the health consequences of smokeless tobacco use, S. 1574 imposes new warning requirements with respect to the labeling and advertising of smokeless tobacco products, and requires regulation and enforcement of these requirements by the Federal Trade Commission. Of course, such matters involving the labeling and advertising of consumer products and the authority of the Federal Trade Commission are within the jurisdiction of the Commerce Committee, and this committee has had a long history of involvement with legislation pertaining to the labeling and advertising of tobacco products.

Accordingly, Senator HOLLINGS, the ranking minority member of the Commerce Committee, and I are very pleased that S. 1574 has been referred to our committee and that we will have the opportunity to address any committee concerns in conference. We have, however, expedited our review of this legislation and have sought only a limited referral of S. 1574 because of the necessity to avoid delay of this important measure. Our committee was urged by both the smokeless tobacco industry and health interests to speed up review of S. 1574 and we have done so, working in cooperation with the Labor Committee, which has recognized the legitimate and significant jurisdictional interests of the Commerce Committee in this legislation and which has agreed to our request that Senator HOLLINGS and I participate as Commerce Committee conferees in any House-Senate conference with respect to this legislation.

Mr. President, Senator HOLLINGS and I thank the chairman of the Labor and Human Resources Committee, Senator HATCH, and the ranking minority member, Senator KENNEDY, for their cooperation and their recognition of our concerns. We hope that we can move ahead expeditiously with S. 1574 and that our colleagues will support this important legislation.

Mr. DANFORTH. Mr. President, as I have noted, I support S. 1574, and I compliment the distinguished chairman of the Labor and Human Resources Committee, as well as Senator LUGAR, the cosponsor of this bill, for their work on this legislation. However, as chairman of the Senate Committee on Commerce, Science, and Transportation, I would like clarification with respect to one matter of particular concern to the Commerce Committee.

It is my understanding that S. 1574 in no way addresses the question of product liability and is not intended to alter current product liability law with respect to the duties and rights of manufacturers and consumers of smokeless tobacco products—that S. 1574 leaves to the courts in each particular case the question of what significance will be given to the health warnings required by this legislation.

I would ask the chairman of the Labor and Human Resources Committee whether this understanding is correct, particularly in light of the language of the Labor Committee report on this issue.

Mr. HATCH. The distinguished chairman of the Commerce Committee is correct. S. 1574 is not intended to have any impact whatsoever upon current product liability law. On the contrary, I would like to stress on behalf of the Labor and Human Resources Committee, and as a matter of legislative history, that this legislation is not intended to alter or affect the current status of product liability law and is not intended to either enhance or diminish any rights, causes of action, or defenses available under current product liability law.

Senator LUGAR, as the original cosponsor of this legislation, would you agree that this is the intent of this measure?

Mr. LUGAR. I agree with that.

Mr. HATCH. Mr. President, I would like to add that the understanding of the chairman of the Commerce Committee is correct as a matter of legislative history, notwithstanding the first and fifth full paragraphs of page 14 of the Labor and Human Resources Committee report accompanying this legislation. It is not the intention or purpose of the bill or report to alter product liability law in any respect, whatsoever.

Mr. DANFORTH. I thank the chairman.

Mr. HATCH. Mr. President, if I may take this opportunity to clarify a few additional points. The first four paragraphs in the committee views section were inadvertantly repeated when the report was printed. The first four paragraphs in this section should be ignored.

In addition, the section on hearings says that this legislation extends the Comprehensive Smoking Education Act of 1984. This simply refers to the fact that many of the concerns, principles, and information which is applicable to the Comprehensive Smoking Education Act of 1984 is also applicable to smokeless tobacco. This legislation is not intended as an amendment to Public Law 98-474 or to adopt its legislative history.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill (S. 1574, as amended) was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SAVE FOR THE U.S.A. YEAR

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of House Joint Resolution 436, "Save for the U.S.A. Year," and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 436) to designate 1986 as "Save for the U.S.A. Year," and for other purposes.

There being no objection, the Senate proceeded to consider the joint resolution.

The PRESIDING OFFICER. The joint resolution is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the joint resolution.

The joint resolution (H.J. Res. 436) was ordered to a third reading, was read the third time, and passed.

DATE CHANGE FOR TRANSMITTAL OF A REPORT

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Foreign Relations Committee be discharged from further consideration of S. 1918, to change the date for transmittal of a report, and I ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 1918) to change the date for transmittal of a report.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 1918

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 713(d) of the International Security and Development Cooperation Act of 1985 is amended by striking out "December 31, 1985," and inserting in lieu thereof "October 1, 1986,".

(b) The amendment made by subsection (a) shall take effect as of December 30, 1985.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BILL HELD AT DESK—HOUSE CONCURRENT RESOLUTION 231

Mr. SIMPSON. Mr. President, I ask unanimous consent that once the Senate receives from the House of Representatives House Concurrent Resolution 231, commending the first teacher in space, it be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE FARM BILL

Mr. HELMS. Mr. President, I am receiving numerous inquiries from my fellow Senators and others interested in my assessment of the farm bill we are soon to consider.

It occurs to me that an assessment and brief explanation I have prepared may respond to most if not all of the questions I have received.

Therefore, I ask unanimous consent that a copy of my assessment and explanation, and a description prepared by the Committee on Agriculture be printed immediately following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CONFERENCE COMMITTEE PASSES FARM BILL

WASHINGTON.—The 1985 farm bill, approved unanimously Saturday night by the Senate/House conference committee, "is the beginning of a transition to market-oriented farm policy," in the view of Senator Jesse Helms of North Carolina, chairman of the Senate Agriculture Committee. Helms served as chairman of the conference committee.

Also, Helms says that the new farm bill (H.R. 2100) will restore the U.S. as a strong competitor in world markets and thereby increase exports of U.S. farm commodities. "No longer will our nation encourage farmers to produce commodities just to be sold to the government for storage," Helms said. "We're heading back to the free market concept which should never have been abandoned in the first place."

The 5-year bill reduces loan rates for wheat, feed grain, cotton, and rice, sets target prices for those program commodities, reauthorizes other commodity programs, extends and expands export programs of the U.S. Department of Agriculture, contains strong, new soil conservation provisions and improves the effectiveness of the credit programs of the Farmers Home Administration.

"This bill, as approved by the conference, is the beginning of a slow, but decisive, transition to market-oriented farm policy," said Senate Agriculture Committee Chairman Jesse Helms. "The significance of the 1985 farm bill is that Congress has begun the process of correcting the failures of past farm policies. A new era of hope is in store for American farmers.

"Passage of this legislation marks the starting point for the return of the American farmer as a strong competitor in world markets. By allowing for reductions in the basic price support mechanisms and giving the Secretary of Agriculture authority to make additional reductions when competitive conditions warrant, Congress has made a commitment to a vigorous export policy for U.S. agriculture.

"The bill sends a clear and unmistakeable message to countries which have been using export subsidies to unfairly increase their share of world markets: The American farmer is back as the major competitor in world markets," said Helms.

Helms said the loan rate reductions in the bill are supplemented by a strong export title which expands current export programs and creates new tools for the Secretary of Agriculture to use to promote U.S. exports.

"At the same time," said Helms, "farm income protection will be maintained at record levels in order to aid farmers financially during the transition to market-oriented pricing of their products.

"The problem is that those income protection mechanisms, are set at high levels, and in a way that directs billions of dollars in taxpayer subsidies to support the income of the largest and wealthiest farmers. In a time of massive budget deficits and the need to reduce those deficits, this kind of policy just doesn't make sense. These high support levels will also induce large surplus production, which can only delay for serveral years longer a solid recovery in the farm economy."

The projected cost of the Commodity Credit Corporation programs under the provisions of the bill are estimated to be about $52 billion in fiscal years 1986-1988.

"The bill makes historic reforms in conservation policy," said Helms. "It makes U.S. agriculture more efficient by protecting our soil and water resources and ensuring that the most productive land will be used, and not abused."

"Important reforms are even made in the dairy program. The price supports will be reduced over the life of the bill, reducing government costs, helping to balance supply and demand. I am extremely disappointed, though, at the imposition of a milk tax in the bill."

"Despite the shortcomings I have described, the bottom line is that this bill makes many significant and effective reforms in farm policy. It signals the intention of Congress to make a decisive transition to market-oriented farm policy. At the same time, there are important reforms yet to be made. Congress must continue to try to reduce the cost of farm programs by devising a way to more effectively limit large subsidies to those producers least in need of assistance," said Helms.

Major provisions of the bill include:

WHEAT AND FEED GRAINS

Basic initial loan rates for grains would start at $3.00 a bushel for 1986 wheat and $2.40 for 1986 corn. From 1987 on, loans for grains would be set each year at between 75 and 85 percent of the average price received by producers during the immediate preceding 5 marketing years, excluding the high and low years, with annual reductions limited to 5 percent.

After calculating the basic initial rates, the Secretary could then further reduce the rate for any year by up to 20 percent if (1) market prices in the previous seasons failed to top 110 percent of the previous year's basic loan rate, or (2) he determines that a further cut is needed to compete on world markets.

For the 1986 crop only, the Secretary would be required to use this authority to drop the loan at least 10 percent.

The Secretary would have discretionary authority to allow repayment of price support loans at levels which could be set as low as 70 percent of the original loan rate. The Secretary would have additional discretionary authority to give the producers one of two alternate types of marketing certificates to help promote exports.

Target price income protection would operate alongside whichever loan system was used, and any reduction below the basic initial loan rates would be offset by increased target price deficiency payments which would not be subject to payment limits.

Target prices, which provide direct payments to farmers when market prices are below the target rate, would be frozen at current levels ($4.38 a bushel for wheat and $3.03 a bushel for corn) through 1987. For the 1988 crop, the Secretary would have authority to set the target price level at not less than 98 percent of the 1986 level ($4.38 and $3.03); at not less than 95 percent for the 1989 crop; and at not less than 90 percent for the 1990 crop, but not to lower than $4 for wheat and $2.75 for corn.

To qualify for benefits in any years in which carryover wheat stocks exceed 1 million bushels, wheat producers would be required to reduce acreage as follows: in 1986, a maximum diversion of 25 percent; (including a mandatory minimum reduction of 15 percent, a mandatory in-kind paid diversion of 2.5 percent, and further discretion for reductions of 7.5 percent); in 1987, a maximum reduction of 27.5 percent (including a mandatory minimum reduction of 20 percent and a further 7.5 percent at the Secretary's discretion); and in 1988-90, a maximum of 30 percent (including a mandatory minimum of 20 percent and a further 10 percent at the Secretary's discretion). For the 1986 crop only, the Secretary would be required to offer growers who planted before announcement of the program a chance to idle 10 percent of their base in return for payments.)

For feed grains, if stocks exceed 2 billion bushels of corn, the 1986 reduction would be a maximum of 20 percent (including a mandatory minimum of 12.5 percent, a mandatory in-kind paid diversion of 2.5 percent, and further discretion for reductions of 5 percent. For 1987-90, the maximum would be 20 percent (including a mandatory minimum of 12.5 percent plus up to 7.5 percent at the Secretary's discretion).

For all grains, the Secretary would have the authority to offer producers a further, voluntary, paid diversion beyond the basic minimums in the bill.

The Secretary is required to allow haying and grazing on diverted acres in 1986, permit grazing in 1987-90 if state Agricultural Stabilization Committees request it. Current law gives the Secretary discretionary authority to permit haying in 1987-90.

The Secretary would have discretionary authority to offer producers a "Target Option Program" under which the individual grower's wheat target price would rise if he elected higher levels of acreage reduction or decline at lower acreage-cut levels. Also optional for the Secretary would be a plan varying target price levels for farms of different sizes an effort to concentrate benefits on medium-sized farms. For the 1986 crop, the Secretary would be required to pay part of the expected target price deficiency payments on an advance basis and to make part of the payment "in-kind."

Under the bill, the Secretary would have the discretionary authority to proclaim marketing quotas for wheat, and establish a mandatory acreage control program for wheat, subject to the approval of producers in a referendum.

The bill requires the Office of Technology Assessment to study Federal grain export quality standards. It also provides that 6 months after the study, the Agriculture Department would have to revise its export grading rules, in line with the study findings, to protect grain quality.

COTTON

The basic support loan rate is set at 55 cents per pound for 1986. In 1987 and thereafter for the life of the bill, the loan rates would be based on 85 percent of the world market price, with reductions limited to 5 percent annually, with a floor of 50 cents.

If the basic rate is not competitive on world markets, the Secretary would choose one of two alternate "market enhancement" plans for repayment of loans. Under one plan, he could lower the repayment rate by up to 20 percent, thus allowing farmers to redeem their crops and sell them at a competitive price. Under the second plan, repayment would be at rates varied periodically through the year to keep pace with world markets. In instances where world market levels fall below the new loan repayment levels, the Secretary would issue "in-kind" certificates to domestic and foreign buyers to bridge the gap between the effective support and the market.

Target prices would be frozen for the 1986 crop at the 1985 level of 81 cents per pound. For the 1986 crop, the Secretary would have the authority to set the target price at not less than 98 percent of the 1986 level (81 cents); at not less than 95 percent for the 1988 crop; at not less than 92 percent for the 1989 crop; and at not less than 90 percent for the 1990 crop.

To qualify for program benefits, producers would be required to divert up to 25 percent and the Secretary could offer a voluntary payment in kind supplemental diversion plan, including payments in kind, if greater acreage cuts were needed.

RICE

The basic loan rate would be set at $7.20 per hundredweight for 1986 and then based on 85 percent of the average market price in the past 5 years, excluding the high-low years, with annual reductions limited to 5 percent and a floor of $6.50.

The Secretary is required to permit repayment of the price support loan at the world market price, but for 1986 and 1987 not below 50 percent of the original loan rate, for 1986 not below 60 percent of the original loan, and for 1989 and therefore not below 70 percent of the original loan. Up to one-half of the difference between the original level and repayment level may be paid in negotiable in-kind certificates.

If the market price falls below the repayment level, the Secretary must issue in-kind marketing certificates to exporters bridging the gap between domestic and world prices. (The "marketing loan" plan under which growers can repay support loans at a reduced rate would be applied in the case of rice to the 1985 crop as well as the 1986-90 crops.)

Target prices would be frozen at $11.90 per hundredweight for the 1986 crop and then scaled down using the same formula as for cotton. (Percentages of 98, 95, 92, and 90 of the original level for the years 1987-90.) Producers who want to enter the program would be subject to acreage reductions of up to 35 percent. The Secretary could also offer a voluntary paid diversion program and make in-kind payments.

DAIRY

The bill retains the current $11.60 support price for 1986.

The Secretary is required to implement a whole herd buyout program for 18 months, under which producers—on a bid basis—may take their entire herds out of production. The program will be funded by a producer assessment of 40 cents per hundredweight.

The Secretary is required to purchase 400 million pounds of red meat for export and domestic feeding programs during the 18-month program.

The Secretary is required to implement orderly marketing provisions during the whole herd program.

On January 1, 1987, the Secretary is required to reduce the price support level by 25 cents per hundredweight, and is required to reduce the assessment to 25 cents per hundredweight.

The Secretary is required to reduce the price support level by 25 cents per hundredweight on October 1, 1987, at which time the assessment is terminated.

For the rest of the life of the bill—1988-1990—the Secretary is required to reduce the support price level by 50 cents per hundredweight if CCC purchases are projected to exceed 5 billion pounds. If CCC purchases are projected to be less than 2.5 billion pounds, the Secretary must raise the price support 50 cents per hundredweight.

Differentials used in setting minimum fluid milk prices in some marketing orders would be increased.

SOYBEANS

The bill continues the basic price support loan rate through 1986 and 1987 at the current minimum rate of $5.02 a bushel. For the next three years, rates would be based on an average market price formula with reductions limited to no more than 5 percent a year and with a floor of $4.50 per bushel. In all of the 5 years, the Secretary would have authority to reduce loan levels by an additional 5 percent if necessary to keep the crop competitive in world markets. The Secretary would also have discretionary power to allow repayment of loans under a "marketing loan" system.

SUGAR AND WOOL

The bill also generally extends current programs. The wool price support formula would be frozen for the life of the bill.

The sugar price support is maintained for the life of the bill at 18 cents per pound.

1986 import quotas, scheduled to expire September 30, would be extended for at least 3 months.

Beginning with the next quota year, the Secretary would be directed to operate the sugar program with quota levels which avoid any cost to the government. Also, beginning in the 1987 quota year, no import quotas can be given to a country that is a net importer of sugar unless the country can verify that it does not import any sugar produced in Cuba.

PEANUTS

The peanut program would be continued without major changes. Supports for peanuts grown within a domestic (food and seed) quota in 1986 would be set at the 1985 level plus any increase in the cost of production; for 1987 and thereafter for the life of the bill, such support levels would be adjusted to reflect increases in the cost of production, but not by more than 6 percent annu-

ally, and access to quota sales at the domestic support level would be broadened by sharing any growth in the quota between old and new growers. The bill sets a floor of 1.1 million tons (the statutory 1985 level) under the annual domestic peanut quota for the next 5 years, but provides the quota can increase if actual domestic needs grow.

HONEY

The price support would be reduced from the present level of 65 cents a pound to 64 cents for 1986 and 63 cents for 1987. In the following 3 years the Secretary would be authorized to provide reductions of up to 5 percent annually and to implement a marketing loan.

PAYMENT LIMITATIONS AND GENERAL COMMODITY PROVISIONS

The bill continues the present $50,000 annual per producer ceiling for program payments. Exempt from the ceiling would be: (1) target price payments required to offset support loan cuts below basic loan levels, (2) payments made under several program cost-reduction items which the bill provides for discretionary use by the Secretary, and (3) any gains farmers realize when paying off support loans at less than the initial loan level.

A $100,000 ceiling would be placed on disaster payments to producers of grains, cotton, and rice and similar disaster payments are authorized for the 1985-90 crops of soybeans, sugar beets, sugarcane and peanuts.

Advance deficiency payments would be required for the 1986 crops wheat, feed grains, cotton, and rice, and would be discretionary in future years for the life of the bill. The Secretary also would be given authority to make up to 5 percent of the total deficiency payment with surplus commodities.

New provisions for determining crop and total farm acreage bases are included, along with revisions in the farmer-owned grain reserve program, putting new limits on the program.

Also for the programs using target prices, the Secretary would have the discretion to make payments to producers who are eligible for loan and target price payments but agree to forgo those benfits.

A beef promotion board is established to administer a beef promotion program. The program will be funded by a $1 per head checkoff at the point of sale, including imported beef. A credit of up to 50 cents per head is provided for assessments paid to State beef councils. Provision is also made for refunds to producers and importers. The program will begin as soon as practicable, and a referendum of beef producers must be held within 22 months of the beginning of the program.

A similar pork promotion board is established to operate a pork promotion program, funded by a ¼ of 1 percent checkoff of the sales price of swine and imported pork products. The checkoff is refundable at the request of the producer until a referendum is approved by pork producers. A referendum must be held within 24 to 30 months of date of enactment of the bill.

EXPORT TITLE

Requires the Secretary to offer surplus commodities owned by the Agriculture Department to exporters, processors or foreign buyers to encourage the development and expansion of overseas markets for American crops including processed farm products. The Secretary would be directed to use $2 billion worth of commodities for the program over the next 3 years to counter unfair foreign trade practices and generally to make American products more competitive, and at least 15 percent of the program could to be devoted to exports of poultry, meat and meat products. To the extent practical, the Secretary must use the commodities in equal amounts in each of the 3 years.

Requires the Secretary of Agriculture to make available not less than $5 billion annually in short-term export credit guarantees for the life of the bill where such guarantees would improve the competitive position of American exports.

The Secretary is required to make not less than $325 million available annually in FY 86-88 in cash or in surplus commodities for direct export credits to counter the subsidies, import quotas or unfair trade practices of foreign countries. (The direct credits, whether in cash or in kind, could be used in so-called "blended credit" export programs.

Broadens the purposes for which an existing intermediate (3-to-10-year) export credit program can be used and directs the Secretary to make available intermediate loan guarantees of at least $500 million a year through 1988, with a ceiling in fiscal 1989 of $1 billion. A previously-authorized export credit revolving fund is reauthorized under the bill. Also, the Agriculture Department would be directed to operate a pilot test of barter programs with at least 2 countries to acquire strategic or other materials for which there are unmet national stockpile goals.

Requires the President to designate a Special Assistant for Agriculture Trade and Aid to improve coordination of federal agency programs in overseas food assistance.

Extends the Food for Peace program and provides that at least 75 percent of the foods shipped under the donation phase of the program must be in the form of processed, fortified or bagged products. For fiscal 1986, shipments under the donation phase would be maintained at the 1985 level of 1.8 million tons. The bill also authorizes expanded operations under a related program which provides surplus commodities for needy people abroad and it provides that not less than one-tenth of 1 percent of Food for Peace (PL 480) funds for fiscal 1986 and 1987 must be used for a farmer-to-farmer technical assistance program.

Authorizes the President to donate up to at least 75,000 and up to 500,000 metric tons of eligible section 416 or P.L. 480 commodities, or any combination thereof, in each of the fiscal years 1989-90 under a new Food for Progress program to promote private free enterprise policy and development. At least 75,000 tons of such commodities must be from section 416. In return for the commodities, the recipient country must promote economic freedom in the production of food for domestic consumption and must be able to use the donated commodities without disrupting its won agricultural markets.

A section on cargo preference regulations states that commodities exported under Public Law 480 (Food for Peace) and two other donation programs will be subject to a cargo preference floor starting at 60 percent in calendar 1986 and rising to 75 percent in 1988 and thereafter (in place of the current 50 percent). The bill provides that additional funds needed for these increases would come from the Department or Transportation and it exempts from cargo preference a number of commercial-style export and export credit programs operated by the Agriculture Department including blended credit programs. If the Transportation Department is not able to provide the needed funds, the new provisions would be shelved and existing law would come back into effect.

The bill requires the Secretary of Agriculture and the U.S. Trade Representatives to pursue agricultural trade consultations with major producing countries. Trade-related studies required by the bill include one to determine the impact on U.S. agriculture of Brazilian ethanol and another on specific unfair trade practices by foreign countries which affect American exports.

CONSERVATION

For highly erodible land which has not been cultivated since 1980, the bill provides a "sodbuster" program to discourage plowing up fragile soils. If a farmer planted a crop on fragile land in violation of the terms of the bill, he would lose price supports and other farm benefits for all of his crops in the year of the violation. Highly erodible land which was used for crops (or idled under a government acreage control program) between 1981 and 1985 would initially be exempt from the sodbuster penalties, but this "grandfather clause" exemption would disappear for any affected producer who fails to begin applying a conservation plan by 1990 or 2 years after completion of a soil survey of his land, whichever is later. Producers would have until 1995 to complete application of the conservation plan. A companion "swampbuster" provision would deny farm benefits to producers who convert wetlands to crop use in the future except in cases where the impact of the action is found to be minimal.

For highly erodible soils which are already in crop use, the bill provides a long-term Conservation Reserve program under which farmers would contract for periods of 10 to 15 years to return 40 to 45 million of such acres to less-intensive uses such as grass or trees, which in some cases may be used to establish shelterbelts. In return for compliance with the contracts, growers would get cash or "in kind" land rental payments (established on a bid basis) plus payments covering a part of the cost of needed land treatment measures. No more than 25 percent of the land in any county could be enrolled in the Reserve except in counties where the Secretary of Agriculture decides that higher levels would not hurt the county economy. There would be a $50,000 limit on annual payments to farmers under Reserve contracts.

The bill extends the Resources Conservation Act, requiring the Agriculture Department to produce assessments of soil and water resources in 1995 and again in 2005. A further section permits governors of states which have state laws to protect farmland from urban development to file suits in cases where the federal government has not followed procedures of a federal farmland protection law. (The federal law requires, among other points, that government agencies must consider alternatives before taking actions which result in shifting farmland to nonfarm use.)

The bill requires the Secretary of Agriculture to formulate plans and give technical assistance to property owners, state and local agencies, and interstate river basin commissions to protect the quality and quantity of subsurface water, reduce flooding hazards, and control salinity. The Secretary must report to Congress on this matter by February 15, 1987.

CREDIT AND RURAL DEVELOPMENT

The bill reauthorizes and in some cases revises federal farm credit and rural development programs. It requires the Secretary, through September of 1988, to operate a $490 million program under which the Agriculture Department and private lenders would share equally in the cost of reduction in interest rates for hard-pressed farmers who hold loans guaranteed by the Farmers Home Administration. The government could pay for 2 percent of the "buy-down," or one-half of the total, whichever was less.

The bill includes discretionary authority for a program of planting-season advance commodity loans to farmers beginning in 1986.

Authorization ceilings include annual caps for the 1986 through 1988 fiscal years of $3.48 billion for Farmers Home Administration farm operating loans with a phased shift from an equal division between direct and guarantee loans to a third-year division of $870 million for direct and $2.610 billion for guaranteed loans.

For farm ownership loans, the bill authorizes $520 million annually, beginning with an equal diversion between direct and guaranteed loans and ending with a third-year diversion of $130 million direct and $390 million in guarantees. (The Secretary is authorized to transfer up to 25 percent of each year's guarantee allocation into direct loans.)

For emergency disaster loans there would be ceilings of $1.3 billion in fiscal year 1986, $700 million in 1987 and $600 million in 1988. Under new changes contained in the bill, such disaster loans would no longer be available to those who can get credit elsewhere or beginning in 1987, to those who chose not to purchase crop insurance if it were available. In addition, FmHA disaster loans would now be restricted to not larger than family size farm operators.

For rural development programs, the bill authorizes $340 million annually for 3 years in direct water and waste disposal loans and $250 million annually in guaranteed industrial development loans plus $115 million in direct community facility loans. The bill also provides a new method of determining eligibility for water and sewer loans and grants based on community income and health and sanitary conditions.

A "clear title" provision in the bill is designed to protect buyers of farm products from challenges to the title to their purchases while still allowing lenders to protect their liens on farm products. States would be given 12 months to set up central registry systems for recording farm product liens, if they wish to do so.

Also, the Agriculture Department would be ordered to observe a number of new restrictions on the way it handles farmland acquired by the government in future foreclosures of FmHA loans. Among other provisions, USDA would be forbidden to sell such land if the sales would depress local farmland values, and first priority in any sales or leases would have to be given to operators of farms which are not larger than family size. In leases, the bill calls for giving priority to former owners of the land and sales prices must reflect the probable income the land can produce. Where FmHA-owned land is administered under management contracts, contracts must be let under competitive bids with preference to local small businessmen, and the use of conservation practices may be required on land which has been classed as highly erodible as a condition of sale or lease.

The bill allows the Secretary to acquire from FmHA borrowers who cannot repay their loans conservation, recreational or wildlife easements on land which has been in crops but is classed as wetland, upland, or highly erodible. In return, the Secretary could cancel part of the borrower's debt.

The Secretary would be given discretion to make loans to distressed FmHA borrowers who plant timber crops on marginal farmland which is security for their existing loans. The new credit, which would reamortize the old loans and would be limited to an overall total of 50,000 acres, would be repayable when the timber produces revenue or within 45 years.

The category of those eligible to borrow from cooperative banks of the Farm Credit System is expanded to include all rural utilities eligible to borrow from the Rural Electrification Administration.

The bill requires a study of procedures used by FmHA for farmer appeals when loan applications are rejected, and a further provision creates a new, speedier appeals system using informal meetings. Other amendments require FmHA to process loan applications within 60 days, to provide funds on approved loans within 15 days, and to continue the agency's small farmer training and technical assistance program.

RESEARCH

The bill authorizes a 3-year program of special grants for educational and counseling programs to develop income alternatives for producers who have been forced out of farming by economic stress. It also directs the Secretary of Agriculture to develop "appropriate controls" on the development and use of biotechnology in agriculture.

The bill also includes a provision urging USDA to emphasize, in its research and teaching programs, new technology suitable for small and moderate-sized farms. The Secretary of Agriculture would be directed to report on the feasibility of more complete studies of the relationship between diet and blood cholesterol in humans, and dietary calcium and its importance in human health and nutrition. The bill allows the Secretary to make cooperative, cost-sharing agreements with private agencies, organizations or individuals to develop new agricultural technology, authorizes research on new uses for farm and forest products, and directs the Secretary to conduct demonstration projects on the development or commercialization of crops that would supply strategic industrial products.

Federal agricultural research funding authorizations would be extended through 1990 with fiscal 1986 ceilings including $600 million for federal activities, $270 million for contributions to cooperative research in state experiment stations and $370 million for contributions to cooperative extension programs in states (with $10-$20 million annual increases in following years for the three programs), and $7.5 million annually for aquaculture research.

The bill authorizes competitive research grants at a level of $70 million for the period covered by the bill and for grants and fellowships for food and agricultural sciences education at an annual level of $50 million. It authorizes the Research Facilities Act for the period covered by the bill at a level of $20 million with a federal-state matching provision for facilities at state cooperative institutions. It reauthorizes the animal health and disease research advisory board and an authorization level of $25 million. It also authorizes permanent extension funding for the 1890 institutions and $10 million annually for 5 years for extension facilities. The bill establishes a new program of agricultural productivity research with demonstration projects to be conducted for a term of at least 5 years and to the extent practicable 12 to 15 years.

FOOD ASSISTANCE

The food program section of the bill extends the Food Stamp program for 5 years, improves some program benefits, and requires all states to set up special employment and training programs to help move jobless stamp recipients onto payrolls. The bill also extends for 2 years, through fiscal 1987, the Temporary Emergency Food Assistance Program authorizing distribution of government surplus foods to the needy.

Among the food stamp changes adopted were an increase in work incentives by revising the "earned income" deduction used in calculating stamp benefits; changes in assets limitations to make the program more accessible to working poor households; an increase in the excess shelter cost deduction to the Food Stamp Program operations; and action to strengthen program accountability and management.

Other food assistance provisions in the bill would extend the Commodity Supplemental Food Program for women and young children for 5 years and broaden the program to serve elderly persons in cases where this would not deny benefits to women and children. The bill also would authorize increased nutrition education for low-income people and strengthen current efforts to monitor nutrition of low-income people.

OTHER PROVISIONS:

The bill provides that in order to prevent damage to older gasoline engines used on many farms, the Environmental Protection Agency must not reduce the lead limit in gasoline to below 0.1 gram per gallon until Jan. 1, 1988. In the interim, the Agriculture Department and EPA would make a study of the need for lead in engines, completing the study by Jan. 1, 1987 and reporting within 6 months on whether it would be appropriate to modify the general lead-limit rules in the case of gasoline used for farming purposes.

Another provision bans imports of Fluecured or Burley tobacco which does not pass U.S. pesticide residue tests applying to American-grown tobacco. Also, the bill directs the Agriculture Department to continue a program of random checks to determine if imported Canadian potatoes meet U.S. standards.

A ban for a total for 5 years is placed on price supports and certain other farm benefits for person convicted of growing or storing "controlled substance" drugs; requires tobacco importers, in addition to reporting the country of origin of the project, to also indentify the intended U.S. purchaser; authorizes watermelon producers to adopt a checkoff program to finance research and promotion; and directs the Secretary to conduct a pilot project under which wheat, cotton, feed grain and soybean growers in at least 40 counties would test a program of using futures or options markets to protect their incomes (with participating producers assured by the USDA that their returns could not fall below support loan levels).

An animal welfare title revises standards for the humane handling of animals by research facilities, dealers and exhibitors. It directs the Secretary to develop standards with minimum requirements in areas including housing, feeding, shelter, veterinary

care and experimental procedure that minimize pain and distress.

Changes would be made in the federal Virus-Serum-Toxin Act, a law which regulates veterinary biologics, to give the Agriculture Department control over intrastate as well as interstate sales, but would allow states which have effective regulatory systems to retain them. Intrastate producers would be given up to 4 years to comply with Federal regulations.

Other provisions in the bill: require the Secretary to give 60 days notice to the Senate and House agriculture committees before he acts to terminate marketing orders for non-price supported crops; require the Secretary to designate 3 administrative areas for the selection of community Agricultural Stabilization Committees in all counties with some exceptions such as in counties with less than 150 farmers, in which case only a single area is required; and require the Secretary to control grasshoppers and Mormon crickets on federal rangeland.

MESSAGES FROM THE HOUSE

ENROLLED JOINT RESOLUTIONS SIGNED

At 12:33 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the Speaker has signed the following enrolled joint resolutions:

S.J. Res. 32. Joint resolution to authorize and request the President to designate September 21, 1986, as "Ethnic American Day";

S.J. Res. 70. Joint resolution to proclaim March 20, 1986, as "National Agriculture Day"; and

S.J. Res. 213. Joint resolution to designate January 19 through January 25, 1986, "National Jaycee Week".

At 4:13 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House agrees to the amendment of the Senate to the bill (H.R. 3384) to amend title 5, United States Code, to expand the class of individuals eligible for refunds or other returns of contributions from contingency reserves in the employees health benefits fund; to make miscellaneous amendments relating to the civil service retirement system and the Federal Employees Health Benefits Program, and for other purposes, with amendments, in which it requests the concurrence of the Senate.

The message also announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 1344. An act to provide for the restoration of Federal recognition to the Ysleta del Sur Pueblo and the Alabama and Coushatta Indian Tribes of Texas, and for other purposes;

H.R. 2182. An act to authorize the inclusion of certain additional lands within the Apostle Islands National Lakeshore;

H.R. 2787. An act to extend through fiscal year 1988 SBA pilot programs under section 8 of the Small Business Act;

H.R. 3570. An act to amend title 28, United States Code, to reform and improve the Federal justices and judges survivors' annuities program, and for other purposes;

H.R. 3837. An act to extend the deadline for the submission of the initial set of sentencing guidelines by the U.S. Sentencing Commission, and for other purposes; and

H.R. 3917. An act to extend the period allowable for compliance with certain financial responsibility requirements applicable to land disposal facilities under the Solid Waste Disposal Act.

The message further announced that the House has agreed to the following concurrent resolutions, in which it requests the concurrence of the Senate:

H. Con. Res. 57. Concurrent resolution encouraging private sector involvement in the worldwide effort to alleviate hunger;

H. Con. Res. 211. Concurrent resolution in support of universal access to immunization by 1990 and accelerated efforts to eradicate childhood diseases; and

H. Con. Res. 245. Concurrent resolution congratulating the President-elect of Guatemala, Marco Vinicio Cerezo, on his election and expressing the support of the Congress for the new Government of Guatemala that will be inaugurated on January 14, 1986.

At 5:51 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill, without amendment:

S. 1621. An act to amend title 25, United States Code, relating to Indian education programs, and for other purposes.

The message also announced that the House has passed the following joint resolution, in which it requests the concurrence of the Senate:

H.J. Res. 485. Joint resolution waiving the printing on parchment of enrolled bills and joint resolutions during the remainder of the first session of the Ninety-Ninth Congress.

ENROLLED BILL AND JOINT RESOLUTION SIGNED

The message further announced that the Speaker has signed the following enrolled bill and joint resolution:

H.R. 2694. An act designating the United States Post Office Building located at 300 Packerland Drive, Green Bay, Wisconsin, as the "John W. Byrnes Post Office and Federal Building"; and

H.J. Res. 450. Joint resolution to authorize and request the President to issue a proclamation designating April 20 through April 26, 1986 as "National Organ and Tissue Donor Awareness Week".

The enrolled bill and joint resolution were subsequently signed by the President pro tempore [Mr. THURMOND].

MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 1344. An act to provide for the restoration of Federal recognition to the Ysleta del Sur Pueblo and the Alabama and Coushatta Indian Tribes of Texas, and for other purposes; to the Select Committee on Indian Affairs.

H.R. 2182. An act to authorize the inclusion of certain additional lands within the Apostle Islands National Lakeshore; to the Committee on Energy and Natural Resources.

H.R. 2787. An act to extend through fiscal year 1988 SBA pilot programs under section 8 of the Small Business Act; to the Committee on Small Business.

H.R. 3570. An act to amend title 28, United States Code, to reform and improve the Federal justices and judges survivors' annuities program, and for other purposes; to the Committee on the Judiciary.

H.R. 3917. An act to extend the period allowable for compliance with certain financial responsibility requirements applicable to land disposal facilities under the Solid Waste Disposal Act; to the Committee on Environment and Public Works.

The following concurrent resolutions were read, and referred as indicated:

H. Con. Res. 57. Concurrent resolution encouraging private sector involvement in the worldwide effort to alleviate hunger; to the Committee on Foreign Relations.

H. Con. Res. 211. Concurrent resolution in support of universal access to immunization by 1990 and accelerated efforts to eradicate childhood diseases; to the Committee on Foreign Relations.

H. Con. Res. 245. Concurrent resolution congratulating the President-elect of Guatemala, Marco Vinicio Cerezo, on his election and expressing the support of the Congress for the new government of Guatemala that will be inaugurated on January 14, 1986; to the Committee on Foreign Relations.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-2123. A communication from the Assistant Administrator of the Environmental Protection Agency (Pesticide and Toxic Substances), transmitting, pursuant to law, two final rules under the Federal Insecticide, Fungicide, and Rodenticide Act; to the Committee on Agriculture, Nutrition, and Forestry.

EC-2124. A communication from the Assistant Administrator of the Environmental Protection Agency (Pesticides and Toxic Substances), transmitting, pursuant to law, a final rule under the Federal Insecticide, Fungicide, and Rodenticide Act; to the Committee on Agriculture, Nutrition, and Forestry.

EC-2125. A communication from the Assistant Administrator of the Environmental Protection Agency (Pesticides and Toxic Substances), transmitting, pursuant to law, a final policy issued by the Agency under the Federal Insecticide, Fungicide, and Rodenticide Act; to the Committee on Agriculture, Nutrition, and Forestry.

EC-2126. A communication from the Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a cumulative report on budget rescissions and deferrals dated December 1, 1985; pursuant to the order of January 30, 1975, referred jointly to the Committee on the Budget and the Committee on Appropriations.

EC-2127. A communication from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting, pursuant to law, a report on the conversion of the Operation and Maintenance of Oceanographic

Survey Ships of the Military Sealift Command, Oakland, California, to performance under contract; to the Committee on Armed Services.

EC-2128. A communication from the President and Chairman of the Export-Import Bank of the United States, transmitting, pursuant to law, a report on loan, guarantee, and insurance transactions supported by Eximbank during September 1985 to communist countries; to the Committee on Banking, Housing, and Urban Affairs.

EC-2129. A communication from the Acting Commissioner of the Bureau of Reclamation, Department of the Interior, transmitting, pursuant to law, a copy of the conformed supplemental repayment contracts to repay up to an additional $335 million of municipal and industrial water costs in the Bonneville Unit, Central Utah Project, Utah; to the Committee on Energy and Natural Resources.

EC-2130. A communication from the Executive Director of the Committee for Purchase From the Blind and Other Severely Handicapped, transmitting, pursuant to law, a report on the system of internal controls and accounting procedure of the Committee; to the Committee on Governmental Affairs.

EC-2131. A communication from the Director of the Office of Congressional Affairs, Equal Employment Opportunity Commission, transmitting, pursuant to law, the annual report of the Commission under the Government in the Sunshine Act for calendar year 1984; to the Committee on Governmental Affairs.

EC-2132. A communication from the Director of Selective Service, transmitting, pursuant to law, notice of a computerized matching of individual records of the System with records of other Federal and non-Federal agencies; to the Committee on Governmental Affairs.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-543. A resolution adopted by the City Council of Ukiah, California, favoring the retention of the deductibility of State and local taxes; to the Committee on Finance.

POM-544. A concurrent resolution adopted by the General Assembly of the State of Colorado; to the Committee on the Judiciary.

"HOUSE CONCURRENT RESOLUTION No. 1008

"Whereas, The First Congress of the United States of America, at its first session, sitting in New York, New York, on September 25, 1789, in both Houses, by a Constitutional majority of two-thirds thereof, has proposed an amendment to the Constitution of the United States of America in the following words, to wit:

"Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, two-thirds of both House concurring, That the following (Article) be proposed to the legislatures of the several states, as (an Amendment) to the Constitution of the United States, . . . which (Article), when ratified.

* * * * *

"Therefore, Be It Resolved by the Fifty-fourth General Assembly of the State of Colorado, That the said proposed amendment to the Constitution of the United States of America be and the same is hereby ratified by the General Assembly of the State of Colorado.

"Be It Further Resolved, That a copy of the foregoing preamble and resolution be transmitted to the Administrator of General Services of the United States, which copy shall be certified by the President of the Senate, attested by the Secretary of the Senate, and certified by the Speaker of the House of Representatives, attested by the Chief Clerk of the House of Representatives, of the Fifty-fourth General Assembly of the State of Colorado.

"Be It Further Resolved, That the General Assembly of the State of Colorado urges the state legislatures of those states which have not done so to follow Colorado in ratifying the proposed amendment and that, as an incentive for them to do so, copies of the foregoing preamble and resolution be transmitted to said state legislatures."

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. ROTH, from the Committee on Governmental Affairs:

J.H. Tyler McConnell, of Delaware, to be a member of the Board of Governors of the U.S. Postal Service for the remainder of the term expiring December 8, 1988;

Robert Setrakian, of California, to be a member of the Board of Governors of the U.S. Postal Service for the remainder of the term expiring December 8, 1993.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

REPORTS OF COMMITTEES

The following reports of committees were submitted:

Mr. ANDREWS, from the Select Committee on Indian Affairs, with an amendment in the nature of a substitute:

S. 1298: A bill to coordinate and expand services for the prevention, identification, and treatment of alcohol and drug abuse among Indian youth, and for other purposes (Rept. No. 99-223).

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, without amendment:

S. 1574: A bill to provide for public education concerning the health consequences of using smokeless tobacco products.

FOREIGN CURRENCY REPORTS

In accordance with the appropriate provisions of law, the Secretary of the Senate herewith submits the following report(s) of standing committees of the Senate, certain joint committees of the Congress, delegations and groups, and select and special committees of the Senate, relating to expenses incurred in the performance of authorized foreign travel:

CONSOLIDATED REPORT OF EXPENDITURE OF FOREIGN CURRENCIES AND APPROPRIATED FUNDS FOR FOREIGN TRAVEL BY MEMBERS AND EMPLOYEES OF THE U.S. SENATE UNDER AUTHORITY OF SEC. 22, P.L. 95-384—22 U.S.C. 1754(b), COMMITTEE ON APPROPRIATIONS, FOR TRAVEL FROM JULY 1 TO SEPT. 30, 1985

ALFONSE M. D'AMATO,
Chairman, Commission on Security and Cooperation in Europe,
Oct. 31, 1985.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HATCH:

S. 1949. A bill for the relief of Michael Z. Wu; to the Committee on the Judiciary.

By Mr. BRADLEY:

S. 1950. A bill to amend the Internal Revenue Code of 1954 to disallow deductions for advertising expenses for tobacco products; to the Committee on Finance.

By Mr. PRESSLER:

S. 1951. A bill to change the method and procedure of selling all meat commodities; to provide for licensing and regulating of market price reporting services; to insure proper market basis for sales and thereby prevent manipulation in meat trading; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. GARN:

S. 1952. A bill to provide for the striking of medals to commemorate the Young Astronaut Program; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. THURMOND (for himself and Mr. DECONCINI):

S.J. Res. 250. Joint resolution to authorize the National Committee of American Airmen Rescued by General Mihailovich to erect a monument to Gen. Draza Mihailovich in Washington, District of Columbia or its environs, in recognition of the role he played in saving the lives of more than 500 U.S. airmen in Yugoslavia during World War II; to the Committee on Energy and Natural Resources.

By Mr. HATCH:

S.J. Res. 251. Joint resolution to designate the week of May 11, 1986, through May 17,

1986, as "National Science Week, 1986"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. GORE:

S. Con. Res. 96. Concurrent resolution to request the President to take appropriate actions toward the establishment of a corporate international research program with respect to the greenhouse effect; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HATCH:

S. 1949. A bill for the relief of Michael Z. Wu; to the Committee on the Judiciary.

RELIEF OF MICHAEL Z. WU

Mr. HATCH. Mr. President, I am introducing a private bill for Mr. Michael Z. Wu in order to grant him a visa and admission to the United States for permanent residence. Mr. Wu desires to become a candidate for U.S. citizenship, and his personal background well demonstrates that he is a worthy and desirable person to be a permanent resident in our great country.

Mr. Wu was born in 1954, in the State of Assam, in northern India. He came from a well-to-do Chinese manufacturing family which was uprooted in 1962 when war broke out between India and the People's Republic of China. From the age of 5 to the age of 12, Michael lived in internment camps and received no formal education whatsoever. His father, when released from internment and unable to find employment, emigrated to Canada, and a year later Michael and the rest of the family joined him. When Michael reached Canada, he was almost entirely without formal education, and was first enrolled in a technical high school. He also worked as a clerk in a department store.

In Toronto, Michael was hired by Prof. Walter Berns, a distinguished Princeton University constitutional scholar, to help care for a stricken colleague at the University of Toronto, where Professor Berns was teaching at the time. Michael was hired to cook, shop, run errands, carry books, and to care for Berns' sick colleague. In the course of his employment, Michael became both the pupil and the friend of Professor Berns and his family. The recovering professor and Dr. Berns encouraged Michael to finish high school, which he did, and then arranged for him to enroll at Roosevelt University in Chicago, where on a student visa and working full time to support himself, Michael graduated with a bachelor's degree in comparative literature. While at Roosevelt University, Michael impressed everyone with his student work and with his good works. He was considered to be thoughtful, imaginative, intelligent, and very kind and helpful. He also assisted the director of the language laboratory at Roosevelt University, and he helped many foreign students through their difficult periods of transition.

During this time, Michael became fluent not only in English, but also in French. He returned to Canada to his family, and he is now in France on a fellowship. In addition to the languages I just mentioned, Mr. Wu is also proficient in Chinese and Hindi. He has talents that surely can be utilized in Government service and private business, and he would be an asset to the community in which he resides as well as to our beloved country.

One of his many sponsors is Nobel Laureate, Saul Bellow. Mr. Bellow writes of Michael:

He has overcome immense difficulties to complete his education and it would be a pity to lock him out * * * he deserves the opportunity to live and work in the U.S.A. People like Mr. Wu make most desirable useful citizens. He is a courageous and undemonstratively independent person. We should encourage such young men to settle here.

Mr. President, I second the words of the distinguished recipient of the Nobel Prize for Literature. Michael Wu is an extraordinary young man. He will make a splendid contribution to this country both as a professional and as a kind and caring human being. He represents the kind of person that has helped America become the great Nation that it is. I urge my colleagues to support this private bill. We will benefit by its passage.

By Mr. BRADLEY:

S. 1950. A bill to amend the Internal Revenue Code of 1954 to disallow deductions for advertising expenses for tobacco products; to the Committee on Finance.

DISALLOWANCE OF DEDUCTION FOR TOBACCO ADVERTISING EXPENSES

Mr. BRADLEY. Mr. President, tobacco is the single biggest health hazard facing this country. Virtually all scientific evidence recognizes the dangers of tobacco. According to the Congressional Research Service, more than 300,000 people die from smoking every year. Smoking contributes to 30 percent of deaths due to cancer and to 25 percent of coronary heart disease in this country.

And, Mr. President, cigarettes are not the only problem. Smokeless tobacco causes serious health problems, including cancer, periodontal bone destruction, tooth abrasion, and gingival recission. The American Cancer Society estimates that 10 percent of the 9,500 oral cancer deaths in this country are attributable to smokeless tobacco. The World Health Organization last year concluded that there is a direct link between the use of snuff and cancer.

Mr. President, the health costs of tobacco are also large. According to studies of the National Center for Health Statistics and the Office of Technology Assessment, $12 to $35 billion a year is spent on medical care for people whose illnesses result from smoking.

Mr. President, some argue that, because tobacco use is declining, we should not be so worried about the health effects of this product. This just doesn't hold up. The decline in tobacco use has not been dramatic—the deaths from smoking have been. There has been only a modest reduction in per capita cigarette consumption—a 10-percent decline since the 1950's—and there has not been a sizable reduction in the number of people who smoke, relative to 30 years ago. In the 1950's, roughly half of men and a quarter of women were smokers. Now, about a third of both men and women smoke.

While cigarette consumption has declined somewhat in recent years, the use of smokeless tobacco has increased. The American Cancer Society estimates that 22 million Americans in 1980 used smokeless tobacco. According to the Library of Congress, per capita consumption of snuff among males 18 and over has increased 60 percent since 1978. Surveys show that in Colorado, 25 percent of the male high school students use smokeless tobacco daily; in Oklahoma, 22 percent; in Texas, 20 percent. The Texas study shows that 55 percent of the chewers started before their 12th birthday. Incredibly, in Oklahoma, even 7 percent of the third graders use smokeless tobacco. We are talking about small children using a life-threatening product. The thought is appalling, Mr. President.

Thirty years ago, the debate was over whether tobacco consumption represented a serious health hazard. Today, everyone agrees—everyone, that is, except the tobacco manufacturers—that tobacco is a killer. The debate has turned to defining the proper Federal role in discouraging the use of tobacco.

And currently, Mr. President, the Federal Government has conflicting policies:

We spend millions on health research in an effort to help the millions afflicted by tobacco-related diseases, and at the same time we provide subsidies to farmers to grow tobacco.

We place labels on tobacco products warning people of the direct link between use and illness, and at the same time we allow the excise tax on cigarettes to drop in real terms by nearly

50 percent over the decades, reducing the disincentive to smoke.

And last, we spend millions on public health campaigns to warn people of the dangers of tobacco, and at the same time we allow tobacco manufacturers to write off billions of dollars in advertising expenses that are aimed at encouraging people to smoke or use smokeless tobacco.

Mr. President, the Government should speak with one voice on this problem. I believe that voice should unequivocally say, "smoking will harm you." We need tougher labeling requirements and more public information on the heatlh effects of smoking or chewing tobacco. We need to increase the excise taxes on these products as a greater disincentive to smoke and chew. And the Government should eliminate the incentives that are in the current Tax Code that help tobacco companies promote their product.

The industry argues that tobacco ads are not intended to recruit new smokers but simply to get people who already smoke to switch brands. I think that is hogwash, Mr. President! What is the message behind a television ad on smokeless tobacco portraying an athlete enjoying a "pinch between his cheek and gum?" What is the message behind billboards and magazine ads that portray young, successful, athletic and attractive models?

Americans—particularly young Americans—are bombarded with tobacco ads. Tobacco is this Nation's most heavily advertised consumer product, costing over $2 billion a year. Cigarette ads represent 10 to 15 percent of all newspaper and magazine ads and almost half of all outdoor advertising.

Mr. President, smoking is not glamorous. It does not make you attractive. It will not help you live a long or athletic life. Ads imply that this is the case, and it simply is not. It is doubtful that we can stop tobacco manufacturers from advertising, but we can eliminate the taxpayer subsidy to the industry for this purpose.

That is why I am introducing legislation today to disallow as a business expense the advertising expenses associated with tobacco products, including smokeless tobacco. The tax subsidy to tobacco manufacturers dwarfs the Federal outlays that are expended on deterring tobacco use. The Federal Government should be speaking with one voice. I see no reason why the Government should continue to subsidize this product.

By Mr. PRESSLER:

S. 1951. A bill to change the method and procedure of selling all meat commodities; to provide for licensing and regulating of market price reporting services; to ensure proper market basis for sales and thereby prevent manipulation of prices in meat trading; to the Committee on Agriculture, Nutrition, and Forestry.

FAIR MEAT TRADING ACT

Mr. PRESSLER. Mr. President, today I am introducing legislation to require the reporting of large transactions of meat and prohibits the use of formula pricing to establish prices for meat. The bill provides for more complete reporting of transactions and competitive marketing of meat products.

Currently, we have accurate reporting of the marketing of dozens of commodities. Yet there is very little public information available on the marketing of this Nation's largest commodity by far, meat. Once the livestock is sold by the farmer or rancher, the pricing and marketing of the products produced from the livestock are virtually unmonitored until they reach the supermarket meat counter or the restaurant. The most widely used reporting service used to establish meat prices is a publication known as the Yellow Sheet. This private publication collects information from wholesalers, retailers, and packers on their transactions in meat. Currently, the purchaser or seller of the meat is not required to report any information. As a result, the Yellow Sheet bases its information on less than 1 percent of the actual transactions. The American Meat Institute [AMI], which is an organization of meat packers, recently completed a meat price reporting study. AMI's survey found that almost two-thirds of the large retailers do not report meat purchases to the reporting service. Most of the packers did not report sales but would confirm sales if the information was requested. Many other buyers and sellers then use this information to determine the prices they pay and receive for meat products. Because of the very small percentage of transactions reported, there has been a great deal of speculation that the reporting of the Yellow Sheet could be manipulated. There is a strong incentive for the buyer or seller to try to influence the report. The AMI report states, "The temptations of selective reporting are considerable for all sizes of packers."

The legislation I am introducing today would only require the buyer or seller of meat to provide information on transaction to a reporting service if the service requests such information. The AMI survey found neither the packers or the retailers trusted the current reporting service. In the survey 96 percent of the packers were mildly or highly critical of the existing reporting services. The buyers also expressed their distrust for the accuracy of all market news reports. The basic reason for the distrust of the system is the lack of reporting requirements. The requirement of more complete reporting of transactions would eliminate the possibility of manipulating the information in the report and increase trust in the reports.

Many of the meat products are currently priced through the use of a formula pricing system. The study found that over 50 percent of the beef carcasses sold by the large packers are priced based on one of the reporting services. A similar system is used to establish the price for over two-thirds of the pork sold. These formula pricing systems are based on the price quotes in one of the reporting services. For example, a buyer will purchase a carload of beef a week from today at whatever price the Yellow Sheet quotes for beef that day. In other words, there is no consideration given to the supply, demand, cost of production, or any other factors in the pricing of the meat products. This strong dependence on the Yellow Sheet to establish prices gives a great incentive to try and manipulate the reports of the Yellow Sheet. Such manipulation is made more possible by the totally discretionary reporting requirement. This legislation will add some accountability to the reporting service and the meat industry.

The need for better reporting on meat transactions is also highlighted by the growing ownership concentration in the meat packing and food retail industries. Since 1972, the number of firms reporting steer and heifer slaughter to USDA declined from 710 to 471 in 1982. During the same period, the 20 largest firms increased their share of the total U.S. livestock slaughter from 59 percent to 76 percent. These trends have continued since 1982 at an increased rate. During the same period, the number of wholesale and retail buyers has declined and the market share of the largest firms has also increased. As a result, we have a continually declining number of firms conducting transactions in meat with little or no information on key aspects of their operations.

To facilitate the reporting service and encourage competitive bidding on meat transactions, the bill also suggests the development of an electronic marketing system. The development of such a system is encouraged by providing an exemption of reporting requirements for meat traded on competitive electronic marketing system. A 1984 General Accounting Office study found that the development of an electronic marketing system can provide an opportunity to trim some of the cost in marketing food products. Currently, marketing costs account for about 73 percent of the cost of food purchased by consumers. If these marketing costs could be reduced the consumer would benefit and the farmer could also receive a higher price.

All of the studies and previous experiences with electronic marketing of

agricultural commodities have found that farmers and ranchers receive a higher price for their product. The higher prices are possible due to increased marketing efficiencies and competition. This legislation has the potential for substantially increasing farm income at no cost to the Federal Government or consumer. It would be done through increased marketing efficiencies.

Electronic marketing has been used for certain commodities for about 20 years. Many hogs and feeder pigs as well as much of the cotton produced in the United States are traded in this manner. Canada has used electronic marketing for hogs for many years. Experience has demonstrated that electronic marketing reduces transportation costs and increases competitive bidding. USDA has also conducted numerous pilot projects on electronic marketing, but many of these projects have not included enough participants to provide a fair test of the system. However, studies indicate that electronic marketing increases competitive interaction, reflecting supply and demand more closely. It also facilitates the collection and dissemination of price and market information, which reduces the potential for information distortion or bias in transaction prices.

The AMI's survey found over 50 percent of the packers supporting the development of an electronic marketing system and a large number felt some sort of mandatory reporting may be a necessary part of a viable system. The survey clearly indicates the need for change in the current meat reporting system and the industry's recognition of this need. This legislation would facilitate the implementation of these needed changes.

Mr. President, the legislation I am introducing today does not force the meat industry to adopt an electronic marketing system, but it would encourage the development of such a system. It would require a more comprehensive reporting of market transactions. It appears that the most feasible means of achieving this would be to develop an electronic marketing system. All of the available information indicates that such a system would increase the competitiveness and efficiency of the food marketing system. It could also substantially increase farm income at no cost to the Government or consumers. That should be a goal of the industry, and it would be in the best interests of all Americans—taxpayers, consumers, and farmers.

By Mr. GARN:

S. 1952. A bill to provide for the striking of medals to commemorate the Young Astronaut Program; to the Committee on Banking, Housing, and Urban Affairs.

YOUNG ASTRONAUT PROGRAM MEDAL ACT

● Mr. GARN. Mr. President, the Young Astronaut Program is a national educational program for elementary and junior high school students which is designed to educate and interest young people in science, math, and technological skills. It uses the excitement of the U.S. Space Program to capture the imagination of young people all over the Nation. Although the program has existed for a little over a year, it has already:

Established thousands of chapters involving hundreds of thousands of students worldwide.

Produced diverse classroom curriculum materials for grades 1-9, including an adventure series of science activities called Toys That Teach, Recycled Science, Physics of Fun, and Space Watch. Model rocket kits and Halley's Comet posters are typical of other materials made available to chapters.

Sponsored field trips by chapters to science and space-related locations.

Published a national newsletter for chapter leaders and students and provided a national computer network for chapters that gives monthly updates on the latest shuttle missions and supplemental curriculum materials.

Sent 50 economically disadvantaged students to Space Camp for a 5-day "mission" to Huntsville, AL.

Sponsored a trip to a shuttle launch for the best young astronaut flag design.

Given two young astronauts the opportunity to be "movie stars" as winners of a contest to appear in the upcoming ABC film "SpaceCamp."

Allowed young astronauts to communicate with the crew of a recent space shuttle via ham radio in a project called "Ham In Space."

The Young Astronaut Program has so far been entirely supported and financed by private sector contributions and initiatives. This legislation calls for the minting of medals to commemorate the program, and allows the Young Astronaut Council to sell the medals and use the proceeds to sponsor program activities in schools all over the country.

Mr. President, I believe that the Young Astronaut Program is extremely worthwhile, and that passage of this legislation would provide further support for its activities, projects, and goals.●

By Mr. THURMOND (for himself and Mr. DECONCINI):

S.J. Res. 250. Joint resolution to authorize the National Committee of American Airmen Rescued by General Mihailovich to erect a monument to Gen. Draza Mihailovich in Washington, District of Columbia or its environs, in recognition of the role he played in saving the lives of more than 500 United States airmen in Yugoslavia during World War II; to the Committee on Energy and Natural Resources.

GEN. DRAZA MIHAILOVICH MONUMENT

Mr. THURMOND. Mr. President, I send to the desk a bill to authorize the National Committee of American Airmen Rescued by Gen. Draza Mihailovich to erect a monument in Washington dedicated to "General Draza Mihailovich, Savior of American Airmen."

The reason for having such a monument so designated stems back to World War II. During that war the United States and Great Britain initially supported the nationalist resistance movement in Yugoslavia, led by Gen. Draza Mihailovich. Due to a tragic combination of errors and mistaken information, the Allies withdrew their support for Mihailovich at the end of 1943 and backed the Communist resistance movement of Marshal Tito.

Despite his abandonment by the Allies and despite the merciless war waged against him by both the Communists and the Nazis during 1944, General Draza Mihailovich and his forces, known as the Chetniks, succeeded in rescuing some 500 American airmen who were shot down over Yugoslavia. Most of these men were safely evacuated from Nazi-occupied Yugoslavia to Italy.

In 1948, President Harry S. Truman awarded posthumously the Legion of Merit to General Mihailovich for his heroics in rescuing American airmen and for his larger services to the allied cause. Unfortunately, the American public was unaware of this award since the State Department, fearful of offending the sensitivities of the Yugoslavian Communist Government, made the award to Mihailovich "secret" for almost 20 years.

Since that time, a group of American airmen have organized themselves into a National Committee of American Airmen Rescued by General Mihailovich and have launched a movement to build a memorial in Washington, DC, dedicated in gratitude to the man who saved their lives. This effort has been ongoing for some time now, with the support of many Members of Congress, and I can think of no better way to discharge this debt than to authorize these airmen to erect the monument they have in mind.

Mr. President, in voicing my support for this effort, I want to emphasize the fact that this project is to be financed, not by the American taxpayers, but through the fundraising efforts of the airmen's group. All costs for the construction and maintenance of this memorial will be borne by the private sector.

This legislation is virtually identical to previous measures that have been approved overwhelmingly in the Senate.

Mr. President, the airmen who seek authority to have this monument erected do not wish to make political noises that would offend the present Government of Yugoslavia. They seek only to acknowledge their deep sense of gratitude to a man who was instrumental in rescuing nearly 500 downed American flyers during World War II. They merely want the simple recognition that would be imparted by the erection of a General Mihailovich monument.

Mr. President, I ask unanimous consent that the text of the resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 250

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the National Committee of American Airmen Rescued by General Mihailovich is authorized to establish a monument on public grounds in the District of Columbia or its environs, subject to authorization by the Secretary of the Interior pursuant to section 2, to honor General Draza Mihailovich for the role he played in saving the lives of more than five hundred United States airmen in Yugoslavia during World War II.

SEC. 2. (a) The Secretary of the Interior, in consultation with the National Committee of American Airmen Rescued by General Mihailovich, shall select with the approval of the Commission of Fine Arts and the National Capitol Planning Commission a suitable site on grounds owned by the Federal Government in the District of Columbia or its environs for erection of the monument referred to in the first section of this joint resolution.

(b) The National Committee of American Airmen Rescued by General Mihailovich shall be responsible for the development of the design and plans of such monument, which shall be subject to the approval of the Secretary of the Interior, the Commission of Fine Arts, and the National Capitol Planning Commission. If the Secretary of the Interior, the Commission of Fine Arts, or the National Capital Planning Commission fails to approve or make specific objection to such design and plans within ninety days after submission, such approval shall be deemed to be given.

(c) Neither the United States nor the District of Columbia shall bear any expense in the erection of the monument other than expenses incurred in the process of site selection and approval of design and plans.

SEC. 3. The Secretary of the Interior shall permit ground breaking for construction of the monument only after he determines that sufficient funds are available to complete the monument in accordance with the approved design and plans.

SEC. 4. The authority conferred by this joint resolution shall lapse unless the construction of the monument begins within two years after the date of enactment of this joint resolution.

SEC. 5. The maintenance and care of the monument erected under this joint resolution shall be the responsibility of the National Committee of American Airmen Rescued by General Mihailovich.

Mr. DECONCINI. Mr. President, I am pleased to cosponsor Senator THURMOND's legislation to authorize the National Committee of American Airmen Rescued by General Mihailovich to establish a monument to Gen. Draza Mihailovich in Washington, DC.

As many of us are aware, General Mihailovich is responsible for saving the lives of over 500 American flyers who were shot or forced down over Yugoslavia during World War II. For his acts of heroism and bravery at that time, he made the ultimate sacrifice—his life—during the internecine strife which plagued his country following the war.

In an era when we find a paucity of heroes, it is fitting to remember the heroic acts of an earlier time—a time which many of us remember all too dimly. In this, the 40th year after the end of the bloodiest war ever to face this planet, it is important to remember the bravery, sacrifice, and the combined efforts of many peoples and groups who gave their lives to preserve the democratic freedoms we all cherish. For an all too brief period of time, we were allies against a common enemy. American and Soviet, Serb and Croat, Partisan and Chetnik—all fought for and secured the peace which we experience to this very day.

Unfortunately, many of the fragile alliances of World War II were swiftly shattered following the war when former allies squared off against each other in a quest for power. Yugoslavia faced the same political rivalries which the world faced on a larger scale. In a struggle for power between the leaders of the two Yugoslav resistance forces, the Chetniks and the Partisans, General Mihailovich lost his battle and eventually his life.

Today, we are here to remember his heroic efforts during the war on behalf of American flyers, not the events within Yugoslavia following the war. Just as we have recognized the valiant acts of the Marquis de Lafayette and Gen. Casimir Pulaski, so it is fitting that we do so for this courageous man to whom so many Americans still living owe their lives.

One of those men is Richard L. Felman of Tucson, AZ, who has devoted his life to seeking recognition of General Mihailovich's efforts to save the lives of American servicemen. I congratulate Mr. Felman of Tucson, AZ, who has devoted his life to seeking recognition of General Mihailovich's efforts to save the lives of American servicemen. I congratulate Mr. Felman on his diligence and devotion, and admire the dedication to this cause which he has displayed since the end of the war. A 40-year crusade, such as the one waged by Mr. Felman and his fellow survivors, is one which merits a successful conclusion.

As you know, this legislation has twice been passed by this body only to be stalled in the House due in large measure to objections raised by the State Department. I simply cannot believe that a monument to General Mihailovich, built with private moneys on American soil, could be considered a diplomatic affront to the Yugoslav Government. We have delayed too long on this matter and I urge expeditious action by both Houses.

By Mr. HATCH:

S.J. Res. 251. Joint resolution to designate the week of May 11, 1986, through May 17, 1986, as "National Science Week, 1986"; to the Committee on the Judiciary.

NATIONAL SCIENCE WEEK, 1986

Mr. HATCH. Mr. President, the Smithsonian Institution has sponsored a film called "The Dream Is Alive." It is an appropriate title for a film depicting the wonder of space flight. It reminds us that we live in an age of opportunity and technological advancement. It is an age when we can prepare a meal in minutes; when artificial organs can replace natural organs; an age when astronauts can repair satellites in space; when we can store millions of pieces of information on a 5-inch disk. Our dreams are becoming reality.

Today, we have access to technology and knowledge that our forefathers could only dream about. Our young people will have even more. The impact of science and new technology on us is immediate and profound, not only in our individual lifestyles, but also on us as a nation. We should encourage our childrens' interest in and study of the sciences. It is an exciting time. The possibilities and opportunities available for us are innumerable.

Today, I am pleased to introduce legislation designating the week of May 11-17, 1986, as "National Science Week." The National Science Foundation will act as a catalyst, coordinating events to boost public awareness and understanding of science and technology, and to encourage our young people to study science and math. Last year, four corporations joined the NSF in sponsoring National Science Week: Dupont, IBM, Eastman-Kodak, and General Electric.

Schools and communities all over the country, along with many of our Nation's most prestigious scientific associations, rallied together to develop special exhibits, lectures, workshops, demonstrations, and other programs during National Science Week. Nearly 1,000 local, State, and national groups participated. In Salt Lake City, one of the 10 target cities, the planned activities received generous attention. The University of Utah, the Terra Tek Co., and other business and university departments hosted events including planetarium displays, magic shows by the university's chemistry department, and demonstrations of aircraft and aerodynamics.

The interest in science and technology generated by these activities is contagious, and I am honored to participate in this grand national project. I invite all Senators to join me as a cosponsor of this joint resolution in this national salute to American achievement in science and technology.

ADDITIONAL COSPONSORS

S. 17

At the request of Mr. MOYNIHAN, the name of the Senator from Rhode Island [Mr. PELL] was added as a cosponsor of S. 17, a bill to establish an independent agency, governed by a bipartisan board, to administer the old-age, Survivors, and Disability Insurance Program under title II of the Social Security Act, the supplemental security income program under title XVI of such act, and the medicare program under title XVIII of such act, and for other purposes.

S. 1799

At the request of Mr. GORTON, his name was added as a cosponsor of S. 1799, a bill to amend the Internal Revenue Code of 1954 to exclude from inclusion in personal holding company income computer software royalties received by businesses actively engaged in developing, manufacturing, and producing computer software, and for other purposes.

S. 1912

At the request of Mr. BENTSEN, the name of the Senator from Rhode Island [Mr. PELL] was added as a cosponsor of S. 1912, a bill to provide for a 6-month extension of certain temporary provisions relating to the Internal Revenue Code of 1954.

S. 1936

At the request of Mr. KERRY, the names of the Senator from Connecticut [Mr. WEICKER], and the Senator from Hawaii [Mr. MATSUNAGA] were added as cosponsors of S. 1936, a bill to amend title 23, United States Code, to provide for a uniform system for handicapped parking.

S.J. RES. 239

At the request of Mr. DURENBERGER, the names of the Senator from Maryland [Mr. SARBANES], the Senator from Utah [Mr. HATCH], the Senator from New Jersey [Mr. BRADLEY], and the Senator from Mississippi [Mr. COCHRAN] were added as cosponsors of Senate Joint Resolution 239, a joint resolution designating the week beginning on June 1, 1986, as "National Maternal and Child Health Week."

S. RES. 267

At the request of Mr. HUMPHREY, the names of the Senator from Rhode Island [Mr. CHAFEE], the Senator from Washington [Mr. GORTON], and the Senator from New Mexico [Mr. DOMENICI] were added as cosponsors of Senate Resolution 267, a resolution establishing a special panel on asylum.

SENATE CONCURRENT RESOLUTION 96—RELATING TO RESEARCH WITH RESPECT TO THE GREENHOUSE EFFECT

Mr. GORE submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 96

Whereas scientists have documented a continuing increase in the concentration of carbon dioxide and greenhouse gases in the atmosphere of the Earth, which may result in a phenomenon known as the greenhouse effect;

Whereas scientists predict that the greenhouse effect could have many adverse effects on the Earth, including—

(1) changes in climatic patterns which could cause alterations in agricultural productivity and patterns of land use; and

(2) the melting of glacial ice, resulting in a rise in sea levels worldwide;

Whereas human activities, including the burning of fossil fuels, are primarily responsible for the increase in the concentration of carbon dioxide and the release of other greenhouse gases in the atmosphere;

Whereas all nations may be adversely affected if the greenhouse effect occurs, and each nation has an interest in protecting the Earth from this environmental threat; and

Whereas the magnitude of the impact of the occurrence of the greenhouse effect has been investigated by scientists and is only beginning to be understood: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That—

(1) the United States should promote and support—

(A) domestic and international research efforts with respect to the greenhouse effect and its impact;

(B) studies of methods to reduce the rate of increase in the concentration of carbon dioxide and greenhouse gases in the atmosphere of the Earth; and

(C) efforts to prevent degradation of the environment of the Earth by the greenhouse effect;

(2) the President is requested to take all appropriate actions, in cooperation with any international organization which the President determines to be appropriate, to establish a long-term study, beginning with a 1-year cooperative international research program, with respect to the greenhouse effect with the purposes of—

(A) increasing the worldwide dissemination of information with respect to the causes of the greenhouse effect and methods to alleviate or avoid effect;

(B) coordinating the research efforts of the participating nations with respect to the greenhouse effect;

(C) fostering cooperation among nations to develop more extensive research efforts with respect to the greenhouse effect;

(D) preparing a report on the accomplishments of the program;

(E) identifying the potential alternative policies necessary to avoid a buildup of greenhouse gases beyond levels which could have catastrophic results; and

(F) developing a long-term plan for future research efforts with respect to the greenhouse effect;

(3) any such program established by the President should be started during or before the calendar year 1991, which year shall be known as the "International Year of the Greenhouse Effect"; and

(4) the participation of the United States in any such program established by the President should be planned and coordinated on behalf of the United States by the Chairman of the National Academy of Sciences and the Secretary of Energy.

● Mr. GORE. Mr. President, today I am introducing legislation to establish the International Greenhouse Effect Year. The purpose of this measure is to expand and focus scientific research efforts on the greenhouse effect and its consequences for society.

Modern man has acquired the technology to catastrophically alter the fragile atmosphere of our planet. Simply burning fossil fuels for warmth could have the insidious long-term effect of warming the globe. The buildup of carbon dioxide and other trace gases traps radiation, causing the atmosphere to heat up—a phenomenon known as the greenhouse effect. If today's worst case scenarios become tomorrow's facts, we may have only a few decades in which to ameliorate the impact—which could range from drought in the Midwest to floods on both coasts.

At first glance, the greenhouse effect may sound more like the plot of a bad science fiction novel than a serious environmental issue deserving immediate public policy review. But given its serious and potentially drastic impacts, Federal research and study efforts must place the highest priority on solving the mysteries surrounding the greenhouse effect. Otherwise future generations may experience a science fiction horror story come true.

I am proposing legislation that would decrease the scientific uncertainties and provide us more information on the greenhouse effect.

This concurrent resolution calls for the establishment of an international year of scientific study of the greenhouse effect, and requests the President to take steps to launch a worldwide cooperative program. That would be just the beginning, as many of the studies would continue for years.

The legislation would (1) coordinate and promote domestic and international research efforts on both the scientific and policy aspects of this problem; (2) identify strategies to reduce the increase of carbon dioxide and greenhouse gases; (3) study ways to minimize the impact of the greenhouse effect; and (4) establish long-term research plans.

The concept of an international year of study has been used successfully in the past. In fact, the best and most complete collection of data based on atmospheric concentrations of carbon dioxide began in 1957 as a result of the International Geophysical Year. At that time a sampling station was established on Mona Loa, HI. Today sci-

entists are still collecting data from that station.

Mr. President, I believe this bill will significantly improve national and international research coordination and cooperation. In time, it will produce the vital data Congress needs to make the appropriate policy decisions regarding the greenhouse effect. I urge my colleagues to support this legislation.●

ADDITIONAL STATEMENTS

WEEKLY BUDGET SCOREKEEPING REPORT

● Mr. DOMENICI. Mr. President, I hereby submit to the Senate the budget scorekeeping report for the week of December 9, 1985, prepared by the Congressional Budget Office in response to section 5 of the first budget resolution for fiscal year 1986. This report also serves as the scorekeeping report for the purposes of section 311 of the Congressional Budget Act.

The report follows:

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, December 16, 1985.

Hon. PETE V. DOMENICI,
Chairman, Committee on the Budget, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The attached report shows the effects of Congressional action on the budget for fiscal year 1986. The estimated totals of budget authority, outlays, and revenues are compared to the appropriate or recommended levels contained in the most recent budget resolution, S. Con. Res. 32. This report meets the requirements for Senate scorekeeping of Section 5 of S. Con. Res. 32 and is current through December 13, 1985. The report is submitted under Section 308(b) and in aid of Section 311(b) of the Congressional Budget Act.

Since my last report the Congress has cleared for the President's signature the Further Temporary Extension (Medicare) and Extension of Tobacco Excise Tax (H.R. 3918), changing outlay and revenue estimates.

With best wishes,
Sincerely,

RUDOLPH G. PENNER.

CBO WEEKLY SCOREKEEPING REPORT FOR THE U.S. SENATE, 99TH CONG., 1ST SESS. AS OF DEC. 13, 1985

[In billions of dollars]

	Budget authority	Outlays	Revenues	Debt Subject to limit
FISCAL YEAR 1986				
Current level [1]	1,067.3	983.6	792.9	1,902.0
Budget resolution, S. Con. Res. 32	1,069.7	967.6	795.7	[2] 2,078.7
Current level is:				
Over resolution by		16.0		
Under resolution by	2.4		2.8	176.7

[1] The current level represents the estimated revenue and direct spending effects (budget authority and outlays) of all legislation that Congress has enacted in this or previous sessions or sent to the President for his approval. In addition, estimates are included of the direct spending effects for all entitlement or other programs requiring annual appropriations under current law even though the appropriations have not been made. The current level excludes the revenue and direct spending effects of legislation that is in earlier stages of completion, such as reported from a Senate committee or passed by the Senate. Thus, savings from reconciliation action assumed in S. Con. Res. 32 will not be included until Congress sends the legislation to the President for his approval. The current level of debt subject to limit reflects the latest U.S. Treasury information on public debt transactions.

[2] The current statutory debt limit is $2,078,700,000,000.

EXTENSION OF FOREIGN MISSIONS ACT TO COVER FOREIGN COMMERCIAL ENTITIES

● Mr. LEAHY. Mr. President, I rise as cosponsor with Senator DURENBERGER of S. 1947, a bill to extend the Foreign Missions Act to cover certain foreign

commercial entities operating in the United States.

The Office of Foreign Missions in the State Department is empowered under the act to control various activities of foreign diplomatic and consular missions, certain other foreign official organizations—such as commercial missions and official news bureaus—foreign missions to the United Nations, and United Nations Secretariat employees from countries whose officials are subject to such control. But currently there is no explicit legal authority for the Office of Foreign Missions to regulate the activities of commercial entities which are actually owned or controlled by foreign governments.

It is clear that considerable espionage activities against the United States may originate from such organizations. Foreign governments are free, through their quasipublic trading firms, to form or join commercial entities in the United States which are not currently subject to control by the Office of Foreign Missions. This enables them to establish in areas that would otherwise be denied to officials from their country or into which their officials would not be completely free to travel into such areas.

It is clear that the existence of such free arrangements provides the opportunity for espionage by governments which engage in intelligence activities against the United States. I can state based on information which has been provided to the Select Committee on Intelligence that some foreign commercial entities are actually a source of considerable espionage, especially in the area of the transfer of high technology—particularly military technology—to the Soviet bloc.

One case is particularly enlightening in this regard. In 1981 William Holden Bell, an employee of the Hughes Aircraft Corp., was arrested for having served as an agent of Marian Zacharski, then president of the Polish Government-owned commercial company Polamco. Bell was cultivated by Zacharski in a highly professional agent recruitment scenario which began with a social contact and developed in Zacharski's providing Bell financial assistance. Bell was experiencing serious personal and financial difficulties when he was first contacted by Zacharski at his residence in the high-technology area outside Los Angeles.

Bell ultimately received about $170,000 in money and valuable items from Zacharski. In return, he turned over numerous documents between 1979 and 1981 dealing with a variety of sensitive military technologies including the F-15 look-down shoot-down radar system, "quite" radar systems, all-weather radar for tanks, naval radars, components of the Phoenix air-to-air missile and the Patriot air defense missile, and other systems used by the United States and NATO. The Soviets are known to be developing and deploying similar technologies, particularly look-down, shoot-down radar systems and radar-guided air-to-air missiles for their new fighters, apparently based in large part on information purloined from this country.

Mr. President, the Select Committee on Intelligence is currently conducting a major review of security and counterintelligence programs not only in the intelligence community but throughout the national security agencies and programs of the Government. While we expect to release a preliminary report next year, we have already reviewed considerable material and formulated some beginning recommendations. One of the areas that has emerged from this review is the necessity to extend the restrictions applied by the Office of Foreign Missions to foreign commercial entities which are currently entirely free to operate throughout the United States.

Earlier this year, on October 22, Senator DURENBERGER and I addressed the Permanent Subcommittee on Investigations, which is also conducting a review of security programs. We testified at that time on the importance of regulating foreign-controlled commercial entities as part of an overall program to directly control the presence and activities of hostile intelligence services in the United States, which would also include equalizing the number of United States and Soviet diplomats in one another's countries; applying Office of Foreign Missions travel restrictions to Warsaw Pact country representatives; and reducing the size of the Soviet mission to the United Nations. We said at that time:

The Foreign Missions Act applies not only to diplomatic establishments such as embassies and U.N. missions, but also to state trading organizations and other entities that perform governmental functions. There is, once again, clear counterintelligence information establishing that Soviet and Warsaw Pact trading companies and other commercial entities in the U.S. controlled by those countries are engaged in espionage-related activities. There are two avenues to pursue in regulating their operations.

First, the Export Administration Act as adopted earlier this year authorizes the Commerce Department to require a license for transfer of controlled goods or technology to an embassy or other "affiliate" of a Communist government in the United States. This language should be applied by the Commerce Department to commercial entities that are owned or controlled by Communist governments and that may be used to transfer technology abroad surreptitiously.

Second, the Foreign Missions Act requirements should be applied to these same entities. Under the law as it now stands, such requirements clearly can be applied to state trading organizations such as the Soviet company AMTORG. It is more difficult, however, to apply the Foreign Missions Act to other Soviet bloc-controlled businesses. To close this gap, legislation should be enacted to amend the Foreign Missions Act and authorize the State Department to apply its requirements to "affiliates" of foreign governments, with the same meaning as in the Export Administration Act. A bill for this purpose will be introduced shortly.

Enactment of the Durenberger-Leahy bill introduced today would help to complete the fabric of controls the Congress has woven over the past several past years on the size and activities of the hostile intelligence presence in the United States. I am proud to have taken a leading role in this effort, which has also included the following elements—

The Leahy-Cohen Amendment to the State Department Authorization Act signed into law last summer: Under this amendment, the President must see to it that the number of Soviet officials allowed to serve at their embassy and consulate in the United States not exceed the equivalent number of American officials serving in the Soviet Union. Currently, the Soviets station about 320 officials in their embassy and consulates here while the U.S. has only about 200 American employees in the U.S.S.R. and also hires over 200 Soviet nationals to work at our embassy and consulates there. The President has endorsed this approach, and I will be carefully monitoring its implementation by the State Department, which has unfortunately been very slow to understand, accept and apply this policy.

The Leahy-Cohen bill, S. 1773, introduced last October 18: Under this bill, the President would be required to reduce the size of the Soviet Mission to the United Nations in New York City. With a staff of nearly 300, the Soviet Mission is more than twice the size of the U.S. Mission (130) and the next-largest mission, that of the Chinese (125) and more than three times as large as all the rest.

The Huddleston-Leahy Amendment to the Fiscal Year 1985 Intelligence Authorization Act, enacted in 1984: Under this amendment, the President was called upon to see to it that the numbers and privileges of official representatives from countries involved in intelligence activities against the U.S. not exceed the corresponding numbers and conditions permitted by their governments for our diplomats there. This amendment also required that either the Director or Deputy Director of the Office of Foreign Missions be a career counterintelligence official, who would be sensitive to the importance of controlling certain activities by foreign government representatives in the United States.

And other initiatives by Congress to expand the jurisdiction of the Office of Foreign Missions over certain foreign officials.

I would like to conclude, Mr. President, by saying that these measures have received strong support at the White House. The President has spoken on several of them, and White House spokesmen have recently indicated that additional measures on this subject are contained in the President's new National Security decision directive on counterintelligence policy. The bill which Senator DURENBERGER and I have introduced today will pro-

vide addtional legal authority to help implement these policies.

Finally, Mr. President, I would like to say that nothing in the bill requires the Office of Foreign Missions to control the activities of all or even any particular foreign government associated commercial entities. The language of the bill brings certain "entit[ies] in the United States * * * which is substantially owned or effectively controlled by" a foreign power within the scope of the act. The Secretary may determine which foreign powers to apply this provision to and may also develop guidelines or procedures to determine the nature of ownership or actual control which should trigger application of this power. We expect that the Secretary will move to apply his authority under this provision to commercial entities which are associated with foreign governments which conduct intelligence activities against the United States and which actually employ such entities as bases for such activities.

JACK HOOLEY—MINNESOTA'S 1985 GROCER OF THE YEAR

● Mr. DURENBERGER. Mr. President, in today's changing economy, those businesses that succeed are those that are innovative and well-managed. They are not afraid of competition, rather they welcome it because they are at least one step ahead of their competitors.

Cub Foods, headquartered in my home State of Minnesota, is a shining example of this successful business. Now a member of the Super Valu family, Cub has grown from one small warehouse store into a national discount food chain. And it did so because of my friend Jack Hooley. Jack began his career as a grocery stock boy over 40 years ago, and worked his way up to become chairman of Cub Foods. Along with his brother Charlie and friend Cub Davis, Jack has dedicated his career to providing consumers quality products of affordable prices—a valuable service in today's economy.

And in recognition of his many contributions to the industry, Jack has recently been named Minnesota's 1985 Grocer of the Year by his peers in the Minnesota Grocers Association. It is especially fitting that Jack receive the honor this year, for this year he is retiring from Cub and leaving his son John to carry on the family tradition.

Mr. President, I ask that an article from the September-October issue of the Minnesota Food Guide be printed in the RECORD as a tribute to Jack's commitment to serving the people of Minnesota through Cub Foods.

The article follows:

[From the Minnesota Food Guide, September-October 1985]

MINNESOTA'S 1985 GROCER OF THE YEAR

From a stock boy in the post-Depression WW II era to president of a billion dollar corporation in the 1980's, Jack W. Hooley is a true example of the American Dream.

Named 1985 Grocer of the Year by his colleagues in the Minnesota Grocers Association, Hooley was presented the award in recognition of his leadership role in setting the standard for discount superstores in the United States. He is chairman of Cub Foods.

How does Hooley feel about Cub's success?

"There were so many people involved in it. There were so many ideas that came from the people who worked here. A real company effort."

As chairman of the Cub Food empire, Hooley manages a conglomerate of 27 stores, 13 of which are corporate. And 12 new stores will be opening this year, the latest one in Atlanta, Georgia.

"Most of the growth from now on will be in franchising," said Hooley during an interview in his Stillwater office.

COMMUNITY SERVICE

Hooley's community service record also is impressive. In his hometown of Stillwater, he serves on the Board of Directors for Lakeview Hospital and the First National Bank. He also serves on the Church Advisory Council at St. Michael's Catholic Church and is active with the Boy Scouts of America as well as a boys rehabilitation center in Minneapolis.

A FAMILY TRADITION

Hooley began his life-long career in the grocery business by sweeping floors and stocking shelves in stores owned by his father and grandfather in the early 1940's.

The family business, which had begun as a meat delivery service for lumber camps between Stillwater and Taylor's Falls, had grown to include four grocery stores in the St. Croix Valley. The stores were located in Stillwater, Red Wing and Hudson. And it was there that the self-service concept in the grocery business was born.

THE EARLY YEARS

After graduating from high school, Hooley served in the U.S. Navy for four years, and then returned to attend college at St. Thomas. After graduation, he became manager of his first store.

He transferred to Hooley's Downtown Supermarket, Stillwater, in 1950 and became store manager in 1955. By 1958, he was named president of Hooley's Supermarket.

BIRTH OF A CONCEPT

It was in 1960 that Hooley, his brother Charlie and friend Cub Davis joined forces to open a discount foodstore operation and bought a franchise with Food Bonanza out of Decorah, Iowa.

"We decided on a warehouse market format," Hooley said.

What did that mean? Well, no air conditioning, no music, no employee uniforms. Wooden planks served as shelves, and checkout stands were nailed together by hand. All equipment was second-hand.

Choosing a name was the next step. Consumers United for Buying (CUB) was finalley decided upon. "It pretty well said what we wanted," Hooley said. No, he said, the name had nothing to do with Cub Davis, "Just a coincidence."

"It was unbelievably hard when we first started out to let people know who we were," Hooley recalled. "We relied on word of mouth. We wanted people to think of it as their store."

The soultion? They changed ad agencies and stopped using the bear cub and shadow as their logo. "We wanted to emphasize our low prices, not our bear cub logo," Hooley said.

EXPANSION BEGINS

At the same time that the logo changed, Davis and Hooley traveled to California to inspect produce departments. They had decided to add produce to the store as well as complete dairy and frozen departments.

"We are doing about $150,000 a week and thought we should be doing about $200,000," Hooley said.

At that time, the store had only limited frozen and dairy departments—no bakery, no deli, no meat and no refrigeration departments.

The rest is history. With an expanded inventory, the $200,000 mark was passed within two weeks. By the third week, business was up to $250,000, and the $400,000 mark was reached by the end of the year.

With the added resources came improvements in decor. Air conditioning, tiled floors and music were added.

Uniforms, too, were added. This was a definite change in policy from the old concept, Hooley noted. "Everyday clothes" had been the standard at the old stores, and it was a standard that worked. "We thought it was kind of quaint," Hooley said.

What changed all of that?

"Some kid came up to check me out in his [long] underwear," Hooley said. "That's when we decided things had to change. It wasn't a warehouse anymore. It was a complete superstore."

THE MODERN DAY CLUB

In order to upgrade and expand, CUB was sold to Super Valu in 1980, and Jack was named chairman. That was the beginning of national expansion. Today there are stores in Illinois, Wisconsin and Indiana in addition to the six stores in Minnesota. (After Super Valu acquired CUB Inc. in 1980, the name was changed to Cub Foods.)

Although Cub is now a corporate giant, remnants of the old family atmosphere linger on. Brother Charlie retired in March, and Hooley himself will be retiring in October. But son John will carry on the family tradition. He currently heads up the Minnesota division of Cub.

Other family members in the business include Maureen Hooley, who serves as director of advertising, and Charles "Chip" Hooley, Jr., who serves as assistant store manager for Stillwater.

What impact has Cub had on the grocery industry?

"Wherever we go, we reduce the price level," Hooley said. Most Cub stores, he explained, operate at about one-half the operating costs of most conventionals. Hooley credits this to the reduced labor costs in Cub stores and the efficient use of recent technological innovations.

What does he think about the grocery business in general today?

"It's simpler. You don't have to know so much about the products. There are more standards. The product overall is much better.

That attitude is easy to understand since Hooley spent his younger years cutting cans of peas to test for quality, choosing cuts of meat and picking out produce.

"Now you have to know more about management," Hooley noted.

Overall, "It's an awfully good business," Hooley concluded. "To me, that's the best business in the world."●

NEW JERSEY LEADING THE WAY IN TOXIC WASTE RESEARCH

● Mr. LAUTENBERG. Mr. President, I note with pride that the Newark Star-Ledger has published an illuminating seven-part series by Gordon Bishop, which describes how the "Industry/University Cooperative Center for Research in Hazardous and Toxic Substances," located on the Newark Campus of the New Jersey Institute of Technology [NJIT], is blazing a trail in toxic chemical research. The Star-Ledger is to be commended for this informative and interesting series, and I commend these articles to my colleagues.

This national toxic substances research center at NJIT is the largest of its kind in the world. The center's focus is on developing the most advanced technologies yet designed for solving America's environmental toxics crisis. As implied by the name of the center, it is a partnership formed by a cooperative consortium of major universities and corporations. In this respect, it is as pioneering in structure as the challenging work being done by the center. The center grew out of the NJIT Institute for Hazardous and Toxic Waste Management.

This multimillion-dollar center is sponsored by the National Science Foundation and the New Jersey Commission on Science and Technology. Funding and the invaluable talent of experts is being contributed by a Fortune 500 list of international corporations including Exxon, American Cyanamid, IBM, and several companies affiliated with Princeton's industrial support group—Allied, Signal, Ciba-Geigy, Du Pont, Mobil, Occidental, Phillips, Shell, and Union Carbide. Other participating members include the Public Service Electric & Gas Company and the Port Authority of New York and New Jersey. The academic participants, in addition to NJIT and Princeton, are Rutgers University, Stevens Institute of Technology, and the University of Medicine and Dentistry of New Jersey.

Participating members are entitled to use any of the center's patented technology at no cost. The center hopes to have a total of 30 participating corporate members by mid-1986.

The exciting technological advances which the center is working on, to develop and perfect new means of controlling and cleaning up toxic substances, include the following:

Techniques for locating and tracking underground pollution in aquifers, using high technology sonar and computer methodologies, to reduce the need to drill hundreds of test holes to sample water supplies.

Fast-breeding "superbugs," which would comprise the next generation of bacteria now used in wastewater treatment plants, to feed on and break down toxic wastes, particularly those in underground water supplies which are now almost impossible to clean up.

Use of coal ash, now an unwanted waste product, as a giant sponge to soak up contaminants leaking from garbage dumps and hazardous waste sites.

A high-temperature super incinerator which is 99.99 percent efficient to achieve a high efficiency burn to safely destroy some of the most indestructible toxic substances, such as dioxin and PCB's.

The center's work should complement the research and development and toxic site demonstration program included in both Senate and House Superfund reauthorization legislation.

As a cosponsor, with the distinguished Senator from New York, Mr. MOYNIHAN, of this amendment to the Senate Superfund bill, I strongly support this effort to develop means to reduce, clean up, and dispose of our Nation's hazardous wastes. As we have painfully learned, this is far preferable to simply trying to contain them in landfills. Containment is risky and may end up being the most costly of remedies. Funds expended for innovative treatment methods will ultimately pay for themselves many times over in reduced disposal and cleanup costs.

New cleanup and treatment technologies, such as those being developed at the center, when coupled with waste reduction, can help us put a stop to the terrible legacy of hazardous wastes which has beset our country.

Mr. President, I ask that the series from the Newark Star-Ledger be printed in the RECORD.

The material follows:

[From the Newark Star-Ledger, Dec. 1, 1985]

JERSEY BLAZING A TRAIL IN TOXIC CHEMICAL RESEARCH

(By Gordon Bishop)

A national toxic substances research center, the largest of its kind in the world, has been established in New Jersey by a consortium of major universities and corporations developing the most advanced technologies yet designed for solving America's environmental/health hazards crisis.

Working quietly behind the scenes during the past year, specialists from around the world are pushing scientific technology to its limits to control toxic substances from their source right through to their final disposal.

The center's goal is "revolutionary research" aimed at recycling, destroying or rendering harmless thousands of toxic substances, as well as preventing hazardous materials from entering the environment and the human population.

The long-term objective is to make chemicals safe for society by neutralizing or eliminating toxic waste and controlling the production of harmful materials before they can cause any damage to the environment or human health.

After bringing together the finest research resources from industry and academia, the multi-disciplinary organization will be building its new headquarters next year—a modern $10 million, 40,000-square-foot complex on the Newark campus of the New Jersey Institute of Technology (NJIT).

The new center, a unique research partnership between academia and business, is also assisting American industry in overhauling its manufacturing processes to prevent the proliferation of toxics hazards throughout the environment, eliminating future waste disposal problems.

Until their block-long headquarters in central Newark is completed, the participating universities and corporations will continue conducting their own highly specialized research projects at their various campuses and business sites.

Sponsored by the National Science Foundation and the New Jersey Commission on Science and Technology, the new center intends to take on its unprecedented task by combining the best human and technical resources of leading academic institutions and global corporations that consider chemical production and hazardous wastes the nation's most serious environmental-economic-public health problem.

The magnitude of the problem is succinctly illustrated in an overview by Victor Kimm, director of the Office of Drinking Water in the U.S. Environmental Protection Agency (EPA):

"About one-third of our drinking water supplies in America have measurable traces of contaminants because of our inability to manage our environmental and economic resources very well."

And the federal government is only beginning to set "risk standards" on the thousands of chemicals, heavy metals and other toxic substances finding their way into the nation's surface and ground water supplies, Kimm reported.

More than 60,000 public water suppliers serve more than 200 million consumers. The U.S. population is about 235 million.

Responding to that and myriad other toxic exposure conditions in the home, workplace and environment are the center's academic participants: NJIT, Princeton and Rutgers universities, Stevens Institute of Technology in Hoboken and the University of Medicine and Dentistry of New Jersey.

Funding their multimillion-dollar research, in addition to the National Science Foundation and state science commission, is a Fortune 500 list of international corporations led by Exxon, IBM, American Cyanamid, Bristol-Myers, Schering-Plough and several companies affiliated with Princeton's industrial support group—Allied Signal, DuPont, Mobil, Shell, Occidental, Phillips, Union Carbide and Ciba-Geigy.

Alex Schwarzkopps, program manager at the National Science Foundation, said the New Jersey center will have a capability unmatched anywhere in the world.

"For the first time in our nation, New Jersey has brought together under one umbrella everything you need to deal with the toxic substances problem," Schwarzkopps stated.

A native of Teaneck, Schwarzkopps feels the new center will create "a synergism, or interaction, opening up new fields and new ideas on hazards prevention and risks."

The center's resources are truly global. At NJIT alone, there are teams of doctoral students working at the center from the Soviet

Union, India, Sri Lanka, China, Taiwan, Korea, Canada and other countries, plus many from the United States.

Through the center's "cutting-edge" research, industry wants to develop the most efficient technology possible to improve their production processes, making better use of raw materials and saving money, while also eliminating the costly disposal of hazardous wastes and future cleanups of huge landfills and extensive water supplies.

"If you use lousy technology, you wind up spending 10 times more in manufacturing products and later cleaning up toxic dumps because so much was wasted in the process," observes Joseph F. Terenzi, vice president of environmental affairs for American Cyanamid Corp., based in Wayne.

Robert B. Morris Jr., director of environmental programs for IBM Corp., Tarrytown, N.Y., comments:

"In my grandchildren's lifetime, nothing will be able to be discarded. Today's hazardous waste repositories will be utilized for their valuable materials."

Alvin Skopp, manager of Exxon's environmental control and safety division, remarks:

"We've simply got to develop cost-effective methods for dealing with hazardous wastes. We're in on the ground floor because we're hopeful we can solve the problem for industry and society."

One of the reasons New Jersey was selected as the national center for toxics research is the state's pioneering efforts in the recently evolving multi-billion-dollar waste control and cleanup industry.

"We were the first to close down toxic waste dumps and the first to develop programs to attack the problem," said John W. Liskowitz, executive director of the Newark center and a professor of civil and environmental engineering.

Kin-Buc, the largest chemcial-garbage landfill in the East, was shut by the state Department of Environmental Protection (DEP) in early 1976 following a series of articles in 1975 in The Star-Ledger depicting the impact of a mountainous "toxic timebomb" along the Raritan River.

In 1982, New Jersey established the nation's first commission to site hazardous waste facilities. After three years of painstaking reviews and public hearings, the first "candidate sites" will be announced in February.

New Jersey also set up the nation's first spill fund in 1977 to clean up hazardous waste sites and accidental spills. It became the model for the $1.6 billion federal superfund that became law in 1981.

A second superfund costing industry anywhere from $5 billion to $10 billion is awaiting approval in Congress. The exact amount has yet to be resolved.

Some members of Congress are pushing for a $10 billion Superfund II, while some industry leaders are warning that exorbitant taxes on the nation's manufacturing sector will result in more plant closings and unemployment.

Such political clashes between government and industry over how to deal with the toxic waste problem led to the creation of the New Jersey research center.

Where industry has been unable to work "open and freely" with government on the issue of toxic waste, the academic community has stepped into the conflict as a neutral third party, or go-between, doing what it does best: Pure research leading to practical technology benefiting both consumers and producers.

Liskowitz says the public continues to demand the "fruits of a high standard of living, including protection and safety, with a reasonable price tag on consumer goods.

"The center's mission is to stimulate the development of technology with economically and environmentally acceptable applications."

For the first time, a national research center will be merging enormous economic-environmental interests to declare war on toxic waste, an unwanted byproduct of a chemical-based, consumer-oriented society.

Because of the delays and confusion often arising out of government bureaucracies over constantly changing rules and regulations, industry is looking forward to working with graduate students and their professors who have become experts in their respective fields.

Liskowitz sees the center as an independent entity interested only in valid information and results.

"We don't want to become an extension of a bureaucracy," Liskowitz asserted. "Industry looks at us as an unbiased source of information. Too often state and federal agencies are talking to themselves and their own consultants, like a little club, a fraternity."

To avoid that self-serving pitfall, the New Jersey center reaches out to experts in industry and academia, bringing together the finest human and technical resources needed to solve extremely complicated chemical problems in an atmosphere outside the noisy political arena, Liskowitz noted.

The center quietly grew out of an academic program initiated at NJIT in 1981. Exxon, which operates one of the world's largest oil-chemical refineries in Linden, suggested that the company's engineers learn more about toxicology, the scientific study of poisons, their effects, their detection and the treatment of the conditions produced by them.

The Exxon proposal was made during NJIT's 100th anniversary. The institute, which started out as a technical trade school in 1881, was known for most of its life as Newark College of Engineering (NEC).

At the same time NJIT launched its Institute for Hazardous and Toxic Waste Management, teaching Exxon and other engineers the fine points of pharmacology and physiology, Princeton University organized an industrial support group on hazardous waste in its Department of Civil Engineering.

Princeton and NJIT worked independently of each other until the formation of the national toxics center last year.

Exxon's original $500,000 contribution made possible the NJIT hazards management institute. American Cyanamid anted up $200,000 to attract qualified personnel to the fledgling institute.

The new center got off the ground last year with a $385,000 grant from the National Science Foundation and a $558,000 grant from the New Jersey Commission on Science and Technology to provide equipment for research.

Over the past year, 15 companies have become participating members of the national center, formally known as The Industry/University Cooperative Center for Research in Hazardous and Toxic Substances.

A member company pays $30,000 a year, which entitles it to use any of the center's patented technology at no cost and to participate in the development of technology needed by a particular industry.

The center hopes to have a total of 30 participating corporate sponsors by mid-1986.

Not all sponsors are from industry or the business sector.

The Port Authority of New York and New Jersey joined the group in order to "enchance the port's economy" by cleaning up urban wastelands and making them fit for modern industrial parks.

For the Port Authority, billions of dollars of potential manufacturing and high-tech industries are at stake in its transportation/shipping district encompassing much of northeastern New Jersey.

NJIT already has assisted the Port Authority in improving an 90-acre industrial tract at Port Elizabeth by removing lethal PCBs (polychlorinated-biphenyls) and preparing the site for redevelopment.

The authority maintains thousands of acres of commercial property in its North Jersey district, including Newark International Airport and the world's largest containerized shipping port in Elizabeth.

Public Service Electric & Gas Co. joined the center because the giant utility is interested in research for the development of new technologies, which are long-term in nature, and the improvement of existing technologies in the short term.

"As New Jersey moves through the metamorphosis of becoming a technological center, its general business health is as much at stake as the physical health of its residents," noted Carlos Guerra, manager of PSE&G's energy supply research and development division.

"It is in the best interests of a utility serving more than seven out of 10 residents of New Jersey to participate in this venture. When technology prospers in the Garden State, PSF&G prospers and, by extension, its customers enjoy energy that is both safe and reasonable."

Electric utilities generate tons of hazardous wastes, from radioactive materials to such insulating oils as PCBs, which are now banned by the federal government although they still remain in use in many electrical transformers.

The impetus behind the university/industry consortium is one of the toughest environmental laws passed by Congress—the 1976 Resource Conservation and Recovery Act (RECRA).

RECRA set the stage for today's showdown between government and industry over the role of toxic substances in the marketplace. RECRA set standards on materials that had never before been regulated from production through disposal of toxic substances.

In 1984, those standards got even tougher as Congress extended the regulatory powers of the federal EPA.

Initially EPA was regulating the discharge of industrial effluents based on how much grease, oil or suspended solids were in the wastewater. Then EPA added ammonia, pesticides and other chemical compounds to its growing list of substances to be monitored.

In the 1960s, technology was measuring chemicals and heavy metals in the water at parts per hundreds or thousands. By the time the 1972 Clean Water Act became law, instrumentation had improved to the extent that tiny molecules could be detected by the electronmicroscope in parts per millions.

Today, super scanners and microscopes can identify molecules in parts per trillion and quadrillion. That's equivalent to examining a little drop of water in a backyard swimming pool and its chemical effect on the human organism and surrounding environment.

The issue of risk has become so uncertain in the medical-scientific communities that insurance companies now refuse to insure

workers cleaning up toxic waste sites. No one knows if one part per million or billion or trillion of a particular substance can cause cancer if inadvertently inhaled or ingested by workers wearing breathing apparatus and "moon suits" covering their bodies.

One toxic waste site may contain as many as 2,000 different chemicals, each reacting in its own special way to the other chemicals in the landfill, creating thousands of possible lethal combinations.

As a result, work on major superfund sites in New Jersey has slowed until the state decides how to approach the liability issue.

Recent lawsuits have produced jury awards in the millions of dollars to individuals who drank tainted water and later contracted cancer.

The challenge for the toxics center will be to learn what the real risks are at such finite levels and how technology can deal with it.

To relate risks and technology to the human organism and environment, the center has been structured around six research divisions.

Incineration, under the direction of Rich Magee, professor of mechanical engineering at Stevens Institute of Technology in Hoboken.

Biological and Chemical treatment, under the direction of Gordon Lewandowski, associate professor of chemical enginering and chemistry at NJIT

Physical Treatment, headed by Paul Cheremisinoff, associate professor of civil and environmental engineering at NJIT.

On-Site Assessment and Remedial Action, jointly shared by G. Fred Lee, professor of civil and environmental engineering at NJIT, and George Pinder, chairman of Princeton's Department of Civil Engineering.

Health Effects Assessment, shared by three co-directors at Rutgers; Dr. Michael Gochfeld, clinical associate professor of environmental and community medicine at the University of Medicine and Dentistry of New Jersey (UNDNJ), and Robert Synder, professor of pharmacology at Rutgers University, both in New Brunswick, and Mohamed Abdel-Rahman, associate professor of pharmacology at UMDNJ in Newark.

Public Policy and Education, directed by Michael R. Grenberg, professor of urban studies at Rutgers University, new Brunswick.

The center's immediate business will be developing cost-effective methods to respond to the latest changes in RECRA.

There are five specific areas affecting nearly all sectors of industry, according to Daniel J. Watts, director of the center's operations.

"The anticipated changes in use of land disposal techniques will have the greatest immediate effect on American industry as a whole," Watts predicts.

"The intent of these new regulations will be to encourage reuse and recycling substances used in manufacturing or produced as byproducts, and to encourage new technologies to treat and destroy hazardous wastes."

Watt believes land disposal of hazardous wastes will be prohibited unless EPA determines that, for specific situations, such disposal will not affect human health or the environment.

The second area of concern is correcting groundwater contamination.

"The EPA must modify hazardous waste regulations to require that for all landfills, surface impoundments, waste piles and land treatment facilities that have received waste after July 26, 1982, any contamination of groundwater must be corrected, even if the contamination extends beyond the boundary of the particular site." Watts explained.

Using existing sewage treatment plants as hazardous waste disposal facilities is the third issue addressed in the RECRA amendments.

"The EPA," Watts said, "must devise rules to assure that any hazardous wastes sent to a publicly owned treatment works for treatment are adequately controlled to protect people and their environment."

The fourth item on the RECRA agenda involves assessment of risk of public exposure.

"Permit applications to the EPA for landfills and surface impoundments must be accompanied by information about the potential of exposure to the public of hazardous wastes resulting from releases from the site," Watts said.

Finally, the center will be tackling the toughest industry problem of all: Reducing wastes at the source.

Under the new RECRA rules, industry will be required to obtain "Waste Reduction Certificates." The quantity and toxicity of wastes must first be analyzed and approved before any materials can be moved off-site.

"All practical methods will be considered to reduce the amount and concentrations of toxic substances to as close to zero as possible," Watts said.

"It's what the public has demanded—and Congress is now forcing industry to do it."

[From the Newark Star-Ledger, Dec. 2, 1985]

SCIENTISTS DEPLOY TOXIC 'SONAR' TO FIND CONTAMINATED AQUIFERS

(By Gordon Bishop)

Finding toxic chemicals in underground water supplies is much like searching for enemy submarines in the open oceans.

Using advanced ultra-sonic techniques, scientists at Princeton University are probing the subterranean aquifers for signs of poisonous organic compounds and deadly heavy metals such as mercury, cadmium and lead.

"We're using technology similar to that used by the Navy to search and track submarines, except we're looking for the spread of underground pollution plumes," said George Pinder, chairman of Princeton's Department of Civil Engineering and one of the partners in New Jersey's national toxic substances research center.

A pollution "plume" occurs when hazardous substances begin to spread in a body of water.

Detecting the range of pollution in aqueous ground formations has been a frustrating obstacle for engineers and scientists responsible for cleaning up the nation's water supplies, of which 25 to 35 percent have been tainted by improper waste disposal.

To plot the flow of plumes below the ground, the traditional approach has been to drill hundreds of holes and then bring up the water at varying depth levels and sample it for contaminants.

Today, highly sensitive sonar equipment is being fine-tuned to locate the plumes without having to punch hundreds of holes in the ground to depths of 10 feet or thousands of feet.

The new detection equipment will also speed up the search for leaky underground storage tanks now fouling hundreds of artesian wells across the country.

Gasoline, heating oil, various petroleum distillates and dilute wastes are stored in as many as five million underground tanks, many of them rusting away after 20 years and dripping unhealthful hydrocarbons into private and public water systems, according to the U.S. Environmental Protection Agency (EPA).

An estimated one million tanks are more than 16 years old. Anywhere from 75,000 to 700,000 of them are believed to be leaking their toxic contents into the ground.

Cleaning up leaks and spills can typically cost from $20,000 to $250,000. If groundwater is contaminated, the costs can be in the millions of dollars.

Princeton's sonar research will be a boon to the petrochemical industry in checking every one of its aging tanks for leaks. It's the kind of problem-solving research private industry wants to support, according to Joseph Terenzi, vice president of environmental affairs for American Cyanamid, headquartered in Wayne.

Princeton University joined the new toxics research center last year because government was throwing "good money after the toxic problem" and not getting the job done, Pinder pointed out.

The center is based at New Jersey Institute of Technology (NJIT) in Newark and is sponsored by the National Science Foundation and the New Jersey Commission on Science and Technology.

Participating in the largest center on toxics of its kind are Stephens Institute of Technology, Rutgers University and the University of Medicine and Dentistry of New Jersey.

Among the 25 international corporate sponsors are American Cyanimid, Bristol-Myers, Exxon, IBM and Schering-Plough.

Princeton and NJIT have been assigned the task of assessing hazardous waste sites and coming up with remedial action that is both effective and affordable.

Pinder, an expert on groundwater movement and geologic formations, is working on the massive cleanup problem with G. Fred Lee, professor of civil and environmental engineering at NJIT.

Technically, their mission is to determine if sites contaminated with hazardous chemical compounds pose problems to the environment, and then identify effective solutions.

Their specific projects include examination of the "interaction of substances with soil particulates, effects of contaminants on liquid flow through soil, biological renovation of contaminated sites and pharmacokinetics of pollutants absorbed to soil."

Pinder founded an industrial support group at Princeton in 1981 to bring the producers of pollution together to solve the problem. Funding the Princeton research are Allied Chemical, Cyanamid, Ciba-Geigy, Dupont, Exxon, Mobil, Occidental Chemical, Phillips Petroleum, Shell and Union Carbide.

Pinder is now pooling his resources with the new $10 million Newark center, formally known as The Industry/University Cooperative Center for Research in Hazardous and Toxic Substances.

"Industry is reluctant to work with government authorities because of their generally adversarial relationship," Pinder said, stressing the importance of a university/industry cooperative research center.

"In a government setting, industry will hold its cards close to its chest. In an academic setting, industry is willing to open up and do whatever it can to get the job done.

They benefit directly from any successes, and these benefits are passed on to society."

The veteran engineer believes the toxic waste issue is not amenable to quick solutions because every site, every situation, is unique.

"We're looking at different pots of soups—different chemicals interacting with different hydrologies," Pinder elaborated.

"People today are showering with and drinking water containing traces of contaminants. Just how serious the problem is and what has to be done to control it is the purpose of the research center."

Keeping a safe distance from government and its enforcement authorities, Princeton will not accept funds from such agencies as the EPA, but it will take grants from the National Science Foundation and the U.S. Geological Service, which Pinder feels are independent organizations with no political axes to grind.

Freedom from government intervention and politics is what Princeton seeks in the already controversial toxic wastes arena, Pinder emphasized.

That academic freedom is putting Princeton on the razor's edge of research in the battle against toxic wastes.

"We're developing new concepts in mathematics to understand how contaminants are transported through a liquid medium," Pinder disclosed. "Specifically, we're focusing on the diffusion of contaminants in time by utilizing flow and wave travel methodology.

Doing the math for Princeton is a graduate student from Switzerland, Bernard Joos. His computer models look like colorful fingerprints that pinpoint geometric boundaries, making detection of a pollutant as easy as tapping a letter on a keyboard and having the picture appear before your eyes on a three-dimensional color map displayed on a TV screen.

Computer modeling and high-tech sound frequencies will be needed to examine thousands of miles of moving underground streams and aquifers and the thousands of chemicals and metals finding their way into these unseen, irreplaceable resources.

Industry leaders met at Princeton recently to learn of the latest developments in the toxic cleanup field, which is becoming a multi-billion dollar business and an increasing financial burden on taxpayers and consumers footing the bill.

Thirteen experts (graduate students, professors and technical staff) presented their specific approaches for solving extremely complicated industrial pollution problems.

Lin Ferrand, for example, a graduate student spoke on the use of "dual-energy gamma rays" to determine the amount of a particular pollutant in the soil. Her work involves porosity, bulk density of liquids, saturation and sample thickness.

Ferrand's pure research will give industry a tool to use to find out precisely the contents of "soil water." Identifying what's in the environment and at what toxicity levels has been a tedious, time-consuming process. Gamma ray research is expected to accelerate such soil and water investigations.

At NJIT, Professor Lee's geotechnical site assessment/remedial action group is exploring similar problems.

"Pollution becomes a problem when it moves," said Lee, an engineering troubleshooter whose work takes him from Israel and Tunisia to most of the European countries trying to cope with modern industrial systems.

"One of our immediate goals is developing risk assessment techniques, in particular the transport of a hazardous substance from where it is dumped or stored to a point of concern: Someone's well, wildlife, people, vegetation."

Lee is looking at "sorption"—the ability of a chemical to bind tightly in soil. Dioxin, for instance, is a cancer-causing substance that locks into the soil and hardly moves through the environment, Lee instructed.

"Dioxin may move one inch in 500 years. But solvents such as trichlorethylene, also a carcinogen, move as fast as water through the ground—one foot a year several feet a year, depending on the composition and structure of the aquifer."

NJIT is studying the three most mobile types of solvents and the three most common types of soils found in New Jersey in order to develop strategies to contain or remove them from aquifers and the soil.

To render contaminated soil non-toxic, organic chemicals have to be destroyed and heavy metals immobilized. One method being tested is to heat the soil using either microwave technology, or ultrasonics.

"The problem in treating contaminated soils is that it is not economical to heat such a large mass by using conventional means, such as hot sulfuric acid plus additives," Lee said. "Microwaves and ultrasonics might be able to detoxify soil much more economically."

One indicator for detecting chemicals in the environment is plant life. Plants react to chemicals at concentrations far less than those that can be detected by even the most sensitive nose.

"Some plants are like a litmus test," Lee said. "We can look for contaminated soils by examining sensitive plants affected by any changes in the soil characteristics. A plant's rate of growth, for instance, is one warning sign that chemicals may be in the soil."

Natural plants are serving a purpose similar to the canaries that used to go into coal mines and were the first to feel the effects of any escaping gas. Any changes in the canary's physical condition alerted miners to a potential disaster.

One of Lee's projects involves the containment of wastes at a site, preventing movement through the environment.

Installation of "slurry cut-off walls" is one method of protecting surface and ground water. A slurry wall is wet clay poured like wet concrete into the ground around a site. The one-to-two-foot thick slurry walls are sunk as much as 100 feet in the ground, providing an impermeable barrier. The clay dries like a potter's finished works. Treatment of the leachate (the chemicals that ooze from a mound of wastes) is then provided behind the slurry walls.

Isolating toxic wastes from the environment is the first priority, followed by treatment and ultimate reduction of the hazardous materials.

Lee describes his innovative experiments as "generic projects" that will eventually benefit any municipality or industry trying to defuse a ticking chemical time bomb.

"The scope of the hazards problem is as large as the population of the United States," Lee said. "Each person, on the average, gets rid of a gallon of hazardous wastes a year, whether it's paints, solvents or detergents. In New Jersey that represents a 7½ million gallons a year. Nationally, it's about 235 million gallons. It's now going to either the garbage dump or into the sewer system."

The new toxics research center is concentrating first on keeping hazardous substances out of the nation's water supply. That entails not just cleaning up present sites and preventing future superfund sites, but creating the technology to get rid of past, present and future hazardous materials.

NJIT, Princeton, Rutgers and Stevens Institute in Hoboken launched the unprecedented research effort with the multinational corporations because they view New Jersey as a compact laboratory containing all of the hazardous waste problems facing America—and their highly specialized engineering solutions.

SCIENTISTS DEVELOP 'SUPERBUGS' TO CONSUME HAZARDOUS WASTES

(By Gordon Bishop)

Fast-breeding "superbugs" that feed on toxic wastes can be used to remove chemical contaminants in underground water supplies that are practically impossible to clean up with even the most advanced purification technology.

"Superbugs" are the next generation of common bacteria now used in wastewater treatment plants to break down raw sewage and other organic matter, a necessary biological process in purging water of gross pollutants.

The bugs are really just stronger versions of ordinary micro-organisms that have been around for millions of years, feasting on garbage, carasses and natural organic material such as leaves and trees.

It's nature's way of recycling matter into energy and back into matter again—a perpetual, productive cycle of life.

Superbugs are seen as an inexpensive method of cleaning up water supplies and hazardous waste sites containing a array of harmful organic compounds that can cause cancer and other diseases.

Like man-made chemicals, superbugs are created in a laboratory by manipulating the genes of certain bacteria capable of eating, say, oil or PCBs and other synthetic compounds.

As scientists have manipulated molecules to create synthetic substances, many of which cause serious problems when they get into the environment or human organism, scientists are now rearranging molecules to attack, or devour, their chemical creations.

The new generations of mutant bacteria must be tailor-made in the laboratory to deal with a specific class of chemicals, according to Gordon A. Lewandowski, a professor of chemical engineering and chemistry at New Jersey Institute of Technology (NJIT) in Newark.

Lewandowski's biomolecular experiments are being conducted at the newly organized national toxic waste research center, headquartered at the NJIT campus.

The center is the nation's largest in the field of toxic wastes, combining the resources of five academic institutions—NJIT, Princeton, Rutgers, Stevens Institute of Technology and the University of Medicine and Dentistry of New Jersey—with some 25 major corporations, including Exxon, IBM, Allied, Mobil, Shell, Bristol-Myers and Union Carbide.

Lewandowski, 40, directs one of the six research divisions within the center. He is charged with developing biological and chemical treatment technologies. The division's work focuses on:

The detoxification of industrial organic waste in sewage treatment plants.

The degradation of organic substances by photo-oxidative and microbial methods, or by composting.

And the detoxification of contaminated soils by chemical and biological treatment.

The bacterial process is the basis of biological degradation. It occurs naturally in the environment.

But with the advent of synthetic chemicals, man intervened in the natural cycle, manufacturing materials that could no longer be broken down by bacteria that have been an essential part of the natural system since the earth was formed 4 billion years ago, Lewandowski related.

To break down man-made chemicals a special breed of bacteria is being fashioned in the laboratory that can convert toxic substances into food, or energy, allowing the superbugs to multiply rapidly.

General Electric has found a mirco-organism in the muddy bottom of the Hudson River that actually thrives on PCBs (polychlorinated biphenyls), a synthetic compound so toxic it was banned by the federal government several years ago.

PCBs were used as a liquid insulating material in electrical motors and transformers. Thousands of tons of PCBs are being disposed of in high-temperature incinerators as electrical equipment gradually is being replaced by more efficient models.

But removing the slippery substance from an underground water supply is almost impossible without the introduction of superbugs, according to Lewandowski.

"This particular organism in the Hudson's muddy bottom adapted to the toxic conditions caused by the PCBs," Lewandowski explained. "The bacteria adapted to the change, taking up the PCBs as a fuel to produce energy—a food source to reproduce itself."

The products of bacterial interaction with organic materials are carbon dioxide, water and organic sodium chloride (common table salt), all of which exist naturally in the environment.

"Bacteria are extremely adaptive," Lewandowski said. "They reproduce every 45 minutes at room temperature (70 degrees) and can break down organisms (waste matter) rather easily."

The center's research will determine the ultimate products of biological degradation, any residues beyond the known carbon, water and salt "leftovers."

"The process itself reduces the toxicity of compounds, which is very encouraging when you're trying to find ways to reduce and ultimately eliminate hazardous man-made substances in the environment," Lewandowski said.

He cited another example of naturally occurring bacteria adapting to man-made changes in the environment.

"Researchers at Cornell University have found bacteria around a fence post in the ground thriving on PCP, a very toxic chemical. The fence post, before it was put in the ground 20 years ago, was treated with pentachlorophenol, a wood preservative.

"Over the years the bacteria modified itself in order to utilize the PCP as a form of fuel. Nature was able to accomplish that adaptation without the intervention of a genetic engineer."

Lewandowski thinks some bacteria will be able to make the transition to the age of chemicals, as in the PCB and PCP cases.

But with the introduction of tens of thousands of new chemicals into the environment since early this century, bacteria will need a helping hand from man to be effective in attacking all of the compounds concocted in the laboratory.

"Of the 6 million compounds invented over the past century, 90 percent are organic and, therefore, capable of being broken down by either existing bacteria or the specially developed superbugs," Lewandowski said.

The superbugs will be let loose in "dilute waste"—groundwater, wastewater from chemical processes and compounds in the soil.

The more concentrated the waste, the more difficult it is for superbugs to convert chemicals into energy, Lewandowski noted.

"There are limitations on biological treatment. Biological success depends on the rate of evolution or adaptability of the bacteria.

"These superbugs must be able to compete effectively with the other microbes present in the environment. We may have to keep adding these new bacteria in sufficient quantity to insure their reproductive rates, providing effective treatment at a chemical waste site."

The goal of the biological chemical treatment division is to overcome the ecological barriers to the genetically engineered microbes so they can be successfully used in waste treatment.

Lewandowski is confident that microbiology and other treatment techniques will be developed at the New Jersey research center to permit the continued use of chemicals essential to the well-being of the human population.

"There is no way not to have a chemically oriented society," Lewandowski declared. "We cannot feed 4 billion people on earth without chemicals. There would be mass starvation and disease. A chemical society is a given."

The challenge for the chemical industry, Lewandowski finds, is to control its wastes and products that eventually wind up as wastes.

"New Jersey is in the forefront of this awareness," he acknowledged. "We were the first to recognize the problem. Now we have to ask ourselves if we are willing to pay for these solutions."

Lewandowski feels public policy should be shaped to prevent the storage of chemical wastes.

"We must alter chemicals so they will not be a threat to society," Lewandowski stressed.

"If there is a choice between a landfill or an incinerator, I'd go with incineration. A landfill is not a solution. It's a storage problem which eventually must be dealt with some day by society."

Other technical projects being pursued by the biological-chemical treatment division are:

Using oxygen, ozone, hydrogen peroxide and ultraviolet light to degrade organic waste, in combination with the superbugs.

By exposing organic wastes to photo-oxidants, organic material can be degraded to less toxic levels that can then be digested by the superbugs.

Using public sewerage systems to treat certain kinds of chemicals.

Since the 1972 Clean Water Act, billions of dollars of public funds have been invested in secondary treatment plants that may be able to break down various chemicals at a great savings to society, according to Lewandowski.

"We intend to demonstrate the potential for using public treatment facilities for industrial organic compounds, minimizing the need for additional capital investment in industrial pretreatment," Lewandowski disclosed.

The new center will collect data to "counter the growing regulatory trend toward decreasing industrial discharge limits into publicly owned treatment works."

The U.S. Environmental Protection Agency (EPA) launched an industrial pretreatment program in the late 1970s, requiring industrial dischargers to reduce the levels of liquid wastes entering public sewer pipelines.

EPA estimated that the cost to industry to eliminate such discharges would be as expensive as the nation's $30 billion clean water program enacted in 1972.

Research at the New Jersey center during the past year suggests that many of those industrial chemicals can be treated in public facilities by a combination of photo-oxidant and microbial methods, Lewandowski reported.

"We have had long discussions with representatives of large sewer facilities, members of Sen. Lautenberg's staff and Water Coalition representing various watershed associations in northern New Jersey," Lewandowski said.

"All of these groups agreed that there were problems with the current (EPA) categorical standards, and that our approach is a promising alternative.

"No one felt that the objective was politically unattainable, and all were encouraging about continuing this research."

Industry, he added, wants to "tighten up" its production processes as a matter of economic survival.

"The less waste industry generates, the more it saves in disposal and treatment costs," Lewandowski remarked.

Before Lewandowski became a chemcial engineering professor at NJIT in 1977, he worked as a project engineer in Exxon's Environmental Control and Safety Division and before that as a research engineer with the FMC Corp.'s industrial chemical division.

John Liskowitz, executive director of the hazardous waste research center, said specialists of the caliber of Lewandowski and others on the center's staff have proven to be invaluable in the search for solutions to industrial waste problems.

"One of the reasons a national center for toxic substances research was established in New Jersey was the number of exceptionally qualified individuals available in both the industrial and academic communities throughout the state," Liskowitz said. "New Jersey is a recognized leader in identifying hazardous waste problems and coming up with their solutions."

Coal Ash Used To Neutralize Liquid Toxic Wastes

(By Gordon Bishop)

The mountains of ash produced by burning coal at electric power plants can be used like giant sponges to soak up chemical contaminants leaking from garbage dumps and hazardous waste sites.

The ash, which usually piles up as unwanted waste at distant burial grounds, is an ideal, inexpensive absorbent for removing and "fixing" hazardous liquid materials in soil and leachate oozing from landfills, according to Paul Cheremisinoff, associate professor of civil and environmental engineering at New Jersey Institute of Technology (NJIT) in Newark.

"Fly ash is a cheap source of material for solving a major environmental problem in America," Cheremisinoff said. "It's one solution we are exploring to contain hazard-

ous wastes at thousands of sites across the country."

Cheremisinoff is in charge of the physical treatment division at the national toxic substances research center in Newark, the largest operation of its kind in the world.

Funded by the National Science Foundation, the New Jersey Commission on Science and Technology and some 25 international corporations, the research center is composed of five academic institutions led by NJIT. Other participants are Princeton and Rutgers Universities, Stevens Institute of Technology and the University of Medicine and Dentistry of New Jersey.

Among the many chemicals fly ash can mop up to prevent contaminants of soil, surface and groundwater are 11 highly toxic components—aniline, benzene, cholorbenzene, chloroform, cyclohexanol, 1-4 dioxane, ethylbenzene, methanol, O-xylene, phenol and toluene.

Physical treatment of hazardous substances is the first step towards immobilizing wastes. Hazardous wastes pose the greatest threat to water supplies when they begin to travel over and through the land and into aquifers deep in the ground.

Fly ash, an abundant byproduct of industrial activity, can help prevent further pollution of the nation's critical water supplies, based on preliminary studies at the hazards research center.

Some 35 percent of the nation's public water supplies already have been contaminated with chemicals and heavy metals such as cadmium, mercury and lead, according to the U.S. Environmental Protection Agency (EPA).

Cheremisinoff, a prolific technical author who was once chief environmental engineer for Engelhard Minerals & Chemicals Corp., is perfecting technology for the "irreversible transformation of hazardous substances to non-hazardous forms . . . or for isolation of hazardous materials allowing for later destruction."

Some clay soils are also being used as liners to retard the flow of leachate from landfills. Clays and fly ash are fairly common and available materials that are now being tested on hundreds of kinds of chemical waste.

Fly ash, a coagulant aid, has been used for years to make cinderblocks and as a subsurface for roadbeds.

Several doctoral and post-doctoral students from around the globe are assigned to specific projects at the research center working to develop methods and technologies that will ultimately save industry, taxpayers and consumers billions of dollars in prevention, protection and cleanup costs.

Su Ling Cheng of China, a Ph.D. in civil-environmental engineering, is getting free tuition at NJIT plus an annual salary of $5,500 to improve techniques for volume reduction and stabilization of hazardous materials.

Volume reduction involves removing water from sludges and chemical waste streams, leading to the destruction or detoxification of a very small amount of dry hazardous materials.

Like other engineers who 20-30 years ago helped advance the use of chemicals in making new products, Cheremisinoff today is counting on that molecular experience to solve the problems created by many of those compounds.

"A chemically based society can have its cake and eat it too" Cheremisinoff contends. "We've conquered polio and other diseases. We can now develop controls for chemicals from the source to their final disposition."

The proliferation of chemicals is a 20th Century phenomenon. In 1900, there were 400,000 compounds listed in the Chemistry Abstract Service. The 1985 Abstract lists about 6 million compounds, many of which never go beyond the laboratory and an official patent number. And 1,000 new compounds are being added to the list each year.

"We don't know what the effects of these new compounds are having on the environment or human health, let alone the thousands of others that have yet to be tested one at a time or in endless combinations," Cheremisinoff said.

"The question we have to ask ourselves as a society is whether we are willing to accept the greater costs for clean air and water.

"We have the know-how and we can develop the technology to live in a chemical-based world, but that comes with a price. We're finally getting around to addressing the economics of chemicals, the environment and public health."

Cheremisinoff illustrated the dimension of the problem by looking at the 60,000-odd "articles of commerce" that can be found on the shelves of supermarkets.

"We live in a throwaway society," he observed. "Just about everything winds up in a landfill. That will obviously have to change."

To Cheremisinoff, any significant change begins with education. One of his projects at the research center is the training of thousands of engineers, managers and professionals responsible for taking care of the society's wastes.

During November and December, personnel from industry, government and academia have been learning the ABCs of "Hazardous Occupations and Environments." The program is being sponsored by NJIT's Division of Continuing Education in cooperation with the National Science Foundation, the new hazards research center and Pollution Engineering Magazine, whose 22,000 subscribers range from New England to Washington and as far west as Ohio.

The courses are designed to provide "state-of-the-art" information on regulations, cost-effective methods on disposal of hazardous wastes and management of "occupational environments" or workplaces.

"Two billion dollars will be spent on managing hazardous materials this year and industry will supply funds for much of this," Cheremisinoff said.

What industrial managers and operators want to know is how they can run their factories and businesses without violating any of the hundreds of rules and regulations coming out of state and federal bureaucracies.

With penalties as high as $250,000 a day and up to five years in jail if the responsible party is convicted, corporate executives are taking the hazardous exposure problem very seriously, Cheremisinoff said.

The courses range from $285 to $475 and cover just about everything business without knowingly violating occupational safety and environmental laws.

For example, the content for just one seminar in a course on hazardous waste management includes the following:

Responsibility of generators, transporters, owners and operators of treatment storage and disposal sites.

Responsibilities under the federal superfund legislation to clean up hazardous waste sites.

Impact of other environmental legislation.

State programs.

Impact of Department of Transportation and Occupational Safety and Health Administration regulations.

Keeping abreast of regulatory development.

Preparing an organization for the Resource Recovery and Conservation Act.

Internal audits and inspections.

Federal and state inspection protocols.

Handling compliance inspections.

Record-keeping, reporting and government inquiries.

Confidentiality of information.

Integrating hazardous waste issues into management planning.

Training requirements and programs.

Developing contingency plans.

Public affairs issues.

Lobbying and influencing government.

Selecting hazardous waste contractors.

The program reaches as many as 35,000 managers in the field of hazardous occupations and environments.

The NJIT continuing education courses are also open to contractors and laborers.

Because of its leading role in toxics research, NJIT has become the national certification center for hazardous materials managers. To become certified, a manager must have a bachelor's degree in a field related to hazardous materials management and engineering, plus three years of appropriate experience.

If a manager doesn't have a bachelor's degree, he or she must have at least 11 years of appropriate experience in the hazardous materials field.

An academy of Certified Hazardous Materials Managers has been established to provide a mechanism to further professional development and for exchange of ideas and information to advance the practice of hazardous materials management.

Regional chapters and industrial divisions provide opportunities for professional development and education.

The Department of Defense is currently discussing with NJIT training 5,000 of its employes responsible for managing the DOD's hazardous materials, including radioactive wastes.

SCIENTISTS SEEK "PERFECT" INCINERATOR TO ELIMINATE DIOXIN FROM WASTES

(By Gordon Bishop)

If a student graduated from high school or college with 99.99 percent grade average, the word "perfect" would certainly apply to that academic performance.

A constant 99.99 performance in the real world is the goal of a group of engineers and technicians at Stevens Institute of Technology developing the "perfect" destruction machine—a high-tech, high-temperature incinerator.

Professor Richard S. Magee, project leader in charge of building the "perfect" incinerator at the Stevens campus in Hoboken, refers to his pioneering thermal research as "the four 9's."

"We are defining the operating parameters of thermal destruction at efficiences of 99.99 percent, meaning a practically perfect burn of hazardous wastes," Magee said.

"We want to create a 'safe envelope' for the combustion of toxic wastes. The margin of safety will be one-one hundredth of 1 percent. That's about as safe and clean as you can get in the real world."

A workaholic with a quick Irish wit, Magee and his team of 15 teachers and 25 graduate students are venturing into unexplored areas of thermal dynamics, the science of converting matter into usable energy and harmless byproducts such as carbondioxide, salt and water.

"New Jersey's incinerator will be the state-of-the-art, the model for others that will follow in the emerging field of hazardous waste destruction," Magee said enthusiastically from behind a desk piled high with research papers.

"Take dioxin, for example. It's one of the most indestructible substances man ever made."

Magee jumped up and stepped over to the blackboard in his office crammed with books and reports. He picked up a piece of white chalk and drew on the blackboard a molecular representation of the most feared form of dioxin, known to the specialists as 2,3,7,8 TCDD.

It looked like three joined hexagons with antennae angling out at both ends like feelers on a well-fed caterpillar.

"That's the problem," Magee said. "Breaking down that molecule at temperatures above 1,800 degrees is what this challenge is all about."

Dioxin was the big environmental health issue this year in the siting of New Jersey's first garbage-power plant in the Ironbound section of Newark.

Dioxin is the menacing molecule the public fears because it is associated with the word "cancer" and Agent Orange, a defoliant used in the Vietnam War to strip the jungles bare of green life.

Hundreds of other chemicals can also cause cancer, but dioxin became the catchword in the citizens' battle against incinerators in their "backyard."

One of the reasons for the emotional reaction to dioxin is the difficulty of destroying it once it gets into the environment. Dioxin has been found in soil in Newark's industrial area. As long as it stays there, it doesn't pose a danger to the public. But if ingested, it can cause death.

Dioxin is formed when plastic packaging is burned in conventional incinerators operating at temperatures below 1,700 degrees.

Environmentalists want certain plastic bottles and packaging made with polyvinylchloride (PVC) banned from the marketplace.

American consumers, however, use more plastic today than steel, aluminum and copper combined. In 1976, plastic passed steel as the nation's most widely used material.

The U.S. plastics industry, the world's largest, manufactured more than 21 metric tons worth more than $18 billion.

Magee and other thermal experts think it might be a costly economic mistake to outlaw plastics simply because existing incinerators cannot handle them. When burned routinely, they wind up as dioxin molecules emitted into the atmosphere, eventually falling back to earth where they can be taken up in the food chain.

Magee's super-incinerator will destroy not only dioxins but other equally dangerous petrochemical molecules discarded by industry as hazardous waste.

He'll get his first chance at proving the destructive powers of his super-incinerator next spring. A laboratory-scale verson costing $200,000 should be ready to start incinerating eight pounds an hour of toxic wastes mixed with fuel oil. Operating temperatures will range from 1,200 to 2,200 degrees. The little furnace will be fed different chemicals and chemical mixes to determine at which temperature each batch is destroyed.

The actual time a chemical or batch of fuel-enriched chemicals passes over the combustion flame will be from a half-second up to 10 seconds. The "residue time" is important for the effective operation of an incinerator. Magee noted.

The particular technology for Magee's super-incinerator is called the "fluidized bed." Although it sounds like a popular water bed, a fluidized bed is really an incredibly hot bed of gases that destroys molecules by bombarding them with tiny superheated particles, the most common being ordinary sand.

The fluidized bed process is much more efficient than passing wastes over a hot flame capable of burning most of the material but not all of it, Magee pointed out.

The Stevens fluidized bed laboratory experiment will be the first demonstration of the latest technology being developed by the national toxic substances research center, based at New Jersey Institute of Technology in Newark.

Stevens is one of six New Jersey academic institutions participating in the nation's largest research project on toxic substances.

At Stevens, where the world's first mechanical engineering society was founded a century ago, energy conversion systems are being refined to make use of an available resource—hazardous wastes.

"A few years ago, stack gases were measured in the parts per millions, which were considered perfectly safe levels to protect the public health," Magee recalled.

"But computers and better instrumentation can now measure gases leaving an incinerator stack at parts per billion. We can now design an incinerator to reduce emissions of PCBs to one part per billion, an undetectable level not too long ago."

PCB (polychlorinated biphenyl) is another chemical culprit, now banned by the federal government, that has found its way into the soil, groundwater and on the surfaces of floors, walls and ceilings when the compound was not regulated. PCBs were used as a liquid insulator in electrical motors, as well as lighting systems.

Like the other five research divisions in the hazardous wastes center, the Stevens mechanical/thermal engineering approach shows promise for major industries, including electric utilities.

Magee, director of the Stevens energy center, will be establishing guidelines for the use of various hazardous wastes in industrial boilers for heating and generating electricity.

"We might be able to burn certain liquid waste chemicals in coal-fired boilers that operate at temperatures from 2,000 to 3,000 degrees Fahrenheit, more than enough to destroy many organic compounds," Magee said. "These petroleum-derived compounds can be utilized for their BTU value."

Magee will be testing that waste energy potential with Public Service Electric & Gas Co., the state's largest utility. PSE&G operates several coal- and oil-fired boilers to generate electricity for its nearly 2 million customers.

Magee recently became chairman of PSE&G's Research Advisory Council, a group of specialists and persons with other interests from real estate to the environment who help shape the utility's policy on future technologies and capital investments.

Stevens' waste-energy research will become the basis for a computerized data bank for the center and the state.

Any new technologies that come out of the research will be shared with the corporate sponsors.

"We write all of our reports to our sponsors," Magee said. "They get the first crack at it. We're also a resource for the state."

The State Hazardous Waste Facility Siting Commission was established three years ago to find appropriate places to locate new waste-reduction facilities such as Magee's super-incinerator.

The commission will announce the first 10 or 12 "candidate sites" in February. They will be narrowed down to one major incinerator site and a backup site for landfilling the residue from the new generation of waste-processing facilities.

After the laboratory experiments are completed next year, Magee plans to build a $2 million "thermal destruction machine" developed on the information gained from the smaller scale-model incinerator.

The decision has not yet been made on what kind of thermal system Magee and his incineration group want to scale up for "real world" conditions. On the drawing boards are the fluidized-bed project, a rotary kiln similar to the kind that makes cement, and liquid injection, wherein waste is injected directly into a shower of sizzling heat.

The $2 million prototype of an advanced thermal destruction system is scheduled for operation in 1988.

The laboratory-scale incinerator is now being designed by Stone & Webster Co. in Cherry Hill, an international design, engineering and construction firm.

Liquid injection research is being carried out with Trade Thermal Co. in Pennsylvania, the closest such waste-destruction facility to New Jersey.

[From the Star-Ledger, Dec. 6, 1985]

JERSEY RESEARCH CENTER STUDIES HEALTH RISKS OF TOXIC EXPOSURE

(By Gordon Bishop)

What variety of toxic substances is New Jersey's population exposed to and what are the real health risks of these hazards proliferating throughout the environment?

To find the answers to these puzzling and troubling man-made problems, a group of specialists at the national toxic substances research center in New Jersey is studying the exposure rates and related risks in general population and environment.

Their laboratory is the real world: The compact state of New Jersey, its residents and workers, industry and an incredibly complex ecology of water and wastes, air pollutants and chemical discharges into rivers and the land.

The overall population and environment have never been adequately examined in terms of exposure and risks, according to Dr. Michael Gochfeld, clinical associate director of environmental and community medicine at the Rutgers Medical School in Piscataway.

"Our ultimate goal at the toxics research center is to improve society's ability to evaluate risks associated with particular kinds and levels of exposure," Gochfeld explained, outlining his strategy in assessing the health risks on humans of thousands of chemicals and their countless combinations interacting in the air, water and soil.

Joining the 45-year-old hazards expert in the quest for "toxics truths" are Robert Snyder, a professor of pharmacology at

Rutgers University, and Mohammed Abdel-Rahman, an associate professor of pharmacology at the New Jersey Medical School-University of Medicine and Dentistry of New Jersey in Newark.

They head one of six divisions in the national toxic substances research center comprising several major universities and corporations.

Based at the New Jersey Institute of Technology (NJIT) in Newark, the nation's premier toxics research center, formally incorporated as the Industry/University Cooperative Center for Research in Hazardous and Toxic Substances, is sponsored by the National Science Foundation, the New Jersey Commisison Science and Technology and some 25 worldwide companies.

The center's health effects division is using the latest scientific research tools in epidemiology, toxicology and clinical analysis to learn precisely what effects toxic substances are having in the workplace and general community.

The new center already has identified about 1,000 workers exposed to hazardous waste while cleaning up disposal sites over the past eight years.

Under the federal superfund law—a multi-billion-dollar cleanup program—"front line" workers must be medically examined on a regular basis.

"These tests, including analyses of blood and urine, are not designed for healthy individuals with very little exposure to toxic substances," Gochfeld said "Some front-line workers we've been tracking since 1978. They are our first concern."

The health effects division is collecting two kinds of information. The first involves those subjected to excessive exposure levels that they are not aware of; the second has to do with a group of workers showing a certain trend or symptoms, pointing the way to an unsuspected hazard.

"The hazardous waste industry has its own unique problems," Gochfeld said, "That is our immediate target for this new toxics research."

Among the 1,000 workers being studied by the health effects division is the state's deputy environmental commissioner, Richard T. Dewling. Before becoming the state's second highest environmental official, Dewling, 49, was exposed to several of the biggest hazardous waste sites as an investigator with the federal Environmental Protection Agency (EPA), where he served as deputy and acting regional administrator over the last eight years.

Dewling, once in charge of EPA's laboratories in Edison, designed the world's first incinerator-on-wheels for destroying hazardous wastes on site.

Dewling's mobile invention was nicknamed the "Fire Dragon." It was used for the first time to burn extremely toxic EBs at the huge Kir-Buc garbage-chemical landfill in Edison.

Gochfeld's partner in the health effects division is a 49-year biochemist from Brooklyn. Snyder, chairman of Rutgers Department of Pharmacology, said he is getting out into the general population and community to ascertain the toxic exposure rates and their impact on human health.

"We're looking at dose levels and response," Synder revealed. "We're able to do this now because molecular epidemiology is just burgeoning.

"We'll be looking at chromosome damage and relate that to chemical exposure."

The technique the researchers are using is called DNA adducts."

DNA (deoxyribonucleic acid is the genetic material, or chemical code, that determines the physiology of every human being, from the color of one's eyes and hair to bone structure skin texture, height and other features.

When a toxic chemical irreversibly binds to the DNA material the reaction initiates cancer. It is the process of new breed of microbiologists at the research center will be examining to determine what happens when various synthetic chemicals come in contact with the human organism, particularly DNA, the "chemical of life."

"It's not difficult determining the effect of one chemical on human health," Gochfeld said. "But it is much more difficult when you add a second or third chemical. And it becomes practically impossible when the mixture gets into the hundreds and thousands."

The New Jersey toxic substances research center and the National Academy of Sciences are tackling the same mind-boggling problem, known as "synergism"—the collective impact of two or 200 chemicals on human health.

"We are starting with compounds we know about—some dozen chemicals," Gochfeld said. "They represent different classes of compounds. We're looking at organics, pesticides, metals, and other classes of toxic substances.

"If we can come out with a strategy in dealing with these substances, there will be great ramifications in the hazardous waste field, especially the engineering side, where we'll be able to come up with quicker solutions such as destroying certain chemicals in an incinerator."

Gochfeld, Snyder and their associate Abdel-rahman are building on 350 years of clinical data on hazardous materials, beginning with the Industrial Revolution in Europe.

"Metal toxicity goes back to the Greeks a couple of thousand years ago," Gochfeld noted. "There's a long history of toxic problems leading up to the advent of synthetic compounds during the past century."

The New Jersey toxic center, Snyder disclosed, will be doing research into areas beyond those of state and federal environmental and health agencies.

"We have a to develop methods to prevent problems and then correct them," Snyder said. "We have to learn what is safe and what is not."

Gochfeld drew an analogy on the complex issue of safety and risk:

"There is no chemical so dangerous that it is impossible to handle safely. And there is no chemical so safe that some fool can't figure out how to make it dangerous."

The public, Gochfeld added, believes society cannot handle toxic substances safely, whether it's installing asbestos in ceilings as a fire retardant or operating a hazardous waste incinerator.

Snyder referred to the latest toxic "crisis" in Florida.

"If that state can detect 1 part per billion of benzene in drinking water, gas stations and manufacturing plants responsible for the benzene must clean it up," Snyder said.

"What we do not know yet is the level of benzene occurring naturally in the environment. Is benzene naturally in the environment at one part per billion?"

Snyder wants to know what level of resources should be applied to removing one part per billion of benzene from the environment if it poses a "potential" hazard.

Nature, Snyder noted, also contributes organic chemicals to the environment.

"We're never starting from zero," he said. "What we have to discover is what is there before man adds to that existing level."

Snyder and Gochfeld reject "zero risk" in the real world. They go along with the federal EPA risk standard of one death per million people from a man-made cause of pollution.

That is, the standard for protecting public health has been reduced to one death per million people. If a particular chemical, for example, causes more than one death per million, then it must be regulated.

Since 1970, EPA has been regulating and controlling emissions from industry and motor vehicles to reduce "involuntary" risks to the general population.

Government regulations what Gochfeld and Snyder categorize as "involuntary risks," meaning those risks over which the public has no control, such as breathing unhealthful air or drinking contaminated water without knowing it.

"The public accepts 'voluntary risks' as a routine matter," Snyder said. "A voluntary risk is when an individual decides whether to drive a car, or fly in a plane, or ride a bicycle, all of which have known risks associated with them."

Gochfeld said the 30 students in the risk assessment course taught at Rutgers do not agree on one risk level for all activities.

"Some will say for a certain activity that one death per 10,000 population is acceptable, while for another activity it might be one in 100,000," Gochfeld said. "The EPA one-in-a-million risk standard is considered a reasonable one for involuntary risks such as pollution."

The public's awareness of risk has been sharpened in recent years by what Snyder calls "the vanishing zero."

"Science keeps pushing zero away from real-world conditions," Snyder said. "The zero has gone from 1 part per hundred, to 1 part per thousand, to 1 part per million, to 1 part per billion, to 1 part per trillion, so that today we can measure a pollutant down to 1 part per quadrillion."

A quadrillion comes out to 15 zeroes, or 1,000,000,000,000,000.

One part of an organic moelcule in one trillion or quadrillion may prove to be an impractical measurement in the real world, scientists are now speculating.

Practically indetectable amounts of a pollutant in the environment or workplace raise yet another environmental issue: How clean is clean?

What standard, health authorities are wondering, is considered safe—or an acceptable risk? One part per million, billion, trillion . . . or whatever finite fraction of a substance today's powerful probes can pick up in a sample of air, water or soil?

"Our assignment is to find out at what level a substance becomes a risk, causing cancer and other diseases," Synder said.

In one experiment at the National Center for Toxicological Research in Arkansas, scientists were trying to determine the threshold for a particular carcinogen by subjecting 25,000 mice to decreasing doses of acetylaminofluorene, a potent insecticide known to create tumors in-livers.

"As the doses got smaller and smaller, we saw no more liver tumors," Snyder recalled of the "megamass" experiment. "But we began to see tumors of the bladder when the doses got down to those levels approximating levels found in the environment."

The laboratory mice were used to approximate conditions in the workplace.

The health effects group is also establishing a "protocol" based on the distance one lives from a hazardous waste site.

"It has been assumed that people exposed to chemical disposal sites are in greater danger the closer they live to the site." Gochfeld hypothesized. "We are going to test that theory in New Jersey."

The protocol is designed to investigate exposure to a waste site with three types of illnesses:

Cancer.

Major reproductive problems such as birth defects, low birth weight, impotence, sterility, miscarriage, spontaneous abortion and infant mortality.

Neurotoxic disorders such as convulsions, peripheral neuropathy, encephalopathy, blindness and related problems.

For their community exposure research, the health effects investigators have selected three sites—one each in Newark, Woodbridge and Millville, Cumberland County.

From information collected there, they expect to know what effects chemical waste sites have on the surrounding population and what can be done to reduce and eliminate exposure to the toxic conditions.

"Our task," Synder summarized the group's efforts, 'is to understand the underlying bioprocesses—the mechanism of toxicity.

"We have to use mechanistic data applied to risk assessment."

Over the next three years, they hope to have some answers on just how dangerous it is to work in a chemical environment or live near a toxic waste site, and what safety precautions are needed to prevent unacceptable risks.

[From the Sunday Star-Ledger, Dec. 8, 1985]

CENTER TO EXAMINE "BACKYARD" SYNDROME IN SITING TOXIC WASTE FACILITIES

(By Gordon Bishop)

If public opposition blocks the siting of airports, highways, power plants, waste disposal systems and other necessary facilities, the delivery of basic services can be interrupted and economic growth stifled.

The siting of publicly vital projects such as garbage-power plants or hazardous waste treatment systems has been stymied by people who do not want any major economic activity in their "backyard."

How to accommodate the legitimate concerns of residents affected by a particular project, while also providing basic services to the very people objecting to essential economic activities, is the conflict confronting the nation's first public policy and education program on siting and related impact issues.

The public policy/education program is part of the national toxic substances research center based in New Jersey. The center, the largest of its kind in the world, consists of five leading New Jersey academic institutions and some 25 international corporations, several of them either headquartered or conducting extensive operations within the state.

Shaping public policy through education is one of the six objectives of the national research center Heading that component of the new center, to be housed in a $10 million laboratory-office complex on the New Jersey Institute of Technology (NJIT) Newark campus, is Michael R. Greenberg, doctoral professor of urban studies at Rutgers, New Brunswick.

Greenberg has put together a multidisciplinary faculty of 25 specialists drawn from 17 departments in four universities.

One of the eight research projects under way at the center's policy/education division is a study on how industry responds to public protests over siting industrial projects.

Frank Popper, associate professor of urban studies, is examining the responses of industry to delays or blockage of their plans to construct new facilities, such as oil refineries, airports, power stations and nuclear waste disposal sites.

Popper classifies these development projects as necessary but which are almost always rejected by residents who live near them.

Popper is analyzing the industry responses to consider the implications for siting hazardous waste incinerators and landfills in New Jersey, which the State Hazardous Waste Facility Siting Commission is planning to do next year.

Popper coined the word "LULU" to convey the problems associated with siting objectional facilities in developed areas. LULU stands for Locally Unwanted Land Use.

Another project on Greenberg's agenda is how industry is coping with the decreasing availability of inexpensive alternatives for managing hazardous wastes.

Among the questions Greenberg's group will attempt to get answers to are:

Is industry making process changes?

Is industry banding together to find sites?

Is industry moving processes out of the United States?

What kinds of industries are making which choices?

Another project on the 1986-87 calendar involves the kinds of negotiations that are occurring about siting between local governments and industries.

One phase will be to determine what kinds of concessions are offered or extracted from firms to reach negotiated location settlements.

The researchers also want to know if there are any differences between large and small and long-time resident firms versus newly-entering firms.

And, "how do the perceptions of government and private sector 'risk managers' affect their decisions about the risk of environmental chemicals?" Greenberg wants to know.

Greenberg also wants to learn which is the dominant factor (education, experiences or job role) controlling one's perceptions of toxic substances.

And, how are those different perceptions manifested in the way decisions about environmental risk are made?

From his own studies and experience, Greenberg, who grew up near Yankee Stadium 40 years ago, see organized citizens as the main driving force in shaping public policy on environmental issues.

"The public is carrying government and industry along with it," Greenberg said.

The public's role in siting major facilities is the focus of a three-year study at the policy/education division. A national survey, with case studies, is being conducted on "Improving Public Participation in the Permitting of Hazardous Waste Storage, Threatment and Disposal Facilities."

The broad-based survey and indepth case studies will explore public participation within the overall permitting process. The project will identify exemplary state and local procedures for public participation, and develop recommendations for improving and streamlining public participation in the permitting of hazardous waste facilities.

Greenbery singled out the state of Massachusetts, which requires "negotiations" with the public in siting major impact facilities. New Jersey has no such law, although public participation is a voluntary part of the state's siting procedures.

The national siting survey will be submitted to government, industry and academia for review in 1987.

Because siting has become such a political, emotional issue, industry is moving towards non-siting solutions to their waste problems, including changes in processes to eliminate hazardous chemicals, reduction of waste discharges at the source and recycling byproducts on site.

"An industry will develop one of these approaches and then try to market" Greenberg said. "It comes down to economic efficiency versus the real danger of manufacturing certain products with various chemicals and the costs associated with that."

Making changes in industrial production can often be less expensive than paying for the escalating costs of handling waste byproducts, Greenberg said.

COMPUTER SOFTWARE ROYALTIES EXCLUSION

● Mr. GORTON. Mr. President, I ask to be added as a cosponsor of S. 1799, a bill to exclude computer software royalties from the personal holding company tax.

The problem that this bill deals with is a classic example of the situation in which technology has outrun law. The original personal holding company tax was designed to prevent avoidance of taxes by certain wealthy individuals who were able to incorporate themselves to enjoy lower tax rates, and whose income consisted primarily of royalties. There is a special exemption in the law for copyright royalty income, but it does not apply to most computer software developers because it does not apply if the work under royalty was created by a shareholder in the corporation. It happens that this is the particular case that most software developers find themselves in, with the principles of such corporations creating the software. Thus, the personal holding company tax is anachronistic in its application to the computer software industry.

It is time for Congress to enact the amendments contained in S. 1799. Indeed, I would add that it is also important that S. 1799 be clarified to ensure that the exemption from the personal holding company tax that it creates be retroactive, and I intend to work to achieve this.●

ASAT MORATORIUM COULD LEAD TO ARMS TREATY

● Mr. KERRY. Mr. President, I am delighted that as a result of the conference on the defense appropriations in the continuing resolution we have achieved a moratorium on Asat testing

that could enable the United States and the Soviet Union to reach an agreement halting the testing and development of Asat systems.

This decision by the House-Senate conferees preserves the chance to achieve an Asat agreement, despite the headlong rush by the Reagan administration to test the U.S. Asat this September.

After a single test the U.S. Asat does not yet pose a profound threat to Soviet satellites. However, further testing of the U.S. miniature homing device against objects in space will threaten the ability of the United States to achieve an Asat agreement which would promote our national interest. This is because the U.S. Asat is profoundly superior to the Soviet Asat and potentially threatens Soviet early-warning satellites in elliptical orbit, and because possession of the U.S. Asat is essentially unverifiable once the system is fully operational.

As this administration has suggested on so many occasions, an arms agreement that can't be verified cannot be negotiated. If we are to negotiate an Asat agreement, we must do it before we complete the development of an unverifiable Asat system.

Who would doubt that the continued security of our satellites is an essential component of our national security? Our satellites are our eyes and ears—they provide us with the ability to monitor Soviet military activities and to verify Soviet compliance with arms control agreements. Satellites are expensive, and they are inherently vulnerable because of their known trajectories, their limited numbers, and their fragility. Significant cost and performance tradeoffs are required to protect satellites against attack. No one here doubts that we need our own satellites much more than we need to attack Soviet satellites.

Today, our most important satellites—our high-altitude early warning satellites—are completely invulnerable from Soviet attack. Even our lower level satellites are at relatively slight risk from the Soviets clumsy and limited coorbital Asat system. But although current technologies pose little threat to our satellites, future possibilities are very threatening. It is far easier to protect our satellites against the current Soviet threat than it will be against subsequent generations of Asat's. The later we take action, the more systems will be deployed, the more complicated the technology will become, and the more difificult compliance with any treaty will be to verify.

These facts have been generally accepted by the Congress, and that is precisely why we have again legislated a moratorium on Asat testing, following the single test by the United States of its Asat against an object in space in September. The U.S. conducted that test in the fact of congressional restrictions requiring that the United States engage in serious negotiations to bring about an Asat agreement before any such test took place.

Prior to the test, the President certified, as required by law, that the United States had endeavored, in good faith, to negotiate with the Soviet Union a mutual and verifiable agreement with the strictest possible limitations on antisatellite weapons consistent with the national security interest of the United States. He also certified the other requirements for conducting the test: that pending agreement on such strict limitations, testing against objects in space of the F-15 launched miniature homing vehicle antisatellite warhead by the United States is necessary to avert clear and irrevocable harm to the national security; that such testing would not constitute an irreversible step that would gravely impair prospects for negotiations on antisatellite weapons; and that such testing is fully consistent with the rights and obligations of the United States under the Antiballistic Missile Treaty of 1972 as those rights and obligations exist at the time of such testing.

Yet this certification was a fraud, a demonstration to the Congress that the congressionally imposed certification in no way limited the freedom of the administration to conduct a test regardless of whether it was meeting the terms of the law. As ACDA director Ken Adelman put it in a May 20 letter to the Senate, "Tests of the MV Asat system are following a schedule determined by technical factors," not arms control.

Mr. Adelman's May 20 letter demonstrated that the administration was bent on conducting an Asat test regardless of the limits on the test imposed by Congress. In imposing an outright ban on further tests, subject only to Soviet testing, Congress is finally denying the administration any freedom to go forward with the Asat Program. This is an important step, since the administration demonstrated with its September test that it was fully willing to disregard looser congressional restrictions.

Despite the congressional requirement that the September test only take place after the United States conducted serious negotiations toward a treaty, the President stated in the certification document to the Congress that the United States was "unable to identify a specific Asat proposal which meets the requirements identified by the Congress in 1984," because "no arrangements or agreements beyond those already governing military activities in outer space have been found to date that are judged to be in the overall interest of the United States and its allies."

The Reagan administration continues to object to an Asat treaty on the ground that it cannot be verified, and that it is in the national security interest of the United States to develop the capabilities to destroy Soviet satellites. But a study commissioned by ACDA last year, written by William Durch of Harvard University, concluded that such a treaty is in the U.S. national interest.

Mr. Durch found several options available for the United States to accomplish Asat limitations.

If the objective of policy is to eliminate all dedicated, direct attack Asat capabilities, options for arms control would include, (a) a zero-possession regime coupled with a test ban, and (b) a test ban only, of indefinite duration. Option (a) entails verification of the dismantlement, or equivalent decommissioning, of the current Soviet coplanar ASAT capability, which may be difficult. An accompanying test ban and launch site inspection regime would seek to reduce Soviet confidence in covertly-retained interceptors, and to increase the amount of time required to use such interceptors, respectively. Option (a) is negotiable in principle, as dismantling and a ban on tests are both incorporated in the 1983 Soviet draft space treaty, but the U.S.S.R. has not acknowledged publicly that it possesses an ASAT capability.

Option (b) would bypass the problem of dismantling and seek to produce the operational results of option (a) through decay of existing capability from lack of testing and troop training. Because it does not seek to eliminate the current Soviet ASAT system and makes no provision for testing a U.S. system to a comparable level of proficiency, option (b) could be viewed as unbalanced. However, considering the limited reach of the Soviet coplanar system and its spotty success record, the effective difference between a dismantling regime and a test ban could be low. Moreover, a test ban would address future capabilities, such as improved orbital or direct ascent interceptors, or beam weapons, that coud pose a real threat to American statellites. Negotiability seems feasible, since the U.S.S.R. has proposed a moratorium on space testing of ASATs.

A modified form of option (b) would be consistent with the research program associated with the strategic defense initiatives, namely, a 3-5 year testing moratorium in lieu of one of indefinite duration.

Options (a) and (b) would require that the United States forego testing and deployment of the F-15/MV system. Thus the U.S. would not develop a capability to destroy by impact such targets as Soviet ROSAT/EROSAT constellations. It would retain the option to negate those constellations by nondestructive means.

Mr. Durch then identified two other Asat treaties that the United States could seek to negotiate:

If the objective of policy is to place a ceiling on ASAT capabilities with one operational system each, options would include, (c) possession of "one current type" ASAT with further testing allowed, or (d) "one current type" with a declining test quota and a test ban on all other types of ASAT means. Option (c) permits the United States to test and deploy the F-15/MV system, and conceivably to test upgraded systems. This

option avoids the dismantling questions, but its negotiability is uncertain. If the U.S.S.R.'s major objective in undertaking such a negotiation is indeed to ban space weapons, then this approach may be acceptable, even though it tends to provide the United States with a technological edge which it is permitted to maintain. Restraining U.S. technology is frequently a key arms control objective for Moscow. Finally, option (c) does less for the potential impact of ASAT on crisis stability than either option (a) or option (b).

Option (d) allows the United States to develop the MV system but closes down testing after an agreed period of time and/or number of tests; and it bans outright the testing of all other types of ASAT's (eg, directed energy systems). It would thus fall between the first two options and option (c) in terms of immediate impact on crisis stability: over time, both sides would tend to lose confidence in their ASAT systems. It would prohibit space-based ASAT capabilities and testing of high-altitude direct-ascent or ground-based co-orbital systems. It is likely to be somewhat more negotiable than option (c); if enacted after 1985-1986, it reduces to option (b).

Any of these options could be associated with an ASAT non-use agreement, as discussed in text. A non-use agreement would extend to all satellites the type of protection now enjoyed by satellites used as national technical means of verification.

In the course of his paper for ACDA, Mr. Durch elaborately discussed each of these alternatives for an Asat agreement. Yet the President, in making his certification to Congress, stated:

No arrangements or agreements beyond those already governing military activities in outer space have been found to date that are judged to be in the ovrerall interest of the United States and its Allies.

For the record, I want to take a moment to list at least five possible Asat proposals that I believe the Reagan administration could have sought in Geneva in compliance with the intent of Congress:

First. A ban on all testing, use, and possession of all Asat capability.

Second. A ban on all testing, use, and possession of dedicated Asat's.

Third. A ban on use and testing, but not possession, of dedicated Asat's.

Fourth. A ban on development or use types Asat's; no restrictions on existing Asat systems.

Fifth. A ban on the use of Asat's: no restrictions on possession or testing.

There is some expert consensus that the first type of agreement is unattainable at the present time, because some non-Asat systems have some theoretical capability to serve as Asat's. Residual capabilities would remain even if dedicated Asat systems were banned.

But the second type of agreement is something we could negotiate if the Reagan administration desired to protect our satellites and limit competition in space weaponry. Even if administration believes that verification problems prevent the second type of agreement because of the Soviet possession of an Asat today, it could certainly have tried to negotiate the third type of treaty, halting use and testing. The fourth type of treaty, banning development and use of new types of Asat's is clearly feasible, and might be in our interests since the Soviet Asat has little military use, and that little use would degrade further if the 3-year Soviet moratorium were made permanent by an accord.

Even the fifth type of agreement, despite its obvious limitations, is possible if the United States and Soviet Union chose to codify rules of the road to provide both sides with a buffer against use of Asat's.

Instead, the Reagan administration has said that no Asat proposal of any kind is in the national security interests of the United States, and therefore has not sought to negotiate one.

One reason the administration gives for its refusal to negotiate any Asat limits is its claim that any limits on Asat's are not verifiable.

The truth is that despite the administration's claims, we can verify the current Soviet system. We know they have a system—we know how big it is—we know how many tests of it have been conducted—we know how many of them have succeeded—we know how long it takes to intercept an object in space—and in what orbital inclinations. We know the Soviet Union hasn't tested it in more than 3 years. We know from numerous nonclassified published reports and testimony that in all it has been tested 20 times. We know it has failed to intercept its target 11 times, for an overall success rate of just 45 percent. We know the Soviet Asat is not exactly a modern, state-of-the-art weapon—it was introduced in 1968. We know it is lofted into orbit atop a modified SS-9 booster rocket, a large-liquid fueled intercontinental ballistic missile, and weighs more than 2,000 kilograms and is about 6 meters long. We know in each test it has been launched from Tyuratum in Karzakhstan into orbits within a narrow range of inclinations—between 62 and 65 degrees with respect to the Equator. We know that to test it the Soviets have launched target satellites into orbits within the same narrow range of inclinations. We know it takes the Soviet Asat one to two trips around the Earth before its orbit crosses that of the target and interception occurs. And yet the administration claims that somehow this system is unverifiable.

The limited orbital inclination and the fact that there are so few U.S. satellites at these inclinations have led some to speculate that the Soviet Asat may be intended for attacking Chinese satellites rather than U.S. satellites. Whatever the intent of the Soviet Asat Program, it clearly does not today threaten most U.S. satellites. The administration states that it can reach 5,000 kilometers or 3,100 miles. But it has never been tested above 2,400 kilometers. That might enable the Soviet Asat to threaten some few U.S. weather satellites and some military spy and communication satellites—on a two-shot basis. It does not enable the Soviets to threaten United States early warning satellites, which are vital to our national security. Nor does it enable the Soviets to threaten most other U.S. military satellites.

Moreover, the Soviet system is susceptible to countermeasures like jamming or deception of the radar homing device or evasive maneuvering on detection of the launch, since interception takes some 3 hours.

There are also some basic conceptual flaws in the Soviet Asat system. First, a satellite can be attacked only when its ground track runs close to the launch site of the Asat, a condition that is satisfied only for satellite orbits with inclinations higher than the latitude of the antisatellite weapon's launch site. This happens only twice a day, so one must wait an average of 6 hours to attack a given satellite. Second, the heavy antisatellite weapon itself requires a massive booster rocket, which can only be launched from a very limited number of facilities in the U.S.S.R. Third, it is difficult to fire massive liquid-fueled boosters in rapid succession from a single launch site.

When you put this all together, it is inescapable that we would have long responded one way or another to an attack on our satellites. It would take the Soviet Asat's a week or more to destroy low-level U.S. weather and reconnaissance satellites, and the Soviets could not touch our far more militarily important early warning satellites.

For these reasons, despite the administration certification, there was simply no reasonable military scenario arising in September whereby the Soviet Asat "threatens clear and irrevocable harm to the national security," as Congress required before such a test should have taken place.

The administration conducted the test anyway, disregarding the intent of Congress. And so, Congress has responded with this new moratorium, which should stop the Asat Testing Program for at least fiscal year 1986.

Congress has explicitly recognized that further testing of our Asat against objects in space jeopardizes our national security, precisely because the U.S. Asat is more sophisticated than the Soviet Asat, and will invite the Soviets to develop a comparable system to ours that is effective against our satellites.

The real threat to U.S. security is not the current Asat the Soviets have today but the Asat the Soviets will develop in the future should the United States decide to engage the Soviet Union in an all-out competition in

Asat technology. The result will be that 5 to 10 years in the future, the Soviets will be able to threaten more and more of our satellites, our space stations, and our space shuttle.

We have much to lose from this. We rely on our satellites for information that is vital to our national defense, from command and control of our military forces to early warning of nuclear attack. Our military forces are far-flung: not only do we have bases around the world, but the preponderance of our nuclear weapons are located beyond our shores. If our satellites were to be threatened, we would risk the decapitation of both nuclear and conventional forces, making it difficult for the United States to maintain a credible response to a sneak attack.

As the United States begins flying more frequent space shuttle missions to service, supply, and bring fresh crews to continuously inhabited space stations, the threat to U.S. interests from Soviet development of Asat technology will continue to grow. The long-term damage to our strategic security from the further development of Asat technologies by both sides thus far outweighs whatever short-term theoretical advantage the administration has claimed from going ahead with the testing of our current Asat.

In the words of Prof. Donald Hafner of Boston College, an adviser to the SALT delegation and the National Security Council in 1977–78:

> The opportunity that the United States now has before it to place constraints upon arms competition in the broad reaches of outer space is ripe but perishable. The ASAT technologies currently available to the United States and the Soviet Union are crude but suggestive. Should the momentum of ASAT programs increase, it is evident that the two sides will provoke the other into expending billions of dollars, all in preparation for a "Brobdingnagian skeet shoot" from which neither side is likely to derive a net advantage in security.

Mr. President, let me briefly summarize the arguments in favor of achieving an Asat treaty.

First, Asat's extend the arms race into outer space, and can be used to attack reconnaissance, navigation, early warning and communication satellites. These Asat missions are part of a first strike strategy which emphasizes winning a nuclear war through initiating the nuclear exchange. Asat's help make possible a preemptive attack in a time of crisis.

Second, as the SDI Program acknowledges, Asat technology is essentially a more primitive version of ABM technology. If we are to prevent the ABM Treaty from being eroded further, we need to add an Asat Treaty that would further limit the development of space weapons, originally designed for Asat functions, that would have some capabilities as the kind of ABM systems and components banned under the ABM Treaty.

Third, an unconstrained arms race in space to deploy ABM's will reduce international stability by intensifying the buildup of offensive nuclear weapons and countermeasures designed to overwhelm the defense.

As Albert Wheelon, senior vice president of the Hughes Aircraft Corp., and a former defense analyst with the CIA told Science magazine—

> It's a good idea and to everyone's net advantage to keep mines and torpedoes and lasers and other weapons out of space.

An Asat treaty is in the U.S. security interest and can be verified, according to scientists, because the United States has "very robust" technologies to detect tests of Asat's—indeed, we know the dates and types of every Soviet Asat test from 1968 through 1982, when the Soviet Union conducted its last test of an Asat.

We know that the Soviets have had 12 failures and 9 successes in testing their Asat overall, and that their first-generation Asat failed five times in out of 14 tests, and that their second generation Asat failed every time it was tested.

As Leslie Dirks, vice president of Raytheon Corp., told Science:

> I'm quite confident that testing things surreptitiously in space is a hard thing to do, and the United States has a very robust detection capability in this area. It would be pretty difficult to guarantee absolutely that no testing was going on. But I hope one would take a liberal view of the verification problems, and be prepared to take a few risks, because there are clearly strong U.S. national interests in a treaty that would deter continued testing of the existing Soviet ASAT or prevent the development of a better Soviet system.

Mr. President, as Commander in Chief, President Reagan is responsible for ensuring that our Nation can never be threatened by a foreign power. An Asat agreement is in the national interest. It is time that the administration uses the opportunity given it by the Congress and by the Geneva talks to negotiate real limits on Asat systems as one step in achieving the comprehensive goal of a ban on all weapons in space.●

FEDERAL TECHNOLOGY TRANSFER ACT OF 1985

● Mr. D'AMATO. Mr. President, I rise today in support of legislation, the Federal Technology Transfer Act of 1985, proposed by my distinguished colleague from Washington, Mr. GORTON.

This legislation addresses an overlooked area of our Federal research efforts—the inability of Federal laboratories to work collaboratively with private research labs. Because collaborative research is not allowed in Federal laboratories, the capabilities of these institutions are limited significantly.

Current research in this country is extremely isolated and independent. Quite often, one laboratory is unaware of activities taking place in another laboratory which is performing comparable research. As a result, there is a great deal of duplication within the research community. Easier and more accessible exchange of information would decrease this redundancy and would promote educational and informational exchanges among researchers.

The Federal Technology Transfer Act of 1985 attempts to alleviate this duplication. This legislation establishes a Federal Laboratory Consortium to promote the exchange of information between Federal and private laboratories.

This information center would be administered by the Bureau of Standards, a Federal organization very experienced in facilitating the dissemination of information. The Bureau of Standards has expressed a desire to administer this program.

A great deal of innovative research takes place in non-Federal laboratories. Companies and universities are involved in a broad spectrum of research, much of which is related to research taking place in Federal laboratories. Not promoting collaborative research efforts only hurts our Federal research efforts.

In addition to this technological exchange, S. 1914 provides Federal researchers with a percentage of the royalties if their research leads to a viable product sold in the marketplace. This type of incentive encourages quality research within Federal laboratories, and it promotes collaborative efforts between Federal and private researchers. This type of incentive can only lead to a greater quality of research in this country.

I call on my colleagues to join me in promoting the research efforts of this country.●

THE MOTOR VEHICLE INFORMATION AND COST SAVINGS ACT

● Mr. ZORINSKY. Mr. President, I was pleased the Senate Friday passed by unanimous consent S. 475, a bill I cosponsored providing increased protection to motor vehicle consumers from odometer fraud.

Widespread odometer fraud is costly and potentially hazardous to the consumer. It is estimated that of the 20 million to 40 million used cars sold annually in the United States, approximately 3 million had the odometer reading rolled back, costing consumers $2 billion per annum.

The average odometer rollback is approximately 30,000 miles for each car tampered with. Common sense dictates that a consumer who buys a car with 90,000 actual miles, believing that

it has 60,000 miles or less, may rely on the car to perform in an unrealistic manner and may be running a risk to his or her safety.

Odometer fraud is lucrative, on the rise, and can currently be committed with little chance of being caught. This bill will close a substantial loophole in current law and increase the available criminal penalty from a maximum of 1 year in jail to 3 years, and increase potential civil penalties from $1,000 to $2,000.

Federal law currently mandates that a written statement disclosing the odometer reading be presented to the buyer when a vehicle is sold. However, it does not require that the disclosure be a part of the title. Therefore, an unscrupulous buyer can destroy the piece of paper with the odometer reading, rollback the odometer, and prepare a fraudulent disclosure for the next buyer. Significantly, S. 475 will require the odometer reading to be on the title, making this type of fraud impossible.

Mr. President, I congratulate my colleague from Nebraska, Senator EXON, for sponsoring this legislation. I look forward to quick action on it by the House of Representatives.●

POLAND UNDER SIEGE: THE FOURTH MARTIAL LAW ANNIVERSARY

● Mr. D'AMATO. Mr. President, on the night of December 12-13, 1981, the most devastating damage ever perpetrated against the people of a Helsinki signatory state was dealt to the Polish people. Today marks the fourth anniversary of the declaration of martial law in Poland, a day when 8 out of the 10 fundamental Helsinki principles were violated in one fell blow. As Chairman of the U.S. Helsinki Commission, I would ask my colleagues in Congress to consider that for 4 years the Polish people have lived under a state of siege by their own government. Yet, recent months have witnessed the attempts of General Jaruzelski to obtain in the West the legitimacy that he is denied at home. Will Jaruzelski's travels to the West—against the picture-postcard backdrop of the U.N. Building, the Eiffel Tower, the personal vignettes that portray him as a devoted family man—blot out our memories of only 4 years ago, of water cannon and night sticks wielded by helmeted mobile security police against defenseless crowds?

Jaruzelski has calculated that our memories in the West of the dramatic and violent aftermath of martial law are short and convenient. The more invidious regime efforts to destroy all independent associations and activities now underway in Poland are harder for the Western press and public to grasp. The careful orchestration of periodic, but highly conditional amnesties is designed further to complicate our image of the human rights picture in Poland. Yet, new arrests of amnestied Solidarity members and unofficial publishers, have brought to 265 the number of prisoners of conscience in Poland today. And what of the murdered priests, attacks by "unknown assailants" and disappearances of union sympathizers, the threats of violence against activities? We have recently learned about the purges in universities, where 70 deans and rectors have been fired for trying to maintain high standards of free and searching academic inquiry.

Today is the day to remember that human, civil, and trade union rights in Poland remain under siege. And Poland continues to resist. The living legacy of Solidarity can be found in nationwide union networks, above, and underground, the literally hundreds of unofficial publishing houses, the constellations of independent cultural and educational groups all seeking to preserve and develop within Polish society a national pride and consciousness free from the suffocating control of the regime.

Four years ago, this body voiced its outrage. Symbolic candles were lit in homes across America for the people of Poland. Can we forget the alarming images that fluttered across our television screens at Christmastime only 4 years ago? Mr. President, on this tragic December 13 anniversary, we must pause to consider the high price still being paid in Poland for defending the values that we share. We in Congress must send a clear message to General Jaruzelski that our outrage and concern has not diminished with time. His slick public relations campaign will not work here. His image can only be altered by the release of prisoners and by putting an end to police state methods against Solidarity and other defenders of freedom and independent culture in Poland today. In short, when Jaruzelski delivers on the promises that the Polish Government made when it signed the Helsinki Final Act and the Gdansk Agreement.●

WILL TRIDENT II CONTRIBUTE TO STABILITY?

● Mr. KERRY. Mr. President, when it comes to our national security, the issue must not be how much we spend on the military, as is suggested when the Pentagon claims that the Gramm-Rudman-Hollings bill will "give comfort to the Soviet Union."

When you claim that throwing money at the Pentagon is the only measure of U.S. national security, you lose sight of our real interests. What we have to ask ourselves is what kind of defense will buy us real national security—stability—the security that when it comes to a crisis, no one will ever have the incentive to start a war between the superpowers, conventional or nuclear.

Keeping the peace through military stability has got to be our priority when it comes to defense. The goal of stability must be a factor in judging every strategic weapons system.

When you look at the trillion dollars we have spent on the military during the first 5 years of this administration, it is regrettably easy to see that we are spending billions of dollars on things that do not add to stability—and that may even reduce it.

What kinds of systems are destabilizing? As retired Gen. Glenn Kent has forcefully argued, any system that decreases the aim points for the enemy, such as the MX, is destabilizing. Similarly, any system which is more costly to build than to destroy, is destablizing, and this argument against the deployment of strategic defenses is one which even administration officials such as Ambassador Paul Nitze accept.

Asat systems are destabilizing, because their development threatens the satellites which both sides use for early warning and for military communications, adding an incentive for a first strike.

One of the problems of the Reagan military buildup is that the Reagan administration is not making choices between destabilizing first-strike weapons and potentially stabilizing second-strike weapons, which contribute to deterrence.

Next year, Congress will have to decide whether to build a new strategic system, the Trident II or D-5 missile, a weapon that could cost $50 billion or more.

As an article which appeared in the December 11, 1985, issue of the Chicago Tribune suggests, D-5 would for the first time give "U.S. submarines the ability to destroy hardened targets in the Soviet Union—like missile silos and command centers. And it will be able to do so within 15 minutes of launch."

The writer, Stephen Chapman, concludes that this "formidable capacity is valuable only if the United States might want to start world war III. It is of scant value if the purpose of the American nuclear arsenal is, as it should be, not to start a war but to deter one."

The potential of the Trident 2 with the D-5 missile to threaten a first-strike is an issue which I believe this body needs to consider carefully next year as it decides whether the administration should start buying this system.

I ask that the Chicago Tribune article, "The Trouble With the Trident II," be printed in the RECORD at the conclusion of my statement.

The article follows:

THE TROUBLE WITH THE TRIDENT II

In the aftermath of the Geneva summit, the Reagan administration continues to hold out the hope of progress in restraining the nuclear arms race. But it is on the verge of deploying a new weapon that will speed up the race, at a large cost in both dollars and nuclear stability.

Unlike the land-based MX missile, whose proposed deployment has been sharply curtailed and whose ultimate fate is still in doubt, the submarine-based Trident II has had no trouble on Capitol Hill. For many members who oppose the MX, a vote for the Trident II has been a way to mollify the hawks at home.

Still, after providing some $7 billion to develop the weapon, Congress has to decide next year whether to let administration start buying it. Despite the high price tag—over $50 billion, or some $35 billion more than sticking with the existing missile—everyone expects the answer to be yes.

The Trident II missile, also known as the D-5, is designed to replace the existing ballistic missiles on American submarines. It will dramatically increase this force's size, explosive power range and accuracy. This last is crucial. For the first time, the Trident II gives U.S. submarines the ability to destroy hardened targets in the Soviet Union—like missile silos and command centers. And it will be able to do so within 15 minutes of launch.

This extreme accuracy might not matter if only a handful of missiles were contemplated. But the Pentagon plans to buy nearly 600 of them, carrying some 5,200 nuclear warheads. After subtracting for those submarines that are in port at any given time, the U.S. would have the capacity to deliver at least two warheads on every Soviet missile silo—with plenty left over for command centers and strategic air bases. Especially when combined with the MX and Pershing II missiles, the Trident II gives the U.S. something like the ability to destroy the Soviet deterrent on the ground.

That formidable capacity is valuable only if the U.S. might want to start World War III. It is of scant value if the purpose of the American nuclear arsenal is, as it should be, not to start a war but to deter one. Deterrence requires an ability to annihilate the Soviets if they attack first, thus eliminating any incentive for them to do so.

The Trident II, like other super-accurate missiles, actually provides an incentive. In a period of extreme tension, Soviet planners would be confronted with the risk of losing their means of retaliation to an American attack. They would be encouraged to preempt the U.S. threat by hitting first themselves. At the very least, they would be compelled to adopt a policy of launch on warning, thus increasing the chance that a mistake will set off the final holocaust.

It may be argued that, even with the Trident II, the U.S. would have nothing to gain by striking first. Hitting all the Soviets' land-based forces, the thinking goes, would leave them with the ability to retaliate with their own submarine-based missiles.

There are two flaws in this argument. The first is that fewer than one-fourth of the Soviets' missiles are based at sea, compared with half for the U.S., which means they have more to fear from an attack on their land-based forces. The second is that because of their comparative noisiness, Soviet submarines are vulnerable to antisubmarine warfare—unlike American ones, which are beyond any Soviet hope of detection, much less destruction.

The best measure of how alarming the Soviets will find this new threat is the trouble the U.S. has taken to avoid being put in a similar position. Thanks to a calculated shift to sea, only 18 percent of our nuclear warheads remain in land-based missiles. And yet Americans were acutely worried when Soviet advances put our ICBMs at risk. Remember the "window of vulnerability" decried by Ronald Reagan in his 1980 campaign?

The Trident II would be worth building if the effect were to scare the enemy into more peaceable conduct. But the opposite is likely to be true. If its great accuracy has any use at all, it is to threaten the Soviet deterrent. That makes the missile an expensive way to reduce American safety.●

THE NESTER HOSE COMPANY'S 100TH ANNIVERSARY

● Mr. D'AMATO. Mr. President, I rise today to recognize and commend the Nester Hose Company of volunteer firefighters for 100 years of dedicated service, which will be celebrated at their annual banquet on January 31, 1986.

This historic milestone is backed by a proud tradition of men who gallantly and selflessly have volunteered their time and talents to the residents of Geneva, NY. Now more than 200-members strong, the Nester Hose Company carries the legacy of their forebears with great pride and determination. Their aim to protect the lives and property of their community has earned them both great respect and well-deserved admiration.

As a volunteer firefighter myself, I take special pride in these citizens who risk their lives in service of others. They risk their lives against a force which knows no bounds and discriminates against no one. Every year in the United States, fires kill about 10,000 persons, injure about 140,000 others, and destroy more than $6 billion worth of property. Thanks to the volunteers of the Nester Hose Company, ready to respond at any hour of the day or night, the residents of Geneva can sleep peacefully.

I join many members of the Geneva community in commending these volunteers for their courage, dedication, and unswerving loyalty. I hope their centennial celebration marks the beginning of another 100 years of continued success.

Mr. President, I thank you for allowing me this opportunity to salute the Nester Hose Company. They make it possible for us to function safely without fear in our daily lives.●

SUPPORT FOR "HANDICAPPED PARKING ACT OF 1985"

● Mr. WEICKER. Mr. President, I rise today to join my distinguished colleage, Senator KERRY, in supporting the "Handicapped Parking Act of 1985." This bill addresses a problem faced by the majority of our Nation's handicapped persons whose mobility is impaired: State reciprocity in honoring handicapped parking stickers.

Currently, the majority of our handicapped citizens are impeded in their ability to properly utilize special parking privileges designated to them because of the lack of reciprocity from State to State in honoring handicapped parking permits. Law enforcement officials, unaware of symbols used to identify vehicles entitled to use handicapped parking spaces, may unintentionally issue parking citations to handicapped individuals who travel to other jurisdictions. Recently a woman named Ruby DeGiovanni brought this problem to the public's attention.

Mrs. DeGiovanni, herself mobility impaired, was traveling from Connecticut to her doctor's office in Massachusetts. She received a parking ticket for parking in a designated handicapped parking space even though she holds a valid handicapped parking permit in Connecticut entitling her to park in handicapped parking spaces. There is currently no Federal law that allows handicapped persons in one State to cross the line and use handicapped parking spaces in other States. Crossing a State line does not change a handicapped person's need for a handicapped parking space.

For most travelers the major factor limiting travel is cost. But for a percentage of Americans freedom to travel is limited by conflicting State laws. Mobility impaired citizens have been denied what virtually every American assumes to be a natural birthright—mobility. Currently 6.5 million handicapped Americans are mobility impaired and in need of special parking permits to ensure their personal mobility. However, only 26 States have reciprocity agreements honoring handicapped permits.

Clearly, disability does not end when crossing State lines. The handicapped Parking Act of 1985 will require all States to honor the international symbol of access and grant general reciprocity to persons displaying this symbol and properly utilizing designated handicapped parking spaces.

Accessibility cannot be denied to handicapped people on the basis of what State they are in. Our Nation's handicapped citizens deserve every avenue of access if they are to fully exercise their rights in our society. I urge my colleagues to join me in reaffirming their support for full citizenship of handicapped persons by cosponsoring the Handicapped Parking Act of 1985.●

INTERNATIONAL DRUG INTERDICTION

● Mr. GARN. Mr. President, recently an article appeared in the December

issue of the U.S. Naval Institute's publication Proceedings. This article, written by Rear Adm. Norman C. Venzke, concisely describes the difficulties of dealing with international drug interdiction. As a former member of the Coast Guard, Rear Admiral Venzke effectively illustrates the enormous task of those who are fighting the war against drugs. He also offers concrete suggestions for improving our international drug interdiction efforts. I highly recommend this article to my colleagues.

Mr. President I ask that the text of the article be printed in the RECORD.

The article follows:

[From Proceedings Magazine, December 1985]

NOBODY ASKED ME, BUT . . .

(By Rear Adm. Norman C. Venzke, U.S. Coast Guard (Retired))

What is the "Drug War" threat?

Discussions of the "drug war" and various methods for winning it are rampant. But what's the story? Why is it called a war? Where does this war fit in our national strategy? How successful are we in fighting this war? I'd like to share my thoughts on the answers to these questions from my perspective as one who recently retired from the service assigned to front-line duty in this war.

First, the threat can best be measured by the estimated street value of smuggled drugs—more than $100 billion per year! The adverse effects of that trade are obvious. The drug trade offers no benefits to the United States.

Second, the United States is at war with the drug smuggler. He is a clever adversary whose goal is a form of aggression—monetary greed at the expense of many victims. Also, it is possible that some governments are employing narcotics trafficking as a strategy to undermine democratic societies. And, narcotics profits may be converted into munitions for terrorists. We employ innovative, bold, and flexible tactics to anticipate and defeat the guerrilla-like operations of these traffickers. It is an air and sea operation. We rely heavily on intelligence. We employ operational security precautions to protect our operations from compromise. Effective command and control are required. Well-planned logistics are necessary to support the large numbers of interdicting ships and aircraft. Force, including disabling fire, is required quite often.

Third, the Reagan administration stands strong in the fight against illicit narcotics. Its actions include the development of a national strategy and the formation of the National Narcotics Border Interdiction System (NNBIS).

The "National Strategy for Prevention of Drug Abuse and Trafficking" is a comprehensive approach to reducing the availability of illict drugs and reducing adverse effects of drug abuse on the individual and society. The five major elements of the administration's drug program are: drug abuse prevention through awareness and action; drug law enforcement; international cooperation to control narcotics; medical detoxification and treatment; and research directed at causes, treatments, and understanding of drug addiction.

Established in 1983, NNBIS coordinates the activities of the many federal, state, and local agencies that must attempt to stop narcotics at the border. With NNBIS, coordination and intelligenece support both have improved significantly.

But how successfully are we waging the drug war at sea? Not as effectively as we could be by a long shot. Interdiction is a "stopgap" measure which buys the time the national strategy needs to reduce the demand for illegal drugs and to eliminate the supply of drugs.

Our maritime marijuana seizures over the past seven years do not suggest any significant trends. No doubt we have hurt the smuggler and increased his cost of doing business. On the other hand, we have not rendered smuggling unprofitable or effectively severed smuggling routes for an extended period of time.

We have not been as successful as we might have been for five reasons:

No one is in charge of drug war operations. Unified action is needed to fight any air/sea war encompassing a large area. NNBIS provides for coordination or, in other words, a loose confederation of agencies. It does not provide effective command and control. Its regional coordinators are divided between the Coast Guard and the Customs Service.

No approved drug interdiction strategy exists. One should be developed within the framework of the national strategy. This is necessary if we are to achieve effective and cost-effective operations over the long haul. Anti-drug running operations are currently planned on an ad hoc basis.

A force mix to fight this war has not been developed. If a "commander in chief" were appointed and an approved interdiction strategy adopted, an appropriate force mix could be developed. Some agencies are proceeding independently in developing their own force mixes for employment in joint jurisdiction areas. Congress has provided needed equipment on its own initiative. These procedures will not result in the most effective force mix in the long run.

Sufficient ships and aircraft are not available to law enforcement agencies (and probably never will be) to meet the requirements which long-term operations demand to counter the threat. Thus, additional support from the U.S. Navy during surge periods is necessary.

Jurisdictional questions among government agencies require resolution. First, the Customs Service and the Coast Guard exercise joint jurisdiction within customs waters (12 miles). Second, the Customs Service has acquired responsibility for interdiction of aircraft, which involves detection of air smugglers over the high seas using long-range patrol aircraft (P-3A). Customs is reportedly considering using medium-range aircraft to detect surface craft on the high seas and is developing "marine modules" for interdiction in customs waters and perhaps beyond.

I offer some recommendations:

Fight the drug war in the same way as any other war: Employ the unified approach.

Improve command and control: Draw upon the successes of Operation Market Time from our days in Vietnam. During that operation, Commander Task Force 115 (CTF-115) commanded all interdiction forces from the demilitarized zone to Cambodia. The U.S. Navy, Coast Guard, and the Royal Thai Navy contributed the forces. CTF-115 divided his forces into four task groups which were comprised of inshore patrol vessels, offshore patrol ships, and Navy patrol aircraft. This approach is in contrast to maritime drug interdiction operations, where no one officer is responsible for an entire region.

Determine which agency—Customs Service or Coast Guard—has primary responsibility in the at-sea customs business and if there is a real need for developing another federal maritime law enforcement agency.

Assign operational control of all maritime interdiction operations, including air detection and surface interdiction, to the Coast Guard. The proposed area of operations would extend from either the shoreline, or 12-mile limit, seaward depending upon resolution of the question of which agency is responsible for the customs business from the shoreline to the 12-mile limit. This should not impact upon the coordinating role of NNBIS, which has a number of regional coordinators—New York Customs, Miami Coast Guard, New Orleans Coast Guard, Chicago Customs, etc.

Task the Commander Atlantic Area and Commander Pacific Area for interdiction operations within their respective areas (the North Atlantic, Gulf of Mexico and Caribbean, and the Pacific Ocean) and the development of a strategy and required force mix. Currently, the area commanders have been left "out of the loop." Their respective district commanders could serve in the specific role of "task group" commanders without making changes to the existing organization.

As a footnote and in anticipation of an allegation of parochialism, there is a sound rationale for the Coast Guard to have the maritime interdiction mission. The Coast Guard:

Was formed in 1790 to suppress maritime smuggling;

Performed maritime interdiction of whiskey during prohibition;

Participated in Operation Market Time in Vietnam to suppress shipments of munitions;

Possesses the infrastructure necessary for support of ships, boats, and aircraft in maritime law enforcement; and

Has area commanders "double-hatted" as Commanders, Maritime Defense Zone, under their respective fleet commanders in chief. Their wartime duties involve maritime interdiction of various threats—analogous with drug interdiction.

The Coast Guard simply is in the best position to assess the drug threat within its areas of operations.●

RETIREMENT OF DONALD HIRSCH

● Mr. WEICKER. Mr. President, I rise to pay tribute to Mr. Donald Hirsch, who is retiring this month after a distinguished career of public service.

During the past year, I have become very well acquainted with Mr. Hirsch, who has become virtually indispensable as a consultant to the Labor-HHS-Education Appropriations Subcommittee. Time and time again, he has helped us resolve highly complex technical matters relating to appropriations legislation, often working under the pressure of extremely tight deadlines. He has never complained about the long hours due to the all too frequent night sessions of the Senate. I find it hard to understand how Don maintains his cheerful disposition

under the most adverse of circumstances.

For many years prior to his assignment with the Appropriations Committee, Don Hirsch provided valuable technical assistance in his capacity as Assistant General Counsel for the Department of Health and Human Services, and prior to that, as Deputy Chief of the Legislation Division in HHS's Office of the General Counsel. He also served as Deputy Chief of the Education Division and as Special Assistant, to the General Counsel in the former Department of Health, Education, and Welfare. In the early 1960's, Mr. Hirsch was assistant U.S. attorney for the District of Columbia and his governmental service in 1958 was as a legislative attorney for the Department of Health, Education, and Welfare.

He is the recipient of numerous awards, including a Superior Service Award in 1972, a Distinguished Service Award in 1975, a Special Citation from the Secretary of HEW, and a Senior Executive Service bonus award in 1982.

Over the years, Mr. Hirsch has had extensive teaching experience, including many seminars on the legislative process, and frequent lectures on legislative drafting and the legislative and appropriations process. In 1980, he published "Drafting Federal Law," establishing him as one of the Nation's leading experts in this area.

It has been a long journey from his graduation from Harvard Law School in 1958, and the college of arts and sciences at New York University in 1951. That journey included 4 years of service with the U.S. Air Force between 1951-1955. The journey is far from complete, however, since I understand Mr. Hirsch will be active as a consultant and educator following his retirement from Federal civil service.

On behalf of all the members of the Appropriations Committee and its staff, we wish Don Hirsch the best of luck and happiness in his future endeavors.●

ORDERS FOR TUESDAY

RECESS UNTIL 9 A.M.

Mr. SIMPSON. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 9 a.m. on Tuesday, December 17, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. SIMPSON. Mr. President, following the recognition of the two leaders under the standing order, I ask unanimous consent that there be a period for the transaction of routine morning business, not to extend beyond the hour of 9:30 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOMINATION OF JAMES L. BUCKLEY

Mr. SIMPSON. Mr. President, at the hour of 11 a.m., the Senate will turn to the consideration of the Buckley nomination under a previous unanimous-consent agreement, with a 1-hour time limitation.

A vote will occur on the confirmation of James L. Buckley.

RECESS FROM 12 NOON UNTIL 2 P.M.

Mr. SIMPSON. Mr. President, I ask unanimus consent that on tomorrow the Senate stand in recess between the hours of 12 noon and 2 p.m. in order for the party caucuses to meet.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. SIMPSON. Mr. President, when the Senate reconvenes at 2 p.m., the Senate will be expected to turn to any legislative or Executive orders that have been cleared. The Senate may turn to the consideration of the farm credit bill, S. 1884, or the conference reports to accompany H.R. 2100, the farm bill, or House Joint Resolution 465, the continuing resolution.

Rollcall votes can be expected to occur throughout the day on Tuesday.

RECESS UNTIL TOMORROW AT 9 A.M.

Mr. SIMPSON. Mr. President, I move that under the previous order, the Senate now stand in recess until the hour of 9 a.m., Tuesday, December 17, 1985.

The motion was agreed to; and the Senate, at 6:47 p.m., recessed until Tuesday, December 17, 1985, at 9 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate December 16, 1985:

DEPARTMENT OF JUSTICE

John R. Bolton, of Virginia, to be an Assistant Attorney General.

U.S. INTERNATIONAL TRADE COMMISSION

Anne E. Brunsdale, of the District of Columbia, to be a member of the U.S. International Trade Commission for the term expiring June 16, 1983.

DEPARTMENT OF COMMERCE

Paul Freedenberg, of Maryland, to be an Assistant Secretary of Commerce.

DEPARTMENT OF THE TREASURY

Francis Anthony Keating II, of Oklahoma, to be an Assistant Secretary of the Treasury.

DEPARTMENT OF THE INTERIOR

Ralph W. Tarr, of Virginia, to be Solicitor of the Department of the Interior.

DEPARTMENT OF ENERGY

John C. Layton, of Virginia, to be inspector general of the Department of Energy.

David M.L. Lindahl, of Virginia, to be Director of the Office of Alcohol Fuels.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

Ford Barney Ford, of Virginia, to be a member of the Federal Mine Safety and Health Review Commission for a term of 6 years expiring August 30, 1990.

NATIONAL MEDIATION BOARD

Walter C. Wallace, of New York, to be a member of the National Mediation Board for the term expiring July 1, 1987.

Helen M. Witt, of Pennsylvania, to be a member of the National Mediation Board for the term expiring July 1, 1988.

Charles L. Woods, of California, to be a member of the National Mediation Board for the remainder of the term expiring July 1, 1986.

DEPARTMENT OF EDUCATION

Bruce M. Carnes, of Virginia, to be Deputy Under Secretary for Planning, Budget and Evaluation, Department of Education.

Wendell L. Willkie II, of the District of Columbia, to be general counsel, Department of Education.

DEPARTMENT OF STATE

John Edwin Upston, of Virginia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Rwanda.

Rockwell Anthony Schnabel, of California, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Finland.

Margaret M. O'Shaughnessy Heckler, of Massachusetts, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Ireland.

Fred L. Hartley, of California, for the rank of Ambassador during the tenure of his service as Commissioner General of the United States Exhibition for the International Exposition, Vancouver, British Columbia, Canada, 1986.

U.S. ARMS CONTROL AND DISARMAMENT AGENCY

Michael H. Mobbs, of the District of Columbia, to be an Assistant Director of the U.S. Arms Control and Disarmament Agency.

U.S. INFORMATION AGENCY

Charles Edward Horner, of the District of Columbia, to be an Associate Director of the U.S. Information Agency.

SECURITIES AND EXCHANGE COMMISSION

Edward H. Fleischman, of New Jersey, to be a member of the Securities and Exchange Commission for the remainder of the term expiring June 5, 1987.

NATIONAL INSTITUTE OF BUILDING SCIENCES

Fred E. Hummel, of California, to be a member of the Board of Directors of the National Institute of Building Sciences for a term expiring September 7, 1986.

DEPARTMENT OF JUSTICE

Arnold I. Burns, of New York, to be Associate Attorney General.

MARINE MAMMAL COMMISSION

Robert Elsner, of Alaska, to be a member of the Marine Mammal Commission for the term expiring May 13, 1987.

DEPARTMENT OF COMMERCE

Alexander Hansen Good, of the District of Columbia, to be Director General of the United States and Foreign Commercial Services.

FEDERAL MARITIME COMMISSION

James J. Carey, of Illinois, to be a Federal Maritime Commissioner for the term expiring June 30, 1990.

DEPARTMENT OF ENERGY

Sylvester R. Foley, Jr., of Florida, to be an Assistant Secretary of Energy (Defense Programs).

DEPARTMENT OF DEFENSE

Chapman B. Cox, of Virginia, to be an Assistant Secretary of Defense.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

THE JUDICIARY

David R. Thompson, of California, to be U.S. circuit judge for the ninth circuit.

Bobby Ray Baldock, of New Mexico, to be U.S. circuit judge for the tenth circuit.

Glenn L. Archer, Jr., of Virginia, to be U.S. circuit judge for the Federal circuit.

Frank X. Altimari, of New York, to be U.S. circuit judge for the second circuit.

Patrick A. Conmy, of North Dakota, to be U.S. district judge for the District of North Dakota.

Lynn N. Hughes, of Texas, to be U.S. district judge for the Southern District of Texas.

Morris S. Arnold, of Arkansas, to be U.S. district judge for the Western District of Arkansas.

John T. Noonan, Jr., of California, to be U.S. circuit judge for the ninth circuit.

Deanell Reece Tacha, of Kansas, to be U.S. circuit judge for the tenth circuit.

Garrett E. Brown, Jr., of New Jersey, to be U.S. district judge for the District of New Jersey.

Robert L. Miller, Jr., of Indiana, to be U.S. district judge for the Northern District of Indiana.

Stanley Sporkin, of Maryland, to be U.S. district judge for the District of Columbia.

Alan B. Johnson, of Wyoming, to be U.S. district judge for the District of Wyoming.

J. Spencer Letts, of California, to be U.S. district judge for the Central District of California.

Dickran M. Tevrizian, Jr., of California, to be U.S. district judge for the Central District of California.

Harry D. Leinenweber, of Illinois, to be U.S. district judge for the Northern District of Illinois.

George H. Revercomb, of Virginia, to be U.S. district judge for the District of Columbia.

Duross Fitzpatrick, of Georgia, to be U.S. district judge for the Middle District of Georgia.

Harold L. Cushenberry, Jr., of the District of Columbia, to be an associate judge of the Superior Court of the District of Columbia for a term of 15 years.

Michael L. Rankin, of the District of Columbia, to be an associate judge of the Superior Court of the District of Columbia for a term of 15 years.

IN THE AIR FORCE

The following-named officers for appointment in the Reserve of the Air Force to the grade indicated, under the provisions of sections 593, 8218, 8373, and 8374, title 10, United States Code:

To be major general

Brig. Gen. William G. William G. Work, [redacted]FG, Air National Guard of the United States.

To be brigadier general

Col. Ray D. Airy, [redacted]FG, Air National Guard of the United States.

Col. Jacob J. Braig, [redacted]FG, Air National Guard of the United States.

Col. Alfred P. Bunting, [redacted]FG, Air National Guard of the United States.

Col. Jerry W. Cook, [redacted]FG, Air National Guard of the United States.

Col. Charles R. Driggers, [redacted]FG, Air National Guard of the United States.

Col. Ralph C. Jensen, [redacted]FG, Air National Guard of the United States.

Col. Joseph A. Kazek, [redacted]FG, Air National Guard of the United States.

Col. Curtis A. Madson, [redacted]FG, Air National Guard of the United States.

Col. Roy C. Martin, Jr., [redacted]FG, Air National Guard of the United States.

Col. Ernest C. Park, [redacted]FG, Air National Guard of the United States.

Col. John J. Roark, [redacted]FG, Air National Guard of the United States.

Col. Robert L. Slaughter, [redacted]FG, Air National Guard of the United States.

Col. John A. Slifer, Jr., [redacted]FG, Air National Guard of the United States.

Col. Thomas P. Webb, III, [redacted]FG, Air National Guard of the United States.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, Section 601:

To be lieutenant general

Maj. Gen. Richard A. Burpee, [redacted]FR, U.S. Air Force.

IN THE ARMY

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Robert L. Bergquist, [redacted] (age 54), U.S. Army.

IN THE NAVY

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370.

To be vice admiral

Vice Adm. William P. Lawrence, [redacted]/1310, U.S. Navy.

The following-named captains of the line of the Navy for promotion to the permanent grade of rear admiral (lower half), pursuant to title 10, United States Code, section 624, subject to qualifications therefor as provided by law:

UNRESTRICTED LINE OFFICER

To be rear admiral (lower half)

Phillip Don Smith.
David Roland Morris.
Fredrick John Metz.
Edward Bigelow Baker, Jr.
Peter Gordon Chabot.
Jimmie Wilkes Taylor.
John Franklin Calhoun.
George Henry Strohsahl, Jr.
Jesse Jiminez Hernandez.
John William Bitoff.
David Michael Bennett.
Thomas Alexander Mercer.
Leighton Warren Smith, Jr.
Richard Chester Macke.
Henry Clayton McKinney.
David Rogers Oliver, Jr.
Kenneth Leroy Carlsen.
David Brooks Robinson.
George Washington Davis VI.
Arlington Fichtner Campbell.
Jerome Frost Smith, Jr.
Stephen Kent Chadwick.
Glenn Edward Whisler, Jr.
Graig Emery Dorman.
Geoffrey Lynn Chesbrough.
Grady Lee Jackson.
James Bernard Greene, Jr.
Joseph Paul Reason.

RESTRICTED LINE OFFICER—ENGINEERING DUTY OFFICER

To be rear admiral (lower half)

George Richard Meinig, Jr.
Walter Hollingsworth Cantrell.

AERONAUTICAL ENGINEERING DUTY OFFICER

To be rear Admiral (lower half)

Larry Eugene Blose.

The following-named captains of the U.S. Navy for promotion to the permanent grade of rear admiral (lower half), pursuant to title 10, United States Code, section 624, subject to qualifications therefore as provided by law:

MEDICAL CORPS

To be real admiral (lower half)

Russell Larry Marlor.
Daniel Barfield Lestage.
Donald Floyd Hagen.
William Arthur Buckendorf.

SUPPLY CORPS

To be rear admiral (lower half)

Brady Marshall Cole.
Peter Demayo.
Francis Leonard Filipiak.

CIVIL ENGINEER CORPS

To be rear admiral (lower half)

David Elliott Bottorff.
Jon Robert Ives.

DENTAL CORPS

To be rear admiral (lower half)

Milton Chipman Clegg.

MEDICAL SERVICE CORPS

To be rear admiral (lower half)

Donald Eugene Shuler.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Vice Adm. Huntington Hardisty, [redacted]/1310, U.S. Navy.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Rear Adm. James H. Webber, [redacted]/1440, U.S. Navy.

IN THE AIR FORCE

Air Force nominations beginning Donald R. Klein, and ending Wesley G. Petty, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 6, 1985.

IN THE ARMY

Army nominations beginning Mani Bala, and ending Alan F. Weir, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 6, 1985.

Army nominations beginning Benny L. Bachulis, and ending Anthony E. Curcio,

which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 9, 1985.

IN THE COAST GUARD

Coast Guard nominations beginning John J. Clare, and ending Robert P. Sniffen, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 6, 1985.

Coast Guard nominations beginning Barry R. Moore, and ending John H. Wiger, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 9, 1985.

IN THE FOREIGN SERVICE

Foreign Service nominations beginning Frank A. Padovano, and ending John Riesz, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 4, 1985.

Foreign Service nominations beginning Gerald W. Harvey, and ending Vincente Tang, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 4, 1985.

IN THE NAVY

Navy nominations beginning Victor H. Ackley, and ending John E. Wilson, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 6, 1985.

Navy nomination of Donald F. Schorr II, which was received by the Senate and appeared in the CONGRESSIONAL RECORD of December 11, 1985.

Navy nominations beginning Briana M. Albert, and ending Eric J. Zintz, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of December 11, 1985.

HOUSE OF REPRESENTATIVES—*Monday, December 16, 1985*

The House met at 12 o'clock noon.

The Reverend Edward Gardiner Latch, D.D., L.H.D., former Chaplain of the House of Representatives, offered the following prayer:

Trust in the Lord with all your heart; and lean not on your own understanding. In all your ways acknowledge Him and He shall direct your paths.—Proverbs 3:5, 6.

Eternal God, who has given us the morning light, give us also the morning blessing as we lift our hearts unto Thee in prayer.

Grant unto us the blessing of wisdom—not only to make wise choices but also to find the right paths we ought to take.

Grant unto us the blessing of love. Give us grace to rise above the low prejudices that separate people and help us to enter the realm of high principles where all persons are brought together with respect and in good will.

Grant unto us the blessing of faith. In these trying times may we keep our faith in Thee and may this faith keep us strong and good.

As statesmen grant us wisdom, grant us love, grant us faith that in these trying times we fail not man nor Thee.

We pray for the families of those young GI's who were killed in the plane crash. May the time soon come when all planes shall be made safe for flying or perhaps we should get busy and see that this be done soon. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. GEKAS. Mr. Speaker, pursuant to clause 1, rule 1, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. GEKAS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 241, nays 121, answered "present" 5, not voting 67, as follows:

Mr. CARR changed his vote from "nay" to "yea."

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 3914. An act to preserve the authority of the Supreme Court Police to provide protective services for Justices and Court personnel.

The message also announced that the Senate had passed joint resolutions of the following titles, in which the concurrence of the House is requested:

S.J. Res. 214. Joint resolution to provide for the reappointment of Carlisle H. Humelsine as a citizen regent of the Board of Regents of the Smithsonian Institution; and

S.J. Res. 215. Joint resolution to provide for the reappointment of William G. Bowen as a citizen regent of the Board of Regents of the Smithsonian Institution.

PERMISSION FOR COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO SIT TODAY DURING 5-MINUTE RULE

Mr. MINETA. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation be permitted to sit today, Monday, December 16, 1985, during the 5-minute rule of the House.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, DC,
December 13, 1985.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, U.S. House of Representatives, Washington, DC.

DEAR MR. SPEAKER: Pursuant to the permission granted in Clause 5, Rule III of the Rules of the U.S. House of Representatives, the Clerk received at 10:20 a.m. on Friday, December 13, 1985, the following message from the Secretary of the Senate: That the Senate passed H.R. 3918, H.R. 3919, H.R. 1627, H. Con. Res. 247, and H. Con. Res. 239.

With kind regards, I am,

Sincerely,

BENJAMIN J. GUTHRIE,
Clerk, House of Representatives.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair desires to announce that pursuant to clause 4 of rule I, the Speaker signed the following enrolled joint resolution on Thursday, December 12, 1985:

H.J. Res. 476. Joint resolution making further continuing appropriations for fiscal year 1986.

And the following enrolled bills on Friday, December 13, 1985:

H.R. 664. An act to amend the Panama Canal Act of 1979 with respect to the payment of interest on investment of the United States;

H.R. 729. An act to amend the Panama Canal Act of 1979 in order that claims for vessels damaged outside the locks may be resolved in the same manner as those vessels damaged inside the locks, and for other purposes;

H.R. 1534. An act to convert the temporary authority to allow Federal employees to work on a flexible or compressed schedule under title 5, United States Code, into permanent authority;

H.R. 2976. An act to direct the Secretary of Agriculture to release the condition requiring that a parcel of land conveyed to New York State be used for public purposes and to convey U.S. mineral interests in the parcel to New York State;

H.R. 3735. An act to designate the pedestrian walkway crossing the Potomac River at Harpers Ferry National Historical Park as the "Goodloe E. Byron Memorial Pedestrian Walkway";

H.R. 3085. An act to clear title to certain lands along the California-Nevada boundary;

H.R. 1627. An act to designate certain National Forest System lands in the State of Kentucky for inclusion in the National Wilderness Preservation System, to release other forest lands for multiple use management, and for other purposes;

H.R. 3919. An act to extend temporarily the Dairy Price Support Program and certain Food Stamp Program provisions, and for other purposes; and

H.R. 3918. An act to extend until December 18, 1985, the application of certain tobacco excise taxes, trade adjustment assistance, certain Medicare reimbursement provisions, and borrowing authority under the Railroad Unemployment Insurance Program.

UNFAIR TRADE PRACTICES

(Mr. BONKER asked and was given permission to address the House for 1 minute.)

Mr. BONKER. Mr. Speaker, many of us learned over the weekend that the White House has backed away from its much heralded plan to penalize the next generation of Japanese semiconductor imports if those products are coming in at less than market value.

The allegation has been made that Secretary Baldrige has "overstepped" the authority given to him by the President. Actually, the Commerce Department was carrying out the Presidential trade offensive announced in September, to set up a "strike force" to deal with the unfair trade practices that exist.

A Washington Post article noted that the White House reacted after aides there were subjected to heavy lobbying all week by lawyers for the Japanese industry who wanted to narrow the scope of possible penalties.

Mr. Speaker, it is obvious to anyone familiar with the trade issue in this town what is going on. Former high-ranking officials in the Reagan Administration are now employed by law firms and consultants to represent foreign interests often at odds with our own Nation's best interests.

This reminds me of the example set by former Pentagon officials going to work for defense contractors, profiting from their knowledge and contacts gained by their work experience in the Federal Government.

Perhaps it is time that Congress placed some restrictions on this practice so that we can allow our Government to deal more effectively with our trade problems.

THE COMMUNIST SANDINISTA REGIME IN NICARAGUA

(Mr. LAGOMARSINO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAGOMARSINO. Mr. Speaker, it seems you can't pick up a newspaper these days without reading about some further abuses or persecution carried out by the Communist Sandinista regime in Nicaragua.

In recent days there have been reports of 300 opposition figures detained for questioning by the Communist Sandinistas. There have also been accounts of Roman Catholic bishops from Central America accusing Nicaragua's Government of persecuting the church and mistreating detainees.

The bishops' statement was released following a message sent by Pope John Paul last week to Nicaraguan Catholics which complained about "various forms of intimidation" against priests and church members. Cardinal Obando Y Bravo and Salvadoran Archbishop Rivera Y Damas were among those reported to have issued the statement condemning the Sandinista Communists.

And just today, the press is carrying a lengthy report of an interview with American labor leader Bill Doherty saying, "The Sandinista dictatorship is even worse than the Somoza dictatorship." In today's report he also says, "There are more Sandinistas, the true Sandinistas, fighting in the freedom forces than there are in the Sandinista militia."

□ 1230

IT IS YOUR ONLY CHANCE

(Mr. ROEMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROEMER. Mr. Speaker, the President is trying to get Republicans to support the Ways and Means tax bill. It is going to be tough, Mr. President. You cannot argue for the substance of the bill since it flies in the face of everything you claim to stand

for. It is antigrowth; it is antijobs. It adds complexity to the code.

Anyone who argues that it is simple, is. How can we ask American workers to accept a slightly lower marginal tax rate and lose their job in return? Bad trade. No, you cannot sell the bill on its merits. You cannot argue the process either. Ways and Means insists on closed rule, with no chance to amend their bill. No chance to impose a corporate and wealthy minimum tax and apply the proceeds to the deficit. What kind of process is that?

In addition, our Constitution demands that revenue bills originate in the House, not passed blindly over to the Senate. The process is a good reason to vote "no," Mr. President: not "yes." Your only chance, Mr. President, is to follow the example of a late Louisiana politician, Gov. Earl Long. When trying to get votes for a tax bill, and told by a north Louisiana legislator, "I am with you when you are right, Governor," Earl responded, "Hell, I do not need you when I am right."

Since you are wrong on this one as to substance and to process, Mr. President, you have got to try the old, cold political statement. I do not need you when I am right. Will it work? I do not know, but it is your only chance.

ON AN ABUSE OF POWER

(Mr. SOLOMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SOLOMON. Mr. Speaker, this could be a very sad day in the history of the House of Representatives. Today, the Foreign Affairs Committee will be asked to authorize the contempt citation of two American citizens. Mr. Speaker, this body should be very careful never to abuse the powers and to be arrogant when it comes to its citizens.

Not only that, Mr. Speaker, but this action is being brought because one Member, the chairman of the House Asia-Pacific Subcommittee, a Democrat on your side of the aisle, insists on being inflexible; insists on carrying out a witchhunt to bring down the leader of a sovereign nation and ally of this country. Mr. Speaker, that is disgraceful, and I certainly hope that this House will not be a party to it.

SURPLUS BUTTER ALLOTMENT CUT

(Mr. WILSON asked and was given permission to address the House for 1 minute.)

Mr. WILSON. Mr. Speaker, I am really pleased so many of the more powerful Members on the floor at this particular time so that I can finally get their attention on the butter issue.

As I have spoken four or five times previously, the Agriculture Department has cut the surplus butter allotment to the poor in half all over the country. I really think that this is something that Members should be interested in on both sides of the aisle. Let me tell you why they did this. They did this because the margarine people complained that they were not selling enough margarine, and so the butter allotment was cut into half of what the very poorest of the poor in Indiana can get. I do not see how anybody could approve of that.

Let me tell the Members what the options were that the Agriculture Department had. They have three programs they can cut. They can cut the School Lunch Program and make them buy margarine that they do not want. They can cut the nonprofit hospital programs and make them buy margarine. They can cut the SSI nutrition for pregnant mothers and AFDC programs, and thereby please this powerful margarine lobby which I never heard of.

What did they do? Of course, what they did was leave the hospitals alone because the hospitals have boards of directors that have power. They let the school kids alone because the school kids' parents have power, and what they did was cut the hungry children of the poor, and we are going to continue to hear about that until the more powerful Members of my party get interested.

AMENDING TITLE XVIII AND TITLE XI OF THE SOCIAL SECURITY ACT

(Mr. HAMMERSCHMIDT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HAMMERSCHMIDT. Mr. Speaker, the administration of the prospective payment system has generated many comments and suggestions by the health care community. Since 1983, many Arkansas physicians, hospital administrators, and Medicare patients have contacted me about their problems with the prospective payment system. Based on the information collected from these meetings, letters, and calls, I introduced three bills on November 19 which respond to some of their concerns with the system.

The Medicare Program, since its inception, had utilized a retrospective cost-based method of hospital reimbursement. That system provided little incentive for hospitals to be cost-conscious in their provision of services because the more they spent for Medicare allowable costs, the more they were reimbursed.

In the 1982 Tax Equity and Fiscal Responsibility Act [TEFRA], as a means of controlling hospital costs, Congress required that the Department of Health and Human Services [HHS] develop a proposal for a prospective reimbursement. At that time hospital costs were rising at twice the rate of overall inflation. Based on the TEFRA amendment, the prospective payment system became title VI of the Social Security Amendments of 1983.

The prospective payment system of reimbursement became operational on or after October 1, 1983. Arkansas was one of the first six States to operate under the new system. During the last 2 years, health care professionals in Arkansas have had a number of problems with the program, some of which may have a more severe impact on smaller, nonurban hospitals. It seems to me that in other States, hospitals in nonurban areas would experience similar problems.

My first bill, H.R. 3781, would require the Secretary of HHS, by regulation, to take into account the relative severity of an illness within particular diagnosis related groups [DRG's]. Currently, the DRG classification system does not take into account the severity of illness within each category. In each DRG there can be a wide variation in the length of hospitalization and the amount of resources needed to treat individual patients. And, unless a patient's condition far exceeds the norm and falls into the outlier categories, there is no way to increase the reimbursement for the expensive and lengthy hospital stays. I'd like to present one example of how hospitals are adversely affected by not having a severity of illness index.

Some small nonurban hospitals in Arkansas are located in areas that had been engaged in the mining industry. Many of those who worked for years in the mines have a condition called chronic obstructive pulmonary disease. I'm informed that when hospitalized these patients often run up bills of $5,000 but that hospitals are being reimbursed under the prospective payment system in the range of $1,700. Administrators at these hospitals have stated that they can't absorb this amount of loss. And the people in Arkansas can't afford to lose these hospitals. Furthermore, in my State, if a hospital were to close, the next closest hospital could be 80 or 90 miles away.

My second bill, H.R. 3782, extends to providers and practitioners the same right of appeal that is available to Medicare recipients. Currently, if a claim is denied at the reconsideration level, only the patient has the right to pursue an appeal to the administrative law judge and, if necessary, for judicial review. Patients, however, have little incentive to pursue an appeal because they are not responsible for the costs. Recently released patients are often frail. Most are unfamiliar with the legal process. These conditions, coupled with their lack of financial responsibility, explain why patients often lack the incentive to continue an appeal through the rigors of the multilevel appeals process.

The current statutory provision excludes a practitioner or provider from appealing an adverse determination by a peer review organization [PRO] beyond the reconsideration level. Many physicians and hospital administrators in Arkansas feel that be-

cause it is the providers and practitioners who bear the financial burden when a claim is denied, they should have the right to pursue an appeal to the administrative hearing and judicial review. Additionally, many physicians believe that they should have the right to pursue an appeal under the due process clause of the Constitution.

It has been suggested that many claims are denied by the PRO because the participants in the decisionmaking process are not using the same standards to make decisions. This results in delays and unnecessary denials. Many of these denials are administratively based and not clinically based. It seems that these problems may stem from the overlay of a very new and complex reimbursement system on an old and ingrained one. It is difficult to believe that the Prospective Payment Program has never included any comprehensive training that imparts similar knowledge and information to all of the program's participants. If all participants in the program—the attending physicians, the review coordinators, physician advisers, appropriate personnel of the fiscal intermediary and the hospitals—were similarly trained, there should be a reduction in the number of cases denied as well as all of the costs connected with unnecessary appeals.

My third bill, H.R. 3783, would require that each PRO develop its own training model in accordance with its State developed criteria and Federal regulations. Training would involve all of the individuals that are a part of the decisionmaking process. Each PRO would receive funds for training at the rate of 20 cents for each eligible Medicare beneficiary for each of the first 2 contract years, and for the next 2 contract years would be 15 cents and 10 cents respectively. For each contract year thereafter the amount would be equal to 10 cents increased by a factor that approximates the increase in inflation. Training would be ongoing as both the system and participants are continually changing.

Although there are other concerns with the prospective payment system that need to be addressed, particularly quality of care, I believe that the bills I've introduced will make some important improvements in the system. I urge my colleagues to review this proposed legislation and become cosponsors of these bills.

THE 101ST AIRBORNE DIVISION: PEACEMAKERS

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, like so many Americans this time of year, John Trosper Bradley, Jr., of Henley, MO, of my district, was traveling home last week to be with his family during the holidays. Tragically, however, his journey, and the journeys of 247 other members of 101st Airborne Division, ended abruptly when the chartered plane on which they were flying crashed in Gander, Newfoundland.

The fate of Specialist Fourth Class Bradley and his comrades has a tragic irony. Having been spared any combat casualties during their tour of duty as peacekeepers in the violent Middle East, descriptions of the crash site relate that those dedicated men and women died in a quite field strewn with festively wrapped Christmas presents.

At times like this, words seem inadequate to express the grief we all share over the untimely loss of so many young lives. However, it is my most fervent hope that the loved ones of those who died will find solace in words spoken almost 2,000 years ago: "Blessed are the peacemakers: for they shall be called the children of God."

Today, I am adding my name as cosponsor with the gentleman from Kentucky [Mr. HUBBARD] and the gentleman from Tennessee [Mr. SUNDQUIST] to a resolution in memory of our lost soldiers of the 101st Airborne Division, and I extend my sympathy to their families and to their comrades and to their commanding officer, Maj. Gen. Burton Patrick.

LETTERS TO VIETNAM MIA'S BEING THROWN OUT

(Mr. BURTON of Indiana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURTON of Indiana. Mr. Speaker, today it was reported that a woman whose husband was listed as missing in action in Vietnam in 1970 said Sunday she found a garbage can full of letters, most of them unopened, addressed to MIA's in care of the Vietnam Mission to the United Nations. A spokesman for that mission said, "Such mail is routinely thrown out because there is too much of it to be processed."

Mr. Speaker, can you imagine that? At this time of the year? People who have loved ones who have not been found in Vietnam, MIA's, write letters to them in the hope that someday they will be found and the letters will be delivered, find that the Vietnam Mission to the United Nations takes that mail and just throws it in the trash.

Now we support that mission with our tax dollars; 25 percent of the U.N. expenses are paid for by the United States of America, and I think this Congress ought to make a formal demand to the Vietnam Mission to the United Nations to make sure there is a sympathetic response to every one of those Vietnam MIA letters. I think it is extremely important, especially at this time of the year.

IT IS TIME TO ABANDON THE "ROYALIST" POSITION ON TAX REFORM

(Mr. DURBIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DURBIN. Mr. Speaker, early this morning as I was driving from Springfield, IL, to St. Louis, MO, to catch a flight, the radio announcer said that today we are observing the anniversary of the Boston Tea Party. In 1773, 212 years ago, a band of willful colonists protested the unfairness of British taxes by dumping tea in the Boston Harbor. King George did not get the message. A revolution followed.

This afternoon the President meets with our Republican colleagues to convince them that they should join the new American Revolution against our unfair tax system. Last week, the Tories in the House stood firm against tax reform. Only 14 Republicans supported the President on the Ways and Means bill.

We can only hope that this afternoon's tea party hosted by President Reagan for Republican House Members will result in a decision by the Republicans to change their votes, abandon their royalist position, support their President, and vote for tax reform before it is too late.

SAVE FOR THE U.S.A. WITH SAVINGS BONDS

(Mr. GROTBERG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GROTBERG. Mr. Speaker, last week the House passed a resolution to designate 1986 as "Save for the U.S.A. Year." I, along with my colleague from Ohio, MARCY KAPTUR, sponsored this resolution to fill a gap which exists in Congress and the executive branch. Despite the fact that Americans reduced the costs to the Federal Government as a result of lower interest costs by $2 billion in 1984 through the purchase of savings bonds, Congress and the President have not played a prominent role in the promotion of this savings and investment tool. Our resolution urges the President and Congress to actively campaign for savings bonds. The President is urged to kick off a national "Buy Back America" campaign during the state of the Union address in January. In addition, over 1 million Federal employees regularly purchase U.S. savings bonds through payroll allotment. Only 7 percent of the 12,000 employees of the House of Representatives regularly purchase bonds. We're ignoring our own back yard by not communicating the benefits of savings bonds to congressional employees.

I urge my colleagues to take part in the program, and pass along your commitment to your staff and constituents.

□ 1240

THE LURE OF REDSKINS TICKETS IS STING OPERATION'S CENTERPIECE

(Mr. HUGHES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUGHES. Mr. Speaker, I rise today to salute the U.S. Marshals Service and the Washington, DC, Metropolitan Police, for the successful sting operation they carried out over the weekend.

Using the promise of Washington Redskins tickets as bait, they lured more than 100 of the area's most wanted criminals into the D.C. Convention Center, where they were quickly put under arrest.

The criminals were taken completely by surprise. No shots were fired, no lives were jeopardized, and the operation was a total success.

This sting operation is just one example of how innovative crime-fighting programs are being developed and put to use by the U.S. Marshals Service and other law enforcement agencies these days. It is such techniques and strategy that is encouraged by the Justice Assistance Act of 1984.

It just goes to show you that our law enforcement community can indeed stay one step ahead of the criminals, if the Congress provides the support, tools and financial resources they need to do the job.

I hope my colleagues with keep this need in mind as the various budget and appropriations bills for our law enforcement agencies are considered in the months ahead.

UNITED NATIONS COMMENDED FOR TAKING A STAND AGAINST TERRORISM

(Mr. BEREUTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEREUTER. Mr. Speaker, we do not receive too much good information about the United Nations, but when that body does something that is commendable, I think we ought to recognize it here in the Congress.

Last week the General Assembly of the United Nations, after a decade of debate, passed a resolution condemning "as criminal all acts, methods and practices of terrorism wherever and by whomever committed . . ." in whatever form, wherever conducted, and by that action, although long delayed, is certainly to be commended. The only dissenting vote was by—guess which country? Cuba.

Now the United Nations should address its attention to the Vienna Convention. The Vienna Convention is aimed at protecting diplomatic missions and diplomats. Surely the United Nations ought to be able to agree on reasonable penalties by all nations against terrorism aimed at diplomats and diplomatic missions. That is one of the next logical steps for the United Nations and I hope the General Assembly will now take that step. As the Washington Post editorially commented today: "It is a long way from word to deed: But saying the right word is important and finally, on terrorism, the U.N. has said it."

SIX NATIONS FETED BY THE BEYOND WAR FOUNDATION FOR EFFORTS AGAINST NUCLEAR WAR

(Mr. DOWNEY of New York asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DOWNEY of New York. Mr. Speaker, an extraordinary event occurred on Saturday. The very prestigous Beyond War Foundation based in San Francisco gave its annual award to the five continent peace initiative. There are six countries—Greece, Sweden, Tanzania, India, Argentina, and Mexico—which have gotten together to try and explain to the superpowers the fact that they believe they have a role to play in reducing the likelihood of nuclear war.

In Delhi, on January 28, 1985, they produced a resolution that asked for two things from the superpowers: First, that they stop testing of nuclear weapons underground; and second, to prevent the militarization of outer space.

Most recently, on Saturday, the Beyond War Foundation recognized these six leaders from across the globe and had each one of them speak. Amazingly enough Olof Palme, the Prime Minister of Sweden, renewed his request to the superpowers that if there was some difficulty in the monitoring of nuclear weapons testing underground, these six countries and indeed the technological capacilities of the Swedes would be more than happy to be placed at our disposal to stop nuclear weapons testing.

It was a small blip on the radar screens of political notice in this country. It received some notoriety in papers on the west coast, but it is likely to spread, and I urge my colleagues to learn more about this very worthy endeavor by these six countries.

CALL FOR INVESTIGATION INTO HIRING PRIVATE AIRLINES TO TRANSPORT MILITARY PERSONNEL

Mr. GEKAS asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. GEKAS. Mr. Speaker, the tragedy of the air crash that took the lives of 248 American servicemen is beyond description, and all of us feel a sense of loss, as we should. But it will become even more tragic if developments reveal that the crash was due to poor maintenance or to some practices on the part of someone or some entity which led inexorably to the tragedy itself.

We want to know, in the wake of this crash: what are the practices of hiring private airlines for the lifting of servicemen from one place to another? We want to know: what are the qualifications required of an airline to qualify for such contracts?

We want to know the full story, Mr. Speaker, so that whatever the tragic results, already so monumental in this regard, they will not become even more severe in the future.

SOLIDARITY WITH SOVIET JEWRY

(Mr. HOYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HOYER. Mr. Speaker, this past weekend the Jewish festival of lights, Hanukkah, commemorating the ancient struggle for religious freedom, came to a close. We now look ahead to the Christmas holiday, when the precious gift of life and personal freedom are uppermost in our minds. In Washington and other cities around the country it has become traditional during this joyous season for Jews, Christians, and people of goodwill from other proud faiths to unite in defense of Soviet Jewry.

I want to draw the attention of my colleagues today to the efforts of one such group of concerned citizens—eight rabbis and a Catholic priest—who demonstrated within 500 feet of the Soviet Embassy on May 1, of this year. By an act of civil disobedience they dramatized the plight of Soviet Jewry. In so doing, they followed the moral precepts of the ancient Hebrew Sage Hillel, whose bibilical commentaries form the basis of sermons to this day. Hillel taught: "If I am not for myself who is for me; and being for my own self what am I? If not now when?"

If I am not for myself who is for me; and being for my own self what am I? Mr. Speaker, the group of Jewish and Christian clerics who demonstrated in solidarity at the Soviet Embassy exer-

cised their rights of free speech and association. These are the birthright of every American. They also felt compelled by reasons of conscience to take further action beyond the limits prescribed by law and in so doing sought to make political statements regarding the plight of Soviet Jews. They were prepared to take the consequences prescribed by the District law. Five of the rabbis from the Washington metropolitan area have chosen 2-weeks in prison instead of the suspended sentence and a fine as imposed by the District court for demonstrating too close to the U.S.S.R. Embassy. Those five rabbis are Harold Steven Bavar, of Greenbelt, Leonard Cahan, of Potomac, Bruce Kahn, of Chevy Chase, Mark Levine, of Silver Spring, and David Oder, of Gaithersburg.

If not now when? For the 2 weeks of their symbolic protest, it is fitting that we do our part as well in drawing public attention to the grim conditions under which Soviet Jewry must live. Mr. Speaker, the Reagan-Gorbachev summit, at which the President forthrightly raised the concern of the American people for human rights, has engendered some yet-to-be-realized hopes that conditions might ease for Soviet Jewry. Despite the resolution of a very few cases, the road to freedom still remains closed to an estimated 30,000 to 50,000 refuseniks. Among them are approximately 200 people who have been refused for more than a decade and over 30 prisoners of Zion who languish in Soviet prisons and labor camps. The Soviet anti-Zionist committee continues to circulate its vicious libel. Jewish cultural activists are targeted for vilification and physical attack.

According to the State Department, since the summer of 1984, Soviet authorities have tried 16 Jews for cultural activism. The last was the sentencing in October of Leonid Volvovsky to 3 years' confinement for anti-Soviet slander. Iosie Begun, a prisoner of conscience since 1982, is suffering greatly in a punishment cell in Chistopol prison. Denied physical nourishment—in the freezing cell he is without warm clothing and must subsist on bread and water every second day—he is also denied spiritual sustenance. His pleas for a bible are scornfully ignored. In the same prison is Anatoly Shcharansky, whose health continues to deteriorate. In and out of isolation cells, he tenaciously insists on his right to emigrate and join his wife Avital in Israel.

Mr. Speaker, in closing, I would only say that by their act of civil disobedience the religious leaders I have honored today have helped to focus public opinion on the plight of Soviet Jewry. We in Congress also must act upon our own consciences and use the power vested in us by the American people to keep the spotlight of world opinion on this important cause.

U.S. DEFENSES AT RISK IF MARCOS GOVERNMENT FALLS

(Mr. RUDD asked and was given permission to address the House for 1 minute, and to revise and extend his remarks, and include extraneous matter.)

Mr. RUDD. Mr. Speaker, to the critics who would bring the Marcos government of the Philippines down and install instead a Communist government, let me remind them that the Philippines is the geopolitical key to the rapidly developing Pacific Basin and the Orient and a key to the defense of the United States in the Pacific. The Soviets know this and have placed a third of their surface submarine and air capability force and the full force of their disinformation operation machine in the area to obtain the support of gullible American apologists and critics to set a Communist government there.

These same critics were instrumental in bringing down the friendly governments of Cuba, Iran, Vietnam, Cambodia, and Nicaragua, but once the brutal Communist governments were installed in their stead the critics rapidly disappeared.

Mr. Speaker, we must take care that this does not happen in the Philippines.

Mr. Speaker, I include for the perusal of my colleagues an article by Jeane Kirkpatrick which appeared in today's Washington Post, as follows:

[From the Washington Post, Dec. 16, 1985]

MARCOS AND THE PURISTS

(By Jeane J. Kirkpatrick)

There is more at stake in the Philippines than two U.S. bases or the continuation of the Marcos regime. Look at the map. The Philippines' location is of enormous geopolitical significance. To the north lie Taiwan, Japan, Korea and the People's Republic of China; to the west Vietnam; to the south Malaysia and other Asian states. Economically, this is the most dynamic region in the world. U.S. trade with the nations of the Pacific Rim is growing rapidly and has already surpassed our trade with Europe. Technology and industry give these Pacific nations a strategic importance equal to that of Western Europe. But they are much more vulnerable to outside military pressures.

NATO forces protect the independent nations of Western Europe, but no such alliance system offsets Soviet proximity and power in the Pacific. There is only the United States operating from two bases in the Philippines. "It is," as a U.S. military commander commented to me last year, "very nearly all we've got there."

That fact has not escaped the attention of the global chessmasters in the Kremlin.

The overriding U.S. goal in the Pacific is, I assume, to preserve the sovereignty of the independent nations that exist there. It would be bad for them and bad for us if those nations were incorporated into the "socialist world system," their industrial power available to the Soviet empire, their territory available for the projection of Soviet military might—as Vietnam lends Cam Ranh Bay to the Soviet Pacific fleet.

The Soviet Union's lively interest in the North Pacific has been manifest in its dramatic military buildup in that region, a buildup that has already altered the balance of power. The Soviet Pacific fleet already contains roughly one-third of all its submarines, surface combat vessels and naval aircraft. The Soviet air force in the four easternmost districts of the U.S.S.R. has been dramatically expanded to more than 3,000 combat aircraft. The number of their intermediate-range missiles in Asia more than doubled from 1982 through 1984, and the number of Soviet ground forces east of the Urals, including those on the Sino-Soviet border, has increased from a mere 150,000 in 1965 to more than one-half million today.

Yet from reading the American press one would think that President Ferdinand Marcos is the "focus of evil" in the contemporary world and that his government is the major threat to American interests in Asia. Day after day American newspapers, news weeklies and network newscasts treat Marcos' real and imagined failures, inefficiencies and corruption as though they were extraordinary and unique. They are not. Of 159 member states of the United Nations, at least 100 are probably governed more poorly than the Philippines.

One of the many disturbing aspects of the current campaign against the government of the Philippines is that similar or more serious charges could be made against many, if not most, of the independent governments in the area. Most exhibit authoritarian tendencies, have serious internal divisions, harbor low-level insurgencies, suffer corruption, and, in some cases, sponsor violence. Most, but not all, have made more impressive economic progress than the Philippines, but they too are beginning to encounter difficulties.

It is not the first time we have seen obsessive intolerance displayed by a government in a nation of great strategic importance to the United States. Remember Batista, Ngo Dinh Diem of Vietnam, Lon Nol of Cambodia, the Shah of Iran, Anastasio Somoza? The failings of each were magnified by people who played on American political purism as skillfully as Iago played on Othello's doubts.

Yet once these rulers had fallen, those who worked indefatigably to bring them down quickly forgot them and had little to say about the more tragically repressive, aggressive dictatorships imposed by their successors. Will a continuation of the current economic, diplomatic and political campaign against the government of the Philippines produce similar consequences?

There are real problems in the Philippines. There are real economic problems caused by corporatism, monopoly and corruption, problems that have been made worse by a U.S. insistence in international fiscal institutions and private banks that the Philippines meet standards we would not dream of imposing on, say, Mexico.

There are real political problems in the Philippines, some that led to the brutal murder of Benigno Aquino, and some others that have little to do with the Marcoses.

There are real military problems in the Philippines created by an armed guerrilla movement whose brutality is graphically described by Time correspondent Ross H. Munro in the current issue of Commentary Magazine. And there is a Philippine army without experience or training in counterinsurgency.

That is not all. There are Americans in Congress, in the executive branch and in

the press who believe that bringing down Marcos is the overriding goal of U.S. policy in the Pacific.

But the U.S. interest in the Pacific is different. The U.S. goal must be to protect the independent nations of the region and to help, as appropriate, Filipinos build a more effective democracy. Many countries in the world are worse governed than the Philippines. None is more important to the stability and security of the United States, Japan and other independent nations in the Pacific.

Choosing a Philippine government is their business. Protecting American interests is ours.

TAX REFORM WOULD RESULT IN NOT RECESSION BUT TAX FAIRNESS

(Mr. DORGAN of North Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN of North Dakota. Mr. Speaker, there are some who are trying to portray tax reform as something that will promote recession. That is absolute nonsense. Let me tell the Members what tax reform will cause. It will cause not a recession; it will cause those who are not paying taxes to start paying some.

There are 29,000 Americans earning over $250,000 each paid less than 5 percent in taxes; nearly 5,000 Americans earning over a million dollars each paid nothing; and 65 American corporations earning a total of $50 billion in 3 years paid zero.

These are the folks who want us to believe that if we pass a tax bill, it will cause a recession. I will tell the Members what it will cause. it will cause those folks to pay the same kind of taxes that working people have been paying for a long time. They do not want to do that. That is tough. Good government requires that they pay taxes.

The vote on the floor of the House is not on a recession because this will not cause a recession. The vote is: Do you believe in tax reform or do you not? When the vote comes, vote yes, if you care about it, because most Members on this floor and most people in politics have been making a living talking about how they are going to support tax reform. The time has come. If you vote no, it means you do not care about forcing the big shots to pay the same taxes the rest of the folks in this country have been paying for years, and I think that is a shame.

□ 1250

NO TAX CREDIT FOR SPECIAL INTERESTS

(Mr. SCHEUER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHEUER. Mr. Speaker, I appreciate the words of the gentleman from North Dakota, Mr. BYRON DORGAN, who just preceded me.

I think we should do exactly that and I think we ought to go even further. We took away the investment tax credit and we lengthened out depreciation, but we did it across the board, which does not seem to indicate any particular national policy.

We juggled tax rates. We juggled loopholes. We juggled exemptions, but we did not seem to have any clear evidence of where we are going.

It seems to me that what we ought to do is to preserve the investment tax credit and to preserve accelerated depreciation for the productive sectors of our economy that are in desperate competition with foreign manufacturers and we ought to take away these excessively generous tax benefits from those protected sectors of the economy, the apartment house builders, the hotel builders, the shopping center builders and the luxury apartment builders who are not in competition with anybody and who are building something that really is not very high on our national priorities list.

We have got to give radical incentives in our productive economy. Right now we are saving less than 5 percent of our GNP. The Japanese are doing four times better than that. That is why they are outproducing us.

TRIBUTE TO HARD WORKING CONFEREES

(Mr. BROWN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BROWN of California. Mr. Speaker, I take this moment just to pay tribute to our colleagues who worked so hard over the weekend to produce a conference agreement on a number of important bills. I know we will hear much more discussion of these conference reports later on in the week when we get around to discussing them; but I think there is much that we can take satisfaction from in the agreements that have been reached.

I think we all ought to be aware that they would not have been reached, those agreements would not have been reached, unless a lot of our colleagues spent a lot of hours over the weekend. I was not one of them. I was able to relax a little bit, but I think they deserve a great deal of credit, and particularly on the farm bill under the leadership of the gentleman from Texas [Mr. DE LA GARZA] and the appropriation bill for continuing appropriations.

I think we reached agreements which in the long run were in the interests of the House position and in the interests of the Nation. I want to commend our colleagues for doing that.

IS PRESIDENT REAGAN SERIOUS ABOUT DEFICIT REDUCTION?

(Mr. GRAY of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GRAY of Pennsylvania. Mr. Speaker, I would like my colleagues in the House to know that on Friday I received a most extraordinary letter from the Director of the OMB, James C. Miller III, on the reconciliation bill now in conference.

Director Miller said reconciliation is of great importance, and I agree; but then he said the administration does not like some of the specific provisions being considered by the conferees, and that unless action is taken to significantly revise or delete them, the President's senior advisers will recommend that he veto the bill.

This raises in the starkest possible form the fundamental question about the economic policy of this administration. Is the President serious about deficits?

I fear that the truth is that this administration objects to the fact that the reconciliation proposal that we now have before us raises some revenues, principally by just keeping the cigarette tax at its current rate.

The administration has not faced up to the realities of the budget, and they still have deficit reduction at the bottom of their list of priorities—all rhetoric and no substance. In fact, after this letter from the OMB Director, I have to question whether it appears on their list at all.

THE PRESIDENT'S LAST CHANCE FOR TAX REFORM

(Mr. SCHUMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHUMER. Mr. Speaker, in a few hours the President of this country will appear before our colleagues on the other side of the aisle and ask them to vote for tax reform.

Mr. President, if you have any magic left in your bag of tricks, use it today, because today is the last chance for tax reform in this Congress and probably in this decade.

Mr. President, you are going before your Republican caucus like King Henry did before Pope Gregory at his castle in Canossa. You are in sackcloth with ashes on your forehead and you are putting your fate in the hands of your Republican colleagues.

This is it, Mr. President. There is no last chance other than this one today for tax reform. Let us hope that you can work your magic and persuade our good colleagues on the other side of the aisle that this bill is a worthy bill, a bill worth supporting, a bill good for your party and good for this country.

51-059 O-87-23 (Pt. 26)

THE IMPORTANCE OF ELIMINATING USELESS TAX SHELTERS

(Mr. SEIBERLING asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SEIBERLING. Mr. Speaker, I am addressing this primarily to our Republican colleagues, but I know a lot of my Democratic colleagues feel the same way.

I was very concerned when I first read the tax bill about the impact on our national competitiveness of the effect of eliminating the investment tax credit, the ACR's and the other incentives to capital investment, particularly in high capital intensive industries, of which there are many in my part of Ohio; but the more I looked at this bill and the more I talked to businessmen, I began to realize that the most important feature of this bill is eliminating a lot of the useless tax shelters, real estate and buildings that can never possibly pay off, and yet people are investing billions of dollars in them simply because they get a tax shelter for the rest of their income.

If we can have business investment based on economic factors, rather than tax gimmicks, we are going to have more capital available for industry, we are going to have more profitable industry, and there is no question about that, resulting from the lower overall rates, and we are going to have the capital necessary at reasonable rates to make our industries competitive.

That took a lot of study and a long time thinking about this problem, but that is where I come out and I thought I would share that with you.

HAVE YOU READ THE TAX BILL?

(Mr. EMERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EMERSON. Mr. Speaker, I rise to ask the gentleman from Ohio how many times he has had the opportunity in the week that the bill has been available to read that 1,350-page tax bill.

FEDERAL EMPLOYEES BENEFITS IMPROVEMENT ACT OF 1985

Ms. OAKAR. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3384) to amend title 5, United States Code, to expand the class of individuals eligible for refunds or other returns of contributions from contingency reserves in the employees health benefits fund; to make miscellaneous amendments relating to the civil service retirement system and the Federal Employees Health Benefits Program; and for other purposes, with a Senate amendment thereto, and concur in the Senate amendment with amendments.

The Clerk read the title of the bill.

The Clerk read the House amendments to the Senate amendment, as follows:

Page 1, strike line 9 and all that follows thereafter through page 3, line 21, and insert in lieu thereof the following:

(a) DEFINITIONS.—Section 8901 of title 5, United States Code, is amended—

(1) by striking out "and" at the end of paragraph (9);

(2) by striking out the period at the end of paragraph (10) and inserting in lieu thereof a semicolon; and

(3) by adding at the end thereof the following new paragraphs:

"(11) 'certified nurse-midwife' has the same meaning given to such term in section 1905(m) of the Social Security Act; and

"(12) 'qualified clinical social worker' means an individual—

"(A) who is licensed or certified as a clinical social worker by the state in which such individual practices; or

"(B) who, if such State does not provide for the licensing or certification of clinical social workers—

"(i) is certified by a national professional organization offering certification of clinical social workers; or

"(ii) meets equivalent requirements (as prescribed by the Office).".

(b) NURSES AND NURSE-MIDWIVES.—Section 8902(k) of title 5, United States Code, is amended by striking out "or optometrist" each place it appears and inserting in lieu thereof ", optometrist, nurse, or certified nurse-midwife".

(c) CLINICAL SOCIAL WORKERS.—Section 8902(k) of title 5, United States Code, is further amended—

(1) by striking out "(k)" and inserting in lieu thereof "(k)(1)";

(2) by striking out the last sentence; and

(3) by inserting at the end thereof the following:

"(2) When a contract under this chapter requires payment or reimbursement for services which may be performed by a qualified clinical social worker, an employee, annuitant, family member, or former spouse covered by the contract shall be entitled under the contract to have payment or reimbursement made to him or on his behalf for the services performed. As a condition for the payment or reimbursement, the contract—

"(A) may require that the services be performed pursuant to a referral by a psychiatrist; but

"(B) may not require that the services be performed under the supervision of a psychiatrist or other health practitioner.

"(3) The provisions of this subsection shall not apply to group practice prepayment plans.".

(d) EFFECTIVE DATES.—The amendments made by subsections (a), (b), and (c) shall be effective with respect to contracts entered into or renewed for calendar years beginning after December 31, 1986.

Page 10, lines 1 and 2, strike "physician or nurse;" and insert in lieu thereof "physician, nurse, or other licensed health professional with training in occupational safety and health;".

Page 10, line 14, strike "fitness;" and insert in lieu thereof "fitness, including weight reduction;".

Page 11, lines 5 and 6, strike "physicians and dentists;" and insert in lieu thereof "physicians, dentists, and other licensed health professionals;".

Page 11, line 12, strike "production" and insert in lieu thereof "productivity".

Page 13, line 18, after "public health," insert "school of nursing,".

Page 13, after line 21, insert the following:

(B) the authority of the Director of the Office of Personnel Management to enter into contracts or to make grants under subparagraph (A) is effective for fiscal year 1986 and subsequent fiscal years only to such extent or in such amounts as are provided in appropriation Acts.

Page 13, line 22, strike "(B)" and insert in lieu thereof "(C).

Page 14, after line 10, insert the following:

SEC. 110. ADDITIONAL TYPE OF HEALTH BENEFITS PLAN.

Paragraph (4) of section 8903 of title 5, United States Code, is amended by adding at the end thereof the following new subparagaph:

"(C) MIXED MODEL PREPAYMENT PLANS.—Mixed model prepayment plans which are a combination of the type of plans described in subparagraph (A) and the type of plans described in subparagraph (B).".

SEC. 111. REPEAL OF 75 PERCENT MAXIMUM IN GOVERNMENT CONTRIBUTIONS.

(a) REPEAL OF 75 PERCENT MAXIMUM.—Section 8906(b)(2) of title 5, United States Code, is amended to read as follows:

"(2) The biweekly Government contribution for an employee or annuitant enrolled in a plan under this chapter shall not exceed 100 percent of the subscription charge.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall be effective with respect to pay periods commencing on or after March 1, 1986.

SEC. 112. RESTRICTIONS RELATING TO AMOUNTS REFUNDED TO THE EMPLOYEES HEALTH BENEFITS FUND FROM CARRIERS' SPECIAL RESERVES.

(a) PROHIBITED TRANSFERS.—(1) No amount in the Employees Health Benefits Fund may be transferred to the general fund of the Treasury of the United States or the United States Postal Service as a result of a refund described in paragraph (2).

(2) This subsection applies with respect to any refund made by a carrier during fiscal year 1986 or 1987 to the Employees Health Benefits Fund to the extent that such refund represents amounts in excess of the minimum level of financial reserves necessary to be held by such carrier to ensure the stable and efficient operation of its health benefits plan.

(b) RESTRICTION RELATING TO USE OF CERTAIN AMOUNTS IN THE FUND.—(1) Any amount which is in the Employees Health Benefits Fund, and which is described in paragraph (2), may be used solely for the purpose of paying the Government contribution under chapter 89 of title 5, United States Code, for health benefits for annuitants enrolled in health benefits plans.

(2) This subsection applies with respect to any amounts—

(A) which are referred to in subsection (a)(2); and

(B) which are attributable to Government contributions (other than contributions by the government of the District of Columbia) that were made under section 8906(b) of title 5, United States Code, as determined under regulations which the Office of Personnel Management shall prescribe.

(c) DEFINITIONS.—For the purpose of this section—

(1) the term "Employees Health Benefits Fund" refers to the fund described in section 8909(a) of title 5, United States Code;

(2) the term "carrier" has the meaning given such term by section 8901(7) of such title; and

(3) the term "health benefits plan" has the meaning given such term by section 8901(6) of such title.

Page 16, line 14, insert "on or" after "occurring".

Page 17, line 6, strike "to" and insert in lieu thereof "in the case of".

Page 17, strike lines 10 through 18 and insert in lieu thereof the following:

"(B)(i) The requirement described in clause (ii) shall not apply to an election made by an employee or Member under section 8339(j)(3) of title 5, United States Code (as amended by section 2(3)(A) of this Act), in order to provide a survivor annuity under section 8341(h) of such title (as amended by section 2(4)(G) of this act) in the case of a former spouse referred to in subparagraph (A) if the election meets the requirements of clause (iii).

"(ii) The requirement referred to in clause (i) is the requirement prescribed in section 8339(j)(3) of title 5, United States Code, for an employee or Member to make an election in the case of a former spouse under such section 8339(j)(3) at the time of retirement or, if later, within 2 years after the date on which the marriage of the former spouse to the employee or Member is dissolved.

"(iii) Clause (i) applies to an election which is made by an employee or Member who retires on or after May 7, 1985, and before the date of the enactment of the Federal Employees Benefits Improvement Act of 1985, and is received by the Office of Personnel Management within the 2-year period beginning on the date of the enactment of such Act.

Page 18, line 9, strike "May 7, 1985" and insert in lieu thereof "the date of the enactment of this Act".

Page 19, line 4, strike "(6)" and insert in lieu thereof "(5)".

Page 20, line 3, strike "(6)" and insert in lieu thereof "(5)".

Page 22, line 17, through page 24, line 11, strike section 202 and redesignate the following sections accordingly.

Page 32, after line 9, add the following:

SEC. 305. MINIMUM ANNUITY UNDER THE CIVIL SERVICE RETIREMENT AND DISABILITY SYSTEM

(a) REPEAL.—Section 8345(f) of title 5, United States Code, is repealed.

(b) SAVINGS PROVISION.—An annuity payable from the Civil Service Retirement and Disability Fund as of the day before the date of enactment of this Act shall not be reduced—

(1) by reason of the repeal of section 8345(f) of title 5, United States Code; or

(2) if or to the extent that the reduction is to be made for the purpose of eliminating an overpayment resulting from the manner in which such section 8345(f) has been administered by the Office of Personnel Management.

(c) RATIFICATION OF ERRONEOUS PAYMENTS.—Any individual to whom an overpayment of an annuity has been made from the Civil Service Retirement and Disability Fund before the date of enactment of this Act shall be deemed to have been entitled to that overpayment if and to the extent that such overpayment resulted from the manner in which the Office of Personnel Management has administered section 8345(f) of title 5, United States Code.

(d) ADJUSTMENTS OF CERTAIN REDUCTIONS.—(1) Effective for any month after the date of enactment of this Act, the amount of any annuity which—

(A) is payable from the Civil Service Retirement and Disability Fund; and

(B) was reduced after June 30, 1985, and before the date of enactment of this Act, to eliminate any overpayment resulting from the manner in which the Office of Personnel Management administered section 8345(f) of title 5, United States Code,

shall not be less than the amount which would have been payable as of such date of enactment if the reduction described in clause (B) had not been made.

(2)(A) The Office shall make a lump-sum payment to each individual receiving an annuity to which paragraph (1) applies.

(B) The lump-sum payment made to any individual under this paragraph shall be equal to the excess of—

(i) the total amount of the annuity payments which would have been made to the individual for the period beginning with the first month in which the reduction described in paragraph (1)(B) was made and ending on the last day of the month in which this Act is enacted if the reduction had not been made, over

(ii) the total amount of the annuity payments which have been paid to such individual for that period.

SEC. 306. CIVIL SERVICE BENEFITS FOR FORMER EMPLOYEES OF COUNTY COMMITTEES.

(a) RETENTION.—Section 3502(a)(C) of title 5, United States Code, is amended by striking out "who is an employee in or under the Department of Agriculture".

(b) RATE OF PAY ON CHANGE OF POSITION.—Section 5334(e) of title 5, United States Code, is amended—

(1) by inserting a comma after "may"; and

(2) by striking out "under the Department of Agriculture,".

(c) ACCRUAL AND ACCUMULATION OF LEAVE.—The first sentence of section 6312 of title 5, United States Code, is amended by striking out "in the case of any officer or employee in or under the Department of Agriculture".

SEC. 307. 18-MONTH PERIOD TO ELECT A SURVIVOR ANNUITY UNDER THE CIVIL SERVICE RETIREMENT AND DISABILITY SYSTEM.

(a) IN GENERAL.—Section 8339 of title 5, United States Code, is amended by adding at the end thereof the following:

"(o)(1)(A) An employee or Member—

"(i) who, at the time of retirement, is married, and

(ii) who notifies the Office at such time (in accordance with subsection (j)) that a survivor annuity under section 8341(b) of this title is not desired,

may, during the 18-month period beginning on the date of the retirement of such employee or Member, elect to have a reduction under subsection (j) made in the annuity of the employee or Member (or in such portion thereof as the employee or Member may designate) in order to provide a survivor annuity for the spouse of such employee or Member.

"(B) An employee or Member—

"(i) who, at the time of retirement, is married, and

"(ii) who at such time designates (in accordance with subsection (j)) that a limited portion of the annuity of such employee or Member is to be used as the base for a survivor annuity under section 8341(b) of this title,

may, during the 18-month period beginning on the date of the retirement of such employee or Member, elect to have a greater portion of the annuity of such employee or Member so used.

"(2)(A) An election under subparagraph (A) or (B) of paragraph (1) of this subsection shall not be considered effective unless the amount specified in subparagraph (B) of this paragraph is deposited into the Fund before the expiration of the applicable 18-month period under paragraph (1).

"(B) The amount to be deposited with respect to an election under this subsection is an amount equal to the sum of—

"(i) the additional cost to the System which is associated with providing a survivor annuity under subsection (b)(2) of this section and results from such election taking into account (I) the difference (for the period between the date on which the annuity of the participant or former participant commences and the date of the election) between the amount paid to such participant or former participant under this subchapter and the amount which would have been paid if such election had been made at the time the participant or former participant applied for the annuity, and (II) the costs associated with providing for the later election; and

"(ii) interest on the additional cost determined under clause (i) of this subparagraph computed using the interest rate specified or determined under section 8334(e) of this title for the calendaar year in which the amount to be deposited is determined.

"(3) An election by an employee or Member under this subsection voids prospectively an election previously made in the case of such employee or Member under subsection (j).

"(4) An annuity which is reduced in connection with an election under this subsection shall be reduced by the same percentage reductions as were in effect at the time of the retirement of the employee or Member whose annuity is so reduced.

"(5) Rights and obligations resulting from the election of a reduced annuity under this subsection shall be the same as the rights and obligations which would have resulted had the employee or Member involved elected such annuity at the time of retiring.

"(6) The Office shall, on an annual basis, inform each employee or Member who is eligible to make an election under this subsection of the right to make such election and the procedures and deadlines applicable to such election.".

(b) EFFECTIVE DATE AND APPLICATION.—(1) The amendment made by subsection (a) shall take effect 3 months after the date of the enactment of this Act.

(2)(A) Subject to paragraph (B), the amendment made by subsection (a) shall apply with respect to employees and Members who retire before, on, or after such amendment first takes effect.

(B) For the purpose of applying the provisions of paragraph (1) of section 8339(o) of title 5, United States Code (as added by subsection (a) of this section) to employees and Members who retire before the date on which the amendment made by subsection (a) first takes effect—

(i) the period referred to in subparagraph (A) or (B) of such paragraph (as the case may be) shall be considered to begin on the date on which such amendment first becomes effective; and

(ii) the amount referred to in paragraph (2) of such section 8339(o) shall be computed without regard to the provisions of subparagraph (B)(ii) of such paragraph (relating to interest).

(3) For purposes of this subsection, the terms "employee" and "Member" each has the meaning given that term in sections 8331(1) and 8331(2) of title 5, United States Code, respectively.

Ms. OAKAR (during the reading). Mr. Speaker, I ask unanimous consent that the House amendments to the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore (Mr. KILDEE). Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentlewoman from Ohio?

Mr. TAYLOR. Mr. Speaker, reserving the right to object, I yield to the gentlewoman from Ohio [Ms. OAKAR].

Ms. OAKAR. Mr. Speaker, first, I want to point out that these amendments have been cleared with the minority.

H.R. 3384 passed the House last September 30 under suspension of the rules. The bill permitted health insurance premium rebates to civil service annuitants—rebates which the Justice Department has ruled are not authorized under existing law. The bill also made needed improvements in the Federal Employees Health Benefits Program and the Civil Service Retirement Spouse Equity Act. The Senate amendment makes further improvements in these areas.

The House amendments correct an unfortunate situation which has resulted in about 4,000 widows and widowers losing eligibility for a minimum survivor annuity, permit survivor elections by certain civil service retirees, and clarify the law concerning certain benefits for employees of county committees under the Agriculture Department. These latter amendments are, as I understand it, acceptable to the other body.

Mr. Speaker, today the House will consider H.R. 3384, the Federal Employees Benefits Improvement Act of 1985. This legislation passed the U.S. House of Representatives on September 30, 1985, under suspension of the rules. Its purpose is to make all enrollees, including Federal annuitants, eligible for refunds from the Federal Employees Health Benefits Program [FEHBP], and to make other necessary changes in the FEHBP and the civil service retirement system.

This legislation was the result of extensive hearings held by the Subcommittee on Compensation and Employee Benefits, which I chair, on the need for reform in the Federal Employees' Health Insurance Program. In addition, H.R. 3384 made a number of technical changes in a law, enacted last year, which guarantees survival benefits for former spouses of Federal employees.

On November 19, the Senate Committee on Governmental Affairs approved H.R. 3384 with an amendment in the nature of a substitute. The amended legislation passed the Senate on December 11. The Senate's action, however, failed to include one key provision from the original House bill and several other provisions supported by the chairman of the Senate Subcommittee on Civil Service, Post Office, and General Services. Consequently, I am asking my colleagues to again vote in favor of H.R. 3384, this time with five amendments.

The first amendment I am offering to H.R. 3384 would permanently eliminate the 75-percent ceiling on the Federal Government's contribution to the FEHBP premium, effective March 1, 1986. By allowing for the full Government contribution, this amendment should lower the cost of health insurance for more than 1 million FEHBP subscribers. In a year when Federal workers and annuitants can expect no pay raise and possibly no retirement COLA, this change is especially important. The proposal to remove the 75-percent cap has a history of past support by the administration, the health insurance carriers, and Federal employee organizations. I urge its support by my colleagues today.

The second amendment to H.R. 3384 restates and modifies slightly a requirement included in the Omnibus Budget Reconciliation Act of 1985, H.R. 3500. H.R. 3500 prohibits the transfer of any moneys from the Federal Employees Health Benefits fund into the general treasury. My amendment to H.R. 3384 would require that moneys transferred from special reserves into the FEHBP contingency reserves be used only to offset the Federal Government's contribution to FEHBP premiums for annuitants. In this way, we will ensure that all FEHBP funds remain in the program and are used only to benefit Federal participants.

A third amendment, authored by the distinguished ranking minority member of the Committee on Post Office and Civil Service, Mr. Taylor, would extend certain benefits to former employees of county committees established under the Soil Conservation and Domestic Allotment Act.

The final two amendments would make technical changes in the Civil Service Retirement System and the Health Benefits Program. The first of these would repeal an outdated provision affecting the retirement system. The other amendment relates to the FEHBP. Currently, either group-practice or individual practice comprehensive plans may participate in the health program. Under my final amendment mixed model plans, which are a combination of both, would be allowed to participate in the FEHBP.

Mr. Speaker, this legislation and the five amendments will improve the operation of the FEHBP to the benefit of Federal subscribers. I urge my colleagues' approval of H.R. 3384 as amended, and I hope the Senate will approve this legislation with equal dispatch.

Mr. TAYLOR. Mr. Speaker, I would just like to endorse what the gentlewoman from Ohio has said. She has worked hard to bring about a rectification of these situations which have arisen, that have adversely and unfairly affected our Federal employees.

I certainly endorse the amendments that the gentlewoman has offered and would urge the House to adopt them.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentlewoman from Ohio?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Ms. OAKAR. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the House amendments to the Senate amendment just adopted.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken after debate has been concluded on all motions to suspend the rules.

EXTENDING SMALL BUSINESS ADMINISTRATION PILOT PROGRAMS

Mr. MITCHELL. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2787) to extend through fiscal year 1988 SBA pilot programs under section 8 of the Small Business Act.

The Clerk read as follows:

H.R. 2787

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. (a) Subparagraph (B) of section 8(a)(1) of the Small Business Act is amended by striking out "(other than the Department of Defense or any component thereof)".

(b) The designation of an agency pursuant to the amendment made by subsection (a) shall be made not later than sixty days after the date of enactment of this Act.

SEC. 2. The last sentence of section 8(a)(1) of the Small Business Act is amended to read as follows: "No contract may be entered into under subparagraph (B) after September 30, 1988.".

SEC. 3. The last sentence of section 8(a)(2) is amended to read as follows: "The authority to waive bonds provided in this paragraph (2) may not be exercised after September 30, 1988.".

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Maryland [Mr. MITCHELL] will be recognized for 20 minutes and the gentleman from Florida [Mr. IRELAND] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Maryland [Mr. MITCHELL].

Mr. MITCHELL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 2787.

The purpose of this bill is to extend through September 30, 1988 two pilot programs administered by the Small Business Administration [SBA]. These pilots are intended to promote the competitive viability of firms owned and controlled by disadvantaged individuals who are participating in SBA's capital ownership and development program.

Under the Procurement Pilot Program, the President is to designate an agency that will participate with the SBA in an effort to secure a steady stream of contracts for small businesses owned by the socially and economically disadvantaged.

The Surety Bond Pilot Program is intended to help startup firms owned and controlled by disadvantaged individuals to obtain a "track record" needed to secure bonds in the private sector.

Both pilot programs have been extended twice before by the Congress. The extension proposed by H.R. 2787 is needed to obtain more empirical evidence necessary to evaluate properly these approaches to running the Capital Ownership and Development Program.

This measure enjoys the strong bipartisan support of our committee which ordered the bill favorably reported by a vote of 38 to 1.

I reserve the balance of my time.

Mr. IRELAND. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the chairman of the committee has outlined, I believe, sufficiently the nature of this legislation.

The pilot program and the designation particularly last year of the Department of Transportation was quite successful. The legislation has had near unanimous support in the committee.

Mr. Speaker, I rise in strong support of the legislation.

Mr. ADDABBO. Mr. Speaker, I rise in support of H.R. 2787, a bill to extend two SBA pilot programs authorized under section 8(a) of the Small Business Act.

Investigatory hearings held on the pilot programs by the House Small Business Committee clearly demonstrated a need to extend the Procurement Pilot Program primarily because the Federal agencies are still using blatant and arbitrary procedures to deny contracting opportunities to qualified 8(a) concerns. Until such time as these agencies become completely receptive to awarding quality contracts to these concerns, the SBA increased authority under the pilot program must be maintained.

The Surety Bond Waiver Pilot Program could, if properly implemented, effectively assist 8(a) concerns in establishing a track record needed to obtain bonding on their own. Instead, SBA chooses to defy the law and not give this program a fair test.

I would urge my colleagues to support the extension of both measures which is vital to the economic development of minority business concerns.

Mr. IRELAND. Mr. Speaker, I have no requests for time, and I yield back the balance of my time.

Mr. MITCHELL. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Maryland [Mr. MITCHELL] that the House suspend the rules and pass the bill, H.R. 2787.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MITCHELL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 2787, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

SENTENCING REFORM AMENDMENTS ACT of 1985

Mr. CONYERS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3837) to extend the deadline for the submission of the initial set of sentencing guidelines by the U.S. Sentencing Commission, and for other purposes.

The Clerk read as follows:

H.R. 3837

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Sentencing Reform Amendments Act of 1985".

SEC. 2. DEADLINE FOR INITIAL SET OF SENTENCING GUIDELINES.

(a) EXTENSION.—Section 235(a)(1)(B)(i) of the Comprehensive Crime Control Act of 1984 is amended by striking out "eighteen" and inserting "30" in lieu thereof.

(b) TECHNICAL AMENDMENT.—Section 235(a)(1)(B)(i) of the Comprehensive Crime Control Act of 1984 is amended by striking out "to section" and inserting "under section" in lieu thereof.

SEC. 3. CONFORMING CHANGE IN TITLE 28, UNITED STATES CODE.

Section 994(q) of title 28, United States Code, is amended by striking out "within three years" and all that follows through "Act of 1983" and inserting in lieu thereof "not later than one year after the initial set of sentencing guidelines promulgated under subsection (a) goes into effect".

SEC. 4. CONFORMING CHANGE IN COMPREHENSIVE CRIME CONTROL ACT OF 1984.

Section 235(a)(1) of the Comprehensive Crime Control Act of 1984 is amended by striking out "twenty-four" and inserting "36" in lieu thereof.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Michigan [Mr. CONYERS] will be recognized for 20 minutes and the gentleman from Pennsylvania [Mr. GEKAS] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Michigan [Mr. CONYERS].

Mr. CONYERS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 3837 is a straightforward bill that simply extends by 1 year the deadline for the newly created U.S. Sentencing Commission to submit to Congress the initial set of sentencing guidelines that Federal judges will use when sentencing convicted defendants. These guidelines are the heart of the new Federal sentencing system established last year by the Sentencing Reform Act.

That act provided the Sentencing Commission with 18 months in which to draft the initial guidelines. Unfortunately, 12 of those 18 months were consumed in establishing the Commission—appointing, confirming, and swearing in Commission members. This was not anticipated. Indeed, the legislative history is clear that the Sentencing Commission was expected to be established late last year, soon after enactment of the Sentencing Reform Act, rather than late this year.

The result of the delay in getting the Commission organized has been to reduce the time available to it for the substantive work of producing the initial sentencing guidelines. The initial guidelines presently must be submit-

ted to Congress by next April 13, a virtually impossible task.

The Commission has, therefore, requested an extension of the deadline. The Commission has asked for an additional 12 months, and H.R. 3837 provides it with that time. The additional 12 months simply restores to the Commission the time that was lost in the process of naming and confirming Commission members. H.R. 3837 does just that.

Mr. Speaker, H.R. 3837 has bipartisan support. It is endorsed by the U.S. Sentencing Commission, and was unanimously reported by the Subcommittee on Criminal Justice. I urge my colleagues to support it.

□ 1305

Mr. Speaker, I reserve the balance of my time.

Mr. GEKAS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 3837.

This legislation would extend by 1 year the deadline for promulgation of initial guidelines by the U.S. Sentencing Commission. The bill is necessary because the Sentencing Commissioners have only recently been confirmed and thus have but 6 short months until the original due date for the initial guidelines.

Mr. Speaker, the Sentencing Commission was established by Congress as a part of the Comprehensive Crime Control Act fully recognizing the immense effect it would have on the criminal justice system. We allocated 18 months in the original statute to the development of initial guidelines—and I think no less a period is desirable or even practical.

Sentencing guidelines will have a lasting impact on how our laws are made and enforced for decades to come and it is certainly unwise to rush these guidelines into effect before they can be properly formulated.

Mr. Speaker, I know of no controversy over this bill and I urge its passage today under suspension of the rules.

Mr. Speaker, I yield 3 minutes to the gentleman from California [Mr. LUNGREN].

Mr. LUNGREN. I thank the gentleman for yielding this time to me.

Mr. Speaker, as both gentlemen before me have said, this is required because of the terms of the 1984 Comprehensive Crime Control Act. That act, which probably is the most comprehensive and far-reaching crime measure ever to see this Congress in any year, is important in many features.

In my judgment, perhaps the sentencing changes are the most important single set of changes that are found in that entire act. The Sentencing Commission has an important role. Its role basically is to establish those guidelines that would be used to create a conformity of sentencing procedures across this Nation.

The need for this has vividly been brought forward to a number of Members. I know personally, having an individual in my own district coming to me and talking about it. Someone who had served time in the Federal prison system for an offense with respect to the use of narcotics. The point made to me by this individual was the tremendous disparity in the sentence she received in a Federal courtroom in Texas versus the sentences that were being given in other States of the Union, particularly her own home State of California, that is, the Federal courts in those areas.

It is a problem, a serious problem, with respect to the entire Federal judicial system. In addition, it is the judgment of many of us that the Parole Commission approach does not work; that somehow setting a sentence at the time of trial really does not mean anything; that the only people who pay attention to it and believe that it means anything are the public, and the victim and the victim's family, is not good for our society, is not good for the credibility of the law, is not good for the institution of courts and that, in fact, instead of playing that guessing game of the Parole Commission, that is, after a person has been sentenced, within about 120 to 180 days having the Parole Commission review it completely and set its sentence, and then after a third to a half of that new sentence is served, have the Parole Commission come in again and set a further sentence, and that all that confusion and uncertainty really does no good.

What we ought to have is what many of us have been talking about on this floor for a long period of time, and that is truth in sentencing: The sentence given at the time of trial is the sentence to be served, absent just a short amount of time for good time.

So this extension does nothing to change any of the premises I have mentioned; rather, it gives the Sentencing Commission the time to come up with the guidelines that hopefully will be put into effect. So I hope no one is misjudging this action and believing that somehow by extending the life of the Commission we somehow do not believe that the Parole Commission ought to be ultimately abolished, that we do not believe that we ought to have the conformity of sentencing, that we do not believe that we ought to have truth in sentencing.

As a matter of fact, we believe that even more firmly than we did when we brought this to the floor a year ago. This is necessary not just because, as some have suggested, the executive branch did not act with all dispatch. With all due respect, the judicial branch did not act with all due dispatch, and it is necessary to have their input so that we have guidelines that are workable, that are guidelines that not only take into consideration the parameters we have established, but the experience of the Federal court system, the judges who have been there for some time.

So I urge support of this particular bill before us.

Mr. GEKAS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, one correction for the RECORD. When I spoke of a technical provision that extended a life, I was referring to the life of the Parole Commission. We do not want the parole process to die before the sentencing guidelines are created, so we stretch out the period of the life of the parole process to allow the Sentencing Commission work to be completed.

With that, Mr. Speaker, I yield back the balance of my time.

Mr. CONYERS. Mr. Speaker, I thank my colleagues and the ranking minority member, the gentleman from Pennsylvania [Mr. GEKAS].

Mr. RODINO. Mr. Speaker, I rise in support of the bill.

The need for the bill is simple. When the Sentencing Reform Act was enacted late last year, the Sentencing Commission was expected to be established and begin functioning very soon after enactment. This did not take place. In fact, the Commission's members were not appointed until late September of this year, and the Commission was not organized until late October of this year.

Consequently, the Commission has lost about a year of time that could have been spent doing the substantive work of drafting sentencing guidelines. The Commission is now faced with a task of completing in 5 months—by April 13 of next year—what it was intended to have 18 months to complete. This is virtually impossible if the job is to be done properly.

H.R. 3837 simply gives the Commission an additional 12 months to do its important, substantive work of drafting sentencing guidelines. The bill is endorsed by the Sentencing Commission and has bipartisan support on the Commiteee on the Judiciary. I urge my colleagues to support it.

Mr. CONYERS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Michigan [Mr. CONYERS] that the House suspend the rules and pass the bill, H.R. 3837.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. CONYERS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 3837, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

JUDICIAL IMPROVEMENTS ACT OF 1985

Mr. KASTENMEIER. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3570) to amend title 28, United States Code, to reform and improve the Federal justices and judges survivors' annuities program, and for other purposes as amended.

The Clerk read as follows:

H.R. 3570

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Judicial Improvements Act of 1985".

SEC. 2. JUDICIAL SURVIVOR'S, ANNUITIES AMENDMENTS.

(a) BENEFIT REFORMS.—Section 376 of title 28, United States Code, is amended as follows:

(1) Subsection (a)(1) is amended by striking out "or (iii) the date upon which the Judicial Survivors' Annuities Reform Act becomes effective;" and inserting in lieu thereof "(iii) January 1, 1977; or (iv) January 1, 1986;".

(2) Subsections (b) and (d) are each amended by striking out "4.5 percent" each place it appears and inserting in lieu thereof "5 percent".

(3) Subsection (c) is amended to read as follows:

"(c)(1) There shall also be deposited to the credit of the Judicial Survivors' Annuities Fund, in accordance with such procedures as the Comptroller General of the United States may prescribe, amounts required to reduce to zero the unfunded liability of the Judicial Survivors' Annuities Fund. Such deposits shall, subject to appropriations Acts, be taken from the fund used to pay the compensation of the judicial official, and shall immediately become an integrated part of the Judicial Survivors' Annuities Fund for any use required under this section.

"(2) For purposes of paragraph (1), the term 'unfunded liability' means the estimated excess, determined by the Comptroller General on an annual basis, of the present value of all benefits payable from the Judicial Survivors' Annuities Fund, over the sum of—

"(A) the present value of deductions to be withheld from the future basic pay of judicial officials; plus

"(B) the balance in the Fund as of the date the unfunded liability is determined.

In making any determination under this paragraph, the Comptroller General shall use the applicable information contained in the reports filed pursuant to section 9503 of title 31, United States Code, with respect to the judicial survivors' annuities plan established by this section.

"(3) There are authorized to be appropriated such sums as may be necessary to carry out this subsection.".

(3) Subsection (h) is amended—

(A) in paragraph (1)(B), by striking out clauses (i) and (ii) and inserting in lieu thereof the following:

"(i) 10 percent of the average annual salary determined under subsection (1)(1) of this section; or

"(ii) 20 percent of such average annual salary, divided by the number of children;";

(B) in paragraph (1)(C) by striking out clauses (ii) and (iii) and inserting in lieu thereof the following:

"(ii) 20 percent of the average annual salary determined under subsection (l)(1) of this section; or

"(iii) 40 percent of such average annual salary amount, divided by the number of children;"; and

(C) in paragraph (2) by inserting immediately after "remarriage" the following: "before attaining age 55".

(4) Subsection (1) is amended—

(A) by striking out "1¼ percent" and inserting in lieu thereof "1.5 percent";

(B) in paragraph (2) by striking out the colon after "subsection" and inserting in lieu thereof a semicolon; and

(C) by striking out the proviso and inserting in lieu thereof the following: "except that such annuity shall not exceed an amount equal to 55 percent of such average annual salary, nor be less than an amount equal to 30 percent of such average annual salary. Any annuity determined in accordance with the provisions of this subsection shall be reduced to the extent required by subsection (d) of this section.".

(5) Subsection (a) is amended—

(A) in paragraph (1)(C) by inserting "or Deputy Director" immediately after "Director"; and

(B) in paragraph (2)(C) by inserting "or Deputy Director" immediately after "Director".

(b) BENEFICIARIES.—The benefits conferred by section 376 of title 28, United States Code, by reason of the amendments made by this section shall apply only to individuals who become eligible for annuities under such section on or after the effective date of this section, except that—

(1) such annuities shall be computed in accordance with the provisions of section 376 of title 28, United States Code, as amended by this section, notwithstanding contributions or deposits made in accordance with applicable law at lower rates; and

(2) no additional liability shall be created with respect to deposits made in accordance with applicable law before the effective date of this section, or after such effective date pursuant to an agreement entered into before such effective date.

(c) REVOCATION.—(1) Within 180 days after the effective date of this section, any judicial official who, before such effective date, made an election under section 376 of title 28, United States Code, to come within the purview of that section, shall be entitled to revoke that election. Such revocation shall constitute a complete withdrawal from the judicial survivors' annuities program provided for in such section 376. No such revocation shall be effective unless it is submitted in writing to the Director of the Administrative Office of the United States Courts, and until such writing is received by the Director. Upon receipt by the Director of such writing, any rights to survivorship benefits for the survivors of such judicial official shall terminate, and all amounts credited to the individual account of such judicial official under section 376(e), together with interest at 3 percent per annum, compounded on December 31 of each year to such date of revocation, shall be returned to that judicial official in a lump-sum payment.

(2) Any judicial official who makes a revocation under paragraph (1) of this subsection and who thereafter becomes eligible to make an election under section 376(b) of title 28, United States Code, may make such election only if such judicial official redeposits, to the credit of the Judicial Survivors' Annuities Fund, the full amount of the lump-sum payment made to such judicial official under paragraph (1) of this subsection, together with interest at 3 percent per annum, compounded on December 31 of each year from the date of such revocation until the date upon which that amount is so redeposited.

(3) Any judicial official who fails to revoke an election in accordance with paragraph (1) of this subsection shall be deemed to have irrevocably waived the right to make that revocation.

(d) ANNUITIES FOR FORMER SPOUSES.—

(1) Section 376 of title 28, United States Code, is amended in subsection (a)—

(A) by striking out the period at the end of paragraph (5) and inserting in lieu thereof "; and"; and

(B) by adding at the end the following new paragraph:

"(6) 'former spouse' means a former spouse of a judicial official if the former spouse was married to such judicial official for at least 9 months.".

(2) Section 376 of title 28, United States Code, is amended by adding at the end the following new subsection:

"(s) A judicial official who has a former spouse may elect, under procedures prescribed by the Director of the Administrative Office of the United States Courts, to provide a survivor annuity for such former spouse under subsection (t). An election under this subsection shall be made at the time of retirement, or, if later, within 2 years after the date on which the marriage of the former spouse to the judicial official is dissolved. An election under this subsection—

"(1) shall not be effective to the extent that it—

"(A) conflicts with—

"(i) any court order or decree referred to in subsection (t)(1), which was issued before the date of such election, or

"(ii) any agreement referred to in such subsection which was entered into before such date; or

"(B) would cause the total of survivor annuities payable under subsections (h) and (t) based on the service of the judicial official to exceed 55 percent of the average annual salary (as such term is used in subsection (1)) of such official; and

"(2) shall not be effective, in the case of a judicial official who is then married, unless it is made with the spouse's written consent. The Director of the Administrative Office of the United States Courts shall provide by regulation that paragraph (2) of this subsection may be waived if the judicial official establishes to the satisfaction of the Director that the spouse's whereabouts cannot be determined, or that, due to exceptional circumstances, requiring the judicial official to seek the spouse's consent would otherwise be inappropriate.

"(t) (1) Subject to paragraphs (2) through (4) of this subsection, a former spouse of a

deceased judicial official is entitled to a survivor annuity under this section if and to the extent expressly provided for in an election under subsection (s), or in the terms of any decree of divorce or annulment or any court order or court-approved property settlement agreement incident to such decree.

"(2) The annuity payable to a former spouse under this subsection may not exceed the difference between—

"(A) the maximum amount that would be payable as an annuity to a widow or widower under subsection (1), determined without taking into account any reduction of such annuity caused by payment of an annuity to a former spouse; and

"(B) the amount of any annuity payable under this subsection to any other former spouse of the judicial official, based on an election previously made under subsection (s), or a court order previously issued.

"(3) The commencement and termination of an annuity payable under this subsection shall be governed by the terms of the applicable order, decree, agreement, or election, as the case may be, except that any such annuity—

"(A) shall not commence before—

"(i) the day after the judicial official dies, or

"(ii) the first day of the second month beginning after the date on which the Director of the Administrative Office of the United States Courts receives written notice of the order, decree, agreement, or election, as the case may be, together with such additional information or documentation as the Director may prescribe,

whichever is later, and

"(B) shall terminate no later than the last day of the month before the former spouse remarries before becoming 55 years of age or dies.

"(4) For purposes of this section, a modification in a decree, order, agreement, or election referred to in paragraph (1) of this subsection shall not be effective—

"(A) if such modification is made after the retirement of the judicial official concerned, and

"(B) to the extent that such modification involves an annuity under this subsection.".

(3)(A) Subsection (1) of section 376 of title 28, United States Code (as amended by subsection (1)(4)(C) of this section), is amended by striking out the period at the end of the last sentence and by adding at the end the following: ", and by the amount of any annuity payable to a former spouse under subsection (t)."

(B) Subsection (n) of section 376 of such title is amended in the last sentence by inserting after "equity," the following: "except as provided in subsections (s) and (t),".

(C) Subsection (o) of section 376 of such title is amended in paragraphs (2) and (3) by inserting "or (t)" after "subsection (h)" each place it appears.

(4) Payments of retirement salary as defined in section 376(a)(2) of title 28, United States Code, which would otherwise be made to the judicial official upon whose service the retirement salary is based, shall be paid (in whole or in part) to another person if and to the extent expressly provided for in the terms of any court decree of divorce, annulment, or legal separation, or the terms of any court order or court-approved property settlement agreement incident to any court decree of divorce, annulment, or legal separation. Any payment under this paragraph to a person bars recovery by any other person. This paragraph shall apply only to payments made after the date of receipt by the Director of the Administrative Office of United States Courts of written notice of such decree, order, or agreement, and such additional information and documentation as the Director may prescribe. As used in this paragraph, "court" means any court of any State or the District of Columbia.

(e) EFFECTIVE DATE.—This section shall take effect on October 1, 1986.

SEC. 3. REMOVAL JURISDICTION.

(a) SECTION 1441 AMENDMENT.—Section 1441 of title 28, United States Code, is amended by adding at the end the following new subsection:

"(e) The court to which such civil action is removed is not precluded from hearing and determining any claim in such civil action because the State court from which such civil action is removed did not have jurisdiction over that claim.".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply with respect to claims in civil actions commenced in State courts on or after the date of the enactment of this section.

SEC. 4. TRAVEL EXPENSES OF JUSTICES AND JUDGES.

(a) SECTION 456 AMENDMENT.—Section 456(a) of title 28, United States Code, is amended by striking out "for any continuous period" and all that follows through the end of the subsection and inserting in lieu thereof the following: "(1) all necessary transportation expenses; and (2) a per diem allowance for travel at the rate which the Director establishes not to exceed the maximum per diem allowance fixed by section 5702(a) of title 5, or actual and necessary expenses of subsistence actually incurred, notwithstanding the provisions of section 5702 of title 5, United States Code, in accordance with regulations which the Director shall prescribe with the approval of the Judicial Conference of the United States. In determining necessary expenses, the Director shall take into account the reasonable costs of transportation and subsistence generally incurred for travel to the geographic area involved.".

(b) EFFECTIVE DATE.—The amendment made by this section shall take effect on October 1, 1986.

SEC. 5. COLLECTION OF FEES FOR THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA.

(a) SECTION 1914 AMENDMENT.—Section 1914 of title 28, United States Code, relating to district court fees, is amended by striking out subsection (d).

(b) AMENDMENTS TO DISTRICT OF COLUMBIA CODE.—

(1) Section 15-701(a) of the District of Columbia Code, relating to compensation taxed as costs, is amended by striking out "clerk of the United States District Court for the District of Columbia,".

(2) Section 15-702 of such code, relating to docket fees, is amended—

(A) by striking out "(a)" and all that follows through "(b)"; and

(B) by striking out the section heading and inserting in lieu thereof the following:

"§ 15-702. Attorney fees taxed as costs"

(3) Section 15-703 of such code, relating to deposit and security for costs, is amended—

(A) by striking out "(a)" and all that follows through "(b)" and inserting in lieu thereof "(a)";

(B) in the undersignated paragraph by inserting "(b)" immediately before "A nonresident"; and

(C) in the section heading by striking out "Deposit for costs; security" and inserting in lieu thereof "Security".

(4) Section 15-704 of such code, relating to advance payment of costs and fees, is amended—

(A) in subsection (a) by striking out "(a)" and by striking out "the clerk of the United States District Court for the District of Columbia and"; and

(B) by striking out subsection (b).

(5) Section 15-706 of such code, relating to clerk's fees in the United States District Court for the District of Columbia, is hereby repealed.

(6) Section 15-709(a) of such code, relating to fees and costs in Superior Court, is amended by striking out the second sentence.

(7) The table of contents for chapter 7 of title 15 of such code, relating to fees and costs, is amended—

(A) by striking out the item relating to section 15-702 and inserting in lieu thereof

"15-702. Attorney fees taxed as costs."; and

(B) by striking out "Deposit for costs; security" in the items relating to section 15-703 and inserting in lieu thereof "Security".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to any civil action, suit, or proceeding instituted on or after the date of the enactment of this Act.

SEC. 6. JUDICIAL REVIEW OF FEDERAL MARITIME COMMISSION AND MARITIME ADMINISTRATION ORDERS.

(a) SECTION 2342 AMENDMENT.—Section 2342(3) of title 28, United States Code, is amended to read as follows:

"(3) all rules, regulations, or final orders of—

"(A) the Secretary of Transportation issued pursuant to section 2, 9, 37, 41 or 43 of the Shipping Act, 1916 (46 U.S.C. App. 839); and

"(B) the Federal Maritime Commission issued pursuant to—

"(i) section 23, 25, or 43 of the Shipping Act, 1916 (46 U.S.C. App. 822, 824, or 841a);

"(ii) section 19 of the Merchant Marine Act, 1920 (46 U.S.C. App. 876);

"(iii) section 2, 3, 4, or 5 of the Intercoastal Shipping Act, 1933 (46 U.S.C. App. 844, 845, 845a, or 845b);

"(iv) section 14 or 17 of the Shipping Act of 1984 (46 U.S.C. App. 1713 or 1716); or

"(v) section 2(d) or 3(d) of the Act of November 6, 1966 (46 U.S.C. App. 817d(d) or 817e(d));".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply with respect to any rule, regulation, or final order described in such amendment which is issued on or after the date of the enactment of this Act.

SEC. 7. TECHNICAL AMENDMENTS.

(a) REDESIGNATION OF DUPLICATE SECTIONS.—

(1) TITLE 28 AMENDMENTS.—Chapter 85 of title 28, United States Code, is amended—

(A) in the table of sections by striking out

"1364. Senate Actions.

"1364. Construction of references to laws of the United States or Acts of Congress."

and inserting in lieu thereof the following:

"1365. Senate Actions.

"1366. Construction of references to laws of the United States or Acts of Congress.";

(B) by striking out the section heading

"§ 1364. Senate actions"

and inserting in lieu thereof the following:

"§ 1365. Senate actions"; and

(C) by striking out the section heading

"§ 1364. Construction of references to laws of the United States or Acts of Congress"

and inserting in lieu thereof the following:

"§ 1366. Construction of references to laws of the United States or Acts of Congress".

(2) CONFORMING AMENDMENT.—Section 705(a) of the Ethics in Government Act of 1978 (P.L. 95-521; 2 U.S.C. 288d(a)) is amended by striking out "1364" and substituting "1365".

(b) DELETION OF INCORRECT REFERENCES.—Paragraph (3) of section 620(b) of title 28, United States Code, is amended—

(1) by striking out "referees,"; and

(2) by substituting "magistrates" for "commissioners".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on the date of the enactment of this Act.

The SPEAKER pro tempore. Is a second demanded?

Mr. MOORHEAD. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Wisconsin [Mr. KASTENMEIER] will be recognized for 20 minutes and the gentleman from California [Mr. MOORHEAD] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Wisconsin [Mr. KASTENMEIER].

Mr. KASTENMEIER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today I bring to the floor the Judicial Improvements Act of 1985 (H.R. 3570) an omnibus court reform package to improve the functioning of the Federal judicial branch. H.R. 3570 consists of provisions previously contained in the following House bills (H.R. 3081, H.R. 1472, H.R. 2446, H.R. 2561, H.R. 2724, and H.R. 3049).

At the outset, I would like to thank the ranking minority member, the gentleman from California [Mr. MOORHEAD], of my subcommittee for his efforts. In addition, 14 of the 15 members of the subcommittee [Mr. BROOKS, Mr. MAZZOLI, Mr. SYNAR, Mrs. SCHROEDER, Mr. FRANK, Mr. MORRISON, Mr. BERMAN, Mr. BOUCHER, Mr. MOORHEAD, Mr. HYDE, Mr. KINDNESS, Mr DEWINE, and Mr. SWINDALL] have cosponsored the bill. Their efforts are to be commended.

The Committee on Appropriations has no objection to consideration of the bill under suspension of the rules. The Appropriations Committee has worked on an amendment relating to the Judicial Survivors Annuities Fund (section 2) already incorporated in the bill: The amendment clarifies that the Government's contribution to the fund will be subjected to the appropriations process. The intent of the amendment is that the Government's contribution will be made only to such amounts as is provided in appropriations acts.

Both committees, Judiciary and appropriations, are very interested in and deeply committed to keeping costs to a reasonable level. We also want to exercise appropriate oversight. We want to see whether more judges elect to participate, whether the unfunded liability estimates are accurate, and whether the general purposes of the legislation are achieved. Obviously, we also are concerned about any legislation that creates entitlements. Our concerns are reflected in the amendment and the annual appropriations review that will result.

I would like to thank the ranking members of the Appropriations Committee—including Chairman WHITTEN, the ranking minority member, Mr. CONTE, and Subcommittee Chairman SMITH and the subcommittee's ranking minority member Mr. O'BRIEN—for not only their expeditious consideration of H.R. 3570 but also for the constructive amendment.

H.R. 3570 has been endorsed by the Judicial Conference of the United States and the administration. Two sections of the bill—section 2, relating to judicial survivors annuities, and section 6, relating to judicial review of Federal Maritime Commission and Maritime Administration orders—have passed the Senate in virtually the same form as they are presented to the House today.

All provisions of the omnibus bill have received virtually universal support and are without expressed opposition. Everything in the bill has received full and fair hearings. Testimony was received from representatives of the Judicial Conference of the United States, the U.S. Department of Justice, and the Federal Judges Association. Written statements have also been submitted by numerous other individuals and organizations, including the American Bar Association. Two proposals considered by the subcommittee—a bill relating to the commuting expenses of Federal judges and a bill relating to judicial disqualification—generated controversy and are not in this bill.

Let me now give a summary of the contents of the Judicial Improvement Act. I will be brief. Members who desire a more detailed explanation are referred to the House report (No. 99-423) which was filed on December 6, 1985.

Section 1 of the bill is the short title: Judicial Improvements Act of 1985.

Section 2—the most important section in the bill—reforms and improves the existing Annuities Program for survivors of justices and judges. This section includes the provisions of H.R. 3081, which has been cosponsored by 63 Members, a broad cross-section of the House. Section 2 makes several necessary improvements to a scheme, elective for Federal judges, which was created by Congress in 1956 and later updated in 1976. The Annuities Program has not kept pace with comparability adjustments in Federal judicial salaries. As a result of annuity payment amounts having not increased as anticipated, participation in the program for new judges entering on duty has dramatically diminished. Today fewer than 25 percent of newly appointed judges elect to participate. In essence, recently appointed Federal judges are routinely concluding that the program is "a whistle which isn't worth the penny." At the very least, inadequacies in the existing system have an effect on whether highly qualified individuals accept or reject a Presidential call to become a Federal judge or whether a sitting judge will stay on the bench or resign. One highly respected judge recently left office, stating candidly that "I can afford to live on the salary of a Federal judge but I can't afford to die on it." Section 2 attempts, by increasing annuity payment amounts by both judges and the Federal Government, by creating a minimum floor annuity, and by establishing an accelerated schedule of benefit amounts, to revitalize the existing program.

Section 3 of the bill sets forth a removal jurisdiction amendment originally proposed by Congressman SYNAR in H.R. 2446. It amends 28 U.S.C. 1441 to provide that a Federal court in which an action is removed from State court is not barred from hearing and determining a claim because the State court lacked jurisdiction over it.

Section 4 basically tracks the contents of H.R. 2561, which amends the statute governing reimbursement of travel expenses for judges while working away from their official duty stations, 28 U.S.C. 456. The amendment provides generally that judges are to be reimbursed for actual and necessary transportation and reasonable subsistence expenses incurred in such circumstances, in accordance with regulations prescribed by the Director of the Administrative Office of the U.S. Courts with approval of the Judicial Conference.

Section 5 of the bill relates to the collection of fees for the U.S. District Court for the District of Columbia. The effect of this amendment would be to make the fees charged in the D.C. District Court the same as the fees charged in other district courts—$60 for each civil filing. This change will place the D.C. District Court on an equal footing with all the other Federal district courts, which is where it deserves to be. The bill contains requisite conforming amendments to the D.C. Code, which has been cleared by the Chief Judge of the District Court for the District of Columbia, the Hon-

orable Audrey Robinson, and the chairman of the Subcommittee on Judiciary and Education of the District of Columbia Committee, Mr. DYMALLY.

Section 6 was originally sponsored by Chairman RODINO as H.R. 3049. Section 6 clarifies the intended impact of the Shipping Act of 1984 by providing for judicial review—in the circuit courts of appeals—of certain orders of the Federal Maritime Commission and the Maritime Administration. Unfortunately, the Shipping Act of 1984—processed by the Merchant Marine and Fisheries Committee—did not contain a clear and concise judicial review provision. Rather than curing drafting problems in the Maritime Appropriation Authorization Act for fiscal year 1986, which was originally proposed, Chairman RODINO's proposal addressed the need for statutory clarification directly. Section 6 of H.R. 3570 solves the problem of great impact to the agenices involved as well as litigants who must seek judicial review.

Section 7 of the bill sets forth two technical amendments to title 28 United States Code, that have been brought to the attention of the committee.

In sum, I ask support for this modest, but nonetheless important, legislation. Each section of H.R. 3570 is like a brick to be used in a large edifice, like a cathedral. Each brick appears to be insignificant, but the larger structure—in this case, the Federal judiciary—depends on each.

□ 1315

Mr. MOORHEAD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 3570, the Judicial Improvements Act of 1985. This omnibus bill, which is comprised of six judicial housekeeping and court reform measures enjoys strong bipartisan support and is without opposition. I would like to commend the Chairman of the Subcommittee on Courts, Civil Liberties, and the Administration of Justice, the gentleman from Wisconsin [Mr. KASTENMEIER] for his leadership on the legislation.

The provisions of H.R. 3570 that would reform the Judicial Survivors Annuity Program are greatly needed as evidenced by the number of judges declining to participate in the program. In 1976, 90 percent of Federal judges were participants in the program; last year only 74 percent were participating. In 1978, 74 percent of "entering on duty" or newly appointed judges elected to participate; in each of the last 3 years, fewer than 25 percent of newly appointed judges have elected to participate.

During the Courts Subcommittee's hearings on the legislation it became clear that the two most pressing problems with the current program are the lack of a minimum floor annuity and the prolonged period of years of service needed to achieve annuity amounts which are realistically adequate. H.R. 3570 addresses both these problems. First, it would establish a floor on benefits equal to 30 percent of average annual salary, which would be available once a judge has served at least 18 months. Second, it revises the annuity computation formula to provide an accelerated schedule of benefit payments that recognize both a judge's service and his or her participation in the program.

The legislation would also authorize judges now serving who have not previously elected to participate in the program to make such an election. Judges who do so will be required by existing statutory language to deposit amounts required to qualify their service for credit under the program. This provision will entail no additional costs to the Government and to the extent that it encourages slightly greater participation in the program, it will strengthen the actuarial stability of the program.

In addition to making other needed changes in the Judicial Survivors Annuity Program, H.R. 3570, incorporates the proposal introduced by our colleague, the gentleman from New York, BILL GREEN. It provides that an annuity payable to the surviving spouse of a judge is not to be terminated by remarriage of the surviving spouse after the age of 55. This is a worthwhile proposal, that conforms to the corresponding provision in the civil service retirement and I commend the gentleman [Mr. GREEN] for his initiative on this issue.

Another important proposal incorporated in H.R. 3570, is the administration's proposal that was introduced by the chairman of the Judiciary Committee, the gentleman from New Jersey [Mr. RODINO] that would clarify the intended impact of the Shipping Act of 1984 on judicial review of orders issued by the Federal Maritime Commission and the Maritime Administration.

The other proposal incorporated in H.R. 3570 dealing with travel expenses of judges, removal jurisdiction, and district court fees, are solid proposals, that, as I noted earlier are without opposition. I urge the passage of H.R. 3570.

Mr. KASTENMEIER. Mr. Speaker, I yield 2 minutes to the gentleman from Oklahoma [Mr. SYNAR], the author of H.R. 2446, the text of which is incorporated in this bill as section 3, and I would like to compliment him for his contribution.

Mr. SYNAR. Mr. Speaker, first of all, let me thank Chairman KASTENMEIER for those kind words and also commend him and our ranking minority member for their excellent work.

Mr. Speaker, section 2 of the Judicial Improvements Act incorporates legislation I introduced as a separate bill earlier this year. It enables plaintiffs whose attorneys misfile a Federal cause of action in State court to remove the action directly to the Federal courts instead of having to refile the action and risk a statute of limitations problem.

This legislation won't help millions of Americans but it will help those who lose the opportunity to vindicate their rights because of a mistake by their attorney. It helps all of us, however, by making our legal system more efficient.

I want to thank the person who suggested this legislation and helped me draft it. Prof. Emeritus George Fraser of the University of Oklahoma Law Center wrote about this problem in the Michigan Law Review in 1950. When I took his civil procedure course as a student, a removal question was on the final exam. And once I was appointed to the House Judiciary Committee, he suggested legislation.

Mr. Speaker, good ideas made good laws. I want to thank Professor Fraser, Chairman KASTENMEIER and my colleagues on the Judiciary Committee who recognized that this moderate reform of our Judicial Code will help make our system of justice operate more efficiently.

Mr. MOORHEAD. Mr. Speaker, I yield such time as he may consume to the gentleman from New York, Mr. BILL GREEN.

The gentleman from New York is the author of H.R. 1472, which was incorporated into H.R. 3570, and I commend him for his contribution.

Mr. GREEN. Mr. Speaker, I rise to express my appreciation to the chairman of the subcommittee, its ranking minority member and the members of the subcommittee for including in section 2 the judicial survivors annuities amendments, provisions to deal with the problem on which I have been working for some 5 years now.

That problem arose as a result of some technical language in the 1976 civil service retirement survivors annuities reinstatement law and the Social Security Amendments of 1977. That problem has now been addressed by the inclusion in section 2 of this legislation an amendment to title 28, United States Code, section 376, that will provide that an annuity payable to the surviving spouse of a judge is not to be terminated by remarriage of the surviving spouse after attaining the age of 55.

This change reflects concern for the situation of surviving spouses who are considering marriage at a point in their lives at which it is unlikely that either they or their potential spouses are likely to have long-term sources of earned income, and thus are looking

forward to a period when they are going to be dependent upon their retirement income.

The provision thus avoids the situation of having a widow who might otherwise be forced to choose to refrain from remarriage in order to avoid incurring financial hardships.

So I appreciate the members of the committee for dealing with this problem in what I think is a humane and inexpensive way.

Mr. KASTENMEIER. Mr. Speaker, will the gentleman from New York [Mr. GREEN] yield?

Mr. GREEN. I am delighted to yield to the distinguished gentleman from Wisconsin [Mr. KASTENMEIER].

Mr. KASTENMEIER. Mr. Speaker, I would like to recognize the contribution the gentleman from New York [Mr. GREEN] made. He was very conscientious in impressing this point on the committee. It does significantly improve the survivors annunity section of the bill and we appreciate his contribution.

Mr. GREEN. Mr. Speaker, I thank the distinguished chairman of the subcommittee, the gentleman from Wisconsin [Mr. KASTENMEIER].

Mr. MOORHEAD. Mr. Speaker, I have no further request for time, and I yield back the balance of my time.

Mr. KASTENMEIER. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin [Mr. KASTENMEIER] that the House suspend the rules and pass the bill, H.R. 3570, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. KASTENMEIER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous matter, on H.R. 3570, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

HAZARDOUS DUMPING AREAS

Mr. FLORIO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3917), to extend the period allowed for compliance with certain financial responsibility requirements applicable to land disposal facilities under the Solid Waste Disposal Act.

The Clerk read as follows:

H.R. 3917

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CERTIFICATION OF COMPLIANCE WITH FINANCIAL RESPONSIBILITY REQUIREMENTS

(a) EXTENSION.—In the case of any facility used for land disposal of hazardous waste, notwithstanding the termination of interim status of the facility by reason of the failure of the owner or operator of the facility to file a certification under section 3005(e)(2)(B) of the Solid Waste Disposal Act, such interim status shall be treated as continuing in effect if the owner or operator—

(1) filed on or before November 8, 1985, with the Administrator an adequate certification (under section 3005(e)(2)(B) of such Act) of compliance with (A) groundwater monitoring requirements as of November 8, 1985, and (B) financial responsibility requirements (except for the liability requirements of 40 C.F.R. 265.147),

(2) applied on or before November 8, 1985, for final determination regarding the issuance of a permit pursuant to section 3005(e)(2)(A) of such act, and

(3) files with the Administrator within the time limits set forth in subsection (d) of this section each of the following:

(A) A certification that, in addition to the certification required in paragraph (1), the facility is in compliance with all other major applicable requirements under subtitle C of such act, or is in timely compliance with an enforceable compliance schedule.

(B) A certification that the facility is not contaminating groundwater or has established the applicable compliance monitoring or corrective action program.

(C) A certification that the facility could not meet the requirements of the financial test under 40 C.F.R. 265.147(f).

(D) A certification that the owner or operator of the facility has been making good faith efforts to satisfy all applicable financial responsibility requirements for the facility pursuant to the Solid Waste Disposal Act and provides documentation of that effort which is satisfactory to the Administrator.

(b) OTHER FACILITIES.—An extension of interim status under this section shall also apply to any facility used for land disposal of hazardous waste which had been operating pursuant to interim status under section 3005(e) of the Solid Waste Disposal Act, if the owner or operator of the facility files each of the following with the Administrator within the time limits set forth in subsection (d):

(1) A certification that the owner or operator of the facility applied for a final determination regarding the issuance of a permit on or before November 8, 1985, pursuant to section 3005(e)(2)(A) of such Act, or submitted a closure plan on or before November 23, 1985.

(2) A certification that the facility was in compliance with the groundwater monitoring requirements and the financial responsibility requirements (except for the liability requirements of 40 C.F.R. 265.147) on November 8, 1985, but failed to certify as required under section 3005(e)(2)(B) of the Solid Waste Disposal Act.

(3) A certification that the facility is in compliance with the groundwater monitoring requirements and financial responsibility requirements (except the liability requirements of 40 C.F.R. 265.147) supported by documentation in a form satisfactory to the Administrator that may include a notarized statement by a professional engineer not an employee of the owner or operator who corroborates such certification.

(4) A certification that, in addition to the certification required in paragraph (3), the facility is in compliance with all other major applicable requirements under subtitle C of such Act, or is in timely compliance with an enforceable compliance schedule.

(5) A certification that the facility is not contaminating groundwater or has established the applicable compliance monitoring or corrective action program.

(6) A certification that the owner or operator of the facility could not meet the requirements of the financial test under 40 C.F.R. 265.147(f).

(7) A certification that the owner or operator of the facility has been making good faith efforts to satisfy all applicable financial responsibility requirements pursuant to the Solid Waste Disposal Act and provides documentation of that effort which is satisfactory to the Administrator.

(c) REJECTION BY THE ADMINISTRATOR.—Within the time limits set forth in subsection (d), the Administrator shall reject the information submitted by the owner or operator of a facility pursuant to subsection (a) or (b) if the information fails to meet the requirements of such subsections. The determinations of the Administrator under this section shall not be subject to judicial review.

(d) TIME LIMITS.—

(1) NOTICE.—The Administrator shall identify each facility the interim status of which under section 3005(e) of the Solid Waste Disposal Act terminated on November 8, 1985, by reason of section 3005(e)(2) of that Act. Within 15 days after enactment of this Act, the Administrator shall notify the owner or operator of each such facility of the extensions available under this Act.

(2) DEADLINES.—Each certification described in subsections (a) and (b) shall be submitted before the earlier of the following:

(A) 45 days after the owner or operator of the facility receives notice under paragraph (1).

(B) 60 days after enactment of this Act.

(3) INITIAL EXTENSION PERIOD.—If the owner or operator of a facility has submitted the required filings under subsection (a) or (b) within the time limits set forth in this subsection, the extension of interim status under subsection (a) or (b) shall continue for a period ending 45 days after the date of such submission.

(4) SECOND EXTENSION PERIOD.—The extension of interim status for a facility under subsection (a) or (b) shall be extended until June 30, 1986, if the Administrator certifies, based on information submitted by the owner or operator of the facility concerned, in the Federal Register that the facility is not contaminating the groundwater or has entered into an order to implement as soon as practicable a compliance monitoring or corrective action program.

(e) MODIFICATION OF REGULATIONS.—Not later than March 1, 1986, the Administrator shall revise the regulations set forth in 40 C.F.R. 265.147 to provide additional financial responsibility alternatives to the insurance requirement contained in such regulations and may provide for a lesser demonstration of financial responsibility if the Administrator has made the certification required in subsection (d)(4). The Administrator may consider such alternatives as indemnity contracts, surety bonds, corporate guar-

antees, and other means of assuring financial responsibility.

(f) DEFINITION OF TERMS.—The terms used in this section shall have the same meaning as when used in the Solid Waste Disposal Act.

(g) ADDITIONAL EXTENSION.—In the case of a facility for which an extension has been provided under subsection (d)(4), the Administrator may issue an additional extension for such facility for a period ending November 8, 1986, if the Administrator finds that an additional extension under this subsection for the facility is necessary because of constraints in the insurance market and if, on June 30, 1986, the owner or operator of the facility files both of the following with the Administrator:

(1) A certification that the facility is not contaminating groundwater or is in timely compliance with an enforceable compliance monitoring or corrective action program.

(2) A certification that he has been making good faith efforts to satisfy all applicable financial responsibility requirements pursuant to the Solid Waste Disposal Act and provides documentation of that effort which is satisfactory to the Administrator.

(h) SATISFACTION OF LIABILITY REQUIREMENTS.—If a facility is operating pursuant to an extension under this section and the owner or operator certifies that he has satisfied the liability requirements of 40 C.F.R. 265.147 for such facility, such facility shall be treated as if the facility had fully certified under section 3005(e)(2) of the Solid Waste Disposal Act as of November 8, 1985.

The SPEAKER pro tempore. Is a second demanded?

Mr. LENT. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from New Jersey [Mr. FLORIO] will be recognized for 20 minutes and the gentleman from New York [Mr. LENT] will be recognized for 20 minutes.

The Chair recognizes the gentleman from New Jersey [Mr. FLORIO].

Mr. FLORIO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today, we consider a bill that would afford relief to certain hazardous waste land disposal facilities which lost their interim permit to operate on November 8, 1985, solely because they could not obtain the liability insurance required to satisfy the Hazardous and Solid Waste Amendments of 1984. The path we have taken to consider this bill has been a complicated one. Therefore, I think it would be useful to review briefly the events leading to this proposal.

In 1976, Congress passed the Resource Conservation and Recovery Act, which required the Environmental Protection Agency to develop a permitting procedure for hazardous waste facilities. As part of that act, Congress included a provision allowing facilities to operate under a short term of interim permit until a final permit was issued.

On November 19, 1980, EPA issued regulations to govern facilities operating under interim status permits which required ground water monitoring and financial responsibility. These minimum requirements have been widely ignored, and EPA has done little or nothing to enforce them. A 1984 GAO report documented widespread noncompliance, finding that well over half of the disposal facilities were not complying with the regulations.

Last year, out of sheer frustration with EPA's effort, the Congress required compliance with ground water monitoring and financial responsibility within 1 year. Let me make it clear that these two requirements do not guarantee that hazardous waste disposal facilities be safe or not leaking. All they require is that there be wells to determine if there are leaks and that owners have the financial ability to respond if problems occur.

Only a few days before the November 8 deadline, EPA informed Congress that some facilities could not demonstrate the necessary financial responsibility requirements, and suggested that it was up to Congress to do something to address the problem. Although the number of facilities affected is relatively small—EPA estimate between 50 and 90, I have been concerned if there is a problem with legitimate, safe disposal facilities simply being unable to demonstrate financial assurance under EPA regulations.

EPA was apparently unwilling or unable to develop a regulatory system with sufficient flexibility to allow legitimate, financially viable disposal companies the opportunity to remain in business. Congress was forced to act.

The bill before us applies to a narrow class of hazardous waste land disposal facilities which on or before November 9, 1985, filed with the Administrator an adequate certification under section 3005(e)(2)(B) of the Solid Waste Disposal Act—hereafter referred to as "RCRA" except for a certification of compliance with the liability requirements of 40 CFR 265.147. Such facility must also have applied on or before November 8, 1985 for a final determination pursuant to section 3005(e)(2)(A) of RCRA. If a facility satisfies both of these requirements, it can obtain an extension of interim status, but only if it further provides to the Administrator the following additional certifications.

First, the owner or operator must certify that, in addition to its certification of compliance with ground water monitoring and financial responsibility requirements—except for the liability requirement—the facility is in compliance with all other major applicable requirements under subtitle C of the Solid Waste Disposal Act, or is in timely compliance with an enforceable compliance schedule. Major applicable requirements are those the violation of which would constitute so-called class 1 violations under the Administrator's enforcement program. An enforceable compliance schedule is one in which the owner or operator of the facility has entered into an order with the Administrator to correct any violations.

Second, the owner or operator must certify that the facility is not contaminating ground water or has established the applicable compliance monitoring or corrective action program. It is incombent on the owner or operator of the facility to provide to the Administrator all the information necessary to demonstrate that there is no ground water contamination. The applicable compliance monitoring or corrective action program refers to requirements in the so-called part B final permit application which require that such programs be established upon the submission of such an application if ground water contamination has been detected. Such programs shall include any additional provisions the Administrator determines to be necessary to ensure that the program controls ground water contamination. The owner or operator must also certify to the satisfaction of the Administrator that such programs are actually in place.

Third, the owner or operator of the facility must certify that the facility could not meet the requirements of the financial test under 40 CFR 265.147(f). The facility must specifically certify that it is incapable of meeting one or more of the requirements necessary to meet the financial test and must provide evidence sufficient to support such a certification.

Finally, the owner or operator of the facility must certify that he has been making good faith efforts to satisfy all applicable financial responsibility requirements, including the liability requirement. This certification must provide all documentation necessary to satisfy the Administrator that the owner or operator has been making good faith efforts on an ongoing basis to satisfy the liability requirement.

Extensions of interim status may also be afforded to other hazardous waste land disposal facilities, if the owner or operator of the facility files with the Administrator a certification that the owner or operator of the facility applied for a final determination regarding the issuance of a permit on or before November 8, 1985, pursuant to section 3005(e)(2)(A) of RCRA, or that the owner or operator submitted a closure plan on or before November 23, 1985. An interim status extension for facilities which have submitted timely closure plans should apply only

to closure plans which specifically call for limited use of the hazardous waste land disposal facility during closure.

The owner or operator of such a facility must also certify that the facility was in compliance with applicable ground water monitoring and financial responsibility requirements—except the liability requirements—on or before November 8, 1985, but failed to certify as required under section 3005(e)(2)(B) of RCRA. The owner or operator must further certify that the facility is in compliance with those requirements as of the date of certification and such certification must be supported by documentation satisfactory to the Administrator.

The owner and operator of such a facility must also provide certifications regarding compliance with all other major applicable requirements under subtitle C of RCRA, regarding ground water contamination, regarding the owner or operator's inability to satisfy the financial test, and regarding the owner or operator's ongoing good faith efforts to satisfy all of the financial responsibility requirements. These certifications must be submitted in the same manner as required for those facilities which filed on or before November 8, 1985, with the Administrator an adequate certification under section 3005(e)(2)(B) except for the liability requirements and an application for a final determination pursuant to section 3005(e)(2)(A).

The Administrator is required to reject the information submitted by the owner or operator of a facility if such information fails to meet the requirements under this bill. If the information is rejected by the Administrator, the owner or operator of the facility will be treated as if the owner or operator had not submitted the necessary information. Determinations of the Administrator shall not be subject to judicial review.

Under this bill, the Administrator must identify and, within 15 days of enactment, notify each facility the interim status of which was terminated on November 8, 1985, by reason of section 3005(e)(2) of RCRA. The notification shall provide a complete description of the extensions available under this bill and a detailed description of the information and certifications that must be submitted to satisfy the requirements for such extensions.

The owner or operator of any facility has 45 days after the owner or operator receives the Administrator's notification to submit the information and certifications necessary to receive an extension of interim status.

In no event will interim status extensions be provided if the required information and certifications are submitted more than 60 days after enactment. Interim status of the facility is not extended until all of the required certifications and information have been submitted by the owner or operator.

If all the required certifications and information is submitted by the facility owner or operator in a timely fashion, the interm status of such facility shall extend for a period ending 45 days after the date of such submission.

A second extension of interim status for a facility shall be provided until June 30, 1986, if the Administrator certifies in the Federal Register, based on information submitted by the owner or operator of the facility concerned, that the facility is not contaminating ground water or has entered into an order to implement as soon as practicable a compliance monitoring or corrective action program. If the Administrator certifies that the owner or operator of the facility is not contaminating the ground water, the Administrator must publish, along with the certification, a description of the evidence upon which the Administrator relied to make such certification. If the Administrator certifies that the owner or operator of the facility has entered into an order to implement as soon as practicable a compliance monitoring or corrective action program, the Administrator should certify that, under the order, the owner or operator of the facility will be controlling ground water contamination at the time of the Administration's certification or that the owner or operator could practicably not do so at the time of the certification.

Not later than March 1, 1986, the Administrator shall revise the regulations set forth in 40 CFR 265.147 to provide additional financial responsibility alternatives to the insurance requirement contained in such regulations. He may also provide for a lesser demonstration of financial responsibility for certain facilities, but only if the Administrator has made the certification regarding ground water contamination at such facilities as is required for an extension of interim status until June 30, 1986. Such modifications may apply to all interim status land disposal facilities, except for modifications involving lesser demonstrations of financial responsibility which shall apply only to those facilities certified by the Administrator as required for an extension of interim status until June 30, 1986. The Administrator may consider alternatives such as indemnity contracts, surety bonds, corporate guarantees, and other means of assuring financial responsibility as long as such alternatives do not lessen the protections afforded to third parties from injury or property damage.

The terms used in this section shall have the same meaning as when used in RCRA.

If an interim status extension has been provided until June 30, 1986, the Administrator may issue an additional extension for such facility for a period ending November 8, 1986. The Administrator must find that an additional extension is necessary because of constraints in the insurance market. The owner or operator must also file with the Administrator on June 30, 1986, a certification that the facility is not contaminating ground water or is in timely compliance with an enforceable compliance monitoring or corrective action program as well as a certification that the owner or operator of the facility has been making good faith efforts to satisfy all applicable financial responsibility requirements and provides documentation of that effort which is satisfactory to the Administrator. The Administrator may reject the certifications submitted for this additional extension if they do not adequately demonstrate that the facility is either not contaminating ground water or is not in timely compliance with an enforceable compliance monitoring or corrective action program. Timely compliance with an enforceable compliance monitoring or corrective action program under this bill means that the owner or operator of the facility has met all of the requirements set forth in the order implementing the compliance monitoring or corrective action program under the time schedule set forth in the order. It is the intent of the provision to ensure that there are no delays in the implementation of a compliance monitoring or corrective action program for whatever reason.

Finally, this bill makes it clear that if the owner or operator of a facility certifies at any time during the extensions afforded in this legislation that it has satisified the liability requirements of 40 CFR 265.147 for such facility, such facility shall be treated as if the facility had been fully certified under section 3005(e)(2) of the Solid Waste Disposal Act as of November 8, 1985. During the time in which a facility is operating pursuant to an extension afforded in this legislation, such facility is subject to all of the requirements applicable to hazardous waste land disposal facilities operating under interim status.

This is a carefully crafted, limited bill that provides relief to a narrow class of adversely affected facilities. I want to make it absolutely clear that this bill does nothing to affect the impact of the 1984 RCRA amendments on facilities which could not certify compliance with applicable ground water monitoring requirements. EPA has reported that over two-thirds of the 1,600 operating interim status facilities closed down on November 8, 1985. This bill would only affect approximately 50 of those facilities.

We must make sure that the firm deadlines imposed in the 1984 RCRA

amendments remain firm, and I believe this narrow relief legislation would not undercut that critical goal.

□ 1330

Mr. Speaker, I reserve the balance of my time.

Mr. LENT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H.R. 3917, a bill to extend the time period for compliance with the financial responsibility requirements under RCRA.

Mr. BROYHILL, the distinguished ranking minority member of the Committee on Energy and Commerce, together with the gentlewoman from Connecticut [Mrs. JOHNSON] is the prime sponsor of this important legislation. Unfortunately, Mr. BROYHILL, was detained in his district this morning and cannot be here.

Without this legislation, businesses that depend on onsite land disposal to make their operation viable, will have to close. This legislation provides those businesses—under stringent safeguards—the ability to continue to operate even if they cannot get the liability insurance required under RCRA. Before an extension can be granted, however, the Administrator must find that the land disposal facility is in compliance with the requirement of RCRA.

I want to commend Mr. BROYHILL and Mrs. JOHNSON for their diligent efforts in fashioning this bill under difficult conditions. I also want to commend Mr. FLORIO for his role in this legislation. Without his input into the bill and his statesman like willingness to move this legislation expeditiously through subcommittee, we would not be here today. Of course, I would be remiss if I did not mention the important role played by our distinguished full committee chairman, Mr. DINGELL, in aiding our efforts to bring this legislation to the floor before the end of the first session.

I also want to commend two additional cosponsors, Mr. FOLEY and Mr. LOTT. Their help and interest has enabled us to promptly bring this legislation before the House today.

I look forward to seeing this legislation approved by the House this afternoon so that the other body will also have an opportunity to take this up before it adjourns for Christmas recess.

Mr. Speaker, in that regard, in order to enhance the chances of quick action by the other body, I have joined Mr. DINGELL, Mr. FLORIO, and Mr. BROYHILL in writing to the appropriate committee advising them of this legislation and urging them act quickly.

Mr. Speaker, I urge my colleagues to support H.R. 3917.

Mr. FLORIO. Mr. Speaker, I yield 3 minutes to the gentleman from Ohio [Mr. ECKART.]

Mr. ECKART of Ohio. Mr. Speaker, for purposes of a colloquy, I would like to address the gentleman from New Jersey [Mr. FLORIO].

I feel strongly that the action we are taking here today should not in any way be construed to mean that, with regard to the dozens of other approaching deadlines contained in the Hazardous and Solid Waste Amendments of 1984, we intend to be granting extensions. These deadlines, and the hammers attached to them, were enacted for very important reasons. Can I get some assurance from the subcommittee chairman that we are not, however, going to be granting such extensions on other deadlines as they arise?

Mr. FLORIO. If the gentleman would yield, the gentleman is correct; that this is a piece of legislation that is designed to deal with a specific problem related to the insurance industry, and that there should be no interpretation taken from this legislation passing that we are in any way going to vary from the legislation that has imposed other deadlines, the RCRA Amendment of 1984.

Mr. ECKART of Ohio. Second, I want to emphasize that the concept of compliance schedules embodied in this bill is not a substitute for physical compliance with the requirements mandated by the solid waste disposal act. Do I understand that it is the intention of the sponsors of this bill and the subcommittee chairman that this means actual physical compliance?

Mr. FLORIO. If the gentleman would yield, the gentleman is correct, that in fact as I have indicated in my remarks, the protection in terms of certifying that these facilities will not be lacking in many respects is stronger than even the language in the initial act.

Mr. ECKART of Ohio. Could I inquire as to whether my understanding is correct that this legislation does not in any way change the certification requirements for ground water monitoring set forth in section 3005(e) of the Solid Waste Disposal Act?

Mr. FLORIO. The gentleman is correct.

Mr. ECKART of Ohio. Fifth, with respect to the "second extension period," the EPA Administrator must certify to the facility's compliance, I feel it is important that the Administrator must have and use all the knowledge that is available to him.

Is it the intent of the authors of this legislation, in your understanding, Mr. FLORIO, that the Agency also use any information available to it, and not rely solely on the information provided by the owner/operator?

Mr. FLORIO. If the gentleman would yield, it is the requirement that the Agency use all of the information that may be available to it.

□ 1340

Mr. ECKART of Ohio. Finally, Mr. Speaker, could the gentleman from New Jersey describe what requirements of subtitle C are considered by this legislation to be "major requirements"?

Mr. FLORIO. If the gentleman will yield further, under this legislation violation of a major requirement is considered to be a class 1 violation under the Solid Waste Disposal Act.

Mr. ECKART of Ohio. I thank the gentleman from New Jersey for his able assistance in clarifying the effect and intent of certain provisions of this bill. I commend the gentleman from New York, colleague from Connecticut, and the sponsors of the bill, for their good faith efforts to find a solution to what they see as a real problem, one which is probably the fault of the insurance industry and not that of legitimate people engaged in the proper disposal of hazardous waste. Nonetheless, I cannot feel comfortable about what we are doing here today. I frankly do not believe we should be going forward with this bill at all.

First, we are sending the wrong signal to EPA, the public and the industry by extending the first major deadline of the Hazardous and Solid Waste Amendments of 1984. Will we now be expected to blink every time a new, supposedly "onerous" deadline approaches?

Second, we really don't know what results we are effecting with this legislation. Neither the EPA nor the sponsors of this legislation can tell us how many facilities this bill covers, or why they couldn't get insurance. Is it because they are polluting the ground water? Because they really didn't try? Or was it in fact a phenomenon of fluctuations in the insurance market? In short, we are legislating without any hard knowledge at all.

The one thing we can be sure of is that, by allowing hazardous waste disposal facilities to operate without insurance, we are shifting the burden of a possible leak from the owner/operator, where it belongs, to the victimized community. I submit that this fact alone, weighed against the dearth of other knowledge, is enough to militate against our taking this action here today.

But more than that troubles me about this bill. Subsection (h), entitled "Satisfaction of Liability Requirements," grandfathers back to November 8, 1985 the interim status of any facility receiving a renewal of that status pursuant to this bill. This means that any facility covered by this bill that continued to accept waste after November 8, in criminal violation of the law, would be safe from prosecution. The Justice Department could not enforce against such a facility for illegally continuing to accept

waste in violation of interim status because that interim status will have been retroactively restored. And, unless the facility owner/operator, out of the goodness of his heart, decided to admit his illegal behavior to EPA, the Agency would probably never know, and the renewal of interim status would be granted.

Mr. Speaker, I realize the efforts that have gone into this bill, and the good faith attempt to resolve what is perceived as a real and unfair problem. But I suggest that there are too many loopholes, too much potential negative impact, and too many unanswered questions to go forward with this legislation as currently written.

Mr. LENT. Mr. Speaker, I take pleasure in yielding such time as she may consume to one of the cosponsors of this legislation, the gentlewoman from Connecticut [Mrs. JOHNSON], whose input was so important in the passage of this legislation.

Mrs. JOHNSON. Mr. Speaker, I rise in strong support of H.R. 3917 and commend my colleagues on the Energy and Commerce Committee for responding to an emergency situation with a reasonable, tightly drawn extension for those companies that find themselves in full compliance with the letter and spirit of the Resource Conservation and Recovery Act but are unable to purchase liability insurance, as required by the financial responsibility provisions of RCRA.

My original cosponsorship of this bill came about because of the predicament several small metal-plating companies in my district found themselves in on November 8. As my colleagues are well aware, November 8 was the deadline for meeting RCRA-mandated ground water monitoring and financial responsibility requirements. Yet, just like for day care providers, truckers, ski lift operators, and many others, liability insurance markets simply have dried up. The environmental impairment liability insurance that these small metal-finishers require because they produce metal-hydroxide sludges is just not available at any price.

Despite months and months of searching for adequate coverage to meet the standards set forth in RCRA regulations, my constituents have found either outright refusals or inadequate coverage limits available to them in the insurance market.

I appreciate my colleagues persistence in their labors on this matter because the small companies in my district and others nationwide are among the first victims of what is certain to be an epidemic of insurance-related problems in the business sector in coming years. In my district we have seen enough business dislocations and layoffs in bearings, machine tools, brass, and so on, so that I hope we can avoid the spectacle of people losing their jobs right before Christmas, especially if it is unnecessary. The extension granted by this legislation will give these otherwise-complying industries a chance to meet the financial responsibility requirements promulgated by the Environmental Protection Agency and continue providing jobs and products.

Mr. LENT. Mr. Speaker, I yield such time as he may consume to the gentleman from Colorado [Mr. SCHAEFER].

Mr. SCHAEFER. I thank the gentleman for yielding time to me.

Mr. Speaker, last year Congress passed the Resource Conservation and Reovery Act [RCRA] which forced compliance with ground water monitoring regulations anf financial responsibility requirements by November 8 of this year.

Unfortunately, we currently find ourselves in the position of requiring some landfills to close even though they have taken all the necessary steps to remain open, except for one that is beyond their control, the difficulty in obtaining insurance.

I want to emphasize that only one change will be made in current law: land disposal facilities have been given one more year to obtain insurance before they are forced to close.

In my home State of Colorado, 11 of the State's 14 private toxic waste dumps will continue to have operations affected without this extension.

These facilities will be forced to ship their wastes through Colorado within the next month and a half if Congress doesn't act. Federal regulations require companies to carry up to $6 million in liability protection against toxic leaks and spills and such policies are simply not available to many operators.

Mr. Speaker, last year this body decided to set November 8 as a compliance date because of 3 years of little action on meeting regulations. We still need to set a compliance date, but we should also recognize that there are legitimate reasons that operators were not able to meet the deadline.

I urge the support of my colleagues for this extension.

Mr. Speaker, I yield back the balance of my time.

Mr. LENT. Mr. Speaker, I have no further requests for time, and Mr. Speaker, assuming the gentleman from New Jersey [Mr. FLORIO] has no further requests for time, I yield back the balance of my time.

Mr. FLORIO. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey [Mr. FLORIO] that the House suspend the rules and pass the bill, H.R. 3917.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON ENERGY AND COMMERCE TO FILE REPORTS ON H.R. 3777 AND H.R. 3131 ON JANUARY 10, 1986

Mr. FLORIO. Mr. Speaker, on behalf of the Committee on Energy and Commerce, I ask unanimous consent that the committee may be permitted to file its reports on two bills, H.R. 3777 and H.R. 3131, on Friday, January 10, 1986.

Mr. Speaker, this is being done with the concurrence of the minority.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. LENT. Mr Speaker, reserving the right to object, and I shall not object, these two trade bills are both bills which passed the Committee on Energy and Commerce by wide margins, and I think the gentleman's request is in order.

Mr. Speaker, I would join with the gentleman in his request.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

MAKING IN ORDER ON TODAY OR ANY DAY THEREAFTER CONSIDERATION OF CONFERENCE REPORT AND AMENDMENTS IN DISAGREEMENT ON HOUSE JOINT RESOLUTION 465 FURTHER CONTINUING APPROPRIATIONS, 1986

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that it shall be in order, any rule of the House to the contrary notwithstanding, at any time on today, Monday, December 16, 1985, or any day thereafter, to consider the conference report and amendments in disagreement and motions to dispose of said amendments on House Joint Resolution 465 subject to the availability of said conference report and motions to dispose of amendments in disagreement for at least 1 hour, that all points of order be waived against the conference report and amendments in disagreement and motions to dispose of said amendments, and that said conference report and amendments in disagreement be considered as having been read when called up for consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

PERMISSION TO FILE CONFERENCE REPORT ON HOUSE JOINT RESOLUTION 465, FURTHER CONTINUING APPROPRIATIONS, 1986

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the joint resolution (H.J. Res. 465) making further continuing appropriations for the fiscal year 1986, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

AUTHORIZING ADDITION TO APOSTLE ISLANDS NATIONAL LAKESHORE

Mr. VENTO. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2182) to authorize the inclusion of certain additional lands within the Apostle Islands National Lakeshore, as amended.

The Clerk read as follows:

H.R. 2182

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act of September 26, 1970 (P.L. 91-424; 16 U.S.C. 460w) is amended as follows:

(1) In section 1:

(a) in the first sentence, after the phrase "consisting of", insert: ": (a) IN GENERAL.—";

(b) at the end of the first sentence, delete "1970" and insert: "1970; and

"(b) LONG ISLAND ADDITION.—Approximately 200 acres of land at the mouth of Chequamegon Bay known as 'Long Island', as depicted on the map numbered NL-AI-91,001 and dated December, 1985.";

(c) in the last sentence, delete "map" and insert "maps".

(2) In section 3, after the word "donation.", strike the following sentence and insert in lieu thereof the following: "Notwithstanding any other provision of law, any Federal property located within the boundaries of the lakeshore is hereby transferred without transfer of funds to the administrative jurisdiction of the Secretary for the purposes of the lakeshore: Except, that the United States Coast Guard may retain a right to utilize a portion of such land and facilities for use as navigational aids so long as may be required."

(3) In section 4(c), after "January 1, 1967", insert: ", or before January 1, 1985 for those lands referred to in section 1(b)".

(4) Section 8 of such Act is amended by adding the following at the end thereof: "Effective October 1, 1986, there are authorized to be appropriated such additional sums as may be necessary for the acquisition of the lands described in section 1(b)."

The SPEAKER pro tempore. Is a second demanded?

Mr. LAGOMARSINO. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Minnesota [Mr. VENTO] will be recognized for 20 minutes and the gentleman from California [Mr. LAGOMARSINO] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Minnesota [Mr. VENTO].

Mr. VENTO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to bring to the House H.R. 2182. This legislation authorizes the inclusion of a small land area known as "Long Island" within the Apostle Islands National Lakeshore. This is a freshwater barrier island one of the few in existence, a sand spit initially connected to the mainland but blown out in the early 1800's.

The Apostle Islands are a 22-island chain located on Lake Superior in northern Wisconsin; 20 of the 22 islands are presently part of the Apostle Islands National Lakeshore, established in 1970. Long Island is the southernmost island in the Apostle Islands chain. The island is a long and narrow barrier island formation with several miles of sandy beach and low dunes. This Wisconsin island includes important nesting areas for two endangered bird species, the Piping Plover and the common Tern, in this area. The known history of this island dates back to the mid-1600's when forts and trading posts were established by French voyageurs on the island.

This island land area proposed to be included by this legislation comprises approximately 270 acres, of which 137 acres are already owned by the Federal Government. Except for the two automated lighthouses, the Coast Guard property on the island was transferred to the care and custody of the Bureau of Land Management in 1967. Other than the two lighthouses, the Coast Guard has no real interest in the property, and the Bureau of Land Management is in the process of eliminating its landholdings within Wisconsin. Based on these facts, the Committee on Interior and Insular Affairs adopted an amendment that transfers the Federal land on Long Island to the National Park Service, but allows the Coast Guard to continue to maintain its automated lighthouses for necessary navigation purposes.

H.R. 2182 enjoys widespread support within the State of Wisconsin. The committee received testimony in support of this bill from Senator WILLIAM PROXMIRE, Representative DAVE OBEY and Representative JIM MOODY, the Wisconsin Governor's office and a number of environmental organizations including the Sierra Club, the National Audubon Society and the Wilderness Society. Importantly, this measure has bipartisan support from the Wisconsin congressional delegation.

Mr. Speaker, Long Island was originally part of the National Park Service proposal for Lakeshore but was deleted due to an unrelated controversy over Indian land on the mainland. The legislation before us corrects that omission.

I want to commend the gentleman from Wisconsin [Mr. OBEY] for his initiative in introducing this measure and the subsequent assistance he offered the committee in its deliberations.

I urge adoption of H.R. 2182.

Mr. Speaker, I recommend the bill to the House, and I reserve the balance of my time.

Mr. LAGOMARSINO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to briefly comment on H.R. 2182. This bill would add 230-acre Long Island to the Apostle Islands National Lakeshore in Wisconsin.

One-half of Long Island is currently owned by the U.S. Coast Guard for navigational aid purposes. The Coast Guard has no objections to the transfer of the land since the bill permits the Coast Guard continued use and occupancy of the light stations on the island for as long as necessary.

Although I am concerned about authorizing new Federal acquisitions of parkland in view of the current backlog of authorized, but unpurchased park additions, I do believe Long Island is an appropriate addition to the National Park System. The estimated acquisition costs are relatively modest and the island seems to be a logical expansion of the Apostle Islands National Lakeshore.

Therefore, I urge the adoption of H.R. 2182.

Mr. Speaker, I yield back the balance of my time.

Mr. VENTO. Mr. Speaker, I thank the gentleman from California [Mr. LAGOMARSINO] for his cooperation and assistance with regard to this legislation.

Mr. Speaker, I yield such time as he may consume to the main sponsor of the bill, the gentleman from Wisconsin [Mr. OBEY].

Mr. OBEY. Mr. Speaker, I simply would like to thank the gentleman from Minnesota [Mr. VENTO] and the gentleman from California [Mr. LAGOMARSINO] for their consideration of this proposal.

As has been indicated, this proposal has bipartisan support within the congressional delegation.

I appreciate the support of the delegation and of the committee in bringing the measure before us today.

Mr. Speaker, I rise in support of legislation which would further enhance the picturesque Apostle Islands National Lakeshore at the tip of the northern Wisconsin mainland in Lake Superior. Since Senator NELSON and Representative KASTENMEIER

led the effort to create this unique Federal park in 1970, thousands of people have enjoyed the unspoiled beauty of the 20-island cluster in the world's largest freshwater lake. Today, the park is enjoyed for its recreational and scenic value by both tourists and year-round residents alike.

The bill that I and several members of the Wisconsin delegation including Representatives, ASPIN, KASTENMEIER, KLEZCKA, MOODY, PETRI, and SENSENBRENNER have introduced, would add an environmentally important and scenic island to the National Lakeshore—a sandspit called Long Island.

Long Island is a low, curving sandy island about 3 miles in length averaging about one-quarter mile wide and historically separated and reconnected several times to the mainland Chequamegon Point to the southeast.

Due to lack of clarity when the park was created in 1970, Long Island got knocked out of the bill along with Chequamegon Point.

For many years however, groups like the Wisconsin Scientific Preservation Council have recognized the unique geological and natural resources attributes of this sandspit.

It is one of the best shorebirding areas in the State, and several protected and endangered bird species including the Piping Plover, Common Tern, and Bald Eagle have been found there.

The Island is both culturally and historically significant in the region, and was thought to play an important role in the fur trade of the 1660's. Long Island also has one of the first lighthouses in the western end of Lake Superior dating back to 1852.

From a recreational point of view, Long Island is much more accessible to nearby mainland communities than the other 20 islands. Because Long Island is a sandspit, the water surrounding it is very shallow and warms up more than the water around the other rocky cliff Apostles, making it possible to swim in the extremely cold Lake Superior waters.

A lot of people think that Long Island is in the park right now. Much of it is already government owned and many people want to use it like a park. The problem is that it isn't being managed like a park.

Abandoned Coast Guard buildings on BLM owned land have fallen into disrepair, and there is considerable litter on the premises this year, and recently the tire tracks of off road vehicles were found on the dunes and in other environmentally sensitive areas. Safety is also a concern.

Basically there needs to be an overall plan for the well managed use and preservation of Long Island's unique features.

We believe that this beautiful resource would be best managed by the National Park Service and I strongly urge adoption of H.R. 2182 with the committee amendment.

That's the best way to preserve the island in its existing state. The recently constructed Washburn and proposed Ashland Marina are expected to bring more boating traffic into the area. Long Island is close to both, and the legislation is a good way to link the Apostles Park to these nearby mainland communities while ensuring the preservation of a resource which might otherwise succumb to the increased pressures that increased traffic is likely to bring.

Mr. VENTO. I thank the gentleman for his comments.

Mr. Speaker, I yield such time as he may consume to the gentleman from Wisconsin [Mr. MOODY], a member of the committee.

Mr. MOODY. Mr. Speaker, I, too, would like to add my support to this bill.

Mr. Speaker, I am pleased to support H.R. 2182, which would add the southernmost island in the Apostle Islands chain, Long Island, to the Apostle Islands National Lakeshore.

This legislation, introduced by my colleague Representative OBEY, myself and other members of the delegation has received bipartisan support within our delegation, and this indicates its importance to the State of Wisconsin.

Long Island, which is about 2½ miles in length, has been connected and separated several times from the long Chequamegon Point to the southeast, but since 1977, has been connected by low sandy deposits. This area, known as the sand cut, would also be included in this legislation. The bill would immediately transfer the Federal property on Long Island to the administrative jurisdiction of the Secretary of the Interior for use as part of the Lakeshore, with the U.S. Coast Guard allowed to continue utilizing a portion of the island for use as navigational aids.

There are several advantages for desiring the inclusion of Long Island as the 21st island to be added to the National Lakeshore:

The increase in tourism in the Ashland-Washburn area would benefit from the close proximity of the island to the mainland for scenic and recreational experiences alike. In fact, the old Coast Guard buildings on Long Island could possible be restored and become points of historical interest in the National Lakeshore; and

Long Island is also one of the last remaining habitats in the Great Lakes region of two seriously endangered bird species, the piping plover and the common tern.

Bringing this island under the purview of the National Park Service will ensure good land management practices are followed in maintaining a balance between protecting wildlife and habitats and allowing the public to utilize the island for a variety of activities including research, birdwatching, hiking, and boating access.

H.R. 2182 has received a hearing and been favorably reported out of the Interior and Insular Affairs Committee, of which I am a member. Most importantly, there will be no significant increase in Federal expenditures as a result of this legislation being enacted.

I urge my colleagues to support passage of this legislation.

□ 1355

Mr. VENTO. Mr. Speaker, I yield such time as he may consume to the gentleman from Wisconsin [Mr. KLECZKA]

Mr. KLECZKA. I thank the gentleman for yielding time to me.

Mr. Speaker, I rise today as a cosponsor of H.R. 2182, and urge the House to approve this addition of Long Island to the Apostle Islands National Lakeshore.

My Milwaukee district bears little resemblance to the Apostle Islands region, but my constituents know a great vacation spot when they see one. Long Island's sandy beaches and dunes provide superb opportunities for swimming and hiking. The island's unique geological formations provide a safe nesting spot to over a hundred species or birds, several of them endangered. Finally, Long Island's proximity to the Washburn Marina and the proposed marina in Ashland would make its inclusion in the National Lakeshore an economic boon to these communities.

Mr. Speaker, I am proud to come from a State of unparalleled natural beauty. Let's preserve these gifts for the enjoyment of our children and grandchilden by passing this sensible legislation.

I congratulate Mr. OBEY, Mr. VENTO, Mr. MOODY, and Mr. LAGOMARSINO for their fine work,

Mr. VENTO. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Minnesota [Mr. VENTO] that the House suspend the rules and pass the bill, H.R. 2182, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. VENTO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

SENSE OF THE HOUSE THAT THE SOVIET UNION SHOULD ALLOW IGOR OGURTSOV TO EMIGRATE TO THE WEST WITHOUT RENOUNCING HIS VIEWS

Mr. FASCELL. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 76) expressing the sense of the House of Representatives that the Soviet Union should allow Igor Ogurtsov to be released from internal exile and allowed to emigrate to the West without renouncing his views.

The Clerk read as follows:

H. RES. 76

Whereas the Soviet Union is a signatory to the Final Act of the Conference on Security and Cooperation in Europe and is obligated to comply with the Universal Declaration of Human Rights;

Whereas Igor Ogurtsov, the founder of a religious-political opposition group in Soviet Union known as the All-Russian Social Christian Alliance for the Liberation of the People [VSKhSON], was tried in late 1976, without benefit of a fair and public hearing, with three other leaders of VSKhSON and was found guilty of treason;

Whereas while Igor Ogurtsov denied that he was guilty of treason, he was nonetheless sentenced to seven years in Vladimir Prison, eight years in a strict regime camp, and five years in internal exile;

Whereas the latest reports indicate that Igor Ogurtsov is very undernourished and weak; suffers from high blood pressure, liver malfunction, poor eye sight, loss of teeth; and has been described by his mother as a walking skeleton;

Whereas Igor Ogurtsov desperately wishes to emigrate to any country in the West that will accept him and his parents;

Whereas Igor Ogurtsov was offered an exit visa that would allow him and his parents to emigrate, but only if he signed a statement of pardon renouncing his views;

Whereas Igor Ogurtsov is the only remaining VSKhSON member still imprisoned: Now, therefore, be it

Resolved, That it is the sense of the House of Representatives that the President should—

(1) continue to express at every suitable opportunity and in the strongest possible terms the opposition of the United States to the forced internal exile and repressive treatment of Igor Ogurtsov; and

(2) urge the Soviet Union to—

(A) provide Igor Ogurtsov adequate medical care;

(B) grant Igor Ogurtsov immediate release from internal exile; and

(C) accept Igor Ogurtsov's application for exit visa and allow him emigrate with his parents without forcing him to renounce his views, in accordance with the Final act of the Conference on Security and Cooperation in Europe and with the Universal Declaration of Human Rights.

SEC. 2. The Clerk of the House of Representatives shall transmit a copy of this resolution to the President with the request that he further transmit copies of this resolution to the leadership of the Soviet Union and to the Ambassador of the Soviet Union to the United States.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Florida [Mr. FASCELL] will be recognized for 20 minutes and the gentleman from Michigan [Mr. BROOMFIELD] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Florida [Mr. FASCELL].

Mr. FASCELL. Mr. Speaker, I yield myself such time as I may consume.

GENERAL LEAVE

Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Resolution 76, the resolution presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. FASCELL. Mr. Speaker, I rise in support House Resolution 76 and commend the ranking minority member of the committee, the gentleman from Michigan, [Mr. BROOMFIELD], for his efforts on this legislation.

Mr. Speaker, Igor Ogurtsov is the founder of the religious-political opposition group in the Soviet Union known as the All-Russian Social Christian Alliance for the Liberation of the People. Because of his activities, Mr. Ogurstov was tried for treason in 1967 and received a long prison sentence of 15 years and is now in internal exile.

The physical condition of Mr. Ogurtsov is very poor. He suffers from undernourishment, high blood pressure, liver and eye problems, and other impairments. He desperately wishes to leave the Soviet Union but cannot do so unless he renounces his political views.

House Resolution 76 simply expresses the sense of the House of Representatives that the Soviet Union should release Igor Ogurtsov and allow him and his parents to emigrate without conditions. This is a step the Soviet Union must take if it is to comply with its obligations under the Helsinki Final Act.

I hope the House will act unanimously to support this resolution.

Mr. BROOMFIELD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the resolution before us today concerns the plight of Soviet dissident Igor Ogurtsov. House Resolution 76 expresses the sense of the House of Representatives that the President should continue to express the opposition of the United States to the forced internal exile and repressive treatment of Igor Ogurtsov. The President is asked to urge the Soviet Union to provide Igor Ogurtsov with adequate medical care, grant his immediate release from internal exile, and accept his application for exit visa and allow him to emigrate to the West with his parents without forcing him to renounce his views.

Born in Volgagrad in 1937, Igor Ogurtsov spent most of his life residing in Leningrad and graduated from Leningrad State University in 1966 taking a degree in oriental studies. Ogurtsov was the founder in 1964 of a religious-political opposition group in the Soviet Union known as the All Russian Social Christian Alliance for the Liberation of the People. The organization survived for 3 years and when it was finally broken up by the KGB its membership numbered 28. Despite Ogurtsov's denial of guilt, he was convicted of treason in a closed Leningrad court and sentenced to 15 years of imprisonment, to be followed by 5 years of internal exile.

Recent reports indicate that Igor Ogurtsov is in poor health suffering from high blood pressure, liver malfunction, loss of teeth, and a number of other serious maladies. He was recently released to visit relatives in Leningrad, but is scheduled to return to internal exile very shortly. Given his poor health, the urgency of this situation cannot be overstated.

The harsh treatment accorded Mr. Ogurtsov is a matter of great concern to the Russian-American community. Deserving special mention for her tireless efforts to facilitate Igor Ogurtsov's release is Mrs. Vera Politis, chairwoman of the National Human Rights Committee of the Congress of Russian Americans. I would like to commend Mrs. Politis for the worthy efforts of her organization on behalf of Mr. Ogurtsov and other victims of Soviet repression.

House Resolution 76 has over 80 cosponsors and the Senate last year passed a resolution similar to the one before us today. Mr. Ogurtsov is now serving the 18th year of his sentence for his "crimes" against the Soviet state. These alleged "crimes" were to urge that his country follow a Christian faith and observe basic human rights.

Mr. Speaker, House Resolution 76 raises a very personal and specific human rights issue of immediate and crucial importance. I urge my colleagues to support the measure now before us.

Mr. Speaker, I yield such time as he may consume to the gentleman from New York [Mr. GILMAN].

Mr. GILMAN. Mr. Speaker, I rise in strong support of the legislation now pending before us. I commend the gentleman from Michigan [Mr. BROOMFIELD] who, as ranking minority member of our Foreign Affairs Committee, has played a large role in bringing this important measure to the floor of the House. As primary sponsor of House Resolution 76 with our good colleague, Congressman WORTLEY of New York, Congressman BROOMFIELD has once again given the Members of the House the vital oppor-

tunity to speak out on human rights practices in the Soviet Union. Igor Ogurtsov is an innocent man who has spent many years wasting away in the vast expanse of the Soviet gulag. A prolific writer, he has committed no crime against either Soviet society or the state. Yet he continues to languish in prison for no other reason than some bureaucrat wanted him to suffer. The Congress of Russian Americans, many of whose members reside in my district, have consistently supported Mr. Ogurtsov over the years, and are to be commended for their perseverence of purpose.

Mr. Speaker, I was pleased to have cosponsored this resolution of support for Mr. Ogurtsov last Congress as well, and coming on the heels of the recent Geneva summit meeting, this legislation is yet another expression of our feelings on the very important issue of human rights. Though the Soviets are signatories to numerous documents detailing the freedom of the individual by thought, word, or deed, they have not fulfilled either the spirit or the letter of these international treaties. By voting for House Resolution 76 today, the Members of this body have a twofold opportunity to relay to the Soviet Government their intentions with respect to human rights—first, that Igor Ogurtsov enjoys the full support and solidarity of the entire House of Representatives, and second, that this Congress will reiterate as necessary our commitment to human rights and the dignity of the individual. Accordingly, Mr. Speaker, I urge our colleagues to join me in voting for House Resolution 76; Igor Ogurtsov, an innocent and courageous man, deserves no less.

Mr. FASCELL. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida [Mr. FASCELL] that the House suspend the rules and agree to the resolution, House Resolution 76.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the resolution was agreed to.

A motion to reconsider was laid on the table.

ENCOURAGING PRIVATE SECTOR INVOLVEMENT IN WORLD HUNGER

Mr. FASCELL. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 57) encouraging private sector involvement in the worldwide effort to alleviate hunger, as amended.

The Clerk read as follows:

H. CON. RES. 57

Whereas the United States faces the challenge of leading the world to a new era of prosperity, created in significant part by enabling the dynamism of the private sector to use its creative talents in the third world;

Whereas nations have identified food self-reliance as a priority national goal;

Whereas the challenge to help the world's hungry is a global concern and ultimately a matter of United States national security, the direct result of a world grown more interdependent, and dictated by traditional humanitarian concerns;

Whereas the challenge must not be confronted solely within the context of an existing crisis, but with an eye toward the future food requirements of developing countries;

Whereas both the private and public sectors, by reason of their knowledge, experience, and other resources, have a valuable role to play in alleviating world hunger;

Whereas American involvement with helping the hungry abroad has encompassed a wide spectrum of activities in both the public and private sectors;

Whereas out of past successes and failures have come a better understanding of the benefits and limitations of the activities of each sector;

Whereas the issue is not generally public sector activities versus private sector activities, but the appropriate combination of each under the *appropriate* conditions;

Whereas the conditions that are *appropriate* vary enormously from country to country, depending on the respective stage of development of and the development priorities established by the country, and the services offered by prospective foreign investors;

Whereas corporate investment, as is evidenced by the work of the organizations represented by the Fowler-McCracken Commission, has far-reaching implications for efforts to alleviate world hunger, both through direct involvement in national food systems and, more generally, through its impact upon employment levels, purchasing power, income distribution, balance of payments questions, and productivity in developing nations;

Whereas the most attractive countries for foreign investors remain the middle- and upper-income developing countries where rapid advances are being made in industrialization and the expansion of economic and social infrastructure; and

Whereas the less affluent developing countries have the greatest food problems—the critical lack of trained manpower and expertise and the need for farm-to-market roads, irrigation systems, communication networks, and newer port facilities—but offer little incentive for investment by foreign corporations: Now, therefore, be it,

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the order to meet the challenge of encouraging private sector investment indeveloping countries and to target some of that investment so that it helps allevate hunger, it is necesary to encourage the private sector to become invovled with other nations wherever it can in the worldwide effort to alleviate hunger.

SEC. 2. It is further the sense of the Congress that, in light of the market for many developing country products, such investment by the private sector must be encouraged in order to promote income generation, improved natural resource management, and efforts to alleviate world hunger.

SEC. 3. It is further the sense of the Congress that—

(1) America's leading institutions in the public and private sectors should join forces, during this year and through the balance of this decade, in developing the commitments and the action plan essential to ending world hunger;

(2) the Fowler-McCracken Commission and other interested organizations should work together at the national, regional, and State level to build a national commitment so crucial to the success of this mission;

(3) such an undertaking should be designed to secure from private firms a commitment to a corporate agenda that reflects a resolve to end world hunger;

(4) particular consideration should be devoted to mobilizing the public and private resources needed to assist the less-affluent developing countries in enabling their people to meet basic human needs; and

(5) those nations in need of further assistance should consider how best to create the political and economic conditions necessary to enable their own people and the world's public and private sectors to invest in the development of those nations.

The SPEAKER pro tempore. Is a second demanded?

Mr. GILMAN. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Florida [Mr. FASCELL] will be recognized for 20 minutes and the gentleman from New York [Mr. GILMAN] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Florida [Mr. FASCELL].

Mr. FASCELL. Mr. Speaker, I yield myself such time as I may consume.

GENERAL LEAVE

Mr. FASCELL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on House Concurrent Resolution 57 which is presently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. FASCELL. Mr. Speaker, I rise in support of House Concurrent Resolution 57, encouraging private sector involvement in the worldwide effort to alleviate hunger.

This resolution endorses the work of the Fowler-McCracken Commission in urging private sector investment in agricultural activities in developing countries as part of the effort to alleviate world hunger.

In developing countries as in this country, the farmer represents the essence of the private sector. These farmers must be supported by appropriate policies in order to work most efficiently in their basic goal of food production. Encouragement of corporate investment in agriculture-related industry is fundamental to creating and maintaining one demand for agricultural production. This demand cre-

ation is a necessary incentive for increasing agricultural output.

The resolution also calls for a partnership between the public and private sectors in order to develop the commitments and action plan essential to ending world hunger. It urges mobilization of the public and private resources needed to assist the poorer developing countries to feed their people.

We know that there is no one answer to the complex issues of hunger and poverty. Our experience in this country, however, confirms that a strong private sector provides the means for people to help themselves to a better life. I urge my colleagues to support this resolution encouraging the involvement of the private sector in developing country agricultural activities.

Mr. BROOMFIELD. Mr. Speaker, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from Michigan.

Mr. BROOMFIELD. Mr. Speaker, in February, I joined the distinguished gentleman from New York [Mr. GILMAN] and the distinguished chairman of the Foreign Affairs Committee [Mr. FASCELL], in sponsoring House Concurrent Resolution 57, legislation calling upon the private sector to apply itself in the worldwide effort to alleviate hunger, Congress can help to provide impetus to the private sector to use its creative talents to meet the challenge of helping the world's hungry.

The hunger issue is of great concern for both humanitarian and national security reasons. House Concurrent Resolution 57 expresses the sense of Congress that it is necessary to encourage the private sector to become involved with other nations wherever it can in the global effort to alleviate hunger. It also suggests that the private and public sectors should join forces in this worthwhile effort.

Mr. Speaker, this resolution supports the work of the Fowler-McCraken Commission the goal of which is cementing the corporate commitment to ending world hunger. I urge my colleagues to support the resolution as yet another way of broadening the attack on a serious situation that must be faced with both public and private initiative and resources.

Mr. GILMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to commend the distinguished chairman, the gentleman from Florida [Mr. FASCELL], and the ranking minority member on the committee, the gentleman from Michigan [Mr. BROOMFIELD], for helping to bring this measure to the floor at this time.

Mr. Speaker, the American corporate community has the unique capability and the necessary interest to help alleviate world hunger. The private sector has an undeniable stake in developing strong, viable overseas partners. Hunger and malnutrition are enemies of mankind that not only threaten world peace and prosperity but also severely limit potential international markets and domestic job opportunities.

Today's challenges go beyond poor rainfall and declining food production to encompass the longer term dilemmas such as inadquate transportation, poor health systems, environmental degradation and the lack of sound economic and agricultural policies in the recipient countries.

The private sector can: Build the required infrastucture, enhance food production, infuse solely-needed management expertise and an entrepreneurial spirit into the markets of the affected countries, and, through successful international business practices and trade, help to encourage the necessary long-term economic reforms.

Accordingly, the Congress must challenge and encourage the American private sector to commit its time, expertise and captial investment to help alleviate not only the short-term crisis but the longer-term costs as well. While, in Africa the short-term crisis is abating, the problems to move the African nations and other hungry countries from relief to self-reliance are not yet in place—at least nowhere the magnitude that is needed.

House Concurrent Resolution 57 would pay a significant role in recognizing this problem and in helping to draw attention to its resolution.

I urge my colleagues to adopt House Concurrent Resolution 57.

Mrs. ROUKEMA. Mr. Speaker, first, I would like to commend the gentleman from New York [Mr. GILMAN] for his leadership on this issue, his sponsorship of House Concurrent Resolution 57 and his work on the Fowler-McCracken Commission's executive committee. This is just another example of his untiring commitment to the task of ending world hunger.

Over the past year we have seen an unprecedented response by the U.S. Government, other Western nations, numerous voluntary organizations, and the public at large to the famine crisis in Africa. The United States alone has sent over 3 million metric tons of food aid valued at over $1 billion. We made this effort because millions of people were on the brink of starvation. The United Nations estimated that 200 million people were affected by the famine, with up to 30 million seriously at risk of dying due to disease and malnutrition. Thankfully, our aid went a long way toward saving many.

Unfortunately, the dire situation for many in Africa is not over. We must continue to send food aid, while we search for ways to bolster Africa's unproductive economic and agricultural sectors. As the ranking minority member of the House Select Committee on Hunger, I, and my colleagues, have heard from a number of expert witnesses, most recently former Defense Secretary and ex-President of the World Bank, Robert McNamara, on the need for a concerted, coordinated, long-term commitment to solving the problems in Africa. We must do so for humanitarian reasons, as well as economic and strategic ones.

Make no mistake about it, this will take the continued commitment of our national resources. We also clearly realize that in this age of astronomical budget deficits, there may be limits to what we can afford to contribute. The best approach is to take full advantage of what we can commit. This Congress can facilitate both public and private involvement and coordination in this effort. That is exactly what House Conference Report 57 is designed to do. It makes note of the special role that the private sector, especially American corporations, can play in terms of money, strategy, and expertise. Greater private sector investment and involvement in the poorest developing countries will serve to enhance our governmental efforts to end hunger and malnutrition.

In the last year Mr. LELAND and I encouraged U.S. pharmaceutical companies to donate supplies for the famine relief effort. They responded with large quantities of vaccines, antibiotics, and vitamins, valued at millions of dollars. Transportation for these much-needed supplies was paid for by the employees of a major air freight company. That is but one example of the kind of corporate involvement that is possible if we clearly state our needs and objectives. By building a national commitment, we can gain much broader participation by the American private sector in addressing hunger issues.

We are well aware and are grateful for the proven generosity of American corporations in helping the truly needy, But they can do more. I view this resolution as somewhat of a challenge to them. I believe that a vast public spirit and altruism remains to be tapped in America. We saw it begin to surface in the generosity displayed through the Live-Aid and USA for Africa events, which raised over $100 million and the consciousness of our youngest generation. Can our corporate board rooms do as well? Rotary International and thousands of Rotarians in the United States have pledged to raise $120 million for worldwide immunization of children against polio. Can other organizations set and reach such a goal in this admirable effort? I think that they can, and we in the Congress should encourage them every step of the way.

This resolution is one small part of that encouragement. The solutions to the problems of Africa lie in long-term efforts to increase food production in the poorest countries and to improve food distribution in nearly every country. With the commitment of both the public and private sectors, and the proper coordination between them, we can utilize our resources to their utmost advantage. We may not solve the problems in a day or a year, but we can do it, we must do it and should start today. I urge all Members to support this resolution.

Mr. FASCELL. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida [Mr. FASCELL] that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 57, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution, as amended, was agreed to.

A motion to reconsider was laid on the table.

RESTORATION OF FEDERAL RECOGNITION TO YSLETA DEL SUR PUEBLO AND ALABAMA AND COUSHATTA INDIAN TRIBES OF TEXAS

Mr. UDALL. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1344) to provide for the restoration of Federal recognition to the Ysleta del Sur Pueblo and the Alabama and Coushatta Indian Tribes of Texas, and for other purposes, as amended.

The Clerk read as follows:

H.R. 1344

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Ysleta del Sur Pueblo and Alabama and Coushatta Indian Tribes of Texas Restoration Act".

REGULATIONS

SEC. 2. The Secretary of the Interior or his designated representative may promulgate such regulations as may be necessary to carry out the provisions of this Act.

TITLE I—YSLETA DEL SUR PUEBLO RESTORATION

DEFINITIONS

SEC. 101. For purposes of this title—

(1) the term "tribe" means the Ysleta del Sur Pueblo (as so designated by section 102);

(2) the term "Secretary" means the Secretary of the Interior or his designated representative;

(3) the term "reservation" means the lands held by the tribe on the date of the enactment of this title and the lands held in trust by the State and by the Texas Indian Commission for the benefit of the tribe on such date;

(4) the term "State" means the State of Texas;

(5) the term "Tribal Council" means the governing body of the tribe; and

(6) the term "Tiwa Indians Act" means the Act entitled "An Act relating to the Tiwa Indians of Texas." and approved April 12, 1968 (82 Stat. 93).

REDESIGNATION OF TRIBE

SEC. 102. The Indians designated as the Tiwa Indians of Ysleta, Texas, by the Tiwa Indians Act shall, on and after the date of the enactment of this title, be known and designated as the Ysleta del Sur Pueblo. Any reference in any law, map, regulation, document, record, or other paper of the United States to the Tiwa Indians of Ysleta, Texas, shall be deemed to be a reference to the Ysleta del Sur Pueblo.

RESTORATION OF FEDERAL RECOGNITION, RIGHTS, AND BENEFITS

SEC. 103. (a) FEDERAL RECOGNITION.—Federal recognition of the tribe and of the trust relationship between the United States and the tribe is hereby restored. All laws and rules of law of the United States of general application to Indians, to nations, tribes, or bands of Indians, or to Indian reservations which are not inconsistent with any specific provision contained in this title shall apply to the members of the tribe, the tribe, and the reservation.

(b) RESTORATION OF RIGHTS AND PRIVILEGES.—All rights and privileges of the tribe and members of the tribe under any Federal treaty, statute, Executive order, agreement, or under any authority of the United States which may have been diminished or lost under the Tiwa Indians Act are hereby restored.

(c) FEDERAL SERVICES AND BENEFITS.—Notwithstanding any other provision of law, the tribe and the members of the tribe shall be eligible, on and after the date of the enactment of this title, for all benefits and services furnished to federally recognized Indian tribes.

(d) EFFECT OF PROPERTY RIGHTS AND OTHER OBLIGATIONS.—Except as otherwise specifically provided in this title, the enactment of this title shall not affect any property right or obligation or any contractual right or obligation in existence before the date of the enactment of this title or any obligation for taxes levied before such date.

STATE AND TRIBAL AUTHORITY

SEC. 104. (a) STATE AUTHORITY.—Nothing in this Act shall affect the power of the State of Texas to enact special legislation benefiting the tribe.

(b) TRIBAL AUTHORITY.—The Tribal Council, as such Council is constituted on the date of the enactment of this title, shall represent the tribe and its members in the implementation of this title and shall have full authority and capacity—

(1) to enter into contracts, grant agreements, and other arrangements with any Federal department or agency, and

(2) to administer or operate any program or activity under or in connection with any such contract, agreement, or arrangement, to enter into subcontracts or award grants to provide for the administration of any such program or activity, or to conduct any other activity under or in connection with any such contract, agreement, or arrangement.

PROVISIONS RELATING TO TRIBAL RESERVATION

SEC. 105. (a) FEDERAL RESERVATION ESTABLISHED.—The reservation is hereby declared to be a Federal Indian reservation for the use and benefit of the tribe without regard to whether legal title to such lands is held by the State or by the tribe.

(b) CONVEYANCE OF LAND BY STATE.—The Secretary shall—

(1) accept any offer from the State to convey title to any land held in trust by the State or by the Texas Indian Commission for the benefit of the tribe to the Secretary, and

(2) hold such title, upon conveyance by the State, in trust for the benefit of the tribe.

(c) CONVEYANCE OF LAND BY TRIBE.—At the written request of the Tribal Council, the Secretary shall—

(1) accept conveyance by the tribe of title to any land held by the tribe to the Secretary, and

(2) hold such title, upon such conveyance by the tribe, in trust for the benefit of the tribe.

(d) APPROVAL OF DEED BY ATTORNEY GENERAL.—Notwithstanding any other provision of law regulation, the Attorney General of the United States shall approve any deed or other instrument from the State or the tribe which conveys title to land within the reservation to the United States.

(e) PERMANENT IMPROVEMENT AUTHORIZED.—Notwithstanding any other provision of law or rule of law, the Secretary or the tribe any erect permanent improvements, improvements of substantial value, or any other improvement authorized by law on the reservation without regard to whether legal title to such lands has been conveyed to the Secretary by the State or the tribe.

(f) CIVIL AND CRIMINAL JURISDICTION WITHIN RESERVATION.—The State shall exercise civil criminal jurisdiction within the boundaries of the reservation as if such State had assumed such jurisdiction with the consent of the tribe under sections 401 and 402 of the Act entitled "An Act to prescribe penalties for certain acts of violence or intimidation, and for other purposes," and approved April 11, 1968 (25 U.S.C. 1321, 1322).

(g) PLAN FOR ENLARGEMENT OF PRESERVATION.—The Secretary shall negotiate with the tribe concerning the enlargement of the reservation and, not later than two years after the date of the enactment of this Act, shall develop a plan for the enlargement of the reservation for the tribe. The plan shall include provisions for the acquisition of land to be selected from available public, State, or private lands within El Paso or Hudspeth Counties, Texas. Upon approval of such plan by the tribe, the Secretary shall submit such plan, in the form of proposed legislation, to the Congress.

(h) NOTIFICATION AND CONSULTIVE REQUIREMENTS FOR PLAN.—To assure that legitimate State and local interests are not prejudiced by the enlargement of the reservation for the tribe, the Secretary, in developing the plan under subsection (g) shall notify and consult with all appropriate officials of the State of Texas, all appropriate local government officials in the affected area in the State of Texas, and any other interested party. The consultations required under this subsection shall include—

(1) the size and location of the additions to the reservation;

(2) the effect the enlargement of the reservation would have on State and local tax revenues;

(3) the criminal and civil jurisdiction of the State of Texas with respect to the reservation and persons on the reservation;

(4) the provision of State and local services to the reservation and to the tribe and members of the tribe on the reservation; and

(5) the provision of Federal services to the reservation and to the tribe and members of the tribe and the provision of services by the tribe to members of the tribe.

(i) CONTENTS OF PLAN.—Any plan developed for the enlargement of the reservation shall provide that the Secretary shall not accept any real property in trust for the benefit of the tribe or bands unless such real property is located either within El Paso or Hudspeth Counties, State of Texas.

(j) STATEMENT APPENDED TO ENLARGEMENT PLAN RESPECTING IMPLEMENTATION OF NOTIFICATION AND CONSULTATIVE REQUIREMENTS.—The Secretary shall append to the plan a detailed statement describing the manner in which the notification and consultation prescribed by subsection (h) was carried out and shall include any written comments with respect to the enlargement of the reservation for the tribe submitted to the Secretary by State and local officials and other interested parties in the course of such consultation.

TIWA INDIANS ACT REPEALED

SEC. 106. The Tiwa Indians Act is hereby repealed.

SEC. 107. Gaming, lottery or bingo on the tribe's reservation and on tribal lands shall only be conducted pursuant to a tribal ordinance or law approved by the Secretary of the Interior. Until amended as provided below, the tribal gaming laws, regulations and licensing requirements shall be identical to the laws and regulations of the State of Texas regarding gambling, lottery and bingo. Any amendments to the tribal gaming laws, regulations and licensing requirements shall be submitted by the tribe to the Secretary for approval. Upon such approval, the Secretary shall submit such amendments to the Congress. Such amendments shall become effective at the end of a 60 legislative day period beginning on the day such amendments are submitted to the Congress, unless during such 60-day period Congress adopts a joint resolution disapproving such amendments.

TITLE II—ALABAMA AND COUSHATTA INDIAN TRIBES OF TEXAS

DEFINITIONS

SEC. 201. For purposes of this title—

(1) the term "tribe" means the Alabama and Coushatta Indian Tribes of Texas (considered as one tribe in accordance with section 202);

(2) the term "Secretary" means the Secretary of the Interior or his designated representative;

(3) the term "reservation" means the Alabama and Coushatta Indian Reservation in Polk County, Texas, comprised of—

(A) the lands and other natural resources conveyed to the State of Texas by the Secretary pursuant to the provisions of section 1 of the Act entitled "An Act to provide for the termination of Federal supervision over the property of the Alabama and Coushatta Tribes of Indians of Texas, and the individual members thereof; and for other purposes." and approved August 23, 1954 (25 U.S.C. 721), and

(B) the lands and other natural resources purchased for and deeded to the Alabama Indians in accordance with an act of the legislature of the State of Texas approved February 3, 1854;

(4) the term "State" means the State of Texas;

(5) the term "constitution and bylaws" means the constitution and bylaws of the tribe which were adopted on June 16, 1971; and

(6) the term "Tribal Council" means the governing body of the tribe under the constitution and bylaws.

ALABAMA AND COUSHATTA INDIAN TRIBES OF TEXAS CONSIDERED AS ONE TRIBE

SEC. 202. The Alabama and Coushatta Indian Tribes of Texas shall be considered as one tribal unit for purposes of this title and any other law or rule of law of the United States.

RESTORATION OF FEDERAL RECOGNITION, RIGHTS AND BENEFITS

SEC. 203. (a) FEDERAL RECOGNITION.—Federal recognition of the tribe and of the trust relationship between the United States and the tribe is hereby restored. The Act of June 18, 1934 (48 Stat. 984; 25 U.S.C. 476) and all laws and rules of law of the United States of general application to Indians, to nations, tribes, or bands of Indians, or to Indian reservations which are not inconsistent with any specific provision contained in this title shall apply to the members of the tribe, the tribe, and the reservation.

(b) RESTORATION OF RIGHTS AND PRIVILEGES.—All rights and privileges of the tribe and members of the tribe under any Federal treaty, Executive order, agreement, statute, or under any other authority of the United States which may have been diminished or lost under the Act entitled "An Act to provide for the termination of Federal supervision over the property of the Alabama and Coushatta Tribes of Indians of Texas, and the individual members thereof; and for other purposes." and approved August 23, 1954, are hereby restored and such Act shall not apply to the tribe or to members of the tribe after the date of the enactment of this title.

(c) FEDERAL BENEFITS AND SERVICES.—Notwithstanding any other provision of law, the tribe and the members of the tribe shall be eligible, on and after the date of the enactment of this title, for all benefits and services furnished to federally recognized Indian tribes.

(d) EFFECT ON PROPERTY RIGHTS AND OTHER OBLIGATIONS.—Except as otherwise specifically provided in this title, the enactment of this title shall not affect any property right or obligation or any contractual right or obligation in existence before the date of the enactment of this title or any obligation for taxes levied before such date.

STATE AND TRIBAL AUTHORITY

SEC. 204. (a) STATE AUTHORITY.—Nothing in this Act shall affect the power of the State of Texas to enact special legislation benefiting the tribe.

(b) CURRENT CONSTITUTION AND BYLAWS TO REMAIN IN EFFECT.—The constitution and bylaws of the tribe on file with the Committee on Interior and Insular Affairs is hereby declared to be approved for the purposes of section 16 of the Act of June 18, 1934 (48 Stat. 987; 25 U.S.C. 476) except that all reference to the Texas Indian Commission shall be considered as reference to the Secretary of the Interior.

(c) AUTHORITY AND CAPACITY OF TRIBAL COUNCIL.—No provision contained in this title shall affect the power of the Tribal Council to take any action under the constitution and bylaws described in subsection (b). The Tribal Council shall represent the tribe and its members in the implementation of this title and shall have full authority and capacity—

(1) to enter into contracts, grant agreements, and other arrangements with any Federal department or agency;

(2) to administer or operate any program or activity under or in connection with any such contract, agreement, or arrangement, to enter into subcontracts or award grants to provide for the administration of any such program or activity, or to conduct any other activity under or in connection with any such contract, agreement, or arrangement; and

(3) to bind any tribal governing body selected under any new constitution adopted in accordance with section 205 as the successor in interest to the Tribal Council.

ADOPTION OF NEW CONSTITUTION AND BYLAWS

SEC. 205. Upon written request of the tribal council, the Secretary shall hold an election for the members of the tribe for the purpose of adopting a new constitution and bylaws in accordance with section 16 of the Act of June 18, 1934 (25 U.S.C. 476).

PROVISIONS RELATING TO TRIBAL RESERVATION

SEC. 206. (a) FEDERAL RESERVATION ESTABLISHED.—The reservation is hereby declared to be a Federal Indian reservation for the use and benefit of the tribe without regard to whether legal title to such lands is held by the State or by the tribe.

(b) CONVEYANCE OF LAND BY STATE.—The Secretary shall—

(1) accept any offer from the State to convey title to any lands held in trust by the State or the Texas Indian Commission for the benefit of the tribe to the Secretary, and

(2) shall hold such title, upon conveyance by the State, in trust for the benefit of the tribe.

(c) CONVEYANCE OF LAND BY TRIBE.—At the written request of the Tribal Council, the Secretary shall—

(1) accept conveyance by the tribe of title to any lands within the reservation which are held by the tribe to the Secretary, and

(2) hold such title, upon such conveyance by the tribe, in trust for the benefit of the tribe.

(d) APPROVAL OF DEED BY ATTORNEY GENERAL.—Notwithstanding any other provision of law or regulation, the Attorney General of the United States shall approve any deed or other instrument from the State or the tribe which conveys title to lands within the reservation to the United States.

(e) PERMANENT IMPROVEMENTS AUTHORIZED.—Notwithstanding any other provision of law or rule of law, the Secretary of the tribe may erect permanent improvements, improvements of substantial value, or any other improvement authorized by law on the reservation without regard to whether legal title to such lands has been conveyed to the Secretary by the State or the tribe.

(f) CIVIL AND CRIMINAL JURISDICTION WITHIN RESERVATION.—The state shall exercise civil and criminal jurisdiction within the boundaries of the reservation as if such State had assumed such jurisdiction with the consent of the tribe under sections 401 and 402 of the Act entitled "An Act to prescribe penalties for certain acts of violence or intimidation, and for other purposes," and approved April 11, 1968 (25 U.S.C. 1321, 1322).

SEC. 207. Gaming, lottery or bingo on the tribe's reservation and on tribal lands shall only be conducted pursuant to a tribal ordinance or law approved by the Secretary of the Interior. Until amended as provided below, the tribal gaming laws, regulations and licensing requirements shall be identi-

cal to the laws and regulations of the State of Texas regarding gambling, lottery and bingo. Any amendments to the tribal gaming laws, regulations and licensing requirements shall be submitted by the tribe to the Secretary for approval. Upon such approval, the Secretary shall submit such amendments to the Congress. Such amendments shall become effective at the end of a 60 legislative day period beginning on the day such amendments are submitted to the Congress, unless during such 60-day period Congress adopts a joint resolution disapproving such amendments.

The SPEAKER pro tempore. Is a second demanded?

Mr. DEWINE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Arizona [Mr. UDALL] will be recognized for 20 minutes and the gentleman from Ohio [Mr. DEWINE] will be recognized for 20 minutes.

The Chair recognizes the gentleman from Arizona [Mr. UDALL].

Mr. UDALL. Mr. Speaker, I yield myself such time as I may consume.

GENERAL LEAVE

Mr. UDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise their remarks on H.R. 1344, the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

Mr. UDALL. Mr. Speaker, H.R. 1344 is a bill to provide for the restoration of Federal recognition to the Ysleta Del Sur Pueblo and the Alabama and Coushatta Indian Tribes. Both tribes are located in the State of Texas.

The Ysleta Del Sur Pueblo had its Federal trust relationship terminated by an act of Congress in 1967 and transferred to the State of Texas. The Alabama Coushatta Tribe had its trust relationship with the United States terminated in 1954 and that relationship was transferred to the State of Texas.

The attorney general of the State of Texas issued an opinion recently in which he stated that under the Texas Constitution, it is illegal for the State to continue to maintain a trust relationship with these two tribes. This bill therefore would reestablish a trust relationship with the United States so that the tribal members could again be eligible to participate in Federal programs that are available to Indians because of their special status as Indians.

This bill does not call for any additional appropriations or authorization and is supported by the tribes and the State of Texas. I therefore urge passage of this legislation.

Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Texas [Mr. COLEMAN], the author of the bill.
